Time—2:48, 2:38, 2:35

RACES AT HOLLISTER.

The Hollister Driving Club gave a matinee on Sunday, Sept. 3rd that drew a good crowd and furnished some excellent sport although the fields were small.

In the first race Gorden Campbell's Lady Guy won two straight heats from Geo. E. Shaw's Judge D. with spirited contests in both heats.

Jack Kydd's Ben Alto was best in the next race and defeated Jerry Wright's Oro Guy and Ramelli Bros.' Monte in two heats.

Mat Zahner's Fred Branch was on edge and defeated Clyde Pritchard's Girlie in straight heats of a half mile each.

In a quarter dash for runners M. J. Caldera's Ruinart Jr. defeated R. M. Ladd's Babe and a horse called Unknown, leading all the way.

The day was an ideal one for racing. Al Buckley had the track in first class shape, and the crowd seemed to be well pleased with the contests.

R. I. Orr, Geo. Crosby and R. I. Orr, Jr. officiated in the stand.

Three races made up the card of races held at Santa Rosa last Sunday by the Sonoma County Driving Club. The summary:

First race—2:20 mixed:

Peaches (McGovern)	1	1	
Jessie Dillon (Morris)	2	2	

Time—2:21, 2:20.

Second race—Free-for-all pace:

Sarah C. (Morris)	1	1	
Hamburg Bell (Dupont)	2	2	
Tom Murphy (Silva)	2	2	

Time—2:16, 2:14½.

Third race—2:25 mixed:

Ike M. (McGovern)	1	1	
Glenwood Chief (Millerick)	2	2	

Time—2:28, 2:28½.

A new champion yearling pacing filly appeared at Springfield, Ill., recently, when the yearling filly The Completion, by The Exponent 2:11¾, took a record of 2:18¾, displacing the former record of 2:19½ set by Rose Magee, daughter of The Abbe 2:04, in 1914. The Completion is, of course, a product of Maple Lawn Farm, Delavan, Ill., the home of her sire. She is out of Bonella by Azmoor 2:20¾ (son of Electioneer 125), second dam Bonnie 2:25 by Gen. Benton 1755, third dam America by Hambletonian 10, fourth dam Fanny Star by American Star 14. The Maple Lawn Farm stallions, by the way, are well represented among the new performers. Besides The Completion (1) p. 2:18¾, The Exponent has E-Senator 2:28, The Enterpriser (2) 2:28¼, The Purpose (2) 2:29¼, and Little Leon p. (4) 2:23½. Trampfast (2) 2:12¼ has E. J. L. (3) 2:11¼, Whirlfast (4) 2:12¾, Irene Trampfast (3) 2:29¼, and Romea Trampfast (2) 2:30.—Horse World.

Thoroughbred Matters

With only about thirty thoroughbreds on the grounds at Sacramento during the State Fair last week, it was not an easy job to make up races that would result in good contests, especially as there were three running races each day for seven days, but there were enough starters in every event to make a respectable race of it and there were a number of close finishes during the week. It is very hard to get running horse owners to race their horses for small purses where there is no chance to wager on them, and the surprise of the meeting was that there were any running races at all under the circumstances. That the large crowds present enjoyed the runs was very evident as there was always a rush toward the fence when the runners were called. It is to be hoped that the California State Agricultural Society will see its way to provide for the thoroughbreds at future fairs, and in this State where there is a large number of thoroughbred breeders it should not be difficult to inaugurate stake races for colts, fillies and aged horses that would do much to encourage the further breeding of thoroughbreds. All county and district fairs should give races for the runners and if there could be concert of action by these associations a circuit could be announced early every year that would make summer racing in California as great an attraction for the fairs as it was years ago before continuous running meetings in this State led to the drastic laws now on the statutes that prevent all wagering on races.

◈ ◈ ◈

On Tuesday next the fall meeting of the Reno Fair and Racing Association will open in that city and already there are many horsemen on the ground getting their horses ready for the excellent program of races that has been arranged. Manager Schas expects at least 400 horses to be at the track by opening day. The meeting will be conducted under the rules and regulations of the Nevada State Racing Commission, and the pari-mutual system of wagering will prevail.

◈ ◈ ◈

John E. Madden has bought another Rock Sand colt from August Belmont, which he will send to Kentucky for stud purposes. This is the black colt Lord Rock Vale (3) by Rock Sand out of the great brood mare Lady Violet by The Ill Used. While Rock Vale has been a winner, it was mainly on account of his rich breeding that Mr. Madden bought him. His dam, Lady Violet, was a daughter of Lady Rosebery, by Kingfisher, and her second dam was Lady Blessington, by imported Eclipse. She has been a prolific brood mare, her best son being that very fast racehorse, Watervale, by imported Watercress.

◈ ◈ ◈

James W. Coffroth, president of the Lower California Jockey Club, writes from the East that his trip across the Rickies in quest of high-class horses and Jockeys for his Tijuana meeting has been a success. He has lined up a number of stables, and is looking forward to a banner opening of the hundred-day or more meeting on November 11. The program of stake events has been completed, and proved attractive to Easterners. There will be the Coffroth handicap, valued at $5000, at a mile and a quarter; San Diego Business Men's Handicap, $2500, 1 1-16 miles; All Age Handicap, $1500, one mile; Los Angeles High Weight Handicap, $1500, six furlongs; Tijuana Selling Stakes, $1500, six furlongs, and the Coronado Selling Stakes, $1500, 1 1-16 miles. No purse of less than $400 will be offered, which should insure some high-class entries.

◈ ◈ ◈

Mr. R. Trimble, treasurer of the United States Steel Corporation, has purchased in England the stallion Huon II for a reported price of $5000. Huon II is by Ard Patrick (winner of the Derby) out of Hyeres by Isonomy out of St. Marguerite (winner of the One Thousand, and dam of Seabreeze, Le Var, Roquebrune, Tredennis, etc.) by Hermit. He won many good races in Germany, and about £8000 in stakes, while Hyeres has also proved herself a successful matron by producing other good racers. The horse stood in Ireland, and was sold in March last under the Trading With the Enemy Act, he being then the property of Baron von Schmieder, for 290 guineas.

◈ ◈ ◈

Trainer McCormack announces that James Butler's good four-year-old colt Pebbles, by Ben Brush out of Running Stream, by Domino, has been permanently retired to the stud. He will be the premier sire at East View for 1917.

◈ ◈ ◈

The Russian Derby winner, Macbeth, belonging to Mr. Mantacheff, is a son of Macdonald II. out of Gallina by Gallinule from Suzanne by Martagon out of Woolahra by Albert Victor, and was foaled in France, his dam having been purchased at the December sales of 1911 for 730 guineas by Mr. Bashkiroff from the Aislabie Stud lot. She was bred by Mr. F. B. Craven in 1908, and was covered by Wolf's Crag at the time of the sale, going to France the same year.

STAR HAWK WINS REALIZATION.

Mr. A. K. Macomber saw his imported three-year-old Star Hawk win the Lawrence Realization at Belmont Park last Saturday, which is the greatest race for colts of that age that is run in this country. The distance is a mile and a half, and while its value to the winner was only $2775 this year, the fact that the race has been considered one of the great tests of the year, and that Star Hawk beat the great colt Spur, lends much to the victory.

The running of this Realization of 1916, writes John Day, was as good a race as ever has been seen for this classic stake, and although Star Hawk always was in front from the first turn of the track until the finish, at the end there was that hysterical cheering and breathless suspense that inevitably comes with the running of a turf classic that the public has come to know and take an interest in. It was Star Hawk first, with James Butler's great colt Spur in second place, while Ral Parr's imported Crimper had found the pace and distance a bit too much and only could finish in third place. Giffard A. Cochran's Air Man was fourth and Ralph D. Earle's Kilmer was last.

While Spur and Crimper, the public favorites of the day, were beaten, the victory of Star Hawk was a popular one with the populace and with the regular attendants at the course in general, because a really great horse had won a grand race for as game an owner as it has been the good fortune of turfites of today to see in all their days of racing.

So far as the owner of Star Hawk was concerned he might have been the most casual visitor to the course for all anyone could judge from his demeanor before, during the running, or after his pet had won this great prize. He only showed the happiness he must have felt when he was congratulated by Mr. Butler, whose colt had come second, and others who were prompt to offer congratulations. He took success with so much of the same calm that he always has shown in the long run of hard luck that has been his portion on the turf as to make many wonder what excitement or attraction he can find in the sport.

The Realization was a race such as the patrons of the turf delight in seeing. It was truly run and the best horse won. Also Star Hawk won in a way to stamp him as great among his kind, for he made his own pace and did it in a way to convince all who saw him that even on the slow track he could have made a new record had he been pushed to do it.

The time that Star Hawk made was 2:32 3-5, which is but two-fifths of a second slower than the track record made by James Caffrey's Gowan on October 12, 1908. It would have been no task for the imported son of Sunstar and Sweet Finch to hang up a new mark in this race had Spur or Crimper or any of the others been close enough up during the run through the stretch to make him go faster and show the great speed which undoubtedly is his. He proved a worthy son of a Derby winner, which Sunstar was, and an Oaks winner, such as Sweet Finch, his illustrious dam.

And all during this season Walter Jennings has been hiring those who were looked upon to be among the topnotchers among the jockeys, only to have them ride his horses into second place, while in this race a mere child in little Jockey Phillips brought him home a winner of the greatest prize of the year to be won on an Eastern race track by a three-year-old. It was not that the purse to the winner amounted to any great sum, but for more than a quarter of a century the winning of the Realization has been looked upon as a crowning achievement for the season's three-year-old.

Walter Jennings probably was a happier man for having sent the winner to the post than was the owner of the horse or the jockey who rode him, for it is indeed something worthy of praise when a trainer in these decadent days of preparing horses can make one ready to go out and win over the distance of ground called for in a race like that of The Realization.

Both Trainer Jennings and Jockey Phillips were substantially rewarded immediately after the race by the owner of the winner. Mr. Macomber while receiving congratulations said:

"It is a great satisfaction to win a race such as the Realization, and it repays for some of the earlier disappointments. Now that Star Hawk gives evidence of having become acclimated I look for him to go on and show the form we always believed he possessed."

———o———

More room is needed at the State Fair grounds in Sacramento for buildings and for field exhibits, and there is talk of shortening the mile track to a half mile one. There is no doubt but the people who attend fairs enjoy racing on the twice arounds more than they do those on the mile rings, and from the manner in which the horsemen have made entries at the fairs and race meetings across the mountains this year, it looks as if they find no objection to the half mile ovals.

◈ ◈ ◈

W. E. D. Stokes, proprietor of Patchen Wilkes Stock Farm, Lexington, Ky., is writing a book giving his views on the many vital points of the breeding problem. Mr. Stokes has devoted considerable study to matters of this nature, and has made numerous valuable discoveries, which wil be fully explained in the new book.

Napa Stock Farm Yearlings Average $366.

The sale of yearlings from Mr. A. B. Spreckels' Napa Stock Farm, held at Belmont Park, New York, Sept. 5th, resulted in the 17 head being sold for $6100, an average of about $366 per head. The yearlings were in good condition and were an attractive lot taken as a whole. The bay colt by Soltaire II out of Salvatrix by Salvation brought the highest price, James McManus paying $1200 for the full brother to Savilla. The prices paid for the sixteen head sold were as follows:

Sam Hill, b c by Solitaire II—Bremerhafen; J. P. Atkins ..... $ 450
Bay colt, by Voorhees—Chiffie; Addison Johnson 525
Bay filly, by Dr. Leggo—Coma; R. O. Miller.. 300
Bay filly, by Voorhees—Emir; W. H. Karrick 250
Bay colt, by Solitaire II—Georgia 6th; Joseph E. Davis 450
Bay colt, by Dr. Leggo—Georgia Girl; Jule Garson 100
Bay filly, by Dr. Leggo—Guerrera; Jas. McManus 250
Bay filly, by Voorhees—Handsome Florry; J. P. Atkins 400
Chestnut colt, by Dr. Leggo—Lady Atheling; James Frayling 50
Chestnut colt, by Dr. Leggo—Miss Bunny; Jas. McManus 400
Chestnut colt, by Voorhees—Nanna; R. O. Miller 375
Chestnut colt, by Dr. Leggo—Olathe; J. P. Atkins 250
Bay filly, by Solitaire II—Oratossa; J. P. Atkins 400
Bay colt, by Dr. Leggo—Othale; Jas. McManus 400
Brown or blk colt, by Voorhees—Prestene; R. O. Miller 450
Bay colt, by Solitaire II—Salvatrix; James McManus 1,200
Bay filly by Dr. Leggo—The Peeress, J. P. Atkin 300

Argentine Racing.

We note from El Jockey, the official organ of the Jockey Club at Buenos Aires, that, as was also the case last year and in 1914, Diamond Jubilee is out by himself in the leading stallions, his stock having won (up to July 19th) fifty races of the value of 297,480 pesos. The native-bred Old Man (by the Eclipse Stakes winner, Orbit), which was second to Diamond Jubilee in 1915, is again the latter's nearest attendant with 31 races to his credit (worth 187,000 pesos), while Greenan has moved up from ninth into third place. St. Wolf is another on the up-line, standing fourth. At the close of last year Cyllene was third, but for the time being he has dropped back to seventh place, with Your Majesty ninth. Jardy (son of Flying Fox) is fourth, but Flying Fox's other son, Val d'Or, which was fourth last season, is now not in the first dozen. Among the jockeys, D. Torterolo again holds pride of place with 54 winners, and the leading stable is that of Senor Correas, the owner of Diamond Jubilee, who has won twenty-two races, worth about 121,000 pesos. Our contemporary records the victory in the classics "Maipu" of Petite Chose (by Greenan), which covered the six furlongs in 1:10 4-5, good enough time even when compared with Master Willie's record over the fast Epsom track in England of 1:07 1-5, and Iron Mask's record at Juarez of 1:09 3-5. A more important classic, the Premio Saavedra (one mile, 22,030 pesos to the winner), was won by the Mon Reve Stable's Arenales (by Diamond Jubilee), which beat a dozen others in the hands of D. Englander, who is third among the winning jockeys, with 47 victories.

Kilmer Purchases Magic.

After negotiations that extended over practically a year Willis Sharpe Kilmer has purchased the English stallion Magic, a chestnut horse foaled in 1907, by Martagon out of Sesame, she by St. Simon out of Maize, while the latter is by Hampton out of Palmflower by The Palmer. Magic's greatest feat probably was his defeat of the brilliont Bayardo in the running of the Goodwood Cup which is over a journey of about two miles and five furlongs.

Magic's full brother, Buckwheat, won the Brighton Cup, Duke of York Stakes and Prince Edward Handicap, while his third dam, Palmflower, proved herself one of the greatest stud matrons in the history of the turf, for among her produce was St. Florian (the sire of Art Patrick), Siphonia (the dam of Symington), and Musa, a winner of The Oaks, the latter the dam of Mirska, which also accounted for The Oaks. Mr. Kilmer has also purchased two yearlings by Magic, these being a bay or brown colt out of Djama and a chestnut filly out of Greyshot. The former is by Mackintosh, while the latter is by Grey Leg. Magic and the yearlings will be brought across within the next few weeks and then shipped to the farm of their owner near Binghamton, N. Y.

———o———

J. A. Gibson, prominent Detroit contractor and builder, who is also the owner of several thoroughbred horses, says that the movement for the revival of racing in Michigan and the building of a fine plant near Detroit by the Detroit Business Men's Racing Association, is progressing splendidly and that the track will be ready by July 1, 1917, when it is planned to open a fourteen-day meeting.

◈ ◈ ◈

The Russian Derby, which came off on July 9th, was won by Mr. Mantacheff's Macbeth, a son of Macdonald II., from five other three-year-olds. J. Winkfield rode a fine race on the winner.

BLACKHAWK SHIRES SWEEP STATE FAIR AWARDS.

The list of awards for draft stock at the State Fair are crowded out of this week's issue of the Breeder and Sportsman, but will appear next week. In the Shire classes the Blackhawk Stock Ranch of Burlingame were awarded every first prize and championship but one, a record that has never been equaled at the California State Fair. Anwick Arthur and his four colts, winner at Panama-Pacific International Exposition and at Butte County Fair this year, again won the get of sire of class and also won the California Registration Board's special prize for best Shire and colts. Blackhawk Stock Farm also won best in stallions two years old, best in stallions one year old, best in mares four years or over, best in mares three years old, best in mares two years old, best in yearling mares and best in foals under one year. These were all winnings in the open class, free for all.

In the State class, the Blackhawk Shire Ranch won best in stallions two years old, best in stallions one year old, best four year old mares with foal at foot, best mare four years or over, best three year old, best two year old, best yearling and best foal under one year.

Messrs. Ward & Eaton are to be congratulated on making such a grand showing and their barn, which was splendidly decorated and kept in the very best of order during the fair, was visited by hundreds daily. Superintendent Lovell, who had charge of the exhibit, is also entitled to much praise.

THE NATIONAL HORSE SHOW.

Preparations for the National Horse Show at Madison Square Garden on November 11 to 17 began to take shape last week when the list of judges who will officiate this year was made public by Alfred B. Maclay, following a meeting of the executive committee, of which he is the chairman.

Amateur horsemen and one horsewoman from many parts of the United States and Canada have been called in to perform the difficult task of distributing one hundred and fifty blue ribbons among the three hundred owners of six hundred horses in such a way as to ward off strikes, walkouts and other demonstrations of discontent among exhibitors.

To judge the high stepping harness horses, four-in-hand teams and tandems this year the association has invited John C. Groome, formerly president of the Philadelphia Horse Show Association; E. Victor Loew, of the Coaching Club, and E. von der Horst Koch, who has several times officiated in this capacity at the National Horse Show in New York and the International Horse Show in London.

Reginald C. Vanderbilt, president of the American Hackney Horse Society, and Charles A. Baudouine will judge the harness ponies and the pony stallions and mares for breeding purposes.

Lady Beck, of London, Canada, and James G. Marshall, of New York, are to be the judges of undocked saddle horses again this year. The docked saddle horses will be judged by Mr. Marshall and David T. Matlack, of Winchester, Ky., while Mr. Matlack and John McE. Bowman will judge the saddle ponies, and Foxhall P. Keene the polo ponies.

Pierre Lorilliard, Jr., grandson of the only American who has won the English Derby with an American bred horse, has accepted an invitation to judge the trotters and road horses. His associates will be E. R. Bowne, who once sold his seat on the New York Stock Exchange to become a trainer of trotting horses, and George Willing, of Philadelphia, who has judged many times at the Garden and elsewhere.

John E. Madden, of Lexington, Ky., will be the sole judge of thoroughbred racehorses and Robert Graham, of Toronto, Canada, will judge the hackneys single-handed and alone. The judges of hunters and jumpers have not yet been chosen.

ENTRIES AT FRESNO.

The annual Fresno County Fair will open Monday, Sept. 26th, and a program of three days' racing will begin Tuesday the 27th. The fair promises to be the greatest ever held at Fresno and that is saying a great deal as the Fresno Fair is high class in every respect and draws thousands every year. The race program is an excellent one and the races closed with the following list of entries:

TUESDAY, SEPT. 26.

2:14 Pacing—$600.—Best Direct, McVerde, Babe, Silver Tips, Irene O., Breezy Marie, Verna McKinney, Dixon Boy, Julia M.

2:30 Trotting—$600.—Future Tramp, Peter McKlyo, Trigione, Miss San Francisco, Ola Mack, Tom Murphy, Martina Dillon, Dr. S., Rubell, El Angelo, Alice W.

WEDNESDAY, SEPT. 27.

2:09 Trotting—$600—Bon Cres, Bert Kelly, Harold C., Columbia T., Pavana.

2:10 Pacing—$600.—Best Direct, A. B. C., Zomar, McVerde, Hal J., Soumise, Pointer's Daughter, Stanley Quinn, Julia M.

THURSDAY, SEPT. 28.

2:20 Pacing—$600—Santa Paula, Silver Tips, Lauritz, Hanover, Harry Mack, Mono Ansel, Dixon Boy, Villa, Path C.

2:15 Trotting—$600—Camelia, Future Tramp, Sweet Bow, Brutus, Hanford Mack, Dick W., Dr. S., Eloise Dell, El Angelo, Alice W., Lulu B.

SADDLE AND SHOW HORSES.

Large Fields and Close Competition Interest Large Crowds Day and Night.

That the interest in five and three gaited saddle horses is increasing in California was plainly evidenced by the number of entries in those classes at the California State Fair this year and the crowds that filled the immense tent in which the horse show was given every evening. In harness classes the entries were very few but there were few classes for either the five or three gaited horses that did not have large fields and keen competition, and the class of horses entered was the best ever seen at the fair.

The event of greatest intrest to the breeders of gaitd horses was the Pacific Coast Gaited Saddle Horse Association's stake for three-year-olds, which was won by Mrs. Adelaide Gillis-McCormick's beautiful stallion San Vicente, and when Prof. Trowbridge had awarded him the first prize, he expressed the opinion that this grand looking young horse was of such class that he would be a worthy competitor in any three-year-old class in Missouri, Kentucky or elsewhere. San Vicente is a horse of great quality, good at all the gaits. He is by Rex Peavine out of Undine. San Vicente not only won the stake but he won the class for stallions three years old and under four, the class for produce of dam, the combination class for five gaited horses shown to saddle and harness, and was second in the class for five gaited horses of any age or sex, and second in the sweepstake for five gaited horses of any age or sex, that grand mare Helen Idlewood being placed ahead of him in this class.

Second prize in the Pacific Coast Gaited Saddle Horse Stake was won by the Bridgford Company's Missouri bred colt Le Grand McDonald, another handsome chestnut, and he was also second to San Vicente in the three-year-old stallion class.

Highland Monarch won for Mrs. Gillis-McCormick in the class for five gaited stallions four years old or over, and the class for five gaited horses of any age or sex went to Mr. R. L. English's Helen Idlewood, certainly one of the most perfectly formed and best gaited animals ever seen in a show ring in California.

TAMARACK
Winner, First Prize for 2-Year-Old Five Gaited Stallions. Owned by Miss Martha Freeman, Los Angeles.

Sobre Vista Farm, owned by Revel Lindsay English, of Chino, San Vicente Rancho owned by Mrs. Adelaide Gillis-McCormick, of Los Angeles, Dr. Lee C. Deming of Anaheim, and The Bridgford Company of Knightsen, were the largest exhibitors of five-gaited horses, but special mention of many of the horses shown is reserved for an article next week. The lists of prize winners in the saddle and harness classes and at the evening horse shows, are as follows:

FIVE-GAITED SADDLE HORSES.

Stallions, four years old and over.—Highland Monarch (A. S. Gillis) first, Comedian (R. L. English) second, Jurist (Dr. Lee C. Deming) third.

Stallions, three years and under four.—San Vicente (Adelaide Gillis-McCormick) first, Le Grand McDonald (Bridgford Co.) second, King's Denmark (W. Bernstein) third.

Stallions, two years and under three—Tamarack (Martha Freeman) first, Tourist Peavine (R. L. English) second, Cochise (R. L. English) third.

Stallions, one year and under two.—Gold of Ophir (Mrs. E. P. Riggle) first. No competition.

Stallions under one year.—Our Choice (Bridgford Co.) first, Tom Morgan (Dr. Lee C. Deming) second, James R. (C. H. Ragsdale) third.

Mares, four years old and over.—Helen Idlewood (R. L. English) first, Tarna Denmark (R. L. English) second, Angelus Butterfly (R. L. English) third.

Mares, one year old and under two—Gloriana McDonald (R. L. English) first, Santa Monica ,A. S. Gillis) second, Candy Kid (Dr. W. J. Smyth) third.

Mares under one year—Paloma (A. S. Gillis) first, Belle of Kings (W. Bernstein) second.

Get of Sire—Get of Highland Monarch (Adelaide Gillis-McCormick) first, get of Don Castano (Adelaide Gillis-McCormick) second, get of Highland Squirrel King (R. L. English) third.

Produce of Dam—Produce of Undine (Adelaide Gillis-McCormick) first, produce of Gracia Rex (Dr. Lee C. Deming) second, produce of Black Belle (W. Bernstein) third.

Geldings, four years old or over—Rex McDonald (Mrs. A. W. Pike) first, Kentucky (Adelaide Gillis-McCormick) second.

Geldings, three years and under four—King Cyrus (Bridgford Co.) first, Rigoletto (R. L. English) second.

Geldings, two years and under three—Robert J. (W. Bernstein) first. No competition.

Mare or gelding, any age—Helen Idlewood (R. L. English) first, Kentucky (Adelaide Gillis-McCormick) second, Angelus Butterfly (R. L. English) third.

Stallion, Mare or Gelding, owned, exhibited and shown by non-professional—Helen Idlewood (R. L. English) first, Kentucky (Adelaide Gillis-McCormick) second, Le Grand McDonald (E. A. Bridgford) third.

Stallion, Mare or Gelding, ridden by lady—Helen Idlewood (R. L. English) first, Angelus Butterfly (R. L. English) second, Kentucky (Adelaide Gillis-McCormick) third.

Combination Harness ,and Five-Gaited Stallions any age—San Vicente (Adelaide Gillis-McCormick) first, Comedian (R. L. English) second, Jurist (Dr. Lee C. Deming) third.

Combination Harness and Five-Gaited Mares, any age—Helen Idlewood (R. L. English) first, Angelus Butterfly (R. L. English) second, Tarna Denmark (R. L. English) third.

Combination Harness and Five-Gaited Gelding, any age—Kentucky (Adelaide Gillis-McCormick) first, Rigoletto (R. L. English) second.

NON-REGISTERED FIVE-GAITED HORSES.

Mare or Gelding—Billie Freda (J. J. De La Mater) first, Robert B. (C. H. Ragsdale) second.

HIGH SCHOOL SADDLE HORSES.

Jupiter (Leota I. Zapp) first, Firecracker (Charlotte B. Anderson) second.

THREE-GAITED SADDLE HORSES.

Mare or Gelding, over 15.1, to carry 200 pounds—Kildare (Miss Ethel Davie) first, Edith Adams (Dr. L. C. Deming) second, Golden (E. C. Ford) third.

Mare or Gelding under 15.2½, to carry 160 pounds—Confidence (R. L. English) first, Star I. (E. S. Heller) second, Sarah Rex (Dr. L. C. Deming) third.

Mare or Gelding, not over 15.3, to be ridden by lady or gentleman—Confidence (R. L. English) first, Mavis (H. C. Ahlers) second, Kildare (Miss Ethel Davie) third.

Mare or Gelding, 15.1 or under, to be ridden by lady or gentleman—Sarah Rex (Dr. L. C. Deming) first, Lord Bobs (R. H. Gudgeon) second, Lady Barbara (Miss M. T. Mintzer) third.

Mare or Gelding, owned, exhibited and shown by non-professional—Star I. (E. S. Heller) first, Confidence (R. L. English) second, Kildare (Miss Ethel Davie) third.

Mare or Gelding three years old or over—Confidence (R. L. English) first, Mavis (H. C. Ahlers) second, Star I. (E. S. Heller) third.

COMBINATION HORSES—THREE-GAITED.

Mare or Gelding, two years old or over—Star I (E. S. Heller) first, Confidence (R. L. English) second, Kildare (Miss Ethel Davie) third.

CALIFORNIA STOCK HORSES.

Horses over 14.3—Domino (R. L. English) first, Dick (San Francisco Riding School) second, Jack (S. H. Cowell) third.

Horses 14.3 or under—Shorty (Hazen Cowen) first, Lord Bobs (R. H. Gudgeon) second.

ROAD HORSES.

Harness Horses—Best pair, any sex—Tom Smith and Jonesie Mac (D. E. Hoffman) first, Col. Roosevelt and Major McKinley (F. H. Metz) second, Gracie Rex and Edith Adams (Dr. L. C. Deming) third.

Single Stallion, Mare or Gelding—Bon Lark (H. C. Ahlers) first, Comedian (R. L. English) second, Palmoor (S. A. Woodruff) third.

NOVELTY.

Best team, rig and equipment—Tom Smith and Jonesie Mac (D. E. Hoffman).

Best single horse, rig and equipment—Kildare (Miss Ethel Davie).

HORSE SHOW AWARDS.

Three Gaited Saddle Horse, any age or sex, 15.2 or over; conformation 50 per cent, paces and manners 50 per cent.—Mavis, owned by H. C. Ahlers, San Francisco, first; Star I, owned by E. S. Heller, San Francisco, second; Confidence, owned by R. L. English, Chino, third.

Ladies' Phaeton class, horse 50 per cent; equipment 50 per cent; horse 15.2 or under to be shown to appropriate vehicle, lady to drive—Lady Barbara, owned by Miss M. Mintzer, first; My Surprise, owned by Mrs. C. Schreiber, second.

Jumping class, best performance over four hurdles; conformation and quality 50 per cent; performance over hurdles 50 per cent.—Jupiter, owned by Mrs. Leota I. Zapp of Fresno, first; Bounder, owned by R. L. English, Chino, second; Wonderland, owned by Mrs. A. W. Pike, Redwood City, third.

Pony class, Shetland, not over 46 inches in height. To be driven by boy or girl under 15 years. Pony 50 per cent, appointments and driving 50 per cent.—Prince of Wales, owned by Miss Geraldine Bowers, Davis, first.

Five-gaited saddle horse, any age or sex, 15.2 or over; conformation and quality 50 per cent, paces and manners 50 per cent; prizes $20, $10 and $5.—Helen Idlewood, owned by R. L. English, Chino, first; San Vicente, owned by A. S. Gillis-McCormick, second; Carna Denmark, owned by R. L. English, third.

[Concluded on Page 12.]

Notes and News

Lee Axworthy 2:00, champion trotting stallion.

◈ ◈ ◈

He may lower that mark at Lexington in October.

◈ ◈ ◈

They say Yolo county will get in line next year with one of her old-time fairs and race meetings.

◈ ◈ ◈

C. A. Spencer has won three races with The Proof on Wisconsin half mile tracks up to Sept. 1st.

◈ ◈ ◈

Peter the Great has about forty new standard performers for 1916.

◈ ◈ ◈

Single G. and the other horses that the late Curt Gosnell trained are now in charge of Walter Cox.

◈ ◈ ◈

In his two heats at Poughkeepsie Napoleon Direct's time for the last halves was :58½ and :58.

◈ ◈ ◈

The Northern Man 2:06½ is the sire of the two fastest two-year-old pacers of the year—Poorman 2:07¾ and Richman 2:09¾.

◈ ◈ ◈

Ritchie Roberts is now the owner of that good little matinee trotter, Bradmont by Alto Leyburn. He purchased him from President Giannini of the Driving Club at Sacramento during the State Fair.

◈ ◈ ◈

Lee Axworthy trotted a mile in two minutes flat at Syracuse, New York, on Tuesday of this week, lowering his former record one quarter of a second. Paced by two runners he trotted each of the four quarters in 30 seconds.

◈ ◈ ◈

Jim Zoo, a bay gelding of unknown breed, owned by J. McChristian of Burlington, Wis., and driven by Newell, upset all calculations in the 2:20 pace in the Great Western circuit races at the Wisconsin State Fair, by winning the $1000 purse from a field of eight starters.

◈ ◈ ◈

All McKinney 2:04, that was taken very sick soon after being shipped to Omaha from California, has rounded to and made his first start in a $500 purse at Madison, Wisconsin, August 29th. He was 3-5-4 in the summary and just outside the money. The heats were in 2:12¼, 2:12¼ and 2:14. Half mile track and very heavy.

◈ ◈ ◈

St. Frisco is outlasting Mabel Trask as the season wears on. He beat the Peter the Great mare decisively at Syracuse Tuesday last when he won the $10,000 stake for 2:08 trotters in straight heats, time 2:05¾, 2:03¾, and 2:05¼. Mabel got second money with 2-3-2 as her positions, but it will be noticed that Al Mack was second in the fastest heat, his positions being 8-2-3, which gave him third money.

◈ ◈ ◈

California B. by Athasham won a trotting race to saddle at Des Moines, Iowa, and took a record of 2:14½ at that way of going, which just equals the record for one mile in a saddle race over a half mile track, made by The Wanderer.. A few days later California B. won a race for teams with his pole mate Larry K., best time 2:27½. He has won a number of races this year to sulky for his present owner, Earl Beezeley of Syracuse, Nebraska.

◈ ◈ ◈

The Silva stable, in charge of Lon Daniels, has returned to Sacramento from the Grand Circuit. Kid Cupid was sold as previously stated in these columns and the horses brought back are Bondalean, San Felipe, John Malcolm and Potrero Boy. The extremely hot wave which was over Ohio the week the California horses reached Cleveland put them all out of condition and they never regained form, consequently the trip was not a profitable one. Had the horses been as good as they were before leaving California they would have been able to earn considerable money. All will wish Silva and Daniels better luck next time.

◈ ◈ ◈

Mr. R. O. Simpson of Armidale, New South Wales, Australia, who now owns the stallion Don Pronto 2:02¼ that he purchased from W. G. Durfee, writes that the son of The Director General has not been raced since reaching his new home as he is being given plenty of time to get acclimated. His second stud season in Australia began last month and ends January 1, 1917. One of the mares visiting him this year is Lady Mazey 2:22 by Hal B. 2:04½, dam Christobel (2) 2:11¼ by Chas. Derby, second dam Algerdetta, dam of Thornway 2:05¼ by Allandorf. Mr. Simpson says that unfortunately there are not many mares bred like Lady Mazey in Australia.

◈ ◈ ◈

D. E. Hoffman took all first prizes in the classes in which he entered his pair of stallions Tom Smith and Jonesie Mac at the California State Fair. Both horses were in fine condition and Tom Smith 2:13¼, now 19 years old, never looked better than he does now. There was applause on all sides whenever Mr. Hoffman appeared with this handsome pair of trotting stallions.

Lee Axworthy 2:00 is not rigged with a head pole this year.

◈ ◈ ◈

Wilkes Brewer trotted two different half mile tracks recently during one week in 2:08¾ and 2:08¼.

◈ ◈ ◈

Guy the Great 2:08¾, by Peter the Great 2:07¼, and owned by J. V. Morris, Cleveland, Ohio, died at Pulaski, Pa., following a winning race.

◈ ◈ ◈

James Tranter proved that a live wire for manager could give a successful meeting at Poughkeepsie. He got the horses and big crowds to see them race.

◈ ◈ ◈

Kern county sheep men have been paying $10 per acre for alfalfa to pasture from August to the end of the season.

◈ ◈ ◈

J. W. Marshall of Dixon won the trophies for best boar, best sow, and for best ram, any age or breed at Solano County Fair. Daley Bros. won the trophy for best ewe, any age or breed.

◈ ◈ ◈

Flower Direct 2:00¾ and Earl Jr. 2:01½, two of our most noted campaigners and both thought to be entirely through, won free-for-all events last week on half mile tracks.

◈ ◈ ◈

The dam of Early Don 2:06¼ and Donna Clay 2:06¼ was sold several years ago for $30. She was a very ill-tempered mare and absolutely useless on the road.

◈ ◈ ◈

The Completion 2:18¾, the new yearling pacing filly by The Exponent, is out of Bonella, a Palo Alto bred mare by Azmoor. Bonella was just 20 years old when The Completion was foaled.

◈ ◈ ◈

Walter Cox, the famous trainer and driver, was forty-eight years old on September 8th and celebrated the event by winning the $1500 2:30 trot at the Hartford Grand Circuit meeting in straight heats with Busy's Lassie.

◈ ◈ ◈

Peter McKlyo 2:06 may be sent to Stockton this fall and given a chance to lower his record over that excellent track. His mile in 2:06½ at Sacramento was a more meritorious performance than the one in 2:06 at Santa Rosa, taking the condition of the two tracks into consideration.

◈ ◈ ◈

Ed Geers' pacer Napoleon Direct seems to have it over all the other free-for-all side wheelers on the Grand Circuit. Single G. is off the form he showed early in the season, but as Napoleon Direct seems to be able to pace the last quarter any time asked in better than 29 seconds he is a very hard horse to beat.

◈ ◈ ◈

We stated last week that the record of Directly (2) 2:07¾, made twenty-two years ago, has never been beaten. The two-year-old colt Poorman by The Northern Man has now just equaled this record. Later in the year he will probably be able to knock a fraction off the time and thus lower a colt record that has stood the longest.

◈ ◈ ◈

To one who has a natural liking for this branch of showing, however, all the work required to bring his animals into winning form will have been amply paid for by the pleasure of standing first in the ribbons; but one who finds it a task rather than a pleasure to fit and show his animals in the harness and saddle classes would do better to confine his showing to the breeding classes where pace and action are qualifications secondary to type and condition.

◈ ◈ ◈

Lulu B. 2:13, winner of the Pacific Breeders' Futurity, the Stanford Stake and standing even with Hermes for first place at the end of the three heats of the Occident Stake, is a well bred one. Her sire The Bondsman is one of the best bred stallions ever brought to California. Her dam Loma B. is by Stam B. 2:11¼, the best bred son of Stamboul, that was a game and fast three-year-old, her second dam Italia by Sidney, who was a great sire of early speed, her third dam Dot by Prompter, fourth dam Vernie by by Vanderbilt, son of the three-mile runner Norfolk, fifth dam the thoroughbred mare Hattie Bay by Billy Cheatham, sixth dam Mary Bute by Williamson's Belmont. Lulu B. developed a lameness after her Santa Rosa race but is getting over it and should no further misfortune befall her should trot well below 2:10 next year.

◈ ◈ ◈

It looks as if Kinney de Lopez 2:23, the Hemet Stock Farm stallion, will be quite a sire. Several two and three-year-olds by him have taken records this year and won races. This handsome chestnut horse was bred by Mr. R. E. de B. Lopez of San Francisco, who sold him to Budd Doble, who named him. Kinney de Lopez took his record as a four-year-old and that year he could show two-minute speed, but developed a lameness that prevented his getting a low mark. He was a natural trotter, wearing nothing but a harness and carrying but five ounces forward and three behind. He is by Kinney Lou 2:07¾, dam Betsy Direct, great broodmare by Direct, second dam Kate Chapman by Naubuc, full brother to Thos. Jefferson, third dam Kitty Patchen by Geo. M. Patchen Jr., fourth dam by Vick's Ethan Allen. There is a lot of the Morgan blood in Kinney de Lopez who is a horse of the Morgan type himself.

Andrew Albright, Jr., of Newark, N. J., may winter some of his horses at Thomasville, Ga.

◈ ◈ ◈

Lanark P. by Zorankin, owned by Mr. R. S. Irvine, of San Francisco, reduced her record to 2:16 at Sacramento.

◈ ◈ ◈

The fastest yearling pacer of the year is Direct the Work 2:21¼ by Mr. Work, son of Peter the Great. The record was made on the Lexington track August 30th.

◈ ◈ ◈

The fastest three-year-old trotter in California this year is Lulu B. 2:13¼, the fastest two-year-old trotter Rhyolite 2:21½, the fastest three-year-old pacer Verna McKinney 2:09¼ and the fastest two-year-old pacer Oro Fino 2:17½. This is not up to California's records of former years.

◈ ◈ ◈

The Real Lady 2:08¾ and Ante Guy 2:17¼, whose great race was the feature of the Grand Circuit meeting at Poughkeepsie, will not meet again this season, nor are they likely to measure strides next year, as the daughter of Guy Axworthy 2:08¼ is not engaged in any of the big futurities to which The Real Lady is eligible.

◈ ◈ ◈

The manager of Ponkapog Farm, John P. Hall, who died recently, was the person who was largely responsible for the wonderful success of the late J. Malcolm Forbes as a breeder, says Horse World. When Forbes decided to sell Peter the Great because he did not like the conformation of that horse's foals, Hall pleaded with him not to dispose of the son of Pilot Medium, but to send him to Kentucky.

◈ ◈ ◈

The track at the State Fair grounds in Sacramento is very fast in the spring. Within a few days after a week's rain it is almost perfect to work horses over, but in the hot summer and fall days the light soil dries out so that it becomes a very slow track. Jim Logan was a better horse at Sacramento than he was at Dixon, yet his best heat over the State Fair mile track was only 2:07, while he was able to pace a heat in 2:08¾ over the Dixon half mile oval.

◈ ◈ ◈

All the horses owned by the estate of the late Jacob Ruppert have been consigned to the Fasig-Tipton Company's Old Glory sale, in Madison Square Garden, on November 20-25. Guy Axworthy 2:08¾, owned jointly by the Ruppert estate and Leo Oettinger, will probably be included in the consignment. He is one of the most successful trotting sires now living. C. K. G. Billings will sell all his weanlings by The Harvester 2:01 at this auction.

◈ ◈ ◈

Mr. I. L. Borden, who is a director of both the State Agricultural Society and of the Pacific Coast Trotting Horse Breeders' Association, had miserable luck with his string of trotters and pacers. He won a race at Santa Rosa with Major's By Guy and that horse was second in a race at the State Fair, while Alesandro got fourth money in the State Fair Futurity, but his other horses were clear off and failed to get in the money. Mr. Borden took his poor luck philosophically, however, and paid the starting fees when he knew he had no chance.

◈ ◈ ◈

Two new world's records were made at Hartford, September 7th, when St. Frisco won the classic Charter Oak stake for 2:08 trotters after six of the most exciting heats of light harness racing ever witnessed at Charter Oak Park. The second heat was declared by the judges a dead heat, the time of 2:07¼ displacing the world's record set in 1904 on the Brighton Beach track, New York, when Sweet Marie and Aristo raced a dead heat in 2:08¼. The other record established was the fastest six-heat race, the average time for the six heats being 2:07¼, against 2:07 19-24 set at Lexington, Ky., in 1910, in a race won by Spanish Queen.

◈ ◈ ◈

The Kentucky Futurity for three-year-old trotters, which is on the second day's program at Lexington, looks like a gift to the Pastime Stable's Volga 2:07¾, winner of the futurity for two-year-olds last season. She is reported to be in fine form, with more speed than she had in 1915, and nothing has yet appeared this season that looks good enough to hold a candle to her. Expressive Lou 2:08¾ is the fastest of the season's three-year-olds, but she has not improved since her first race, and does not finish her miles like a Kentucky Futurity winner. Harrod's Creek 2:10 is generally believed to be more formidable than Expressive Lou, but his most enthusiastic admirers will be surprised if he has speed enough to trot with Volga.

◈ ◈ ◈

In the settlement of the estate of the late Jacob Ruppert, the Poughkeepsie track, as well as the Hudson River Stock Farm and all the horses thereon, has been thrown upon the market, and as the property adjoins the rapidly growing city on the banks of the Hudson there is a chance that it will be sold for building lots in the not far distant future, and thus be lost for training and racing purposes. There is probably no other mile track in the country quite so attractive and advantageously situated as the Hudson River Driving Park is, and all horsemen would regret exceedingly to see it destroyed. Hopes were expressed among horsemen who attended the meeting last week that some of the wealthy men identified with the venture might join with other Eastern breeders and horse fanciers in buying the track and thus insuring its preservation for harness racing.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Women Land Big Bass.—Emil Olcovitch of Los Angeles has returned from a fishing trip at Catalina and tells a story that he and several of the boatmen at the Island vouch for as the truth. The story is—

On August 28th, Mrs. M. G. Plank and Miss Billie Hutchins caught a black bass apiece, each fish weighing several times the poundage of their captors.

The huge sea monster hauled in by Mrs. Plank weighed 312 pounds and it took an hour and forty-five minutes to land it. A minute later, the fish Miss Hutchins caught, weighing 200 pounds, was pulled in. It took her an hour and thirty minutes to bring it to gaff.

Captain Walker of the launch Leona, one of the best fishermen on the Island, and who has been there for fifteen years, took the young women out in his boat to a place nine miles down the coast, the home of the black sea bass, so he declares.

It was there that the remarkable catch occurred. The captain declares that it is the first time known for two women to catch fish of that size, both being caught within a minute of each other.

According to the women, the big fellows put up a terrible battle, but both hung on with grim determination and hauled in slowly and now have the honor of being the first women of the season to land a black bass. Very few women attempt to land fish of this size.

Urges Hunters to be Careful.—Emphasizing the destruction of property and human life caused by careless hunters, a warning issued by the Forest Service urges all sportsmen on the National Forests to use the greatest possible care to prevent forest fires and to avoid such accidents as the one which caused the death of Forest Ranger Clark on the Cabinet National Forest in Montana last year. Mr. Clark, it is said, was mistaken for a bear by a careless hunter who fired without waiting to be sure what he was shooting at. To show that such accidents are not uncommon, the warning quotes an estimate of the Biclogical Survey that between 150 and 200 persons are annually killed in hunting accidents in this country and that this number is increasing. Furthermore, it is stated, 15 per cent of all the forest fires in the National Forests are caused by careless hunters and other campers.

The National Forests, it is pointed out, contain the best hunting grounds in the country. The number of game animals is increasing on account of the protection from forest fires and illegal killing which is afforded by Forest officers. On many of the forests, deer, elk, mountain sheep and other species are fairly plentiful, while small game is usually abundant. Bear, mountain lion and other predatory animals are found on most of the forests and the killing of these meat eaters is encouraged because they prey on domestic stock and the herbivorous game animals.

The value of the forests for hunting grounds depends largely upon whether they are protected from fire, says the warning. Forest fires destroy the range and breeding places of the game and often kill large numbers of the animals themselves, while a great many more are driven out of the country by the flames. Furthermore, streams flowing through burned-over areas are subject to such extreme variations of flow and are often so choked up with deposits of sediment that fish can not live in them.

Each year, it is stated, sees an increase in the numbers of persons who visit the National Forests for hunting and other recreation purposes. Every effort is made to encourage this use of the Forests. Maps showing the recreation resources have been issued, and the trails built up by the rangers open up new country to visitors.

The best indication of a man's fitness to be in the woods, the warning points out, is the care which he shows in handling firearms and fire. None but the most inexperienced tenderfoot will shoot without getting a plain view of his game, while the man who lets his campfire escape or who carelessly drops a lighted match or hot tobacco ashes betrays at once his ignorance of the fundamental principles of woodcraft. Such men, says the warning, should keep out of the woods.

Quail in Los Angeles Parks.—A press report from Los Angeles states that the parks and environs of the city are fast becoming a brooding ground for quail. This is the observation which has been made from time to time this season by bird lovers and sportsmen:

"Never before have such countless broods of young quail been seen as those which have made their appearance this year, it is said. The quail are quite tame and many cases have been noted where the young are being cared for under hedges and in thickets close to houses.

"The superintendent of Exposition Park recently discovered a family of quail in the old-fashioned flower garden at the rear of the State Exposition building. The baby birds were not more than five days old."

TREATY ON WILD GAME IS WELCOMED.

Conservation Measures With Canada Cause Sportsmen to Rejoice.

New York.—Not since the Federal law for the protection of migratory birds was passed have wild life conservationists been so elated as over the ratification by the United States Senate of a treaty which provides protection for practically all birds that migrate between this country and Canada.

The treaty is an important supplement to the Federal law and provides, in effect, three principal things:

1. That no bird important to agriculture because of insect destroying proclivities shall be shot at any time.

2. That no open season on any species of game birds shall extend for a longer period than three and one-half months.

3. That both countries shall so restrict open seasons on game birds as to prevent their being taken during the breeding season.

The Senate's action came as the result of a campaign waged incessantly for nearly three years by organizations of farmers, sportsmen, bird lovers and conservationists generally under the leadership of the American Game Protective Association of this city, the sportsmen's national organization. President John B. Burnham, of the Association, who was the directing head of the campaign, has issued the following statement regarding the Senate's action:

"The ratification of the treaty means that this country now possesses the most advanced and effective legal protection for wild life of any on the globe. The enactment of the Federal law in 1913 was the first great step toward this end. It was necessary, however, to supplement this with protection for the large number o fspecies of valuable birds that nest in Canada and either pass through the United States on their southern migration or actually winter here.

"The constitutionality of the Federal law, which is now before the Supreme Court of the United States for adjudication, becomes more or less an academic question, in the opinion of many legal authorities, now that the treaty has been ratified, as its operation will bring about practically the same results as the provisions of the law. Those holding this opinion base their contention on the theory that the court will decline to render a decision that would impair the country's obligation under the treaty.

"On January 14, 1913, Elihu Root, then Senator from New York, introduced a resolution requesting the President to propose to other governments the negotiation of a convention for the mutual protection of migratory birds.

"This resolution, slightly modified, was reintroduced by Senator George P. McLean of Connecticut during the following April and was reported favorably.

"Then followed an arduous campaign involving the overcoming of seemingly insuperable obstacles with the present result.

"Senator George P. McLean, of Connecticut, deserves the greatest credit for the work he did in bringing about the ratification of the treaty and merits the thanks of every conservationist in the country. Aid of the greatest value was rendered by Mr. Henry Ford of Detroit, and Dr. Edward Howe Forbush, state ornithologist of Massachusetts.

"Similar conventions with other countries, principally those in South America and the West Indies, will be sought in due course."

Boy Dives; Gets Two Trout.—A swimming suit was all that Gardner Van Dusen, a 16-year-old lad, needed to secure two trout from the Spokane river. Young Van Dusen was crossing the Stevens street bridge when he saw two trout fighting to get away from a snag on the bottom of the river.

An investigation proved that both trout were hooked on flies attached to the same leader, but the piece of line attached to the leader was caught on the snag. The lad divested himself of his clothing and dove into the water and upon reaching the snag he broke the line, but held the leader and brought up the two trout, and the fish were still alive and fighting.

Evidently when the first fish was hooked by some angler he started a fight and when the second trout grabbed the other fly, the weight and pull was too much for the line which parted and became entangled on the snag. One of the trout measured 10 inches and the second was eight inches long.

Salmon Run Is On.—Fred Oliver, who is well posted on hunting and fishing, is looking for a big salmon run in the bay inside of a week or so. Oliver has been after salmon outside of the heads for the past several Sundays and has found that the runs were to the north of the Golden Gate one Sunday and to the south the next. He takes this to mean that the salmon will eventually run through the gate as has been their custom in years gone by.

STOCKTON DOG SHOW A BIG SUCCESS.

Large Crowd Took in Exhibition.—Other News Gathered in Kennel Circles.

The dog show, under the auspices of the Stockton Kennel Club, is over and the many exhibitors have returned to their homes. It was a most successful show and was made so by the manner in which it was staged. It certainly was a happy thought when "Missouri Bill" Johnson suggested that the show be held on the lawn at the Stockton Mineral baths, and the exhibitors were highly pleased with the arrangements. The officials of the Stockton Kennel Club tendered Mr. Johnson a vote of thanks just before the show closed. The judges were loud in their praise for the many courtesies extended.

The following are some of the trophy winners:

Best Airedale, Bilmer Bingo; best dog in show, Dr. and Mrs. Billings of Burlingame. (First time in the history of California that any Airedale won best in show.) Stockton Mineral Baths trophy.

Best opposite sex, French bull—Champion Brackenside Fauvette, owned by Arthur Faff, San Francisco; Holt trophy.

Best sporting dog in show—Bilmer Bingo; Johnson's sporting goods trophy.

Best non-sporting dog—Southport Salute (collie), owned by Mrs. Duncan; Samson Sieve-Grip Tractor Company trophy.

Best puppy in show—Cragwood Charming, owned by Mrs. Norwood B. Smith, Palo Alto. (Smooth St. Bernard bithc.)

Best brace in show—Owner, A. S. Chisholm, Champion Mackworth Bertia and Chelsea Crusader; trophy by Chinn-Beretta Co.

Best four in one breed—Mrs. Colverd, San Francisco, owner; Branch's trophy; old English sheep dogs.

Best dog owned and shown by lady—Mrs. Duncan, San Jose, collie, Southport Salute; Sperry trophy.

Best in ladies' variety class—Cocker spaniel, Mrs. C. B. Trask; Asa M. Clark trophy.

Best in all carrier class—Bilmer Bingo; Spratt's trophy.

Best toy dog—Mrs. Major, San Francisco.

Best St. Bernard—Mrs. Norwood Smith, Cragwood Charming.

Best greyhound—Asa M. Clark, Fair Tralee; Jas. J. Carril trophy.

Best pointer—Champion El Sur Trey (bitch); Bert Lewis trophy.

Best pointer (opposite sex— by B. Cox.

Best English setter—Rowdy, R. Hows; James S. Remick trophy.

Best opposite sex—Stockton Jess, Joe Pomorsky; Joe Chirhart trophy.

Best Irish setter—St. Lambert's Caltra M. H., J. J. Mitchell; P. J. O'Higigns trophy.

• • •

It is underestood from private sources, that Mr. Macy, the well known Santa Barbara follower of the Bostons, has made a genuine offer of $800 for the now famous Boston, Auburn Happy Jr. But the Burlington gentleman doesn't appear to be very eager, and no wonder, for there are few really good dogs going around just now. There are lots of nice dogs!

• • •

There is no getting away from it, some of the breeders up in the far Northwest mean to have the best breeding even if they have to pay the money and risk their best stock. For instance, one of the wire breeders in Seattle sent twice to Wireboy of Paignton, and we learn that Mrs. Kennedy sent her English toy spaniel Red Queen all the way from Calgary, Alberta, which is about on the top edge of the civilized world, to Rochester, N. Y., to be bred to Celamo's ruby, Red Beau. This is a quest after the noseless that we hope the intrepid owner will be successful in, providing the rest of the dog comes, too—but remember the rest of the dog, it is quite more important than head minus nose!

• • •

At a recent meeting of the officials of the Westchester Kennel Club it was voted to hold their fifth annual show on the beautiful grounds of the Gedney Farm Hotel, White Plains, N. Y., Saturday, June 23, 1917. There will be many new innovations introduced at the 1917 show that will appeal to all exhibitors, who have attended the club's former events.

Bears Scare Horses.—While on a steep grade near the Junction House, Nevada City, last week, Frank Williams, a teamster, had a narrow escape from being hurled down the mountain side. The four horses, which Williams was driving, became frantic when a big mother bear and her cub appeared unexpectedly and coolly inspected Williams and his outfit.

The cub appeared first in the road, frightening the horses almost beyond control. While Williams was struggling to prevent the outfit from going over the grade, the old bear appeared and watched operations for fifteen minutes before the two disappeared in the brush.

Deer Season Good.—California hunters have no reason to complain over the deer season so far. The sport has been uniformly good since the bars were let down. In view of the severe winter that caused the death of so much game, the good sport has been a pleasant surprise. Protecting the spikes is believed to be the means of providing much more game in years to come. Does have been reported very plentiful in all sections.

OPEN GAME SEASONS ON PACIFIC SLOPE.

Changes in Laws Are Set Forth For the Benefit of Many Hunters.

Some changes have been made in the game laws during 1916. For the benefit of hunters the following tables on the open seasons in the Far West are given:—

CALIFORNIA.

Male deer (except spike bucks), Districts 1 and 23, Aug. 15—Oct. 15. In Districts 2 and 3, Aug. 1—Sept. 15. In District 4, Sept. 1—Oct. 1.

Cottontail and bush rabbit, valley and desert quail, Oct. 15—Jan. 1.

Tree squirrels (except in Mendocino county, unprotected), Sept. 1—Jan. 2.

Mountain quail, grouse, Districts 1 and 23, Sept. 1—Dec. 1. In Districts 2, 3 and 4, Oct. 15—Jan. 1.

Sage hen, dove, Sept. 1—Dec. 1.

Black-breasted and golden plover, Wilson or jacksnipe, kellowlegs, coot, gallinule, duck (except wood duck), goose, brant, Oct. 15—Feb. 1.

Duck, goose, brant, Nov. 1—Feb. 1.

No open seasons: Does, spike buck,, fawn, elk, antelope, sheep, pheasant, introduced quail or partridge, turkey, swan, rail, band-tailed pigeon, wood duck.

Non-resident license, $10.

OREGON.

Listrict No. 1, west of Cascades:—

Deer (male), Aug. 15—Nov. 1.

Silver gray squirrel, dove, Sept. 1—Nov. 1.

Quail in Coos, Curry, Jackson, Josephine only, grouse, Chinese pheasant (except Chinese pheasant in Coos, Curry and Josephine counties, no open season; in Jackson, Oct. 1—11), Oct. 1—Nov. 1.

Rail, coot, duck, goose (see exceptions), Nov. 1—Jan. 16.

Exceptions: In Coos (goose only), Clatsop, Columbia, Multnomah and Tillamook counties, Oct. 1—Jan. 1. Duck in Coos county, Oct. 1—Jan. 16.

Black-breasted and golden plover, Wilson or jacksnipe, yellowlegs (see exception), Nov. 1—Dec. 16.

Exception: In Clatsop, Columbia, Coos, Multnomah and Tillamook counties, Oct. 1—Dec. 16.

No open season: Does and spotted fawn, moose, elk, antelope, caribou, sheep, goat, quail (except as above), pheasant, (silver, golden, Reeves and English), Hungarian partridge, bobwhite, prairie chicken, Franklin grouse, fool hen, wild turkey, shore birds (except as above), wild pigeon, wood duck, swan.

District No. 2, east of Cascades (open season same as in District No. 1, except as follows):—

Chinese pheasant in Union county and quail in Klamath county, Oct. 1—Oct. 11.

Ruffed grouse, native pheasant, blue or sooty grouse, Aug. 15—Nov. 1.

Prairie chicken in Sherman, Union and Wasco counties only, Oct. 1—Oct. 16.

Sage hen, July 15—Sept. 1.

Black-breasted and golden plover, Wilson or jacksnipe, yellowlegs, Oct. 1—Dec. 16.

Rail, coot, duck, goose, Oct. 1—Jan. 16.

No open season: Silver grey squirrel, imported pheasant.

Non-resident hunting license, $10.

WASHINGTON.

Deer, goat (except east of Cascades, Oct. 1—Nov. 15), Sept. 15—Nov. 1.

Caribou (except west of Cascades, no open season), Oct. 1—Nov. 15.

Ruffed grouse, blue grouse, ptarmigan, quail, west of Cascades, Sept. 15—Nov. 1.

East of Cascades: Ruffed grouse, blue grouse (except in Yakima county, no open season, and in Asotin, Columbia, Garfield and Walla Walla counties, Aug. 15—Oct. 2), Sept. 1—Nov. 16.

Quail east of Cascades (except bobwhite in Spokane county, Oct. 1—Nov. 16), Oct. 1—Oct. 11.

Prairie Chicken, Sept. 15—Nov. 2.

Sage hens (except in Kittitas county, Oct. 1—Oct. 11), Oct. 15—Nov. 2.

Sage hens (except in Kittitas county, Oct. 1—Oct. 11), Oct. 15—Nov. 2.

Sharp-tailed grouse (see exceptions), no open season.

Exceptions: In Adams, Asotin, Columbia, Ferry, Garfield, Lincoln, Okanogan, Walla Walla and Whitman counties, Sept. 1—Nov. 2. In Douglas county, Sept. 1—Nov. 2. In Kittitas county, Oct. 1—Oct. 11.

English, Mongolian and Reeves pheasants (see exceptions), Oct. 1—Oct. 15.

Exceptions: In Mason and Thurston counties and east of Cascades, no open season.

Chinese pheasant (see exceptions), Sept. 15—Nov. 1.

Exceptions: East of Cascades (except in Benton, Spokane and Yakima counties, Oct. 1—Oct 16; Kittitas county, Oct. 1—Oct. 11), no open season.

Hungarian partridge in Kittitas county, Oct. 1—Oct. 11.

Spokane county, Oct. 1—Nov. 16.

Black-breasted and golden plover, Wilson or jacksnipe, yellowlegs, Oct. 1—Dec. 16.

Rail, coot, gallinule, duck, goose, brant, Oct. 1—Jan. 16.

No open season: Moose, elk (1925), fawns, mountain sheep, squirrels (gray, black, fox), wild turkey, dove and introduced birds (except as above).

Non-resident license, $10.

ALASKA.

North of latitude 62 degrees:—

Moose (females and yearlings protected all the year), caribou, sheep, Aug. 1—Dec. 11.

South of latitude 62 degrees:—

Deer, Aug. 15—Nov. 2.

Mountain goat, Aug. 1—Feb. 2.

Moose (females and yearlings protected all the year), caribou, sheep, Aug. 20—Jan. 1.

Brown bear, Oct. 1—July 2.

Throughout Territory: Grouse, ptarmigan, shore birds, waterfowl, Sept. 1—March 2.

Non-resident license, $50.

BRITISH COLUMBIA.

Deer, goat, male caribou, Sept. 1—Dec. 16.

Bull moose (in Atlin, Cariboo, Columbia and Skeena Electoral Districts only), Sept. 1—Dec. 16.

Male sheep (except in Okanogan, Similkameen and Yale Electoral Districts, no open season), Sept. 1—Nov. 16.

Ruffed grouse (certain districts), blue grouse, Franklin grouse, ptarmigan, Sept. 15—Dec. 1.

Prairie chicken (certain districts), Sept. 15—Oct. 16.

Quail and male pheasants (certain districts), Oct. 1—Dec. 16.

Rail, coot, plover, snipe, curlew, sandpiper, crane, duck (see exception), Sept. 1—Feb. 1.

Exception: In Alberni, Comox, Cowichan, Esquimalt, Islands, Nanaimo, Newcastle and Saanich Electoral Districts, Sept. 15—Feb. 16.

Goose (see exception), Sept. 1—April 1.

Exception: In Chilliwack, Delta and Richmond Districts, Sept. 1—March 1.

No open season: Buffalo, elk, young of deer and goat, and females and young of moose, caribou and sheep.

Non-resident license, $100, $50, $10.

ARIZONA.

Male deer, Oct. 1—Dec. 16.

Female deer, spotted fawn, elk, antelope, sheep, goat, no open season.

Bobwhite, grouse, pheasant, no open season.

Quail, Oct. 15—Feb. 2. Wild Turkey, Oct. 1—Dec. 16. Dove and white wing, June 1—Feb. 2. Gallinule, Sept. 1—Dec. 1. Rail, Oct. 15—Dec. 1. Snipe, plover, yellowlegs, coot, duuck, goose, brant, Oct. 15—Feb. 1.

Non-resident license, $25.

IDAHO.

Deer (male) (see exception), goat, Sept. 1—Dec. 1.

Exception: Deer in Bonner, Clearwater, Idaho, Kootenai, Latah, Nez Perce and Shoshone counties, Sept. 20—Dec. 20.

Elk (male), in Bingham, Bonneville, Fremont and Teton counties only (no open season in rest of state), Sept. 1—Jan. 1.

Quail (except in Lemhi county, March 5, 1919), Nov. 1—Dec. 1.

Partridge, pheasant, grouse (except north of Salmon river, Sept. 1—Dec. 1), Aug. 15—Dec. 1.

Turtle dove (except in Fremont county, Aug. 15—Dec. 1), sage hen, July 15—Dec. 1.

Plover, snipe, yellowlegs, Sept. 1—Dec. 16.

Rail, coot, gallinule, Sept. 1—Dec. 1.

Duck, Goose, Brant, Oct. 1—Jan. 16.

No open season: Moose, antelope, caribou, sheep, buffalo, does, fawns, cow and yearling elk, prairie chicken, pinnated grouse, imported pheasants, swan (1918).

In certain counties hunting prohibited until 1920.

Non-resident license, $25.

MONTANA.

Deer, Oct. 1—Dec. 15.

Elk in Sweetgrass, Stillwater, Park, Gallatin, Madison ,Teton, Flathead; Beaverhead east of Oregon Short Line and parts of Missoula and Powell counties, only, Oct. 1—Dec. 15.

Pheasant, partridge, prairie chicken, sage hen, fool hen, grouse (see exception), Sept. 15—Oct. 16.

Exception: In Custer, Dawson, Richland, Sheridan, Valley, Phillips, Rosebud, Big Horn, Fallon and Prairie counties, Sept. 1—Oct. 1.

Black-breasted and golden plover, Wilson or jacksnipe, yellowlegs, duck, goose, brant, Sept. 1—Dec. 16.

Rail, coot, gallinule, Sept. 1—Dec. 1.

No open season: Elk (except as above), sheep, goat (1918); moose, caribou, antelope, bison or buffalo quail, imported pheasant, dove.

Non-resident license, $25.

Buck Attacks Hunter.—Barney Van Buskirk, of Marysville, was saved from being trampled and butted to death by a four-point muletail deer in Plumas county recently. Fred Parks prevented Van Buskirk being killed by a well-aimed shot that killed the deer.

Van Buskirk, Parks, Peter Wing and Dick Kelly were hunting deer in the wilds of Plumas county. Kelly wounded a big muletail deer and Van Buskirk ran ahead to finish the buck.

The deer sprang up when Van Buskirk approached and jumped on him, knocking him down. The hunter dropped his gun, and was being trampled by the maddened deer when Parks, risking hitting his friend, gave the deer the finishing shot. Van Buskirk was severely cut about the body by the animal's sharp hoofs.

Money is surely scarce; approximately $11,362.50 was expended for shells during the week, and $4,545 for targets trapped. Then there was the individual entrance fee of $79 for the week, not to mention such incidentals as railroad transportation, hotel bills, etc. To be sure a few made a good profit on their individual investment, but a whole lot more didn't get anything back from the Grand American.

WANT EARLIER OPENING ON DOVES.

Birds Are Scarce in Northern California with but Few Bag Limits Being Brought In.

Hunters are complaining about the scarcity of doves in Northern California. Since the season opened on September 1st, the hills and dells have been combed, but only a comparatively few limit bags have been reported. Many hunters are agitating for an earlier opening of the season. They claim that the season should come in from Paso Robles north on August 1st. Last year the season opened on August 1 and closed on the 7th, and then opened later and the hunters found doves in abundance.

The trouble, hunters say, is that the season opens so late that the birds have flown south. The mullen seeds are ripe in the San Joaquin valley and farther down the coast and the doves have migrated in earch of their favorite food.

Harold Ladd, who has just returned from a trip into Berryessa valley in Napa county, says: "I saw one dove in all that stretch of country. Quail are plentiful, but there are no doves."

Alameda county, which usually supplies many limits, has but few doves. District Attorney W. H. L. Hynes sponsored the first shooting party of the season without much success. The party, eight in number, secured only five doves.

The Mount Diablo hills back of Martinez have some doves in them, but hunters in that vicinity have not been very successful. Contra Costa sportsmen showed little enthusiasm over the opening.

San Luis Obispo reports that does are scarce, but over in the valley, Coalinga way, there is better news. Half a dozen hunters shot limits, but that is the best to date.

Well up in the Sacramento valley some good bags have been obtained. Especially around Redding have dove hunters had luck, but even there nothing unusual.

Sportsmen generally feel that the season opens too late in this section. By September 1 the squabs are strong and the birds leave for warmer climates. All reports from those who have been out indicate that the only good shooting within reasonable distance is south of the bay. And the farther south the better.

A. H. Beetham and Thomas J. Miller were two men who actually secured limits on the opening day. They betook themselves to Morgan Hill and secured two limits apiece. A dozen others got nothing.

But scatter-gun hunters may cheer themselves with this news: Quail are plentiful. Chiles valley, Berryessa and the Sonoma valleys are full of coveys. Mountain quail are numerous around Cisco. Kings City sportsmen report plenty of quail in the vicinity of Jolon, which is reached by stage. The season for valley quail opens October 15.

Deer Die From Peculiar Disease.—During July, 1911, deer began to die in southern Trinity county and the epidemic spread over the southern half of this county and passed into Humboldt and northern Mendocino counties. From descriptions and from evidence obtained this disease, at least as found in Trinity county, was due to an infestation of bladder worms, which parasites developed on the intestines, liver, lungs, and other vitals of the deer.

Reports this last spring (1916) from two sections of the state indicate that hundreds of deer have again died from some peculiar disease. Deputy Perkins, of Fort Bragg, reported that a number of deer were found dead, presumably from disease, in the Point Arena section. Deputy G. O. Laws, of Weaverville, Trinity county, reported that conditions on and near a part of the Trinity Forest game refuge (district 26) were serious. Large numbers of deer were found dead. They were in fine condition and could not have died from starvation. Examination seemed to show that they had died of the same disease which attacked deer in Trinity and surrounding counties in 1911. A later report from Mr. Laws states that the disease spread over a large part of northern Trinity county, and was fatal to many deer. Mr. Jesse Smith, of Hawkins Bar, states that he thinks fully one-half of the deer died in his section.—Fish and Game Commission.

Homes in Mono and Inyo Forests.—The Forest Service has recently laid out sites suitable for summer homes, resorts, and permanent camps in the Mono and Inyo National Forests, according to a report given out by District Forester DuBois. These sites are available along Rock Creek in the Inyo Forest, and at Gull, Summit, and Silver lakes in the Mono. The sites on Rock Creek and at Silver Lake are reached via the Bishop-Bridgeport State Highway, of which the Deadman's Hill and Sherman Hill sections were recently completed. Lakes and streams near by these sites are well stocked with fish, in which large catches are reported.

The construction of roads, trails, and the increasing interest of the public in the National Forests as recreation regions has resulted in a larger number of campers and travelers in the Mono and Inyo Forests this year than ever before. Resorts and hotels in or near the Forests have been crowded, and outfitters and packers have been doing a large business.

Sportsmen's Row

Del Monte is going to make a bid for the California-Nevada state championship shoot next season. The grounds are beautifully located and it is figured that a large attendance will be attracted.

• • •

The Golden Gate Club will hold its monthly shoot on the Alameda grounds tomorrow (September 17). Manager Pete Ashcroft has everything in readiness for a large turn-out. The following Sunday, September 24, the Alameda Elks will put on their big merchandise shoot to close the season.

• • •

Local nimrods are showering congratulations on Mrs. Ettie Haughawout, who became the bride of George W. Lewis on Admission Day. Mrs. Lewis has participated in many of the Golden Gate Club's tournaments and is a fair shooter who has been able to hold her own at the traps. It is hoped that the bride and bridegroom will continue to take an interest in the trapshooting sport.

• • •

It is thought that the Grand American Handicap tournament for 1917 will be held either in Chicago, Ill., or Indianapolis, Ind. Both cities have splendid grounds for the event, Chicago having the edge on Indianapolis, as the lake front grounds in Grand Park, where the tournament was held in 1915, are within walking distance of several of the largest hotels in that city, while the grounds of the Indianapolis Gun Club are a half-hour's ride from the business district of that city. The location of the 1917 Grand American Handicap will not be made until the meeting of the Interstate Association in New York City in December next. Should Chicago get the event the entries will probably exceed those of 1915, for every trapshooter in the country likes to visit the second largest city in America at least once a year.

• • •

J. F. Wulf showed his nerve under circumstances that would have thrown most men off their stride. He had one more target to shoot at in the Grand American, and he needed it to keep out of a tie, when a number of enthusiastic rooters rushed up to the score and began to congratulate him on winning the event. Jack simply accepted the good wishes, and then in order to insure that they should not have been too previous, turned to the trap, called "pull," and broke the deciding target, which gave him the trophy with 99.

• • •

John Hoerman of St. Louis, Mo., or "Johnny No-Legs," as he is better known to the trapshooters, is the "best referee in the country," in the opinion of Mr. Shaner, and Elmer's experience with these officials in all parts of the United States makes him an authority on the subject.

• • •

One of the amusing features of the St. Louis shoot was the sight of R. A. Yancy, Jackson, Tenn., parading around the grounds, closely followed by his pet goose wearing a bright red jacket. Mr. Yancy did not enter the contests as he arrived too late to make entry.

• • •

Fred Gilbert is not always at his best, but he forgets a lost target quickly and never nurses a grouch because he failed to break 'em all. He is one of the best of entertainers, hence his Indian name of "Chief Heap Talk."

• • •

The report circulated a few days ago that ex-President Theodore Roosevelt was going to Africa on another big game hunt after the election in November is pronounced untrue by Mr. Roosevelt, who says he has no intention of returning to Africa after game.

• • •

He was some shot, was A. H. Hunter, who recently died in California. It is said he never failed to land his bullet in the mark. His life was spent in the Saratoga Valley, Wyoming, where he was known as the quickest man with the gun in the West. His 75 years speak well for the open-air life he led. Always a hunter, and a most successful one.

• • •

A novel idea for dog shows is suggested by an exchange. At every show the novice criticises the judge's decisions, and the idea is to have the novice do the judging. Select one for each breed, as far as practicable, and after he has gone through his classes, submit his placings to a jury of professional judges. There would probably be a lot of reverses, but it should furnish a day of real fun to say nothing of the educational value to the exhibitors and spectators.

• • •

Fernbridge, Sept. 10.—Steelhead are running into Grieg's pool in schools. The entire course of the Eel river from Fernbridge down is full of fish, running from one-half pound to four or five pounds.

Salmon are running in and large catches are being made at Van Duzen pool near Loteta. The steelhead have followed the salmon and there is every indication that the run is on in earnest. Good catches have been made recently.

Washington Field Trials.—Tacoma (Wash.), September 14.—Running a beautiful trial and handling her birds in perfect style, F. D. Deane's Matoca yesterday again scored another victory in the annual trials of the Washington field trials club at Yelm. Matoca proved to be the winner in the original derby and again duplicated her victory in yesterday's trials. Maggie G., a pointer entered by the Delta Kennels of Ladner, B. C., was awarded second, while Mohawk Tess, a setter owned by Lyle Frazier of Vancouver, B. C., scored third money.

In the All-Age stakes, the Wilkes entry Melrose Dudie was awarded first money, while Florette, entered by the Delta Kennels, was second. Shotover, a setter owned by C. Godson of Vancouver, B. C., was third.

Los Angeles Club.—C. W. Fish was victorious in the diamond pin shoot at the Los Angeles Gun Club on Sunday. Fish smashed 46x50. He was pressed for first honors by Ed. Mohler and Ed. Mitchel, who both had 45-50. The scores:

Diamond Pin Event—S. R. Smith, handicap 19—broke 43; H. E. Sargent 19—38, F. Free 19—44, C. W. Fish 20—46, E. K. Mohler 20—45, E. Mitchell 20—45, C. M. Wood 16—42, Mrs. H. Perry 16—39, Wm. Kennedy 16—39.

Practice Event—S. R. Smith 40, L. M. Packard 46, F. Free 48, Mrs. H. Perry 40, E. Mitchell 47, C. M. Wood 43, C. W. Clement 49, E. K. Mohler 45, H. E. Sargent 38, C. W. Fish 44, S. A. Selover 19, J. Mann 42, R. L. Murray 38, G. W. McNealy 36, Mrs. C. W. Fish 28, Wm. Gaule 32, Wm. Kennedy 42, Seth Hart 41, B. L. Graves 45, E. C. Crossman 44, Mrs. E. C. Crossman 38, O. Evans 15x25, F. H. Teeple Sr. 42, F. H. Teeple Jr 44, Ray Finn 41, Joe Gross 36, Guy Pulley 42.

Ducks Here by Thousands.—Duck hunters are wearing broad and happy smiles these days. The reason is that birds by the thousands have been sighted along the San Francisco bay points and along the coast. Numerous sprigs in full plumage have occasioned no end of surprise and comment. Hunters claim that the birds have migrated from the north at this early date, which is taken as an indication that other large flights will put in an appearance during the next couple of months.

Just what caused these birds to leave the north so early has not been settled. Ducks have the faculty of scenting a storm and getting clear of it and it might be that severe weather will be experienced in the north.

Local hunters are trusting that no storm will come up in these parts before the opening of the season to drive the ducks south. If fair weather is had, predictions are freely made that the greatest duck hunting season in years will be recorded around the bay.

Federal Migratory Regulations.—Washington, D.C., Aug. 20.—Regulations designating open seasons for hunting migratory birds under the new federal migratory bird law were promulgated today by Secretary Houston of the agricultural department. They apply only in cases where equal protection to the birds is not provided under state laws, the state laws governing where the open seasons they designate begin later or end earlier than stipulated in the federal designations.

All insectivorous birds are protected indefinitely under the Secretary's order, and protection until September 1, 1918, is provided for band-tailed pigeons, cranes, wood ducks, swans, curlew, willet, upland plover and smaller shore birds.

Open seasons for other water fowl, coots, gallinules, Jacksnipes, black breasted and golden plover, greater and lesser yellow legs, rails and woodcocks are designated state by state.

Peck's Talk on Handtrap.—It is surprising to note the hundreds of sportsmen in all parts of the country who are resorting to the handtrap to get their quota of the pleasure and thrills which this great American sport affords.

Time was when the shotgun enthusiast was dependent upon the trapshooting club for this recreation and was lucky indeed if he did not have to journey many miles to indulge in the sport.

Today, however, the problem is solved in the hand-trap, a portable device which may be laid on the floor of an automobile beside the guncase, taken on the train or on the yacht. It is always ready for business and never loses its energy. It is to be found on the country estate and on the farm. The clerk in the city office becomes as independent as his employer, for while the latter may do his shooting at the country club or over the traps of the gun club in the city, the clerk with hand-trap, gun shells and fifty or one hundred targets, may board a street car with his companions and in a very short time be experiencing all of the delights that go with the sport.—George Peck.

The women instructors of the Victoria public schools, Victoria, B. C., have formed a rifle club, which holds a weekly shoot in the Pemberton gymnasium. At present there are fifteen members in the club. Last week a competition was held for the best shot, a prize of a sterling spoon being offered. It was won by Miss Belle Hastie of the Oaklands school, who made a score of 42 out of a possible 50. Mr. Shortt of the School Board presented the winner with the trophy.

WAR HAS ITS EFFECT ON BIRD LIFE.

Feathered Game Has Experience With the Bombardment in European Conflict.

According to the observations of Russian naturalists, during the first year of the war jackdaws and rooks disappeared, larks no longer sang in the fields, and even sparrows grew very scarce. The eagle, a constant resident of the Carpathians, migrated to the Balkans, and the wild pigeon disappeared also. The president of the Russian Ornithological Committee, D. M. Rossinsky, has noted the influence of military operations upon the migration of birds. Thus ordinarily in Central Siberia birds gravitate during the spring from south to north, in eastern Siberia from eoutheast to northwest, and in European Russia from southwest to northeast.

Seeing that military operations are proceeding exactly in the region of these migratory routes, the flights of birds are powerfully affected, especially those of the stork and snipe. A very well known Moscow bird-hunter recollects that in the Russo-Turkish war of 1877-8, near Moscow, an unusual quantity of snipe was observed; and a French authority noted the appearance in the woods of Flanders some time after the commencement of the war of numerous herds of wild boar, which had descended from the Vosges and Ardennes, presumably terrified by the din of gun and rifle fire.

Commenting on the appeal of the Petrograd Society of Naturalists, to which reference has just been made, Prof. Kaigorodov, a renowned ornithologist, mentions that an extraordinary movement of geese northward had recently been reported to him. It is evident that these birds could not settle in Mitau and White Russia owing to the military operations in progress there, and they flew away. The same is true with regard to ducks, very many of which appeared on the River Volhov. "Of course," this authority continues, "it would be premature to affirm that this, that, or the other departure from the usual standard is indubitably the result of the war operations; but the war has furnished, and will still furnish, many interesting and valuable observations in this connection."

TEMPLETON WINS COAST HANDICAP.

Portland (Ore.), September 12.—O. N. Ford of San Jose, Cal., won the Pacific Coast introductory match at the opening here today of the eleventh Pacific Coast Handicap shooting tournament. Ford tied with H. Lorenzen, Newman, Cal.; Hugh McElroy, Spokane, and Peter H. O'Brien, Portland, in this event, all breaking 96 clay targets out of 100.

O. N. Ford, along with H. Lorenzen, captured high ished second, McElroy third and O'Brien fourth. In the shoot-off to decide the winner, Lorenzen finamateur average of the day, with 134 out of 140 in the regular events, while in the special race of ten pairs of doubles, Charles Leith of Woodburn, Ore., W. W. McCormack of Eugene, Ore., J. E. Rice of Bellingham, Wash., and E. J. Farmin of Sand Point, Idaho, each recorded eighteen breaks in twenty attempts.

High professional in the 100-bird race went to Fred A. Dryden of Spokane, Wash., and Hugh E. Poston of San Francisco, each with 98, and grand average for the 140 targets went to Hugh Poston, with 137.

The five high guns in the 140-target race were: H. E. Poston, San Francisco (professional), 137; Fred A. Dryden, Spokane (professional), 136; O. N. Ford, San Jose, 134; H. Lorenzen, Newman, 134.

September 13—H. Lorenzen of Newman, Cal., won first prize in the Pacific Coast preliminary handicap even at Portland today at the shooting tournament.

A high wind resulted in low scores, Lorenzen breaking only 91 out of 100. Peter H. O'Brien, Portland; Charles Leith, Woodburn, Ore., and Frank Troeh, Vancouver, Wash., tied for second with 90. In the shoot-off Leith got second, O'Brien third and Troeh fourth.

O. N. Ford of San Jose won the Pacific Coast special event with 97 breaks out of 100. Other scores in this match were: O'Brien 96, Troeh 95, Guy Egbers, Pasco, Wash., 93, and Frank Van Atta, Vancouver, Wash., 92.

September 14.—The Pacific Coast Handicap match, the big event of the eleventh annual Pacific Coast trapshooting tournament, was won today by Frank Templeton of Portland, who broke 91 out of 100 targets at the 20-yard line. W. K. France of Arlington, Ore., standing on the 18-yard line, was second with 90.

William E. Carlon of Portland and Mark Rickard of Portland, both standing at the 17-yard line, tied for third in the Pacific Coast Handicap match with 89. A. P. Haliburton, Lindsay, Cal., 20 yards; Peter H. O'Brien, 21 yards, and G. L. Templeton, 16 yards, tied for fourth place with 88.

Frank M. Troeh of Vancouver, Wash., won the Pacific Coast overture event. He broke 93 clay targets out of 100. Gusty winds prevented good scores.

Guy F. Egbers, Pasco, Wash., Frank Templeton, Portland, and Peter H. O'Brien, Portland, tied for second with 91 breaks. C. L. Templeton, Seattle; W. W. McCornack, Eugene, Ore., and Dennis J. Holohan, Burley, Idaho, ited for third with 90 breaks.

COMMENT ON THE GRAND AMERICAN.

Trap Shooting Classic Does Not Suffer in Comparison with Other Tournaments.

The Grand American trapshooting tournament held in St. Louis, Mo., late in August did not suffer one iota in comparison with any of the other sixteen annual trapshooting classics. It was the largest in point of numbers with one exception—that exception being in Chicago in 1915. Chicago went into the affair tooth and nail and strove for 1000 entries in the Grand American Handicap. St. Louis would have been satisfied with one-half of that number in the Grand American, and a correspondingly smaller number in the other events, but one large tournament only whetted the appetite of the trapshooters for more and they came to St. Louis in such large numbers that the tournament was a trifle unwieldy, and quite naturally it ran beyond schedule time. 227,250 targets were thrown.

Mound City sportsmen and writers have been informed that the Grand American trapshooting tournament was the greatest of American sporting events. They asked to be shown. That is a failing they have in Missouri—to be shown. Well, they were. Never has a bigger sporting event been held in St. Louis than the Grand American trapshooting tournament—and no bigger or more interesting sporting event could be held anywhere. Here there were more than 600 persons shooting at clay targets—quite a number of them being women. It was the first time that women trapshooters were allowed to enter the events and they made excellent use of the privilege. The Interstate Association made a wise move in allowing the women to enter the sport with the men. Quite a number of them are first-class shots and the majority of them will improve in competition.

It was a truly representative American gathering of sportsmen—real sportsmen. A finer band of men and women would be impossible to find. They came from Maine to California, and from Canada to Mexico—nearly all business men and women, who love the sport of trapshooting. It is a sport, too, where fairness is put above everything else. There were many instances of this during the week of shooting. One notable instance was in the doubles target match for the Hazard trophy between Guy Dering, the holder, and George Nicolai, the challenger. Trapshooters do not dispute the decision of the referee—his decision is final, and right or wrong one seldom hears a complaint. In this case Nicolai fired and knocked one of the targets out of its course. The referee called "lost." Dering asked the referee to change his verdict to "dead," declaring that he was firm in his belief that Nicolai had hit the target, and at Dering's suggestion the change was made. This target put Nicolai one target in front of Dering and it might have been the championship, too. But that is the type of men and women that are to be found in the sport. Nicolai did win the match, for at the last forty targets Dering could hardly manage his gun, the gun barrels being so warm—but there was no alibi from him when the scare was announced against him.

The week's shooting brings out many shooters unheard of at other times, and usually some shooter with a meagre reputation wins the Grand American Handicap. This year was no exception to the rule. Captain Jack Wulf, of Milwaukee, Wis., as picturesque a character as ever appeared before the traps, won the Grand American, and he did it in a most satisfactory manner. He has been shooting ever since he wore knee breeches and his win was a thoroughly popular one.

Wulf is always attired like a cowboy, even to the wide sombrero, and wears a shell bag made out of Mexican beads. He went out with an unfinished run of 93. The first person to congratulate him on his victory was L. B. Clarke, of Chicago, the winner of last year's event. Besides Clarke there were six other former Grand American Handicap winners in the event. They were J. J. Blanks, Fred Harlow, Harve Dixon, who won the St. Louis Introductory; W. E. Phillips, Mart Hootman and Woolfolk Henderson. Wulf shot from 19 yards, being the fifth shooter to win the event from that mark. Three times it has been won from 19, three times from 17, three times from 16, twice from 22 and once from 20 yards. In the seventeen years of the tournament there was but one other 99 score and only once was the perfect score made. That was in Chicago on June 23, 1910, by Riley Thompson.

While the Grand American Handicap attracts the greatest number of entries and is regarded as the classic event of a classic tournament, take it from us, that the event that the chief interest is centered in is the national amateur championship—in which only the winners of State championships—or runners-up, in case the champion cannot attend—can compete. There are many shooters who would give every buffalo nickel they possess to win a State champion and have the honor of shooting in this event. This race was won by Frank M. Troeh, of Vancouver, Wash., who broke 99. Three years straight this championship has been won with 99. Charles Newcomb, of Philadelphia, broke that many targets last year, and Woolfolk Henderson, of Lexington, Ky., accomplished the feat the year before. Troeh broke 79 before missing. Thirty-seven State champions faced the traps; the representatives of Delaware, Minnesota, New Hampshire, Florida, Mississippi, Oregon, Maine, Montana and Virginia being among the missing. Seven of the State champions broke 100 targets in winning the State title—and it was the opinion of the vast throng of trapshooters that it would take 100 breaks to win. A peculiar thing about the week's shooting is that not a perfect score was made in any one of the 100-target competitions.

The professional shots had their own little tournaments daily and these brought out two almost unheard of shooters, who will be quite prominently mentioned in professional circles for some time. Homer Clark, a little shaver, of Alton, Ill., won the final shoot of the E. C. trophy over a varied assortment of targets, and also the E. C. trophy for the open title at doubles and singles, and then proceeded to put up the high score every day until the single target championship was shot for, and then Clark was tied by Phil Miller, of Dallas, Tex., a professional of two months, and on the shoot-off Miller won. When one bears these names, it sort o' makes you feel that the veterans are passing.—[Peter P. Carney.

Tournament at Del Monte.—Del Monte staged an interesting blue rock tournament on September 8, 9 and 10. Over thirty nimrods took part in the program and the visitors were loud in their praise of beautiful Del Monte as the scene of trapshooting activity. The events were well contested with some high scores being set.

Five events totaling 100 targets were shot on September 8. W. Varien of Monterey, an amateur, was high gun with a string of 96.

The trophy for high gun went to J. B. Brady, who had to his credit 91. L. S. Hawxhurst, professional, with but two misses in 100, won the open event. Following are the scores above the eighty mark:—

J. B. Brady 91, George Thomas 81, W. Varien 96, J. A. Cook* 90, R. C. Reed* 92, L. S. Hawxhurst* 98, A. G. Wilkes 87, C. A. Haight* 89, W. R. Ellis* 90.

Thirty-five marksmen took their places at the traps in the second shoot day. The event was an Admission Day handicap, 100 birds. Tony Prior was high gun. With a 21-yard handicap he broke 94 of the 100 birds. Scores:—

Tony Prior (21) 94, David McFadden (19) 93, Barney Worthen (20) 89, William Landry (20) 88, Al Cook (20) 90, Dick Reed (22) 88, Bill Ellis (20) 84, W. H. Price (19) 88, Miss Meyers (19) 76.

The Del Monte blue rock handicap at 100 targets was won on Sunday by J. B. Brady of the Bohemian Club, with the excellent score of 96, shooting from 18 yards. Dr. A. M. Barker of San Jose was second high gun, with 93 breaks from 19 yards. B. Worthen (21 yards) and H. R. Phinney (18 yards) tied for third, with 90. The trophy for this position went to Worthen, who won the shoot-off, 23 out of 25.

Amon gthe professionals, Dick Reed was high, breaking 89 from 22 yards. Bill Ellis scored second place, with 87 out of 100, from 20 yards. Len Hawxhurst shot 81 out of the 100 from 22 yards.

Following are the scores of the Del Monte handicap: A. G. Wilkes (20) 87, Dr. C. D. McGettigan (19) 76, T. T. C. Gregory (19) 73, George Anderson (19) 84, George Thomas (17) 89, C. McFadden (17) 82, Miss G. Meyers (16) 70, Mrs. A. G. Wilkes (16) 56, Louis Sloss (16) 85, Tony Prior (23) 79, B. Worthen (21) 90, L. S. Hawxhurst* (22) 89, Dick Reed* (22) 89, Charles Nash (21) 86, H. R. Phinney (18) 90, Dr. Edward Topham (18) 89, Dr. A. M. Barker (19) 93, A. F. Baumgartner (19) 79, J. B. Brady (18) 96, A. L. Cook* (20) 80, Bill Ellis* (20) 87, D. McFadden (20) 89, F. Thoicke (19) 88, J. W. F. Moore* (19) 59. (*Professionasl.)

Peters' Pointers.—Mr. L. H. Reid, of Seattle, Wash., on August 27th, finished a straight run of 319 targets, and on Aug. 30th, shooting on the Seattle grounds, made a long run of 168, unfinished. He used Peters "steel where steel belongs" shells.

At Williams, Ariz., Dr. P. A. Melick won High Amateur and General Average, score 194 x 200. Mr. Ben Wilson of Gallup, N. M., was third amateur, breaking 192 x 200, and Mr. W. E. Mullen of Ray, Ariz., fourth amateur with 190. Mr. A. W. Bruner of Los Angeles was High Professional, breaking 172 x 200. Each of these gentlemen shot Peters Shells.

At Los Angeles, Mr. L. S. Hawxhurst of Oakland, Cal., was second professional (tie), breaking 289 x 300 and tied for High Professional on all targets, 381 x 400, making a long run of 111 straight. He used Peters "steel where steel belongs" shells.

Mr. O. N. Ford, the noted trap-shot of San Jose, Cal., while using Peters shells in a large part of his shooting during the 1916 season has made some very creditable scores. At Salinas 99 x 100; at San Jose 483 x 500, the highest score made in the United States for A. A. T. A. medal; Los Angeles 384 x 400, including 95 x 100 from 22 yards; Aitkin, Minn., 289 x 300; Duluth, Minn., 146 x 150; Rawlins, Wyo., 379 x 400. He has made long runs of 75, 62, 55, 52, 79, 98 and 59 from 22 yards. These scores show a total of 1825 breaks out of 1890 targets shot at with Peters shells and a percentage of 96.29.

San Jose Program.—The San Jose Blue Rock Club is out with the program for the registered shoot on September 24 and 25. There will also be some practice events on Saturday, September 23d, including a 100-target competition. On Sunday there will be eight 20-targets, one 50-targets and a miss-and-out contest. The same program will be run off on Monday. Trophies will be set up for each lady entrant. The O. N. Ford championships at 25 doubles and fifty singles will be shot.

GRAND AMERICAN TROPHY WINNERS.

St. Louis Introductory—1st, H. Dixon, 197; 2d, G. T. Hall, 194; 3d, W. Ridley, 194.

Mound City Overture—1st, F. M. Troeh, 99; 2d, M. Arie, 99; 3d, R. A. King, 99.

National Amateur Championship at Doubles—1st, Allen Heil, 89; 2d, F. Ford, 88; 3d, R. A. King, 81.

National Amateur Championship at Singles—F. M. Troeh, 99.

Special Events for Women—First day, Mrs. L. G. Vogel, 47; second day, Mrs. H. Almert, 45; fourth day, Mrs. D. J. Dalton, 47.

Preliminary Handicap—1st, Al Koyen, 97; 2d, L. S. Rambo, 96; 3d, C. D. McGary, 95.

Grand American Handicap—1st, J. F. Wulff, 99; 2d, E. Maland, 98; 3d, Chas. Atkinson, 97; 4th, D. C. Rogers, 97; 5th, H. C. Daley, 97.

Consolation Handicap—1st, H. Furnas, 96 (17 in shoot-off); 2d, W. E. Phillips, Jr., 96 (16 in shoot-off); 3d, Mrs. L. G. Vogel, 95.

Women's Trophy in G. A. H.—Mrs. L. G. Vogel, 87; Miss H. Hammond, 84.

Professional Trophy—P. R. Miller, 97 (25 in shoot-off).

Targets Trapped.

Preliminary Day—	
St. Louis Introductory	42,480
Professionals	4.325
Joker	1,124
Total	47,929
First Day—	
Mound City Overture	21,200
Double Championship	7,100
National Amateur Championship	3,700
Ladies' event	600
Professionals	4,850
Joker	1,918
Total	38,828
Second Day—	
Preliminary Handicap	50,620
Ladies' event	750
Professionals	5,000
Joker	2,603
Total	58,973

Vernon Club.—Ties were the feature of the shooting program at the Vernon Gun Club on Sunday. In the season trophy event S. A. Bruner, L. C. Forrest and C. E. Groat tied for high, each breaking 48x50. In the shoot-off at 25 targets Bruner was victorious, getting 24x25. This gave him the gold bar.

S. A. Bruner was again high on the 100 targets when he turned in a score of 97x100. C. E. Groat was second with 96x100. In the practice event, Dierdoff and Bruner tied for high with 49x50, while Groat was again runner up with 48x50. This gave Bruner a clear field for the day, as he captured every event. Sixteen shooters took part in the day's shoot.

The complete scores ars as follows—

	Practice. Hdcp.		Ttl.	Trophy	Ttl.
Dierdoff	18	24	25—49	23	21—44
F. A. Bruner	20	24	25—49	24	24—48
A. W. Bruner	16	..	..—..	24	22—46
Forrest	17	22	23—45	25	25—48
Pugh	18	22	23—45	23	22—45
Ed. Bohring	18	..	..—..	25	22—47
Meek	18	21	22—43	22	24—46
Bole	16	20	22—42	24	22—46

Hardey	16	20	19—39	..	..—..
Cooper	16	22	22—44	22	23—45
Mentzuber	16	..	..—..	21	22—43
Groat	19	24	24—48	24	24—48
Kimble	16	22	..—22	..	..—..

Westy Hogans' Shoot.—Atlantic City, N. J., Sept. 12.—Alfred Plum of Atlantic City won the all-around trapshooting championship by defeating Edward L. Bartlett, Baltimore, in the challenge match for the "E. C." cup today, preliminary to the 10th annual tournament of the Westy Hogans. Bartlett won the cup last month at the Grand American handicap in St. Louis and Plum was the runner up on that occasion.

Plum broke 181 of his 200 targets today while Bartlett smashed 165. The winner broke 144 in 150 singles and 37 in the 25 pairs of doubles comprising the event. Bartlett broke 131 singles and 34 in the doubles.

Lester S. German, the Maryland professional, was high gun in today's practice shoot by breaking 149 of his 150 targets. Allen Heil, Allentown, the Pennsylvanian State champion; Frank S. Wright, Buffalo, and Plum, all amateurs, were tied for second place with 147 breaks each. W. H. Patterson, of Buffalo, also an amateur, broke 146. A. Sommers, Delta, Pa., was second high professional with 146 breaks.

Mrs. Chas. A. O'Connor of Spokane, Wash., recently astonished the natives there by breaking 48 x 50 targets at the Spokane Gun Club. Mrs. O'Connor is a comparatively new shooter, but has taken to the sport like a duck takes to water, and with the encouragement of her hubby, who can break 147x150 most any day in the year, she is making a very rapid progress and placing to her credit an unusual average for a woman.

[Continued from Page 6.]

High steppers, mare or gelding, to be shown to appropriate vehicle; conformation, quality and performance to count; prizes $20, $10 and $5.—Confidence, owned by R. L. English, first; Kildare, owned by Ethel B. Davie, second; My Surprise, owned by Mrs. Carolyn Schreiber, third.

Hunters, in pairs; lady and gentleman, both in costume; four hurdles; prizes $20 and $10.—Altadena and Bounder, both owned by R. L. English, first; Wonderland, owned by Mrs. A. W. Pike, and Mystery, owned by W. J. Batchelder, second.

Weight-carrying class up to 200 pounds; prizes $20, $10 and $5.—Kildare, owned by Ethel B. Davie, first; Golden, owned by E. C. Ford, second; Edith Adams, owned by Dr. Lee C. Deming, third.

Three-gaited class, 15.2 or over; conformation and quality 50 per cent, paces and manners 50 per cent; prizes $20, $10 and $5.—Mavis, owned by H. C. Ahlers, first; Confidence, owned by R. L. English, second; Edith Adams, owned by Dr. Lee C. Deming, third.

Novelty class, best team, rig and equipment; prizes gold and silver medals.—My Surprise, owned by Mrs. Carolyn Schreiber, first; Kildare, owned by Ethel B. Davie, second.

High jump, any age or sex; prizes $20 and $10.—Bounder, owned by R. L. English, first; Jupiter, owned by Mrs. Leota I. Zapp, second.

Five-gaited horses, stallions, four years old and over, prizes $50, $25 and $15.—Highland Monarch, entered by Adelaide S. Gillis-McCormick, first; Comedian, entered by R. L. English, second; Jurist, entered by Dr. Lee C. Deming, third.

High school class; prizes $25 and $10.—Jupiter, entered by Leota I. Zapp, first; Firecracker, entered by Mrs. C. B. Anderson, second.

Pony class, other than Shetland; combination to be ridden and driven by a boy or girl under fifteen; prizes $20, $10 and $5.—Hassan, entered by Mrs. C. B. Anderson, first; Babe, entered by Montecito Riding School, second; Lady, entered by Miss Geraldine Bowers, third.

Hunter class, gentlemen in costume, up to $200 pounds; prizes $20, $10 and $5.—Bounder, entered by R. L. English, first; Altadena, entered by R. L. English, second; Sweetheart, entered by R. H. Gudgeon, third.

Polo class, 14 hands and not exceeding 15 hands, to be worked through obstacles; conformation and quality 50 per cent, speed, performance and manners 50 per cent; prizes $20, $10 and $5.—Wabash, entered by San Francisco Riding School, first; Doris, entered by San Francisco Riding School, second; Sir Hugh, entered by Montecito Riding School, third.

Combination class, five-gaited stallions, any age—San Vicente (Mrs. A. S. Gillis-McCormick) first, Comedian (R. L. English) second, and Jurist (Dr. Lee C. Deming) third.

Polo class, with mallet—Sarah Rex (San Francisco Riding School) first, Wabash (San Francisco Riding School) second, and Sir Hugh (Montecito Riding School) third.

Three-gaited class, any age or sex, for gentlemen only—Kildare (Miss Ethel B. Davie) first, Confidence (R. L. English) second, and Golden (E. C. Ford) third.

Three-gaited class, any age or sex—Star I (E. S. Heller) first, Confidence (R. L. English) second, and Kildare (Miss Ethel B. Davie) third.

Tandem saddle class—Wonderland and Rex McDonald (Mrs. A. W. Pike) first, My Surprise and Chester Chief (Mrs. Carolyn Schreiber) second, and Confidence and Kildare (R. L. English), third.

Hunter class, ladies and gentlemen in costume—Bounder (R. L. English) first, Wonderland (Mrs. A. W. Pike) second, and Altadena (R. L. English) third.

Tandem Hunter, wheeler a trotter, leader a hunter—Kildare and Bounder (R. L. English) first; Peanuts and Fred (San Francisco Riding School) second. Prizes $20 and $10.

Five-gaited class, any age or sex, gentlemen only—Helen Idlewood (R. L. English) first; Angelus Butterfly (R. L. English) second; Candy Kid (Dr. W. J. Smythe, Oakland) third. Prizes, $20, $10 and $5.

Futurity, Pacific Coast Gaited Saddle Horse Association No. 4.—San Vincent (Mrs. A. S. Gillis-McCormick) first; Le Grand McDonald (E. A. Bridgford) second; King Denmark (Mrs. W. Bernstein) third; King Cyrus (E. A. Bridgford) fourth.

Five-gaited class, any age or sex, ladies only.—Helen Idlewood (R. L. English first; Angelus Butterfly (R. L. English) second; Rex McDonald (Mrs. A. W. Pike, Redwood City) third. Prizes $20, $10 and $5.

High jumping contest: Bounder (R. L. English) first; Altadena (R. L. English) second; Jupiter (Leota I. Zapp, Fresno) third. Prizes, $20, $10 and $5.

Grafton long jump, free-for-all, jumping only to count, 10 feet in width over pasteboard boxes—Bounder (R. L. English) and Sarah Rex (Dr. Lee C. Deming) tied for first place.

Combination team, any size or sex, different owners not barred; team to be unharnessed in ring and shown under saddle.—R. L. English's Tarna Denmark and Dr. W. J. Smythe's Candy Kid, first; O. Younger and E. S. Heller's Chester Chief and Star I., second; Dr. W. Henderson's Zamil and Mubarka, third.

Harness pair, any sex, 15 hands or over—Tom Smith and Jonesie Mac (D. E. Hoffman) first; My Surprise and Chester Chief (San Francisco Riding School) second; Colonel Roosevelt and Major McKinley (F. H. Metz) third.

Roadsters, 15.2 hands or over—Colonel Roosevelt (F. H. Metz) first; Jonsie Mac (D. E. Hoffman) second; Bon Lark (H. C. Ahlers) third.

Tandem harness class, any size—Kildare and Star (R. L. English) first; My Surprise and Chester Chief (San Francisco Riding School) second.

Best lady rider, amateurs only—Mrs. A. W. Pike, first; Mrs. E. Riddle, second.

Polo class, 14 to 15 hands—Calamba (San Francisco Riding School) first; Sir Hughes (Montecito Riding School) second; Doris (San Francisco Riding School) third.

Jumping over 4 hurdles—Mrs. Leota Zapp's Jupiter first, R. L. English's Bounder second.

Five-gaited class—Sweepstake State Class—Stallion, mare or gelding.—Helen Idlewood (R. L. English) first, San Vicente (A. S. Gillis-McCormick) second, Angelus Butterfly (R. L. English) third.

Three-gaited Class, Champion State Class, mare or gelding of any age, competition limited to first prize winners in individual classes.—Confidence (R. L. English) won. Prize—cup valued at $50.

Pony class—gold medal—five animals, any sex.—Beraldine Bowers, five ponies, won.

Pony Awards.

Class 40. Section 301. Shetland Pony Stallion, three years or over—First, Chester, Geraldine Bowers, Davis; second, Prince of Wales, Geraldine Bowers, Davis.

Class 40. Section 302. Shetland Pony Stallion, two years and under three—First, Midnight, Geraldine Bowers, Davis.

Class 40. Section 303. Shetland Pony Stallion, one year and under two—First, Toy, Geraldine Bowers, Davis.

Class 40. Section 304. Shetland Pony Mare, three years or over—First, Dora Lee, Geraldine Bowers, Davis; second, Sonia, Geraldine Bowers, Davis.

Class 40. Section 305. Shetland Pony Mare, two years and under three—First, Beauty, Geraldine Bowers, Davis.

Class 40. Section 306. Shetland Pony Mare, one year and under two—First, Sweetheart, Geraldine Bowers, Davis.

Class 40. Section 307. Shetland Pony Foals, under one year—First, Midget, Geraldine Bowers, Davis; second, Mystery Girl, R. H. Gudgeon, Santa Barbara.

Class 40. Section 308. Shetland Pony Get of Sire—First, get of Chester: Midget and Toy, Geraldine Bowers, Davis.

Class 40. Section 309. Shetland Pony Produce of Dam—First, Product of Sonia: Toy and Purple, Geraldine Bowers, Davis.

Class 40. Section 310. Shetland Pony Grand Display—First, Sonia, Dora Lee, Prince Wales, Bessey, Chester; Geraldine Bowers, Davis.

Class 41. Section 317. Ponies other than Shetland, mare three years old or over—First, Lady, Geraldine Bowers, Davis; second, Lassie, Geraldine Bowers, Davis.

THE GREATEST BROOD MARE.

While horsemen have gone into ecstasies in the last few years over the achievements of Peter the Great 2:07¼, and have justly pronounced him one of the most remarkable sires ever seen, comparatively little has been said concerning Nervolo Belle, the mare that produced the greatest two colt trotters of his family, and that now begins to look like a force in heredity quite as strong as Peter the Great himself, another of her brood by a different sire having distinguished himself for early and extreme speed in the recent race for the American Horse Breeders' Futurity for 2-year-olds, says the New York Herald.

When The Real Lady won in 2:09½ and 2:09¾ at Cleveland, Worthy Volo, a rugged, beautifully formed chestnut colt, by Axworthy 2:15½ out of Nervolo Belle, was separately timed in 2:10, and Alonzo McDonald, who trains him, said at Hartford that he expects to put him in the 2:10 list before the present season ends. If he succeeds in doing so Worthy Volo will be the third trotter produced by Nervolo Belle to beat 2:10 as a two-year-old.

Peter Volo, the first foal to give her prominence, was by Peter the Great, and was far and away the most remarkable colt trotter that has yet appeared. He was foaled in 1911, was trained as a yearling and lowered the record for trotters of that age to 2:19. As a two-year-old he won the Kentucky Futurity and three other races without meeting defeat in a single heat. He beat the best time ever made by trotters of this age by more than three seconds, setting the record at 2:04½ where it still stands. In his three-year-old form he again was invincible, winning the Kentucky Futurity for three-year-olds and five other races, worth about $32,000, and setting the record for colts of his age at 2:03½ in the Futurity race. Last season, as a four-year-old, he lowered the mark for trotters of this age to 2:02, doing it in actual contest with Lee Axworthy, the horse that recently set the stallion record at 2:00.

Nervolo Belle's next foal was the chestnut filly Volga, also by Peter the Great, dropped in 1913. Brought out as a two-year-old last season, she won the junior division of the Kentucky Futurity and four other races, trotting in 2:07¾, which is the fastest time ever made by a filly of like age. She was not once beaten, and it was common talk among horsemen at Lexington last fall that if any of her competitors had been fast enough to make her do it she could have trotted in 2:05 or thereabout. Peter Volo has been retired to the stud and Volga in her first race as a three-year-old trotted in 2:07¾, showing pretty clearly that she again has all the futurities at her mercy.

To realize the extraordinary achievement of Nervolo Belle in thus producing three such two-year-olds as Peter Volo, Volga and Worthy Volo, it is merely necessary to remember that only ten two-year-olds in the history of harness racing have earned records as fast as 2:10. Excepting Peter Volo and Volga, respectively, the best colt and the best filly of this age that ever appeared, no two are from the same dam.

The story of Nervolo Belle shows what a lottery is the breeding of fast horses. Got by Nervolo 2:04¼, a pacing stallion of no prominence as a sire, and out of a mare that never produced anything of note, she was apparently no more valuable than any one of 50,000 other trotting bred mares in the country, yet she has done what no other in the history of trotting horse breeding has done. And she is yet a young mare, having been foaled in 1906. Stoughton A. Fletcher, who paid $50,000 last winter for Peter the Great, purchased Nervolo Belle a few months ago, paying $10,000 for her, according to report. He is breeding her back to Peter the Great. William Simpson, of New York, owns her yearling colt, by Axworthy 2:15½, and thus a full brother to Worthy Volo. He will be trained next season and ultimately used for breeding purposes by Mr. Simpson, who still owns a few choice trotting mares. Peter Volo is in the stud at W. E. D. Stokes' Patchen Wilkes Stock Farm, where he succeeded his sire when Mr. Stokes sold Peter the Great. Not many horsemen would have chosen Peter Volo for such an important place before Volga and Worthy Volo came out, but their performances, taken in connection with his own, make it look as if he was not only by the greatest of trotting sires but out of the greatest of producing dams, which is just the kind of breeding wanted in a stock horse.

A Chance for Common Cows.

Common cows—just grade cows—are to have their chance to win fame. Of the $7500 in cash or special prizes offered in the Dairy Cow Competition to be conducted by the University of California from November 1, 1916, on, nearly half will be reserved for grade or common cows, the rest being for the pure-breds, with special competitions for pure-bred Jerseys and Guernseys and for pure-bred Holsteins.

Besides the unusual magnitude of the prize-list, this dairy competition is unusual in its competitions not only for individual cows but for groups of five to ten cows, and for production for ten consecutive months instead of for a year.

The common or grade cows will compete among themselves alone for cash prizes of $10 to $300 each, aggregating $1900. In addition, nearly all the special prizes, dairy apparatus, bull calves, etc., will be awarded for production records by common cows. Such competition will be particularly valuable because grade cows make up for the larger proportion of the dairy herds of California. Through this competition farmers will be led to strive for increased production from their grade cows.

The eyes of California dairymen will be opened to the great increase in profits possible from wise selection and better care and attention so as to bring a herd to its highest possible production. Those competing will find out that the net results from the dairy depend much more on the kind of animals kept than on the way they are fed and handled, or than on the price of butter-fat or the cost of feeding.

To induce dairymen to find out for themselves whether their herds are as profitable as they ought to be is the great object of the competition. The reason why ten months is its length instead of one year—the period most of the breed associations require—is that it is desired to compete for a normal lactation period of ten months, so as not to upset the regular breeding of the cows. This avoids the risk of a long dry period involved in milking cows for a full year for the making of high annual records. This ten-month competition will interfere in no wise with the future usefulness of the herd.

Valuable as will be the prizes for the winners, the College of Agriculture feels that the competition will prove of inestimable value to those also who win no prizes and to the whole dairying industry of the State because of the stimulus it will prove to the building up of better herds.

Entry blanks and copies of the rules for the competition and of the prize-list may be obtained by writing to Professor F. W. Woll at the University of California Farm at Davis.

Rats in the Chicken Yard.

Rats cause great losses in many poultry yards but at the Missouri College of Agriculture we have had no trouble in getting rid of them by poisoning with a mixture of two parts of corn meal and one part sugar of lead. The hand should not come in contact with the poison feed and all other feeds should be removed so the rats cannot get them.

The poisoned feed may be kept away from the chickens by putting it in a tray, nailed to the middle of the bottom of a box at least a foot square and six inches high. The box should be closed on all sides except for a number of inch and a half holes bored through the sides near the bottom.

Burn or bury the dead rats so that chickens cannot eat them. The decayed flesh of even unpoisoned rats is likely to cause limber neck, as ptomaine poison is called in chickens.—H. L. Kempster, Missouri Agricultural Experiment Station.

THE FARM

MANUFACTURING PLOWS.

Plow works are fewer in nmber but immensely larger in size than they used to be. "It's one thing to make a plow but a nentirely different proposition to sell it," one manufacturer said. This man was just a medium-sized manufacturer. "A concern has to be big enough," he went on, "so its selling expense will be proportionately low considering the price the purchaser pays. The cross-roads blacksmith can no longer make as good a plow as a specially equipped plow works, nor can he sell them so cheaply."

One plow company has a complete ice plant of 30 tons daily capacity, used for furnishing water at a uniform temperature for tempering plow steel. All sandpapering of handles and beams is done by special sand-papering machines which give not only smoothness but a high polish as well. The foundry of one large plow factory is 816 feet long, and in the pattern department there are 7500 different patterns. In the early days of plowmaking a good many plows were made to order, but nearly all the best-equipped concerns have plows in stock for practically every kind of soil, power and personal preference.

One of the largest companies turns out a million extra shares annually for its plows already in use. It uses 300 tons of corundum annually for grinding, and 1000 tons of oil and paint.

All of the large companies have extensive experimental grounds for testing new designs, and several have well-equipped farms run by practical farmers.—F. and F.

FORAGE FOR HOGS.

The U. S. Department in its "News Letter" dwells at length upon this subject, and although the article in question applies more particularly to the Northern States, there is much which can be raised from it by the hog raiser on the Pacific Coast. It declares that to make hog production most profitable the farmer should provide pasture for his hogs whenever possible. The earlier in the year that green feed can be supplied the better. Swine o fany age relish green feed, and its use always reduces the cost of producing gains on hogs. In addition, it keeps the animals in good thrifty condition.

The green crops which can be used for such pasturage of hogs are numerous and comprise wheat, oats, rye, barley, rape, Canadian field pease and vetch. Any of the cereals do well planted singly, or in combination with rape, peas or vetch. The pigs should be turned in to pasture cereal crops when the plants attain a height of about 6 to 8 inches, and taken off when the plants reach such a height that the pigs begin to spit the chewed material from their mouths. This is because the percentage of crude fiber, the indigestible part of the plant, increases rapidly as the plants grow larger.

The article says: "Green wheat, oats, rye, and barley are generally classified as carbonaceous roughages. When young, however, these contain a high percentage of protein and may be classified as nitrogenous roughages in the early stage of growth. Because the small grains when young are so nutritious they are ideal plants to grow for pigs during late fall and early spring."

Hogs—well bred hogs—are multiplying all over the Pacific Coast. The days when the rancher believed that anything was good enough for hogs have passed, and with the gradual reduction of the losses by cholera, more and more farmers are turning their attention to properly raised and fed hogs, and taking into account the great value of the manure, and are bound to find hog raising one of the best side issues of the modern farm—particularly when fed on the Canadian field peas.

CHOOSING THE BEST LAYERS.

(Concluded from last week).

When selecting your pullets for the breeding pen, select at least double the number needed, and mark them to designate first, second , and third choice. As they develop to full maturity, some that seemed inferior will appear as good or even better than the most promising at an earlier stage in their development, but the preference for breeders should be given to the ones making earliest development, other things being equal.

The same rule for the selection of cockerels holds true as for the selection of pullets, in regard to early development and vigor. In addition, the cockerels should be the sons of hens that are known to be heavy, persistent layers. If possible, the heavy-laying inheritance should be confirmed by similar excessive egg-production quality in preceding generations from which the cock bird has descended. Above all, aim for abundant vigor in all breeding stock.—F. F.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

CHESTNUT TOM 2:17¼ FOR SALE.

Chestnut Tom 43488, standard and registered, eighteen years old, but strong and vigorous, is offered for sale for a ridiculously low price. The late Martin Carter, who was one of California's most successful breeders, considered this horse one of the very best he ever bred for a sire. Chestnut Tom is sire of the dam of the coast champion Wilbur Lou (1) 2:19½, (3) 2:10¼, sire of Natal Day 2:13¼, coast champion two-year-old. The late Martin Carter bred Chestnut Tom for a broodmare sire. He is by Nutwood Wilkes, his dam is by Director and his grandam is the dam of his sire and by Nutwood. $150 takes him. Address GEO. T. ALGEO, 3608 Piedmont Avenue, Oakland.

I WANT TO BUY.—I have sold eleven horses in the last few months ranging from $2,000 to $200. If you have a horse for sale and will write me, I will tell you what my system is. It is a winner. I find there is a buyer for every horse for sale at the right price. It is just a question of getting the buyer and seller together. If you have one for sale let me hear from you.

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

THE GRAND AMERICAN HANDICAP won by WINCHESTER

"REPEATER" FACTORY LOADED SHELLS

CAPT. J. F. WULF
THE WINNER
WITH
"REPEATER" SHELLS

The Grand American Handicap, the trapshooting classic—equivalent to the World's Series in baseball, the event that marks the climax in a trapshooter's career, was won by Capt. J. F. Wulf, of Milwaukee, with the wonderful score of 99 x 100 from the 19-yard mark, shooting Winchester "Repeater" Loaded Shells.

NATIONAL AMATEUR CHAMPIONSHIP
Won by F. M. Troeh, of Washington, shooting a Winchester Repeating Shotgun. Score, 99 x 100.

PROFESSIONAL CHAMPIONSHIP (Dunspaugh Trophy)
Won by Phil R. Miller with a Winchester Repeating Shotgun. Score, 97 x 100 and 25 straight.

HERCULES ALL-AROUND AMATEUR CHAMPIONSHIP
Won by Edward L. Bartlett, of Baltimore, with Winchester Loaded Shells. Score, 185 x 200.

GENERAL AVERAGE ON ALL SINGLE TARGETS
Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 576 x 600.

NATIONAL AMATEUR CHAMPIONSHIP AT DOUBLES
F. M. Troeh was second in this event with 88 x 100, which was only one under the winner. He shot a Winchester Repeating Shotgun.

WOMEN'S NATIONAL CHAMPIONSHIP
Won by Mrs. J. D. Dalton, of Warsaw, Ind., who scored 23 x 25 in the elimination contest and made the same score in the final contest with a Winchester Repeating Shotgun.

MOUND CITY OVERTURE
Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 99 x 100, and 20 straight.

GENERAL AVERAGE ON 16-YARD TARGETS
Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 187 x 200.

This was a great victory for Winchester Guns and Shells; and as a demonstration of "Speed" and other desirable qualities in guns and shells, it shows up like the red **W** on a package of Winchester ammunition. It also shows why you should

SHOOT WINCHESTER GUNS AND SHELLS **W**

For Real Sport

REMINGTON UMC

You'll get more real sport out of duck shooting if you use a Remington UMC shotgun and the famous "Speed Shells"—the perfect shooting combination.

The Remington UMC autoloading shotgun has behind it just one hundred years of gun-making experience. This gun is a five-shot repeater that ejects the empty and loads the fresh shell, cocks the hammer and closes the barrel by simply pressing the trigger for each shot. It works with SURE and POSITIVE action. The solid breech, hammerless and take-down features make the Remington UMC autoloading shotgun a favorite among the keenest of sportsmen.

Whether in flight shooting or over the decoys, you'll discover eminent shooting satisfaction in using a Remington UMC arm. Any dealer displaying the Red Ball Sign of Sportsmen's Headquarters will show you the Remington UMC line.

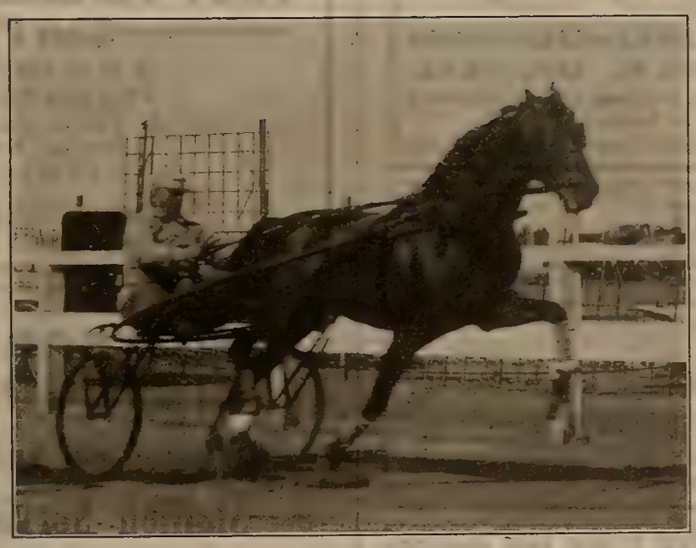
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

THE THREE HEAT SYSTEM of harness racing which is the one now in pretty general use all over the United States, is again being discussed by the turf writers and some of them find very little in the system to commend, while others praise it as "the best ever." There is no system of racing that has yet been devised, or that ever will be, in which perfection will have been achieved. Here in California the horsemen as well as the public seem to endorse the three heat plan, and the only time it comes up for severe criticism is when there happens to be a race in which no horse gets more than one heat and two or three horses stand equal when the three heats have been raced. Where the condition has been provided that when two or more horses stand equal in the summary at the end of three heats another heat shall be raced by the heat winners, this criticism is not heard, although some claim that the old two in three system of racing would be just as satisfactory. We think not. The meat of the three heat system is that it awards a horse whatever he wins in any heat, and does not permit a subsequent accident or misfortune to take it away from him. Under the old two best in three plan, a horse might win the first heat in fast time and by some misfortune be behind the flag in the next heat, and therefore get no part of the money. In the three heat plan he would retain what he won, which is certainly a much fairer and more generous plan. Three heats, every heat a race, has worked well in California where there is no betting, but it is very plainly to be seen that where there is wagering as to which horse will win the race and where—as in the Occident Stake this year—a cup or money is to be awarded to the horse standing best in the summary, the conditions should provide for another heat in case of a tie. Otherwise there has been no complaint here about the three heat plan.

GEERS IS AGAIN IN THE HOSPITAL as the result of an accident at Columbus, Ohio, this week, and the doctors say he will be ready to drive again in the course of a few days. A wonderful old man is this Tennesseean. There is probably not a trainer living, or dead either, who has gone through as many "bone breaking" accidents as this veteran, but he has yet to get into one that can be called "nerve wrecking" to him. He seems to be fated to get into collisions and be trampled on by horses, but after getting splinted and bandaged he is out again as cheerful as ever and drives as good a race as he did when younger and sounder in limb. He is certainly a bear for grit and the ability to recuperate, and he will probably be winning races for years yet . Here's hoping he may.

A GREAT LOSS and one that is irreparable in many of its parts, resulted when the main building of the California State Agricultural Society burned during the recent State Fair. In Secretary Paine's office, which had been refitted and rearranged since Mr. Paine was appointed to that position, were complete files of all the proceedings of the society since its foundation in 1851, files of the old California Spirit of the Times, which was the earliest sporting journal in California and which contained accounts of early racing in this State, as well as pedigrees and statistics about the thoroughbred and trotting bred horses as well as the cattle, sheep and other live stock owned by the pioneers of this coast, a complete file of the Breeder and Sportsman, probably the only one in existence outside of this office, and hundreds of books and documents of immense value to historians and others who desire to delve into the early history of this State in regard to its live stock breeding, agricultural, viticultural and horticultural industries. Secretary Paine had recently put every bit of this historical and statistical matter into such shape that any desired subject could be referred to at once. The loss to the State by the fire of September 3d is greater than most persons imagine.

THE LAST CALL for entries to the Arizona State Fair to be held from November 13th to 18th, is made in this issue of the Breeder and Sportsman. There are eight $1000 purses, and entries close October 1st, but entry can be made any time before that date in the classes to which horses are eligible at time of entry. It only costs 3 per cent to enter and if you don't start that is all you will be held for. The racing plan is a novel one, as the money in each race will be divided so as to give $200 for the first heat, $300 for the second heat and $400 for the third heat, with $50 to the driver and $50 to the horse standing best in the summary. Rules of the American Trotting Association are to govern all races, and only records made by winners of races will be considered. Free stall rent is given during the meeting and first bedding is provided for all horses free of charge. The Arizona State Fair Grounds is an ideal place for training or racing in the late fall and winter. . There is sunshine every day, no fog, no rainy days and green feed galore.

LAME STAKE COLTS AND FILLIES have been more numerous in California this year than "at any time in the memory of the oldest inhabitant." There has not been a colt stake trotted or paced this year in which some one of the starters has not developed a curb or other lameness, and the wonder is that so many lame colts were able to start and earn money. In the Occident Stake at Sacramento no less than three out of five starters were being doctored for curbs and it was about the same in all the other stakes there and at Santa Rosa and Pleasanton. This fact probably accounts for the fact that the time made in California by the three-year-old trotters of 1916 was no faster than that made by the two-year-olds of 1915. For some unknown reason 1916 has been a curby season for stake colts in California.

DON'T MISS THE FRESNO FAIR if you can possibly find time to attend. It will be the greatest ever held in the San Joaquin Valley, and besides a most wonderful display of the products of Fresno county there will be more added attractions than have been seen at any fair on the coast this year. Three days of harness racing will begin Tuesday. There are good fields and fast horses, and the contests will be keen.

The Arabian Horse Club has purchased the library of the late Randolph Huntington, which embraced many rare books and manuscripts relating to the Arab horse and his influence on other breeds. The club is now negotiating for a farm in Virginia, where it is purposed to conduct experiments in crossing the Arab with other breeds and types to demonstrate his fitness as a sire of horses for military and other uses. The officers of the club are Peter B. Bradley, of Boston, president; C. E. Perkins, of Burlington, Iowa, vice-president; H. K. Bush Brown, of Washington, secretary and treasurer; Miss Bowers, registrar, and Messrs. James A. Lawrence, Richard Walton Tully, W. R. Brown, Hamilton Carhartt and Miss Anita M. Baldwin, directors.

◈ ◈ ◈

The world's record for trotting mares over a half mile track now stands to the credit of Lucile Spier, by reason of her great performance in 2:06¼ at Detroit. She is owned by George Slaughter, of Detroit, and was driven by Harry Fleming.

INYO COUNTY HARVEST FESTIVAL.

The harness races to be given at the Harvest Festival at Bishop, Inyo county, California, on Thursday, Friday and Saturday, Sept. 28, 29 and 30, have drawn a splendid list of entries, there being an average of ten entries for each race. The names of the horses and the name and address of the owners are as follows:

Thursday, September 28.

Valley View Hotel Purse for 2:40 trotters and 2:50 pacers—$200: Dolly Varden and Dan M.—P. McCart, Bakersfield; May Hal—Mathew-Killian, Bishop; Caroline Custer—O. E. Holland, Riverside; Zoe Wood—J. B. Collett, Bishop; Teddy Bair—M. R. Shaw, Riverside; Zosito—Geo. H. Parker, Bishop; J. C. L.—M. Senter, Hanford; Rhyne B.—Geo. H. Parker, Bishop; Nordwell—Wm. Cook, Ventura; Bill Irwin—L. J. Horton, Bishop.

Chamber of Commerce Purse, 2:20 trotters, 2:25 pacers—$200: Nordwell—Wm. Cook, Ventura; Inyo-Benton—Scott-Keough, Bishop; Caroline Custer—O. E. Holland, Riverside; Eva Osito—C. E. Johnson, Bishop; All Hal—O. E. Holland, Riverside; Florence D.—J. W. Dixon, Bishop; Teddy Bair—M. R. Shaw, Riverside; Chief Direct—L. J. Horton, Bishop; Dolly Varden—P. McCart, Bakersfield; Bill Irwin—L. J. Horton, Bishop; Lottie Express—M. Senter, Hanford.

Friday, September 29.

Hotel Istalia Purse, 2:12 trotters and 2:19 pacers—$200. J. C. L.—M. Senter, Hanford; Bill Irwin—L. J. Horton, Bishop; All Hal—O. E. Holland, Riverside; Chief Direct—L. J. Horton, Bishop; Florence D.—J. W. Dixon, Bishop; Nordwell—Wm. Cook, Ventura; Inyo-Benton—Scott-Keough, Bishop; Eva Osito—C. E. Johnson, Bishop.

Saturday, September 30.

Red Front Purse, 3:00 pacers and 3:00 trotters—$200: Rhyne B.—Geo. H. Parker, Bishop; J. C. L.—M. Senter, Hanford; Teddy Bair—M. R. Shaw, Riverside; Zoe Wood—J. B. Collett, Bishop; Dan M.—P. McCart, Bakersfield; May Hal—Mathew-Killian, Bishop; Nordwell—Wm. Cook, Ventura; Zosito—Geo. H. Parker, Bishop; Caroline Custer—O. E. Holland, Riverside; Bill Irwin—L. J. Horton, Bishop.

Tungsten City Purse, free-for-all pace—$200: Vernon McKinney—P. McCart, Bakersfield; Chief Direct—L. J. Horton, Bishop; Dolly Varden—P. McCart, Bakersfield; Eva Osito—C. E. Johnson, Bishop; Florence D.—J. W. Dixon, Bishop; All Hal—O. E. Holland, Riverside; Rhyne B.—Geo. H. Parker, Bishop; Lottie Express—M. Senter, Hanford; Bill Irwin—L. J. Horton, Bishop; Nordwell—Wm. Cook, Ventura; Inyo-Benton—Scott-Keough, Bishop.

Hermes, Leading Money Winner.

The three-year-old trotter Hermes by Carlokin, dam Miss Quealy by Moko, was the largest money winner of the colt trotters or pacers that started in California this year. This little black rascal started in five races. His first start was in the Pacific Breeders' Futurity at Santa Rosa, which was won by Lulu B. by The Bondsman. Her winning heats were in 2:13¼ and 2:13½, Miss Axworthy Dillon taking the third heat in 2:15 and earning second money, Miss Bond won third money and Hermes was fourth. In the Occident Stake on the opening day of the State Fair, Hermes was awarded first money, his third heat in 2:13¼ being the fastest of the race. On the Tuesday following he won the California State Fair Futurity in straight heats, best time 2:18, and on Friday of the same week Lulu B. defeated him in the Stanford Stake, although Hermes won the opening heat. His next and final start for the season was in the MacKenzie Stake at Pleasanton, which he won in straight heats in 2:13¼, 2:13¼ and 2:14. This was the best race he trotted during the season and was the fastest. His winnings amount to about $3,775, as follows: Fourth money in the Pacific Breeders' Futurity, $208, first money in the Occident Stake, $1000, first money in the State Fair Futurity, $700, second money in Stanford Stake, $375, and first money in MacKenzie Stake, $1500.

Hermes was bred by W. G. Durfee of Los Angeles, and is by Mr. Durfee's stallion Carlokin 2:07½, out of Miss Quealy 2:26¾, a young mare foaled in 1908, by the great Moko, second dam Silurian (3) 2:25 by Wilton 2:19¼, dam of the successful young sire Manrico 2:07¼ and of Don Pronto 2:02¼, the latter exported to Australia last year. The third dam of Hermes is Silhouette, dam of 4 and grandam of 11 standard performers, by Hambrino 820, fourth dam Silverlock by Mambrino Time 1606, fifth dam Lady Margrave by Ole Bull Jr. Hermes' sire Carlokin 2:07½ is one of the best bred sons of McKinney, his dam being the famous mare Carlotta Wilkes, dam of ten standard performers, including Inferlotta 2:04¾, Mary Dillon 2:06¼, Guy Borden 2:07¼, etc. With the speed inheritance of which Hermes is possessed and the showing he has made this year, he should develop into a very fast trotter as he grows older. His improvement has been steady since the first and his last race was much the best of his performances during the racing season. When C. A. Durfee took charge of Hermes in June last, the colt carried 17 ounces in front, but this was gradually cut down until in his race at Pleasanton last week he wore but 5 ounces in front with a two-ounce toe weight.

◈ ◈ ◈

It has been fully decided to send Guy Axworthy 2:08¾, sire of the only 2:00 stallion, to the Old Glory sale at New York. How much will he bring?

THE PLEASANTON FUTURITIES.

Hermes and Rico, Both Driven by C. A. Durfee, Win MacKenzie Stakes For Three Year Olds.

Mr. R. J. MacKenzie, owner of the Pleasanton Training Track, the best appointed training ground in California for race horses, did a very generous and magnanimous thing when he offered guaranteed stakes for trotters and pacers, and it certainly has proved a very expensive thing for him.

The stake for three-year-old trotters this year had a valuation of $3,000 and the one for pacers of the same age was worth $2,000, and both races were decided at Pleasanton on Friday of last week before, as the theatrical people might say, "a small but very appreciative audience."

The Alameda County Fair was being held on the grounds during the week and Mr. MacKenzie decided it was a good time to race the stakes.

Geo. Ryan and C. L. DeRyder had charge of matters for Mr. MacKenzie and they made a success of the program. William Higginbotham was there to do the starting and gave perfect satisfaction.

The race for three-year-old trotters was the first event and for this there were six starters, as follows:

Mr. M. L. Woy's Lulu B. by The Bondsman.
M. C. Keefer's The Expense by The Proof.
Frank Malcolm's Miss Bond by The Bondsman.
W. G. Durfee's Hermes by Carlokin.
S. Christenson's Natalday by Wilbur Lou.
I. L. Borden's Alesandro by Barney Barnato.

John Quinn drove Lulu B., Fred Chadbourne was up behind The Expense, C. L. DeRyder held the reins over Miss Bond, C. A. Durfee teamed Hermes, Mr. Christenson drove his own colt and C. Berry had the mount behind Alesandro. The race does not require much of a description. In the first heat Lulu B. went out in the lead with Hermes following, his nose on her wheel, and Miss Bond about the same distance behind Hermes. The other three were hopelessly out of it. They maintained these positions until the stretch was reached when Hermes began to move up and was on even terms with Lulu B. when the distance flag was reached and beat her a neck at the wire in 2:13¼, thus tying her time when she beat him at Santa Rosa in the Breeders' Futurity. Lulu B. was a length in front of Miss Bond, the others distanced. Natalday would not trot in the scoring and when the word was given in this heat he was a hundred yards behind and refusing to keep his feet. Mr. Christenson turned him around and drove to the stable, an action for which he was commended by all, as his colt was sore and unfit to race.

The second and third heats were much alike. Hermes took the lead and maintained it to the wire but the fillies, Lulu B. and Miss Bond, were close up all the way and it was a good race even though Hermes was the best that day. The time, 2:13¼, 2:13¼ and 2:14, was excellent for the track which was slow.

Hermes was awarded first and fourth money amounting to $1800, Lulu B. won $750, and Miss Bond $450.

The three-year-old pace, worth $2000, was also a straight heat affair, Mr. Durfee driving Rico in as winner. There were five starters and all finished the race. Rico acted badly at first, coming to the wire on the gallop three times in scoring, but finally settled and they went away on even terms. Gallup took Surety to the front immediately and at the half Surety and Rico were out in front like a team, while Verna McKinney and Julia M. were an open length behind them, also nose and nose. In the stretch Surety blew up, Rico went to the front and got to the wire a short length in front of Verna McKinney, who was a short length in front of Julia M. Surety was fourth, and Carolyn fifth, and the two last named maintained those positions in every heat.

The second heat Rico went out in front and stayed there, while Verna McKinney and Julia M. battled for second place, the latter finally getting the verdict at the wire, and the same thing happened in the third and final heat. Rico won first money, Julia M. second, Verna McKinney third and Surety fourth. The time, 2:10¼, 2:12½ and 2:11½, was not only good for three-year-olds but it was excellent when the fact was taken into consideration that the track was dry and the surface loose and cuppy.

The weather was hot and while the track had been carefully worked there had not been enough horses worked over it since the circuit opened to pack it and it was heavy and slow. The summaries:

Pleasanton Futurity—3-year-old trotters—$3000:

Hermes, b c by Carlokin—Miss Quealy by Moko ..... (C. A. Durfee)	1	1	1
Lulu B., b m by The Bondsman—Loma B. by Stam B. ..... (J. Quinn)	2	2	2
Miss Bond, b m by The Bondsman..... (C. L. DeRyder)	3	3	3

Alesandro, The Expense and Natalday distanced in the first heat.

Time—2:13¼, 2:13¼, 2:14.

Pleasanton Futurity—3-year-old pacers—$2000:

Rico, ch c by Manrico—My Irene S. by Petigru..... (C. A. Durfee)	1	1	1
Julia M., b m by El Angelo..... (Allen)	3	2	2
Verna McKinney, b m by Vernon McKinney ..... (Chadbourne)	2	3	3
Surety, b c by The Bondsman....(Gallup)	4	4	4
Carolyn, b m by Lock Logan..(C. DeRyder)	5	5	5

Time—2:10¼, 2:12¼, 2:12½.

HUMBOLDT COUNTY FAIR.

The annual Humboldt County Fair, held at Ferndale, repeated its former successes this year and attracted thousands to see the exhibits and enjoy the races. Harness races were held on four days, and while no very fast time was made over the half mile track the contests were thoroughly enjoyed. There was but one split heat race and that was the 2:24 class trot or pace, which finally went to the bay mare Lady Dillon after six heats had been raced, although there were but three starters. The summary of the four days' racing follows:

Sept. 6.—Named class, one-half mile, purse $250:

Young Monterey, b s by Monterey Amigo....	1	1
Myrtle T. P., br m by Beau B.....	2	2

Time—1:11½, 1:12.

Three-year-old or under class, mixed; purse $200:

Mabel J., s m by Humboldt Dillon.....	1	1
B. F. C., b s by Irving Pointer.....	2	2
W. C., br g by Sadi Moor.....	3	3

Time—2:58½, 2:56½.

Sept. 7—Two-year-old Stake, $190:

B. F. C., b s by Irving Pointer.....	1	1
W. C., br g by Sadi Moor.....	2	2

Time—2:54½, 2:55.

2:30 class trot or pace, purse $225:

Octo. C., b g by Cassiar.....	1	1
Mabel J., s m by Humboldt Dillon.....	2	4
Frank Ellery, b g by Cassiar.....	4	2
Lady Dillon, b m by Frank Dillon.....	3	3

Time—2:27½, 2:26.

Sept. 8—2:24 class, trot or pace, purse $275:

Lady Dillon, b m by Frank Dillon.....	3	3	2	1	1	1
Octo. C., b g by Cassiar.....	1	2	1	3	2	2
Frank Ellery, b g by Cassiar.....	2	1	3	2	3	3

Time—2:26¼, 2:27, 2:30, 2:35, 2:39½, 2:41.

2:30 class trot, purse $255:

Lady Steinmoor, gr m by Bonnie Steinway....	1	1
Maxine J., br m by Crusados.....	2	2
Ida Mac, br m by Crusados.....	3	3

Time—2:36, 2:35.

Sept. 9—Free-for-all class, purse $400:

Myrtle T. P., br m by Beau B.....	1	1	1
Ramona, bl m by Cassiar.....	2	2	2
Young Monterey, b s by Monterey Amigo..	3	3	d

Time—2:21¼, 2:28, 2:25.

Better Horses Will Be Required.

The horse will continue to have a place in the general scheme of things, always, but it will have to be a better horse than ever before. The drafter will have to be bigger, toppier and show more quality than its ancestors ever dreamed of possessing. The trotter will have to be faster and able to deliver the goods on all occasions. The saddler for which there is a growing demand for pleasure uses will have to be a top-notcher. There will be no place on earth for the cheap skates. The idea that when the mares get old, blind and crippled and generally too worn and weary to earn their salt they are good enough to use as brood mares is played out. Only the best will pay for the raising. Another war may break out somewhere and create a demand for a few thousand more misfits, but no breeder can safely conduct operations on any such flimsy assumption. The old time livery stable has closed its doors and will remain closed. The city is rapidly discarding the light delivery horse in favor of the auto truck on the grounds of business expediency. It is more expensive, but who cares?—Field and Farm.

Auto Zombro 2:02½ pacing is the fastest of the get of Zombro 2:11. His dam is Trixy by Conifer, the son of Lord Russell and Carlotta by Nutwood that was bred by Hancock Johnson of Los Angeles.

◈ ◈ ◈

Lucille Spier 2:06¼ trotting on a half mile track is the sensational trotter of the year. Uhlan is the only trotter that has beaten this record. She is by Directum Spier.

◈ ◈ ◈

Many Grand Circuit followers who have seen Napoleon Direct 1:59¾ in his races think he is the fastest of all living harness horses, and that neither Directum I. or William can beat him in a race. Many think he could lower all records if prepared for a fast mile.

SYRACUSE, (N. Y.) SUMMARIES.

Monday, September 11.

Three-year-old trotters (2 in 3), $2,000:

Bonnie Dell, br g by Del Coronado—Bonnie Direct ..... (Hinds)	4	1	1
Jack Mooney, br g by Malcolm Forbes(Devereux)	1	3	2
Just Tess, b f.....(Burk)	5	2	3
Pagan, blk g.....(Lorillard)	2	8	10

Oscar Watts, Lockspur, Peter Mount, Roy Bingen, Revelry and Peter's Pride also started.

Time—2:15¾, 2:13¼, 2:12¼.

2:11 pace (3-heat plan), purse $5000:

Diumeter, ch g by Dium—Estere B.....(Grady)	1	1	1
Jay El Mack, b s.....(Murphy)	2	2	2
Spring Maid, ch m.....(B. White)	3	3	3
Major Woolworth, br s.....(Hubbard)	4	4	4

Wilbur S. and Hal Plex E. also started.

Time—2:04¼, 2:07, 2:03¼.

Free-for-all pace (3-heat plan), purse $1200:

Napoleon Direct, ch h by Walter Direct..(Geers)	1	1	1
Single G., b h by Anderson Wilkes—Little Gyp ..... (Cox)	2	2	2
Fred Russell, b g.....(Snow)	3	3	3

Time—2:00½, 2:04½, 2:03¼.

2:18 trot (3-heat plan), purse $1200:

Brescia, b m by Bingara—Chambermaid (Rodney)	1	1	1
Ridgemark, br g by Wilask—Eolite.....(Tod)	3	3	2
Zomrect, blk h.....(McDonald)	5	2	3
Lu Princeton, b h.....(Cox)	6	4	4

Bettina, Red Gift, Host Peter, Daisy Todd and Narcissa T. also started.

Time—2:10¼, 2:09¼, 2:09¼.

2:15 trot (3-heat plan), purse $2000:

Azora Axworthy, b m by Bale Axworthy(Murphy)	1	1	1
Baron Frisco, b g by San Francisco (Dickersen)	2	2	2
Jeannette Speed, br m.....(Cox)	3	3	3
Worthy Bingen, blk s.....(Murray)	4	4	dr

Lyndon, blk g (Rathbun), d.

Time—2:08¼, 2:08¼, 2:11¼.

Tuesday, September 12.

Driving Club Sweepstakes for two-year-old trotters, 2 in 3, estimated value $2000:

Antaguy, b g by Guy Axworthy—Anteach (Jones)	1	1	
Labe Riddle, b c by Malcolm Forbes—Ann Tregantle ..... (Stout)	2	2	
Lady Marion, b f by Morgan Axworthy—Miss Comler ..... (White)	3	3	

Anselot also started.

Time—2:13½, 2:16½.

2:05 pace (3-heat plan), purse $1000:

Peter Stevens, b s by Peter the Great..(Murphy)	1	1	1
Comsewogue Hal, br g by Direct Hal—Delphine Dallas ..... (Crossman)	2	2	2
Camelia, b m by Summer—Vetas.....(Cox)	3	3	4

White Sox also started.

Time—2:04¾, 2:04, 2:05¼.

Empire State Stake for 2:08 trotters (3-heat plan), purse $10,000:

St. Frisco, b s by San Francisco—Cara Cantrill ..... (Geers)	1	1	1
Mabel Trask, ch m by Peter the Great—Miss Nutonia ..... (Cox)	2	3	2
Al Mack, b s by McLintock—Mignon..(Murphy)	8	2	3

Also started—Harry S., J. McCluskey, Dick Watts, Alma Forbes, Director Todd, Virginia Barnette.

Time—2:05¾, 2:03¾, 2:05¼.

American Horse Breeders' Futurity for three-year-old pacers (2 in 3), purse $1000:

Peter Look, b c by Peter the Great—Pilatka.. ..... (Traynor)	1	1	
Edward P., b c by The Northern Man—Lady Ballou ..... (McDonald)	2	2	
Natoma, br f by Walnut Hall—Noma.....(Stout)	3	3	

Rose Magee also started.

Time—2:08¼, 2:09¼.

Three-year-old trotters, 2:24 class (3-heat plan), $2000:

Harrod's Creek, ch c by General Watts—Axalea ..... (Engleman)	1	1	1
Brownie Watts, br m by General Watts (Rodney)	2	2	2
Native Judge, b s by Justice Brooks..(Murray)	3	3	3

Lightsome Watts also started.

Time—2:10¼, 2:11¼, 2:13¼.

To beat track record of 2:01¼, held by The Harvester: Lee Axworthy, by Guy Axworthy (White) won. Time by quarters—:30, 1:00, 1:30, 2:00. (New world's trotting record.)

Wednesday, September 13.

2:17 pace (3-heat plan), purse $2000:

Young Todd, b g by Director Todd—Woodford Belle ..... (Cox)	1	1	1
Peter G., b s by Wolverine.....(Snow)	2	2	2
Sir Anthony Carter, b s by Sir Lightfoot (Geers)	3	3	3

Baymar also started.

Time—2:05¼, 2:05¼, 2:04¼.

American Horse Breeders' Futurity, three-year-old trot, 2 in 3; purse $6000:

Expressive Lou, b f by Atlantic Express—Lou Dillon ..... (Murphy)	1	1	
Suldine, b c by Worthy McKinney.....(Traynor)	3	2	
Lotto Watts, b f by General Watts.....(Stout)	2	4	
Bingen Silk, b c by Bingen.....(Chandler)	4	3	

Cochato Jay, General Yorke Balmaacan also started.

Time—2:09½, 2:09¾.

2:10 trot (3-heat plan), purse $1200:

Howe Constantine, br g by Constantine Laddie—Wilton .....(Batchelder)	1	1	7
M. L. J., b g by Redwill.....(Leonard)	6	4	1
Hunifast, b g by Trampfast.....(Murphy)	2	2	3
Baby Doll, b m by Tom Smith.....(Rodney)	3	3	2

Laramie Lad, Virginia Barnette, Spirit, Abbie and Grattam also started.

Time—2:08¼, 2:07¼, 2:08¼.

2:14 pace (3-heat plan), purse $1000:

Sis Bingen, blk m by Bingen.....(Murphy)	1	1	1
Admiral Dewey II, blk h by Admiral Dewey ..... (Snow)	3	3	2
Major A., b g by Acquillan.....(Crossman)	5	2	3

Wilbur S., Rayo de Oro, Count Marque also started.

Time—2:07¼, 2:06¼, 2:07¼.

Thursday, September 14.

2:16 trot (2 in 3), wagon race:

Eudora Spier, blk m by Directum Spier....(White)	1	1	
Lucy Van, b m.....(McDonald)	2	2	

Hawkins, Ginger Boy, also started.

Time—2:14¾, 2:16¼.

2:12 trot (2 in 3), League Cup, wagon race:

Bond Issue, b g by The Bondsman....(Mitchell)	2	1	1
Peter Mac, b h.....(Shaw)	1	4	4
Bronson, br g.....(Graves)	3	2	2

Bingola, Helena Constantine also started.

Time—2:09¾, 2:11¼, 2:13.

2:13 trot (3-heat plan), purse $2000:

Busy's Lassie, b m by Peter the Great—Miss Busy ..... (Cox)	1	1	1
American Girl, ch m.....(Murray)	3	2	2
Ed Axworthy, b g.....(McDonald)	2	3	3

Alva D. also started.

Time—2:15½, 2:14¼, 2:13¼.

2:07 pace (3-heat plan), purse $2000:

Roan Hal, ro g by Hal Defacto—Maud C.(Murphy)	1	1	1
Miss Harris M., b m.....(McDonald)	2	2	2
Savoy, blk g by Charley Hayt.....(Floyd)	3	3	3

Time—2:02¾, 2:07¾, 2:01¼.

2:22 trot (3-heat plan), purse $1200:

Zomrest, blk s by Zombro—Lilly S...(McDonald)	1	1	1
Dos Palos, b h.....(Cox)	2	2	2
Notice B., b m.....(Dickerson)	3	3	3

Narcissa D., Judge Jones, Aquilon, and Gambler also started.

Time—2:10¼, 2:09¼, 2:09¾.

2:24 trot (2 in 3), trophy, wagon race:

Fighting Chance, b g by Charlie Herr.....(White)	1	1	
Adele Block, b f.....(Stevens)	2	2	
Birchwood, b g.....(Furbush)	3	3	

Time—2:17¾, 2:17¾.

Friday, September 15.

Rain prevented racing on Friday and the 2:14 trot and 2:10 pace went over until Saturday.

Saturday, September 16.

2:14 trot (3 heats), purse $1200:

Brisac, br h by Bingara—Karata.....(Murphy)	1	1	1
Empress of Russia, ch m by Peter the Great—Mighty Onward .....(Murray)	3	2	2
Tregantle King, blk h by Tregant—Constantine	2	5	4

Trust McKinney and Zombro Rex also started.

Time—2:10¾, 2:10¼, 2:09¾.

2:10 pace (3-heat plan), purse $1000:

Major Woodworth, blk s by The Abbe—Queen Regent ..... (Hubbard)	4	1	1
The Problem, blk c by Cochato—The Understudy ..... (Murphy)	1	2	4
Spring Maid, ch m by The Abbe—Beulah..... .....(Ben White))	2	5	2

Areta V. also started.

Time—2:10¼, 2:05¼, 2:05¼.

Thoroughbred Matters

Sanford Horses Bring Good Prices.

New York, Sept. 7.—Twelve of John Sanford's horses in training were sold in the Belmont Park paddock just before the racing began today. The sale, which was conducted by the Powers-Hunter Company, with George A. Bain as auctioneer, was well attended and very generally pronounced a satisfactory and successful one. The generally expressed opinion among the horsemen present was that the result was a good omen for the future of racing.

Preston Burch, manager for Mr. Sanford, when asked why that gentleman was offering so many really good and useful racehorses from his stable, replied that the owner of Hurricana had decided to race no more during the current season, and that he desired to make room for the big bunch of forty or more thoroughbreds which he will have in training during the coming season.

Twelve thoroughbreds were offered and sold, and the sale was in no sense a "weeding' 'one, for among those sold were Leochares, St. Isidore, Bac, Quartz and Gunrock, the richly bred imported chestnut colt by Rock Sand out of Gunfire.

The animals sold and the prices paid were as follows:

Bac, ch g (5) by Cunard—Bandello; L. Varey, manager of the Beverwyck Stable	$2,500
Brumley, ch h (5) by Isidor—Odriutha; A. B. Blakely	2,000
Tyrant, b c (2) by Radium—Oppression	1,400
St. Isidore, ch g (3) by Isidor—Onaga; Walter Jennings	4,300
Affection, ch f (3) by Isidor—One-I-Love; W. P. Orr	950
Kilkenny, ch c (2) by Celt—Fairy Sprite; H. O. Holland	850
Leochares, b g (6) by Broomstick—Leayonara; W. P. Orr	4,600
Grand Opera, ch c (2) by Santry—Light Opera; J. E. Davis	500
Lucius, ch c (2) by Isidor—Roxane; N. Byer	1,300
Gunrock, ch c (2) by Rock Sand—Gunfire; J. E. Davis	1,700

The twelve horses from the Sanford stable brought a total of $24,325, making an average of a fraction over $2,027 each.

Winning Owners and Horses at Belmont Park.

During the twelve days racing of the Westchester Racing Association at Belmont Park, which came to a close September 11th, seventy-two races were decided and $81,424 was distributed in stakes and purses. Seventy-three owners shared in the distribution, and nineteen won over $1000. R. T. Wilson, owing to the winning of $17,344 by his two-year-old Campfire in the Futurity, stood at the head of winning owners, but A. K. Macomber of California was second with $5170 won, August Belmont third with $4940, Harry P. Whitney fourth with $4551, James Butler fifth with $4025. Of the 145 horses that were placed Campfire headed the list with $17,340 to his credit, Mr. Belmont's Stromboli was second with $4275, and Mr. Macomber's Star Hawk third with $3370, winning the Realization and another race. Walter Jennings, trainer for Mr. Macomber, was rewarded by seeing his horses win six races during the meeting, and running second once and third twice.

Recent Thoroughbred Importations.

The steamship Mongolia, which reached New York last week from Liverpool, brought a few thoroughbreds to add to the already long list of importations to America this year. Dr. McCully was the consignee but the animals were owned by Messrs. H. T. Oxnard and Willis Sharpe Kilmer.

Mr. Oxnard's importation is the fashionably bred four-year-old brown filly Autumn, by St. Frusquin out of Cornfield by Isinglass. She is in foal to the royally bred and successful racehorse and sire, Adam Bede, by Adam, son of Flying Fox.

Mr. Kilmer's importations consisted of the bay broodmare Carisbrooke Castle, eight years old, by King's Messenger out of Squint II. by Willonyx, and is said to be a fine individual, to say nothing of her fashionable breeding. Another of Willis Sharpe Kilmer's importations by the Mongolia is a fine filly foal which Carisbrooke Castle has at foot. This youngster is by Corcyra (son of Polymelus). The third of Mr. Kilmer's importations is White Dinah, a fine looking bay filly, yearling, by The White Knight (son of Desmond) out of Dark Dinah by Tarporley.

—o—

The officials for the winter meeting at Tia Juana have been announced by James W. Coffroth. The judges will be C. H. Pettingill, who expects to make his home and remain at Pasadena; Lee J. Rose and Ed Jasper, who also will act as racing secretary. Sam McGibbons will be assistant secretary and E. J. Tribe will do the starting. J. S. Rothert will be clerk of the scales, and J. D. Milan patrol and paddock judge.

Credential Jumps 7 Feet 4 Inches.

Mr. Frank Holland's champion high jumper, Credential, cleared the bars at a height of 7 feet 4 inches at Hastings Park, Vancouver, B. C., Canada, on August 19, setting a new Pacific Coast record and beating his own record of 7 feet 3¾ inches. He competed against Lady M., Henderson's horse, the only other entry in the contest, which cleared the bars at 5 feet 10 inches.

Credential has been the property of Mr. Holland for the past three or four years, and his owner has always maintained that if not the highest, he is the most consistent high-jumping horse in existence. He has been entertaining from twenty-five to thirty thousand people a day before the grand stand at the Vancouver exhibition and started off with his owner's statement on August 19 that he would beat his former record made in Victoria in 1912.

After the 5-ft. 10-in. jump was made the bars were raised to 6 ft. 6 in., and on his third jump E. Heard, who rode Credential, said, "We will go over the record," and placed him at 7 ft. 4 in., which he absolutely cleared at the very first trial.

This will stand as a Pacific Coast record. Both rider and owner came in for much deserved applause and congratulations.

Credential is Canadian bred, 11 years old, 16.1½ hands, and weighs 1,100 pounds. He is by Credential, out of a standard bred mare, and was foaled in Galt, Ont. He went to Spokane, Wash., for the week of September 4 to 9, where he competed in the high-jumping contests held in connection with the exhibition.

Chesterbrook Handicap a Great Race.

Under a cloudless sky and with the temperature perfect for racing, over a good track which had dried out overnight, a record crowd at Havre de Grace last Saturday afternoon saw H. C. Hallenbeck's The Finn, a black son of Ogden and Livonia, beat Andrew Miller's Roamer, August Belmont's Stromboli and five others of the best handicap horses of the year. The race The Finn won was the Chesterbrook Handicap at a mile and a sixteenth, and it had a net value of $3,200 to the winner.

Inasmuch as it had practically all the stars of the year in competition, the Chesterbrook was by long odds the greatest race that has been put on at any track during this season of sport . The race was run in 1:45 3-5 on a track that was about a second slow, but at that was within a fifth of a second of the track record made four years ago. At the finish The Finn was first by two lengths, Roamer was second, two lengths in front of Stromboli, who was a length in front of Short Grass, with Barberry Candle, Daddy's Choice, Borrow and Capra in the order named. The Finn carried 125 pounds, Roamer 126, Stromboli 126, Short Grass 120, Baberry Candle 121, Daddy's Choice 98, Borrow 121, and Capra 110.

Thoroughbred Values Going Up.

The recent sale of Friar Rock for $50,000 and the reported refusal of $250,000 for Pommern indicate a firm belief in the future of racing in the United States and England, says the N. Y. Herald. Both horses were valued for breeding purposes, not for racing, though both were young, sound, fit and ready to race, and apparently capable of beating anything of their own ages in sight. Neither of them has yet been tried at the stud, and their pedigrees and performances determined the prices paid and refused for them, shrewd horsemen having that much confidence in their ability, when tried, to transmit the speed and stamina they have shown in their races.

Pommern is the colt that last year won the Two Thousand Guineas and the races substituted for the Epsom Derby and the Doncaster St. Leger, neither of which, however, has been recognized as anything but a substitute, so that Pommern is not at all likely to go down in turf history as the winner of the "triple crown," as it is termed, when a horse wins all three of the three-year-old classics. But he was clearly in a class by himself among three-year-olds in England last season, and he is a fashionably bred horse, his sire, Polymelus, having stood at the head of all winning sires in 1914 and 1915, and, up to last accounts, again this season.

Polymelus is a son of the great Cyllene, that held the post of honor two years in succession and got four Derby winners in seven years before he was exported to the Argentine Republic, and that last year stood third on the list in that South American El Dorado of horse racing. Maid Marian, the dam of Polymelus, was bred by Queen Victoria, and was by Hampton, the sire of three Derby winners, out of Quiver, by Toxophilite, the sire of Australia's great cup horse and sire, Musket. Pommern's dam, Merry Agnes, never produced anything else of note, and her sire, St. Hilaire, was one of the mediocre sons of St. Simon.

Friar Rock's breeding compares favorably with that of Pommern. In the direct male line both horses are descendants of Stockwell, the St. Leger winner of 1852, and the sire of three Derby winners and six winners of the St. Leger, among which were Doncaster, through whom the prolific Bend Or line to Ormonde and Cyllene is carried on. Friar Rock's sire, Rock Sand, by the Derby winner Sainfoin, son of Springfield, by St. Albans, son of Stockwell, came from a less distinguished line than that of Doncaster—Bend Or—Bona Vista—Cyllene, but he was a far greater race horse than Polymelus, the sire of Pommern, having won the "triple crown," which only ten horses ever succeeded in doing, and earned $241,000, an amount equaled by only two others in turf history.

Imported by August Belmont when six years old, at a cost of $125,000, Rock Sand left few foals in England, and he came here at a most unfortunate time for his success as a sire. Racing was suspended just as his first foals were old enough to start, and before it was revived he had been sold for $140,000 to go to France, where the war came along before his foals were of racing age and where he died last year at the early age of fifteen. In spite of all these handicaps he is famed as the sire of Tracery, winner of the St. Leger, and generally regarded as the best three-year-old of 1912 in England, $200,000 having been offered for him by Lady Douglas, according to report.

For Fairy Gold, the dam of Friar Rock, Mr. Belmont was said to have paid $20,000 in England. She was by Bend Or, winner of the Derby and sire of the unbeaten Ormonde, as well as Bona Vista, the sire of Cyllene. Her dam, Dame Masham, was by Gaillard, son of the Derby winner Galopin, sire of St. Simon, and her grandam, Pauline, by Hermit, winner of the Derby and sire of two winners. Fairy Gold's first foal in this country was Fair Play, a winner, by Hastings. Her next foal, Golden View, also by Hastings, produced Rock View, her first foal, winner of the Realization and other important stakes last year, and another foal, Flittergold, by Hastings, was beaten only half a length by Star Hawk at the last Belmont Park meeting.

Friar Rock would have been an overwhelming favorite for the Realization this year, but his new owner, feeling that he had "nothing to gain and everything to lose," did not start him against Star Hawk, Spur and the others. As the records stand Friar Rock goes to the stud as the only three-year-old that ever won the Brooklyn Handicap and the Suburban Handicap, and to these he added the historic Saratoga Cup, a weight for age race at a mile and three-quarters, which numbers among its winners such horses as Longfellow, Harry Bassett, Kentucky, Helmhold, Tom Ochiltree, Parole, Bramble, Checkmate and Thora.

On the fact of the returns it is difficult to see a difference of $200,000, or $100,000, or even $50,000, in the value of Pommern and Friar Rock for breeding purposes. John E. Madden says the American colt, if he had been bred and raced in England, could not have been bought for $100,000. It might perhaps be added that Pommern, if bred and raced in America, could not have been sold for more than $50,000.

—o—

A New York turf scribe says that at the Havre de Grace track one day last week one was reminded of California in its palmiest days of racing by a group that was seen in the paddock. There was Jimmie Coffroth, premier promoter of the Coast and now head of the racing association at Tia Juana, talking with big Bill Carroll, who manages the Spreckels Stock Farm; Dynamite Jack Thornby and Overcoat Jack Atkins, Harry Monahan and Sandy McNaughton, all talking of the good old California days and speculating on whether a racing bill would be passed in the Golden State during the coming year.

◈ ◈ ◈

Friar Rock, John E. Madden's recent $50,000 purchase, is still bolder of the five and a half furlong record over the straight course at Belmont Park. This record was made July 17, 1915, when a two-year-old with 10€ pounds up in 1:03 4-5.

◈ ◈ ◈

H. Price Headley recently sold to Walter Jennings, acting for A. K. Macomber, two high-bred youngsters in the yearling chestnut colt (half-brother to Bulse) by Uncle out of Nethersole, by Tournament; and the yearling bay colt by Uncle out of Tehera (dam of Batouch) by Nasturtium. Mr. Macomber purchased seven yearlings by Uncle from Mr. Headley in May.

◈ ◈ ◈

At Newmarket, England, Sept. 13th, the September Stakes for three-year-olds at a mile and three-quarters, being the war-time substitute for the Doncaster St. Leger, was won by J. Buchanan's chestnut colt Hurry On, by Marcovil—Tout Suite, with Lord Falmouth's chestnut colt Clarissimus by Radium—Quintessence, second, and E. Hulton's bay colt Atheling by Desmond—Wood Daisy, third. Only five started.

◈ ◈ ◈

Jerome B. Respess is reported to have disposed of his entire holdings in the New Louisville Jockey Club, Churchill Downs, amounting to $90,000, to Jacob Greenberg, proprietor of the Galt House at Louisville.

◈ ◈ ◈

Under the auspices of the Kentucky Sales Company Tuesday, Sept. 12th, George A. Bain disposed of, inside of two hours, 68 thoroughbred horsses in training, yearlings and weanlings, for $25,840, an average of $380. Of the number sold 55 were yearlings, and they brought $19,760, an average of $359. Six weanlings brought $2,280, an average of $380, and seven horses in training brought $3,800, an average of $543.

◈ ◈ ◈

Jockey E. Martin was knocked from a horse he was exercising at Lexington two weeks ago and had his leg broken, so that he will be unable to ride any more this season. He had just cantered his horse a mile and had pulled up when Lunsford, an exercise boy, bore down on him with an unruly filly he was riding and knocked Martin and his mount to the ground.

Harness Horses and Horsemen

C. A. Durfee Continues His "Stake" Diet.

After winning one of the colt stakes and getting money out of three others at the meeting of the Pacific Coast Trotting Horse Breeders' Association at Santa Rosa this summer, C. A. Durfee moved his small string of two and three-year-olds on to the State Fair at Sacramento, where there were five stakes to be decided and in all of which his stable was represented. They were the Occident Stake for three-year-old trotters, the California State Fair Futurity for three-year-old trotters, and another division of the same stake for three-year-old pacers, and the two divisions of the Stanford Stake, one for three-year-old trotters, the other for three-year-old pacers. He won every one of these stakes except the Stanford Stake for trotters, but he got second money in that. Last week he moved his colts to Pleasanton where the R. J. MacKenzie stakes for three-year-olds were to be decided. In the three-year-old trot he won in straight heats with Hermes, and the three-year-old pace was also credited to him in straight heats, the colt Rico being the winner.

By starting in seven stakes in one season, winning six, while getting second money in the other, we think Mr. Durfee has made a record never before equaled by any trainer or driver on this coast, and we doubt if it has ever been equaled anywhere. The colts were all members of the string of his son W. G. Durfee of Los Angeles, and when that well known trainer decided to race his aged horses over the Grand Circuit he turned the colts over to his father to race in California. In addition to these stake races C. A. won first money in a $500 purse for two-year-olds at Sacramento with Oro Fino. Thus in eight starts Mr. Durfee has won seven races and was second in the eighth. His winnings amount to something over $7000. Mr. Durfee says that he is now ready to retire from the turf, but we will have to wait until next year's races start until we make the official announcement that the dean of California trainers and drivers has retired after over forty years of active service in the sulky.

Bradmont Wins Free-For-All Pace.

At the matinee of the San Francisco-California Driving Club held in Golden Gate Park last Sunday Ritchie Roberts won the feature race of the program, the free-for-all pace, with his new purchase Bradmont. He won the race in straight heats in 2:11½ and 2:12½, defeating King Pointer and W. J. K. in handy fashion. Roberts drove his horse well and the result was never in doubt. There was more of a contest in the 2:12 pace which required three heats to decide. Frank Goularte won the first heat with J. C. Simpson in 2:13½, but William Malough got to the wire first in the next two heats with Emma M. in 2:13¼ and 2:13¾. Little Jack was second every heat and was driven an excellent race by Geo. Conlan.

In the 2:20 mixed Frank N. was the winner, and in the match race between Pointer Belle and Rosa O., the former won after a hard race through the stretch.

During the afternoon Mr. J. Metz exhibited his pair of trotters Major McKinley and Col. Roosevelt to pole and they came in for much applause when they trotted the three-fourths in 1:45½, which is close to a 2:20 gait. The summary:

First race—2:12 pace:

Emma M. ..... (William Malough)	3	1	1
J. C. Simpson ..... (Frank Goularte)	1	3	3
Little Jack ..... (George Conlan)	2	2	2
Senator H. ..... (J. M. Kidd)	4	4	4

Time—2:13½, 2:13¼, 2:13¾.

Second race—2:20 mixed:

Frank N. ..... (L. A. Gielow)	1	1	
Dibble Wilkes ..... (S. Benson)	2	3	
Silver Logan ..... (D. Healy)	4	2	
Hello Girl ..... (R. Kehoe)	3	5	
Matawan ..... (J. McNamara)	5	4	

Time—2:18½, 2:18½.

Third race—Free-for-all pace:

Bradmont ..... (Ritchie Roberts)	1	1	
King Pointer ..... (H. Campodonico)	2	2	
W. J. K. ..... (W. J. Kenney)	3	3	

Time—2:11¾, 2:12½.

Fourth race—Match pace:

Pointer Belle ..... (J. M. Kidd)	1	1	
Rosa D. ..... (J. Ryan)	2	2	

Time—2:17½, 2:17.

Pedlar Direct Paces in 2:10.

During the Alameda County Fair, held last week at Pleasanton, Mr. A. W. Longley placed his pacing stallion Pedlar Direct on the program to go a mile against time. C. L. DeRyder drove the son of Baron Direct and rating him nicely made the mile in 2:09¾ very handily. The first quarter was in 32 seconds, the half was reached in 1:05½, the three quarters in 1:37¾ and the last quarter in just 32 seconds. While Mr. Longley has never yet rated Pedlar Direct as a free-for-all pacer, he believes that by another year he should be able to pace several seconds below his present mark. He started twice at Santa Rosa and twice at Sacramento this year and paced consistently in all four races. Pedlar Direct is certainly a horse of royal breeding. He is now six years old, is standard and registered. His sire Baron Direct 42841 is by Direct 2:05¼ out of a mare by Baronmore 13677, a well bred son of Baron Wilkes. The dam of Pedlar Direct is Miss Episode by Pedlar 12908, a son of Electioneer who was out of the great broodmare Penelope by Mohawk Chief, next dam the thoroughbred mare Plenetia by Planet. The second dam of Pedlar Direct is Episode, the dam of Robert Bingen 2:14¼, etc., by Ambassador, third dam that wonderful broodmare Santos, dam of Peter the Great 2:07¼, J. Malcolm Forbes 2:08, etc., fourth dam Shadow by Octoroon, etc.

Before leaving Pleasanton for the races this year, the best mile Pedlar Direct had shown was 2:11½ and Mr. Longley hesitated about sending him to the above named meetings. The little horse did all he could every time he started. In his first start at Santa Rosa he was 5-5-9 in 2:07¼, 2:11 and 2:08¾, and in his second start at the same meeting he was 8-2-1 and won second money with the time at 2:09¼, 2:09¼ and 2:12. At Sacramento he started twice. He was 3-4-2 in the 2:14 pace at this meeting and won second money, the time being 2:10¼, 2:11 and 2:10, and in the 2:20 class pace at the same meeting where the heats were in 2:08¾, 2:09¾ and 2:14 he was 6-2-4, and inside the money. He is one of the best dispositioned horses in training and a great favorite with his owner as well as all the stable hands, and all are highly pleased that he has now got a record inside the 2:10 mark.

The 2:12 Trot at Hamline.

Among the starters in the 2:12 trot at the Minnesota State Fair at Hamline, September 8th, was The Proof, driven by Charley Spencer. A report of the race says:

With the track in much improved condition, the Minneapolis stake of $3,000 for 2:12 trotters was the feature race of the day. Considerable speculation was indulged in as to the probable winner of this event. The majority of the talent seemed to think Miss Densmore should win, though Miss Pinkerton, Alice Arion, R. C. H. and Abu Taleb were well thought of. Miss Pinkerton succeeded in winning the first heat, reducing the track record not only for this event, but for all previous trots over this course, in the time of 2:07¼, which was, indeed, very creditable, all things considered. In the succeeding heats she seemed to experience considerable difficulty in scoring up with the field, and would have so much ground to make up that she was not a factor thereafter. Miss Densmore, that carried the fight to her throughout the first mile, won the second heat from R .C. H. in a whipping finish, in 2:08, with Abu Taleb a fair third. The third heat was very spectacular, as the horses were well bunched almost throughout the entire mile. R. C. H., that trotted an improving race for Marvin Childs, The Proof, driven by C. A. Spencer, and Miss Densmore, Henry Thomas' charge, raced abreast, and furnished a beautiful stretch drive, as each teamster was exerting himself to the utmost, using whip, voice and hands to the very last stride of the heat, and only inches separated them at the wire. So close was the finish that none but those directly over the wire could discern the winner, the heat going to R. C. H., with The Proof and Miss Densmore in order; Alice Arion was close up in fourth position. The average of the three heats in this race constitutes the record for this track. The fastest previous heat was 2:08¼, made by Miss Perfection last year, driven by Charlie DeRyder, which equaled the 2:08¼ which DeRyder made with Charlie Belden in this event several years ago. In the summary the horses stood as follows: Miss Densmore 2-1-3, R. C. H. 3-2-1, Miss Pinkerton 1-5-5, The Proof 6-4-2.

Bingen Silk Will Be a Factor.

The somewhat sudden recovery of Bingen Silk (3) 2:07¼, to his best form places a different aspect on the three-year-old situation and adds interest in the Kentucky Futurity, a race that appeared up to his recent victory to be at the mercy of the peerless filly, Volga (2) 2:07¾, writes Andrew Leonard in the American Horse Breeder of Sept. 13. Bingen Silk has in a measure reemed himself, and that he has returned to the form he displayed at two was shown by his heat in 2:07¼ and by the manner in which he stood the pace and came away at the finish to win in easy fashion. This colt was a genuine crack at two, at which age he won the Lexington Stake. He came from the half in 1:04¾ in the race for the two-year-old Kentucky Futurity, and was close up at the finish with Walnut Tree (2) 2:10¾, and the winner driving to her limit. This one is a superb individual, substantially built, well muscled and withal a colt of much quality. He goes light, is thoroughly game and can trot in 2:05 if the ease with which he gained his present record can be taken as an indication of his ability.

Bingen Silk has come to hand slowly, but this may have been the result of the methods pursued by his wily trainer, J. B. Chandler, who has more than once caused surprise by winning an important event with a comparatively unknown trotter. The first races of the season in which this colt took part gave him the appearance of having failed to improve—in fact, he was condemned by the thoughtless public, which invariably sees none but the winner, but now that he has come to his own, has won impressively and in fast time, his following will be increased ten-fold. If Bingen Silk is a tremendously high-class colt, capable of miles in record time, he may prove the master of the chestnut filly which reigned supreme last season, but he must continue to improve and be up to a mile in 2:04, for Volga is the greatest speed marvel of her age ever seen, her own brother, Peter Volo, not excepted, and in order to bring about her downfall the son of Bingen must outstay her, for she can cover a quarter very close to twenty-eight seconds and is an almost perfect racing proposition. Of Harrod's Creek (3) 2:10, comparatively little is known except that he is a stout, rugged colt, always on his good behavior and thoroughly game. He has beaten nothing of the class of either Volga or Bingen Silk, and as these outclassed him last season they will in all likelihood continue to do so. Expressive Lou (3) 2:09¼ is probably the making of a great mare at maturity, but may not be a crack this season, as she is growthy, somewhat light-bodied and has had less racing and training experience than the two-year-old cracks of 1915.

Potency of Wilkes Blood.

The frequency with which the name of George Wilkes occurs in the pedigrees of the fastest trotters and pacers of the present day seems remarkable. It appears to indicate that the Wilkes strain is one of the most potent factors known, for transmitting with uniformity extreme light harness race-winning speed qualities, through both the male and female lines.

The sons of George Wilkes which seem to have been the most successful in transmitting extreme speed qualities with uniformity are Onward 2:25¼, William L. 4244 (sire of Axtell (3) 2:12), Alcyone 2:27, Baron Wilkes 2:18, Guy Wilkes 2:15¼, Jay Bird 2:31¾, and Red Wilkes (4) 2:40. Among the other sons of George Wilkes that rank high as speed perpetuators are Wilton 2:19¼, Simmons 2:28, Gambetta Wilkes 2:19¼, and Alcantara 2:23. It is a significant fact that the dams of Onward 2:25¼ and Red Wilkes (4) 2:40 were by Mambrino Chief 11. The dams of William L., Guy Wilkes, Alcyone, Baron Wilkes and Simmons were all by Mambrino Patchen 58, the best son of Mambrino Chief 11, and the dam of Jay Bird was by Mambrino Star 2:28½, a son of Mambrino Chief 11.

Wilkes blood has blended harmoniously with the best of all the other trotting families with which it has been crossed, and has increased the speed ability of those families. Peter the Great 2:07¼, at 21 years of age is credited with a far greater number of performers which have made records of 2:10 or better, than is credited to any other sire of any age that has ever lived. His fastest record trotter is Peter Volo (4) 2:02, whose dam was by Nervolo (p) 2:04¼, a son of Colbert (p) 2:07½ by Onward 2:25¼, and whose second dam was by Betterton 8022, a son of George Wilkes, giving Peter Volo two strains of Wilkes blood. The fastest record pacer yet credited to Peter the Great is Miss Harris M. (p) 2:01¼, at four years of age. Her dam was by Ondale 2:23½, whose sire was Onward and whose dam was by Jay Bird. The second dam of Miss Harris M. was by Macey, a pacing son of George Wilkes, which gives this fastest record performer of Peter the Great three crosses of the potent Wilkes blood.

The most successful standard-speed perpetuating stallion, in the first and second generation in the Electioneer family, is Bingen 2:06¼, whose sire was May King 2:20, a son of Electioneer. The dam of Bingen was by Young Jim, a son of George Wilkes, and his second dam was by Red Wilkes, another son of George Wilkes.

Reramkable results have been obtained by inbreeding the Wilkes strain in other cases than Bingen. Hamburg Belle was the winner of the fastest two-heat race ever trotted. Her time was 2:01¼, 2:01¾. Her sire was Axworthy (3) 2:15½, by Axtell (3) 2:12, a son of William L. by George Wilkes, and her dam was by Simmons, a son of George Wilkes. Allerton 2:09¼, the world's champion record for trotting stallions when made, was also the world's champion sire of standard record performers at the close of the season of 1915, with 268 to his credit, 208 of which were trotters. The sire of Allerton was Jay Bird, a son of George Wilkes. Allerton's dam was by Mambrino Boy 2:26½, and his second dam was by George Wilkes.—S. W. Parlin in Trotter and Pacer.

The sensational trotter of last year, Peter Mac 2:03½, made his debut this year at Syracuse, New York, where he started in the 2:12 class for trotters driven to a wagon by an amateur. He was driven by his owner, Col. David Shaw, and after spoiling several scores in the first heat was sent off far behind. After settling down to trot he covered the middle half in 1:00 flat, reached the leaders at the far turn, passed them one by one and won the heat by two open lengths in 2:09¾, being separately timed the mile in 2:07. In the succeeding heats he again spoiled several scores and although showing two-minute speed at intervals, was no better than fourth at the wire in 2:11¼ and 2:13. He is one of the fastest trotters living, and also one of the most erratic.

◈ ◈ ◈

Elmo Montgomery shipped Jim Logan 2:01¾, Lock Logan 2:07¼ and Hal Logan directly from Sacramento to North Yakima after the close of the California State Fair.

Notes and News

Fresno Fair opens next Monday.

◈ ◈ ◈

There will be three days' racing beginning Tuesday, the 26th inst.

◈ ◈ ◈

Fresno's annual fair is second only to the State Fair and is a mighty good second to that.

◈ ◈ ◈

An advertiser desires to buy a number of thoroughbred horses and mares. Read the advertisement and communicate with this office forthwith.

◈ ◈ ◈

Mrs. Ada Schilling was unable to get out in time Wednesday morning to take in the Pacific Coast Special. She competed in the preliminary, however, in the afternoon, breaking 82 from the 16-yard line.

• • •

Mr. I. L. Borden's string of horses will probably winter at Pleasanton.

◈ ◈ ◈

Miss Pinkerton reduced the trotting record of the Hamline, Minn., track to 2:07¼.

◈ ◈ ◈

Judge D. C. Beaman, one of the organizers of the American Trotting Association, of which he was for many years vice-president, died recently at Denver, Col. He was seventy-eight years old.

◈ ◈ ◈

Hal Boy p. 2:01½ did some tall traveling recently. He raced Friday at Rutland, Vt., in the $2,500 free-for-all and on Monday was at Milwaukee, over 1,000 miles away, and broke the Wisconsin state record, with Dick McMahon aboard.

◈ ◈ ◈

Says the Horse Review: "Western critics and race-goers are all enthusiastic over Louise de Lopez (2) 2:19¼. This granddaughter of Kinney Lou 2:07¾, from California, has the earmarks of greatness."

◈ ◈ ◈

Saint Frisco won the $3000 stake for 2:08 trotters at Columbus Thursday and it looks as if he would be the biggest money winner of the year. Tommy Murphy is driving him and Napoleon Direct while Geers is in the hospital.

◈ ◈ ◈

Will Durfee won a $1200 purse with Esperanza at Columbus, Ohio, last Wednesday. It was a five heat affair and the daughter of Carlokin took the last three heats. Her best mile was the fourth in 2:07¾, the fastest of the race, and a new record for her.

◈ ◈ ◈

Get ready for the winter months now. If you need a blanket for your horse, or any of the many remedies to cure lameness, ask Dave West about it. He has everything a horse needs to make him comfortable in winter or summer. His store at 1018 Fillmore street, San Francisco, is the best appointed on the coast.

◈ ◈ ◈

C. A. Spencer is having success with his stallion The Proof by The Exponent that he is racing in the Middle West. Up to this week The Proof had started seven times, been three times first, three times second and once fourth. He broke the track records at both Mineral Point and Darlington, Wisconsin, where there are half mile tracks.

◈ ◈ ◈

The Rio Vista Horse Show will be held today at that town on the Sacramento river. The section around Rio Vista has long been noted for the fine draft horses produced and some of the best horses used on the streets of San Francisco were bred there. During recent years several high class Shire, Percheron and Belgian stallions have been introduced there and the stock greatly improved.

◈ ◈ ◈

"Doc" Tanner having three yearlings by The Harvester to divide between Roy Miller and Jim Snell decided to leave it to lot and so they drew for first choice, Miller winning and taking the colt out of Bernice R. 2:07¼, second dam Dione 2:07¼, and third dam the dam of the great mare Hulda 2:08½. Then they drew for who was to have the third one and again the choice fell to Miller. This was a bay colt out of Gretchen B. by John A. McKerron, second dam Lou Dillon 1:58½.

◈ ◈ ◈

The three-year-old that forced Bingen Silk out in 2:07¼ at Indianapolis was Stellamaris, whose rosy prospect of winning the race for three-year-olds at Poughkeepsie a few weeks ago was ruined by a bad start. Stellamaris is owned and was bred by W. B. Dickerman, of Mamaroneck. She is a daughter of Atlantic Express 2:08¾, and Nettie King 2:20¼, dam of The Abbot 2:03¼, Bonington 2:04¾, and The Huguenot 2:07¾. When Stellamaris gains a record such as she is capable of making her dam will have to her credit four faster trotters than any other mare ever produced. That honor now belongs to Paronella, dam of Country Jay 2:05¼, Kentucky Todd 2:08¾, Ormonde 2:08¾, and Judge Parker 2:09½. No other has yet produced four in the 2:10 list.

The death of William Russell Allen doubtless means the passing of New England's most successful breeding establishment.

◈ ◈ ◈

Four Stockings 2:19¼, the big trotter that the late Frank J. Kilpatrick bought in California and took east, won a race at Berea, Ohio, a few weeks ago. He was a plow horse during the spring.

◈ ◈ ◈

The magnificent colt Bingen Silk, winner of the Western Horseman Futurity in 2:07¼, trotted the last half of his record mile a shade under 1:01. Barring accidents, he should be up to a mile in 2:05 at Lexington.

◈ ◈ ◈

Two great sires will be on the market—Guy Axworthy (4) 2:08¾ and Bingara. The former has this season gained credit with a world's champion—Lee Axworthy—a near champion—Ante Guy, and others of real merit, and the latter with three better than 2:10 trotters.

◈ ◈ ◈

Willis Sharpe Kilmer's horses, or at least those composing the active division of his stable of thoroughbreds, which were recently transferred to the care of Trainer Henry McDaniel, will not be raced any more this year. Since they have been in the care of Trainer McDaniel they have been at Saratoga, where they will remain for a time and then be shipped to Mr. Kilmer's farm at Goshen, N. Y., where they will be looked after by Trainer McDaniel during the coming winter.

◈ ◈ ◈

Bingen Silk won the Western Horseman's Futurity for three-year-olds at Indianapolis in 2:07¼, half a second faster than Volga's time in the Champion Stake at Cleveland, but at Columbus the following week Volga defeated Bingen Silk and six others in 2:08¼ and 2:07¼, the time of the second heat just equalling Bingen Silk's record. Bingen Silk and Volga are now tied for the fastest heat by a three-year-old trotter this year, and as they meet in the Kentucky Futurity next month much interest is felt as to the outcome of that feature of the Lexington program.

◈ ◈ ◈

Now that the colt racing in California is ended for the season, so far as stakes are concerned, those who have entries in the three-year-old stakes for 1917 have not seen anything in the two-year-old class this year that looks like a "cinch" for the stakes next year. The fastest mile in California by a two-year-old pacer in a stake was 2:18½ and the fastest by a two-year-old trotter was 2:24. A two-year-old pacer took a mark of 2:17¼ and a two-year-old trotter one of 2:21¼ in purse races, but no "phenoms" showed up to scare those who have colts and fillies eligible to the three-year-old stakes next year that did not start this year.

◈ ◈ ◈

E. J. Tanner, president of the Fasig-Tipton Compayn, announced last week that he had arranged with the executors of the estate of the late William Russell Allen, of Pittsfield, Mass., to sell all the horses now at Allen Farm in the annual November sale at Madison Square Garden. Mr. Tranter visited the farm recently and catalogued 125 stallions, mares and young stock comprising the stud. Excepting Kremlin 2:07¾, now in his thirtieth year, and four or five very old brood mares, everything on the place will be sold.

◈ ◈ ◈

The Kentucky Trotting Horse Breeders' Association has announced the list of prospective starters in the Kentucky Futurity for three-year-olds and the Futurity for two-year-olds. Among those in the latter race are A. H. Cosden's The Real Lady, Richard Delafield's Emma Magowan, David M. Look's Harvest Gale, S. A. Fletcher's Worthy Volo, and the Pastime Stable's Mary Coburn. The notable ones in the big race for three-year-olds include Volga, Expressive Lou, Bingen Silk, Harrod's Creek, Suldine, Maple Tree and Brownie Watts.

◈ ◈ ◈

Here's a chance to get a Peter the Great colt for $1. As a benefit for the widow of Curtis Gosnell, who was killed by accident on the trotting track at Cleveland in August, the yearling colt, Peter Gosnell, is to be raffled for in Madison Square Garden on Thanksgiving Day. Tickets are being sold at one dollar each. The colt is a royally bred one, by Peter the Great 2:07¼, out of Nell Worthy 2:22, dam of Worthy Prince 2:06¾, and grandam of Bingen Silk 2:07¼, by Axworthy 2:15½. Write to the Western Horseman at Indianapolis for particulars.

◈ ◈ ◈

At the Alameda county fair held at Pleasanton last week, the racing program on Friday afternoon was made up of the two divisions of the MacKenzie stakes for three-year-olds, the results of which are given elsewhere. On Saturday and Sunday there were matinee and fun races in which no records or bars were made. The Alameda Driving Club gave a race on Saturday which was won by Mr. Scott with the veteran Little Dick. Mrs. Carlisle was second with Cleo Verne.

Another race was won by Mr. Allen with the pacer Villa, C. A. Durfee being second each heat with the two-year-old Oro Fino. The last eighth in one of these heats was paced in 14½ seconds with Villa only beating Oro Fino by a neck.

A matinee trot was won by Durfee with the two-year-old Kewpie, Mr. Christenson's black gelding being second.

Mary Putney (3) 2:05½ worked in 2:04¾ at Hartford, Conn., the last three-quarters in 1:30½, and in another mile trotted the last half in 59½ seconds, final quarter in :29.

◈ ◈ ◈

Powdered boracic acid and iodoform, two parts of the former to one of the latter, will make one of the most useful deodorizers and dressings for wounds that can be found for use in the stable.

◈ ◈ ◈

A horse show announcement of unusual interest comes from Springfield, Mass. It will be the first such event in the new coliseum, which was especially designed for shows of this sport. The horses will compete from October 16 to 21, in an arena 200 by 100 feet, under a roof 65 feet high, surrounded by boxes and theatre seats for 6,000 persons, and not a pillar or post in sight. This arena is declared to be 1,014 square feet larger than Madison Square Garden, the home of the most famous horse shows in the country. While many of the best known exhibitors will be in evidence, this show will be notable for its utility features. The National Dairy Show management, which is conducting the affair, has offered inducements to owners of single and pair delivery horses, heavy drafters, single cart horses, farm workers, etc., to exhibit their pets and carry off liberal cash awards as well as ribbons. Though a six-day horse show has never been attempted except in the largest cities, the interest in this one already assures it of keen competition right up to the closing hour.

◈ ◈ ◈

When the trotting mare Brescia, by Bingara, took her record of 2:09¼ at Cleveland last week, her dam Ka 2:23¼ became the sixth mare to have produced as many as three 2:10 trotters, as she had previously produced Aquin 2:08 and Aquil 2:08¼, both of those trotters having been sired by Aquilin 2:19¾. Ka is a bay mare foaled 1899, at Allen Farm, Pittsfield, Mass., where she has always been owned and where her three 2:10 trotters were bred. She was sired by Kremlin 2:07¾, son of Lord Russell 4677 (son of Harold 413 and Miss Russell, by Pilot Jr. 12), her dam Rossignol, by King Wilkes 2:22¼, her second dam Lady Russell (sister to Maud S. 2:08¾), by Harold 413, and her third dam the famous Miss Russell by Pilot Jr. 12. As Ka is only 17 years old and has been a regular breeder there is an excellent chance for her to become one of the first mares to join Paronella, the only mare to have four 2:10 trotters to her credit, in that advanced list of producers. The other triple 2:10 producers are as follows: Paronella, by Parkville 6050, four; Nettie King 2:20¼, by Mambrino King 1279, three; Lucy Homer, by Homer 1235, three; Anna B., by John Burdine 7217, three; Lady Brussels, by Wilton 2:19¼, three; Nowaday (3) 2:14¼, by Lookaway 2:22½, three.

◈ ◈ ◈

The race-course furnishes the only means by which the speed, soundness, stamina and courage of horses may be tested and the blood which carries these qualities perpetuated. In peace it does not seem so very important that these tests should be made, though they have given the British rider and the American driver a horse which surpasses all others in ability to get there and back. But in times of war the value of the tests which search out and diffuse the blood of goers and stayers is clearly apparent. Sheridan's ride could not have been made on a cold-blooded horse, and more than one critical fight has depended on the equine blood that was in it. The day of the horse's usefulness in war has not passed, as the events of the present year show. When the time of trial comes the blood of the horse will count, and it may count much more than we can now realize. The abuses of racing all good men deplore, but these need not so narrow our vision that we fail to see its possible benefits in the improvement of horses. Better strive to abolish the abuses than to discard the tests which show what is good and bad in horseflesh.—National Stockman and Farmer.

◈ ◈ ◈

There is a very true axiom: "An ounce of prevention is worth a pound of cure." Why do so many business men die in the prime of life? Physicians are a unit in that the principal causes are overwork, overeating and lack of exercise. If rational exercise, such as horseback riding, is taken then there is an improved action of all the vital organs, of the nerves and of the muscles. The blood stream, too, is stimulated and thus the poisons of the body worked off. It tends also to stave off hardening of the arteries. A typical case has just been called to my attention—that of a Boston business man who refused to take exercise. He was a heavy eater and used his automobile whenever possible. Warned by his friends that he was committing slow suicide, he simply laughed at them and would reply, "Oh, I am all right!.. His liver refused to be further abused and he died in the prime of life—at the age of 53. Many other business and professional men are committing the same error and there is but one inevitable result—a premature death; they are working hard, overeating and refusing to take a reasonable amount of exercise. Horseback riding will positively enable you to do more work and a better quality of work. Most people make the mistake of trying to crowd their exercise into the week-end. Physicians who have made a study of horseback riding recommend that it be taken four times a week, and as evenly distributed during the week as is possible. Thus the body will receive regular and systematic attention.—[Walter Briggs in Rider and Driver.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Reports on Fish and Game.—Reports received by the State Fish and Game Commission are that ducks are very numerous this year and that the coming season, beginning October 15th, will see some unusually good sport. The Commission and railroad reports of hunting and fishing conditions follow:

Truckee—Excellent fishing in Ever Valley. Plenty of Eastern brook trout and many large flocks of grouse. Quail not so plentiful. Quail are high and grouse feed close to the creek. Many does and fawns but few spike bucks.

Lodi—Salmon fishing good in the Sacramento and San Joaquin rivers. Catfish not running good. Hunters still getting limit of doves northeast of Clements.

Dana—Doves getting scarce. Many mountain quail. Plenty deer signs but brush is so thick that deer are hard to find.

Susanville—Ducks are very abundant in all of the little mountain lakes.

Live Oak—There are more ducks at Butte Creek at present than there have ever been. All sprig and mallard that were raised around the creek last spring.

Murphys—Valley quail have had the best year for breeding than for several years past. Many coveys seen.

Red Bluff—There are still many deer shot in this section.

Handtrap Kodak Contest.—There are a great many hand traps in use, and they have furnished a great deal of of fun and no little instruction to many devotees of outdoor sports. Doubtless the owners of the hand trap, or some member of the shooting party, has had some specially novel or different experience which, if known to others, would enable other shooters to do likewise or improve upon the original performance.

To stimulate interest among the owners of the hand trap, the Du Pont Company, Wilmington, Del., desires to secure short, snappy, instructive, illustrated stories. Special stress is laid upon the matter of action in the scene to be kodaked.

The company is going to offer cash prizes for the best descriptive story of the most novel and practical hand trap experience, accompanied by at least three group photographs of actions described, said photos to contain more than one person.

The prizes are, first prize $15; second prize $10; two prizes of $7.50; five prizes of $5 each, and fifteen prizes of $2.50 each.

These are worth trying for and plenty of time is given, the contest not closing till December 1, 1916. Stories should not be over 600 words. You can tell most any experience in that space. Get together, you camera and newspaper fiends.

Right here a digression as to "what is action" in a photo of hand-trapping will save many a film and improve the competitor's chance of "getting his photo across," for a prize. First—and important—don't picture a group of shooters leaning on the muzzles of guns and one member holding a hand trap for the camera to picture. Such poses are as common as sand—and about as acceptable. Don't picture a man or woman holding the hand trap aloft as though it was a telescope. Don't have the operator so near the shooter that it is obviously impossible to operate the hand trap with safely and success. In other words, plan your exposure before giving the final click to your camera. Now a few "do's" may not be unwelcome to the seeker for the first prize for best pictures—there must be at least three accompanying the story.

First, look out for your background. Many an otherwise good scene is lost, because the people and the action are scarcely "seeable" against a screen of trees, bush, trailing and wavy foliage. Remember, a good sky line makes a place for a catchy heading—and is a joy to the advertising man or woman who is commissioned to build his ad around your picture. Again, do not try to get all outdoors on a "3 x 5" card. Frequently, it is more desirable that readers see what the person or moving part of the machine is doing. Waving grass, beautiful lawns, imposing buildings, and space-fillers are sometimes photographic necessities. But to instruct, to illustrate, to make it easy for others to do what you picture, show what the person is doing or why the machine performs as the story reads. Better have an amputated picture which shows how to do something intelligibly than a panoramic view of a forty-acre lot with a trace of individuals in the dim distance. Novelty is what is sought in picturization of hand trap operation. The closer you can approach the apparently improbable and make your story convincing by a practical explanation of how you did the "stunt," the nearer you will come to the prize money when awarded.

There are many places your hand trap can work. There is the camp, always a scene of trials of every suggestion broached. Take your trap and your kodak. The environment will suggest some post and the camera will preserve it. Then the auto will whirl you away to some sightly cliff, mountain top or seashore, where amid the scenes your fancy sees a picture. Snap it—maybe you're a prize-winner! Don't forget the getting-ready feature — how you packed your trap, your shells and targets—people like to see how the other fellow "got busy," and also how they can do likewise. Get your thinking cap on and conjure up a series of poses and get your friends to get into this concentrated movie of the hand trap. Look out for live, active, practical "repeatable" performances.

The above suggestions are given for what they are worth, but we think many an amateur kodak fiend will be a better one if he takes advantage of them not only for his or her benefit in this contest, but in others.

Seattle Association.—The Seattle Trapshooters' Association is at present in the midst of moving its clubhouse and traps, and did not, under the circumstances, hold its regular Sunday shoot on September 10. The new shipyard and plant being installed on Harbor Island is taking the grounds that have been occupied by the club for the past several years. Just about 1000 feet north of the old location is the new one. Newly planked roadways will lead directly to the ground, offering better facilities for autos and pedestrians than ever before.

Enforcing Migratory Law.—John Day (Ore.), Sept. 20.—Federal and state game wardens through Grant, Harney and Malheur counties are now insisting on a strict observance of the provisions of the federal migratory bird law, regulations governing which were approved by the president August 21, 1916, and are effective after that date. The new regulations conflict somewhat with the provisions of the state laws, thus causing confusion among sportsmen.

Several parties of hunters who had gone to the various lakes where ducks are to be found, have been turned back by rangers and game wardens with a warning that they would be prosecuted if they did not observe the federal law, under which the open season does not begin until October 1, whereas the open season under the state law began September 1st.

From Sling to Traps.—History is authority for the statement that the sling as a weapon is probably the earliest form of device known to mankind by which an increase of force and range was given to the arm of a thrower of missiles. When the youthful hero David slew the giant Goliath with stones hurled with his sling, he little knew that the idea exemplified in his action with the weapon of the stone age would be generally used by trapshooters three thousand years later, but such is the case.

All of us have, no doubt, when at the water's edge picked up flat, thin stones and "skipped" them across the water. How fascinated and interested we were in trying to excel ourselves by making each succeeding throw record more "skips" than the previous one. The principles governing the throwing of the stones and producing the "skipping" features are exactly similar to those which govern the throwing of clay targets. Attached to every trap manufactured for the purpose of throwing clay targets for trapshooting is a part known as a "carrier." The success or failure of every trap lies in the carrier. The carrier is attached to the throwing arm of the trap and is held "set," ready to be released at the shooter's call of "pull." When this signal is given by the shooter, the trap boy pulls a lever, the throwing arm is released, swiftly describing an arc, at the end of which the carrier releases the clay target and sends it spinning through the air, just as one would a stone. Should the carrier be improperly adjusted, that is, too loose or too tight, or possess any defect, then the target will not be properly thrown, or will be broken on leaving the carrier. In other words the carrier of a clay target trap is as the main spring of a watch, and if it is out of order the trap is useless.

Any expert shooter will say that you can shoot at clay targets which do not have just the right "spin," or in other words, which do not properly rotate, and though you may hit it with as many as 6 or 8 pellets of shot, yet the chances are against the target being broken. On the other hand, one pellet will often serve to break a rotating or "spinning" target all to pieces.

Years ago the "gun fan" had very poor and crude trapshooting facilities. However, perseverance by the "dyed in the wool" devotees of the sport brought about better conditions and today one can enjoy this sport in almost any city or town. Should there be no gun club with a permanent trap, a hand trap answers the same purpose. Anyone can easily operate it. It is ideal for private shoots, picnics, on decks of motor boats or yachts, and for hunting parties. It can throw targets in any number of angles.

HANDLER QUESTION PUZZLES FANCY.

Professionals Not Allowed by A. K. C. to Be Judges at Shows.

The rules of the American Kennel Club prohibit a person who handles, boards, conditions or shows dogs for money as a means of livelihood, from officiating as judge at any show held under that club's rules. Why the professional handler has been singled out for the above piece of arbitrary legislation has never been quite clear to the majority of the fancy. Why does a body such as the American Kennel Club assume the right to prevent one class of exhibitors from judging, and not mase the other classes live up to the rules? The rule relating to professional handlers has caused a good deal of discussion ever since its passing. Lengthy arguments pro and con have been hurled right and left for months. Instead of calming the storm has only gathered renewed strength recently.

Southampton was the show that added fuel to the fire, and fanned the flames of the handler-judge question. When the American Kennel Club debarred the noted English bulldog authority and all-round expert, Samuel Crabtree, from judging at Southampton, on the grounds that he was a professional handler, and later repealed its ruling and allowed him to judge, the manifest unfairness of the ruling was brought to the attention of the fancy, more forcibly than had any previous argument.

Though Mr. Crabtree judged, the decision of the American Kennel Club was given too late to be of any value in drawing an entry to Southampton, and American bulldog fanciers lost the opportunity of having the British bulldog man pass upon their dogs owing to the uncertainty of his appearance.

The Crabtree matter proved the fallacy of placing a man in a class apart. If Mr. Crabtree was a professional handler, did it detract from his ability to render a fair decision? Or did it make him forget what years of experience had taught him as to bulldogs? What is it that really counts in judging dogs? Knowledge? That is the first requisite in the judge.

The fancy is with me when I say that "the man who knows" is the man who should judge, regardless as to whether he is a professional handler or not. The professional handler is an honest man. Have there ever been charges brought against any professional handler? No, and the handler has always borne a reputation for honesty that is the envy of the average amateur. Therefore the handler fills the second essential quality in the judge.

When a man is honest and really knows dogs, no matter what his occupation, he should be allowed to judge. Would you, Mr. Fancier and dog show exhibitor, rather have a professional handler as judge, or a man who, though he does not board or show dogs for a living, acts as agent for a kennel, sells you a dog, and then judges him? Who is the more honest? Then why does the Kennel Club debar the professional handler? Is it because he knows dogs so well?

In talking over the situation created by this rule with a well known handler and mentioning the laxity of the rules that would allow a person to do a thing of this nature, I was dumbfounded by his retort. "Why, that's nothing," said he, "I showed cocker spaniels at the show given under American Kennel Club rules by the Chicago Kennel Club on March 30, 31 and April 1, 1916, at Chicago. The judge placed several other cockers over some I was handling, and as I thought the decision was rather bad, I remonstrated with him. He replied to the effect that the dogs he placed over those handled by myself were 'pretty good cockers.' I soon found out the reason when, the following week, in looking over the catalogue of the show given under A. K. C. rules by the Mississippi Valley Kennel Club, at St. Louis, Mo., on April 3, 4, 5 and 6, 1916, I noted that the very man who had judged and thought so highly of those particular cockers at Chicago was down in the catalogue as agent for the very same dogs he had judged the week before. He handled these dogs in the ring, too. Both of the catalogues were duly received and verified by the American Kennel Club. They are now on file at the A. C. K.'s office, and no one connected with the club noticed this severe infraction of the rules."

My idea is to allow anybody to judge, but if the American Kennel Club finds him doing anything detrimental to the fancy, disqualify him for life. Truly, this is a free country and the greatest sport loving country in the world. Dog shows are only in their infancy and the sport of dog showing should not be hampered by legislation that practically implies dishonesty on the part of its professionals. No other sport puts its professionals under such a ban, and the coming generation should find this sport of ours well governed, something to look to with admiration instead of ridicule, as they surely must under the conditions as they are at present.—F. F. D. in N. Y. Herald.

Ducks Being Shot.—Hanford, Cal.—Ducks are making serious inroads upon the rice crop in the Corcoran district, and hundreds of them are being shot daily in order to save the crops. By shooting the ducks and leaving them where they fall, the hunters say they are not infringing the law. One half-section of rice has to all purposes been eliminated while other tracts have been badly damaged.

Full Report On Pacific Coast Handicap Shoot

FRANK TEMPLETON MADE SENSATIONAL FINISH TO WIN—O. N. FORD LED IN THE THREE DAYS

Portland, Oregon.—Expert trapshooters from all parts of the Pacific Coast began drifting into Portland for the Pacific Coast handicap shoot, several days in advance of the event. Frank Templeton, secretary-treasurer of the Portland Gun Club, was high man on Sunday, Sept. 10th, in the practice events, with a record of 98 per cent. Dennis Holohan, of Burley, Idaho, was second, with 96 per cent. Scores, September 10:—

J. E. Reid* 90, Abner Brail 92, Miss Gladys Reid 82, Les H. Reid* 91, H. E. Poston* 91, Al Seguin 81, J. S. Crane 78, C. C. Kelly 85, C. H. Knight* 95, Dennis Holohan 96, P. J. Holohan* 89, H. E. Dore 54, E. P. Troeh 85, Henry R. Everding 88, James P. Bull* 87, Dr. O. D. Thornton 82, F. C. Atwell 81, J. A. Sexauer 80, Stanley Bell 82, R. P. Knight 87, Eddie H. Keller 81, W. C. Practice day for the 11th annual Pacific Coast Handicap trapshooting tournament under the auspices of the Portland Gun Club at its Everding Park traps brought out more than 60 nimrods to the traps September 11th. President Strowger, of the local club, predicted that the number would be increased to over 80 for the next day.

Peter H. O'Brien, Oregon state amateur champion, and H. Lorensen of Newman, Cal., were tied for first honors among the amateurs with 95 dead birds out of a possible 700, while Les H. Reid, of Seattle, and Fred A. Dryden, of Spokane, Wash., were the best professionals present with one better than the leading amateurs.

Frank M. Troeh, the Washington state amateur titleholder, who made such a sensational showing at St. Louis, when he finished high average for the shoot with 565 out of 600, was unable to get going. He managed to break all but six of the 100 bluerocks trapped for him.

The Scores, Sept. 11th.

*Denotes professionals.

Four men were tied in the Pacific Coast Introductory event Sept. 12. At the end of the first five strings of 20 birds, O. N. Ford, of San Jose, Cal.; P. H. O'Brien, of Portland; H. Lorensen, of Newman, Cal., and Hugh McElroy, of Spokane, Wash., had each broken 96 targets. Ford and Lorensen were still tied at the end of the next 20 birds, McElroy and O'Brien tying for third place. The two leaders again tied at the end of another string of 20, while McElroy broke 19 and O'Brien 18, putting the latter in fourth place. Two more strings of 20 were run off before Ford won out, Lorensen finishing second.

An added attraction in the shape of four pairs of doubles was run off in the afternoon. Four high guns divided the first money, as there were no trophies to be won by the shoot-offs. E. J. Farmin, of Sand Point, Idaho; Charles Leith of Woodburn; E. J. Rice of Bellingham, Wash., and W. W. McCornack of Eugene, all broke 18 out of the 20 targets thrown.

Poston was high professional in the 140-bird event, with a record of 137.

H. Lorensen and O. N. Ford, the Californians who staged a thrilling race for first honors in the Pacific Coast Introductory event Tuesday, carried off first places in the events Sept. 13th. Lorensen won the preliminary handicap with 91 out of a possible 100, nosing out three northwestern cracks, Frank M. Troeh of Vancouver, Peter H. O'Brien of Portland and Charles Leith of Woodburn, by one bird. O. N. Ford captured the Pacific Coast Special with the exceptionally high score of 97.

A high east wind that prevailed on the traps made shooting very difficult, although some of the scattergun artists hung up some great scores in the Pacific Coast Special.

Miss Gladys Reid, daughter of Jim Reid, jumped into the limelight in the Pacific Coast Special, when she finished with 89 despite the high wind. Only two professional shooters registered scores better than Miss Reid.

O'Brien won second place in the Pacific Coast Special with the score of 96, and Frank Troeh was third with a 95 score. In view of the fact that Ford won the event with a 97 score, and had won a trophy Tuesday, O'Brien was awarded first trophy, Troeh second and Guy Egbers, who scored 93, was winner of the third trophy.

Sixty-nine shooters entered this event, and one less participated in the preliminary handicap.

Rapid timing in the fact of wind that at times blew like a young gale won for Frank Templeton of Portland the highest honors in western trapshooting at the Everding park traps of the Portland Gun Club Sept. 14th, bringing back the prized championship after an absence of one year in California at the Los Angeles home of Heinie Pfirrmann.

Shooting from the 20 yard mark against the best blue rock experts on the coast, Templeton broke 91 out of the 100 targets thrown for him. He chipped a few of the mud-saucers, but most of them were shattered to bits.

W. K. France of Arlington, Ore., carried away second place honors, by registering a score of 90 per cent. Mark Rickard of Salem, Ore., and W. E. Carlton tied for third honors and in the shoot-off the Salemite won .

Pete H. O'Brien, winner of the title in 1914, tied with C. L. Templeton of Seattle and A. P. Haliburton of Lindsay, Cal., for fifth position. E. D. Farmin of Sand Point, Idaho, was next in line with the score of 87, and he was followed by Henry R. Everding, ex-president of the Portland Gun Club, with the mark of 86.

That the wind played havoc with the more accurate shooters is shown in the case of Frank M. Troeh, who won the national championship of the United States at the Grand American Handicap in St. Louis in August. Troeh shot well in the overture, which he won with 93; but fell down to 83 in the classic handicap. This goes to prove that the wind was wrecking many a potential 97 per cent, for it is seldom that the national champion falls below the 90 per cent class.

O. N. Ford of San Jose beat the Vancouver star by one point. H. Lorensen of Newman, Cal., who won the preliminary handicap Wednesday with the same score as registered by Templeton in the handicap, dropped down to the 78 mark. The scores registered by the winners at each trap were:

	25	25	25	25 Ttl
Templeton	23	23	23	22—91
France	25	23	23	19—90
Rickard	23	22	20	24—89
Carlon	23	20	25	21—89

Going to the last trap, France was but four birds down, but the strain proved too much for him and he dropped six birds. Templeton was but six down up to the last event, and he dropped three out of his last string of 25. The strain told on W. E. Carlon at the last trap, as he dropped four targets, while Mark Rickard shot like a clock during his last string of 25, dropping but one target.

The handicap was followed closely by the large number of spectators. Interest was intense from the time President Strowger broke the first target until the time Rickard fired the last shot in the eighteenth squad.

Professionals found the going rather poor in the handicap, Guy Holohan of Los Angeles registering the top score, 90. Gus Peret of Yoncalla was second with the mark of 86, and F. M. Dryden of Spokane tied L. H. Reid for third honors.

The Pacific coast overture, which was shot in the morning, was annexed by Frank Troeh of Vancouver, who registered the extraordinary score of 93. Pete O'Brien, Frank Templeton and G. F. Egbers of Pasco tied for second honors. Templeton was awarded the trophy for the event, as the other shooters had won trophies previously. C. L. Templeton, W. W. McCornack and D. J. Holohan tied for the second place trophy, Holohan winning. McCornack and Templeton tied for the third place trophy, McCornack winning the shoot-off.

High amateur honors for the three-day shoot were won by O. N. Ford of San Jose, who broke 320 of the 346 targets. Pete O'Brien was second with 319, Frank Troeh third with 318 and Frank Templeton fourth with 312.

Hugh Poston of San Francisco topped the professionals with 317. Frank Riehl of Tacoma was second and L. H. Reid of Seattle, third.

Miss Gladys Reid of Portland won the first prize for the women in the Pacific coast handicap and Mrs. Ada Schilling took second place.

The Scores, Sept. 14th.

Cat Adopts Coons.—On the J. H. Stricker ranch the favorite tabby is a Maltese and a month ago she was the mother of a brood of six kittens. A hungry coyote came along and the mother was thrown into mourning because of the loss of her entire family. She felt her loss keenly and displayed her grief in many ways.

The cat suddenly disappeared and was gone two days. Thursday she returned with two baby coons tagging at her heels. Tabby was proud and happy over her new family and she took them to the big barn. But her joy was brief, for three days later the little coons also disappeared. Again the feline is in deepest gloom.

Trapshooting, like several other things, becomes "better with age."

• • •

There are nearly a quarter of a million trapshooters in the United States.

Golden Gate Club.—The Golden Gate Club closed the most successful trapshooting season in its history on Sunday when fifty-seven members turned out at the Alameda grounds. Andy Flickinger of Vallejo came through high gun of the day with a score of 49 out of 50 and achieved the honor of packing away the season's trophy in the championship class.

E. Holle was second, Tony Prior third and B. H. Worthen fourth.

In the first class W. J. Terry was first, Dr. Edward Topham second, H. R. Phinney third and H. Stelling fourth. In the second class George Thomas led the way with R. E. McGill, A. E. Stoneberger and T. W. Parson following in order named. H. E. Cooley was first in class 3. with E. T. Prior second, H. C. Peet third and J. Nelson fourth.

Challenge trophies were awarded to Tony Prior in the championship class, H. Stelling in first class, R. E. McGill in second class and W. E. Cooley in third class. The free-for-all cup went to N. A. Howard.

Miss G. Meyers was presented with the Du Pont trophy for establishing the highest score of any woman competitor. The scores on Sunday were as follows:—

Shooter—	20	20	10	Ttl
George Thomas	17	19	10	46
A. M. Gearhart	11	12	6	20

Vernon Club.—Members of the Bruner family divided the honors at the Vernon Gun Club on Sunday. In the handicap event A. W. Bruner surprised himself and all present by smashing 49x50 and by doing so was high over all for the day's events.

Stanton Bruner, shooting from the nineteen-yard line, was high gun on the season prizes and winner of the gold bar when he broke 47x50 in both the handicap and trophy events. Wilson and Pugh were runners-up to Bruner on the trophy event, each breaking 47x50. Owen Evans, Meek and Dierdoff each broke 46 50. Twelve players took part in the day's program. The scores:

	Trophy. Hdp.	Ttl.	Handicap. Hdp.	Ttl.
S. A. Bruner	16	47	19	47
Dierdoff	16	45	18	46
Kenney	16	40	16	40
A. W. Bruner	16	42	16	49
Meek	16	46	18	42

Sportsmen's Row

All ready for the last shoot of the season on the Alameda grounds. The Alameda Elks will stage a banner merchandise tourney tomorrow. Don't miss the last big day at the traps.

• • •

The San Jose Blue Rock Club ushers in a three-day registered tournament today.

• • •

Exactly 2,126 is the tally of the rabbits killed in the drive at Claus, near Oakdale, last week. Thousands more were killed by the excited hunters, but they only had time to bring in the 2,126 pairs of rabbit ears, which the committe required to be brought before them in order to get prizes awarded for high score. More than 1,000 people were fed at the ffree barbecue which was given the hunters by the Claus Farm Bureau, and the prizes were then distributed. There ar still at large about three dozen rabbits with tags attached to their ears which are good for prizes worth another $100.

• • •

The annual national military and naval match at the Florida State Range, which the War Department had been urged to abandon this year because of the continued presence of the regular army and national guard on the border and in Mexico, will be held beginning October 20, "under conditions as nearly normal as practicable." In making this announcement Secretary Baker said it was doubtful whether any regular army or national guard units now on Mexican duty could participate.

• • •

While his daughter, Miss Gladys, was making a name for herself by smashing 90 out of 100, J. E. Reid, one of Portland's professionals, was having a hard time smothering 83. He paid more attention to the work of his daughter than to his own business, but that did not prevent him from being the "goat" of considerable "kidding" at the hands of old-timers present.

• • •

Among the distant visitors on hand at Portland were M. Skeen, of Ogden, Utah, who scored 91 in practice; T. E. Doremus, president of the Interstate Association, who traveled across the continent from Wilmington, Del., with 76; W. C. A. McLean of Westminster, B. C., with 91; J. H. Stone of Anaconda, Mont., with 88, and E. J. Morgan of Salt Lake City, with 93.

• • •

Tenry R. Everding, ex-president of the Portland Gun Club, was named chairman of the handicap committee. The other members were Hugh Fleming of Seattle, Charles Fleming of Spokane, N. A. Howard of San Francisco and D. J. Holohan of Twin Falls, Ida.

• • •

The big forest fire that raged in the foothills east of Oroville developed a real coyote firebug. Claire Hayes, Dick Werner and Victor Hayes reported that they saw a coyote make a dive from the flames while his tail was ablaze. At each jump of the animal a new fire was started. The men watched the coyote till he was out of sight, and he left a string of small grass fires to mark his trail.

• • •

Mrs. A. Smith picked up a porcupine with her bare hands at her place near Grass Valley. She mistook the rodent, which was in tall grass, for a chicken, and not until her hands came in contact with the hair, did she realize her mistake. Mrs. Smith did not throw the porcupine down, but carried it to a chicken coop, where it is now in captivity.

• • •

D. W. Fleet, of Montesano, Wash., who is the oldest shooter in point of service on the Pacific Coast, was sorely missed at the Portland tournament. He has attended all the big shoots held in the Northwest for more than a score of years, and this was his first failure to arrive.

• • •

When he broke but 17 birds out of 25 in his third event in the Wednesday afternoon round, A. P. Haliburton, of Lindsay, Cal., exclaimed to his acquaintances that it was the lowest mark he had attained in 25 birds in the last five years. He finished the afternoon with 85, the same number he broke in the morning. He was placed on the 20-yard line in the preliminary.

• • •

Green Lake Club.—The Green Lake Gun Club brought to a close, September 10, the most successful season in its history, with an excellent program. Sixty-three shooters, including four ladies, took part in the annual handicap and merchandise shoot.

Thirty-one prizes were given away in the fifty-target event. Seven prizes were awarded in the special event at doubles. The ladies received two prizes.

Jack Converse was high amateur for the day, shooting a tie with George Garrison, high professional, 49 out of 50. George B. Baker, L. S. Barnes, G. A. Conklin, I. M. Fisher and Tom Wilkes all tied for second place, with 47 out of 50. Third place went to Dr. King, with 46.

Jack Converse was also high amateur in the doubles, tying with Fisher, 16 out of 20. G. A. Conklin, George Garrison and Don R. Baker came second, with 15. Many close and exciting shoot-offs were required to determine the ownership of the various prizes.

The silver handicap prize went to George B. Baker and the next nine prizes in order went to Jack Converse, H. E. Gleason, E. Chantrell, C. W. Bandy, S. A. Martin, G. A. Conklin, Howard Cosgrove, W. C. Smith, L. S. Barnes and Tom Wilkes.

The seven prizes in the doubles went in order to Jack Converse, Don R. Baker, G. A. Conklin, George Edling, W. H. Carsten, W. C. Smith and George B. Baker.

Among the ladies Mrs. G. D. Horst won first prize, with 18 out of 25, and second prize went to Mrs. Barnes, with 12. Mrs. Blakeley broke 6 and Mrs. Terry 2, in this event.

The next big shoot at Green Lake will be the Thanksgiving turkey shoot, Nov. 26. The scores:

Jack Converse 49, *George Garrison 49, L. S. Barnes 47, G. A. Conklin 47, *I. M. Fisher 47, Tom Wilkes 47, Dr. King 46, Fred Call 45, S. A. Martin 45, Dr. L. A. Newton 45, C. W. Bandy 45, W. C. Smith 45, Hi Follerich 43, E. Chantrell 43, W. H. Carsten 43, J. W. Geltz 42, Dr. A. B. Kidd 42, Dr. Randolph 42, C. R. Sydman 41, H. E. Gleason 41, A. L. Hall 40, Don R. Baker 40, W. M. Easter 40, Dr. R. V. Mills 40, George Edling 39, Dr. M. A. Winningham 39, C. B. Fitzgerald 39, E. K. Van Vleck 38, Howard Cosgrove 38, M. A. Rosenfield 37, George F. Russell 37, Dr. J. F. Hill 37, Roy J. Kinnear 36, William Spurck Jr. 36, Dr. S. W. Case 36, W. B. Cook 34, George O. Colwell 34, Gus Peterson 32, D. Huntington 32, T. Page 32, A. Marvin 32, E. P. Buck 30, Van M. Woodaman 29, W. M. Elliott 29, R. Anderson 28, P. A. Benton 29, H. M. Carver 29, Fred Pries 28, C. S. Wages 27, L. A. Taylor 26, George D. Horat 26, T. H. Bolton 25, T. P. Beck 25, J. F. Rohowits 23, E. F. Chabot 21, Fred Johnson 9.

Scores in the doubles, 10 pairs:—Jack Converse 16, *I. M. Fisher 16, G. A. Conklin 15, *George Garrison 15, Don R. Baker 15, George Edling 14, W. H. Carsten 14, W. C. Smith 14, Roy J. Kinnear 12, L. S. Barnes 12, H. E. Gleason 12, George O. Colwell 12, J. W. Geltz 11, Fred Call 11, C. R. Sydman 11, Dr. S. W. Case 10, Dr. A. B. Kidd 10, A. L. Hall 9, S. A. Martin 9, H. M. Carver 8, E. K. Van Vleck 8, Dr. King 7, Hi Follerich 7, Dr. M. A. Winningham 7, Van M. Woodaman 7, W. M. Easter 5.

Hunting Coyottes Now Profitable; Warm, Tough Pelt Sells For $8

The coyote, howling pariah of the animal kingdom, is worth more in the market today, in some instances, than the sheep whose most dreaded enemy he is on the great western ranges, says a Los Angeles writer. His warm, tough pelt, formerly considered practically valueless, is now exported to Europe to protect the shivering soldiers "somewhere" in the trenches, and sells for $8.

If the war continues the price is expected to go to $10 in the winter, and more steel jaws will yawn for him than ever before. Tens, if not hundreds, of thousands will likely be taken and it may prove to be a long step toward extermination, which stockmen and ranchers would welcome. They lose heavily through his depredations.

Commonly regarded as a hungry roamer only of the plains and low-lying hills, it is a strange fact that the finest specimens, and hundreds of them, are found on the rugged upper reaches of Mt. Whitney, highest American peak outside of Alaska. From there he descends and takes his pick of the 75,000 sheep in the rich Owens River Valley and the immense flocks of the San Joaquin on this side of the range, and there he will be most relentlessly hunted for profit.

Two Owens Valley trappers, Thomas W. Key and son Walter of Bishop, who have gathered in 1600 during the past few years merely as a "side line," intend to specialize and make a heavy haul, and so do many others. Most of the traps will be set in the forests at an elevation of 12,000 feet and over, where only the weird baying of the "big wild dogs" and the roaring of the winds disturb the night silence.

These mountain coyotes resemble timber wolves, but experts pronounce them unrelated. Originally lured farther and farther up by the abundance of food, they "located" and gradually developed into a more formidable type, with splendid fur. Now they are at home on the tip-top pinnacle, 14,502 feet, California's "roof of the United States." This peak, which looks like a sharp point, has a boulder-strewn flat of more than four acres on its summit, from which the immense dimensions of the mountain proper may be judged.

On Mt. Whitney and its white-crested neighbors of the stupendous Sierra Nevada, less than 200 miles from metropolitan Los Angeles, wild life teems in numbers and variety as in few other places of the earth, and sportsmen are just finding it out. The rarest and most valuable furs of the country, including some hitherto looked for only in the Far North, come from there. Of these is the silver fox.

During the closed season several months ago the Keys captured one for which they received $900, and last year three worth $1000 apiece, together with many of lesser value. The silver fox's coat is black, with a luster of burnished white metal and a white tip to the tail. Gray, red, swift and cross foxes also abound, and vary in price from $2 to $80. Foxes are never met with there below 7000 feet and not usually above 10,000. Within that belt wood mice, chipmunks, rats, squirrels, grouse, mountain quail and small birds by the million, with juniper and other berries, afford an unfailing source of banquet supply. This also attracts the bobcats, reynard's worst foe, which occasionally put their wary paws in the wrong place and are snapped up.

Foxes are baited by dragging part of the carcass of a freshly killed horse through the brush and placing traps in the trail. Hundreds of fine ones are caught each winter. Pine marten are trapped by similar methods far up in the heaviest timber. These are long, slender brown animals, small, and the fur is worth $25. Mink, badger, skunk and ermine are plentiful in the canyons and along the streams clear into the valleys. The Piute Indians are talking a hand in the trapping game and landing a share of the spoils.

A few years ago the daughter of an ex-President made her appearance in a beautiful coat of lynx skins, and that fur at once leaped into inordinate popularity. It is so costly, however, that milady without ducats to burn had to turn to some other kind of cats and resort to imitation. Nearest to the real thing happens to be the lynx cat, and the price of the substitute has jumped from virtually nothing to $5 and over. It is twice the size of the bob cat, equally common, and means a lot of money to the hunters until some other fad shall displace it.

With saddle and pack horses, dogs, snowshoes and all supplies for a long, cold siege, the hardy trappers go into winter quarters on or about Mt. Whitney before the autumn is far advanced and enter upon a campaign of hard work, adventure and peril such as only thoroughly seasoned mountaineers can withstand, particularly at those altitudes. Each man sets a "line" of traps stretching over twenty or more tortuous miles, and this distance he covers day after day, on horseback, snowshoes, or even skis when the vast snow fields become too treacherous for any other means.. He may at any moment pay with his life for the harvest he is reaping. And yet trapping conditions in California are looked upon as remarkably favorable. The rich game belt extends 100 miles in Inyo and Mono counties.

Early in April the bears—black, brown and also lean—begin to emerge from their lairs, 7000 to 9000 feet skyward, and the trappers turn to them for sport with rifle and dogs, Airedales being the most effective. Often the bears come down cattle trails, which are watched, and stop bullets before the dogs get near them, but in the chaparral furious battles are fought. Many dogs are literally hugged to death or torn to pieces.

Tom Key, who has hunted bears forty years and killed hundreds, says frankly that he never had a close call until last May, when a wounded bear came near cuffing him into eternity. Bruin, given the chance, will amble off and mind his own business in a gentlemanly way, as a rule. His skin, if extra good, is worth $100 for a rug or robe. The meat spoils quicker than any other, no matter how cold. The lard is a camp delicacy for cooking purposes. There is no better country than our lofty Sierra Nevada, so close to the city that our aqueduct gets its sparkling water supply from their glacial hearts. Trappers and hunters in these mountains prefer the 30-30 as a rifle for bear and other game.

Fiercest of all the animals encountered there is the wolverine, closely resembling a small brown bear but much more powerful. This beast is credited with the ability to vanquish a grizzly, but nobody has seen such a feat performed. Dogs find the wolverine disagreeable and uncompanionable—it breaks them all up to come in contact with one. Its hide is worth only $12 or $15, and nobody's looking for it with any eagerness. In striking contrast is the large but timid blue hare, or snowshoe rabbit, which fairly overruns some of the slopes. Also the mountain sheep, shy and fleet, watching on distant crags.

With the fur, bounty and government trappers—such as the Keys, Joseph Drouillard and Burdick—constantly pursuing and decimating the beasts of prey, deer have increased fully 50 per cent, in four years, and their number is legion. Early in the spring, during a severe mountain storm, a single herd of 400 entered the Owens Valley near Independence and remained a week in the vicinity of that county seat. At Big Pine thirty-one fed an entire day along the railroad track and trains were stopped that passengers might enjoy the novel sight. Right at the edge of Bishop a herd of twenty-seven made itself comfortable about a haystack within a few hundred yards of a ranchman's house.

Mountain lions, too, have increased, perhaps ten to one, because they are seldom caught and haven't been worth the trouble and time required to bring them down. But their skins have gone up, and with the bounty added a lion now represents $30 to $40, so they, too, will be hunted.

Man, in the long run, preys upon all his inferiors.

Stock Breeders' Page

DRAFT HORSE AWARDS AT STATE FAIR.

Following are the lists of awards made at the California State Fair this year in the Percheron, Belgian, Shire and Clydesdale classes, as well as the classes for jacks and jennets:

Shire Horses.

Stallions, four years or over—1, Neuadd Hillside, Jack London, Glen Ellen; 2, Anwick Arthur, Easton & Ward,; 3, Blackhawk Barn King, Easton & Ward.

Stallions, three years and under four—1, Royal James, Ruby & Bowers, Davis; 2, Searchlight King, Ruby & Bowers.

Stallions, two years and under three—1, Blackhawk Gay Lad, Easton & Ward.

Stallions, one year and under two—1, Salvador Conqueror, Easton & Ward; 2, Blackhawk Rising Star, Easton & Ward.

Mares, four years old or over, and foal at feet, both to be considered—1, Quania Diamonds, Easton & Ward; 2, Witchford Darby, Easton & Ward; 3, Orphan Girl, Jack London.

Mares, four years old or over—1, Rampton Mabel, Easton & Ward; 2, Cockington Princess, Jack London; 3, Quania Diamonds, Easton & Ward.

Mares, three years and under four—1, Hawton Bounce, Easton & Ward; 2, Blackhawk Beauty, Easton & Ward; 3, Salvador Queen, Jack London.

Mares, two years and under three: 1, Blackhawk Chessie, Easton & Ward.

Mares, one year and under two—1, Blackhawk Delphine, Easton & Ward.

Stallion or filly foal under one year—Blackhawk Betty, Easton & Ward; 2, Blackhawk Forest King, Easton & Ward.

Get of Sire—1, Get of Anwick Arthur, Easton & Ward.

Produce of Dam—1, Rampton Mabel, Easton & Ward; 2, Hawton Felicity, Easton & Ward; 3, Orphan Girl, Jack London.

Champion Stallion—1, Neuadd Hillside, Jack London.

Champion Mare—1, Blackhawk Chessie, Easton & Ward.

State Class—Stallions, four years old or over—1, Neuadd Hillside, Jack London; 2, Anwick Arthur, Easton & Ward; 3, Blackhawk Barn King, Easton & Ward.

Stallions, three years and under four—1, Royal James, Ruby & Bowers; 2, Searchlight King, Ruby & Bowers;

Stallion, two years and under three—1, Blackhawk Gay Lad, Easton & Ward.

Stallions, one year and under two—1, Salvador Conqueror, Easton & Ward; 2, Blackhawk Rising Star, Easton & Ward.

Mares, four years old or over, and foal at feet, both to be considered—1, Quania Diamond and foal, Easton & Ward; 2, Witchford Darby and foal, Easton & Ward; 3, Orphan Girl and foal, Jack London.

Mares, four years or over—1, Rampton Mabel, Easton & Ward; 2, Cockington Princess, Jack London; 3, Quania Diamonds, Easton & Ward.

Mares, three years old and under four—1, Hawton Bounce, Easton & Ward; 2, Blackhawk Beauty, Easton & Ward; 3, Salvador Queen, Jack London.

Mares, two years and under three—1, Blackhawk Chessie, Easton & Ward.

Mares, one year and under two—1, Blackhawk Delphine, Easton & Ward.

Stallion or filly foal under one year—1, Blackhawk Betty, Easton & Ward; 2, Blackhawk Forest King, Easton & Ward.

Get of Sire—Get of Anwick Arthur, Easton & Ward.

Product of Dam—1, Product of Rampton Mabel, Easton & Ward; 2, Hawton Felicity, Easton & Ward; 3, Orphan Girl, Jack London.

Champion Stalllon—Neuadd Hillside, Jack London.

Champion Mare—Blackhawk Chessie, Easton & Ward.

Clydesdale Horses.

All entries in this class were made by Ruby & Bowers, Davis, Cal., who received all the awards.

Percheron Horses.

Class 15. Section 51. Percherons, four years old or over—First, Ithos, M. Bassett, Hanford; second, Loirst, N. W. Thompson, Oakland; third, Kapet, Whitehall Estates, Inc., Tracy.

Class 15. Section 52. Percherons, stallions, three years and under four—First, Boomer Jr., Ruby & Bowers, Davis; second, Sippeo, J. W. Wakefield, Acampo; third, Star, H. M. Jerome, Stockton.

Class 15. Section 53. Percherons, stallions, two years and under three—First, Paulus of Paicines, J. K. Macomber, Tipton; second, Bay Boy, H. G. Learned, Stockton; third, Patre of Paicines, J. K. Macomber, Tipton.

Class 15. Section 54. Percherons, stallions, one year old and under two—First, Plaisor, Whitehall Estates, Inc., Tracy; second, Fernand's Timbre, J. K. Macomber, Tipton; third, Pilote,, Whitehall Estates, Inc., Tracy.

Class 15. Section 56. Percherons, mares, 4 years old or over and foal at feet; both to be considered—First, Fritzi and Black Beauty, H. G. Learned, Stockton; second, Lambruche, Whitehall Estates, Inc., Tracy; third, Lili, Whitehall Estates, Inc., Tracy.

Class 15. Section 56. Percherons, mares, four years old or over—First, Marie, Ruby & Bowers, Davis; second, Limoniere, Whitehall Estates, Inc., Tracy; third, Lenore, Whitehall Estates, Inc., Tracy.

Class 15. Section 57. Percherons, three-year-old and under four—First, Patti, H. G. Learned, Stockton.

Class 15. Section 58. Percherons, mares, two years and under three—First, Martha, Whitehall Estates, Inc., Tracy; second, Maxine, Whitehall Estates, Inc., Tracy; third, Marie, Whitehall Estates, Inc., Tracy.

Class 15. Section 59. Percherons, mares, one year and under two—First, Pilotesse, Whitehall Estates, Inc., Tracy; second, Black Bess, H. G. Learned, Stockton.

Class 15. Section 60. Percherons, foals, stallion or filly foal under one year—First, Black Beauty and foal, H. G. Learned, Stockton; second, Lili's Foal and Rebecca, Whitehall Estates, Inc., Tracy.

Class 15. Section 61. Percherons, get of sire; four animals under four years, the get of same stallion; stallion need not be shown—First, get of Londrecitos: Pion, Paiser, Pilote and Pilotesse, Whitehall Estates, Inc., Tracy. Second, get of Pink Paris: Bay Boy, Black Bess, Black Beauty and Caranza, H. G. Learned, Stockton. Third, get of Londrecitos: Piete, Rosabell, Roland, and Rebecca, Whitehall Estates, Inc., Tracy.

Class 15. Section 62. Percherons, produce of dam. Two animals under four years, the produce of same mare; mare need not be shown—First, produce of Lambruche: Piete, Rosabell; Whitehall Estates, Inc., Tracy.

Class 16. Section 65. Percherons, State class. Stallions four years old or over—First, Ithos, M. Bassett, Hanford; second, Loiret, N. W. Thompson, Oakland; third, Kapet, Whitehall Estates, Inc., Tracy.

Class 16. Section 66. Percherons, stallions, three years old and under four—First, Boomer Jr., Ruby & Bowers, Davis; second, Sippeo, J. W. Wakefield, Acampo; third, H. N. Jerome, H. N, Jerome, Stockton.

Class 16. Section 67. Percherons, stallions, two years and under three—First, Paulus of Paicines, J. K. Macomber, Tipton; second, Bay Boy, H. G. Learned, Stockton; third, Patre of Paicines, J. K. Macomber, Tipton.

Class 16. Section 68. Percherons, stallions, one year and under two—First, Plaiser, Whitehall Estates, Inc., Tracy; second Fernand's Timbre, J. K. Macomber, Tipton; third, Pilote, Whitehall Estates, Inc., Tracy.

Class 16. Section 69. Percherons, mares, four years old or over, and foal at feet, both to be considered—First, Fritzi and foal, H. G. Learned, Stockton; second, Lambruche and foal, Whitehall Estates, Inc., Tracy; third, Lili and foal, Whitehall Estates, Inc., Tracy.

Class 16. Section 70. Percherons, mares4 years old or over—First, Marie, Ruby & Bowers, Davis; second, Limoneire, Whitehall Estates, Inc., Tracy; third, Leonore, Whitehall Estates, Inc., Tracy.

Class 16. Section 71. Percherons, three years old and under four—First, Patti, H. G. Learned, Stockton.

Class 16. Section 72. Percherons, mares, two years and under three—First, Martha, Whitehall Estates, Inc., Tracy; second, Maxine, Whitehall Estates, Inc., Tracy; third, Marie, Whitehall Estates, Inc., Tracy.

Class 16. Section 73. Percherons, mares, one year and under two—First, Politessee, Whitehall Estates, Inc., Tracy; second, Black Bess, H. G. Learned, Stockton.

Class 16. Section 74. Percherons, foals, stallion or filly foal under one year—First, Black Beauty, H. G. Learned, Stockton; second, Lili's foal Rebecca, Whitehall Estates, Inc., Tracy.

Class 16. Section 75. Percherons, get of sire. Four animals under four years, the get of same stallion. Stallion need not be shown—First, get of Londrecitos: Pion, Plaiser, Pilote, Pilotesse, Whitehall Estates, Inc., Tracy; second, get of Ping Paris: BaBy Boy, Black Bess, Black Beauty, Caranza, H. G. Learned, Stockton; third, get of Londrecitos: Piete, Rosabelle, Roland, Rebecca, Whitehall Estates, Inc., Tracy.

Class 16. Section 76. Percherons, produce of dam—First, produce of Lambruche: Piete, Rosabell, Whitehall Estates, Inc., Tracy.

Class 16. Section 77. Percherons, champion stallion—First, Ithos, M. Bassett, Hanford.

Class 16. Section 78. Percherons, champion mare—First, Marie, Ruby & Bowers, Davis.

Belgian Horses.

Class 17. Section 81. Belgians, stallions, four years old or over—First, Joseph, Long Tree Belgian Horse Co., Brentwood; second, Par Hazard, August Meier, Lockeford, Cal.

Class 17. Section 82. Belgians, stallions, three years and under four—First, Frank Iams I., Ruby & Bowers, Davis.

Class 17. Section 83. Belgians, stallions, two years and under three—First, Stevenot, Ruby & Zowers, Davis; second, Cadet of Paicines, J. K. Macomber, Tipton.

Class 42. Section 344. Champion Jennet—First, Jennie Flood, M A. Merrill, Willows.

Paderewski to Engage in Stock Raising.

Ignace Jan Paderewski, celebrated Polish pianist, composer and author of musical works, is the latest celebrity to engage in the stock business in California. Stock from his range holdings in San Luis Obispo county will be branded "Ignace," and the lands will be known as the "Ignace Farms," according to trade mark letters issued to him last week by Secretary of State Frank C. Jordan.

Paderewski's last abode was Morges, Lausanne, Switzerland, but that was when he was at the height of his glory as a musical celebrity throughout the world. In his new role of stock raiser he has chosen a picturesque spot in the rolling foothills of San Luis Obispo county, and it is reported that he intends to specialize in the production of the finest stock.

Dairymen Sending in Applications.

The office of State Veterinarian Charles Keene is now being deluged with applications from dairymen in all parts of the State for inspections under the pure milk law which becomes effective October 1. Recently applications have been received at the rate of about fifty a day, and it is taken from this that practically every dairyman in the State desires to comply with the law.

Dr. Keane has practically completed all arrangements for the inspection work, which will be started by several deputies immediately after the law goes into effect.

At the recent ram sale in Salt Lake $150,000 changed hands in the three days of auction, said to be the largest amount involved in any sale of the kind ever held in the United States. Cotswold rams were sold at prices ranging from $72 to $150 a head. One Rambouillet ram was sold to C. A. Kimball of Hanford, California, for $300. Another sold to W. C. Parowan of Pendleton, Oregon, for $275. There were 3,250 sheep in the sale and 3,100 of them were sold, there being few withdrawals from the ring because of the high prices prevailing.

◈ ◈ ◈

A good many French basques are coming into this western country and are locating around Ogden, Utah, and flocking into the beautiful valleys throughout Idaho, says the Denver Field and Farm. These simple people from the Pyrenees are the best shepherds in the world and know nothing but sheep. They wedge into the nooks and crannies of the foothills and where a white man would starve to death and seem pleased to find such admirable locations. We used to have a few of them in Colorado but it is a good many years now since we have seen a specimen of this peculiar genus homo from the south of France.

THE FARM

TESTING SMALL CHICKS TO DETERMINE SEX.

O. B. Kent, Cornell University, has this to say on the above subject:

I do not believe that day-old chicks or even chicks 21 days old can be positively distinguished as to their sex, regardless of the breed or varieties. In any variety that is double mated, where there is a considerable difference between the male and female coloring, as in Barred Plymouth Rocks, the sex can nearly always be distinguished in the pullet, and cockerel lines are not mixed. Of course, in a flock where dark and light hens and cockerels are used, a much smaller percentage of the chicks could be told for certain. In any case, I do not think that it would run much better than 90 to 95 per cent correct. Some one in Connecticut last summer gave Professor Rice a method of telling day-old chick cockerels from pullets, by examining the spur with a seed tester. This seemed to have considerable value, and I think probably the estimate made from that would run better than 75 per cent correct. The distinction is so fine that it is practically impossible to describe it in words. A careful examination of several chicks before opening up to find out what the sex may be, will show the method.

Another method that was given us from a man in Colorado consists in holding the chicks by the head. A young cockerel will kick rapidly and throw the legs out from the body. A pullet tends to hold the shanks very close up to the breast, keeping the hock joint pressed below down back of the abdomen. This, however, is a much better test when the chicks are a few weeks old, than in the baby chicks. I think it is entirely possible to guarantee 15 per cent pullets at the time the chicks are hatched, possibly running higher than that in particolored birds, like Plymouth Rocks. In some slow developing birds that are late to mature, it is sometimes almost impossible to tell the sex until the chicks are three or four months old, although that, of course, is not the usual case. Of course, the breadth of the head, and the size and development of the comb, are also added indications, but cannot be depended upon alone to be much better than 60 per cent correct.

THE BLESSINGS OF IRRIGATION.

The editor of the Rocky Mountain Husbandman speaks as follows: "We are accused of devoting our entire space to irrigation, and we are frank to confess that it is the dearest of all interests to our heart. But only a small portion of our space is devoted to it. . . . We discuss every condition that can arise on the dry land farm. We try to induce farmers to build innumerable storage dame and arrange if possible to irrigate a garden spot so that they can get more than one picking of peas, more than one picking of strawberries off of their patch. We want to see them have currants and gooseberries and logan berries, and we know that they must have water to do this. We have been getting Montana homes supplied with fruit and flowers for more than forty years and we know what is necessary to do it. We have gone into our Montana homes and had a heart to heart talk with the home builders and we know what it takes. People live or rather exist on the crudest of things, but happy country homes are supplied with the luxuries of the land."

PURE-BRED, NOT THOROUGH-BRED.

The term "thoroughbred" can only be applied to racing animals that have been developed in England and the United States. It is just as much a breed as Clydesdale, Percheron, Shire, Oyrshire, Shorthorn, Guernsey, Hereford, Holstein, Jersey, or any other breed name. The American Studbook is the book of record or registry for the Thoroughbred breed of horses in this country. Pure-bred is the term properly used to describe an animal that is entitled to registry in any regularly recognized breed association. Thoroughbred has sometimes been used in this same sense and many people still use it, but the large majority prefer the correct term, pure-bred. Language is easily corrupted so that a word does not always signify the same thing, and it is more nearly correct and less confusing to hold to the real distinction between these terms. Proper usage and due regard for English require the use of the term "pure-bred" Guernseys or Holsteins, not "thoroughbred."

Driving a nice team of horses in these days is certainly getting to be a novel pleasure, and the driving is inteisified in pleasure by the beautiful roads which the automobile has made necessary. The auto may bring benefit to the horse. The auto has come to stay, and it came to the industrial world, the business world, and to the people whose fortune is yet to be made; but the man who has done his accumulating finds much less pleasure in it than he thought and it will pave the way to the horse as a pleasure producer.—Exchange.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

CHESTNUT TOM 2:17¼ FOR SALE.

Chestnut Tom 43488, standard and registered, eighteen years old, but strong and vigorous, is offered for sale for a ridiculously low price. The late Martin Carter, who was one of California's most successful breeders, considered this horse one of the very best he ever bred for a sire. Chestnut Tom is sire of the dam of the coast champion Wilbur Lou (1) 2:19½, (3) 2:10¼, sire of Natal Day 2:13¼, coast champion two-year-old. The late Martin Carter bred Chestnut Tom for a broodmare sire. He is by Nutwood Wilkes, his dam is by Director and his grandam is the dam of his sire and by Nutwood. $150 takes him. Address GEO. T. ALGEO, 3608 Piedmont Avenue, Oakland.

I WANT TO BUY.—I have sold eleven horses in the last few months ranging from $2,000 to $200. If you have a horse for sale and will write me, I will tell you what my system is. It is a winner. I find there is a buyer for every horse for sale at the right price. It is just a question of getting the buyer and seller together. If you have one for sale let me hear from you.

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Turn Your Hand Trap Stunts Into Dollars

TELL us your "stunts" with the Hand Trap at camp, picnic parties, aboard motor craft, in the woods and fields, at the shooting club's joker trap, or any place where the Hand Trap has given amusement, instruction and experience to yourself and friends.

We Will Pay Cash for Illustrated Stories

For the best descriptive story of the most novel and practical Hand Trap experience accompanied by at least three group photographs of actions described, (containing more than one person) we will pay a first prize of $15.00; a second prize of $10.00; two prizes of $7.50; five prizes of $5.00 each; FIFTEEN PRIZES of $2.50 in CASH.

ALL STORIES AND PICTURES MUST BE SENT BEFORE DECEMBER 1, 1916

For desirable pictures, (publication rights released to us) accompanying stories not accepted, we will pay ONE DOLLAR on receipt of film.

IF YOU HAVEN'T A HAND TRAP RENT ONE OF YOUR DEALER when you buy your shells and targets.

Get your ideas "rounded-up,"—plan your exposures and let your camera earn a few dollars.

No restrictions as to age or sex of contestants or number of stories and photographic groups submitted, but prefer stories not over 600 words.

Get a copy of DU PONT HAND TRAP BOOKLET,—reading what has been done may give you the "hunch" that gets the bunch of money we're going to pay. Write for your copy today.

THE GRAND AMERICAN HANDICAP

won by WINCHESTER

"REPEATER" FACTORY LOADED SHELLS

CAPT. J. F. WULF
THE WINNER
WITH
"REPEATER" SHELLS

The Grand American Handicap, the trapshooting classic—equivalent to the World's Series in baseball, the event that marks the climax in a trapshooter's career, was won by Capt. J. F. Wulf, of Milwaukee, with the wonderful score of 99 x 100 from the 19-yard mark, shooting Winchester "Repeater" Loaded Shells.

NATIONAL AMATEUR CHAMPIONSHIP

Won by F. M. Troeh, of Washington, shooting a Winchester Repeating Shotgun. Score, 99 x 100.

PROFESSIONAL CHAMPIONSHIP
(Dunspaugh Trophy)

Won by Phil R. Miller with a Winchester Repeating Shotgun. Score, 97 x 100 and 25 straight.

HERCULES ALL-AROUND AMATEUR CHAMPIONSHIP

Won by Edward L. Bartlett, of Baltimore, with Winchester Loaded Shells. Score, 185 x 200.

GENERAL AVERAGE ON ALL SINGLE TARGETS

Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 576 x 600.

NATIONAL AMATEUR CHAMPIONSHIP AT DOUBLES

F. M. Troeh was second in this event with 88 x 100, which was only one under the winner. He shot a Winchester Repeating Shotgun.

WOMEN'S NATIONAL CHAMPIONSHIP

Won by Mrs. J. D. Dalton, of Warsaw, Ind., who scored 23 x 25 in the elimination contest and made the same score in the final contest with a Winchester Repeating Shotgun.

MOUND CITY OVERTURE

Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 99 x 100, and 20 straight.

GENERAL AVERAGE ON 16-YARD TARGETS

Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 187 x 200.

This was a great victory for Winchester Guns and Shells; and as a demonstration of "Speed" and other desirable qualities in guns and shells, it shows up like the red W on a package of Winchester ammunition. It also shows why you should

STATE TRAPSHOOTING CHAMPIONSHIP:

Won by Dr. L. G. Richards, Roanoke, with 99 x 100, shooting Nitro Club Speed Shells. Runner up H. C. Laird, Norfolk, 95 x 100 (in shoot-off Mr. Laird broke 20 straight) shooting Nitro Club Speed Shells throughout.

S. S. SCHOLL TROPHY:

Won by John W. Todd, Staunton, 143 x 150, shooting Remington UMC Pump Gun and Nitro Club Speed Shells.

VIRGINIAN HOTEL CUP:

Won by W. D. Wisecarver, Berryville, 24 x 25, from 18 yards, shooting Nitro Club Speed Shells.

DU PONT TROPHY:

Won by Dr. L. G. Richards, Roanoke, 97 x 100, using Nitro Club Speed Shells.

FIVE MEN TEAM RACE:

Won by Staunton Gun Club: R. A. Hall, W. D. Runnels, W. B. Anderson, L. W. Puffengargen and J. W. Todd, all shooting Nitro Club Speed Shells.

The Remington Arms Union Metallic Cartridge Company,
Woolworth Building New York City

P. S.—Shooters of Remington UMC shotguns, shot shells or both, have won 17 State Shoots this year, the Southern Handicap, the Eastern Handicap, the "Indian" Championship and many other notable victories.

They all took the good old year-in-and-year-out Speed Shell Route to Winningtown

Championship of California!!!

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

INTER-MOUNTAIN FAIR CIRCUIT.

Salt Lake, Utah.....October 2

GRAND CIRCUIT.

Lexington, Ky. .....Oct. 2-14
Atlanta, Ga. .....Oct. 16-21

REPORTS OF SALES of trotting and pacing horses that are repeatedly being made in the eastern horse papers show that a good horse, or one that is a good prospect, will now bring a very profitable figure, and the same is true in a lesser degree of course in California. A yearling changed hands in Kentucky this month for $5000, and there have been several trotters and pacers to change hands since the Grand Circuit opened for sums in excess of that amount. In spite of all that is said about the popularity of the running horse, it is demonstrated year after year from the Pacific to the Atlantic coast that there is no attraction equal to good harness racing for drawing crowds to the fairs, and so long as these fairs are held just so long will harness racing be the principal amusement feature provided. It looks now as if the sport of harness racing will assume still greater proportions than ever in the United States, and the owners of good brood mares will be wise if they continue to mate them with good stallions. The advent of the automobile has no doubt made the promiscuous mating of trotting bred mares and stallions unprofitable, as where all the mediocre animals on a trotting horse breeding farm could formerly be disposed of for stage, road or delivery horses, the demand henceforth will be for horses that can show speed or have plenty of good looks. A really handsome horse never goes begging, while a really fast one is usually sought after. So if the farmer who owns a few mares will mate them for the purpose of getting speed and good looks in the produce we believe he will find the venture a profitable one, provided he does not attempt to breed too many. The tremendous slaughter of saddle and light draft horses in Europe during the past two years and the falling off in the breeding of that class in the United States owing to the advent of the automobile, has made a shortage in the horse supply that will be felt and felt soon if there is as little breeding during the next few years as there has been in the last three or four.

THE HARNESS RACING SEASON OF 1916 has thus far been extremely successful throughout the Eastern and Middle Western States, but the signs at present all point to a still greater and more successful season in 1917. As the present season is drawing to a close the size of the fields starting at nearly all the important tracks have been increasing, and in few races can the starters be lined up in one tier. So successful has the season been that many associations have already announced their dates for 1917, and there is every reason to believe that purses will be larger and conditions more liberal next year than ever before. Under the most discouraging conditions at the opening of the season in California, there has been developed a small circuit which is not yet concluded, during which there has been some excellent racing even though the time records made by the trotters and pacers has not been as fast as in former years. The attendance at Santa Rosa, Dixon, Sacramento, Pleasanton and Fresno has shown that the public has not lost its interest in the horses, and there is no longer any doubt but good programs well advertised have yet a drawing power that no other form of sport can boast of, and the meetings still to come at Hanford, Bakersfield, Riverside, Ventura and Phoenix will add convincing testimony to this statement. As soon as the circuit closes there should be action taken toward arranging dates and programs for next year. All that is needed is concert of action. A circuit of half mile tracks in Oregon and Idaho closed its programs last July with an average of over 20 entries to each race. Why did so many horsemen ship long distances to race their horses on that circuit for $300 and $400 purses? Simply because there was a circuit of eight weeks' racing assured for purses and classes that were all announced at once. That sort of united action is needed in California. There are at least twelve towns in this State where well-arranged programs can be offered with a certainty that nearly every race will fill, and if the managers of these tracks and secretaries of the associations would get together by December of this year, or not later than February of next year, and make a concerted announcement of classes and purses, there would be five horses in training by March 1st where there will be one if such an announcement is not made. A good circuit of harness racing would put new life into the trotting horse industry in California, and increase the value of every standard bred stallion, mare and gelding in the State.

RALPH H. TOZER, who for many years edited the thoroughbred department of the Breeder and Sportsman, and was well known all over the Pacific Coast as a turf writer, died on Monday last at a sanitarium after a short illness. He was born in Louisville, Kentucky and as a youth learned the typesetting branch of the printers' trade, coming to California about the time he reached his majority. He worked at the case in San Francisco for several years, and having an extensive acquaintance with the history of the thoroughbred horse and a deep knowledge of pedigrees he became a writer on running horse affairs. When racing assumed large proportions in the years following the taking over of the affairs of the Pacific Coast Blood Horse Association by the California Jockey Club, he held various positions as secretary and handicapper at different meetings on the coast and became a regular contributor to the turf columns of the San Francisco dailies. He suffered a very severe illness a few years ago, but had seemingly recovered entirely and three months ago appeared in robust health. A recurrence of the ailment came while he was acting as racing secretary of the Reno meeting last July and resulted in his death last Monday. He leaves a widow but no children to mourn his death. A man of abstemious habits, of genial personality and kindly disposition, he had hosts of friends, and probably no man had fewer enemies, if he had any at all, which is doubtful. Peace to his ashes.

THE FOOT OF THE HORSE.—No. 2.

[By D. J. O'Keefe, Woodland.]

The normal outline of the ground or lower surface of the horse's hoofs, is in two general shapes; those which are round, and such as are more like the letter U. The latter when deformed, frequently resembles the shape of a pear. Each class has numerous departures from either the ring or U-shape. Sometimes the inner side outline of the bottom will be nearly straight, and in such a case the toe on the inside is projected far in front of its normal line. The name for such a hoof is "pigeon toe." The wall of a horse's hoof seems to be governed, in its circling, by the same law which is operative in pushing out one side of a hoop. Whatever part goes out causes some other part to come in. When the quarter, particularly the front of it near where the toe wall begins, comes inside of where nature planned, a more serious result occurs than if only the extreme rear section of the side walls circle goes within the normal line. The latter condition is very markedly caused by the toe becoming very much too long on the bottom.

Two things occur when the toe is allowed to grow too long. Not only does the toe push out unduly and give the front of the hoof a dishy appearance, but the full weight of the horse comes on the rear wall while it is at too great an under incline. This causes the sole to become unduly arched to push the parts above it up and slightly out of their normal bearings. What is known as the shed forms on each side of the frog. By growing against the shoe this is, at times, forced up at the center, past the normal arching of the sole, and if the hoof be subjected to severe pounding when in this condition, an extra degree of heat is excited which causes a massing of the sole fibres and breaks up nature's normal processes of arranging the sole supply material. In this way the defining line alongside the frog is liable to become obliterated, and causes not only an undue pressure on the fleshy parts just above the heel of the coffin-bone, but is one of the principal causes of most all foot ailments, such as contraction, corns, quarter cracks, broken bars, and raised cartilages.

When contraction affects only one quarter it is called unilateral contraction, or abnormal wryness. Contraction affects front feet, especially those of the acute-angled forms, more often than hind feet. The causes, aside from too little exercise, are chiefly errors such as weakening the posterior half of the hoof, carrying too long a toe weight, and drying out of the horn.

Contraction of Wide Hoofs.—This contraction is manifest as a concavity or groove in the wall just below the coronet, usually at the quarters though sometimes extending entirely around the foot, parallel to the coronary band. Pain is produced in the contracted area by lightly tapping the horn, but not by moderate pressure with the hoof-testers.

Contraction of the Sole.—This is accompanied by an unnatural direction of the wall. Instead of the wall being straight from the coronet to the shoe, it describes a curve whose convexity is outward (keg-shaped when seen from the side). The hoof seems tied in at the coronet and at its plantar border. The sole is abnormally concave and the plantar surface of the hoof is considerably shortened from toe to heel. It happens in both shod and unshod horses with strong hoofs, but is quite rare. It is occasionally with navicular disease.

The Crooked Hoof.—A crooked hoof is one whose walls, viewed from in front or behind, do not pass in a straight, natural direction from the coronet to the ground, but are bent in such a manner that the bearing-surface of the wall in relation to the foot axis lies either too far out or in.

The Abnormal Wry Hoof.—If one side wall and quarter is steep, and the other very slanting or oblique, we term such a hoof a "wry hoof." Neglect of the colt's hoofs during the first years of life frequently lays the basis for wry foot in later years. All wry feet are more susceptible to disease than others. In hoofs of irregular form we must consider the position of the limb and the distribution of weight on the hoof, because where the most weight falls, the surface support of the foot must be widened or more material supplied to wear on that branch.

HORSES VERSUS TRACTORS IN WAR.

Columns have been written to show that horses and mules are no longer needed in war. Every metropolitan daily has been flooded with press notices of the elimination of Dobbin and his ally, the mule. The value of automobiles and tractors, and their ability to go across deserts and mountain trails where jackrabbits could scarcely progress, has been blazoned to the world by writers whose talents should be devoted to writing best sellers a la Chambers. It may bring some of these disciples of Munchausen to earth to peruse the following figures. The United States Government, through the Bureau of Foreign Commerce, has definite detailed data on exports. Such data has been furnished the writer.

From September 1, 1914 to June 1, 1916, the United States exported 30,411 commercial automobiles, valued at $81,295,986; 69,803 passenger automobiles, valued at $57,623,261, and 22,502 motorcycles, valued at $4,202,877—a grand total of 122,716 motor driven vehicles, all kinds, with a total value of $143,122,124.

Against these exports, which have caused the motor-driven knights of the fountain pen to indulge in ecstatic paens of joy, regarding the elimination of horses and mules, the cold figures show that during the same period—Sept. 1, 1914 to June 1, 1916—611,790 horses, valued at $134,943,456, and 167,387 mules, valued at $34,198,955, were exported—a total, in value, of $169,142,411.

This overshadows, very handily, the total of exports of motor driven vehicles. To the exports of horses and mules, however, we must add the exports of wagons, valued at $2,461,611; and of harness and saddles, valued at $25,739,015.

The grand total for horses, mules, wagons, harness and saddles, exported during the 23 months ending June 1, 1916, comes to $197,343,037—almost two hundred million dollars. This exceeds the exports of motor vehicles by more than fifty-four million dollars, and is conclusive that horses and mules are far from being back numbers in war.

Very truly yours,

WAYNE DINSMORE,
Sec'y Percheron Society of America.

The Real Lady, champion two-year-old trotter of 1916, she having trotted four heats under 2:10, the best in 2:08¾, and won both her starts, did a half-mile in 1:02¾ the first time she turned for the money, which fact and the further one that she has not been able to win a heat unless she beat 2:10, will give some idea of the class and speed of the two-year-olds of 1916.

FIRST WEEK COLUMBUS FALL MEETING.

The two weeks fall meeting of the Columbus, Ohio, association, began on Monday, September 18th. On the opening day Lon McDonald won the 2:11 trot with McCloskey in straight heats, Will Durfee getting second money with the Moko mare Virginia Barnette. The Horse Review's Futurity for two-year-olds was won by The Real Lady by Moko, driven by Murphy in 2:09¼ and 2:11, Emma Magowan being second and Mary Coburn third. There were eight starters in this race. Miss Harris M. won the 2:06 pace, and Little Frank D. the 2:14 pace.

On Tuesday the Horse Review Futurity for three-year-old trotters opened the program and was won with ease by last year's great two-year-old Volga, who had to trot but a half-second lower than her two-year-old record to win.

The $10,000 stake for 2:14 trotters went to Mabel Trask in straight heats, St. Frisco not being an entry in this race.

Wednesday Will Durfee led off by winning the 2:07 trot with Esperanza, the Carlokin mare reducing her record by a fraction when she won the fourth heat in 2:07¼.

There were five heats in the 2:09 trot on Friday, Pittsburg being declared the winner, with Charley Spencer's The Proof standing for fourth money. On the same day the 2:06 pace, which was the last race on the week's program, went to five heats without a decision and a sixth heat had to be trotted on Saturday, and it was the only heat that day as the race completed the week's program. This race was won by Judge Ormonde. The week's summaries were as follows:

Monday, Sept. 18.

2:11 class trotting, three in five, purse $1200:
McCloskey, br g by Theodosius.....(McDonald) 1 1 1
Virginia Barnette, b m.....(Durfee) 2 3 5
Pittsburg, ch g.....(Murphy) 4 11 2
Also started—Empress of Russia, Dick Watts, R. C. P., Dona Lona, Henry Todd, Jack K., Polly T., The Toddler, George N. Patterson.
Time—2:10¼, 2:08¾, 2:11½.

Horse Review Futurity, two-year-old trotters, two in three, purse $3000:
The Real Lady, br f by Moko.....(Murphy) 1 1
Emma Magowan, br f.....(Murray) 2 2
Mary Coburn, ch f.....(White) 4 3
Also started—Bertha McGuire, Worthy Volo, Harvest Gale, E. Colorado, Kelley Deforest.
Time—2:09¾, 2:11.

King Stake, 2:06 pacers, three in five, purse $3000:
Miss Harris M., b m by Peter the Great.....
.....1..... (McDonald) 5 1 1
Sayde Densmore, ch m.....(Thomas) 1 3 3 3
Roan Hal, ro g .....(Murphy) 2 2 2 2
Also started — The Savoy, Goldie C., Barlight, The Beaver, Baby Bertha.
Time—2:03¼, 2:02¾, 2:05¾, 2:06¼.

2:14 class pacing, three in five, purse $1200:
Little Frank D., b g by Little Frank(Valentine)12 1 1 1
Queen Hal, ro m by Gold Hal....(McPherson) 1 7 14 10
Spring Maid, ch m.....(Cox) 4 3 3 2
Also started—Baron Wood, Bernice, Alcantara, Tango, D. M. B., Colonel B., Horace McKerron, Laddie, Rita Jay, Major A., Hal King, Hal Connor, Willis Woodland.
Time—2:07¼, 2:07¼, 2:10, 2:07¼.

Tuesday, Sept. 19.

Horse Review Futurity, three-year-old trotters, two in three, $8000:
Volga, ch f by Peter the Great.....(White) 1 1
Bingen Silk, b c.....(Chandler) 2 3
Harrod's Creek, ch c.....(Engleman) 3 2
Also started—Bintara, Expressive Lou, Brownie Watts, General Yorke. Bingen Silk and Harrod's Creek divided fourth money.
Time—2:08¼, 2:07¼.

Hoster Columbus Stake, 2:14 trotters, three in five, $10,000:
Mabel Trask, ch m by Peter the Great....(Cox) 1 1 1
Donna Clay, b m.....(Valentine) 7 2 2
Azora Axworthy, b m.....(Murphy) 2 3 3
Also started—Alma Forbes, Binland, Allie Watts and R. O. Sphinx.
Time—2:06¾, 2:05½, 2:05½.

2:08 class pacing, three in five, purse $1200:
Fred Russell, b g by Little Frank...(Snow) 2 5 1 1 1
Beth Clark, blk m by Joe Patchen(Hedrick)1 1 4 4 4
White Sox, b m.....(Durfee) 3 2 2 3 3
Also started—Comsewogue Hal, Canute.
Time—2:05¾, 2:05½, 2:04¼, 2:07¼, 2:07¼.

2:15 class trotting, three in five, purse $1200:
Ridgemark, b g by Wilask.....(Traynor) 1 1 1
Humfast, b m.....(Murphy) 2 2 2
Sister Ella, ch m.....(Valentine) 9 3 4
Also started—Jeanette Speed, Gum Drop, Brescia, Doris Watts, Mar Boy, Onward Allerton, Trusty McKinney, Princess Italia, Black Peter, John G.
Time—2:08¼, 2:10, 2:10¼.

To beat 2:15 trotting:
Erda, br m by Zombro.....(Valentine) won
Time—2:14¼.

Wednesday, Sept. 20.

2:07 class trotting, three in five, purse $1200:
Esperanza, b m by Carlokin.....(Durfee) 4 3 1 1 1
Sister Strong, b m by Strong Boy(Valentine)2 1 2 2 2
Mirthful, b m by Star Patchen....(Murphy) 1 2 4 4 4
Sadie S., b m.....(McMahon) 3 4 3 3 3
Time—2:08¼, 2:08¼, 2:09¼, 2:07¾, 2:08½.

Horse Review Futurity, three-year-old pacers, two in three, purse $3000:
Peter Look, b s by Peter the Great.....(Traynor) 1 1
The Aim, blk c.....(McMahon) 2 2
Flora Strathmore, ch f.....(Hall) 5 3
Also started—Natoma, Rose Magee.
Time—2:10¼, 2:10¾.

Hotel Hartman Stake, 2:13 pacers, three in five, purse $5000:
Ben Earl, b g by The Earl.....(Childs) 1 2 1 1
Young Todd, b g by Director Todd.....(Cox) 2 1 3 2
Sir Anthony Carter, b h....(Geers-McMahon) 7 6 2 6
Also started—Peter Nash, The Problem, Tramp-a-Bit, May Fern, Rythmaid.
Time—2:04¼, 2:02¼, 2:04¼, 2:08¼.

To beat 2:02¼ pacing:
Peter Stevens, b h by Peter the Great..(Murphy) won
Time—2:01½.

Thursday, Sept. 21.

2:10 class pacing, three in five, purse $1200:
Dlumeter, b g by Dium.....(Grady) 2 1 1 1
Peter G., b h by The Wolverine.....
.....(Snow and Valentine) 1 4 2 3
Also started—Martin C., Arveta V., Fern Hall, Van Buren, Theda Bara, Hal Leaf, Charley C., Willow Hal.
Time—2:06¼, 2:04½, 2:06¼, 2:06¼.

Capital City Stake, 2:08 trotters, three in five, $3000:
St. Frisco, b s by San Francisco.....(Murphy) 1 1 1
Miss Perfection, b m.....(McMahon) 5 2 2
Bacellia, b h.....(White) 2 3 5
Also started—Harry S. J., Laramie Lad, The Eno.
Time—2:07¼, 2:06¼, 2:06¼.

Free-for-all class pacing, two in three, purse $1200:
Napoleon Direct, ch h by Walter Direct..(Murphy) 1 1
Single G., b h.....(Cox) 2 2
Hal Boy, b g.....(McMahon) 4 3
Russell Boy, b h.....(Edman) 3 4
Also started—Fay Richmond.
Hal Boy and Russell Boy divided fourth money.
Time—2:06½, 2:00¼.

2:19 class trotting, three in five, purse $1200:
Zomrect, blk h by Zombro.....(McDonald) 3 1 1 1
Royal Mc., b g by Royal McKinney(C. Clayton) 1 2 7 6
Balla Hall, b m.....(H. Fleming) 2 9 2 7
Also started—Holly Rood King, Lu Princeton, Lewis E. Winter, Barbara King, Judge Jones, Kitty Amar, Sealskin Boy, Channing, Daisy Todd.
Time—2:09¼, 2:08¼, 2:10½, 2:12¼.

Friday, Sept. 22.

2:09 class trotting, three in five, purse $1200:
Pittsburg, ch g by General Athol..(Murphy) 1 1 6 5 1
M. L. J., b g by Red Will.....(Leonard) 2 2 1 1 2
McCloskey, br g.....(McDonald) 4 6 2 2 4
Also started—The Proof, Polly T., Dick Watts, Hazel Laing.
Time—2:08¼, 2:08¼, 2:09¾, 2:09¼, 2:10.

2:18 class pacing, three in five, purse $1200:
Young Todd, b h by Director Todd.....(Cox) 1 1 7 1
Admiral Dewey I., blk h by Admiral Dewey..
.....(Snow) 2 2 1 2
Robert Frisco, br g.....(Crossman) 5 4 2 4
Also started—Queen Hal, Squaw Man, Miss Jean, Posey H., Jimmie E.
Time—2:08¼, 2:09¼, 2:09¼, 2:08¾.

To set record for pacing team driven by lady: Mr. King and Lady Fanchon (Miss Beverly) won. Time—2:28¼.

Saturday, Sept. 23.

2:06 class pacing, 3 in 5, purse $1200 (5 heats Friday):
Judge Ormonde, blk h by Ormonde.....
.....(Valentine) 7 8 2 1 1 1
Barlight, br g.....(Mann) 1 1 3 4 3 3
Fred Russell, b g.....(Snow) 6 3 1 2 2 2
Auto Zombro, b h....(Loomis-McMahon) 2 2 7 4 ro
Also started—White Sox, Polly Ann, Thomas Earl, Altawood.
Time—2:04¼, 2:04¾, 2:08¼, 2:04½, 2:08½, 2:04.

BAKER CITY, OREGON.

Sept. 13.—2:14 pace, purse $400:
Harold Welcome, b s by Welcome....(Butcher) 1 1 3
Helen Zedo, b m by Bob Fitzsimmons(Welbourn) 4 5 1
Armadillo, blk m by Montana Grattan..(Huber) 2 2 4

Time—2:14¾, 2:13¼, 2:15¼.

2:14 trot, purse $500:
D. J. Burk, b g by The Corsair..... 1 1 1
Dr. Wayo, b s by Wilkshurst..... 2 2 2
Sweet Bow, b m by Bon Voyage..... 3 3 3
Amy McKinney, bl m by Capt. McKinney..... 4 4 4
Time—2:16¼, 2:17, 2:18¼.

The mile that Ben White drove Lee Axworthy in flat two minutes at Syracuse Sept. 12th was, so far as anyone connected with harness racing can recall, the only two-minute mile by a trotter or pacer in which each of the four quarters was covered in just 30 seconds. Ed Geers, speaking of this, said that the mile was wonderfully well rated, but that, of course, it was largely accidental that each quarter was in just 30 seconds, for there were spots in each quarter in which the horse was trotting faster and slower than a two-minute gait. One thing is certain, no one ever saw a more striking exhibition of gameness than the little stallion gave when he finished his record mile. With a runner on either side he gallantly tried to beat his supposed antagonists to the very last inch of the mile. No one ever saw any thoroughbred run the last end of an extremely fast mile with a greater courage than Lee Axworthy displayed in this mile at its finish, and until those who regard thoroughbred blood as the essence of gameness can point out a greater example of it among the present day runners it will be idle to talk of the "speed sustaining" thoroughbred blood, as that term is sometimes used by those who advocate a new infusion of that blood in trotting pedigrees.—Horse World.

SPOKANE, WASH.

(Half-mile Track.)

Sept. 6—2:20 pace, purse $750:
Allerton Direct, b h by Baron Direct..(McGuire) 3 2 1
King Zolock, b h by Zolock.....(Bush) 1 3 3

Worthy Maid, b m by Bale Axworthy..(Bunch) 4 5 3
James Oliver, b h by Bonaday.....(Bush) 5 4 4
Time—2:19, 2:20, 2:22½.

Bradmont Again Wins Free-For-All.

Ritchie Roberts is doing well with his new purchase, Bradmont, that he got from President Giannini of the San Francisco-California Driving Club a few weeks ago. He has started him twice since owning him and has won both times. Last Sunday at the Golden Gate Park matinee Bradmont paced a second heat in 2:10½, and seems to be a better horse than ever. A good afternoon of racing was enjoyed and while three of the four events were win in straight heats there were several close contests. Results:

First race, 2:20 mixed:
Silver Logan .....(Dan Healey) 1 1
George W. .....(Frank Burton) 2 2
Minequa .....(M. Ford) 3 4
Matawan .....(J. McNamara) 4 3
Time—2:19, 2:22½.

Second race, 2:25 pace:
Pointer Belle .....(J. M. Kidd) 1 1
Frank N. .....(L. A. Gielow) 2 3
Rosa O. .....(J. J. Ryan) 3 2
Time—2:16½, 2:17¼.

Third race, free-for-all pace:
Bradmont .....(Richie Roberts) 2 1 1
King Pointer .....(H. Campodonico) 1 2 2
Emma M. .....(W. Malough) 3 3 3
Little Bernice .....(J. C. Welsh) 4 4 d
Time—2:13¼, 2:10½, 2:13.

Fourth race, 2:12 pace:
Little Jack .....(G. Conlon) 1 1
J. C. Simpson.....(Frank Goularte) 2 2
W. J. K.....(W. J. Kenney) 3 4
Senator H. .....(J. M. Kidd) 4 3
Time—2:14½, 2:14½.

Trotters and Pacers in New Zealand.

During the past year the trotting clubs of New Zealand have contributed £82,000 to the Government and patriotic funds.

Mr. H. W. Kitchingham is limiting the number of mares to 25 for Copa de Oro. Up to date, he has had numerous enquiries regarding the American stallion, and 23 mares have been booked, amongst them being some of the best in New Zealand.

The imported stallion Harold Dillon was the most successful sire during the three days' racing of the August meeting at Addington, four of his stock in Sungod, Mako Mako, Soda, and Bacchus accounting for races, while Sungod registered three seconds and Harold O. one second, and Oinako, Harold D., Cello Sydney Wilkes and Soda were third.

On a good many occasions accidents to sulkies have caused delay in the starting of races, and in order to be prepared for emergencies of this nature the committee of the New Zealand Metropolitan Trotting Club has decided to procure two sulkies, which will be kept near the starting post on race days, and be available in case of accidents. This provision will render it unnecessary for a horse to return to the paddock, and will consequently save a good deal of time.

An important deal has been made in which Walter R. Cox, the well known driver, sold the young trotter Dos Palos, by San Francisco, to W. Averill Harriman, New York State Fair Commissioner and an enthusiastic member of the Goshen Driving Club. The horse will be used for matinee driving. Dos Palos has started only in three races so far and as a racing prospect is eligible to slow classes. In stating the price, Cox said that it was more than $5,000 and less than $10,000. The deal was private.

Thoroughbred Matters

Sangallo Runs Second with Fractured Leg.

At Havre de Grace track, September 19th, the California bred horse Sangallo, owned and trained by C. W. Carroll of California, who for years has trained for and looked after the Napa Stock Farm of A. B. Spreckels, ran a remarkable race with a fractured leg in the handicap and finished second to Eagle, beating Malachite and Sandmark, the only other two starters.

While the four candidates for the feature event of the day were twisting about at the post, Malachite lunged out and kicked Sangallo, landing on the right knee. The horse was seen to flinch as if wanting to lie down, but directly afterward the barrier was sprung and, getting away well, Jockey Butwell immediately rushed him out to take a lead, which he got as they went around the first turn.

Eagle was close at hand, but Malachite had come close and pinned him on the rail where the going was not so good as that farther out, and while these two stuck close together Sangallo went on ahead and opened up such a gap that it began to look as if he had the race won. The California horse kept up the pace on around the turn for home, but as they came into the stretch Eagle began to draw away from Malachite and started after the leader. Malachite also challenged, and while these two made a wide turn in the middle of the track, Butwell brought Sangallo down on the inside. There was a good finish through the stretch, and in the last half dozen jumps Eagle closed up and got a nose decision as they passed the winning post, with Malachite and Sandmark beaten off.

When Sangallo was returned to the paddock and an examination made it was ascertained that the kick he received had resulted in what is known as a green-tree fracture, so called because the bone splinters. The fracture was in the radial bone of the right foreleg and how the horse ran such a good and game race, which undoubtedly would have been his with a little better racing luck, was something difficult to explain.

How Star Hawk Won Louisville Cup.

Finishing with a great burst of speed, after being headed once and apparently beaten, Star Hawk, A. K. Macomber's three-year-old imported son of Sunstar—Sweet Finch, won the Louisville Cup at two miles, the stellar event on last Saturday's racing card at Douglas Park.

The English-bred horse had only half a length to spare over Embroidery at the end and he had to be a good horse to win. The A. B. Hancock filly overhauled him at the half mile pole, on the second trip around, and she seemed a certain winner, making the turn for home, but Star Hawk demonstrated his class and was up again.

There were many persons in the vast crowd who were of the opinion that Embroidery would have been returned the winner had Jockey Frankie Murphy delayed just a trifle longer in making his move.

There were only four starters, Kilanna finishing third, six lengths behind the place horse, and Water Witch fourth. Of the four starters two of them were foreign bred, the winner and Killanna.

The victory of Star Hawk stamps him as a great three-year-old over a route of ground, and he showed that he has improved since he finished second to George Smith in the Kentucky Derby at Churchill Downs last spring, beaten by a neck. He carried 120 pounds Saturday and was conceding chunks of weight to his opponents, he being the only three-year-old in the race.

The winner was given a big ovation when he came back to the scales, as the big crowd realized what a great racehorse he is. One of the first to greet Jockey Phillips on his return to the judges' stand was A. K. Macomber, and the owner was all smiles after his horse's victory. He came from the East especially to witness this race and said that he was confident at all times that his colt would be returned the winner, regardless of what opposition he met. This made the sixth straight day that Mr. Macomber has wone a race at the meeting, and both stakes fell to him, one with Dodge and the other with Star Hawk. The time was 3:29 3-5, and the value of the stake $2200 to the winner.

Many Entries at Laurel.

August Belmont is the most liberal of all the nominators in the stakes that are to be decided at Laurel next month and it is the very evident intention of Trainer Hildreth to put in a very busy fall season in Maryland, and in all there have been forty-eight nominations made by the chairman of The Jockey Club. Stromboli is the handicap dependence of the stable, while the two-year-olds have been variously engaged. John Sanford is the next best nominator for the Laurel season. With the exception of George Smith, winner of the Kentucky Derby, the Amsterdam turfman has named all of his good ones. James Butler has made thirty-eight nominations, while Harry Payne Whitney has thirty-seven nominations in the various stakes that are down for decision. Foxhall Keene will sell all his horses in training at the Laurel meeting.

The Winners of Breeding Bureau Prize.

New York, Sept. 18.—The first competition for the Jockey Club's Breeding Bureau prize of $400 for yearlings by a thoroughbred sire was held at the State Fair at Syracuse on Wednesday last and was a signal success, nine good specimens from different parts of the State answering the call of the bugle.

The competition was the outcome of a desire on the part of the Jockey Club which has for years given prizes of $50 for the best foals by their Breeding Bureau sires at the various county fairs, to still greater stimulate the horse-breeding industry in New York State. Mr. Frank K. Sturgis, the active head of the Bureau, arranged to have the competition at the State Fair, and all foals that had been awarded first, second or third prizes in 1915 were eligible.

The class was judged in front of the grand stand, where thousands of farmers had a good view of the quality of the entrants at close hand. In the ring were such experts as Mrs. Herbert Wadsworth, the President of the Genesee Valley Horse Breeders' Association, an organization which has done splendid work in the region around Mount Morris, Geneseo, and Avon; Lady Beck, who is to judge saddle horses at Madison Square Garden in November; Sir Adam Beck, whose Canadian hunters have won championships on two continents; William Littauer, James W. and Henry Colt, of the "Valley"; Fletcher Harper, of Millbrook; F. Ambrose Clark, of Cooperstown; Louis Waring and S. W. Taylor, of New York; G. L. Stryker, of Derby, and Pierre Lorillard Jr., and W. Averill Harriman, of Goshen.

The premier award of $250 was won by an unnamed bay filly by Wonder Boy, a son of imported Watercress out of Donna de Oro by Rayon d'Or, loaned to the Bureau by August Belmont and in the stud at "Ashantee," Avon. This filly, which is owned by C. F. Flynn, of East Avon, is 15 hands high and weighs 800 pounds at 15 months. Her dam is a granddaughter of Electioneer, and in her the farmer saw a splendid example of the thoroughbred trotting cross. The second prize of $100 went to Mrs. Herbert Wadsworth's chestnut filly Hallali, by Hippodrome out of a mare by Otai, and the next dam by Barrett, a son of Bonnie Scotland. This filly exemplified the three-quarter thoroughbred type, while the third prize-winner, Pattern, by Fashion Plate out of a daughter of General Stanton, owned by W. H. Barr, of Derby, was another good example of the thoroughbred-standard bred cross.

There wasn't a really poor yearling in the lot, and Messrs. Lorillard and Harriman were so greatly impressed with the general excellence of the class that they will make application for a Breeding Bureau sire to stand at Goshen. There are so many good standard-bred dams in Orange county, "the cradle of the trotting horse," that the very best results would be obtained in that region. As a greater number of mares than ever before were bred during 1915 the future for this competition at Syracuse seems exceedingly bright.

Rewarding the Breeder.

Devonshire Park, the newest of the Canadian mile race courses, will have its inaugural meeting of seven days beginning September 30. Devonshire Park is at Windsor, Ontario, and the pace that is being set by Grant Hugh Browne and his associates, at the first meeting, gives the new association a prominent place on the Canadian racing map. The book for the meeting has been distributed among the horsemen and it provides that no purse shall have a lesser value than $600, while there are $800 and $1000 handicaps.

But the big thing that Mr. Browne and his associates are going to do is to offer a premium to the breeders. In all handicaps of a mile or greater distance there will be a bonus of 10 per cent of the value of the purse paid to the breeder of the winner. This 10 per cent is not to be taken from the purse that is offered, but it is merely an additional prize for the breeder. This is a direct return that will be readily appreciated and it is really a big thing for the fundamental reason for racing, "the improvement of the breed of horses."

Macomber Horses Winning at Louisville.

The Macomber horses have been running in a winning streak at the Louisville, Kentucky, meeting. His two-year-old, Hollister, won a five and a half furlong race, Hank o' Day won at six furlongs, Dodge won the Douglas Park handicap at a mile and a sixteenth, while Isadore and Typhoon both ran second in their races during the opening week. In the fourth renewal of the Louisville Cup last Saturday Star Hawk, with 120 pounds up, won by a length. Embroidery finished second, five lengths ahead of Kilanna, with Waterwitch, the only other starter, trailing the field. The time for the two miles was 3:29 3-5. The race was worth $2200 to the winner, in addition to a handsome trophy.

J. W. Coffroth anticipates a big season of racing at Tijuana this winter. He has just returned from a trip to the eastern tracks, where he secured the attendance of many stables of runners. The Tijuana meeting will open November 11th.

◈ ◈ ◈

The Reno meeting is drawing a fair attendance and some good races are being given. An average of six or seven starters are secured for each race and while the purses are small, the owners seem pleased with the management of the meeting.

Paul Rainey Tells of Horses in Africa.

That intrepid sportsman, Paul J. Rainey, who has spent much of his time in Africa in recent years, and whose wonderful motion pictures of tiger and lion hunting in Africa have been shown all over the United States, is back in America and was a frequent visitor at Belmont Park, New York, during the recent racing season. He is as much an admirer of the thoroughbred as when his colors were being borne by the sprinter De Mund, for which he paid $45,000, Yankee Consul, a good two-year-old that won him many races, and other good horses. Mr. Rainey told a reporter for the New York Telegraph recently that he found horses of blood and courage of the greatest value in the prosecution of his hunting and photographic campaigns after big game in the country around Nairobi and Naivaska, where his headquarters, Farm Americus, is situated, and he is enthusiastic over the manner in which the British Government has encouraged the breeding of good horses, especially those of the cavalry remount type in Africa.

"You will be surprised to hear," he said, "that in British East Africa the governmental authorities regard the thoroughbred horse as of more importance than humans; at any rate, the trains carrying stallions which are sent out from England to the experimental stations, or to be offered at public auction at the annual sales, have precedence over passenger traffic. One reason for this dispatch is the prevalence of diseases which affect horses, and the Government has spent millions in eradicating the plague, but it knows the importance of horse breeding and the part the thoroughbred plays in it.

"Most of the horses sent to Africa are of the larger type, as they are crossed on the Abyssinian mare, which will average more than 14.2 hands high," resumed Mr. Rainey. "They get some smashing good horses from this cross, the progeny having the best of feet and legs, and army officers tell me they cannot be improved for cavalry purposes. Some of them are gray in color, and this, of course, is a fault, but a majority are bays or chestnuts. They, of course, haven't as much quality as will be found among the same number of French horses bred for the army service, but they have the wear and tear qualities that war makes imperative. I saw about 4,000 head of South African remounts by thoroughbred sires and out of Basuto mares that were a magnificent collection, and they tell me that they can breed as good horses in that region as anywhere. Those that I saw were of uniformly hard color, with an occasional gray, and were from 15.2 to 16 hands. Horses that are bred in Africa can stand any climate in the world.

"They have four race meetings of three days each year at Nairobi, with a few days at the smaller towns at irregular intervals. There are contests on the flat and cross-country for both thoroughbreds and halfbreds and in addition they have races for what is called country breds, for which clean bred as well as halfbred horses raised in the region are eligible. The farmers of the district are enthusiastic sportsmen and most of them own horses. The scale of weights is high and as the competitions are of the keenest character the quality of sportsmanship is splendid. The entire countryside comes up to Nairobi for the meetings and open house is the order of the day. The farmers' associations in turn give meetings in the country and the hospitality is unsurpassed. Everybody rides in such a country and there is a chance for some good sport after the jackal with the Elkington pack.

"It is only natural under such conditions and with the government lending its encouragement that breeding is on the increase," said Mr. Rainey in conclusion, "and the thought has come to me that the breeding industry of the United States would be excellently served if we could have some races for halfbreds as well as thoroughbreds, particularly in the country districts where very frequently the farmer, who after all is a horse breeder as a rule, could have an insight into the sport and what it really means."

It is Mr. Rainey's intention after he concludes his work in Africa to take up his permanent residence at his Cottonplant plantation of 30,000 acres in Mississippi, where he breeds polled Angus cattle for the Chicago market and incidentally "makes" a few hundred bales of cotton and between whiles has time to enjoy as good quail and duck shooting as the United States affords. Racing has a strong claim on him too, and it is to be hoped that his colors will be seen again on the American turf.

A South Carolina Training Ground.

Palmetto Park, the Charleston (S. C.) race course over which regular meetings were conducted some seasons back, has been converted into probably the best winter training grounds in the country. The track has been kept in excellent condition since racing was abandoned at Charleston and later it has been improved and converted into purely a training ground.

The track is a mile, with broad turns, and it is kept in a condition that would make the holding of a race meeting at any time possible. It was at Charleston that George Smith, winner of the Kentucky Derby, was fitted for that effort, while Walter Jennings also made Star Hawk and the others of the A. K. Macomber horses ready there.

Harness Horses and Horsemen

Coast Champion Three-Year-Old for 1916.

The three-year-old filly Lulu B. by The Bondsman out of Loma B. by Stam B. is the fastest three-year-old trotter for 1916 on the Pacific Coast. At Fresno on Thursday of this week Lulu B. stood best in the summary of the 2:15 class trot, where she met a field of four aged trotters for a purse of $600. She won the second heat of this race in 2:11¼, the fastest by two seconds trotted by any three-year-old on the Pacific Coast this year. Lulu B. since her first start of the season in the Pacific Breeders' Futurity at Santa Rosa has been a most consistent trotter. She won that race, taking a mark of 2:13¼, was tied with Hermes at the end of the third heat of the Occident Stake at Sacramento, defeated that good colt in the Stanford Stake a few days later and was second to Hermes in the Pleasanton Futurity the following week, which was the last of the three-year-old stakes to be trotted. In four starts she won two races and was second in the other two. Although she was lame after her Santa Rosa race, owing to a curb, she trotted gamely and consistently in every heat in which she took the word, and from the speed she has shown as a three-year-old it is perfectly safe to predict that she will trot to a very low record before her racing days are over, provided no accident or illness prevents. She is owned by one of the most popular of Californians, Mr. M. L. Woy of Fresno, and there is no man to whom the horsemen of this State will extend with greater pleasure the honor of breeding and owning the fastest three-year-old trotter of the Pacific Coast for 1916.

$5,000 For a Yearling.

The best sale of the season for a yearling trotter was consummated September 15th, when John L. Dodge, of Lexington, bought of David H. Foushee, also of that city, the brown colt Peter Royal, paying for him the reported sum of $5,000. The youngster is a son of Peter Montgomery (brother to the fast trotters Peter W. 2:08½ and Sienna 2:06¾), dam Baronettie, by Baron Wilkes, second dam Nettie, the dam of the old-time trotting stallion, Jerome Turner 2:15½ by Tom Hal. The colt has been a member of the stable of the well known colored trainer, Ed Willis, who thinks him one of the best yearlings he ever trained. Willis worked him a quarter recently in 34¾ seconds and asked Mr. Dodge to drive him a few days after, Dodge saying that he had never ridden a mile better than 2:30 behind a yearling. The youngster reeled off a glib mile for him in 2:28¼, and this later resulted in his sale. The colt has been turned over to Mr. Dodge, who trains his own horses, and who will fit him for his futurity engagements the coming season.

Full Sisters by Zombro Trot in 2:10.

Congratulations to Secretary Knight of the American Trotting Association. His highly bred mare Fricka is now the dam of two 2:10 trotters. Fricka was foaled in 1901 and is by Bingen out of Annetell 2:20½ by Axtell 2:12, second dam Rowena Sprague by Gov. Sprague, third dam by Abdallah 164, fourth dam by Bellfounder 63. Mr. Knight sent Fricka to the court of Zombro 2:11 in 1908 and 1909 and got a filly each time. The one foaled in 1909 he named Fair Virginia and in 1914 she took a record of 2:07½ trotting. The foal of 1910 was named Erda and on Tuesday last Erda trotted to a record of 2:09¼ at Columbus, Ohio. To raise two 2:10 trotters from one mare is not a common occurrence and Mr. Knight is to be complimented for his success.

Races at Oregon State Fair.

A full summary of the races at Salem this week cannot be given to our readers until our next issue. On Monday Bonnie McCann won the two-year-old rtot, Salem Girl second. The 2:10 pace went to Zombrino, Hal Paxton second, best time 2:08½. Tuesday the 2:15 trot was won by Copius, best time 2:13. Greatness won a heat in the 2:18 pace in 2:10¼ and Joe Buckley won the other two in 2:11¾ and 2:12¾. Hal Logan was drawn after the second heat of this race. The 2:25 trot was won by Mark H. Guy Light took one heat in 2:15¼, which was the fastest of hte race, Mark H.'s heats being in 2:18¼ and 2:17½.

Races at Sonoma Half Mile Track.

There was a good attendance at the matinee of the Sonoma Valley Driving Club held at Sonoma on Sunday last, many from Petaluma and Santa Rosa being present.

The first race was for trotters and was won by Frank McGovern's Grace McKinney in straight heats, Ike M. second and King third. Time, 2:26½ and 2:27.

The second race had three starters, all pacers. Peaches, driven by J. McGovern, won the second and third heats. Glenwood Chief took the first heat. Belle M. was third each time. The time was 2:21, 2:21½ and 2:21.

Two pacers, J. Dupont's Hamburg Bell and L. Brubeck's Lady Stillwell, were the starters in the third race and the heats were split with a nose finish each time. Hamburg Bell won the first heat in 2:15¼, Lady Stillwell the second heat in 2:16 and Hamburg Bell the third in 2:16½.

A half mile dash for runners was won by Von Dillon, Ben Scoville, rider, in 51 seconds. Tommy Woods second.

Fresno Fair.

The annual fair at Fresno opened last Monday with a large attendance, which has kept up all the week. The exhibits are numerous and high class and the fair management has maintained its reputation of giving one of the very best county fairs on the coast. The harness racing has been good and has filled the grand stand to overflowing each day. Following are the results of the races which began Tuesday, and continued three days:

Tuesday, Sept. 26.

2:14 pacing, purse $600:

Julia M., b f by El Angelo.....(Allen)	3	5	1
Breezy Marie, b m by Athasham (Reynolds)	1	4	5
Dixon Boy by The Patchen Boy....(Smith)	5	1	6
Verna McKinney .....(Chadbourne)	4	2	2
Best Direct .....(Brolliar)	2	6	3
Babe .....(Delaney)	6	3	4

Time—2:13¼, 2:11¼, 2:11.

2:30 class trotting, purse $600:

Miss San Francisco, b m.....(Schwartz)	1	1	1
Doctor S., b g.....(Murphy)	3	2	2
Martina Dillon, s m.....(Reynolds)	2	3	3

Time—2:18¾, 2:15, 2:15¾.

Half mile dash, purse $100—Weed Patch (Neary) won; Badin (Burkes) second, Round Up (Acheiceus) third. Time, 0:49½. Pearl (M. Josephs), Fresno (Sullivan), Bessie Burrows (D. Riley), Bessie H. (Oskie Fain) and Fondello (McAdams) also ran.

Wednesday, Sept. 27.

2:10 class pacing, purse $600:

Pointer's Daughter, b m by Star Pointer.. ..... (Finley)	1	1	1
A. B. C., b g.....(Chadbourne)	3	2	2
Zomar, c s.....(Walker)	2	3	3
Best Direct, s s.....(Brolliar)	4	4	4

Time—2:10½, 2:11½, 2:09½.

Free-for-all pace:

Teddy Bear, b s by Del Coronado..(Smith)	2	1	1
Ben Corbett Jr., by Ben Corbett..(Finley)	1	3	3
Bold Harry Aerolite .....(Machado)	3	2	2
Vera Hal, b m.....(Cohen)	4	4	4

Time—2:07½, 2:06½, 2:07.

Free-for-all pace (ladies' race), first heat:

Nifty .....(Mrs. Lane)	1
Directress Mac .....(Miss Josephs)	2
Silente .....(Mrs. S. Harmon)	3
Firebaugh .....(Mrs. Russin)	4

Thursday, Sept. 28.

2:20 class pacing, purse $600:

Mono Ansel, b s by Monicrat.....(Finlay)	1	2	1
Dixon Boy, b g by The Patchen Boy(Smith)	4	1	2
Villa, blk g.....(Allen)	2	3	4
Silver Tips, b g.....(Walker)	2	5	5
Surety, b g.....(Gallup)	5	4	3

Time—2:09½, 2:08¼, 2:11½.

2:15 class trotting, purse $600:

Lulu B., br m by The Bondsman..(Quinn)	2	1	4
Lindsay Belle, b m by Bon Voyage(DeRyder)	1	3	3
Doctor S., b g by Carlokin.....(Murphy)	5	4	1
Dick W., b g.....(Schwart)	3	2	5
Elois Dell, b m.....(Smith)	4	5	2

Time—2:10¼, 2:11¼, 2:11½.

Free-for-all pace (ladies), second heat: Nifty, ch g (Mrs. Lane) first; Firebaugh, blk g (Mrs. Russin) second; Silente, b g (Mrs. S. Harmon) third; Time, 2:16.

One mile running, District Fair Derby, purse $200: First quarter won by Badin, time :25; second, third and fourth quarters won by Weed Patch, time :49½, 1:15½, 1:42½.

Running race, quarter-mile heats: First heat won by Queen, Belle second, Tom Woods third. Time, :23½. Second heat won by Queen, Belle second, Landlady third. Time, :24.

Hanford Program.

The Kings County Fair will open at the Hanford Fair Grounds on Wednesday next and there will be four days' racing over the half mile track with the following entries:

Wednesday, Oct. 4.

2:25 Trot—Dr. S., Dick W., Modesto Maid, Trigione, El Angelo, Jake Logan, Camelia, Miss San Francisco, Neal Hall, Ira Mac, Martina Dillon, Eloise Dell.

2:13 Pace—Verna McKinney, Soumise, Breezy Marie, Julia M., Hal J., Ben Corbett Jr., Nifty, J. C. L., Zomar, Silver Tips.

Thursday, Oct. 5.

2:10 Pace—Pointer's Daughter, McVerde, A. B. C., Teddy Bear.

2:25 Pace—Best Direct, Irene D., Villa, Harry Mac, J. C. L., Babe, Silver Tips.

Friday, Oct. 6.

Two special races will take place on this day.

Saturday, Oct. 7.

2:19 Trot—Trigione, Dr. S., Dick W., Modesto Maid, El Angelo, Camelia, Miss San Francisco, Hanford Mac, Eloise Dell.

Free-For-All Pace—Vera Hal, Leata J., Breezy Marie, Teddy Bear.

Al Schwartz' handsome little mare Miss San Francisco now has a winrace record of 2:15. She won three straight in the 2:30 class trot at Fresno on Tuesday.

Matinee in Golden Gate Park Sunday.

Four races have been carded by the San Francisco-California Driving Club for its matinee tomorrow at Golden Gate Park:

First race, 2:20 mixed—Matawan (J. McNamara), Minerva (M. Ford), Prospector (R. Kehoe), Dibble Wilkes (S. Benson), George W. (Frank Burton).

Second race, 2:12 pace—W. J. K. (W. J. Kenney), Emma M. (William Malough), Little Jack (George Conlan), Pointer Bell (J. M. Kidd), J. C. Simpson (Frank Goularte).

Third race, free-for-all—Bradmont ("Shorty" Roberts), King Pointer (H. Campodonico), Little Bernice (J. C. Welsh).

Fourth race, 2:15 pace—Senator H. (J. M. Kidd), Rosa O. (J. J. Ryan), Frank N. (L. A. Gielow).

Great Field in Transylvania.

Probably the greatest field of horses ever entered in the Transylvania stake, Lexington's celebrated fixture, has been nominated for this year's renewal. The great battle is looked for between Mabel Trask and St. Frisco, but Donna Clay, Al Mack and one or two others will give the leaders plenty to think about. The eligibles are: Mabel Trask, Al Mack, Bacelli, Nathan Axworthy, Virginia Barnette, Humfast, Alice Woodford, St. Frisco, Donna Clay, Sadie S., Grattan Boy, Laramie Lad, Alma Forbes, The Eno.

The New Standardized Buggy.

Hitherto each manufacturer of buggies has been "a law unto himself" as regards the styles of his product and the dimensions of the different parts entering into the construction of his vehicles.

The result of this practice did not work out as badly as might be imagined, because, although there was no definite agreement as to standardization of parts, the larger makers of buggies early saw the advantage of adhering to particular styles and dimensions of parts, and thus standardized their product so far as their own factories were concerned. Thus in case of breakage on any part of a buggy it was easy to obtain an extra part that exactly fitted, but this part had to be obtained either from the manufacturer of the buggy or one of the dealers representing him.

The Executive Committee of the Carriage Builders' National Association, at its convention last year, in Cleveland, Ohio, recommended that a standardized buggy should be adopted by the trade and that this buggy, wherever made, should conform in all its parts to a standard set of specifications drawn up under the direction of the association's special committee.

The matter was put in the hands of a special committee, who have been working out the details of standardization during the past year. This committee was expected to report at the annual convention of the Carriage Builders' National Association in Cincinnati, Ohio, the present week.

As soon as this buggy is put on the market by the different manufacturers, all dealers in vehicles and hardware, in cities, towns and villages, and even the cross-roads blacksmiths, will carry a supply of the standardized parts. It will then no longer be necessary for a buggy owner to hunt up any particular manufacturer or dealer when he is in need of a spare or repair part, as all dealers everywhere will keep in stock the axles, wheels, bolts, springs and other components of the buggy, every part guaranteed to fit without alteration or adjustment into its appropriate place in the standard buggy.

In order to show to what extent the new buggy will be standardized, it may be said that if a dozen of the vehicles were disassembled and the parts thrown into one heap, it would be possible to pick out the different parts at random, and reassemble the pieces into a dozen complete buggies, each of which would be identical with the others and perfectly fitted in all their parts.

J. C. Dinue, who has been superintendent of races at Spokane, Wash., Billings, Mont., and other points north, reports that the racing has been good and the crowds large. E. J. Woods has been doing the starting.

◈ ◈ ◈

The most talked-of performance at Lexington track this month was made by Trainer Hunter Moody, who worked two yearling trotters by the same sire, General Watts, each in 33 seconds, the performances being within a few minutes of each other. The first was the gray colt Dark Pearl, that trotted a quarter in :33, while a few minutes later the chestnut filly, Anne Watts, trotted in the same notch. Both fillies came from the same farm, too, having been bred by Gen. C. C. Watts from mares farmed from the estate of Alvin Hockensmith. Dark Pearl is out of Pearl Poindexter, dam of J. M. Johnson, and a half-sister to Bob Douglas 2:09¼, while Anne Watts was from Betty B. H. 2:29, dam of George Todd 2:07¾, Flo V. (3) 2:12, etc., and a half-sister to The Eno 2:06¾, Dolly Bidwell 2:08½ and Dictator Todd 2:08¼. Moody has five yearling trotters by General Watts and all have been quarters in 35 seconds or better. Olive Fant, a sister to Junior Watts 2:09¾ and Rose Watts (4) 2:10, two new 2:10 trotters for the year, trotted a quarter in :34¾, while King Watts, out of Rose Bingen and Strong Watts, out of Sonoma May 2:15¼, a sister to Sonoma Girl 2:04¼, trotted in 34¾ and 35 seconds, respectively.

Notes and News

Trotters and pacers racing on the California circuit will be at the Hanford two-lap course next week.

The Oregon State Fair closes at Salem today after a very successful week. Full summaries of the races will be given in our next issue.

W. P. McNair, of Phoenix, Arizona, has been starting the trotters and pacers at the Oregon State Fair races at Salem this week.

Elmo Montgomery won the $700 free-for-all pace at North Yakima with Jim Logan, best time 2:09¼, and got second money in the $500 2:20 pace with Hal Logan, winning the fastest heat of the race in 2:10¼.

Hal Logan did not do as well in his start at Salem last Tuesday as he did on the closing day at North Yakima when he won a heat and second money. He finished third and sixth at Salem and was then drawn by consent of the judges on account of lameness.

Will Hogoboom won a good race at North Yakima with the pacer Joe Buckley by Geo. A. Kelly's stallion Bonnie McK. We notice that a number of the get of this stallion are beginning to show up well in the races held in Washington and Oregon.

Ted Bunch got another "first money" with the pacer Zombrino on the opening day of the Oregon State Fair, winning in straight heats, the fastest in 2:08½. Fred Woodcock's pacer Hal Paxton, that raced at Santa Rosa and Dixon in August, was second in each heat and with the three others that started all were by Hal B.

Harness races with lady drivers have been a feature of the Fresno fair for years. We suggest that there is a record which the ladies might try for at Fresno with almost a certainty of lowering. We refer to that held by a pacing team driven by a woman. It is at this writing 2:28¼ and was made at the Columbus, Ohio, track this year. Some of those Fresno lady drivers should be able to put a pair of pacers together that can lower this mark.

T. L. Davidson of Salem, Oregon, has sold to John B Stetson for Ed Gerald of Kearney, Nebraska, the brood mare Adiola Mack by McKinney, dam Viola J. Cameron by Direct, grandam Addie S. by Steinway. Adicla Mack is the dam of Bonniola 2:15¼, that won second money at Yakima this year after winning the second heat of the race. Addie S. is the dam of three standard performers. Mr. Davidson still owns a three-year-old sister to Bonniola, and a two-year-old brother.

Mabel Trask and St. Frisco in their Grand Circuit duels this year have trotted the fastest five and six heat races on record, which fact attests their stamina, while their records of 2:03¼ for the stallion and 2:03¾ for the mare, made in the regular course of racing and not to see how fast they could go, are evidence of their extreme speed. Either trotter unquestionably could step a half-mile in less than a minute if asked to go that distance only, and each probably is up to a quarter in 28 seconds.

An award of $12,834 for damages arising from an accident to the trotting horse Gay Audubon, while training at the race track on the state fair grounds at Syracuse, New York, in 1913 was made by the court of claims this week to James Y. Gatcomb, owner of the trotter. Gatcomb had been invited to train his horses at the fair grounds. A contractor stretched across the track a cable against which the horse ran, injuring itself. Before the accident Gay Audubon had trotted a mile in 2:03¾. His fastest mile after the accident and down to the time of the trial was 2:14¼. He is now said to be rounding to and has recently trotted below 2:10.

During the present month All McKinney 2:04, the brown gelding owned by Mr. Barstow of San Jose, has started in two races where he has won a heat in fast time and then been distanced. At Hamline, Sept. 14th, where the purse was $3000, he started in a field of six high class pacers, among them Ben Earl 2:00½, Thos. Earl, Colleen 2:06¼ and others. In the first heat All McKinney got off three lengths back, but paced around the others and had the pole at the three-eighths. He did the last half in 1:02 and won in 2:06½. In the second heat Barstow took him to the half in 1:01¾, was at the three-quarter pole in 1:33½ and led into the stretch where Marvin Childs brought Ben Earl up and beat All McKinney a half length in 2:04¾. Barstow's horse was fourth in the third heat in 2:08¼, but made a break in the fourth heat and was flagged. At Columbus, Sept. 25th, All McKinney started in the 2:15 class pace for a purse of $800. He won the first heat in 2:06¼ but acted badly and was distanced the second heat.

Roan Hal 2:01¼ is the season's champion pacing gelding.

Nowaday (3) 2:14¼ is credited with ten standard performers, four of which are in the 2:10 list.

Zomblack started twice at the Palatine, Illinois, meeting this month, winning one race and getting second money in the other.

James W. McKinney, a black horse by Washington McKinney, won a race at Houlton, Maine, August 31st and took a trotting record of 2:19¼.

Graustark, by Aerolite, won a race at Napoleon, Ohio, half mile track August 30th, in straight heats. Time, 2:13, 2:12½, 2:14.

Bingen 2:06¼ now has both the fastest three-year-old trotter (Bingen Silk 2:07¼) and pacer (Sister Bingen 2:06¼) of the season to his credit.

Carletta, a three-year-old filly by Carlokin, won a heat in 2:21¼ at Topeka, Kansas, September 13th, and took second money in the race.

Bertha McGuire (2) 2:12, by The Harvester 2:01, is out of Berta Mac 2:08 by McKinney 2:11¼, the mare bred by W. Parsons and raced by Henry Helman of Salinas.

Lady Arabella, winner of the 2:30 trot at Youngwood, Pa., in 2:22¾, is by Alta Vela 2:11¼ and was secured by W. J. O'Neill, Pittsburgh, Pa., from Billy Durfee.

The Proof trotted a good race at Milwaukee in the $3000 stake for 2:12 class trotters. He was second three times and won the fourth heat, with the time from 2:11 to 2:12¾.

Jolly Bird 2:15¼, by Jay Bird, now ranks among the dams of two 2:10 trotters. Codero 2:09¾ was her first one, and this month she got credit for Fayre Rosamond 2:08¾.

Rozales, a bay mare by R. O. Newman's stallion Best Policy, won a race in straight heats and took a heat and second money in another race at Streator, Illinois, last month. Her best time was 2:21¼.

Gay Audubon (4) 2:06¾, the fast trotter owned by James Gatcomb, which was severely injured when turned loose by a groom, is now jogging sound again. This stallion was heavily staked this season and was in rare form this spring.

There is no questioning the fact that at the fairs the horses attract more attention than any other kind of live stock. The horse barns are always full of visitors and from ponies to the big drafters, the horses always have plenty of admirrse.

Marvin Childs has a good winner in Ben Earl 2:00½. He won the $3000 stake for 2:13 class pacers at both Milwaukee and Hamline, and then won the $3000 stake at Columbus this week where he took his new record.

In accordance with the By-Laws, the annual meeting of the American Association of Trotting Horse Breeders will be held in the circuit court room, at Lexington, Kentucky, Tuesday, October 3, 1916, at 8:30 p. m.

Wilkes Brewer 2:08¼ by Nutwood Wilkes closed her season's activities at Dawson, Pa., when she trotted the final heat of her stake engagement in 2:09¼. She annexed eleven consecutive events in 1916.

Julia M., the bay filly by El Angelo owned by Mr. D. W. Wallis, is getting into her true form. She stood best in the summary of the 2:14 pace at Fresno Tuesday, pacing the third heat in 2:11, the fastest heat of the race.

Washalla, a pure Arab horse, by imported Zeyol, dam Nonliker by imported Shahwan, has been winning three and six furlong races at the New York and New England fairs this summer in contests against thoroughbreds.

A correspondent says that the two-year-old trot on the opening day of the Oregon State Fair was a joke. There were only two starters who split the purse 50-50 before starting and the heats were in 3:16½ and 3:18¾.

Zom Jud, the Zombro stallion that has been winning in Nebraska and adjoining states during the summer, was bred by H. Dahl of San Diego, and is owned by J. W. Sampsell of the same place. His dam is Judith D. by William Harold.

Ima Jay 2:09½, Harvey Ernest's fast mare, won second money to St. Frisco 2:03¼ in the $5000 event for 2:08 trotters at Poughkeepsie, N. Y. Her showing, in this her first appearance on a mile track, was very gratifying, particularly so when one stops to consider that the first and third miles were in 2:05½ and 2:05, and that the field was a very select one. She is by Jay McGregor out of a mare by Rythmic, second dam by Norwood 522, son of Hambletonian 10.

Bingen 2:06¼ is the first stallion to sire a two-minute trotter and the dam of a two-minute trotter, the great family founder being the sire of Uhlan 1:58, and the sire of the dam of Lee Axworthy 2:00.

Babe Cresceus 2:12¼, winner of eight races in less than a month, was not trained previous to April of this year, but having so much natural speed on the road it was decided to give her an opportunity.

Bonnie Dee, the bay gelding by Del Coronado, that won the three-year-old stake at Syracuse, and took a record of 2:12½ in the third heat, is out of the mare Miss Griffith by Bonnie Direct that Mr. A. B. Coxe purchased some years ago from C. L. Griffith of Pleasanton.

Both of Mr. Geers' great stallions, Napoleon Direct 1:59¾ and St. Frisco 2:03¼, race with their ears pinned flat on their necks and impress one as being ready at all times to either race or fight. They are certainly two remarkably fast horses and, so far this season, neither has offered to make a skip.

Volga (2) 2:07¾ worked a couple of miles under 2:07 Sept. 8th and right now many think she can beat the world's record—2:05½—for age, gait and sex. Ben White is training the champion most carefully and plans not to work her within a couple of seconds of where she can go when under forced draft.

Not yet is the "passing" of the horse. It is said that by count there are 60,000 horses in the city of Detroit, and that the last fourteen years, in spite of auto-trucks and the 40,000 automobiles in the same city, the horses have increased from 13,000 to 60,000. It is further estimated that 83½ per cent of the road transportation of our country is still done by horses.

Diamond Mac 2:15¼ by Kinney Lou, is still racing. This horse was bred by Douglas Cone of Red Bluff, and was taken east some years ago. He is now thirteen years old. He took a record of 2:15¼ at Lima, Ohio, in 1912, when he was nine. He was beaten a nose in 2:15¼ at Laporte, Indiana, half mile track, September 1st this year.

The Stanislaus Live Stock Show and Exposition which was held last week at Modesto was a big success, and there is a cash surplus of between $3000 and $4000. There is no track at Modesto, consequently there were no races, but the show of horses, cattle, sheep and swine was large and excellent. There were about 22,000 paid admissions during the week, and prizes totaling $3000 were awarded.

An Illinois fair association has inaugurated a novel race for two-year-olds next year. The entrance fee on yearlings is $10 payable October 1st, 1916, and this payment may be made by cash or note, the note to bear no interest. The note will be due August 1st, 1917. The association is to add a sum to the entrance fees, and the winner of the race is to take the entire amount. The race will be half mile heats, best two in three.

Picking up 129 pounds H. C. Hallenbeck's little black horse The Finn by Ogden—Livonia, ran a game and true race in the Havre de Grace handicap last Saturday and won the mile and an eighth in 1:52 1-5 from James Butler's Spur, Harry Payne Whitney's Borrow, August Belmont's Stromboli, Andrew Miller's Roamer, J. W. May's Bayberry Candle and Emil Herz's Short Grass and Daddy's Choice in the order named.

Charlie Silva's little bay stallion Teddy Bear 2:05 is getting back into his old time form. The son of Del Coronado is now ten years old, and after a season in the stud at Hanford this year went into training about the first of July, his season not ending until June 15th. He won the free-for-all pace at Fresno on Wednesday of this week and paced the second heat in 2:06½ and the third in 2:07. There is little doubt but he could reduce his record if prepared for a fast mile.

Zomrect 2:06¼ is the sixteenth of the get of Zombro 2:11 to enter the 2:10 list. On his dam's side he is is a direct descendant of the mare Dolly McMann, that was owned by the Hon. F. L. Coombs of Napa, who bred her to Whippleton and got Lily Stanley 2:17¼, who was in turn bred to Direct 2:05½ and produced Lilly S., now dam of Zomrect by Zombro. Dolly McMann was brought to California many years ago as one of a pair of fine road mares and was said to be by Mambrino Patchen, but although Mr. Coombs made every effort to verify this statement and trace her breeding he could never do so, so she is in the books as untraced.

Tannic acid is one of the very best remedies for collar galls, according to L. S. Backus of the Missouri College of Agriculture. It can be secured from any drug store and is easily applied by rubbing lightly over the collar every morning and evening if the horse is working. Collar galls usually appear either at the top of the neck or at the point of the shoulder where an improperly fitted collar rubs. It is important that the collar be kept clean at all times in order that it may be kept from cutting into the neck, but special care in keeping it clean is necessary after these galls start. "An ounce of prevention is worth a pound of cure."

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Observe the Federal Laws.—If the sportsmen of the country observe the open and closed seasons on game they can feel certain that they will not be molested, while if they observe the state law—where the open seasons conflict with those issued by the Biological Survey—they take a chance of being arrested and put to considerable trouble and expense to defend themselves in court. Until the United States Supreme Court decides upon the constitutionality of the migratory bird law, it is safest to observe that law.

Law on Rabbit Season.—Conversation with visitors at the office of H. G. Merrill, supervisor of the Monterey national forest, King City, has brought out the fact that the law on rabbits is not well understood. The fish and game laws which are on file at the King City office for public consultation are very clear on the subject.

Section 626 of the penal code provisions forbids the killing or pursuing of cottontail or bush rabbits between January 1 and October 14, inclusive, but the section ends with a proviso reading as follows:

"Provided, further, that nothing in this section shall prohibit the killing or pursuing of any cottontail or bush rabbit by the owner or tenant of any premises, or by any person authorized in writing by such owner or tenant, but the rabbits so killed shall not be shipped or sold during the closed season."

The forest service believes that this law is just and reasonable, and that complaint has been made only because the law is not well understood.

There is, of course, no closed season on jackrabbits, but persons who hunt them must secure hunting licenses since jackrabbits are not included in the list of predatory animals which may be hunted without a license.

Civilian Marksmen Invited.—Washington, D. C.—Civilian marksmen have been invited to participate in the national rifle matches to begin at Jacksonville, Fla., October 11, under the auspices of the War Department. It was announced that the governor of each state had been asked to send one or more teams in addition to those from the National Guard, transportation to be paid by the government for one team or the money divided if a state sends more than one.

In spite of the fact that nearly all of the regular army and the National Guard are on the Mexican border, arrangements are being made for a big match. As many as possible of the army, navy marine corps and National Guard teams and individual marksmen who have participated in the past will be permitted to make the trip to Florida.

The series will include the matches of the Southern Rifle Association, the National Rifle Association, the National Individual match, the National Pistol match and the National Team match.

Too Much Game in France.—It will be generally remembered that the issue of licenses to shoot game has been suspended in France since the outbreak of the war, and the Ministry of Agriculture has lately received thousands of letters from soldiers in the trenches protesting against its resumption till the country is cleared of Germans; but hares, rabbits, and pheasants have multiplied so considerably that the crops are suffering, and the leave granted last year to rural proprietors to keep down the game without taking out licenses led to a considerable loss to the treasury through the cessation of shooting rents and license dues. It is expected that the question will be settled by issuing licenses valid during the last three months of the year, or, at any rate, for a shorter season than usual, with a system of day-to-day permits for soldiers on leave. Meanwhile grievances are being aired in the papers. One gentleman complains that last year, when they were not shot, the partridges scratched up his winter wheat and did much damage to his crops. Another points out that all wild duck and waterfowl should be shot to prevent them from migrating to Germany.

Patrolman Makes Big Catch.—Redondo Beach, Cal. Patrolman J. V. Henry has the reputation of being "some" nimrod as well as a policeman. Henry was fishing for yellowtail from Wharf No. 3, when he hooked a monster fish. After playing him for an hour, Henry was obliged to send word to his chief that he was unable to leave the big catch to go on duty at his regular hour. After playing the fish for one hour and forty-five minutes Henry brought it alongside the wharf and with the help of local fishermen gaffed the prize. The fish proved to be a yellowtail that tipped the scales at 57 pounds, the largest specimen of its kind ever caught in these waters. During Henry's exhibition of fishing the large crowd of fishermen on the wharf was thrown into excitement, and when the fish was pulled on to the pier they had to be pushed back so that the big catch might be brought up on the landing.

Alaska Game Laws Criticised.—Seward, Alaska.—The various territorial game wardens of Alaska have received official notice from Governor J. F. A. Strong, by order of the Secretary of Agriculture of the United States, that game regulations affecting moose in southeastern Alaska, on sheep and caribou on Kenai peninsula and the protection of deer on certain islands are extended to 1918.

All the caribou migrated from Kenai peninsula suddenly, and without apparent reason, years ago here that any regulations in effect or notices of such are a waste of good white paper, and will continue so, as long as the present complicated, unintelligent, confusing and altogether absurd game law exists.

A conviction for violation of the game law is impossible, even in the rare instances where the law is intelligible and reasonable, because the law itself specifically provides that "prospectors," "explorers" and "natives" may kill any kind of game at any time for food. Whenevr a violator of the game law is arrested, he merely pretends to be a "prospector," and this claim constitutes a complete legal defense.

Moreover, it is declared here that the game law is unfair and unjust in many particulars, the result being that it is not respected or observed. Some game, especially fowl, is protected at the only season an Alaskan has a chance to hunt it, and open when the game is hibernating or in distant climes.

Alaskans do not require a license to hunt, while other Americans who visit the territory from the states are required to pay a license of $50 a season for the privilege, besides other exorbitant and unreasonable fees for shipping out the game they are licensed to shoot. To ship out a moose or part thereof costs a visitor $150. Also visitors who hunt legally on Kenai peninsula must employ a licensed guide at $10 per day. Any Alaskan who will pay $25 for it can secure a license as guide. ALASKAN.

Portland Field Trials.—Chow's Chessie, belonging to Carl Liebe, and Mount Moring, belonging to Maurice Abraham, both English setters, carried off the honors in the first annual field trials of the new Oregon Field Trial Club concluded September 18th on the grounds about 12 miles west of Portland. The former won the all-age stakes with the latter taking the Derby.

Fleetwood Flip, owned by P. R. Whitesides, took second money in the all-age stakes with Bing N., a pointer, and Jack, an English setter, each equal third. Bing N. is the property of P. G. Nelond, and Jack is the pride of W. E. Martin, of McMinnville, Ore.

Rowdy, English setter, owned by Dr. E. W. Morris, was second in the Derby, with Nellie Gray, a pointer, owned by Henry Drennen, third.

Besides a division of the nomination and starting money, the first and second place winners will gather silver cups and the third place dogs receive medals.

In the competition there were seven starters in the all-age stakes with 13 competing in the Derby, making a total of 20 dogs. The Derby stakes was run off first with the first brace cast off at 8:42 Sunday morning. Following this, there were braces run all day, each one consuming 30 minutes until all dogs had competed in the first series.

By a process of elimination, Judge E. A. Parsons dropped out such dogs as he considered lacking in sufficient merit to carry them into the second series. Four braces of dogs were carried into the second series of the Derby, which started at 3:30 o'clock Sunday afternoon. These were completed and Count Moring declared winner.

Immediately on conclusion of the Derby, the all-age stakes was started, the first brace being cast off at 10 a. m. The first series was completed at 12:08, when the following four thoroughbreds were carried into the second series: Bing N. with Jack and Chows Chessie with Fleetwood Flip.

This second series in the all-age stakes was cast off at 2:10 o'clock Monday, and finished with Chows Chessie being declared winner at 3:05 o'clock.

Following are the 13 dogs which started in the Derby stakes for dogs whelped since January, 1915, and their owners: Bob Robs Billy, Frank Layson; Chehalem, Aaron Frank; Ned, Dr. Calvin S. White; Lady Maud, Frank Holcomb; Oregon Bob, F. A. Gaus; Romeo and Lavelette Lance, Thomas Howe; Bessie, Walter B. Honeyman; Robs Snag, L. R. Robinson; Rowdy, Dr. E. W. Morris; Nellie Gray, Henry T. Drennen; Count Moring, Maurice Abraham; Liebes King, Carl Liebe.

Here are the thoroughbreds that answered the first call in the all-age stakes: Fleetwood Flip, P. R. Whitesides; Bing, P. G. Nelond; King, William Hilgers; Jack, W. E. Martin; Chows Chessie, Carl Liebe; Rose Marie, W. E. Carlon; Irish Bill, M. R. Knox.

More than 200 dog lovers were in the gallery Sunday the 17th, with a goodly number laying off work to follow the hounds. The next field trials will be held next fall.

INTEREST IN SAN JOSE DOG SHOW.

Many Entries Already For the Exhibition on October 11th and 14th.

Entries in the dog department of the San Jose show to be held at the auditorium rink October 11 to 14 are far in excess of similar entries of previous shows at this date.

The fact that the show committee is bringing an expert dog judge from across the Atlantic—W. J. Phillips of Birmingham, England—has stimulated interest in the exhibition to no small degree. Mr. Phillips will leave England on the steamer St. Paul, arriving in this country about October 1. Judges from England have officiated here in California before, but they have always been men who happened to be in this country on other business and incidentally came to the coast to officiate as judges. Mr. Phillips has a reputation that is world-wide in Airedale terriers and is one of the few first-class, all-around dog judges in England today.

Even the best of English judges are not familiar with that popular American breed, Boston terriers, so the show committee has engaged for Bostons a specialty judge, one who has bred Bostons of the better sort for a number of years, who is up-to-date in his ideas about them and who will play no favorites—H. I. Burton of Los Angeles.

The entry fees cover all charges for feeding the dogs, caring for them during the show, for judging and benching, and a season ticket for the exhibitor. This year the show committee is making an especial appeal to those who have never shown their dogs at a bench show, assuring them every attention, a square deal and no favoritism, in all matters consistent with the rules, which are those of the American Kennel Club, under whose patronage the show will be held.

The rabbit show under the auspices of the Pacific Pet Stock association and conducted by the San Jose show committee promises to be the largest ever held there. The entry fee includes copying, feeding, caretaking, judging and season ticket of admission for the exhibitor. The prime object of the rabbit show is to stimulate interest in the industry throughout the valley.

Premium lists and rules of the combined shows may be obtained upon application to Show Secretary Charles R. Harker. All entries close at midnight, Saturday, September 30.

It is said that the Germans have imposed a tax on dogs in Belgium and the occupied territory of France at 30 shillings per head(and if the tax is not promptly paid the dog is confiscated and killed, the skin being retained for fur and leather, and the carcass for sausages and what not. The French leather journal, "Le Cuir," states: "Whosoever is not willing to pay this tax is compelled to deliver his dog to the military authorities, whereupon it is killed. The skins are transported to the German glove factories, while from the grease oil is made for motor cars. In the region of Lille several cars full of dog skins have been seen on their way to Germany."

Portland Dogs at Spokane Show.—Fifty-two ribbons and eight silver trophies were brought back to Portland by the fifteen Portland-owned dogs which were exhibited at the annual Northwest kennel show at Spokane, Wash., September 4-7. The dogs were in charge of C. R. Campion, of the Leitrim Kennels, and he has return home with the squad of dogs.

More than 160 dogs were on exhibition, and the fifteen Portland dogs gathered in three times more honors than the rest of the entries combined. Dr. Clayton, of Chicago, was the judge. He awarded one of W. B. Fechheimer's fox terriers the honor of being the best dog of any breed in the show.

J. R. Adamson's English bulldog, Fingall, was the best bulldog on exhibition and received a handsome cup. Two dogs owned by Natt McDougall were responsible for eight ribbons being awarded to Portland.

The Portland dogs were taken to the Leitrim Kennels on the Base Line road and will be kept there until ready to be shipped north again.

Bear Blown Up by Dynamite.—Livingston, Mont., Sept. 12.—Frank Welch, a Government teamster, died today in the military hospital at Mammoth Hot Springs, Yellowstone National Park, as a result of a mauling received last Friday night from a bear, according to advices received here today.

A few hours later the bear was blown to pieces with dynamite by Welch's companions .

Welch was asleep under a wagon loaded with supplies for the troops in the park when he was attacked by the bear. Two drivers who were with Welch drove the animal off, but knowing the animal would remain, they placed dynamite, connected with a small electric battery, under a pile of army bacon, a short distance from the camp. When the bear returned the trap was exploded as he nosed the bait.

While it is of course unfortunate that a man's life should be necessary to make the example, this case will no doubt keep hunters and woodsmen on the alert so that bears or other ferocious animals will be dynamited before like damage is done, is they can't be caught otherwise. Naturally hunters want to shoot them.

TRAP SHOOTING CLOSES HERE.

Henry Stelling is High Gun at Alameda Elks' Club's Banner Merchandise Event.

Trapshooting activity around the bay points was brought to a successful close last Sunday at the Alameda grounds when the Alameda Elks' Club staged a merchandise shoot. Seventy-one gunners faced the traps and one of the most enjoyable days of the season was in order. It was an appropriate setting for the scatter-gun artists to conclude their season. Certainly the sport was never more prosperous and interesting than it has been during the past five months.

Henry Stelling, who has been consistency itself, was there with a 49 out of 50 score to be high gun for the day. Close behind came H. R. Phinney with a 48 x 50 score. There was some exceptionally fine blue-rock busting on exhibition. Bill Ellis set the pace for the professionals with 46 out of 50.

The Alameda Elks were hosts at a luncheon and when the last target was fired there was a prize for everyone who participated in the competition. The prizes were drawn by lots and there was a lot of fun as the orders were made out. The scores were as follows:—

Shooter—	25	25	Ttl
A. A. Durney	18	23	41
R. T. Boyd	21	17	38

Trapshooting in the Navy.—It doesn't seem so long ago that we were startled from our normal train of thought on reading that some trapshooting fans aboard one of Uncle Sam's ships had taken to trapshooting to help pass the time away. Much was said about it at the time, but the general opinion seemed to exist that it was a passing fancy and wouldn't amount to much.

Time, however, has exploded the fallacy of this reasoning, and each day we see fresh evidence of the growing popularity of the sport among the officers and men on our battleships. To Paymaster F. P. Williams must be accorded the palm of being the most enthusiastic "gun bug" of them all. At one time he was located at the U. S. Naval Hospital, Las Animas, Colorado, where he was introduced to and formed a great liking for the sport of trapshooting. He soon became known as one of the most prominent clay target men of that section.

Then he was transferred to the U. S. Hospital Ship Solace, but never for an instant did his allegiance to trapshooting falter, and the limelight has continued to shine upon him, for it is seldom that a month passes that he does not originate some new idea, or engage in some new trapshooting activity. Nor does he court the limelight, for he is a modest and retiring individual withal.

After getting several of his brother officers on other ships interested in trapshooting, he helped them organize gun clubs on board their boats, and it is now recorded that in addition to the one aboard the Solace, clubs have already been formed aboard the U. S. S. Arkansas, New York, Florida, South Carolina, Texas, Wyoming, Oklahoma, Cheyenne and Glacier.

Not to be outdone by the "land lubbers" with their registered tournaments, and other large shoots, it came to Paymaster Williams that the navy shooters should have a registered tournament of their own. Application for same was made to the Interstate Association at Pittsburgh, the Interstate Association being the governing body of trapshooting. The registration was granted, and the shoot held at Guantanamo Bay, Cuba, in March, when many of the vessels of the Atlantic Fleet were at the proving grounds there. Several squads of five men each participated and the tournament was an unqualified success, to be repeated at a later date. Paymaster Williams became the "Champion of the Navy" at this shoot.

At the suggestion of the Paymaster and others, E. I. DuPont de Nemours & Company presented the trapshooters of the navy with a magnificent sterling silver loving cup trophy to be contested for in a series of team shoots. The cup stands 15 inches high, and while of a conventional design, its quality and massiveness are impressive. The team from the U. S. Solace composed of Paymaster Williams, Surgeon Woods and Surgeon Strine recorded the first win on the Du Pont Trophy, registering scores of 83, 73 and 62 respectively. It is known that the teams of several other ships are practicing diligently with the idea of overthrowing the Solace shooters the next time there is a competition for the cup.

Ask any trapshooter in the navy what he thinks of trapshooting on board boats, and he will tell you it's the thing. So we can expect that the sport will eventually become general, and that every one of Uncle Sam's battleships will have their trapshooting club. There are few sports that present the opportunities for enjoyment equal to those of trapshooting, which can be indulged in anywhere and any time, on land or sea, whenever the spirit moves the enthusiast.

Westy Hogans Shoot.—The tenth annual tournament of the Westy Hogans, which was held at Venice Park, Atlantic City, N. J., on September 12, 13, 14, 15 and 16, was a howling success and every member of the clan is happy over the result.

This year the number of targets that were thrown exceeded the previous record by something like 3000, the figures being as follows: 1915, when the largest number were thrown at a Hogan tournament up to that time, 162,000; 1916, 165,000.

The total number of entries this year was 290, three more than in 1915, and 19 less than the record —309—which was made the last year the shoot was held on the pier.

Many good scores were made. High amateur average was won by Fred Harlow of Newark, O., he scoring 491x500.

The state team race was won by New Jersey and the Westy Hogan Championship by R. D. Morgan of Washington, D. C., on 100 straight and 40 straight in the shoot-off with Fred Plum of Atlantic City, who scored 39x40.

The leg on the Atlantic City Cup and $50 in gold were won by Fred Harlow on the third day, he scoring 173x175 targets, which, let us assure you, is pretty fine work for an amateur.

J. G. Martin of Harrisburg, Pa., and F. A. Landis tied on 96 each in the Westy Hogan Handicap, Landis winning the shoot-off, 19 to 18.

Peters' Pointers.—At Livermore, Iowa, Aug. 22, high general average and high professional averages were won by Mr. D. W. Flannigan, 141 ex 150, using Peters factory loaded shells.

At the Neaf Apgar Testimonial shoot, given by the Smith Gun Club, Newark, N. J., Aug. 26, high amateur and high general averages were won by Mr. L. Morford of Newton, N. J., 170 ex 175; Mr. Geo. Tuckett second amateur, 168, and Mr. L. W. Colquett third, 167. Mr. Wm. Trowbrodge of Newark won the Shanley Cup, 99 ex 100; all these winners shot the "P" brand shells

At the final tournament of the Central Ohio Trapshooters' League, Circleville, Ohio, Aug. 29, Messrs. C. A. Young and W. R. Chamberlain, shooting Peters shells, tied for high professional average, 96 ex 100.

High amateur average at Grand Rapids, Minn., Aug. 29, was won by Mr. W. E. Rowe of Crookston, scoring 145 ex 150. Mr. H. Bernard of Warren, Minn., tied for second amateur average, 144, and Dr. F. H. Allen of Staples, Minn., was third, 143; all using Peters shells.

COAST HANDICAP MONEY WINNERS.

Preliminary Handicap—42 entries at $5, $210; 4 penalty entries at $7, $28; 2 penalty entries for targets only at $2, $4; 20 entries for targets only—68 total entries, $242. Added to the purse, $100. Total purse, $342.

H. Lorenson, score 91, won $75; C. Leith, 90—$49; P. H. O'Brien, 90—$49; F. M. Troeh, 90—$49; D. J. Holohan, 89—$30.75; O. N. Ford, 89—$30.75; C. A. Fleming, 88—$17.10; A. A. Riehl, 88—$17.10; W. K. France, 87—$7.90; F. Templeton, 87—$7.90; J. W. Seavey, 87—$7.90.

Pacific Coast Handicap Purse—49 regular entries at $8, $392; 1 penalty entry at $12, $12; 1 penalty entry for targets only, $2; 39 entries for targets only—90 total entries, $406. Added to the purse, $200. Total purse, $606.

F. Templeton, 91—$133.50; W. K. France, 90—$109; M. A. Rickard, 89—$84.85; C. L. Templeton, 88—$58.60; A. P. Haliburton, 88—$58.60; P. H. O'Brien, 88—$58.60; E. D. Farmin, 87—$30.30; H. R. Everding, 86—$30.30; D. J. Holohan, 85—$21.20; H. McElroy, 85—$21.20.

Trophy Winners.

Pacific Coast Introductory—O. N. Ford 96, first; H. Lorenson 96, second; H. McElroy 96, third.

Pacific Coast Special—P. H. O'Brien, 96, first; F. M. Troeh 95, second; C. F. Egbers 93, third.

Pacific Coast Overture—F. Templeton 91, first; D. J. Holohan 90, second; W. W. McCornack 90, third.

Preliminary Handicap—H. Lorenson 91, first; C. Leith 90, second; P. H. O'Brien 90, third.

Pacific Coast Handicap—F. Templeton 91, first; W. K. France 90, second; M. A. Rickard 89, third.

Ladies' Trophies—Miss Gladys Reid 76, first; Mrs. Ada Schilling 71, second.

Seattle Association.—Breeder and Sportsman:—Owing to the opening of the upland bird season, with most of the shooters out in the fields and many of the shooters recovering from the strenuous shooting at the Pacific Coast Handicap, there were only a few nimrods on the firing line on Sept. 17. This was the first shoot for the past two weeks owing to moving the location of the clubhouse and traps. The scores were:

At 50 targets—Hugh Fleming 45, J. V. Hough 39, W. B. Taft 38.

At 100 targets—Hugh Fleming 94, W. B. Taft 74.

Wednesday, Sept. 13th, at 50 targets—Dr. Newton 43, W. B. Taft 43, Dr. Ashton 29, H. Ladas 6x25.

Yours, E. A. FRY.

Season Closes in Portland.—Portland (Or.).—With the Pacific Coast Handicap shoot a thing of the past, local sportsmen are congratulating themselves that the Portland Gun Club has passed through its most successful season, both from a financial and from a shooting standpoint.

The Pacific Coast handicap tournament which closed here marks the last of the season's big events for the Portland Gun Club. Although the attendance fell below that of 1914, the last year Portland held this Coast classic, it surpassed the same event staged at San Diego last year, and was handled in a most praiseworthy manner.

The extremely late date is accountable for the lesser attendance, it is believed (in 1914 it was held in July) and was responsible for the lesser number of entrants who shot in the Pacific Coast handicap.

T. E. Doremus, of Wilmington, Del., president of the Interstate Association, which is the governing body of the organized trapshooting clubs, had the following to say concerning the shoot:

"Although Portland fell below the number of entrants it had at the same event in 1914, that has nothing to do with the success of the event. I have seen much larger entry lists which were not the success this was.

"The good fellowship manifested, the method of handling the different events, and many other things enter into its success. I can truthfully say that I never attended an event which was run off in better order, and where there was better feeling among the different entrants. I like Portland and its surrounding country, and while the Pacific Coast handicap will not be held here next year, if the Portland Gun Club stages some of the events it now proposed to do, I will certainly try and make the trip across the country and attend. The Portland Gun Club, which handled the Coast handicap, is one of the livest organizations of its kind in the United States, and is known as such all over the country among the shooting fraternity."

Officials of the local organization haven't yet figured up receipts of the event, but believe that in addition to the moneys derived from other sources which were paid out, the Portland Gun Club would have between $200 and $300 expense in the shape of prize money it paid.

It is figured that in the neighborhood of 45,000 targets were thrown from the traps in the regular three days of shooting.

One thing which made an especial hit with the out-of-town shooters was the fine lunch which was in charge of wives of members of the Portland Gun Club. Everything was perfect in its appointments, and it caused no little comment.

The absence of Phil Baltimore, of Albany, a veteran trapshooter past the 70-year mark, was noted. Phil has never missed a Pacific Coast event before, in the memory of veteran shooters, and there were many who noted his absence and inquired for him.

Sportsmen's Row

The place where the 1917 Pacific Coast Handicap will be held will be decided at the meeting of the Interstate Association scheduled for Pittsburg, Pa., December 7th. Clubs who desire the shoot must have their applications in to the Association at 219 Coltart Avenue, Pittsburg, not later than Dec. 1.

• • •

According to the Salinas Index, to William Casey Jr. of San Lucas belongs the title of having killed the biggest buck of the season. The deer weighed 232 pounds dressed, which is some size for a coast deer. Few are ever killed along the coast that weigh more than 232 pounds. This particular deer has escaped many a leaden missile until Casey fired the fatal shot.

• • •

The Breeder and Sportsman appreciates and thanks the Remington Arms-Union Metallic Cartridge Company for a copy of its "Game Laws in Brief," which gives the open season on game in each State, the migratory bird law, the Lacey law and much other matter of interest. The booklet is one of value to every sportsman and angler, and can be had for the asking by addressing the company, 233 Broadway, New York, and stating what you want.

• • •

When asked if the Portland Gun Club was going to make an attempt to handle the 12th tourney, A. W. Strowger, president of the organization, announced that he had nothing whatever to do with it, as he had worried enough over the present gathering. The next lot of officials will have their hands full trying to make up their minds for future plans. The officials of the Portland Gun Club who are responsible for the 1916 Pacific Coast handicap are A. W. Strowger, president; H. A. Pollock, vice-president; Frank M. Templeton, secretary-treasurer, and Henry R. Everding, ex-president.

• • •

The Everding Park traps will have a busy season next year, even though the Pacific Coast handicap may not be shot over the Portland traps. The Pacific Indians will gather in Portland in the middle of July and in June the Northwest Sportsmen's Association tourney will be in progress, in all probability during Rose Festival week.

• • •

The next shoot of the Northwest will be held at Palouse, Wash., on October 16th. Several Portland professionals are planning on making the northern journey, but it is not likely that any of the amateurs will be in the party. E. B. Morris, of Portland, has been delegated to make most of the final arrangements for the event.

• • •

In the recent Grand American Handicap, youth and old age stood side by side. W. E. Phillips, Jr., 12 years of age, was the youngest contestant, and Captain W. E. Brietenstein, the only living survivor of the Merrimac, was the oldest of the trapshooters.

• • •

Ten schools and colleges are now enrolled in the membership of the American Amateur Trapshooters' Association.

• • •

The best average—amateur—for one season is the 95.50 by Woolfolk Henderson, of Lexington, Ky. He broke 2731 of 2800 targets. The best professional record is held by C. G. Spencer—97.50 at 5620.

• • •

The longest run ever made by a trapshooter was compiled by Charley Spencer at the Viola (Ill.) shoot in June, 1913, when he broke 528. Ray Kingsley, of Omaha, has a run of 518 to his credit, and Jay Graham once hit 477 before missing.

• • •

A record for shooting at 1000 targets was made when Alex Mermod, of St. Louis, and Fred Stone, the comedian, met in St. Louis on a cold day in April, 1908. Mermod broke 929 and Stone 901 targets, and the time consumed was one hour, 30 minutes and 23 seconds.

• • •

Very few of the Eastern trapshooters attend the Grand American trapshooting tournament when it is held in the Middle West, and there are some trapshooters who think that it would be a wise move to bring the tournament to the East and see how the shooters would turn out.

• • •

The national amateur championship event—for State champions only—is the best idea in recent years as far as trapshooting goes. It is the classic event of the G. A. H.

• • •

In a recent tournament of the Los Angeles Gun Club Miss Allen Wheeler, with a 20-gauge gun, broke 98 targets of 100 thrown in the afternoon and 48 out of 50 thrown in the evening under electric lights. That is what you might term "class."

• • •

The longest run of the year—amateur or professional—was made by Fred Plum, of Atlantic City, N. J., at Maplewood, when he ran 283; 100 of this number was from 21 yards.

Ernest Schaeffle, for twelve years connected with the California Fish and Game Commission, has resigned as executive officer of that body. No reason was given by Mr. Schaeffle for his action. J. S. Hunter, assistant executive officer, is attending to the duties of the executive officer pending action by the Commissioners.

• • •

The trap season is finished in many sections and now the hunters of California will be turning their attention to ducks and quail, which come in next month.

• • •

George K. Gilmore, the one-armed shooter of the Wallace (Idaho) Gun Club, is out with an offer to shoot for money, marbles or chalk any one-armed shooter in the country.

• • •

Ever try a plunge into a tub of cold water when you awaken from a peaceful slumber? It's great, so claim Al Cook and Fred Willard. They gave Dick Reed the treatment at Del Monte but neglected to give Dick due warning and they were unable to secure his testimonial.

Steelhead Trout Prospering.—One of the first official acts of Frank M. Newbert, president of the State Fish and Game Commission, after his appointment in 1911, in stocking the American river above Folsom with 200,000 steelhead trout, is now bearing fruit. The steelhead or "sea run" trout are now numerous in the American and Sacramento rivers, after having been driven from these waters by hydraulic mining operations.

In pioneer days the American river literally teemed with the "sea run" trout. Hydraulic mining eventually deposited such large quantities of debris and muddy solution that the trout were driven to other waters. Since hydraplic mining has been stopped and the water in the American is clear again at the season of the annual run of these fish, they are again on the increase.

According to Newbert, the Sacramento river below the mouth of the American and the American river are now populated with large numbers of these fish. They are so numerous that they are being caught in the fishermen's nets in the Sacramento river. Large numbers are being caught by anglers who are angling for other varieties of fish.

The steelhead trout range from one to 12 pounds in size. Newbert is of the opinion that some of the smaller sized fish are of the last planting, which was made in July, 1915, when 600,000 were planted in the American river near Salmon Falls and Mormon Island.

Mr. and Mrs. Topperwein Great Shots.—Mr. and Mrs. Aloph Topperwein, noted experts with shotgun, rifle and pistol, are giving exhibitions of their prowess in the middle west. Topperwein, one of the greatest living fancy and flying target shots with rifle, pistol and shotgun, is a native of Texas, his home being in San Antonio. His native State has long been noted for its good shots, which doubtless accounts for his early acquiring the great skill he has displayed in his exhibitions. Topperwein uses ordinary Winchester rifles, shooting a solid ball, or, in other words, the regular cartridges such as an individual would buy of his local dealer. The targets he shoots at comprise oranges, apples, bits of coal, walnuts, small marbles, empty cartridge shells and other tiny objects, which are thrown into the air and hit with bullets from his rifle or revolver.

On thirteen occasions Topperwein has broken the world's record shooting flying targets with a rifle. He has hit 4,954 1¾ inch targets out of 5,000 thrown into the air at a distance of 25 feet; and shooting at 10,000 2¼-inch blocks thrown at the same distance he missed only one. In the most marvelous exhibition ever known, Topperwein shot at 72,500 blocks like the above in ten successive days, missing only four out of the first 50,000 and only nine out of the entire lot. He made straight runs of 13,219, 13,599 and 14,540. A remarkable feat performed by Topperwein, which arouses great enthusiasm, is the drawing of Indian heads in perfect outline with rifle bullets. This is done in rapid time—just as fast as Topperwein can pull the trigger of his Winchester repeater.

Mrs. Topperwein has been shooting only a few years, but already has developed into the most expert woman shot of the world. She shoots with shotgun, rifle and pistol, being equally skillful with all. With the rifle she has scored 1,995 hits out of 2,000 2¼-inch blocks thrown into the air at a distance of twenty feet, making a straight run of 1,437. With the shotgun she has scored 100 straight a great number of times, her longest straight run being 226. She has won many high averages in open competition, shooting on equal terms with the best professional and amateur shots in the world.

At the Pacific Coast Handicap held at Seattle, Wash., in 1910, Mrs. Topperwein won high average over a large field of the best shots of the Pacific coast and Canada. On the first day of this shoot she made the remarkable score of 195 out of 200, which included twenty doubles, and on the final day broke the entire programme of 100 singles straight. Her score at the Grand American Handicap in 1910 was 96 out of 100, shooting from nineteen yards.

At the Eastern Handicap in 1913 she outshot the field of over 250 shooters by scoring 98x100 from nineteen yards. During that year she shot at 10,000 targets, scoring over 95 per cent.

WASHINGTON GAME COMMISSION PROSPERS

Licenses Fall Off From 1914 Mark But Hunting and Fishing Conditions Improve.

Spokane, Wash.—Marked improvement is shown in the game and fishing conditions throughout this state for the fiscal year ended February 28, 1916, according to reports made by the county game wardens to State Game Warden L. H. Darwin. While hunting conditions show an improvement during the early part of the year, the unprecedented winter served to curtail activities along that line, and in the opinion of most of the game wardens will decrease the bird supply this year.

To the bad winter is also ascribed the cause for the reduction in the grand total of hunting and fishing licenses issued for the fiscal year of 1915, which was 124,691, as against 124,901 in 1914; a decrease of 210.

During the year there was a slight increase in the number of arrests for game law violations, there being 1074 in 1915, as against 970 in 1914. The percentage of convictions secured in 1915 was 79 per cent, there being a total of 848 resulting from the 1074 arrests. In 1914 there were 83 per cent of those arrested in that year that were convicted.

The number of county licenses decreased 75, there being 122,249 county fishing and hunting licenses at $1 issued in 1914, and 121,490 in 1915. To compensate for this, however, the number of resident county fishing licenses, at $2 each, increased, 64,94 being issued in 1915 as against 877 in 1914.

The number of state licenses issued at $5 each in 1915 increased 470. The number issued in that year was 2220 as against 1750 in 1914. While the non-resident state licenses at $10 increased from 25 in 1914 to 40 in 1915.

The increase in the number of state hunting and fishing licenses issued is ascribed to the fact that under the new law the county issuing them gets 2 per cent of the license fee, which makes it slightly more profitable to issue a state license than to issue a county license, and the authorities therefore encourage the taking out of state licenses instead of county licenses.

Of the grand total of all hunting and fishing licenses issued, 76,782 were in western Washington and 47,909 in eastern Washington.

The cash balance in the state game fund March 1, 1915, was $25,882.48. The receipts of the state game fund during the year was $27,803.98, making a grand total of $53,686.46. The disbursements for the period ending February 29, 1916, were $28,454.34, leaving a cash balance in the state game fund March 1, 1916 of $25,232.12.

The last legislature appropriated a total of $48,000 from the state game fund as follows: For the expenses of the state game warden's department, for the maintenance of trout hatcheries, for the erection and maintenance of rearing ponds at the Walla Walla trout hatchery, for the erection, equipment and maintenance of the Tilton river trout hatchery in Lewis county.

Based upon the receipts of 1915, there should be in the state game fund March 1, 1917, in the neighborhood of $47,000, any part of which will be available for the construction of a state game farm should the legislature decide it would be advisable.

King county led all other counties in the amount of receipts in its county game fund, receiving therein $15,658.13. The next was Snohomish county, with receipts amounting to $9,025.16. Spokane county led in eastern Washington, with receipts amounting to $8,269.23. These amounts include fines, etc.

New World's Surf-Casting Record.—With the close of the tenth annual casting tournament, held under the auspices of the Asbury Park Fishing Club, at the casting grounds, Deal (N. J.), on August 4, 1916, a new casting champion in the person of E. E. Davis of the Asbury Park Club, was crowned and the former world's record of 379 feet 8 inches made last year by Dr. Carleton Simon, of New York City, was broken four times—three times by the present champion E. E. Davis and once by a youngster, Charles Elinghausen, of the Midland Beach Fishing Club.

Davis cast in succession 380 feet, and 384 feet 4 inches, only to have his record broken by young Elinghausen with a cast of 384 feet 10 inches, Davis later breaking this record with a cast of 388 feet 6 inches. Then to show he was still there he broke his own record with a cast of 392 feet 6 inches, which now stands as a new world's record.

Dr. Carleton Simon, the former champion, failed to show his usual good form, which was a big disappointment to his large following of friends.

The King is dead, long live the King.

Bass Swallows Snake.—Buckeye Lake, in Ohio, yielded somewhat of a novelty in the fishing line last week that caused considerable curiosity among the cottages there and among Guy Wheaton's friends. Wheaton was "flippin'" at the lake and hooked a three-pound bass. When he got the big fellow into the boat he was astounded to find that he had tackled a water snake 21½ inches long, although the fish itself measured but 17½ inches. Mr. Big Mouth had conquered his snakeship and had swallowed it, but it evidently was too big a mouthful, as a portion of the snake was still in its mouth and part of it had been digested in the fish's stomach.

CONFLICT IN DUCK SEASON OPENING.

ederal Law of October 16th Will Take Precedence Over State Law, October 15th.

Duck hunters have been wondering for some days ast about the opening of the season. They have stened with glee to the following reports of birds eing more numerous than in years past and now hey are puzzled as to when they will be permitted o get out the old pump gun and go after them.

The State law is to the effect that the bars will e lowered all over California on October 15th. Now omes the federal migratory regulations setting forth hat the season does not come in in California until ctober 16th. At the office of the Fish and Game ommission it is explained that an effort will be ade to straighten out the confliction but in the eantime the federal law takes precedence. Hunters ill accordingly play safe by waiting until the 16th efore turning loose with both barrels.

State regulations will rule regarding limits of 25 er day and 50 ducks and geese per week. For onkers and sea brant it is 12 per day and 24 per eek.

Reports have come in of canvasbacks and blue ills being seen in the marshes around the bay even ow. H. C. Bryant of the Fish and Game Commision is much surprised at their early arrival this ear.

He has some other information about ducks which ill interest hunters. It has been supposed that reen-wing teal never nest in this section of the tate. Bryant made a study of the birds in Alvarado wamps and discovered that a great many of the reen-wings nested there. He secured eggs from his swamp that have brought out sure enough green ins.

Los Banos is not getting as many ducks as once pon a time. Sprig and teal drop in, but the bigger irds, mallards and "cans," prefer deeper waters nd sail over. That is one reason, say the wise nes, why the Sacramento and Imperial sections have o many fine, big birds—deep water.

If you want to go after quail, as many of the nimods will, it is safe to select Sunday, October 15th, s the date. The season on valley and desert quail omes in all over the state. Reports are promising or some interesting sport. The limit is 15 per day, 0 per week.

Dove hunters in the northern counties continue o bring in sad stories about lack of birds. They ave until November 30 to hunt the birds but the outlook is not bright for the sport to improve. An effort will be made next season to have the opening ate moved forward to August 1st instead of September 1st, as was the case this season.

The deer season is rapidly drawing to a close and n view of the adverse weather conditions last season no complaint can be made about the game. Many bucks have been brought down and does have been plentiful in all sections. In districts two and three, which comprise the coast sections, the bars went up on September 14th, and in district four the last of the month is closing time. One and twenty-three remain open until October 14th.

San Jose Club.—A three-day tournament with registered events on Monday, opened at the San Jose Blue Rock Club on Saturday. It was practice day and O. N. Ford was high gun with 98 out of 100. C. H. Nash of San Jose, N. A. Howard of San Francisco, took second place with 96. The highest professional score was made by L. Hawxhurst of Oakland, who broke 99 birds. J. A. Cook of Oakland tied for second place with a score of 96 killed. The longest run without a miss made was that of C. H. Nash with a score of 67. Other long runs were: N. A. Howard 66, O. N. Ford 61, H. E. Poston 54. These runs all entitle the owner to an E. C. trophy. The highest score of the Dupont long run was made by L. S. Hawxhurst with a string of 63.

Following the some of the best scores: Amateur—O. N. Ford, San Jose, 98; N. A. Howard, San Francisco, 96; C. H. Nash, San Jose, 96; George H. Anderson, San Jose, 94; Wm. McKagney, San Jose, 90; Dr. Martin, Fresno, 85. Professional—L. Hawxhurst, Oakland, 99; J. A. Cook, Oakland, 96; H. Poston, San Francisco, 96; R. C. Reed, Berkeley, 95; Chas. Knight, San Francisco, 90.

Andy Flickinger of Vallejo carried off the amateur honors on Sunday, with a total of 153 targets out of 160. O. N. Ford of San Jose, Nelson Howard of San Francisco, and W. H. Varien of Pacific Grove, tied for second with 152. The scores were not of the best owing to a high wind.

A. J. Cook of Oakland was high professional with a score of 149 out of 160, and R. C. Reed of San Francisco and L. S. Hawxhurst of Oakland tied for second place with 147.

Nelson Howard won the O. N. Ford doubles championship of California, a handsome gold medal set with sapphires going with the title, with 40 out of 50 targets. Tony Prior and Howard tied at 40 and Howard took the shoot-off at 20 targets, by winning 18. Ford hit 17 and Prior 16 targets.

Hawxhurst made the most remarkable record on doubles ever shot in the local field, if not in California, by winning 48 out of 50 targets in the professional doubles event. R. C. Reed was second in this event with 44, Hugh Poston third with 40, and other professionals shot as follows: C. H. Knight 37, J. A. Cook 36, C. A. Haight 31.

Ford made the longest run of the day with a 71, unfinished. Flickinger and H. Lorenson of Newman each get Dupont medals for their 66 and 62 long runs, respectively. Flickinger, who was easily the star amateur of the day, won the miss and out event with 33 straight and Lorenson was second with 32.

The professional miss and out proved something of a bloomer. Hawxhurst, the winner, only had to break ten straight to get first money.

Scores on Sunday follow, at 160 targets:

Professionals—A. J. Cook, Oakland, 149; R. C. Reed, San Francisco, and Lem Hawxhurst, Oakland, 147; Hugh Poston, San Francisco, 142; Charles Knight, San Francisco, 138; C. A. Haight, San Francisco, 137.

Amateurs—Andy Flickinger, Vallejo, 153; O. N. Ford, San Jose, Nelson Howard, San Francisco, and W. H. Varien, Pacific Grove, 152; D. McFadden, Salinas, 149; C. H. Nash, San Jose, 148; George H. Anderson, San Jose, 148; Dr. J. L. Martin, Fresno, H. Lorenson, Newman, and Tony Prior, San Francisco, all tied with 145; F. Thoicke, Salinas, 137; C. M. McFadden, Salinas, 123; Dr. A. M. Barker, San Jose, 140; W. J. McKagney, San Jose, 123; Miss Geneva Meyer, San Francisco, 118; R. V. Matheu, San Jose, 118.

The third and last day, Monday, the shooting was held under favorable conditions. The main event of the day was the O. N. Ford medal championship of California for 50 birds, which was won by A. G. Flickinger of Vallejo.

O. N. Ford and C. H. Nash, both of San Jose, tied for second place. The longest run of the day was made by Dick Reed of San Francisco, professional. The second longest run, made by an amatenr, was that of O. N. Ford with a score of 87. The highest for the three-day total shoot, amateur, was that of O. N. Ford with 448 dead out of 470. C. H. Nash was the second high amateur with a score of 442 and Dick Reed was high professional with a score of 447.

Following are the scores of the amateurs for Monday (210 birds):—A. G. Flickinger, Vallejo, 203; O. N. Ford, San Jose, 198; C. H. Nash, San Jose, 198; H. Lorenson, Newman, 193; N. A. Howard, San Francisco, 190; G. H. Anderson, San Jose, 183; Toney Prior, San Francisco, 180; Miss Geneva Meyers, San Francisco, 160; B. Hovers, 160; D. McFadden, Salinas, 160; F. Pura, 160; C. McFadden, Salinas, 160; Fred Burman, 160; Mr. Masseria, 160.

Professional scores:—R. C. Reed, San Francisco, 194; J. A. Cook, Oakland, 192; L. Hawxhurst, Oakland, 191; C. A. Haight, San Francisco, 186; W. E. Ellis, San Francisco, 178, and C. Knight, San Francisco, 175.

How to Aim a Rifle.—Walter Winans, the famous American sharpshooter, who lives in England, writes to the "Scientific American" the following directions as to the proper way to aim a rifle:

"The way to shoot is, first, put a big ivory front sight in place of the black one used for target shooting.

"Most real objects one shoots at are more or less dark, and the black front sight is difficult to see on the object; the white one shows up at once.

"Next, have your hind sight put on the rifle at the distance from your eye that you can read print best.

"When shooting do not try to focus a black bull's-eye, a black front sight and black hind sight and a half-dozen other things alternately while you hold on to your rifle like grim death.

"Look at the object you want to hit. If it is moving, judge how much allowance in front you must make; bring up your rifle to your shoulder, swinging it with the movement of the object you want to hit, and press the trigger as the butt touches your shoulder.

The bullet will go where you want it to without your noticing sights at all.

"If you want to be a good rifle shot at game, or as a soldier, join the nearest clay pigeon shooting club, and when you can break 90 per cent of the clays, you can rest perfectly confident that you can hit a man every shot you fire if being charged by an enemy, if you have a rifle in your hands instead of a shotgun.

"If you practice in a 'coal hole' rifle gallery at a stationary black bull's-eye with a black front sight and see 'three front sights' and a 'blurred back sight' you are not learning to shoot, but merely ruining your eyesight."

Vallejo Club.—The Vallejo Gun Club will end its 1916 season tomorrow at its traps at the Blue Rock Springs. The members of the club have been placed in three classes and following the shoot the high man in Class A will be awarded the trophy offered by the DuPont Powder Company, while the high man in Class B will receive the gold pocket knife donated by Andy Flickinger and the winner of the Class C shoot will secure the Hercules trophy.

Chico deer hunters, judging from the game that is being brought into that city, are having excellent luck this season in the Coast Range mountains. Besides many hunting parties of Chico business men, many expeditions to the various favorite hunting lands are made up of hunters from Sacramento and other Superior California cities. In the Yolo Bolo mountains the deer are reported thicker than they have been in several seasons past. Often deer have been sighted along the Sacramento river, but so far none have been bagged in that locality.

HUNTING SEASON OPENS IN OREGON.

Ducks, Geese and Quail Come In on October 1st, According to Federal Law.

Oregon sportsmen, oil up your weapons!

On October 1st the hunting season for grouse, quail, Chinese pheasants, ducks, geese, snipe and rail opens.

This, coupled with the deer hunting and the excellent fishing in all parts of the state, makes Oregon the sportsmen's paradise.

While there are various differences in the laws in different counties concerning geese and ducks, the Federal law, which supersedes the state law, is in effect from October 1 to January 15. This makes the season uniform throughout Oregon and Washington.

The state of Oregon is divided into two districts. District No. 1 is that area of the state lying west of the Cascade Mountains, and District No. 2 is east of the Cascades. The season on Chinese pheasants and grouse in District No. 1 is from October 1 to October 31. In past years it has been unlawful to kill female Chinese pheasants, but the last legislature made a change in this law allowing hunters to kill one female in a bag of five birds, or two females in a bag of ten, which is the limit for pheasants and grouse in any seven consecutive days. The season this year is also open in Jackson and Union counties for Chinese pheasants from October 1 to October 10.

The season remains closed throughout the state on Bob-White quail. The season on California valley and mountain or plumed quail is closed entirely throughout the state, except that there is an open season in Coos, Curry, Jackson and Josephine counties from October 1 to October 31, and an open season in Klamath county from October 1 to October 10. The bag limit is ten birds in any seven consecutive days.

Sportsmen will have to be very careful in not shooting quail where they are protected and also in not shooting the European or Hungarian partridge.

European or Hungarian partridge has been introduced and is thriving well in many parts of the state. This bird is protected at all seasons. It is a bird that is a little larger than the quail in size. It is between the quail and Chinese pheasant and will be found in a field like a Chinese pheasant.

European or Hungarian partridge is generally gray in color and flies very rapidly. When in flight the red-brown tail feathers are noticeable, distinguishing this bird from the Chinese pheasant, which has a long tail, and the different varieties of quail.

There are a lot of ducks and geese, although from the north flights are not in as yet. Breeding is in good shape this year and this applies to ducks, geese and wading birds. There is plenty of water in all the lakes, and for this reason the outlook is more favorable this year than it was last. Last year lots of the lakes were dry because of the long dry spell. Owing to the rainy summer which we are just through enjoying, the lakes are for the most part filled to overflowing.

Finds Fishing Paradise.—F. M. Stephenson, the well known sportsman, returned to Chicago last week and gave an interesting account of a recent fishing trip. The party consisted of himself, C. K. Billings, Dr. Frank Billings, W. S. McCrea and Walter Gregory. They spent six days fishing Shotgun Creek, a tributary of the Snake River, west of La Park, Idaho, where they were entertained at the well-known ranch of A. S. Trude. Mr. Stephenson says that there were more trout in this creek than he had ever seen before in his life. The two largest brook trout caught by him weighed seven and one-fourth and six and one-fourth pounds, respectively. He saw over 200 trout in the stream that would weigh all the way from four up to eight pounds and thousands which would range from one to three pounds. He said that a person could easily catch the limit of twenty-five pounds in a short time, simply standing in one spot without moving. This creek is veritably a fisherman's paradise, teeming with fish eager to be caught. A. S. Trude was formerly a leading attorney in Chicago and his ranch is a noted fish and game resort.

Rumors are getting more and more definite about the proposed dog show in connection with the San Diego Exposition and last week Mr. Woodhull of Spratts traveled from San Francisco to give officials the necessary advice and generally talk things over. But nothing definite is decided so far except that if there is a show it will be run on A. K. C. rules.

Canada Bars Game Selling.—Canada was in advance of the United States in prohibiting spring shooting, and it is pleasant to note that the Ontario legislature has passed a law which is designed to stop the selling of wild ducks, wild geese and other water fowl.

This does not in the least interfere with the legitimate sportsman—in fact it adds to his pleasures and opportunities, as it will also to those of the gunner on this side of the boundary line, for the ravages of the market hunter were beginning to show their effects in lessened number of migratory fowl. It is to be hoped, once the constitutionality of the migratory bird law shall have been decided by our Supreme Court, that the United States and Great Britain, acting for Canada, will find it possible, through treaty, to make this law international in scope.

Stock Breeders' Page

Effect of Ration and Age of Calving on Dairy Cows.

Many of the most thoughtful breeders are asking agricultural experiment stations if it is possible to follow any method of feeding and management of dairy heifers that will make it more certain that the heifers will be good producers. It is another application of the question as to the relative importance of heredity and environment. Does a good dairy cow or an inferior one derive her special dairy characteristics by inheritance, or is it a result of her treatment from birth to maturity? Is a good dairy cow born that way, or made what she is by her owner?

"It is a well-known fact that there is considerable difference in practice among cattlemen in regard to the feeding and handling of dairy heifers. We find radically different views on some points. Some hold that a cow should be fresh at a very early age to insure the best development of the milking functions. Others take a directly opposite view and prefer a cow to be quite well-matured and state that only in such animals are the milk-producing functions the most highly developed. Some who raise dairy cattle feed their calves only bulky feed and in rather scant quantities. Others feed largely with grain and grow them as rapidly as possible. Some hold that if a heifer of a dairy breed is allowed to get fat when young she develops a tendency to use her food for body fat all her life rather than to produce milk. Others hold that the dairy qualities of a cow are not influenced in any way by the method of feeding when young and that no harm comes from a heifer being fat. Some desire to develop the largest animals possible for the breed. Others prefer cows medium-sized or small for the breed.

"There must be some general law or laws in regard to these points that can be found by experimental work. Apparently there are a number of questions along this line which cannot be answered definitely as a result of common observations, or there would not be this wide difference of opinion. Having these facts in mind, the Missouri Agricultural Experiment Station in 1906 undertook an investigation for the purpose of determining, if possible, some of the principles upon which practical methods of raising dairy cows should be based. It was thought that by raising dairy heifers in the University of Missouri herd under different conditions and keeping full records from birth until the cow had been in milk two years it would be possible to come to some more definite conclusion regarding the possible influence of the treatment when young upon the future usefulness of the animal for dairy purposes."

The general conclusion from the work of the Missouri Agricultural Experiment Station investigations is that "it is possible to influence the rate of growth, size when mature, and type to some extent, by the liberality of the ration during the growing period, and by the age at first calving. Within limits of variation, even far beyond the normal, the character of the ration with reference to amount of nutrients supplied, does not exert any appreciable effect upon the milking functions of the cow when mature."

Draft Horse Action.

There seems to be a tendency among some draft horse breeders to develop high action. A draft horse is not expected to have action similar to that of a Hackney. In fact, extreme high action should be discouraged. The trot should be high enough to negotiate mud or snow, and be able to get over ordinary uneven surfaces. Action higher than that is regarded as unnecessary.

The principal gait of a draft horse weighing 1,800 pounds or over, is the walk. The draft gelding is supposed to move heavy loads but should be able occasionally to trot briskly for a short distance. The walk should be brisk, showing plenty of nervous energy. Movement of all four limbs should be in line without any lost motion. The horse that throws one or more feet out of line to any great extent is wasting energy. It will be noticed that at the leading draft horse shows the judge stands in line with the horse as he is walked from him and back, then jogged in order to see that the limbs are carried straight forward.

Much could be written on this subject but the principal thing to which we wish to call attention, is the unnecessarily high action emphasized by some breeders and many buyers.—American Breeder.

Effect of Early Breeding on Gilts.

The growth of young gilts does not seem to be checked by breeding, according to the results of the tests recently made by the Missouri Agricultural Experiment Station. The carcasses were analyzed but the composition did not seem to be different from those of animals not bred until they were older. Although gestation did not retard, the lactation period did so, and a sow suckling a good litter of pigs cannot eat enough to maintain her weight or condition of fatness. During this lactation period or while she was suckling pigs, the demand for mineral matter in the feed is much greater than during the gestation period preceding birth.—P. F. Trowbridge, Missouri Agricultural Experiment Sta.

Sacramento Valley Dairymen to Organize.

Organization is being urged upon the milk producers of the Sacramento Valley. The movement is fostered by the Sacramento Valley Development Association and is in charge of James M. Henderson Jr., chairman of the milk producers' committee of that body.

At a meeting in Sacramento last week, Henderson outlined his plans. The plan is to form a co-operative association through which the farmers can market their dairy products at prices which will assure them a reasonable profit.

The organization, if perfected, will be formed along lines similar to other farmers' organizations now in effect in California. The committee in charge, beside Henderson, includes C. L. Hughes, E. Franklin, Senator B. F. Rush and W. A. Beard.

International Draft Geldings.

The classification for draft geldings at the International Show at Chicago this year offers inducements to exhibitors comparable with the attractions for cattle feeders. The prize-list is intended to bring out a splendid show of grade draft geldings and mares. In the classes for single animals two, three and four years old the first prizes are $50 to $60, and eight prizes are offered in each class. Similarly liberal prizes extending to seven places are offered on pairs. Prizes on treys, light draft fours, heavy fours and sixes are much larger, and the first prize six-horse team wins $150.

The championship award will be of exceptional importance. The exhibitor of the best gelding or grade mare of the show wins $75 in sterling silver and also $100 in plate. The $100 prize will be contributed by Fred Pabst if the sire of the winner was a Percheron, by J. Crouch & Son if a Belgian, by Truman's Pioneer Stud Farm if a Shire and by Thos. E. Wilson if a Clydesdale. Besides these attractive rewards the breeder of the champion gelding will be remembered. He will receive a handsome $75 sterling silver pitcher.

These liberal prizes and extended classification on grade draft mares and geldings are part of the policy which is determined to make this section one of the most important at the International. The show of fat steers, with some breed competition included, has stimulated general interest in beef cattle breeding. It has developed ideas as to correct beef type. The same benefits may be expected with draft horses. The draft breeds in America are undoubtedly approaching a common utility standard. The breed which can produce the champion gelding is entitled to high honor for leading the way, even if some other breed produces the winner the next year.

From the standpoint of the general public the gelding show is the business end of the International horse department. The aim of breeders must be to produce horses which fill commercial requirements. The most noteworthy achievement of the entire show should be to win champion honors in the section for utility geldings. Breeders and farmers can provide a splendid demonstration of draft horse excellence by getting their best mares and geldings in condition for the show.

This is a timely enterprise. Foreigners as well as American horse owners will study the display. They will estimate the suitability of the geldings to their own requirements. A favorable impression will be made if sufficient interest and effort are manifest by breeders, and compensation in future business will certainly result. After the war the exports of horses will include a draftier class. There is already a demand for big geldings abroad but shipping difficulties repress the business. It will develop later, and it is important that prospective foreign buyers gain adequate conception as to our draft horse supplies.—Breeder's Gazette.

Values of Dairy Cows.

According to estimates made by more than 1,800 dairymen and breeders, the dairy cow reaches her highest value when between 5 and 6 years of age. These estimates have been used as the basis of a study on the influence of age on the value of dairy cows, just published as Department Bulletin No. 413, by J. C. McDowell. The figures were obtained from well-informed farmers throughout the principal dairy districts of the country, and the average may be taken as fairly representative of relative values of cows at different ages.

Estimates were obtained for four of the leading breeds (Holstein, Guernsey, Jersey and Ayrshire) and for four classes of three-year-olds of each breed, namely, the $80 grade cow, the $100 grade, the $200 pure bred, and the $300 pure bred. Working from this series of arbitrary values, estimates covering values from birth to 14 years of age were obtained. For example, it was found that the farmers estimated that a grade Holstein worth $80 at three years of age was worth $10 at birth, $101 at 6 years of age, and $46 at 14. In the case of the pure breds the estimated advance in value up to 5 or 6 years of age is relatively sharper and the decline thereafter correspondingly abrupt. Thus the $300 pure bred Jersey is estimated to be worth $59 at birth, $351 at 6 years, and but $74 at 14.

At the Cooper county, Mo., fair held this month, four two-year-old mules that were shown were sold for $1000, and the champion mule of the fair sold for $325.

Why Cows Vary in Milk Production.

There are strange things about the milk flow the dairy cows unless one knows the essentials nutrition and milk production. Even with the be information obtainable one is likely to be deceiv in cows.

The variations in the quantity and the quality the milk are several, being influenced by a numb of conditions. Some of the conditions are regul and may be defined during the lactation period.

The percentage of fat is normal and remains from the third or fourth week till about the seven or eighth month after the cows freshen. Then t quantity of milk begins to diminish. The percenta of fat does not change materially, but the charact of the fat undergoes a change. Early in the peri of lactation the globules are large. They decrea in size as the period of lactation advances, but al increase in number, but the per cent of fat remai about constant.

Wing observes that as the lactation progresses t proportion of olein decreases and stearin and palm tin increase until the proportion may fall as low 20 per cent. The change is more apparent when t animal changes from green to dry feed.

The dairyman has no doubt noticed that mi drawn at night and morning differs considerably the percentage of fat. This is not because of a material difference between the milk secreted night or by day, but because of unequal differen between the periods. It has been found, thoug that when cows lie still there is a larger per cent water and a correspondingly less percentage of soli in milk. Generally speaking, the milk is richest butterfat that has been milked after the shorte period. This has been determined where cows a milked three, four or five times a day.

Wing cites an example of where in milking cows for a period extending over two days the pe centage of fat was greater, 72 times in the morning in 144 cases it was greater in the evening. In cases there was a difference of one-tenth of one p cent or less between morning and evening milk. this case the period from evening till morning w about two hours longer.

Wing says that in the great majority of cases t variation is not more than one-half of one per cen but that it has been as great as two to 2.5 per cen

Dairymen have observed that cows vary from da to day. Generally this can be accounted for b change of feed, sudden changes in the weather, b disposition of cows, etc.

There is always a variation between the mil first drawn and that last drawn. The first is ver low in fat, while the last or "strippings" is very rich Sometimes this may be as much as one and ten pe cent respectively. The larger globules of fat, bein nearly as large as the small milk ducts, pass alon less readily than the milk fluid.

Authorities recognize the fact that the amount an the character of food have a considerable influenc upon the quality of the milk. But the quality i more easily affected by changes in the character o the food than the quantity. Cows kept under favo able conditions, with an abundant supply of food, is hardly possible to increase the proportion of fat to other solids by a change in the food. But whil the amount of the various constituents of the milk i not easily affected by the food, the quality of the con stituents themselves may be considerably influenced especially the fat. For instance, linseed meal, glute meal and certain other foods make soft, oily fa while cottonseed meal, certain legumes and whea bran make hard fat.—Farm and Ranch.

Kings County Fair.

Twelve thousand dollars has been appropriated b the directors of the Kings County Fair Associatio for premiums, prizes and stakes for the annual fai that opens on October 2 and will close October 7.

Workmen have been busy on the fair grounds fo the last two months, and the buildings are nov almost ready to receive entries. An entirely nev building in which to exhibit the poultry entries ha been built, while the stalls for the cattle have been greatly enlarged.

Entries are coming in rapidly. E. Gravatt, sec retary of the association, says that space is already getting short and that he expects to see every class full.

Three entries in the cattle classes will make the fair unusually attractive to cattle breeders. They are those of H. McFarland of Vermont, N. H., who will show his Ayrshires; J. N. Lock of Lockford who will exhibit his Jersey herd, while Morris & Sons of Woodland will show their famous Holstein Friesian herd. McFarland's Ayrshires will be of particular interest to Kings county ranchers, as it is believed to be the first time that cattle of this breed have been shown in the county.

The Chicago Breeders' Gazette says that a very large volume of horse business is being done in Chicago these days, mainly on European army account. Scarcity is apprehended, foreign army inspectors being under instructions to secure every possible horse. Gatherers are scouring the country for stock likely to pass inspection and less reject stuff is arriving than early in the year. The British are unable to get many big horses for which the price is $200, and $165@185 takes the bulk. Eastern orders are coming in larger volume and commercial demand is looking up. Chunks are selling largely at $210@225 with a few drafters at $240@275.

THE FARM

HORSE COMFORT.

The following rules for the care of orses in hot weather have been prepared by the Boston Work-horse Relief Association:

1. Load lightly, and drive slowly.
2. Stop in the shade if possible.
3. Water your horse as often as ossible. So long as a horse is working, water in small quantities will not hurst him. But let him drink only a ew swallows if he is going to stand till. Do not fail to water him at night fter he has eaten his hay.
4. When he comes in after work, sponge off the harness marks and sweat, his eyes, his nose and mouth, nd the dock. Wash his feet but not is legs.
5. If the thermometer is 75 degrees r higher, wipe him all over with a lamp sponge. Use vinegar water if ossible. Do not turn the hose on him.
6. Saturday night give him a bran nash, lukewarm; and add a tablespoonful of saltpeter.
7. Do not use a horse-hat, unless it s a canopy-top hat. The ordinary ell-shaped hat does more harm than good.
8. A sponge on top of the head, or even a cloth, is good if kept wet. If dry it is worse than nothing.
9. If the horse is overcome by heat, get him into the shade, remove harness and bridle, wash out his mouth, sponge him all over, shower his legs, and give him two ounces of aromatic spirits of ammonia, or two ounces of sweet spirits of nitre, in a pint of water; or give him a pint of coffee, warm. Cool his head at once, using cold water, or, if necessary, chopped ice, wrapped in a cloth.
10. If the horse is off his feed, try him with two quarts of oats mixed with bran, and a little water; and add a little salt or sugar. Or give him oatmeal gruel or barley water to drink.
11. Watch your horse. If he stops sweating suddenly, or if he breathes short and quick, or if his ears droop, or if he stands with his legs braced sideways, he is in danger of a heat or sun stroke and needs attention at once.
12. If it is so hot that the horse sweats in the stable at night, tie him outside, with bedding under him. Unless he cools off during the night, he cannot well stand the next day's heat.

Value of Pasture.—As to the value of pasture for livestock, a circular from the extension department of the College of Agriculture of Arkansas says:

A farmer near Forrest City has a 12-acre permanent pasture on which he pastured from April 1, 1915, to October 15, 1915, 50 cows, five horses and 12 sows and their pigs. This is one of the greatest pasture reports ever sent to the extension office of the University of Arkansas and United States Department of Agriculture at Little Rock. This statement was verified by many neighbors. The pasture has Bermuda grass for its base with bur clover, white clover and lespedeza, thus giving pasture for practically the whole year. Stock had been kept on this particular pasture every day for seven years. The farmer stated in a public meeting recently that these 12 acres had produced more money for him than any 30 acres on his farm.

Milk From Desert.—El Paso, Texas, has one of the most interesting milk supplies of any city. A considerable amount of the milk is goats' milk produced by a number of goat dairies, one of which has a thousand goats. These goats get their living from the surrounding hot, dry territory, deficient in grass and only moderately covered with sagebrush and cactus. A cow would starve to death, but the goats, though fed neither hay nor grain, give on an average about a quart each. The milk brings the same price as cows' milk, and is sold both in bottles and in bulk.

KEEPING THE GARDEN BUSY.

Even the smallest back yard may be made to yield a supply of fresh vegetables for the family table at but slight expense if two or three crops are successively grown to keep the area occupied all the time.

People who would discharge a clerk if he did not work the year round will often cultivate a garden at no little trouble and expense and then allow the soil to lie idle from the time the first crop matures until the end of the season. Where a two or three-crop system is used in connection with vegetables adapted to small areas, a space no larger than 25x70 feet will produce enough vegetables for a small family.

Corn, melons, cucumbers and potatoes and other crops which require a large area should not, of course, be grown in a garden of this size.

Small areas may be worked with a spade, pushing the blade in to its full depth and turning the soil to break up the clods. Heavy soils should never be worked when wet.

Overzealous gardeners, ready to seize the first favorable opportunity, go out and work theheavy clay soil before it is dry, which is not only a waste of energy but does a damage to the soil from which it will take years for it to recover.

To determine when heavy soils are ready for plowing a handful of earth should be collected from the surface and the fingers tightly closed on it. If the ball of compacted earth is dry enough for cultivation, it will fall apart when the hand is opened.

The soil in the average back yard is not only lacking in plant food but also has been packed until it is hard and unyielding. To loosen up such soil and make it suitable for garden produce requires that careful attention be given to its preparation.

After spading the enclosure thoroughly, the upper three inches should be made fine with the use of the hoe and rake. Stones and rubbish should be removed and clods of dirt broken. The surface should be made even and as level as possible. It may then be marked off for planting in conformity with the general plan of the garden.

Barnyard or stable manure is the best fertilizer because it furnishes both plant food and humus. An application at the rate of from twenty to thirty tons to the acre of well-rotted manure is very satisfactory. This should be applied after plowing or working with a spade and distributed over the surface and later worked in with a hoe and rake.

On many soils it is advisable to apply commercial fertilizer, especially phosphate, in addition to the manure. An application of 300 to 600 pounds of acid phosphate to the acre is usually sufficient. If additional potash is needed, which is often the case with sandy soils, this may be economically supplied in the form of wood ashes. If the wood ashes are unleached they should be distributed over the garden, using 1000 pounds to the acre. If they have been wet, or leached, 2000 pounds should be used.

An application of 100 pounds to the acre of nitrate of soda may be used in the spring to start the plants before the nitrogen in the manure has become available. It should be borne in mind that commercial fertilizers will not yield good results unless the soil is well supplied with humus.

Thus with proper fertilizing the garden may be kept busy, and profitably so, all the time.

A WONDERFUL MACHINE.

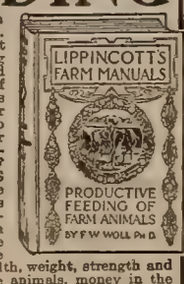
When we consider the dairy cow from the machine point of view we find many similar conditions. She is marvelous in construction; has a nerve force closely allied to electricity, which separates, combines, and transforms crude raw material into a refined and useful product; she has been developed by intelligent breeding and feeding from practical worthlessness to great and constantly increasing efficiency; she is thoroughly responsive to human sympathy and humane treatment from day to day and year to year; her productive capacity is largel ygoverned by the care she receives and the feed given her. * * * When we consider and compare these resemblances we begin to realize that the man behind the cow is a most important factor in dairy husbandry in developing and maintaining the efficiency of the dairy cow."—[Hoard's Dairyman.

It must be remembered that the bull influences the milking qualities of all the heifers in the herd. This evident fact is frequently overlooked entirely. Unless, therefore, the breeding of the bull used for service in the herd is attended to, little and uncertain progress can be made in the improvement of the milking capacities of the heifers bred, and which are eventually drafted into the dairy herd.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.



As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.
Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FARMS FOR SALE
Choice Land In Idaho
Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

THE GRAND AMERICAN HANDICAP

won by **WINCHESTER**

"REPEATER" FACTORY LOADED SHELLS

CAPT. J. F. WULF
THE WINNER
WITH
"REPEATER" SHELLS

The Grand American Handicap, the trapshooting classic—equivalent to the World's Series in baseball, the event that marks the climax in a trapshooter's career, was won by Capt. J. F. Wulf, of Milwaukee, with the wonderful score of 99 x 100 from the 19-yard mark, shooting Winchester "Repeater" Loaded Shells.

NATIONAL AMATEUR CHAMPIONSHIP
Won by F. M. Troeh, of Washington, shooting a Winchester Repeating Shotgun. Score, 99 x 100.

PROFESSIONAL CHAMPIONSHIP (Dunspaugh Trophy)
Won by Phil R. Miller with a Winchester Repeating Shotgun. Score, 97 x 100 and 25 straight.

HERCULES ALL-AROUND AMATEUR CHAMPIONSHIP
Won by Edward L. Bartlett, of Baltimore, with Winchester Loaded Shells. Score, 185 x 200.

GENERAL AVERAGE ON ALL SINGLE TARGETS
Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 576 x 600.

NATIONAL AMATEUR CHAMPIONSHIP AT DOUBLES
F. M. Troeh was second in this event with 88 x 100, which was only one under the winner. He shot a Winchester Repeating Shotgun.

This was a great victory for Winchester Guns and Shells; and as a demonstration of "Speed" and other desirable qualities in guns and shells, it shows up like the red **W** on a package of Winchester ammunition. It also shows why you should

WOMEN'S NATIONAL CHAMPIONSHIP
Won by Mrs. J. D. Dalton, of Warsaw, Ind., who scored 23 x 25 in the elimination contest and made the same score in the final contest with a Winchester Repeating Shotgun.

MOUND CITY OVERTURE
Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 99 x 100, and 20 straight.

GENERAL AVERAGE ON 16-YARD TARGETS
Won by F. M. Troeh, of Washington, with a Winchester Repeating Shotgun. Score, 187 x 200.

SHOOT WINCHESTER GUNS AND SHELLS **W**

Pacific Coast Shooters Fight Winds To Victory With *Remington* UMC Speed Shells

Three days of heavy wind storms set up a stiff handicap for Pacific Coast Tournament shooters, but when the big blow was over O. N. Ford had weathered the storm with these splendid winnings:

High Amateur Average - - - - -	320 x 340
High General Average - - - - -	320 x 340
Introductory Handicap - - - - -	96 x 100
Pacific Coast Special - - - - -	97 x 100
P. H. O'Brien, high on all targets - -	513 x 560

both shooting Nitro Club Speed Shells throughout

REMINGTON UMC

In the East R. D. Morgan of Washington, D. C., shooting a Remington Pump Gun, won the Westy Hogan Championship with a score of 100 straight and 40 straight in the shoot-off.

Virginia State Championship, won by Dr. L. G. Richards, Roanoke, with 99 x 100, shooting Nitro Club Speed Shells.

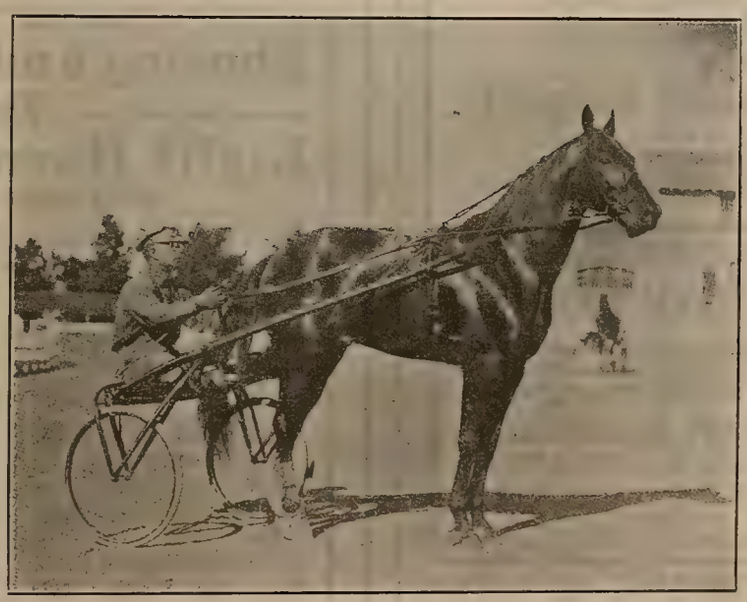
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,

of the BREEDER AND SPORTSMAN, published weekly at San Francisco, Cal., for October 1, 1916.

State of California,
County of Marin—ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared F. W. KELLEY, who, having been duly sworn according to law, deposes and says that he is the proprietor of the Breeder and Sportsman, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:
Name of Post-Office Address.
Publisher, F. W. Kelley, 366 Pacific Bldg., San Francisco
Editor, D. L. Hackett, 1109 Grand Ave., Oakland, Cal.
Managing Editor, F. W. Kelley, 366 Pacific Bldg., San Francisco
Business Manager, F. W. Kelley, 366 Pacific Bldg., San Francisco

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock):
F. W. Kelley, 366 Pacific Building, San Francisco.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If none, so state).....None.

F. W. KELLEY.

Sworn to and subscribed before me this 25th day of September, 1916.

(Seal) J. H. KELLEY.

(My commission expires February 7, 1918.)

DATES OF FAIRS.

CALIFORNIA.

Riverside Co. Fair at Riverside.....Oct. 10-14
Kern County Fair at Bakersfield.....Oct. 24-28

A CALIFORNIA CIRCUIT for 1917 is already being "talked about" and there is a possibility that one may be arranged and purses and dates announced before January first. Among the towns where race meetings could be given with a reasonable assurance that no deficit would result under proper management, are Salinas, San Jose, Pleasanton, Santa Rosa, Dixon, Woodland, Marysville, Sacramento, Stockton, Fresno, Hanford, Bakersfield, Ventura, Riverside and Los Angeles. Here are fifteen cities, all with good tracks, and out of this fifteen it should be possible to get nine that with the State Fair at Sacramento would comprise a circuit of ten weeks' racing. Every horseman to whom this suggestion has been made by the writer has said that if such a circuit is announced by January 1st, he will immediately thereafter begin training a string of horses to race through the circuit. We believe that meetings at Pleasanton, Santa Rosa, Dixon, Woodland, Fresno, Hanford, Bakersfield, Riverside and Ventura will certainly be given next year and it only remains for these tracks to unite and arrange purses in December, so that a general announcement can be made by the first of the new year. Even with purses at the majority of these places no larger than $500, with the P. C. T. H. B. A. and the State Fair providing $1000 purses, there will be nearly $75,000 to trot for and this will make a very respectable circuit. We hope the secretary of over and let it be known whether his town will be willing to join a California circuit of fairs and race meetings in 1917. The sooner action is taken the better, as with such an announcement we will see many horses put in training that will not otherwise be trained and enough to make a California circuit a big success.

every association in California will think this matter

TRHEE HEATS and three heats only, every heat a race, and four moneys to each heat, is the plan under which most of the harness racing has been done in California this year, and it has given general satisfaction. If a horse is fast enough and good enough to win all three heats he is awarded just as much money as he would have received had he won under the old three in five plan. If he has won a heat and then by accident or other cause been so unfortunate as to finish outside the distance, he retains whatever he has already won, and right there is one of the main reasons why the system is so popular with horse owners and trainers. When an owner has paid entrance money to start in a race and won first or been in the money in the first heat, he is liable to have an intense feeling of disgust and disappointment if his horse is distanced in a succeeding heat if thereby (as under the three in five rule) he loses all claim to any part of the purse. But if finishing behind the flag in a succeeding heat does not not take away his claim to the money won in previous heats, that portion of the purse is a balm to his wounded feelings and helps toward a more cheerful outlook on life in general and on that race in particular and he is more inclined to give his horse another chance to make good. In the three heat plan where the whole purse is, say $900, with $300 for each heat, the first four horses in any heat will be awarded $150, $75, $45 and $30 respectively, and it is possible in a race where twelve horses start for each one to get some of the money. Another good feature of the three heat plan is that it permits an owner to start a horse twice at a meeting without over-racing him. Any horse in training that is ready to race can go three heats twice a week without injury and for this reason alone the system is popular with California trainers, the majority of whom have but small strings of horses to race. If there is a California circuit in 1917, the majority of these races will undoubtedly be on the three heat plan.

GOOD ROADS are doing more for California than anything for which the people have bonded themselves in many years. The $18,000,000 which have been expended so far have been well spent and every committee that has examined and reported thereon has unanimously so decided. At the coming general election the question is to be put to the people: Are you willing to bond the State for $15,000,000 more to be put into good roads? and we believe the people will answer Yes with a will. Sacramento this week voted four to one in favor of bonding that county for something over a million to be spent on roads inside that county. It was a wise decision and there is nothing that will bring the right sort of people to that prosperous section in large numbers so quickly as first-class roads that can be traveled in comfort both summer and winter. California is by nature the most favored section of the world and when the California roads are all first-class highways it will be as popular a place for tourists as the most favored sections of Europe ever were. Vote Yes for the bonds.

EVERY FAIR held on the Pacific Coast this year has been well attended and these is more interest in the display of farm products of all kinds than ever before in the history of the State. The recent world's fair held in San Francisco is the cause of some of this increased interest but we think the chief reason is the work being done in California by the Agricultural Department of our State University. Ever since the establishment of the State Farm at Davis, and the short courses in agriculture, horticulture, and live stock breeding and care at the farm, as well as the correspondence courses, there has been a new interest in such matters in the minds of the farmers and their families. The State University is doing wonderful work along these lines, and there is no money the people have been paying in taxes from which is coming better or greater results.

IT IS NOT TOO EARLY to make stallion announcements for 1917. The old plan of waiting until the breeding season actually begins is obsolete in progressive horse breeding communities, and we notice that several of the eastern stallion owners are already announcing where their stallions will be and the terms on which they will make the season during 1917. We believe good stallions will be better patronized this year than last, and as the sport of harness racing has certainly increased in popularity this year and is certain to grow to still greater proportions in the years to come, well bred colts that can show speed will be in greater demand. Advertise your stallions now.

Hemet Stock Farm Horses Are at Riverside.

Fred Ward reached Riverside last Monday with the Hemet Stock Farm horses after a most successful campaign through the Middle West. He raced at Albuquerque, New Mexico, last week on his way home, winning two races there with Don de Lopez and two with Oro Lou, while Fiesta Lou was twice third, and Sterling Lou once third and once fourth. Great Northern also won two races. Ward will race at Riverside during the meeting which opens on the 10th inst., before going into winter quarters at Hemet Stock Farm. Don de Lopez returns home with a two-year-old record of 2:19¼ and has been often referred to in the Chicago and Indianapolis turf papers as one of the best two-year-olds seen in the west for some time and a very likely candidate for 2:10 honors in his three-year-old form. Mr. Whittier, proprietor of Hemet Stock Farm, is highly pleased with the result of the first campaign made outside of California by the young horses bred on the farm and gives Ward much credit for his excellent management of the string. The performances of the colts and fillies bred at Hemet Farm during the racing season of 1916 have added new laurels to that farm, its management and to its two young stallions, Wilbur Lou and Kinney de Lopez.

The Story of Roan Hal 2:00¾.

Roan Hal, with Tommy Murphy driving, won the Board of Trade stake of $3000 for 2:07 class pacers at Columbus last month, and did it in straight heats, beating Miss Harris M. and three others in 2:03¾, 2:01¾ and 2:03. Guy Rockwell, the Cleveland turf scribe, recently gave a few incidents in the life of Roan Hal, as follows:

A victim of various kinds of ill luck is the speedy pacing horse Roan Hal.

Possessing a great flight of speed and excellent manners, Roan Hal earned a record of 2:01¼ at the Syracuse Grand Circuit meet this season, but withal his good qualities and capabilities it looks as if the roan gelding would be remembered by devotees of the harness horse as an unlucky animal.

Roan Hal's career is not ended. He is in the stable of the great Tommy Murphy and has a few engagements yet to fill, but it would be a great surprise after all his mishaps were good fortune to perch on Roan Hal's banner so late in the season.

Bred by A. C. Shilling, Russiaville, Ind., in 1907, Roan Hal was so little thought of by his breeder that he was sold to C. W. Harris, a horse dealer, for $160. Being by Hal DeFacto—Maud C. by Minnesinger and his granddame being by Wm. Penn, this was a small price for a young pacing horse with such breeding.

After this start Roan Hal passed under the auctioneer's hammer at Norfolk, Va., for $250. He was purchased by H. E. Holmes, a veterinarian. Holmes turned the horse over to Jerry Garrett, an employe of Uncle Sam's, who drove Roan Hal around his rural route hitched to a mail wagon. Government work proved an ideal sort of training for the horse and Garrett finally decided to race him.

The first season he was raced Roan Hal earned a record of 2:11¼ and did not lose a race. He went lame, however, toward the end of the campaign and was turned over to Sam Earing to fix up.

The Richmond trainer wintered the horse and thought he had him sound. He took him to Michigan the next spring, but a spavin appeared and the horse was so lame that the owner gave the horse to Earing to pay for his keep and training expenses. The Virginia trainer realized that he had a man's work ahead of him to get the horse so that he might race again, but he set to work. He took excellent care of the horse and by skillfully tursing pulled him through, finally selling him to H. H. Hutchins of Brooklyn, the present owner.

Roan Hal was entered in some of the stakes on the Grand Circuit this year and after a more than fair showing in his first start at North Randall, Hal failed to race up to form in the Board of Commerce stake at Detroit and he was sent from there to the Rockport half mile track, where he won an easy race. He was shipped over to Cranwood the next week and from there shipped to Columbus. En-route to the Capital City the car in which Roan Hal was quartered was wrecked, but fortunately the roan horse was uninjured, and he carried that luck with him in his race at the first Columbus meet, where he won, reducing his record to 2:02¼.

Misfortune overtook him the following week at North Randall, where he was beaten by Miss Harris M. and his driver was suspended for improper driving. After that Tom Murphy took the horse, won second money with him at Hartford and won a good race with him at Syracuse where he beat Miss Harris M. in 2:01¼. Last week, however, the Hal horse was favorite at Columbus but was beaten and that has been his life history. He seems to be a horse that "blows in the pinches." However, when the great struggle he has had to become a racer is considered, it must be admitted that Roan Hal has accomplished a great deal.

Roan Hal did not "blow" in the pinches at Lexington last Tuesday, but won in 2:02¼ and 2:00¾, a new record for him.

NEW WORLD RECORDS.

The Real Lady and Volga Set Them in the Kentucky Futurities.

The Lexington meeting which opened last Monday saw a new record for two-year-old fillies made that day, and a new record for three-year-old fillies the following day, both records made in divisions of the Kentucky Futurity. The Real Lady, winner of the two-year-old division, broke the world's filly record of 2:07¾ held jointly by Native Belle and Volga, by trotting the first heat of the futurity in 2:07½, and lowered this mark a half second in the next heat, when she finished the mile in 2:07 flat. The Real Lady was bred at Walnut Hall farm and is the third filly by Moko to win the two-year-old futurity.

The first heat developed some remarkable racing, Harvest Gale, the fourth horse inside the flag, trotting in 2:09½. The mark set by The Real Lady gives Thomas Murphy both the two-year-old filly and colt record, he having driven Peter Volo when this colt made the record of 2:04½. The Real Lady is by Moko, her dam is Fruity Worthy (2) 2:25¼ by Axworthy (3) 2:15½, second dam Fruition 2:15¼ by Adbell (1) 2:23, third dam Expectation, dam of two in 2:10 by Autograph 2:16½, fourth dam Miss Copeland by Almont Star and fifth dam by Prophet Jr., grandson of Black Hawk 5, thus running back through the best of producing lines to the old Morgan blood. The Real Lady has been undefeated this year and as she is sound and has not been overraced should train on into a three-year-old that will be able to trot very close to the record made by Volga the following day.

Volga won the three-year-old futurity Tuesday, defeating those high class three-year-olds Harrod's Creek, Expressive Lou, Bingen Silk, Suldine and Bintara, and won her heats in 2:06½, 2:07 and 2:04½, the time of the third heat being the more remarkable as she had trotted two such fast ones just previously. Volga's new mark is not only the world's record for three-year-old fillies, but is a world's record for three heats by a three-year-old and is also a quarter of a second faster than the world's record for four-year-old mares. Volga is by Peter the Great, dam Nervolo Belle (dam also of Peter Volo (4) 2:02) by Nervolo 2:04¼, pacing, second dam Josephine Knight by Betterton 8022, son of Geo. Wilkes, third dam Mambrino Beauty by Mambrino King, fourth dam by Allie West 745, son of Almont 33, fifth dam by Alcalde 103, son of Mambrino Chief, sixth dam by Shropshire's Tom Hal. There is a wealth of Mambrino Chief and Geo. Wilkes blood in the dam of Volga, and Peter the Great was a complete outcross for her. Nervolo Belle is certainly the world's greatest broodmare with two such three-year-old trotters as Peter Volo 2:03½ and Volga 2:04½ to his credit. Peter Volo won his three-year-old futurity in 2:07¼, 2:05 and 2:03½, Volga hers in 2:06½, 2:07 and 2:04½. Will any three-year-olds ever lower this mark, and will any three-year-old full brother and sister ever approach such a record?

Miss Macklie Enters the 2:10 List.

The trotting mare Miss Macklie, foaled 1909, owned by Mr. M. L. Woy, of Fresno, took a breeders' record of 2:09¼ at the Fresno Fair last Friday. This gives Stanford McKinney 45173 his first 2:10 performer, with another trotter, Miss Macklie's full brother Pavana 2:10¼, very close to the mark. The dam of Miss Macklie is Strathalie by Strathway out of the great broodmare Athalie by Harkaway. Strathalie is now the dam of Miss Macklie 2:09¼, Pavana 2:10¼ and Strathboule 2:13¼, all trotters.

Friday's Races at Fresno.

Although but three days' harness racing were announced for the Fresno Fair last week, and which were duly reported in last week's Breeder and Sportsman, it was decided to hold a fourth day's racing on Friday. The 2:09 trot and the final heat of the ladies' free-for-all pace were on the card, the results being as follows:

2:09 trot, purse $600:

Bon Cres, blk h by Bon Voyage (Chadbourne)	1	1	1
Columbia T., b m by Bon Guy.....(Smith)	3	2	2
Harold C., b g by Bon Voyage.....(Cohen)	2	4	3
Bert Kelly, b g by McAdrian.....(Gallup)	4	3	4

Time—2:13, 2:14¼, 2:15¾.

Ladies' free-for-all pace, final heat:

Nifty, ch g.....(Mrs. Lane)	1
Silente, b g.....(Mrs. Harmon)	2
Firebaugh, bl s.....(Mrs. Russin)	3

Time—2:17.

Half-mile running race, purse $100—Tom Woods, first; Pearl, second; Babin, third. Time, 0:49½. Round Up, Bessie H., Blue Bird, Red Wings, Fontella also ran.

One-half mile running race, purse $125—Tallow Dip, first; Right Smart, second; Sad Sam, third. Time, 1:43½.

Three-eighths mile, running race, purse $100—Belle first; Queen, second; Buck Thomas, third. Time, 0:36. Landlady, Pearl, also ran.

To beat 2:13½ trotting—Miss Macklie, owned by M. L. Woy, Fresno, won. Time, 2:09¼.

—o—

Directum I. has been engaged for a trial to lower all half mile track records for a mile at Goshen. He holds the present record, 2:02½, which is "some mile" for a two-lap track.

OREGON STATE FAIR RACES.

Monday, Sept. 25.

Two-year-old trot, purse $150:

Bonnie McCann, b f by The Bondsman..(Kirkland)	1	1
Salem Girl, by Zom Norte.....(Mauzey)	2	2

Time—3:26½, 3:18¾.

2:10 pace, purse $750:

Hal Logan, b h by Jim Logan.....	3	6	w
Sonoma Maid, b m by Jim Buford.....	4	5	d

Time—2:11¾, 2:10¼, 2:12¾.

Special, 2:25 trot, purse $400:

Mark H., gr h by Coma.....(Cook)	1	2	1
Guy Light, b g by Searchlight.....(Lindsay)	5	1	3
Salem Boy, b g by Zom Norte.....(Mauzey)	3	4	2
James Oliver, by Bonaday.....(Burt)	2	5	4
Cavalier Gale, by Baronsgale.....(Swisher)	4	3	5

Time—2:18¾, 2:15¾, 2:17½.

Wednesday, Sept. 27.

2:08 pace—Shriners' Stake—$2000:

Prince Zolock, bl h by Zolock.....(Helman)	1	1	1
Lady Hal, b m by Hal B.....(McGuire)	2	2	2
King Bond, b h by The Bondsman.....(Lewis)	7	3	3
Emaline Dillon, b m by Guy Dillon.....(Steuart)	3	6	6
Hal Edo, b m by Hal B.....(W. Hogoboom)	6	4	4
Homer Mac, b h by Petigru.....	5	7	7
Francis J., b m by The Patchen Boy..(Lindsay)	8	8	7
Lock Logan, b h by Zolock.....(Montgomery)	4	5	d

Time—2:07¾, 2:07¾, 2:08½.

Special, pace, purse $1400:

McAlpin, b s by Prince Seattle.....(Kirkland)	4	2	1
Bertie Seattle, br m by Prince Seattle(Woodcock)	5	1	2
Highho, b h by Keeler.....	1	3	3
Sallie H., b m by Hal Norte.....(Merrill)	2	4	5
Helen Hal, b m by Hal B.....(Staats)	3	5	4

Time—2:14¾, 2:14¾, 2:14¾.

Thursday, Sept. 28.

Farmers' trot or pace, purse $200:

Sam D. .....(A. McMillan)	1	1
Sam R. .....(Mrs. J. Ramp)	2	2
Lady Norte.....(E. C. Eoff)	4	3
Jimmie .....(Mrs. J. Ramp)	3	4
Bill Smith .....(E. C. Eoff)	5	5

Time—2:31¾, 2:34.

2:12 trot—Elks' Stake—$2000:

Bon Guy, b s by Bon Voyage.....(Woodcock)	2	1	1
John Mack, b g by Geo. Fuller.....(Tryon)	1	2	2
Hallie B. by Hal B.....(Swisher)	3	3	3
Starost, ch h by The King Red.....(Sanford)	4	4	4
Floradora Z., br m by Zombro.....(Guion)	5	5	w

Time—2:10¾, 2:09¼, 2:12½, 2:13¼.

2:20 pace, purse $750:

Joe Buckley, b h by Bonnie McKay.....			
.....(W. Hogoboom)	1	1	1
Vevo Hal, br m by Hal B.....(Kinney)	2	2	2
King Zolock, b h by Zolock.....(Bush)	3	4	5
Hal Logan, b h by Jim Logan.....(Montgomery)	4	3	8
Highho, by Keeler.....(Davis)	7	6	3
Winsor Direct, by Baron Direct.....(McGuire)	8	7	4
Montana Belle by Hal Mercury.....(Wright)	6	5	6
Kinney Wave, by Tidal Wave.....(Cook)	5	8	w

Time—2:11¾, 2:11¼.

Friday, Sept. 29.

2:18 trot, purse $800:

Mark H., gr h by Como.....(Cook)	1	2	5
Beauty B., by Woodlock.....(Ball)	3	3	1
Complete, by Palite.....(Smith)	4	1	4
Bonniola, by Bonaday.....(Newbill)	2	5	3
Cavalier Gale, by Barongale.....(McGuire)	7	4	2
James Oliver, by Bonaday.....(Bush)	5	7	7
Salem Boy, by Zom Norte.....(Mauzy)	6	6	6

Time—2:12½, 2:11¾, 2:15¾.

Free-for-all pace, purse $750:

Jim Logan, b s by Chas. Derby....(Montgomery)	1	1	1
Prince Zolock, b s by Zolock.....(Helman)	2	2	3
O. U. C., b h by C. The Limit.....(Smith)	7	7	2
Lady Hal, by Hal B.....(McGuire)	3	3	4
Hal Edo, by Hal B.....(W. Hogoboom)	5	4	6
Indian Hal, by Hal B.....	4	6	7
Homer Mc, by Petigru.....(Knowles)	6	5	5

Time—2:07½, 2:07½.

Saturday, Sept. 30.

2:25 pace, purse $750:

Zombrino, by Prince Zombro.....(Bunch)	1	1	1
Lock Logan, by Zolock.....(Montgomery)	2	3	2
Greatness, by Peter Wilton.....(Sanford)	3	2	3
Garland Mc., by Homer Mc.....(Knowles)	4	5	4
Bertie Seattle, by Prince Seattle.....(Smith)	5	4	5

Time—2:09, 2:08, ——.

Consolation trot—Elimination Plan—$150 for each heat—$100 to first, $50 to second. Money winners to go to stable:

Homer Mac, by Petigru.....(Knowles)	1	
J. C. B., by Hal B.....(Merrill)	2	
Hal Edo, by Hal B.....(Abbott)	3	1
Montana Belle, by Hal Mercury.....(Wright)	5	3 1
Francis J., by The Patchen Boy.....(Lindsay)	4	2
Kinney Wave, by Tidal Wave.....(Smith)	6	4 2

Time—2:14, 2:12½, 2:20.

—o—

The four-year-old pacer, Don F. 2:05¾, recently worked a half in 1:01¾. The horse will not be started this year in a race, but may be sent against time to lower the world's four-year-old record for pacing geldings held at 2:03¼ by R. H. Brett.

◈ ◈ ◈

Lucile Spier 2:06¼, on a half mile track won in the single roadster class at the recent Michigan State Fair at Detroit. She also won in the breeding class and champion sweepstakes class. Hooked double with Doris Watts 2:17¼, the pair won at that hitch, although they had never been hooked double previous to the day they were shown in the ring.

◈ ◈ ◈

Princess Welcome 2:07¼, the fast trotter which has raced so well in the West for Joe McLaughlin and was headed for the Lexington, Ky., meeting, broke a bone in one of her hind legs at the Springfield, Ill., meeting and will not race again.

LAST WEEK AT COLUMBUS.

Monday, Sept. 25.

2:15 class pacing, three in five, first division, purse $800:

Hal Connor, br h by Argot Hal.....(Childs)	6	4	1	1 1
Direct Dell, blk g by King Direct..(Rodney)	3	1	4	2 2
Hal King, blk h.....(Snow)	2	2	3	3 3

Also started—Anna Glynn, Colonel B., Drift Patch, Al McKinney.

Time—2:06¼, 2:07¼, 2:07½, 2:10¼, 2:08½.

Chamber of Commerce stake, 2:09 trotters, three in five, purse $3000:

Mabel Trask, ch m by Peter the Great.....(Cox)	1	1	1
The Eno, ch h.....(Erskine)	2	8	3
Harry J. S., blk h.....(Tyson)	5	2	4

Also started—Esperanza, Sister Strong, Bacelli, Bonnington, Vanco B.

Time—2:06¼, 2:05½, 2:06¾.

The Devereux stake, 2:15 trotters, three heats, $2000:

Early Don, ch g by Don Cale.....(Valentine)	1	1	1
Brescia, br m.....(Rodney)	3	3	3
Grand Chimes, b s.....(Edman)	2	4	3

Also started—Brisac, Lu Princeton.

Time—2:08¾, 2:06½, 2:06½.

2:15 class pacing, three in five, second division, purse $800:

Queen Hal, ro m by Gold Hal.....(McPherson)	1	1	1
Horace McKerron, ch h.....(Miller)	2	3	2
Major A., b g.....(Crossman)	5	2	5

Also started—Miss Patsy, Martin B., Miss Jean, The Aul, Baroness Watson, Count Marque.

Time—2:06¼, 2:06¾, 2:08¾.

To beat 2:05 trotting—Peter Scott, br h by Peter the Great (Murphy). Lost. Time, 2:05¼.

Tuesday, Sept. 26.

2:18 class, trotting, 3 in 5, purse $1200:

Zomrect, blk h by Zombro.....(McDonald)	5	1	1	1
Ridgemark, b g by Wilask.....(C. Traynor)	1	5	2	7
Isworthy McKinney, b h.....(H. Fleming)	2	4	12	2

Also started — Blanch Carter, Barbara King, John Wreath, Channing, Daisy Todd, Bingara, Hollyrood King, Sister Ella, Truesada, Judge Jones.

Time—2:09½, 2:06½, 2:08, 2:07¼.

Sweepstakes, three-year-old trotters, 2 in 3, $800 added:

Harrod's Creek, ch c by Gen. Watts.....(Engleman)	1	1	
Suldine, b c.....(W. Traynor)	2	2	
Maple Tree, b g.....(Murphy)	3	3	

Also started—Silver Mine.

Time—2:09¼, 2:09¼.

Arch City stake, 2:10 pacers, 3 in 5, $3000:

Ben Earl, b g by The Earl.....(Childs)	1	1	1
Jay Ell Mack, b h.....(Murphy)	2	2	3
Diumeter, b g.....(Grady)	3	3	2

Also started—Ashlook, Sir Anthony Carter, Baby Bertha, Kate McKinley.

Time—2:03¾, 2:00½, 2:03¼.

2:13 class pacing, 3 in 5, purse $1200:

Little Frank D., b g by Little Frank..(Valentine)	1	1	1
Young Todd, b g.....(Cox)	7	2	3
Baronwood, blk h.....(H. Fleming)	2	6	5

Also started—Bernice Alcantara, Robert Frisco, Muscle Shell, Frederick Hillis, Admiral Dewey II., Martin C., Tramp-a-Bit.

Time—2:05¼, 2:04¾, 2:04¾.

Wednesday, Sept. 27.

Board of Trade stake, 2:07 pacers, 3 in 5, purse $3000:

Roan Hal, ro g by Hal de Facto.....(Murphy)	1	1	1
Miss Harris M., b m.....(McDonald)	2	3	2
Goldie C., b m.....(Valentine)	4	2	3

The Savoy and Dr. Burns also started.

Time—2:03¾, 2:01¾, 2:03.

Free-for-all class, pacing, 2 in 3, purse $1500:

Napoleon Direct, ch h by Walter Direct..(Murphy)	1	1	
Single G., b s.....(Cox)	2	2	
*Russell Boy, b h.....(Valentine)	3	4	
*Hal Boy, b g.....(McMahon)	4	3	

*Divided third and fourth money.

Time—2:01¾, 2:01½.

2:08 class, trotting, 3 in 5, purse $1200, unfinished:

Allie Watts, ch m by General Watts....					
.....(Edman)	1	3	2	1	2
Bonnington, ch s by Bellini.....(Murphy)	4	1	1	3	4
Miss Perfection, b m by General Watts..					
.....(McMahon)	2	2	3	2	1
Virginia Barnette .....(Durfee)	3	4	4	4	3

Time—2:08½, 2:07¼, 2:08½, 2:10¼, 2:12¾.

Thursday and Friday, Sept. 28-29.

There was no racing on Thursday or Friday, owing to rain.

Saturday, Sept. 30.

2:08 class trotting, 3 in 5, purse $1200 (five heats on Wednesday):

Bonnington, ch s by Bellini (Murphy)	4	1	1	3	4	2	1
Miss Perfection, b m.....(McMahon)	2	2	3	2	1	1	2
Allie Watts, ch m.....(Edman)	1	3	2	1	2	dis	

Also started—Virginia Barnette.

Time—2:08¼, 2:07¼, 2:08½, 2:10¼, 2:12¾, 2:08¼, 2:10½.

2:09 class pacing, 3 in 5, purse $1200:

Beth Clark, blk m by Joe Patchen.....(Hedrick)	1	1	1
Solomon Boy, b g.....(Myers)	2	2	2
Van Burn, ch g.....(C. Valentine)	4	3	3

Also started—Fern Hal, Hal Mapes.

Time—2:09¼, 2:07¼, 2:07¼.

The Buckeye Stake, 2:12 trotters, 3 in 5, purse $5000:

Mabel Trask, ch m by Peter the Great.....(Cox)	1	1	1
Donna Clay, b m.....(C. Valentine)	2	2	2
Humfast, b m.....(Murphy)	3	3	3

Also started—Esperanza, Alma Forbes.

Time—2:07¼, 2:08¼, 2:06¾.

2:11 class pacing, 3 in 5, purse $1200:

Areta V., ch m by Constanero.....(Cox)	1	1	2	1
Queen Hal, ro m.....(McPherson)	8	5	1	2
Theda Bara, b m.....(Whitney)	2	3	4	5

Also started—Hal Leaf, Hazel H., Lady Venus, Willow Hal, Jimmie E., Harvey K., Black Wreath, Crystal Night, Al McKinney.

Time—2:05¼, 2:06¼, 2:05, 2:05¼.

2:15 class trotting, 3 in 5, purse $1200:

Pittsburgh, ch g by General Athol...(Murphy)	9	1	1
Jeanette Speed, blk m.....(Cox)	1	2	9
Trusty McKinney, blk m.....(McDonald)	3	8	2

Also started—Lotta Watts, Miss Winter, Doris Watts, My Boy, Colonel Riser, Black Peter, Ormonde Rose, Gum Drop.

Time—2:11¼, 2:10, 2:10¼, 2:10¼.

2:10 class trotting, 3 in 5, purse $1200:

M. L. J., b g by Red Mill.....(Leonard)	1	1	1
Jack K., s g.....(Gray)	3	3	2
Todd Temple, br g.....(Jamieson)	4	8	3
*McCloskey, br g.....(McDonald)	6	5	4
*Baron Robinhood, b s.....(Swain)	5	4	6

*Divided fourth money.

Also started—Vanco, Nathan Axworthy, Sombrero Clay, Al Mack.

Time—2:09¼, 2:07¼, 2:09¼.

—o—

Stellamaris (2) 2:23½, the three-year-old filly which was second to Bingen Silk 2:07¼ at Indianapolis, Ind., died at Columbus from blood poisoning caused by an ulcerated tooth.

◈ ◈ ◈

Fenesta, a two-year-old by San Francisco 2:07½ out of the noted trotter, Fereno 2:05½, was given a record of 2:21¼ by Harry Stokes. This filly is owned by Wilbur Myers, Springfield, O.

Thoroughbred Matters

An effort will be made this winter to have the State Legislature pass a bill which shall put racing in California under the control of a commission as it is in Kentucky, Nevada and other states, and to permit betting on race results by the pari-mutuel system within the enclosure where such racing is being held and nowhere else. Such a law as the Kentucky law would, beyond any doubt, do a great deal for the thoroughbred and also the trotting horse industry of California, and a bill actually framed in those interests might be passed and approved, but there will have to be "eternal vigilance" practiced by the breeders if they would keep from the bill anything and everything that the race track gamblers will attempt to have inserted in it that will permit them to run continuous meetings of a month or more in each county. A bill that will permit racing to be held for 30 days in each county will offer the opportunity for tracks to be built in San Mateo, San Francisco, Alameda, Contra Costa and Marin counties, all within 30 minutes of this city, and five months of racing held from the first day of November to the first day of April each year, which would make the racing evil as bad as it ever was. Two weeks' racing during the year with pari-mutuel betting is sufficient for any community and it might be wise to limit this racing to a certain radius instead of by counties. The two greatest breeds of horses in the world, the thoroughbred and the trotter, were built up before continuous racing was inaugurated and commercialized by those who conduct it as a business instead of a sport.

◈ ◈ ◈

Geo. Wingfield of Nevada has purchased in England a full brother to his two-year-old Mont Blanc that died last spring. It is a yearling colt by Grey Legs out of Bernini, and is expected to reach New York in a few days. Mr. Wingfield also purchased Bernini, but she will not be shipped to America until after she is again mated with Grey Legs in the spring.

◈ ◈ ◈

The Douglas Park, Louisville, meeting came to an end September 26th with an attendance close to 20,000. The A. K. Macomber stable won the five and a half furlong race that day with Kittenish, ridden by Phillips. Trainer Walter Jennings put over one winner each day of the meeting for the Macomber stable.

◈ ◈ ◈

Senor S. J. Unzue of Argentina has recently purchased from Sir Robert Jardine, of England, the bay four-year-old colt Sunbar by Sundridge out of Baronne by Melton, second dam by Ladas and third dam the famous La Fleche by St. Simon. Sunbar was a good winner in England, and his breeding is exceptional. His new owner is also the owner and breeder of Occurrencia, the best three-year-old in Argentina last season, when she won ten races and a little over $80,000.

◈ ◈ ◈

Canada is on the eve of a turf war and the outlook at present is very stormy. With the idea of saving racing in the Dominion the other associations issued a warning to the horsemen against racing at the new Devonshire Park race course in Windsor and some of the horsemen have taken affront at this ruling and look upon it as an outlaw threat. The Canadian branch of the Thoroughbred Horse Association held a general meeting in the King Edward Hotel and the matter was gone into and discussed.

◈ ◈ ◈

The lack of opportunity to race in England, with the resultant withdrawal of horses from the training stables, is beginning to show in the sales of yearlings and older horses, and in the curtailment of breeding operations, especially by men who rear thoroughbreds for the market as a matter of combined business and pleasure. From a total of about $1,600,000 realized in 1913 for 683 yearlings sold by auction returns for last year fell below $400,000 for 584 lots, the average being considerably less than one-third as much as before the war. This year's prices are still lower, scores of well bred yearlings having been struck off at the price of common hacks in the July sales at Newmarket. With racing now all but suspended, a complete collapse of the market is feared.

◈ ◈ ◈

Grand Prix de Paris Most Valuable Race.

The most valuable race in the world is the Grand Prix de Paris. It was last run in 1914 when Baron Rothchild won it with Sardanapale, ridden by George Stern, and the stake secured by the son of Prestige was $75,600, with $4,000 for the breeder. It was run on Sunday, June 28th, 1914. It only costs $200 to start in this stake, $125 to scratch, $100 for those who declare out on the Wednesday preceding the race, and $20 to declare May 1st. Another rich prize is the Melbourne Cup run at Melbourne, Australia. It is a handicap sweepstake of $150 each, with $40,000 added, and a trophy valued at $750 for the winner, the second horse receiving $7,000 and the third $3,500 out of the stake. The race is run November 7th.

WHEN ANDREW JACKSON MADE MATCH RACES.

In that very interesting volumne entitled "Making the American Thoroughbred" from the pen of James Douglas Anderson of Madison, Tennessee, many stories of the turf as related by Hon. Balie Peyton, lawyer, diplomat, statesman and soldier, during his lifetime to the author of the book, are given. Stories of Gen. Jackson are numerous.

Horsemen of the present generation have known in a rather vague way that Jackson was first and foremost among the Presidents as a breeder and turfman, but it has remained for the painstaking author of "Making the American Thoroughbred" to prove that Old Hickory, for twenty years or more, stood at the very head of the turf in the great racehorse region of the West. As showing the extent of his stud and stable in early days it is related that on one occasion, when Captain Erwin offered to run Tanner against any horse in the world, four mile heats, for $5000 a side, the person accepting the challenge to name at the post, General Jackson took the bet and trained sixteen horses, Truxton and Greyhound among them. He started Greyhound and won the race in three heats.

This was in the fall of 1805. In the spring of the same year Greyhound, then owned by Lazarus Cotton, had beaten the General's favorite racer, Truxton, when the latter was out of condition, at mile heats over the course at Hartsville. With characteristic determination to conquer, Jackson at once made another match for $5000 a side, to be run over the same course. In referring to this match Peyton says no other horse race in the history of Tennessee was so exciting or caused so much betting. Money was scarce in those days, and the settlers wagered their horses, their crops, and even their land and their clothes on the result. Old pioneers, who were accustomed to quarter racing and had witnessed the indomitable gameness and great success of Greyhound, staked tracts of land a mile square on the little gelding that was under fifteen hands high. Jackson, long afterward, told Peyton that besides the main stakes he won $1,500 in wearing apparel, and that his friend Patton Anderson, after betting all his money and the horse he rode to the race, staked fifteen of the finest horses on the grounds, belonging to other persons, many of the horses having ladies' saddles on their backs.

"Now, I wouldn't have done that for the world," Jackson said, "but Patton did it, and as he won and treated to a whole barrel of hard cider and a basket full of ginger cakes, he made it all right."

Successful beyond any turfman of his time in the country in which he lived at making matches and winning them, Jackson ran afoul of one race nag he never could beat. Her name was Maria, or Haynie's Maria, as everybody called her, and she was the last of the offspring of Truxton's sire, Diomed, got when the first Derby winner was thirty years old. She was a dark chestnut, fifteen hands high, and she could run and win at all distances from a quarter of a mile to four mile heats. Her crushing defeat of his colt Decatur, son of Truxton, at Nashville, in the fall of 1811—she distanced him and three others in the first heat—aroused the ire of the General, who swore "by the Eternal" he would have revenge if a horse could be found in the United States to give it.

He bought an interest in Colonel Ed. Bradley's Dungannon the next season, but the little mare defeated him decisively at four mile heats. Then he ransacked Kentucky, Alabama, Georgia and South Carolina, and finally wrote to Colonel William R. Johnson, "the Napoleon of the Turf," to send him the best horse in Virginia, without regard to price. Pacolet, a son of imported Citizen, that had greatly distinguished himself at four mile heats, was sent on at a high price. Maria took the measure of the Virginia champion with great ease at four mile heats, in a sweepstakes for $1000 a corner, at Nashville, in the fall of 1813. Not satisfied with the result, the General made a match between Pacolet and the mare for $1000 a side, to come off in 1814, but he paid forfeit, his horse being lame.

By this time the imperious turfman was as clamorous as Richard III. for a horse to save the day, and in conjunction with James Jackson, the importer of Glencoe and Leviathan, he sent to South Carolina and bought Tam o' Shanter, but once more the little mare remained unbeaten and unbeatable. Then came the champion of Kentucky to suffer three defeats before the man who could conquer the Seminoles, beat Adams and Clay for the Presidency, destroy the United States Bank and crush nullification in the bud would confess to failure. After the last race, in which he had sent all the way to Virginia for Colonel Lynch's famous negro rider, Dick, to jockey his mare, some Virginians present said there were horses in the Old Dominion that could beat Maria. Her owner, Captain Jesse Haynie, thereupon offered to match her against any horse in the world for $5,000 a side. Meeting General Jackson, Captain Haynie informed him of what had passed.

"Make the match for $50,000 and consider me in with you; Maria can beat any animal in God's whole creation," were the words in which Old Hickory acknowledged his unconditional surrender to one he could never defeat.

Not a page of the three hundred in Mr. Anderson's book is given over to discussion of matters relating to the breeding, training and care of horses. It is all history and anecdote of the close, personal, human sort, which takes the reader back into another world, as the author says in speaking of the old spirit of the times, "to form intimate friendships with the chief actors of a great drama, whose names, once household words in many States, are now unknown where their ashes lie buried." Sketches are given of old-time celebrities among turfmen, breeders, trainers, jockeys and horses; of tracks and races unknown to Herbert, Irving, Wallace, Trevathan or any other turf historian, and there are scores of pedigrees that have never been published in any of the stud books. Original investigation is apparent all through the volume, and unusual care seems to have been taken to avoid the numerous errors common to such works. What the reward of the author's labor will be is made plain by the fact that only 750 copies of the book were printed from type, which was then distributed.

American Strains in Winners in France.

Trainer Duke, who had such remarkable success with the string of thoroughbreds that W. K. Vanderbilt has raced in France, says that the yearlings from American mares "can run away and hide from everything else in the stable." That was a big thing for the American strain, for the dam has never been given her share of the credit in the thoroughbred world. This estimate of Trainer Duke has been borne out in the racing that has been had in France this season.

In the latest issue of the French Calendar, just received in New York, the greatest of the Vanderbilt successes have come from horses of American parentage.

Meigs, a bay son of Peter Pan and Megg's Hill, was winner of two of the best prizes offered during September. The racing was at Caen, and on Sept. 5 he was winner of a seven and a half furlong stake for three-year-old colts that was worth 10,000 francs. Then two days later he also scored over the same distance in a race of like value and framed for three-year-olds and four-year-olds. In each of these races he took up 128 pounds and was ridden by Frank O'Neil, the American jockey.

This was not the only recent American victory, for the same day that Meigs was winner of a colt race Popinjay, a daughter of Delhi and Pope Joan, was winner of a filly stake of 10,000 francs over the same route, under 128 pounds and also ridden by O'Neil.

It will be remembered that both Pope Joan and Megg's Hill were sent to France carrying the foals that have since made good so adequately. Both of these mares were bred by the late James R. Keene, and Pope Joan is a daughter of Disguise and Editha, an imported daughter of Master Kildare. Disguise was a son of Domino, one of the strains that is barred in the English stud book.

Then Megg's Hill, the dam of Meigs, has the same bar, for she is by Domino out of Runaway Girl, and this brings it a bit closer than in the case of Popinjay, though he has shown himself to be a better performer.

This is just one more convincing argument for the stout old American blood lines—a line that is barred in the English Stud Book, but a line that has ever made good as long as horses are raced.

This is not the only good news that is found in the French Calendar. A report is made of a victory of importance scored by Mesilian, a four-year-old half-brother to Romagne, the broodmare that was imported by Willis Sharpe Kilmer, the Binghamton, N. Y., breeder. This colt is a son of San Sousi II. and Malatesta, while Romagne is a daughter of Polymelus and Malatesta, a much more fashionable male line.

Why English Owners Do Not Race in America.

"Why don't the British breeders send their yearlings to New York, where the market for race horses is booming and where prices for yearlings are now materially higher than in England?" And the question might be added, "Why don't the British turfmen send their 'made' horses here to race?" They can find plenty of engagements until the war is over, and plenty of buyers as well. This country is short of race horses, while in England hundreds have been thrown out of training for want of opportunity to earn their oats.

These questions were put to a turfman who has been identified with racing here and in England and the West Indies, by a New York Herald reporter, and the answer was prompt and direct as to why British race horses are allowed to stand idle at home instead of coming to the United States to race.

"American purses and stakes are trifling in value as compared with those in England," he said, "and British turfmen will never come here to race their horses until the racing associations cease to conduct their meetings for revenue first and sport as a secondary consideration. The profits that some of them are making would be considered scandalous in England. Why, I know of one track that cleaned up $100,000 in thirty days this year, and it wasn't a New York track either. If the men who run it were in the game for sport and not to make money out of it they would turn back at least $75,000 of their profits and give some stakes like the Eclipse and the Jockey Club stakes in England. Then you might see some British turfmen racing in America, but you never will until the associations are content to take less themselves and give more in purses and stakes."

John E. Madden has purchased the yearling chestnut colt by Jim Gaffney—Lenora Pearl, from T. B. Jones of Winchester.

Harness Horses and Horsemen

Jim Logan 2:01¾ Will Be Retired.

When J. Elmo Montgomery reached his home at Davis, Yolo county, a few days ago, after a triumphant campaign over the Pacific Coast this summer with his ten-year-old pacing stallion Jim Logan, he announced that the old hero of many a hard-fought battle would be retired from the turf. It was in August, 1909 at Salinas, California, that Jim Logan made his debut on the race track, he being at the time a three-year-old. It was in the three-year-old pacing division of the Pacific Breeders' Futurity and he had but one competitor, Teddy Bear. Jim Logan wore the hopples and Teddy Bear did not. Jim won in straight heats in 2:15½, 2:16½ and 2:13¾. At Pleasanton the following week he met a bunch of aged horses in the 2:10 class, and beat them in straight heats, lowering his record twice during the race, the last heat in 2:11¼, the fastest. His third and last race that year was at Woodland where he defeated Adam G., Freely Red, Grace R. and Alto Genoa, all older than he, in straight order, pacing the first heat in 2:09¼, the second in 2:09¾ and being given his head in the last heat paced the mile in 2:05½ . Eleven years before Klatawah, a California bred three-year-old, had won the first heat of a race at Louisville, Kentucky, in 2:05½, but was beaten in the race. Two years before, at the Woodland track, Aerolite had paced a public trial in 2:05½, but here was a three-year-old that in a race against aged horses after winning two heats in better than 2:10 had paced a third heat in 2:05½, which was a world's record and certainly a greater performance than either of the others. Jim Logan held this championship until 1912 when Impetuous Palmer reduced it a quarter of a second in a trial against time, and the following year, the now famous pacer William 1:58½ paced to a record of 2:05 in the second heat of a race, and in 1915 Gen. Todd lowered this to 2:04¼ in a second heat. We believe that Jim Logan's record of 2:05½ is the fastest ever paced by a three-year-old in the third heat of a race.

Jim Logan was not raced as a four-year-old but in 1911, when he was five, he started five times, winning three races, in which he defeated Adam G., Happy Dentist and others, and he was in turn defeated twice by Adam G. At Marysville, where Jim Logan won in straight heats, he paced the third heat in 2:05½, equaling his three-year-old mark, but he did not lower his record.

In 1912 Montgomery took his horse east, and made four starts. He won at Lansing, Michigan, but did not reduce his mark. At Grand Rapids in a race won by C. The Limit he was distanced the fourth heat, and Don Pronto was distanced the second heat in the same race.

At Kalamazoo he was outside the money in a race won by Branham Baughman, but at Detroit he won the $2500 2:05 class and reduced his mark to 2:03¼. He defeated C. The Limit, Branham Baughman, Don Pronto and five others in this race.

In 1913 Jim Logan raced in California. starting three times. He defeated Don Pronto at Santa Rosa in 2:06 and 2:04¼, at Woodland he won in straight heats over Don Pronto, Dan Logan and Mike C. in 2:02¾ and 2:04¼, but at Sacramento Don Pronto beat him in 2:02½ and 2:02¾.

He also raced on the coast in 1914, winning his races at Santa Rosa and Woodland, in which he again reduced his record to 2:01¾ in the first heat at the last named town, but at Sacramento he was defeated by Leata J., although he took the third and final heat of this race which was on the three heat plan. He started twice at Phoenix that year, being second to Don Pronto the first race and fourth to the same horse in the other.

Jim Logan made but one start in 1915 and that was at Woodland in May. He won in straight heats in 2:06 and 2:08.

This year his first start was at Santa Rosa, where Rastus beat him two heats in 2:04¾ and 2:06, but Jim Logan won the third heat in 2:06¼. At the Dixon meeting (half mile track) he won both his starts, the fastest heat in 2:08¾, and at Sacramento he won the free-for-all in straight heats, best time 2:07. He was then shipped north to the Washington State Fair at North Yakima, where he won handily, 2:09¼ being the fastest heat, and the following week at the Oregon State Fair won the free-for-all in straight order, 2:07½ being the fastest heat.

This race, we understand, ends his racing career, it being Mr. Montgomery's intention to retire him permanently to the stud, where he is already getting a name for himself, his daughter Maxine, the first of his get to race, having followed in his footsteps and won first money in the Pacific Breeders' Futurity, her first start.

During Jim Logan's career on the race track he has started in about 25 races and won very close to $8000.

Jim Logan 2:01¾ is by Charles Derby 2:20, his dam Effie Logan by Durfee, being the dam of Sir Albert 2:03¾, Dan Logan 2:07¼ and Lock Logan 2:07¼, his second dam is Ripple by Prompter, third dam Grace, great broodmare by Buccaneer, fourth dam another great broodmare, Mary by Flaxtail, and fifth dam Bright Eyes by a son of the running horse Boanerges. Jim Logan was bred by M. J. McInerney, of Davis, Cal., and was purchased when a colt by his present owner. He has been a game race horse and a perfect bulldog in the stretch, as he never quit trying and few horses could ever head him once he got his nose in front after passing the three-quarter pole. He has earned a good many dollars for his owner and is entitled to the life of ease that has been planned for him. And during the years Jim Logan has been racing, his owner J. Elmo Montgomery will tell you, the horse's success has been in no small measure due to William Morrison, who has cared for the famous stallion, fed him and slept with him, and brought him to the races fit and sound and ready to do his best. And if the history of the fastest pacers bred in California is ever written, the credit of bringing Jim Logan to the track in condition to pace a heat in 2:01¾, and thereupon to become the third fastest pacer ever bred in the state, must in a large measure be given to "Tennessee Bill."

MABEL TRASK WINS TRANSYLVANIA.

Saint Frisco Wins Two Heats and Trots Fastest Mile in the Race.

The daughter of Peter the Great 2:07¼ and the son of San Francisco 2:07¾ met for the ninth time this year at Lexington on Thursday last week and the mare won after a five heat battle. It was called in the dispatches a decisive victory, but the summary shows that Saint Frisco won two heats, one of them the fastest of the race and tying the Transylvania record, and second in every other heat, while Mabel Trask was third twice. On the point system, which some race managers claim is the ideal plan on which to decide the winner, but which this very race proves the absurdity of, Saint Frisco with eight points would have been given first money over the mare whose points totaled nine. In the nine times these two great trotters have met this year Mabel Trask has won six races and on this record she must be given the verdict of being the better race animal, although the stallion is a fraction of a second the fastest by the records. Cox was up behind Mabel Trask while Murphy drove Saint Frisco for Geers who is not yet able to drive, but the G. O. M. was there to see the event and was satisfied that Murphy drove as good a race as anybody could.

Mabel Trask won the first heat in 2:05¾, only beating the stallion by a small margin, and in the second heat Cox got into a pocket from which he could not extricate himself and finished an easy third, while Saint Frisco won in 2:03½ which tied the record Etawah made in the Transylvania of 1914, when Geers drove that horse to victory. In the third heat Mabel out-trotted the Saint, and the mile was in 2:04¼, but in the fourth heat, as Cox pulled her out at the three-quarter pole to go round the others, the mare broke and once more had to be contented with third position at the wire, while Saint Frisco won in the slow time of 2:08¼, showing that there was nothing else in the race that could give either the mare or the stallion an argument. The fifth heat Mabel won decisively, in 2:06¼, fast time for a fifth mile. There were seven starters in the race and the short summary sent by telegraph is as follows:

Transylvania, 2:08 trot, 3 in 5; value $5000:

Mabel Trask, ch m by Peter the Great ..... (Cox)	1	3	1	3	1
St. Frisco, b h ..... (Murphy)	2	1	2	1	2
Sadie S., b m ..... (McMahon)	3	5	6	2	3

Also started—Donna Clay, All Mack, Alma Forbes, Bacelli.

Time—2:05¾, 2:03½, 2:04¼, 2:08½, 2:06¼.

The Transylvania has developed many great contests since the gray gelding Jack, driven by Budd Doble, won the inaugural race in 1889,

The following year Doble brought McDoel in as the winner, with the great Allerton standing for second money. Since then such famous horses as Kremlin, Azote, Boralma, Sweet Marie and Sonoma Girl, have won the Transylvania. In 1914 Ed Geers won the stake with Etawah, and set the record for the race at 2:03½. In 1915 Peter Scott capped his $50,000 winning campaign by winning the Transylvania, 2:05¼ being the fastest heat.

As soon as the last payments on the horses entered in the Transylvania of 1916 were made on September 1st, it was believed by all horsemen that the race would be a duel between Mabel Trask and Saint Frisco, and such it has proved to be. The New York Herald turf writer states the following interesting facts about these two trotters:

These two remarkable trotters have met nine

These two remarkable trotters have met eight times this season in the most important races of the Grand Circuit. At Cleveland, Detroit and Kalamazoo, the first three meetings of the series, Mabel Trask outtrotted St. Frisco "square and fair," and the shrewdest horsemen who follow the circuit then thought she would go on and win every race in which she had been entered to the end of the season. In their first race at Cleveland ,and again the next week, in the $10,000 race at Detroit, St. Frisco was driven by his amateur owner, Frank G. Jones, of Memphis, Geers having been injured just before the Cleveland meeting. Mr. Jones is regarded as one of the best reinsmen in the country, amateur or professional, and he won a heat with the stallion at Cleveland in 2:04¼. At Detroit the mare won more decisively, and in straight heats, the fastest of which was 2:05¾. Geers was lifted into the sulky to tr his hand at Kalamazoo a week later. St. Frisc forced Mabel Trask to trot in 2:03¾ to beat him o this occasion, but she did it, again winning in straigh heats.

The average horse and the average driver woul have acknowledged defeat after this series of vi tories for the mare and would have gone down th line content with taking second money and savin the terrific strain of trying to beat a little faste horse. But Geers, who resembles Grant in mor ways than one, looked at the delicate neck of Mabe Trask after each contest and drove St. Frisco al the harder at the next town, confident that he woul wear her down and conquer in the end.

At Pittsburg the dream came true. The mare di not like the track, which was slow. All tracks lool alike to the wiry, homely, hard trying horse Geer was driving, and while Mabel Trask broke and acte as if she didn't altogether relish it he kept right o putting in his best licks and beat her, trotting on of his heats in 2:04¼.

From Pittsburg the horses went to Columbus There Cox changed his tactics after losing two heat and adopted Geers' style of driving. Instead of going to the front he dropped in behind the leaders and made his race through the home-stretch and won In this race St. Frisco earned his record of 2:03¼ the fastest of the season in actual contest. At the second Cleveland meeting, which followed Columbus Cox drove it the same way and Mabel Trask again won with seeming ease. She appeared to be clearly mistress of the situation, closing gaps of half a dozen lengths or more in the last half each time and winning handily at the wire. Geers' horse looked rather jaded and thin. The writer saw them for the first time this meeting and came away thinking the mare could give the stallion ten lengths and win.

When the trotters went East to Poughkeepsie the next week Cox dodged the race against St. Frisco, which everybody had expected to see. Both were entered in the 2:08 class, for a purse of $5000, but Mabel Trask also was entered in the 2:12 race, for a purse of $2000, and she filled the latter engagement, letting St. Frisco take the larger prize without an argument. It was a tribute to the stallion such as Cox does not often pay to any horse and it indicated that he did not regard the mare as invincible. But his main object was to avoid a hard race and so keep her fresh for the five thousand dollar Charter Oak purse at Hartford one week later.

It was at Hartford on September 7th that Mabel Trask and St. Frisco trotted their greatest race, and a good many old horsemen are now calling it the greatest race ever trotted in the Grand Circuit. It went to six heats, and the time of the first and the last was exactly the same, 2:07¾. The fifth heat, in 2:06½, was the fastest of all, and between this and the slowest heat the difference in time was only a second and a quarter. Though six horses started the contest was wholly between the stallion and the mare, no other horse having once finished first or second, and the real contest was always in the last half mile, which they trotted in 1:01½ or better in every heat except the final.

In three of the heats the last quarter was trotted at a 2:00 clip or faster. Not more than a head separated them at the finish of any heat, and the second was so close that the judges called it a dead heat. Mabel Trask won the first and third heats, and St. Frisco the next three.

At their last meeting, in Syracuse, the following week, St. Frisco defeated Mabel Trask in decisive style and in straight heats. In this race Cox drove from wire to wire, instead of trailing, as he had done at Columbus, Cleveland and Hartford. In the second heat, trotted in 2:03¼, Richard Delafield's crack stallion Al Mack, from the Orange county half mile tracks, beat the mare for the place, moving the last half in 1:00.

By winning this race, which was for a purse of $10,000, St. Frisco supplanted Mabel Trask as the largest winner of the year, with $19,550 to his credit, as against $19,150 for her, but she took the lead again at Columbus by winning the $10,000 race there, in which he was not a starter. She also leads the stallion in the number of races won, having beaten him six times out of nine.

Both of these great trotters were bred by New York horsemen. W. C. Brown, then president of the New York Central Railroad, bred Mabel Trask, whose sire was Peter the Great 2:07¼, then owned by W. E. D. Stokes. Her dam, Miss Nutonia, was by Nutwood 2:18¾, out of Iona 2:17½, by Alcyone 2:27 out of that famous founder of a trotting family, Jessie Pepper, by Mambrino Chief. She is now owned by Barton Pardee, of Lock Haven, Pa.

St. Frisco was bred by the late L. V. Harkness, of the Standard Oil Company. His sire, San Francisco 2:07¾, was bred by P. W. Hodges of California, who sold him to Mr. Harkness. San Francisco is by Zombro 2:11 and out of a mare by Nutwood Wilkes that was bred by the late Martin Carter. Clara Cantrill, the dam of St. Frisco, was got by Clarence S. 2:19½ a son of Wilkes Boy 2:24½, and was out of Cantrill, by Nutwood, out of Miss Redmon 2:29½ by Bourbon Wilkes. After his winning a five heat race at the Empress track last year Geers said St. Frisco was the gamest colt he had ever driven, and at Hartford this year he proclaimed him the greatest race horse he had ever seen. Both of the great trotters are five-year-olds.

Notes and News

Let's have a California Circuit in 1917.

◈ ◈ ◈

A real circuit with all the dates and all the purses announced together.

◈ ◈ ◈

And let's have this announcement made by January 1st, so that the horsemen will know what horses to train and what purses to train for.

◈ ◈ ◈

It will be just as easy to announce a meeting by January 1st, as it will be to let things drift until May and then try to get up a program.

◈ ◈ ◈

There are twelve or fifteen towns in California that can hold a fair and race meeting that will draw crowds of people if properly managed and generously advertised.

◈ ◈ ◈

The futurities are the very life of the breeding industry, and every man who breeds trotters or pacers should patronize them so far as he is able.

◈ ◈ ◈

The point system of racing has only been tried at a few tracks this year and has resulted in no satisfaction for anybody unless it was the owner of a cheap horse that "just happened" to figure first without winning a heat.

◈ ◈ ◈

White Sox won a good race at Lexington on the opening day of the meeting. She won the second, third and fourth heats of the 2:08 pace in 2:08, 2:05¾ and 2:07¾. Six horses started.

◈ ◈ ◈

$7500 was offered and refused before the race for the pacer Peter Look, winner of the three-year-old pacing division of the Horse Review Futurity. Peter Look is a bay colt by Peter the Great, dam by Bingen, second dam by Wilkes Boy.

◈ ◈ ◈

Young Todd 2:02¼, champion four-year-old pacing gelding and Miss Harris M. 2:01¼, champion four-year-old pacing mare, are both out of mares by Ondale, who was by Onward out of a mare by Jay Bird.

◈ ◈ ◈

When The Real Lady trotted that wonderful race for a two-year-old last Tuesday, with her heats in 2:07½ and 2:07, the filly Mary Coburn was second in each heat and there were four of the two-year-olds in the race that beat 2:10 each time.

◈ ◈ ◈

At Lexington on Wednesday, Murphy started Roan Hal in the 2:00 pace against Single G., Judge Ormonde, Braden Direct, Russell Boy, Fay Richmond and Hal Boy. This was for a $3000 purse, and Roan Hal won in straight order in 2:02¼ and 2:00¾, thus lowering his record again and getting very close to the 2:00 mark, which he will probably be able to reach before another season is ended.

◈ ◈ ◈

C. A. Harrison has our thanks for a complete summary of the Salem, Oregon, races last week. He states there were about 40,000 people at the fair on Thursday, the day Bon Guy won the $2,000 trot, about 25,000 on Saturday, the final day of the meeting, and that the races were the big drawing card of the fair.

◈ ◈ ◈

Geo. Manning, buyer for Wells, Fargo & Co., has just concluded the purchase of 214 head of fine horses at Klamath Falls, for the use of the company in different parts of the country. Two car loads were shipped to Dallas, Texas, last week, twelve head being fine blacks that are considered as near perfect as any horses ever sent to market from that section. Wells, Fargo & Co. finds while they use many gas and electric trucks, that horses for light and heavy delivery are more economical.

◈ ◈ ◈

Zomrect 2:05¾ by Zombro is the surprise of the season to Los Angeles horsemen who saw him at work at Los Angeles in the spring. At that time a mile in 2:15 was about his limit, but his owner had confidence in him and sent him across the mountains. He has been beating good horses lately, his race at Lexington last Wednesday when he defeated Brescia, Miss Pinkerton, Brisac, and seven others in the 2:18 trot for a purse of $2000, being a particularly good one. His heats were in 2:05¾ and 2:06¼, and it is said he won handily.

◈ ◈ ◈

C. A. Durfee says that if there should be a circuit of ten meetings announced for the season of 1917 in California he will get a string of horses together and try for some of the purses. The success he had with W. G. Durfee's colts this year when he won between eight and nine thousand dollars, has made him feel as if he would like to try one more season for himself, consequently should a circuit be announced early he will unpack about a thousand dollars' worth of sulkies, carts, boots, blankets, scrapers, rub rags, coolers, whips, etc., that he has been offering to sell for $100, and will clean them up for the season of 1917. We knew he was not quite ready to retire.

Nowaday (3) 2:14¼ is now the dam of 10 standard performers.

◈ ◈ ◈

Sister Scott (4) 2:17¼, a new performer ,is a full sister of Peter Scott 2:05.

◈ ◈ ◈

Gen Watts has five new 2:10 trotters to his credit this year and the racing season is not yet over.

◈ ◈ ◈

Seven geldings by J. Malcolm Forbes were given records in one afternoon at Lexington, week before last.

◈ ◈ ◈

Royal Mc 2:09¼ is another new 2:10 trotter for the McKinney family. His sire is Royal McKinney 2:15¾.

◈ ◈ ◈

The same week that Copius won a race at Salem, Oregon, his sire La Copia won a race more than three thousand miles away in Nova Scotia.

◈ ◈ ◈

The Lexington, Ky., sale is on this week, and an especially attractive lot of youngsters and aged material will be disposed of.

◈ ◈ ◈

The new track at Erie, Pa., is ninety-two feet wide in the home-stretch, and in another season should prove one of the best courses in the country.

◈ ◈ ◈

Hal B. Jr. 2:02¼ won in 2:05¾, 2:06¾ and 2:06½, over a half mile track, last week and administered to Yedno 2:02½ her first defeat in a long time.

◈ ◈ ◈

Chauncey H. Sears of Fall River, Mass., owner of Mary Putney, has bought a two-year-old filly, by Peter the Great 2:07¼, dam by Charles Derby 2:20.

◈ ◈ ◈

Last week Wicky Curry drove ten yearling trotters to standard records. Of this number seven were by J. Malcolm Forbes (4) 2:08, two by Mainleaf (3) 2:08¼, and one by Axoff (2) 2:14¼.

◈ ◈ ◈

We should call starting a horse in a race where he was so far outclassed that he was certain to be distanced the first heat, all for the sake of getting a second off his record in next year's classes, taking a mean advantage of a good rule.

◈ ◈ ◈

A total of 320,000 people attended the Minnesota State Fair at Hamline, and on Monday, September 4th, over 90,000 persons are said to have passed through the gates.

◈ ◈ ◈

The usual fall auctions are being held on the farms throughout the State, and it is a noticeable feature that farm horses are bringing more money than they did last year, and command a readier sale.

◈ ◈ ◈

Miss Loula Long, of Kansas City, Mo., is getting together a road four that will be able to trot in 2:30. She recently purchased the six-year-old stallion Colonel Vidmer 2:15¼, a very handsome horse with great style, and will try to get three more of his type if possible.

◈ ◈ ◈

Lucille Spier, the brown mare by Directum Spier that took the world's record for mares on a half mile track by trotting in 2:06¼, trotted a mile against time at Lexington on Wednesday in 2:03¼, which is the season's record for mares.

◈ ◈ ◈

Eieher Murphy or Cox will lead the list of money winning drivers for 1916, with the odds in favor of Murphy as he is ahead now and is driving Ed Geers' horses in addition to his own. His winnings will amount very close to $50,000 by the end of the season.

◈ ◈ ◈

Reginald C. Vanderbilt gave a special prize for colts by his prize winning hackney stallion Tiger Lillie and judged the class himself at the horse show held in connection with the Newport County Fair a few days ago. Ten youngsters were shown by Rhode Island breeders.

◈ ◈ ◈

To date the sum of $252,275 has been distributed by the Chicago Horse Review in its futurities. The first Horse Review Futurity was announced in 1890 and the first race decided in 1894. As every division of every stake has been promptly paid, it is a record never equaled by a turf journal and one of which Mr. Bauer should be justly proud.

◈ ◈ ◈

If there could be an organization of California thoroughbred horse breeders and owners that would affiliate with The Jockey Club of New York, and run under its rules, much good would be done for the thoroughbred breeding interests. It would stop the racing of two-year-olds in January and other foolish and injurious practices.

◈ ◈ ◈

Dick W. won the 2:24 class trot at Hanford last Wednesday, Dr. S. getting second money and Miss San Francisco third. The best time was 2:19¼. In the 2:13 pace Silver Tips won the first heat, Julia M. the second heat and Ben Corbett Jr. the third heat. The track was slow on account of rain. On Thursday Teddy Bear won the 2:10 pace, in straight heats, best time 2:14, defeating Pointer's Daughter and A. B. C. and a special pace between Bold Harry Aerolite, Zomar and Breezy Marie was won by the first named, the fastest heat in 2:17¼.

SADDLE AND SHOW HORSES.

Richelieu King, a golden chestnut son of Bourbon King, conquered one of the greatest fields that ever trod the tanbark in a five-gaited saddle ring in the Kentucky Championship, the feature of the entire week of the horse show at the Kentucky State Fair. Last year this veteran of the show ring was second in the big stake, but this year he came back better fortified to win, and would not be denied. Ridden by Walter Briggs, the veteran trainer for Powhatan Woolridge, Richelieu King took the lead at the start and never let the honors slip from his grasp. He was crowned king of the five-gaited saddle horses of Kentucky, though the event was open to the nation and two candidates from another State competed.

In winning the Kentucky Championship, Richelieu earned the highest honors he could for his master before he is retired to the nursery. He will retire from the tanbark in the full bloom of his glory.

Sterling Nicoll, of Woodburn, was second with his great mare, Golden Firefly. This chestnut mare had been showing well the week, but here she made the greatest show of her career. From the time she started on her slow gait before the judges until she stood in line to receive the red tie she never let up in her work. Her owner, who has been ill all through the week, had the mount. She was one of the choices of the public.

Billy Shropshire, who had ridden more winners of the big stake than any other horseman, was third with Easter Cloud, a chestnut stallion owned by H. A. Greenwell, of Lakenan, Mo. This horse put up a great show, and he might have been a bit closer up had he shown before the judges when alone as he did later in the field.

Edgar T. Doty, of Richmond, was fourth with Maydam. This son of Jack Twigg loomed up as a possible winner early in the action, but when the others got under way his chances receded.

◈ ◈ ◈

William Bradley, treasurer of the Fiss, Doerr & Carroll Horse Company, of New York, and breeder of the champion trotting stallion Lee Axworthy 1:59½, is negotiating with the Entente Allies to supply 50,000 horses for cavalry, artillery and transport service in the European war zone. The contract is an unusual one, in that the horses, if sold, are to be delivered in Europe. This involves risk and expense which no ordinary concern in the horse market can afford to take, and the deal, if it goes through, will doubtless represent more money than the foreign buyers have yet paid for 50,000 American horses. Buyers from the home office and stables in East Twenty-fourth street are now in the West looking into the prospect of collecting this large number of horses of the types required on short notice, and when their reports come in the contract will be signed if price and terms can be agreed upon. The Fiss, Doerr & Carroll people supplied 25,000 horses for the Italian army last year, and might have had many other contracts with France and England, but the auctions held regularly on Mondays and Thursdays and the retail trade in work horses of all kinds were keeping all hands so busy that the war business was left to other dealers.

◈ ◈ ◈

Officers of the National Horse Show Association are watching the situation on the Mexican border with somewhat anxious interest, owing to the fact that several thousand dollars have been offered in prizes for military riding competitions at the Horse Show which opens in Madison Square Garden on November 11, and the regulars and members of the National Guard who are now at the front have been counted on to make this feature of the exhibition. If the troops come home before entries close on October 18 men and horses will be fit and ready for a splendid show, but if the uncertainty continues and they are held on the border there is danger that the money and cups may have to go begging for competitors, since the great war in Europe has cut off the British, French and Canadian army officers who used to compete at the Garden every year. To guard against this the directors of the Horse Show will, if necessary, apply to the Secretary of War for leave of absence for such army officers as wish to ride at the Garden, the exhibition being in the nature of a public affair which is recognized as beneficial to the service in more ways than one.

◈ ◈ ◈

The new medal offered by the Arabian Horse Club for the best saddle horse exhibited at the Westchester County Horse Show this year was won by W. H. Rhodes' chestnut gelding Radiant, ridden by Miss Edith Beavor-Webb. Competition was open to all breeds, and some of the best horses in the country tried for the prize. Brought out last year by W. A. McGibbon, Radiant has campaigned steadily at Eastern shows, winning twenty-three blue ribbons, besides several championships and reserve ribbons. He is rated by competent judges as one of the most perfect types of the Kentucky saddle horse in the country, and is sure to give a good account of himself at the National Horse Show next month.

—o—

During the second week of the Columbus meeting, Young Todd, in the second heat of the $5000 stake for 2:13 class pacers, lowered the four-year-old pacing gelding mark from 2:03¼ to 2:02¼. The former record was held by R. H. Brett and was made in 1914. Young Todd is by Director Todd 2:07¼ out of a mare by Ondale.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Don'ts For the Hunter.—The hunting season is bursting into full blast all over the country, and thousands of new hunters or those who have but seldom shot at game are going into the woods. It is seasonable, therefore, to offer a few suggestions as to what should not be done in the woods and fields. The conservation of human life is worth while. These don'ts are intended in addition to the novices, for those who are careless:

Don't point firearms at any human being or domestic animal. Keep the muzzle toward the ground or in the air.

Don't take a loaded grearm into a house, vehicle, or boat.

Don't set firearms down without unloading.

Don't jump or climb a fence or stream without unloading.

Don't shoot without knowing what you are shooting at.

Your hunter's license does not give you the right to hunt on posted land, reservations, parks or within the city limits. Land owners have a lawful and moral right to say who may hunt on their property. Respect these rights and they will have more regard for you and your sport and recreation.

Deer Kill in South.—Exact record of 320 bucks killed in the Kern River, Tehachepi and Tejon mountains this year has been compiled by Deputy Fish and Game Commissioner A. J. Stout. In addition are upwards of thirty bear which have fallen before the rifles of the hunting licensees "up the Kern," and fishing every bit as good as the gun and rifle game.

Over 100 deer came down out of Bear Mountain, the Tehachepi and Tejon, sixteen in one day, one hunter getting his limit that Sunday. The biggest buck was a fine seven-pointer weighing 200 pounds dressed, and blue as any mountain squirrel. One forked-horn was killed in his bed with a 16-gauge shotgun and No. 4 shot, by a hunter who all but stumbled over him.

The only unfavorable condition noted in Kern is the mountain lions which are increasing away beyond the danger point, particularly toward the Los Angeles-Ventura lines in those counties.

Sporting conditions at present are quite at their best; the fishing is splendid up the Kern, fish having moved upstream as usual when water goes down. Fly casters can enjoy splendid sport; even the white fish or "suckers" are apt to take a fly. Campers have been living high on venison, birds, squirrels, fish, bear meat if wanted, according to location.

Doves are so plentiful north of Bakersfield and about Wasco that limits are harder to miss than to make if one can shoot even a little bit. About Shafter is excellent dove country; southern Kern is not so good as earlier.

The malibu country, comprising the Santa Monica mountains lying west and north, sent in a big showing of fine bucks the first week of the deer-season, and hunters in general are satisfied that the deer conditions there are improving despite the accessibility and popularity of those rugged, craggy hills.

Ralph Smith, of Santa Monica, downed a big six-pointer dressing out 151 pounds of bone and meat; the same day Ray Cowdry and Jack Steele, Jr., get a four-pointer almost as heavy. The most remarkable deer story yet is that of Harry Greenleaf, who actually shot a fine four-pointer from his bed the first Tuesday morning! He has a homestead near the Tavern in Topanga, and on awakening saw this fellow on the hillside, reached for his rifle, and in a twinkling the trick was turned. That is the easiest deer of the season—easily.

The east slopes of the San Jacinto drew upward of twenty hunters for the opening and five nice bucks are known to have been killed.

In the opinion of many veteran sportsmen the San Bernardino mountains will be repopulated with deer by virtue of the closed Angles Forest game district. The deer are all high, 9000 to 10,000 feet, and most hunters do not climb that far after them.

Los Angeles, Cal.

Big Season of Trout Rearing.—Redlands, Cal.—The biggest season of trout rearing in the history of the Bear Valley hatchery has come to a close, during which no less than 750,000 rainbow trout fry were hatched and distributed this year from the spring "take" of eggs from the Bear Lake fish to the different streams and lakes in the county.

Bear Lake, during the season, received 386,000 more fry, the last installment of 106,000 being emptied at the time of the closing of the hatchery, July 17, as it was impossible to get them over the Mill Creek road with motor trucks at that time to the upper Santa Ana, where these fish had been allotted. The State fish car was sent south from the big mother hatchery at Sisson with 120,000 rainbow trout, steelhead and Eastern brook trout for the Santa Ana and its tributaries.

For the benefit of the anglers who have licenses, a list, which has reached here, showing where the fish were planted since the storm of last January, is given:

From the Bear Valley hatchery—In Bear Lake, July 1, 2 and August 17, 380,000 fish; during July 10,000 each to Shay's, Van Dusen, San Antonio, Waterman, Cucamonga and Bear Creeks; 5,000 each to the north and middle and 6,000 to the south forks of Lytle Creek; 5,000 each to the main Santa Ana, Forsee, Barton and the south fork of the Santa Ana; 4,000 to Devil Canyon, 12,000 to Coble Creek, 2,000 to Day Canyon, 4,000 to East Cajon, 24,000 to Deep Creek, 4,,000 to Sawpit Canyon, 12,000 to Lower Deep Canyon, 8,000 to Grass Valley Creek, 23,000 to Mill Creek, 48,,000 to Forest Home, 4,000 each to Alder, Falls and Fish Creek, 3,000 each to Castle and Vivian Creeks, 24,,000 each to City Creek and Dark Canyon, 30,000 to Holcomb Creek, 6,000 to Crab Creek.

Snow in Sierras.—Snow is flying on the eastern slopes of the Sierras and late vacation trippers must go prepared for weather now. Ford from Fish and Game Commissioner's camp above Mammoth in Mono county tells of a good tracking snow, and plenty of fish, with improving game conditions, but those who have deferred the journey this long will now wait until October 15 and get the benefit of the general game season then opening, although the deer season closes the middle of next month.

Ed A. McKee of the Los Angeles office of the Fish and Game Commission came in from a ten days' vacation passed with Deputy Archie Stout at Taylor's Meadows, on the headwaters of Kern River, well tanned and tickled pink with the trip, having shot a nice buck, the only one the party could use, and doves, mountain quail to the limit of camp demand, with plenty of beautifully colored seven-inch "rainbows" from a little stream, from which they jumped frantically for any kind of a fly. All Stout said in advocating this section to the hunting and angling-licensee is more than indorsed by McKee. Coming out, he might have had a dandy four-point buck to bring down, but had jumped does and fawns until deer no longer excited interest, and his majesty beat the tardy bullet into the brush. The fish and game men had venison "mulligan" daily, but never tired of it, and say the deer was as fine and fat as any prize beef.

Pleasing Game Reports.—Sportsmen will be pleased with the reports of abundance of game brought to San Francisco by E. G. McDonnell from Shasta county. In company with Bill Cassly and George Comode of Napa, McDonnell spent two weeks up in the northern part of the State and found deer, quail and other game very plentiful. The party had little trouble getting the limit of two bucks apiece and during their travels counted 42 bucks and does and fawns too numerous to keep track of.

"Indians told us that it was the best year for deer Shasta county has ever known," says McDonnell. "They claimed that deer by the hundreds came from Oregon during the severe winter and located in California. The tracks of the game were like so many sheep passing over the ground.

"It also looks like a great season up in that country for bear. We saw two bears and one cub and the Indians told us the country was filled with the game. We also sighted quail by the hundreds. Coming from Chico to Gridley on our way down we counted over 300 and they looked in fine condition.

"We had good fishing on the McCloud. Trout are just beginning to rise to the brown and gray hackle. Shasta is certainly a wonderful country for the hunter and anyone who knows anything at all about hunting should have little or no trouble getting the limit."

Good Prospects in South.—Bird hunters are becoming all stirred up over the opening of the general game seasons on quail, ducks and geese, snipe and plover, which falls on October 15th. The day being a holiday for all, and over 18,000 hunters already having taken license of the Southern California office of the Fish and Game Commission, beside other independent sales, it is safe to say that gunning interest on that occasion will attain to a pitch far and away beyond anything the past has ever shown. From every direction come reports of quail in plenty, and in some sections they actually are attacking crops. The duck clubs are rapidly filling their ponds, and for two months have had a fair sporting stock of sprigs, the first flight having come and gone. Deputy Fish and Game Commissioner Webb Toms of San Diego reports an unusually heavy flight of sprig ever since August 5th, thousands of them going south, but very few are passing now. Many duck hunters are of the opinion that shooting might as well have been permitted at the first flighting birds, as they are lost for this season, but, as they go on down into Mexico, where they are not bothered much, they will be spared as breeders for the future.

SOME NEW DISHES FOR SPORTSMEN.

Ideas of Diet, Like Those of Modesty, Appear to B Matter of Geography.

Ideas of diet, like those of modesty, appear to b largely a matter of geography, says a British write While pork is an important article of food wit Anglo-Saxon and Teutonic peoples, there are mi lions of people who regard it absolutely unfit fc human consumption. Indians eat many things tha the white man shuns, among them being snakes, li: ards, and grasshoppers. Snake is not at all ba once one overcomes his natural prejudice, and lizard are eaten in many countries. Moreover, grasshoj pers furnish a fine soup, being, besides, excellen when fried or roasted. Some dry and grind ther into flour. The great food delicacy of Japan is s shimi, a fillet of raw fish served with soy and cond ments. Though highly recommended by both Japar ese and European medical authorities, it is rather weird dish. Those who think it strange that th Japanese should use certain seaweeds as food ma be reminded that the fishermen on the Devonshir coast eat laver, an edible seaweed. Ferns, burdoc roots, lily bulbs, lotus roots, and bamboo sprout are among the Japanese vegetables, and the chrys alis of the silkworm, rice locusts, the octopus, whale and sea-slugs are eaten in some parts of China an Japan, whilst the most civilized epicures relis snails and frogs' legs. Shark's fin soup, edible bird' nest and lime-cured eggs are far-famed Chinese lux uries, the last item of which is equal to the games cheese in existence.

Crickets are dried and ground into meal by variou peoples and used as food. The Samoan Islander are very fond of a species of marine worm which ap pears periodically in their waters. Crabs, shrimps seashells, in fact, nearly every marine creature, i edible, while the gigantic holethurians, or sea-cucum bers, so abundant in many tropical seas, are consid ered a great delicacy by many races, and the indus try of gathering, drying, and shipping these is very important in Malaysian and Australian waters. Dried and prepared for market, these creatures are known as bech-de-mer, and fetch a good price in the Japanese, Chinese, Greek and Southern European markets. The octopus, or devil-fish, is also eaten extensively in China, Japan, Greece and the West Indies and when this repulsive looking creature is pounded into a pulp and made into soup it is considered excellent. In the West Indies the natives are very fond of the great tree lizards known as iguanas, which often attain a length of five or six feet, and the meat is white, tender, and much like chicken in flavor. In those islands also big tropical frogs known as land frogs are eaten whole, fried, broiled, or stewed, tasting so much like chicken or quail that they are commonly called "mountain chicken" when served at hotels, and are much esteemed by blacks and whites.

As the French and Italians hold snails and slugs as dainties of the first order, so natives of southwestern Europe esteem pickled earthworms. In New Zealand there is a grub which lives in the earth and which is often affected by a fungus growth that springs from its neck and pushes upward to the surface of the earth. These worm-grown mushrooms are eaten, and considered very delicious when properly cooked. In Africa and South America baked monkey is a delicacy. Trmadillos baked in their own shells, whale and porpoise steaks, and alligator tails are all esteemed viands in various quarters, but it is in Barbados and the Antilles that one can obtain flying-fish cutlets and sea-eggs. The sea-egg is really a large species of sea-urchin, and is filled with roe and cooked. They are mushy objects, and taste much like sandy soup flavored with fish. Locusts are eaten in Arabia, and are really an excellent article of diet. The long or "hopping" legs are pulled off, and the locust is held by a wing and dipped into salt before it is eaten. It is said to taste like green wheat. The red locust is more palatable than the green. Some say that the female is red and the male green, but others contend that all are green at first, whatever the sex. Locusts must be caught in the morning, for then they are benumbed by the cold, so that they cannot fly. They may be found in Arabia, clustered in hundreds under desert bushes.

Cropping of Dogs' Ears Condemned.—The prevailing practice of cropping dogs' ears to suit the whims of fanciers of certain breeds is denounced as unjustifiable cruelty by the San Francisco Society for the Prevention of Cruelty to Animals in its official publication, Our Animals, just issued for September.

According to the Society the dogs suffer intensely, not only during the cutting operation, but for as long as a month afterward, during which the ears are pulled and shaped daily, in some cases incisions being made in them to thicken the cartilage and make them stand erect.

The Society has obtained statements from a number of prominent dog fanciers who are opposed to ear-cropping and will attempt to influence the American Kennel Club to bar all dogs with ears cut after a fixed date from its shows. A boycott on all shows in which dogs with cut ears are exhibited is one of the methods recommended by some of the Society's members to abolish the practice.

The Society claims to have secured a conviction for cutting dogs' ears under the existing law some years ago but recently it has not been so successful.

TRIBUTE PAID TO REMARKABLE DOG.

All Winning Wire Terriers of Today Owe Their Origin to Cackler of Notts.

This is a tribute to a dog which, in my opinion, is entitled to the honor of being accepted as the most remarkable of all the great dogs which have illumined canine history since the first days of dog shows. It is to Cackler of Notts, the wire-haired fox terrier, reference is made. Champion in his day, now nearly twenty years old, it is within that comparatively short space of time. Every champion, nay, one might say every winner of today, is a direct descendant of him in the male line on both sides of the house.

This in itself would be sufficient to place Cackler of Notts among the most remarkable of many great dogs which have added fame to the breeds they represented. The fact, however, that the Duchess of Newcastle's wonderful dog is responsible for all this in a breed which was firmly established at the time of his birth, and a breed, too, which has long been among the most popular from royalty to the humblest mechanic, the writer feels justified in alloting Cackler of Notts the distinction of "most" remarkable of all.

Not the least remarkable incident about the extraordinary influence of Cackler has exercised is his breeding. In its way the case of Barkby Ben, sire of Cackler, was as celebrated as was the case of Bend Or in thoroughbred circles. And among the older terrier men of today, the question as to whether Meersbrook Ben or Barkby Corespondent was Barkby Ben's sire still is matter for dispute. Be that as it may, Barby Ben, although excelling in head properties, as well as neck, shoulders, "class" of bone and front generally, as well as coat, was too faulty back of the shoulders to suggest his siring a son destined to become so noted.

Again on her breeding, when Her Grace gave a "fiver" (about $25) for the dam of Cackler, if a vote had been put to the breeders at the time it would probably have been unanimously carried that quite enough had been paid for her. She was by a dog named Tipton Slasher, a champion of his time, but one which would be fittingly described as a "varmity, gassy cuss." His sparsity of hair on his muzzle would have made the present day "billy goat" whisker school gasp at such an indecent exhibition of nudity. He was common in shoulders, and but for a habit of blowing out his ribs when worked up into a passion in the ring was really flat sided and none too short in the back when in repose; except that along the top of his back the rest of him was as nearly smooth coated as made no difference. Now, Tipton Slasher's sire was Bendigo III., a dog of no especial merit, while his sire was Lord Edward, a dog with a plum colored nose, common lightish eye, quite long enough in the back—in fact, just a second rater. Cavendish, the sire of Lord Edward, was a plain, common headed dog, and he in his turn was by a moderate specimen called Rattler, bred in the Trent district.

The writer has gone to this length in the ancestry of Cackler because there was nothing in his dam's lineage to indicate, as far as human powers permitted to solve, that Cackler's fame would not end with his show career.

Certain it is that no one, even the Duchess of Newcastle, would have entertained the idea that from the mating of Barkby Ben and Tipton Slasher's daughter would come a dog whose influence would be so dominating as to completely expunge that of all other lines or strains.

In order to make clear what is practically the history of the wire haired fox terrier of today, one must touch on the ancestry of Barkby Ben. The writer has always been an adherent of those who are inclined to the belief that Meersbrook Ben was his sire. Meersbrook Ben through All Bristles was essentially of the Mreersbrook Bristles family. The latter was by Knavesmire Jest, an inbred Jester dog.

Near the district, Darlington, where Jester was born, was a noted strain of rough coated terriers, whole or nearly whole, black and tan in color, and it was generally accepted that Jester sprang from these terriers.

At all events Barkby Ben was heavily marked, following in line with Meersbrook Bristles. Cackler of Notts, on the other hand, followed the Jester markings.

Today the favorite line of the Mistress of Clumber is Comedian of Notts, through his two sons, Collar of Notts and Chunkey of Notts.

The most noted of Chunky's representatives in this country today are Wire Boy of Paignton and his son Wycollar Boy, while Collar of Notts, whose most noted sons in England include Collarbone and Corker, is represented here by Mrs. Roy Rainey's home bred Conejo Highbrow, who is inbred to Collar.

What to the writer is the chief enigma as to Cackler of Notts' influence is that, despite the plebeian breeding of his dam, even close inbreeding has failed to suggest anything but that her lineage is aught but of the most flawless.

Besides Comedian of Notts and Sylvan Result there are other distinct channels to Cackler, such, for instance, as Reigna Nut, represented among other terriers here by champion Cromwell Cheeky and the grand headed Ridgeway Corker. So it will be seen that despite Cackler's unusually large and illustrious family, monopolizing practically everything in the award list, he has lift so many branches behind him that there seems little likelihood of the name and fame of Cackler of Notts ever becoming dimmed.

—[Fox Hills, New York.

Animals Under Shell Fire.—The proverbial sphinx-like imperturbability of cats is once again demonstrated by the fact that pussy is the only quadruped known to face shells without a natural feeling of trepidation, says an English exchange. Even after two years of devastating bombardment, Ypres, the dead city of the Flanders plain, still boasts a number of cats which prowl and flourish in this wilderness of calcined debris. Horses are more human, inasmuch as they are afraid of shells, but endeavor to show a bold front. Dogs are the greatest cowards, and the sound of a "Jack Johnson" sets them running as fast as their legs can carry them from the danger zone. Perhaps, however, the most unaffected of all natural life within sound of the guns are larks and sparrows. These birds treat a hurricane fire with aloofness and contempt, singing and chirping through all the din as if the uproar were but an uninvited accompaniment to their song.—Our Dumb Animals.

Dogs Are Faithful.—In a cemetery at Fultonham, Ohio, a dog has kept vigil over his master's grave for five years. Little is known of this lonely dumb mourner except that he followed the funeral procession to the grace of George Baker, a farmer who lived somewhere outside the town, and ever since, when night comes on, he goes to the graveyard and lies on the mound that marks his master's resting-place.

The dog is now known as "the cemetery dog." He is timid and does not care to make friends. The cemetery trustees permit him to go and come as he sees fit and no one now tries to coax him away. Like the famous Greyfriars Bobby who watched and mourned at the grave of his dead master for fourteen years, the Fultonham dog seems likely to spend the rest of his life in this same strangely sad manner.

Hounds Used For Deer.—That hounds are constantly being used by hunters after deer in violation of the game laws was the charge made last week by Fred Edwards, chairman of the Pierce County Game Commission of Washington. Commissioner Edwards charges that the practice is not only common, but the present law makes it almost impossible for the game wardens to obtain convictions.

"The offenders must be caught red-handed," explained Commissioner Edwards, "and then it is hard to make a case. A hunter can take his dogs into the woods after bear, cougar or wildcats and he can not stop them when they get after deer. Dogs of another man may drive deer past a hunter. Many have been killed in this way.

"The present game laws say that dogs shall not be used in hunting deer, but no definite line is drawn so that game wardens can actually tell when a hunter is guilty unless he is present when the hunter actually sets his dog on the trail of a deer. The only way I can see to get at it is to force hunters to keep their hounds chained up during the deer season.

"The hound is the only dog that will keep on the trail of a deer until he has run him down. Some bird dogs will go after a deer for a short time, but they will not keep after them. Airedales will also keep after a deer as long as they can see them, but will not hold the scent for half a day at a time as will a hound."

Reports of the violation of this portion of the game laws have been made frequently to the members of the county game commission, but in every case there has not been enough evidence to warrant prosecution.

When the state legislature meets next January, it is probable that suggestions for several changes in the game laws will be made by local game societies. One will deal with the present abuse of hounding deer, especially in open violation of the game laws. The next in importance will be a change in date for the opening of season on quail, evidence being to the effect that many quail in this section hatch two broods of young and the second family is far too young to be hunted or have its mother shot during the months of the present upland bird season.

S. F. Fly-Casting Scores—F. A. Webster, one of the consistent casters of the San Francisco club, set a new club mark Sunday in the light tackle accuracy event, with a score of but one demerit.

Owing to the inclemency of the weather on Saturday, the usual contest was not held. Conditions on Sunday were far from ideal, but still good scores were made. The results:

	L. T. 5-oz	D. F.	5-oz. lure.	L. T. Salmon dis.	fly.

DESTRUCTION OF FEDERAL BIRD PRESERVE.

Fight Is Started to Preserve Oregon Lake For the Breeding of Ducks.

The destruction of one of the largest, if not the largest, Federal bird reservation in the United States is threatened, according to an announcement made by T. Gilbert Pearson, of New York City, secretary of the National Association of Audubon Societies. The reservation threatened is at Lake Malheur, in southeastern Oregon, and is a breeding place for hundreds of thousands of wild ducks, wild geese and other water fowl. Application has been made to the Federal authorities for permission to drain the lake in order to secure the land it covers. The lake is six miles wide by 15 miles long, and is about six feet deep. It supplies an ideal breeding place for wild water fowl, Mr. Pearson says, and therefore it attracts wild geese and ducks from Canada in large numbers. Its destruction, he declares, will leave thousands of young water fowl without a home. Secretary Pearson has taken the matter up with the officials of the General Land Office, who have promised to investigate. It is understood that those who plan the destruction of the bird reservation have already secured the co-operation of the State Land Board of Oregon. For that reason, Mr. Pearson regards the situation as imminent, and believes it will require quick and earnest appeals to the Secretary of the Interior from those who believe in the protection of the wild birds to prevent the destruction of the colony. "There are about five million guns in the United States," said Mr. Pearson, "and the only way to preserve our migratory game birds is to have these sanctuaries—areas in which they can never be killed under any circumstances."

The appended letter from President George W. Field, of the National Association of Conservation Commissioners, bearing upon the above matter, clearly shows the disposition of good sportsmanship in the matter and the intention of making a good fight against still further inroads into the few remaining bird refuges:

"Boston, Mass., Sept. 14.—I noticed in the public press today that T. Gilbert Pearson, secretary of the National Association of Audubon Societies, has just returned from a visit to Malheur Lake, Oregon, which has long been known as one of the most important breeding places for wild birds in this country.

"An attempt is being made to secure from the United States Government the title to this land for the purpose of draining the lake, for the benefit of a few persons.

"This action is unwise economically because it substitutes for a certainty of valuable birds, the uncertainty of agricultural products on alkaline soil, by nature unadapted for agricultural purpases.

"It carries with it, too, a subversion of public rights. These breeding places, relatively few in number, require peculiar conditions which cannot be readily duplicated. It means diminishing by so much the annual crop of wild birds on this continent. It means exploitation of a public asset for private gain. It should meet the opposition, not alone of the sportsmen and the persons who have the right to see birds under their natural conditions, but should as well meet the condemnation of the agricultural press in all sections of the country.

"It is difficult to believe that the people of the State of Oregon will permit such an important State asset to be destroyed, for Malheur Lake in its original and natural conditions should be one of the most important natural features of the State, and as such should be protected as it exists today.

"Through the efforts of the Audubon Association, Lake Malheur was made a United States bird reservation on August 18, 1908, and since that time has been guarded under the care of the government.

"Certain interested persons in Oregon have now made application to the Government to declare the lake to be swamp lands suitable for agricultural purposes, and thereby invalidate the government title to the land. Herein appears the weak point in all the Federal legislation relative to the setting aside of bird and game reservations, particularly in the case of birds. The mere fact that land can be made suitable (at any price) for agricultural purposes should not exclude the possibility of retaining that land as a place for producing birds, if the annual crop of birds is of more value than the agricultural products.

"I am writing to Mr. Pearson advising him that the National Association of Conservation Commissioners will support the Audubon Association in its effort to prevent the destruction of this bird reservation by draining and exploitation of the land. Yours very truly, GEORGE W. FIELD, President."

Forty-Eight Years S. P. C. A. Treasurer.—For the forty-eighth consecutive time J. S. Hutchinson has been elected treasurer of the San Francisco Society for the Prevention of Cruelty to Animals. Other officers elected for the year were: John Partridge, president; George M. Mitchell, first vice-president; George A. Smith, second vice-president; Ira Barker Dalziel, third vice-president; Matthew McCurrie, secretary; Irvin C. Foster, assistant secretary. The official veterinary surgeons of the Society for the year are Dr. Wm. F. Egan, Dr. C. Masoero, Dr. J. B. Boomer, Dr. I. Jacobsen. Dr. Ira B. Dalziel was named official veterinary dentist and Dr. Oscar J. Kron, Dr. K. O. Steers, and Dr. C. F. McCarthy, canine and feline veterinarians.

Sportsmen's Row

George Neale, in charge of the Sacramento office of the Fish and Game Commission, reports that quail, deer and other game has been very plentiful in his district. He was a visitor the first part of the week.

• • •

Local trapshooters will have the opportunity of meeting one of the popular shooters of the East in Mr. W. A. Joslyn, who has assumed the management of the San Francisco office of the Du Pont Company.

• • •

Trapshooting will be an all-year- affair this season. The Seattle Trapshooters' Association have their Harbor Island grounds in tip-top shape and are ready for their regular Sunday and midweek shoots.

• • •

Killing eight deer and two black bears, a party of seven hunters has returned to Tacoma after having spent the past three weeks in the neighborhood of Quilcene. In the party were W. H. Laisure, George Barks, Frank Bishop and James Nichols of Tacoma, and Ted, Frank and Philip Murphy of Chimacum, Wash. The party went into the mountains under the direction of Roy Strum of Olympia, who is recognized as one of the best guides in the state. They were forced to pack in 32 miles, and found the hunting all they could desire. In addition to getting a large bag, they saw signs of many cougar. They would have gone after some of these giant felines had they had dogs with them for that purpose.

• • •

For the next two years it will be unlawful for hunters to shoot the beautiful and gamy cock pheasant within the confines of Chemung county, New York. It never was lawful to shoot the hen bird. Orders have been issued by the State Conservation Commission prohibiting the taking of pheasants in Chemung county from October 18, 1916, to October 1, 1918. The season was scheduled to open on October 19th this year, but owing to the dearth of pheasants in the county a host of Elmiria sportsmen signed a petition and forwarded it to the Commission, requesting a closed season for the next two years, and after a hearing the above order has gone into effect. It is believed two years will afford the pheasants time to populate considerably.

• • •

During the fiscal year ending March 20, 1916, the following predatory wild animals were reported killed in the state of Utah: Bear, 146; wildcat, 3,091; mountain lion, 84; coyote, 1,515; gray wolf, 79; lynx, 42; total, 21,907. Disposing of the above number of animals in a single year that prey upon the game of a state ought to make game unusually plentiful in such a state, for to give 21,907 wild animals only one meal a day each for twelve months means the destruction of more game than all the hunters in the state would kill during the open seasons in five years, and it is safe to presume that each of the above-enumerated animals will average at least one meal a day on game of some kind during the entire twelve months.

• • •

The deer season closed successfully. Bucks were harder to get than last year. I think the reason for this was on account of less water. There seemed to be more deer killed where the timber and brush was more plentiful than in what we call cattle country, where there is less brush and water. The hunters this year seemed to respect the law better than ever, which is very encouraging. The quail in this vicinity are further advanced this year to what they were last year and the shooting will start on full-grown birds. Rabbits are plentiful and a day on bay and slough will show plenty of home ducks.—J. D., San Jose, Cal.

• • •

Mrs. Frank A. Johnson, of Philadelphia, has traveled 10,000 miles this year to participate in trapshooting tournaments.

• • •

Mrs. Topperwein didn't make as good a showing as was expected in the Grand American—with the professionals—because she had to use new guns. The ones she had been using were broken in transportation.

• • •

It has been sixteen years since the International match between American and Briish trapshooters took place. Isn't it about time to think of another meeting?

• • •

When the Americans invaded England and Scotland at the beginning of the Twentieth Century, they didn't lost a match, even though they conformed with the rules then in vogue in the British Isles.

• • •

A 16-year-old girl did the best shooting in the Beginners' Day event for women in Philadelphia. The young lady is Miss Leaphy C. Gough. She accompanies her father to the shoots every Saturday, and with a 20-gauge gun averages better than 70.

• • •

Bill Crosby, who was the high gun in the International match between American and English shooters some sixteen years ago, is shooting just as good now.

• • •

Live bird shooting is only allowed in four States now — Pennsylvania, Missouri, Kentucky and California.

ARE YOU GOING HUNTING, OCTOBER 15TH?

If You Are—Better Go After Quail and Leave Ducks Until 16th, Say Game Commissioners.

If you are going to take advantage of the opening of the State game season a week from Sunday, you had better go after quail and wait until October 16th before sighting the scattergun at wild ducks. This is the advice that is given out by the local officers of the State Fish and Game Commission.

The game deputies and authorities will not molest anyone who goes duck hunting on the 15th, when the State season opens. Fact is, they have no authority to enforce the Federal regulations. At the office of the San Francisco Federal Marshal, the information is also given that no action will be taken unless evidence is submitted to them. It is likely that many hunters will, accordingly, take a chance of turning out on Sunday.

The trouble was caused by a confliction of the State and Federal opening dates. The State law sets October 15th as the opening and the Federal regulations have the first day set for the 16th. The mix-up has hunters up-in-the-air, but to play it safe you would better delay your sport one day, for Federal law takes precedence over State regulations and trouble can be caused. It is reported that Nevada hunters ran into the same conditions and some of them were cited to appear before the Federal authorities.

J. S. Hunter, acting secretary of the Fish and Game Commission, gives the following advice:

"Our deputies will take no cognizance of infractions of the Federal law on Sunday, October 15th. At the same time hunters should play it safe by going after quail on that date for there are no conflicting regulations on those birds. We have had inquiries by the hundreds and our advice has been to wait until Monday, October 16th, before hunting ducks. The season looks very promising for both ducks and quail and one day less will not make any material difference in bagging ducks."

Eastern Trap Expert Here.—W. A. Joslyn, assistant manager of the DuPont sporting powder division, has assumed his new duties as manager of the San Francisco office of the DuPont Company. Mr. Joslyn has devoted years in following the trapshooting sport and is well versed in all angles of the alluring sport. He has annually participated in the big tournaments of the East and has proved a shooter of ability and a sportsman who won many friends by his genial and pleasing disposition.

Mr. Joslyn is a young man, who is bound to become popular with local shooters. He plans to be one of the regulars at the shoots and will put forth his efforts to further the interests of trapshooting here.

Clarence A. Haight has been transferred to look after the outside Pacific Coast business for the Du Pont Company. Mr. Haight, who is well known as the "Father of Trap Shooting on the Pacific Coast," will be called upon to do a deal of traveling and club members in other sections will undoubtedly welcome the opportunity of seeing him oftener. There is no more popular or competent man in the game than Mr. Haight.

No Permit to Slay Elk.—Nay, nay, is what the State Fish and Game Commission has said to the California Academy of Sciences in turning down an application for a permit to slay elk in Humboldt county, it being proposed to mount the animals and place them in a group in the Academy's museum in Golden Gate Park.

"But if the Commission persists in its refusal," said Barton W. Evermann, curator of the museum, "we will send our men to the Olympic peninsula in the State of Washington, where a permit has been secured and where we can get the same kind of elk as are in Humboldt county."

It is the contention of Dr. Evermann that as the Fish and Game Commission permitted the academy to take elk in the San Joaquin valley, the Commission should grant the same permission in Humboldt county. It was proposed to show in separate cases the two varieties of elk, that of the San Joaquin valley and that of Humboldt county.

Dog Show for Los Angeles.—Mr. R. C. Halsted, now secretary and superintendent of the Southern California Kennel Club, announces that he has secured the services of Dr. John De Mund of New York City to judge all breeds at the club's initial show to be held in Los Angeles, November 23, 24 and 25. Dr. De Mund is a member of the Rules Committee of the American Kennel Club and for a number of years has been a prominent and important factor on the executive boards of the parent organization. He occupies an enviable position in the business and social life of New York and has a host of friends in and out of the kennel world.

The date for closing entries has been set for November 8th, and any entry post-marked not later than midnight of that date will be accepted.

The Southern California Kennel Club should not be confused with the Ladies' Kennel Association of Southern California, as they are separate organizations and not responsible to each other. All business for the Southern California Kennel Club will be transacted by Mr. R. C. Halsted, whose office is, Elks' Club, 400 West Colorado street, Pasadena, Cal.

KILLING FEMALE PHEASANTS A MISTAKE.

Lowering of Bars in Oregon Is Deplored—Males Are Able to Take Care of Themselves.

[By William L. Finley, Oregon State Biologist.]

One of the most serious mistakes made by the last session of the legislature was the open season for the killing of female Chinese pheasants. During the past few years, while the hen pheasant has been protected, these birds have been holding their own very well. Last hunting season, when hunters had a chance to shoot the hen pheasant, a great many were killed. Of course, the past winter was very severe on the game birds, but I believe the primary cause for the scarcity of Chinese pheasants during the present season is the killing of the hen pheasant.

In the first place the Chinese pheasants are polygamous in nature. They are entirely polygamous when kept in captivity. They are to a large extent polygamous in the wild state. If there are are as many cocks as hens in the wild state the birds will pair off, yet if there are more hens than cocks the hens will be cared for much the same as they are in the tame state where a cock is kept in a pen with four or five females.

The most vital reason why the hen should not be killed is that she is a smaller bird than the cock and less able to protect herself in the wild state. At the State game farm, for instance, where cocks and hens were kept in an open field, they were sometimes attacked by hawks or owls. In more than 30 birds that were caught in this field by hawks and owls every single one was a hen. Although the cock stands out in the open, he is strong and able to protect himself, while the hen is not.

Several times I have seen or known of a cat attacking a hen pheasant, and yet it will make no effort to spring at a male bird. In other words, out of 20 hens and 20 males in the wild state the chances are that not one of the cocks would be caught or killed by hawks, owls, cats and other predatory animals, where 10 or 12 of the females would be killed.

After the first few days of the open season the cocks became much wilder than the females. They are more able to care for themselves ,while the females lie closer to a dog and are more likely to be killed. Every sportsman, therefore, or other persons interested in the real protection of Chinese pheasants should refrain from killing the hen pheasant.

[Since this article was written the Oregon State Commission decided to close the season on October 15, due to scarcity of upland birds, especially Chinese pheasants.—Ed.]

No Ducks at Los Banos.—A region covering fifty square miles of some of California's most famous duck shooting ground will yield practically no sport to hunters in the coming season. The section lies in the Los Banos region and has hitherto been greatly frequented by both native and migratory ducks and has furnished for years some of the finest sport to be found in the State.

A little over a month ago the Miller & Lux dam at Mendota gave way before the pressure of the great amount of water, making of what was once a great marsh, famous for its water fowl, a level mire field. The dam has been temporarily reconstructed of brush, but there is no overflow to fill the marshes, as most of the water is being used for irrigation purposes.

Unless heavy rains come to the rescue before the opening of the duck season, October 15, sportsmen who have liked that region for their hunting in the past will be disappointed and ducks killed will be very few.

The Salinas valley should profit by the Los Banos swamps drying up as it is a common occurrence during the duck season to see large bands of ducks come over the mountains from the San Joaquin section. With no water for them to feed in, no doubt many of them will take up an abode in the many bodies of water near Salinas.—Salinas Journal.

Trap Shooting's Conditions.—T. E. Doremus, the president of the Interstate Association, has returned to Wilmington, following a trip across the country to the Pacific Coast Handicap, at Portland, Or. This official, who says little, but studies much, had a good chance to observe the conditions in trap shooting o nthis trip, and has returned home bubbling with confidence that even greater years are ahead for this growing sport. President Doremus denied that the comparatively small attendance at the recent Pacific Coast Handicap bore any significance that there was anything wrong with trap shooting in that section of the country. As he observed it, the date was too late and came so close upon the starting of the hunting season that few cared to take the double time necessary for the Handicap and the entry into the hunting fields. The Interstate leader was greatly pleased with the manner in which the gun clubs have taken to the registered tournament idea, especially so this season, where there is such a tremendous demand for registered tournaments that they are carrying over into November, whereas in the usual course of events registered tournaments have been virtually closed out of the records by the time the Westy Hogans shoot is decided. In all ways he believes that trap shooting is on a sounder and firmer foundation than ever before and that it is going to go ahead by leaps and bounds in the next couple of seasons and gain a tremendous number of converts.

TRIALS OF TEACHING PEOPLE TO SHOOT.

Are Shooters, Like Poets, "Born" or "Made"? Famous Instructor Tells of His Experience.

[By Prof. H. H. Stevens.]

Many persons will always contend that shooters, like poets, are "born" and not "made." After a season as Manager of the Dupont Trapshooting School at Atlantic City, where thousands of novices have made their first attempt to shatter clay targets, my views may throw some light on this much-mooted subject.

The purpose of the Du Pont Trapshooting School is three fold, viz.: to teach the art of clay target shooting, to instruct in the proper use and care of the shotgun, and to provide the thousands of trapshooters, who annually visit Atlantic City, opportunities for participating in their favorite pastime. Hence, it is easy to believe that in carrying out the objects of the school we come in contact with shooters of every conceivable type.

In our instruction work with the novices who have never shot a gun of any kind our work may be very simple or very difficult. For instance, the novice of this nature has formed no bad habits which have to be overcome. Therefore, given a novice of fair aptitude, with no difficulties as to eyesight, a perfect fitting gun, and competent instruction, his rice to proficiency should be sufficiently rapid to satisfy even the most impatient. Perfection is a matter of refinement in gun fitting, coaching, practice, and the cultivation of absolute confidence in oneself.

Naturally some make progress faster than others, but it would be a bold assertion to say that this shooter was more favorably endowed by nature, particularly as regards shooting, than his fellow. I should venture the opinion that one merely learns quicker and better than the other.

Just as the golf instructor and the army drill master make much of the proper position for novices to assume, so it is in trapshooting. We find so many who, upon having a gun placed in their hands, immediately assume a strained and unnatural position, with a vise-like grip upon the gun, and balancing and pivoting at the waist with the hips thrust forward and the shoulders back. This of course precludes the possibility of ease or comfort in shooting, and the likelihood of making a good score. Like the expert billiard player who cultivates a "touch" and must have it before he becomes expert, so the trapshooter who would enter the select circle of the expert must cultivate an easy, natural position and correct manner of holding his gun.

Speaking freely, the proper position at the traps is to stand firmly on both feet, leaning slightly forward, the left foot from 4 to 6 inches in advance of the right (if the shooter is right handed), the body really resting chiefly on the left leg so as, in a measure, to counteract recoil; the left hand well out on the barrel, but not so far as to make the arm straight and stiff; the right hand gripping the gun firmly at the "grip"; with his gaze concentrated on the point where he should first catch sight of the target, his mind intent simply on breaking that target and on nothing else, and with both eyes wide open so as to instantly gauge the flight of the target and get on to it as quickly as possible; that is how the expert, the man who "breaks 'em all," stands and acts when ready to call "Pull." His attitude is not strained or awkward; his body swings easily from the hips to meet the exigencies of a sharp right-quartering target or of one thrown equally sharply to the left.

A neasy position at the start is, therefore, what a beginner ought first to strive to adopt. It is easier to start right than, having started wrong, to unlearn everything and begin all over again. Watch the experts, both amateurs and professionals, and learn how to stand from the object lessons they give when at the traps, for few indeed in either class adopt any other than the easiest and most natural position.

Some other grave faults encountered in novices (in many cases those with quite some experience) were tendencies to lift the cheek from the gun when the target appeared in view, thus destroying the carefully adjusted alignment of the eye along the gun barrel, and making a hit a matter of pure luck rather than skill; an inclination to wait twice or three times as long as necessary after getting aim before firing, thus giving the shot pattern a chance to open up and also allowing the target to get beyond certain killing range; and, last but not least, an uncontrollable habit of pulling the trigger the moment the target appeared in the air, without regard to aim, direction of flight, or other considerations which go to make for expertness.

Possession of a gun which does not fit the shooter cannot be correctly called a fault; rather it is a misfortune. The beginner in wing-shooting knows nothing about selecting a gun to fit him. And I usually find that the man who comes along and confesses to me that he has had some experience but is a poor shot has been handicapping himself with a misfit gun. Generally he doesn't even know the dimensions of his gun-stock.

By using a try-gun we take the exact fit of each shooter, thus ensuring a proper gun is provided for use during instruction and also enabling him or her to obtain from any gun maker precisely the fit in a gun-stock that it is necessary to have to be able to shoot well.

The rapid strides towards perfection made by many visitors at the School, even with but a few lessons, have frequently been a matter of, we hope, justifiable pride to us and an indication that our School and modus operandi or system are along the right lines.

But to revert to the opening sentence of this discussion, my frank and honest opinion is that crack shots are not born but "salf-made" and 90% perfection, or even better, is the goal open to him, or her, who will but learn his few simple lessons properly at the start of his shooting career, and then strive diligently to master that which can only come with practice and confidence—good scores and satisfaction.

Shorten Oregon Game Season.—Portland (Or.), October 2.—At a meeting of the State Fish and Game Commission here today, the open season for shooting upland birds, which began yesterday and was scheduled to last until November 1, was ordered to close, instead, on October 15, due to unusual scarcity of birds, particularly Chinese pheasants.

Seattle Association.—Breeder and Sportsman—C. E. McKelvey was in good form on Sunday, Sept. 24, at the Seattle Trapshooters' Association tourney. He tied with L. H. Reid, a professional, with 46 out of 50, and in the 100-bird race was high over all with 94. Following were the scores:

At 50 targets—C. E. McKelvey 46, L. H. Reid 46, Hugh Fleming 45, Ralph Kinzer 42, Dr. Newton 41, C. W. Bandy 40, W. B. Taft 38, J. U. McPherson 29, Richard Taft 26.

At 100 targets—C. E. McKelvey 94, *L. H. Reid 92, Hugh Fleming 90, Ralph Kinzer 87, W. B. Taft 86, J. U. McPherson 57, Dr. C. L. Templeton 44x50, H. Cramer 39x50, R. C. Jamieson 24x50.

Seattle, Wash. E. A. FRY.

Peck's Talk on Traps.—There is something about the lad who is indigenous to the soil of the United States which, early in his career, makes him a marksman almost by intuition.

His initial weapon is the bow and arrow, slingshot, or baseball, with any one of which he must become accurate, not by aiming in its accepted sense but by instantaneous calculation and judgment.

Note the accuracy of any American boy as he pitches a baseball. No boy of any other nationality, civilized or savage, could hope to compete with him.

Undoubtedly this, in a measure, accounts for the fact that we are becoming a nation of trapshots already over 500,000 strong, and constantly growing. The trapshooters of today were the boys of yesterday and the day before.

Age makes no difference, for so long as he shoots he is still a boy, using the same quick judgment and accurate calculation as he did 20, 30 or 40 years ago when he could send a ball hissing over the plate or "put her home" from the extreme end of the field.

By the same token, if a shooter, despite his years, is still a boy, paradoxical as it may seem, the boy of tender years, who is permitted to take up trapshooting, in bearing, deportment and self-respect, becomes a man.

Trapshooting at County Fairs.—Seeking attractions that will hold the interest of their visitors, several county fair associations have turned to trapshooting. The Monmouth County (N. J.) Fair, held at Red Bank, set asde one day for the devotees of the "sport alluring" and the Bergen County (N. J.) Fair Association—held in Hoboken—did likewise.

The idea then found its way westward and the tournament of the Luverne (Minn.) Gun Club was held at the Luverne Fair. These tournaments attracted thousands of persons who never before had witnessed a trapshooting competition. There are several thousand county and state fairs held annually in the United States, and trapshooting affords them a real attraction to draw and hold the interest of the farmers, which is something all fair associations are endeavoring to do.

Very nearly every farmer owns a gun—some of them dozens—and they all shoot at one time or other, either over the traps or in the field. The introduction of trapshooting at the fair means that every visitor will become interested, especially as it will not be the sport in the abstract, but in the exhibition of their fellow farmers.

This looks like a rich field for the Interstate Association to delve into. It is doubtful if a better method of reaching gun owners and inducing them to become trapshooters would be a great boon to the sport.

Remington Notes.—Mr. O. N. Ford proved to be one of the shining lights of the Pacific Coast Handicap. Shooting Nitro Clubs he was high over all on registered targets, breaking 320 of the 340 thrown. He also won the special event, scoring 97x100. P. J. O'Brien and F. A. Dryden, both of whom shot Nitros, were also among the stars, O'Brien being high on all targets with 513x560, and Dryden making the long run of the tournament—80 straight.

A. J. Robrege and J. V. Winter, shooting from 19 and 20 yards respectively, tied for first place at a tournament held recently by the LaCrosse (Wis.) Gun Club. Both gentleme,n shooting Nitro Club shells, scored 90x100.

"The Tri-State Big Game Hunters' Meet" was held recently at Garrett, Ind. Max Witzungreuter, shooting Nitro "Speed Shells," won first place by breaking 145 of his quota of 150 targets.

WHY NOT REGISTERED SHOOTS ON SUNDAY?

Coast Trap Shooters Anxious to Have Interstate Association Change Rule Prohibiting Events.

With the active trap shooting season closed, there is a general desire among the Coast devotees of the sport alluring to have registered tournaments on Sundays out in this section of the country. The Interstate Association, the governing trap shooting body, has a rule in effect which prohibits registered targets on Sundays. Doubtless this was adopted out of consideration to the blue laws of many Eastern states which bars trapshooting, baseball, and in fact sports of any sort on a Sunday.

Out here on the Pacific Slope Sunday is the popular day for recreation with the gun. Practically all the clubs stage their events then and the turn-outs have been exceptionally large during the past season. It is the only day in the week that many of the crack shots are enabled to put in an appearance.

A big percentage of the shooters would like to try their luck on registered targets as they are the only ones on which the official averages are reckoned. As it is now you find only a comparatively few of our shooters who loom up when the figures are compiled and given out. They are the ones who have to leave their businesses and places of employment during the week days to participate in the registered tournaments.

If the Interstate Association could see its way clear to permitting registered tournaments on Sundays it would unquestionably be a big boost to the sport on the Pacific Coast. A movement is now on foot to bring the matter to the attention of the directors of the association at the annual meeting in Pittsburg in December.

San Francisco is in line to stage the Pacific Coast Handicap in 1917. Secretary Clarence A. Haight reports that the Golden Gate Club will make formal application to the Interstate Association when it meets in December to hold the classic. The condition of the application will be that dates in May or June be allotted.

It was admitted that the event was held too late in the season this year. Entries at Portland were not up to expectation and the reason ascribed was the lateness. This was the fault of the Coast shooters in not getting in their bids until after the annual meeting of the association when dates were already given and it was found that September was the only open month.

Mr. Haight is confident that the Golden Gate Club's wishes to hold the fixture in the summer will be looked upon with favor. It is the turn of the shooters in the center of the Coast section to get the event. In 1915 it was held in the south at San Diego and this year the north had its consideration. If it is held at the Alameda grounds a banner gathering is expected to take place as the game was never in a more flourishing condition than at the present time.

When the California-Nevada Association meets shortly after the first of the year applications will be received for the holding of the State tournament, which has been gaining in attractiveness and importance. Del Monte has announced that it will make a bid and other points will also likely be in line.

Vallejo Club.—Andy Flickinger of the Vallejo Gun Club won the Class A Dupont prize on Sunday, in the last shoot of the season by a score of 24 birds out of a possible 25. P. G. Magistrini won the Class B prize. His score was 23 birds. W. King was awarded Class C prize, given by the Hercules Company. The scores:

	20	20	20	Ttl
W. E. Mann	18	16	18	52
J. W. F. Moore	15	18	16	49
C. A. Haight	18	18	17	53
A. G. Flickinger	20	16	20	56
E. F. De La Meter	12	15	17	44
H. J. Yocom	16	18	20	54
D. L. Humphreys	14	15	14	43
W. L. King	15	15	17	47
J. W. Peckham	17	18	18	53
C. L. Wisecarver	16	16	18	50
W. A. Barstow	18	19	18	55
P. G. Magistrini	18	19	17	54
A. F. McGlennan	15	14	15	44

Class A Trophy—J. W. Peckham 21, W. E. Mann 21, W. A. Barstow 23, H. J. Yocom 22, A. G. Flickinger 24.

Class B Trophy—C. L. Wisecarver 18, P. G. Magistrini 23, C. L. Jones 17, A. F. Henderson 17.

Class C Trophy, 25 targets—E. F. De La Meter 16, D. L. Humphreys 17, W. L. King 17, A. F. Peters 16. King won tie on miss and out.

Team Shoot, 15 birds—W. A. Barstow 13, H. J. Yocom (Captain) 13, W. E. Mann 12, C. L. Wisecarver 12, W. L. King 11—61 out of 75.

J. W. Peckham (Captain) 13, C. A. Haight 13, P. G. Magistrini 14, D. L. Humphrey 11, J. W. F. Moore 13—66 out of 75.

Pulga (Butte Co.).—After a twelve-hour fight in which three men and five dogs were pitted against a big bear, the bear was killed. But before Bruin gave up the fight in her cave, to which she had retreated, three dogs were killed by the bear. D. R. Johnson and Tony and Alfred Azavedo were the hunters who killed the bear. The carcass was sent to Sacramento and sold at a meat market.

BOY FARMERS WILL HOLD CONVENTION.

The boys of California are making themselves into its best farmers. Under the leadership of the University of California, the 1,157 boys enrolled in 107 high school agriculture clubs are now winding up their astonishing achievements in this year's crop-growing contests, and now 323 of the prize-winners are to hold a State Convention at the University Farm at Davis, from October 12 to 14. There the champions will exchange experiences on how they proved to their fathers and their neighbors that brains are the best fertilizer, that seed selection does more to increase yield than improved tillage, and that the secret of profit from pigs lies in good breeding, good feeding, and prevention of disease.

After a two-days convention at the University Farm at Davis and a day at Berkeley, 300 of the boy delegates will scatter to their homes while 25 champions will start East, under the leadership of Professor B. H. Crocheron (who is in charge of the boys' club work and the farm adviser system of the University of California), on a nine thousand mile journey, to see the best types of American agriculture, from California to the Atlantic.

The growing of a contest crop was completed this year by six or more boys in 80 different clubs. Some clubs chose beans, others potatoes, others sorghums, corn, sugar-beets, mixed vegetables, or pigs. One of these boy farmers by selecting his bean seed has in three years so improved the strain that his plants produce from 75 to 147 pods each, or from five to ten times as heavy a yield as his neighbors get.

Besides the 323 winners of this year's prizes, 49 prize-winners of previous years will attend the convention. Their home communities have contributed traveling expenses to Davis. There the boys will be the guests of the University. The 372 delegates will camp in militia tents. The winner of each club will make a three-minute speech telling how he succeeded in getting a bigger crop and a bigger profit than any one else in his club. There will be judging of draft horses, demonstrations of farm tractors, of vaccination against hog cholera, and of testing of cows for tuberculosis, stereopticon exhibitions, moving pictures, baseball and football games, a relay race, a tug-of-war, jousting matches, and bonfire rallies.

A special train will bring the boys' club delegates from the University Farm to Berkeley on Saturday, October 14, to spend a day at the University of California, with a meeting in the Greek Theatre and visits to the 300-foot Sather Campanile, Agricultural Hall, and other University buildings. The delegates will attend a 'Varsity football game and then scatter to their homes, save for the winners of the Eastern trip, who start East the next day on their month's journey across the continent and back.

The boys' agriculture clubs which are expected to be represented on the transcontinental trip are Auburn, Bakersfield, Brentwood, Chico, Delano, Dixon, Esparto, Fillmore, Gonzales, Imperial, Kerman, Kingsburg, Lodi, Madera, Napa, Ontario, Red Bluff, Riverside, Salinas, San Diego, San Jose, Sonoma, Van Nuys, Wasco, and Woodland.

The 80 clubs in which at least six boys completed the crop-growing contest by raising a quarter of an acre of potatoes or beans, a half-acre of beets, or an acre of corn, are as follows:

Southern California—Bakersfield, Bishop, Centerville, Delano, El Cajon, Escondido, Fallbrook, Inglewood, Julian, Kerman, Kingsburg, Lindsay, Lodi, Lompoc, National City, Oakdale, Ontario, Romana, Reedley, Riverside, San Diego, San Fernando, Santa Barbara, Stockton, Van Nuys, Wasco, and Whittier.

Northern California—Anderson, Arcata, Auburn, Brentwood, Campbell, Corning, Crescent City, Eureka, Fairfield, Fair Oaks, Ferndale, Fort Bragg, Gonzales, Hollister, King City, Lakeport, Mountain View, Napa, Orland, Paso Robles, Red Bluff, Roseville, Salinas, San Jose, Santa Cruz, Santa Rosa, Sonoma, Watsonville, and Willows.

The clubs whose members contested in raising two pigs each are: Brawley, Calexico, Chico, Clovis, Corcoran, Dixon, El Centro, Esparto, Exeter, Fairfield, Fillmore, Fowler, Gridley, Holtville, Hughson, Imperial, Lancaster, Lemoore, Madera, Napa, Porterville, Ripon, Tulare, Visalia and Woodland.

Does Not Recommend Any Make of Tractor.

Department of Agriculture, Washington (D. C.), Sept. 30th, 1916.—There have come to the attention of the United States Department of Agriculture items appearing in the press which are so framed as to give readers the impression that the Department in its publications has praised or recommended a farm tractor of a particular make.

As the Department has not done this and, in fact, systematically refrains from recommending any particular make of tractor or other machine, the public is warned to regard as false any statement asserting or implying such recommendation by the Department.

Livermore Valley Farm Products Show.

At the Farm Products Show to be held at Livermore Alameda county, on Friday and Saturday, October 13th and 14th, the horse department will be in charge of William McDonald, D. C. McNally and Leo Hansen, and the following classes and premiums are announced:

Class No. 1—Belgians.
(1st, 2d and 3d Prize Ribbons.)
Stallions, 3 years or over.
Stallions, under 3 years.
Mares, 3 years or over.
Mares, under 3 years.
Best stallion or filly foal.
Special prize ribbon, best animal in class.

Class No. 2—Clydesdales.
(1st, 2d and 3d Prize Ribbons.)
Stallions, 3 years or over.
Stallions, under 3 years.
Mares, 3 years or over.
Mares, under 3 years.
Best stallion or filly foal.
Special prize ribbon, best animal in class.

Class No. 3—Percheron and Norman.
(1st, 2d and 3d Prize Ribbons.)
Stallions, 3 years or over.
Stallions, under 3 years.
Mares, 3 years or over.
Mares, under 3 years.
Best stallion or filly foal.
Special prize ribbon, best animal in class.

Class No. 4—Grade Farm Horses.
(1st, 2d and 3d Prize Ribbons.)
Best gelding, 3 years or over.
Best gelding, under 3 years.
Best mare, 3 years or over.
Best mare, under 3 years.
Best suckling colt (by registered stallion).
Special prize ribbon, best animal in class.

Percheron Society of America.

Chicago, Sept. 30, 1916.

Breeder and Sportsman—Gentlemen: The regular fall meeting of the Board of Directors of the Percheron Society of America was held September 25, 1916.

Provision was made for holding the regular annual meeting of the stockholders at 8 p. m. Monday, December 4, 1916, in the Florentine Room, Congress Hotel, Chicago, Ill. This is on Monday of International Live Stock Exposition week. Percheron judging will begin on Tuesday morning, December 5th, so that a very large attendance of members is to be expected at the annual meeting.

Fred Pabst, of Oconomowoc, Wis., C. J. Tucker, Manager of Longview Farm, Lees Summit, Mo., and Alvin H. Sanders, editor of Breeders' Gazette, were appointed as the members of the Proxy Committee.

Classes for four-year-old stallions and mares were provided for at the International. This will add greatly to interest in the show, and will encourage more breeders to bring out animals of this age.

The National Feeders and Breeders Show, which will be held at Fort Worth, Texas, in March, 1917, was recognized, and the same classification and prizes were offered, as have been granted to state fairs in 1916. This should bring out a strong show of Percherons in the Southwest. More Percherons have been sold into Texas this season than for many years past. Ranchmen having horses to sell have received more money for the get of Percheron sires than for the horses previously reared, and the result is evident in a marked quickening of the trade.

The Directors were unanimously of the opinion that the opportunities now open to Percheron breeders are most favorable, and that all indications point to a most prosperous year for Percheron interests.

Yours truly,
WAYNE DINSMORE, Sec'y.

Argentina Cattlemen Prefer Shorthorns.

Prominent cattlemen of Argentina have been traveling through the western cattle districts recently for the purpose of buying high class breeding stock. John F. Diaz of Buenos Aires, a member of the party, and one of the leading cattlemen in the Argentine republic, said: "Our cattle supply from England is about cut off. We sell all our cattle to the American packers in Buenos Aires and they ship the beef to the warring nations of Europe. The prices of cattle there are about the same as here, and the cattlemen are prosperous; so is Argentina as a whole. A great opportunity in Argentina and the whole of South America is open to the breeders of Shorthorn and Hereford cattle and fine stock from the United States are becoming very popular down there. We want cattle with lots of meat of good quality. I have some Herefords, but I prefer the Shorthorns. I have about 25,000 head of cattle on my ranches and we are increasing the number every year. We do not sell steers less than two years old and never sell heifers and cows except those too old for breeding. The production of cattle under that system is becoming abundant."

Charles Mathes of Smith Center, Kansas, says he has the champion dividend producing mare in the west. He bought her eight years ago, paying $95. Since then she has brought seven exceptionally good mule colts, all being sold when they were yearlings. None brought less than $100 and two of them sold at $125 each. Besides this the mare has paid for her keep many times by hard work on the farm.

College-Bred Bulls and Pigs Win 33 Championships and Firsts.

That the University of California is a real success as a practical farmer will be impressed on the farmers and their wives who gather at the 779-acre University Farm at Davis, Yolo county, this week, to spend six weeks in taking the Short Courses in general agriculture, dairy manufactures, horticulture, or poultry husbandry. One proof will be the remarkable success the livestock of the University Farm scored at the State Fair just held at Sacramento. Not only did the University Farm livestock win twenty-three first prizes, but also six Championships one Reserve Grand Championship, and—the highest possible honor—three Grand Championships.

California Prize Lad was the wonderful Hereford declared the Grand Champion Bull, California Favorite was the Grand Champion Fat Steer, and sheep from the University Farm were declared both Grand Champion Wether and Reserve Grand Champion Wether.

Besides the ten championships of various grades and the twenty-three first prizes, the University Farm won ten second prizes, five third, and one fourth prize at the State Fair, including first prizes for draft horses; Hereford bulls, calves, and get of sire; Hereford, Aberdeen-Angus, and grade steers; a Jersey bull calf, Tamworth and Poland China sows, a Chester white boar, Southdown and cross-bred wethers, and milch goats and kids.

This fine prize-winning livestock list will be used throught the Short Courses to train the farmers in the judging of bulls, cows, sheep, pigs, horses, and goats, and in the principles of feeding and breeding.

Farmers who plan to take a few weeks off from the ranch to attend the Short Courses at the University Farm can obtain, by writing to the University Farm at Davis or to the College of Agriculture at Berkeley, of which the University Farm is a part, an announcement of the Short Courses telling exactly what lectures and demonstrations in the orchard, dairy, poultry-yards, and shops will be given at every hour on every day throughout the whole six weeks of the Short Courses. Those who cannot go to the University Farm for the whole six weeks can plan to attend individual lectures and demonstrations of special interest.

Dean Hunt points out that if any grain-farmer, stock raiser, or dairyman who attends the Short Courses is enabled by what he learns there to save just one horse, or to increase his dairy production five per cent, or his yield of barley two bushels an acre, he will be amply repaid.

Farmers Should Raise Meat.

No wonder meat is high. In 1914 we exported 455,000,000 pounds. Last year we exported 1,339,000,000 pounds, and this year it will be still more. Light is shed particularly on the high price of beefsteak by the fact that we sold Europe last year nearly forty times as much fresh beef as the year before. Meanwhile we have been buying a good deal of beef from Argentina, but not nearly enough to make up the deficit.

Contrary to the general belief, the tide has really turned in our live stock supply. After decreasing steadily from 1907 to 1913, the number of cattle in the United States has begun to increase. In the past two years there is said to have been an annual gain of 4 per cent. But there was a serious shortage to begin with; moreover, a 4 per cent increase of meat on the hoof will hardly more than meet the natural increase of population. And so, with the European demand added to these two factors, meat is naturally scarcer than ever.

Whether it will ever be any more plentiful and cheap than it is today depends on whether American farmers generally take to cattle-raising on a small scale, as an essential factor in mixed farming.

Sheep Values Are Going Up.

Sheep are going to bring more five years hence than they are now quoted for the tendency is onward and upward. In fact the prognosticators are forecasting great joy in the sheep trade and we fancy they are right about it. They argue that the European war is likely to keep up its lick for three years yet in which event the world's sheep population will be sadly depleted. Right here in America the next census will show a shortage of thirty per cent in the flocks of the nation. A two years' drouth in Australia and the inroads of agriculture in South America and New Zealand is bound to prevent relief from those sources, while African competition has never been pressing. The world's wool supply is practically used up, with over-production impossible for many years to come. We have been anticipating this situation for the last two or three years and have had a good deal to say about it. The thing for us to do is to whoop up our breeding operations and get more sheep but the result is likely to be just the other way. High prices are always the inducement to unload and this will be the answer.—Field and Farm.

The San Benito division, comprising 140,429 acres, has been eliminated from the Monterey National Forest by a proclamation of President Wilson. The elimination is made on the basis of a report from the District Forester at San Francisco, showing that the area is better adapted to the grazing of livestock than for the production of timber or protection of watersheds.

THE FARM

'ARCEL POST IDEA APPROVED BY POST OFFICE.

The postoffice department has just pproved a new invention which, the ostoffice authorities say, may revoluionize the parcel post service, at least o far as shipments "from farm to able" are concerned. It is likewise xpected to have an influence in eliminating the middleman.

The new device, if accepted by American farmers, is expected to more han double parcel post receipts in country districts. To put this into mmediate use, a plan has been approved by which postmasters will take harge of the distribution of the new levice.

The invention, to which the committee on experiment, research and design of the postoffice department has given its formal approval, is a container by which country produce of ll kinds can be shipped any distance without danger of breaking or spoiling. The container is made of the same fiber as that used in the construction of railroad car wheels. It s a cylindrical box with a peculiar nner arrangement of fiber partitions n which even eggs can be placed and the package thrown around as ordinary baggage without danger of breaking.

The containers are not to be sold, but leased, by fourth-class postmasters whose inducement will be the additional cancellation of postage stamps through the increased use of the parcel post and a commission on the boxes. A half dozen of these carwheel fiber boxes can be placed in a specially made bag which can be handled as ordinary parcel post matter. There is a return tag on the container and stamps already affixed by the sender insures its return.

The opportunity it will afford the American farmer to ship his produce direct to the consumer without its going through the hands of the middleman is the point to which the government authorities attach most importance. The department of agriculture experts say that much of the produce originating on the farm passes through the hands of half a dozen middlemen before it reaches the ultimate consumer. Each middleman takes out a commission, which is added to the price the consumer pays.

The motto of the dairyman, says H A. Theissen in Pacific Homestead, should be "300 pounds or more of butterfat." As rapidly as possible every cow that does not produce 300 pounds of butterfat in 12 months on reasonable care should be sold to the butcher—not to a neighbor. Three hundred pounds of butterfat per year, 25 pounds per month, five-sixths pound per day—surely that is not placing the standard too high. But even this standard cannot be attained at once by purchase, as there are not enough cows in the United States that produce 300 pounds of fat in one year. Then, Mr. Dairyman, you must raise them and to do so you must have a sire whose offspring is an improvement over the dam. Get a purebred bull and insist that the dam have an official record of production of at least 450 pounds of butterfat in 12 months, for a mature cow. Do not be satisfied with anything less. If you cannot afford one of this breeding yourself, get one of your neighbors to go in with you and buy together.

Herding Cattle by Aero.—Herding cattle by aeroplane is the latest, as chronicled in the daily press. It is being done on a ranch near Reno, Nev. The rancher's name is Henry Anderson and he owns a big slice of Washoe county. Once each day his cattle aviator flies over the range and locates the cattle and observes their condition. Anderson paid $10,000 for the aeroplane and already believes it will be wroth a dozen cowboys to him in time.

The First Plow.—Charles Newbold, of New Jersey, took out the first patent for a plow in 1797, the president and his cabinet sitting and passing on the claim, as was the custom at that date in patent applications. This was the first cast iron plow in the United States, but it is recorded that the farmers of that time entertained great prejudice against it. There was a popular idea that a cast iron plow would poison the soil. In 1637 there were but thirty-seven plows in the colony of Massachusetts Bay. For years after the landing of the Pilgrims the Boston farmers were without plows and broke their ground with rude hoes and mattocks. Later when plows were introduced it was the custom for anybody owning one to do the plowing for the neighbors over a considerable territory. The early plows as used by George Washington and others were twelve feet long, requiring four to five yoke of oxen to pull them and a man to ride on the beam to keep the point in the ground, and another man to follow with a grubbing hoe to dig out the balks.

Fruit Exchanged for Pork.—Any proposal to increase the taxes of California $30,000,000 would raise such a howl that it could be heard to the Mississippi river. And yet the actual outlay of that much money could be saved to the state each year by persistently boosting the pig industry. It is an economic crime for California—the natural home of profitable pig production—to send nearly half of the value of its orchard crops out of the state for live and prepared pork.—D. O. Lively.

The progenitors of our race in far middle Asia depended upon alfalfa as a forage.

It was in alfalfa pasture that the grazing Nebuchadnezzar found healing and restoration of his senses.

In former times when a farmer and a mortgage got on a Kansas farm the man too often was the one who had to leave, but since alfalfa came it's the mortgage that has to get off.—Exchange.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

PACIFIC COAST HANDICAP

This event was won by F. Templeton with a score of 91 x 100. He used a Winchester repeating shotgun.

WINCHESTER SHELLS AND GUNS HAVE THE WINNING QUALITY

Pacific Coast Shooters Fight Winds To Victory With Remington UMC Speed Shells

Three days of heavy wind storms set up a stiff handicap for Pacific Coast Tournament shooters, but when the big blow was over O. N. Ford had weathered the storm with these splendid winnings:

High Amateur Average	320 x 340
High General Average	320 x 340
Introductory Handicap	96 x 100
Pacific Coast Special	97 x 100
P. H. O'Brien, high on all targets	513 x 560

both shooting Nitro Club Speed Shells throughout

REMINGTON UMC

In the East R. D. Morgan of Washington, D. C., shooting a Remington Pump Gun, won the Westy Hogan Championship with a score of 100 straight and 40 straight in the shoot-off.

Virginia State Championship, won by Dr. L. G. Richards, Roanoke, with 99 x 100, shooting Nitro Club Speed Shells.

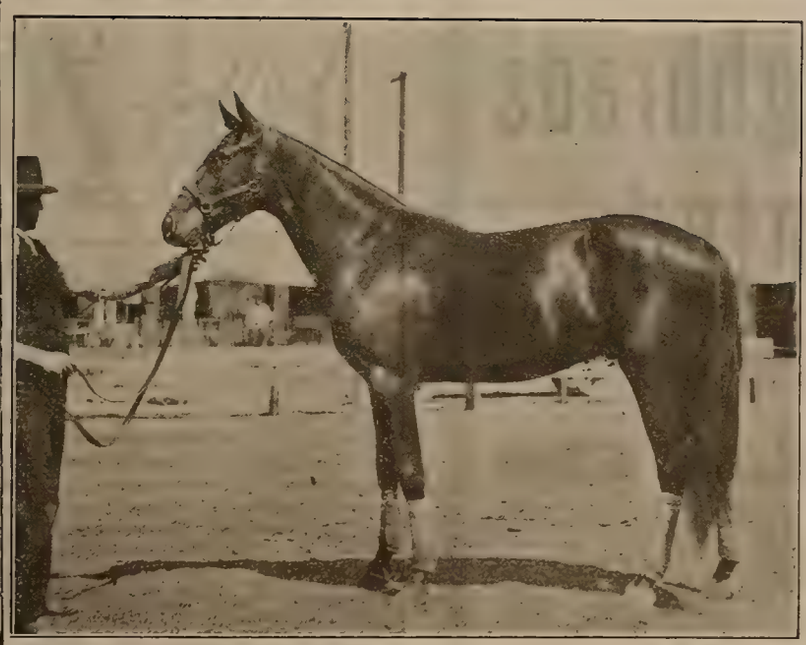
If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address PARKER BROS., Meriden, Conn. New York Salesroom, 32 Warren Street; or A. W. duBray, Residing Agent, San Francisco, P. O. Box 102

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

LOOKS LIKE HIS SIRE.
Two-Year-Old Colt Owned by Jas. Thompson of Sacramento. Sire, Gen. Watts, dam by Bon Voyage.

$2,500 GUARANTEED — ONLY $2 TO NOMINATE MARE — GUARANTEED $2,500

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

Monday, December 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. :-: :-: $1,000 FOR THREE-YEAR-OLD PACERS

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917 $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

OPPOSITION IS EXPRESSED by a correspondent in Hayward to the measure providing for an issue of $15,000,000 in bonds to complete California's good roads system. Our correspondent thinks the State roads are too narrow and that when covered with asphalt they are too slippery for horses as well as for automobiles. These objections have all been considered by the road builders in this State and wherever it is possible to build the roads wide enough for vehicles to pass it has been done. It may be that in some very hilly or mountainous districts necessity has required the roads to be made narrow, but this has always been the case in such sections. A fruit grower who uses horses exclusively to haul his fruit to market and to the railroad, told us this week that he can haul just twice as much fruit in a day over the State Highway than he formerly hauled over the old gravel road. We admit that an asphalt covered road is no place to speed a horse, neither is any public road a place for speeding or racing with automobiles. Some of the road which our correspondent says is dangerous is not State Highway but was built by the county under the direction of the Board of Supervisors. We have not seen the greater part of the highways built by the State, but what we have seen is first class and meets the approbation of a vast majority of the people who travel over them. We believe the people of California will be benefited by the completion of the road system upon which nearly $18,000,000 has thus far been expended, and while all roads are not perfect they are better than any we have ever had, and are worth preserving and completing at the price which is fixed by the amount to be voted on for new bonds. A good system of State highways will benefit the entire horse interests of California as well as all other interests, and for that reason we favor it.

THE WONDERFUL RACING that has been held at Lexington during the past two weeks bodes nothing but good for the trotting horse breeding industry. Good racing and record breaking are very stimulating to breeders as well as to race managers, and we believe the season of 1917 will be a vast improvement over that of 1916, both in the number of mares that will be mated with trotting bred stallions and also in the number of race meetings and the size and number of purses given. With a little enterprise California breeders and owners can share in the improvement that is certain to come in this business. Every horse owner and breeder should now try to do something to help things along. If every one will get in and help 1917 will break all records for harness racing and attendance on California tracks.

A NEW PLAN is proposed for a circuit in one of the western states. Ten tracks are to "pool their issues," arrange a circuit, advertise purses together, employ the same presiding judge and the same starter for the entire circuit and provide a circuit manager who will attend to the shipping of all horses on a special train from town to town. The individual associations are to attend to all other matters for themselves and to do their own advertising toward bringing out the people to attend. The plan has many supporters and will probably be successfully put through.

There will be very close to sixty new 2:10 trotters this year, and the number may be greater by the end of the season.

King's County Fair Races.

In spite of an unusual rain storm which visited the San Joaquin Valley last week, the Kings County Fair was a big success and there was a large attendance. The exhibits in all departments were excellent and fully up to the standard set by this annual event. It rained nearly every night, which made the half mile track very heavy and fast time was out of the question, but while the fields were small there was good racing which was thoroughly enjoyed by a large crowd every day. Summaries:

2:24 trot, purse $400:

Dick W. by Morris A	1	1	1
Doctor S. by Carlokin	4	2	2
Miss San Francisco by San Francisco	2	3	3
Camelia	3	4	4

Modesto Maid and Martina Dillon, distanced.
Time—2:19¾, 2:20¾, 2:20.

2:13 pace, purse $400:

Julia M. by El Angelo	4	1	2
Ben Corbitt Jr. by Ben Corbitt	3	3	1
Silver Tips by Morris A	1	5	4
Nifty	2	2	3

Zomar and Breezy Marie also started.
Time—2:14½, 2:17, 2:17¼.

Running, half mile dash, stakes, $75—Pearl, first, Von Dillon, second, Belle, third, Bar Maid, fourth. Time, :42¾. Von Dillon finished first but was set back for fouling. Round-Up also started but threw his rider when the saddle slipped.

Thursday, Oct. 5.

2:10 pace, purse $400:

Teddy Bear, by Del Coronado	1	1	1
Pointer's Daughter by Star Pointer	2	2	2
A. B. C. by Young Monterey	3	3	3

Time—2:15½, 2:14, 2:15½.

Special pace, purse $200:

Bold Harry Aerolite by Aerolite	1	1	1
Zomar by Zolock	2	2	2
Breezy Marie by Athasham	3	3	3

Time—2:18¾, 2:18¾, 2:17¼.

Running, mile dash, stakes $100—Tallow Dip first, Right Smart second, Von Dillon third. Time, 1:47.

Friday, Oct. 6.

2:10 trot, purse $400:

Bon Cres by Bon Voyage	1	1	1
Columbia T. by Bon Guy	2	2	2
Harold C. by Bon Voyage	3	3	4
Modesto Maid	4	4	3

Time—2:18, 2:19½, 2:19½.

2:25 pace, purse $200:

Silver Tips by Morris A	1	1	1
J. C. L. by Best Policy	2	2	2
Villa by Nearest McKinney	3	4	3

Best Direct, Directess Mac, Babe and Harry Mack also started.
Time—2:14¾, 2:16¼, 2:16½.

Running, three-fourths mile dash, purse $75—Pearl first, Right Smart second, Tom Woods third; Round-Up fourth.

Saturday, Oct. 7.

2:19 trot, purse $400:

Eloise Dell by Alconda Jay	1	1	3
Miss San Francisco by San Francisco	2	3	1
Dick W. by Morris A	4	2	2
Doctor S. by Carlokin	3	4	4

Time—2:17½, 2:17, 2:17½.

Free-for-all pace, purse $100:

Vera Hal by Expressive Mac	1	1	3
Mono Ansel by Monicrat	3	2	1
Teddy Bear by Del Coronado	2	3	2

Time—2:13, 2:11½, 2:15.

Running, five-eighths mile dash, purse $75—Round-Up first, Von Dillon second, Sad Sam third, Barmaid fourth. Time, 1:04½.

Fastest Trotting Stallion Bred in California.

Zomrect took a record of 2:03¼ at Lexington last Monday. If he comes back to California he will be the undisputed champion trotting stallion of the coast. He is by Zombro 2:11, dam by Direct 2:05½, second dam Lilly Stanley by Whippleton, third dam Dolly McMann, untraced. He ran out with a band of horses until he was four years old before he was ever taken up and a halter put on him. He has won several good races and taken a race record of 2:05¾ this year, and looks as if he might trot in two minutes. He is six years old. After Zomrect had won a race in which he took a mark of 2:06½ at Columbus, "Marque" wrote about him as follows in the Horse Review: "He is, to my way of thinking, a grand trotter, and one that has a splendid future. Everyone spoke of what a shame it was to mark the horse this season, and especially to get him out of the 2:08 class, but to Lon's credit he did so rather than race him for education. Lon thus gave another demonstration of the fact that he drives to win, regardless of the consequences."

Lee Axworthy Lowers Stallion Wagon Record.

Lee Axworthy was driven a mile to wagon by H. K. Devereux at Lexington last Thursday against the stallion record of 2:05½ held by Peter Mack. He made the trip in 2:02¾. The only miles faster than this to wagon were made by Lou Dillon and Uhlan, both holding wagon records of 2:00. Major Delmar's wagon record is 2:03¾. The Major and Uhlan are both geldings.

Ed Geers got back into the sulky again at Lexington this week, and won the free-for-all pace with the late Curt Gosnell's horse Single G., beating Ben Earl, Hal Boy and four or five other good ones.

Thoroughbred Matters

Dodge Wins Autumn Inaugural at Latonia.

Running a mile and one-sixteenth in 1:43 2-5, which is not only a new track record for the course, but a mark that is very seldom made by any thoroughbred, Dodge, A. K. Macomber's great three-year-old son of Jim Gaffney—Flora Willoughby, won the Latonia Autumn Inaugural Handicap with a net value of $2,435, the chief event on the racing program for the opening of the fall racing season at the Milldale course, Latonia, Kentucky, last Saturday.

By his victory Dodge demonstrated that he is probably the best stake horse in America at the present time, as he was put to a terrific test as far as gameness was concerned to win. Half a length behind him was Rancher, who also ran an excellent race after getting away from the barrier last, and Hodge was third, the same margin behind the place horse. There were nine starters in the race, A. K. Macomber being represented by an entry, Dodge and Ed Crump.

The best previous time for a mile and one-sixteenth at the Latonia track was 1:43 4-5, and this mark was made by such a high class racehorse as The Manager.

Havana Racing Will Start December 7.

Havana, Oct. 11.—Horse racing at the beautiful Marianao course is expected to prove more popular than ever this winter, for never have Cubans had so much money to spend and visitors from the United States will be very numerous. The management of the Cuba American Jockey Club has laid careful plans to attract high class horses.

There will be eighty-odd days of racing, a preliminary season of three weeks starting December 7, with racing three days a week.

Beginning Christmas Day, the regular season will be started, with racing six days a week. The smallest purse will be $400, and they will range in value up to $1000.

Racing in Cuba is profitable for horsemen. Last winter the Bedwell stable won $20,000 and the club hung up in purses about $200,000.

Kentucky Association Discusses State Tax.

Lexington, Ky., October 6.—At a meeting of the Directors of the Thoroughbred Horse Association today the reported intention of the State Tax Commission to exact from Kentucky race tracks a tax equal to half of the receipts from the pari-mutual betting was discussed. It was the sense of the meeting that the state should have something from this source, but it was shown by figures on meetings past that 2½ per cent of the money wagered would be a prohibitive tax.

The horsemen and the track owners would be unable to stand as much as that. President Hal Price Headley was authorized to confer with General Manager John Hachmeister, of the Latonia and Douglas Park tracks Charles F. Grainger, of the Churchill Downs track, and the Directors of the Lexington track and members of the State Board of Racing Commissioners with a view to coming to some agreement as to what proportion of the receipts from betting should go to the state, the track owners and the horsemen. It was noted that Manager Hachmeister had proposed last spring to devote 4 per cent to stakes and purses. It was considered very likely that the proper solution would be to turn the breaks or splits over to the state. That would be equivalent to approximately 1 per cent and in itself a handsome addition to the state's revenue annually. President Headley will confer with General Manager Hachmeister at Latonia tomorrow.

The Directors of the Association also went on record as "opposed to an excess of racing in any locality," and declared "this association is opposed to the building of any more race tracks in the Province of Ontario, Canada."

Magic, the thoroughbred sire recently purchased in England by Willis Sharpe Kilmer, has reached New York. He is said to be a big, powerful looking horse, distinctly of the Bend Or type, being both rangy and massive, while at the same time he is highly finished and bloodlike everywhere. Magic is by Martagon out of Sesame, she by St. Simon out of Maize, she by Hampton out of Palmflower by The Palmer. Magic's sire, Martagon, was a brother-in-blood to Ormonde, being by Bend Or out of Tiger Lily, she by Macaroni out of Polly Agnes, by The Cure.

Martagon's turf victories included the Ascot Vase and the Goodwood Cup, and he sired a host of winners, including Woolwinder (St. Leger), Musa, Mintagon, Wuffy, Champ de Mars, Mazagan (a sire in America), Jaquemart, Buckwheat, etc., etc. Buckwheat, full brother to Magic, won the Brighton Cup, Prince Edward Handicap, Duke of York Stakes, etc.

Magic's third dam, Palmflower, was one of the greatest broodmares of all time. Her produce included St. Florian (sire of Ard Patrick), Musa (winner of the Oaks, and dam of Mirska, who also won the Oaks), Siphonia (dam of Symington, a successful

[Continued on Page 7.]

PHOENIX HAS GOOD ENTRY LIST.

California Horses Are Liberally Entered in All the Main Events.

Secretary Shaughnessy has sent us the list of entries for the harness races to be held at the Arizona State Fair at Phoenix, November 13th to 18th, and it makes a splendid showing. The stables of W. G. Durfee, Fred Ward, Chas. Spencer and Homer Rutherford, that have been racing over eastern tracks, will be represented by all their best horses, while Sutherland & Chadbourne, Blosser & Finley, W. S. Smith, J. E. Montgomery, Donlan Bros., Marsh Thompson, and C. L. DeRyder, who have been racing in California this summer, have all made entries.

Phoenix is certain to have a good meeting, and Secretary Shaughnessy states that the Arizona State Fair desires to be in on the California circuit when organized for 1917, and says there will always be purses of $1000 each for classes of California horses that will race there. The entries to the races which have been declared closed are as follows:

Free-for-all Pace—Failed to fill. Canceled.

2:07 Pace, $1000—Rayo de Oro, Contention B., Silver Tips, Mona Ansel, A. B. C., Ellen Douglas, Harry R., Lock Logan, Hal Logan, All McKinney, Zomar, Teddy Bear, Ben Corbitt Jr.

2:12 Pace, $1000—Zombrino, Rayo de Oro, Contention B., Gay Tommy, Silver Tips, Mona Ansel, Verna McKinney, Ellen Douglas, Harry R., Lock Logan, All McKinney, Valbro, Kuropatkin, Direct So, Paul D. Kelly, Zomar, Pointer's Daughter.

Free-for-all Trot, $1000—Virginia Barnette, Esperanza, Great Northern, Allie Lou, Bon Cres, Vallejo King, The Proof, Sadie View, Eloise Dell, Columbia T., Geo. N. Patterson.

2:09 Trot, $1000 — Virginia Barnette, Esperanza, Mabel Van, Great Northern, Allie Lou, Vallejo King, The Proof, Sadie View, Zolock Zar, Waite, Eloise Dell, Columbia T., Geo. N. Patterson.

2:12 Trot, $1000 — Esperanza, Virginia Barnette, The Lark, Mabel Van, Bon Cres, Great Northern, Allie Lou, Vallejo King, The Proof, Otis Jr., Sadie View, Waite, Eloise Dell, Columbia T., Geo. N. Patterson, Lindsay Bell.

2:18 Trot, $1000—Kildare, The Lark, Zolock Zar, Waite, Don de Lopez, Louise de Lopez, Otis Jr., Sadie View, Lindsay Belle.

2:27 Trot, $1000—Kildare, The Lark, Lillian Van, Miss Axworthy Dillon, Zolock Zar, Waite, Alice E., Miss Delta, Fred Mc., Dr. Davidson, Lady Leco, Meridian Jr.

Races For Arizona Horses.

Two-year-old Pace, $500 — Arizona Duchess, Miss Cheatham, George D., Bill, Jack Ryland, Leland D. colt.

Two-year-old Trot, $500—Mono Hall, Dick Dulan, Arizona Duchess, Lady Direct, Laura Bell, Bess, Butcher Boy, Marmon Lad, Bill, Leland D. colt.

2:25 Trot, $1000—Kildare, Lillian Van, Miss Axworthy Dillon, Dr. Davidson, Alice E., Bellzebola, Miss Delta, Fred Mc., Lady Leco, Meridian Jr.

2:20 Pace, $1000—Zombrino, Gay Tommy, Pineknot, Maydella, Lady Leland, Balbro, Kuropatkin, Patchlock, Queen T., Direct So, Paul D. Kelly.

Three-year-old Trot, $500—Mona Hall, Bellzebola, Dr. Davidson, Lady Direct, Laura Bell, Bess, Butcher Boy, Norman Lad, Slats, Dick Dulan.

Three-year-old Pace — Pineknot, Miss Cheatham, Lelia Mack, Lady Leland, Little Marguerite, Nic, George D., Jack Ryland.

MATINEE AT GOLDEN GATE PARK.

Four races were carded for last Sunday by the San Francisco-California Driving Club, but rain pretrack became too wet after the first heat of the race had been paced.

The old favorite W. J. K. paced a good race in the 2:12 class, winning handily, and Bradmont annexed the free-for-all, his third straight race. The results:

First race—2:20 mixed:

Prospector	(R. Kehoe)	1	1
Minequa	(M. Ford)	2	2
Matawan	(J. McNamara)	3	3
Dibble Wilkes	(S. Benson)	4	4

Time—2:22, 2:23.

Second race—2:12 pace:

W. J. K.	(W. J. Kenney)	1	1
Pointer Belle	(J. M. Kidd)	2	2
Little Jack	(G. Conlan)	3	4
Emma M.	(W. Malough)	4	3

Time—2:12, 2:15.

Third race—Free-for-all pace:

Bradmont	(Richie Roberts)	1	1
King Pointer	(H. Campodonico)	2	2
Little Bernice	(J. C. Welsh)	3	3

Time—2:11, 2:12.

Fourth race—2:15 pace (one heat):

Frank N.	(L. Gielow)	1
Rosa O.	(J. J. Ryan)	2
Senator H.	(J. M. Kidd)	3

Ribbonwood heads the list of winning sires in New South Wales this season, his progeny having won 30 races. Huon Jr. is second with 24 wins, but seven of his sons are also represented, with 20 wins between them. Four of Ribbonwood's sons are credited with eight wins.

LEXINGTON RESULTS.

Monday, Oct. 2.

First race. the Walnut Hall cup, 2:12 trot, 3 in 5, value $3000:

Mabel Trask, ch m by Peter the Great	(Cox)	1	1	1
Azora Axworthy, b m	(Murphy)	2	2	2
George Summers, b g	(Wright)	5	3	3

Virginia Barnette, 3-4-4, and Miss Pinkerton, 4-d, also started.

Time—2:07½, 2:08¼, 2:07½.

Second race, 2:14 class pacing, 3 in 5, purse $1000:

Frederick Hillis, b g by Dr. Hillis	(Swearingen)	5	1	1
Queen Hal, ro m	(Macpherson)	2	2	4
Dan W., br g	(Hart)	6	3	2

Time—2:06¾, 2:10¾, 2:07¼, 2:08½.

Colonel Hedgewood, Horace McKerron, Miss Patsy, Baron Wood, Major A., Admiral Dewey II, Costa L. also started.

Third race, the Futurity, for 2-year-old trotters, 2 in 3, value $5000:

The Real Lady, br f by Moko	(Murphy)	1	1	
Mary Coburn, ch f	(White)	2	2	
Bertha McGuire, br f	(Ackerman)	5	3	

Time—2:07½, 2:07.

Worthy Volo, Harvest Gale, Emma McGowan, E. Colorado, Miss Bertha Dillon, Kelly De Forest also started.

Fourth race, 2:08 pace, 3 in 5, purse $1000:

White Sox, b m by Del Coronado	(Durfee)	6	1	1	1
Beth Clark, blk m	(Hedrick)	2	2	3	3
*Strathell, b h	(Barnes)	3	5	4	2
*Comsewogue Hal, br g	(Crossman)	4	3	2	5

Time—2:05¼, 2:08, 2:05¾, 2:07¾.

*Divided third and fourth money.

Solomon Boy, Canute also started.

Tuesday, Oct. 3.

2:15 trot, 3 in 5, purse $1000:

Trusada, b m by Moko	(Cox)	1	2	8	6	1
Winnie Lockhart, b m	(C. Taylor)	2	5	3	1	3
David Look, br g	(Casey)	8	1	4	7	2

Trusty McKinney, Miss Denver, Great Ivan, Gay Patch, Belgian, Ike Martin, Bernice Moore, Aegon Girl also started.

Time—2:09¼, 2:09½, 2:09½, 2:11, 2:11½.

2:05 trot, 2 in 3, purse $1200:

Mary Putney, b m by San Francisco	(Cox)	1	1	
Ross B., b g	(Wright)	2	3	
Esperanza, b m	(Durfee)	4	2	

Joan, Azora Axworthy, Peter Billiken also started.

Time—2:04¾, 2:05¼.

Kentucky Futurity trotting, 3-year-olds, three in five, value $14,000 and cup:

Volga, ch f by Peter the Great	(White)	1	1	1
Harrod's Creek, ch c	(Engleman)	2	2	4
Expressive Lou, b m	(Murphy)	4	5	2

Bingen Silk, Suldine, Bintara also started.

Time—2:06½, 2:07, 2:04½.

2:05 pace, two in three, purse $1000:

Peter Stevens, b h by Peter the Great	(Murphy)	2	1	1
Goldie C., b m	(Valentine)	1	2	5
The Savoy, blk g	(Floyd)	3	3	2

General Todd, Lelia Patchen, Knight of Strathmore also started.

Time—2:02¼, 2:01½, 2:03¼.

To beat 2:06 pacing world's record to wagon for mares:

Anna Bradford, blk m. by Todd Mac (Devereux) won

Time—2:05¼.

To beat 2:25¼ pacing:

Ben Billings, by Bingen out of Lou Dillon (Logan) won

Time—2:07.

Wednesday, Oct. 4.

2:11 trot, three in five, purse $1000:

Harry J. S., blk h by Admiral Dewey	(Tyson)	1	1	1
Baron Robinhood, b h	(Swain)	4	2	2
Vanko, ch g	(Murphy)	2	4	4

The Woodman, Henry Todd, Barbara King, Sweet Spirit, Hazel Laing also started.

Time—2:08¼, 2:08¼, 2:07½.

2:12 pace, three in five, purse $1000:

Little Frank D., b g by Little Frank (Valentine)		1	1	1
Hal Leaf, b h	(Whitehead)	4	2	2
Crystal Night, ch h	(Swearingen)	2	5	5

Coastal L., Robert Frisco also started.

Time—2:08½, 2:07¾, 2:06¼.

Board of Commerce, 2:00 pace, two in three, value $3000:

Roan Hal, ro g by Hal De Facto	(Murphy)	1	1	
Single G., b h	(Cox)	2	2	
Judge Ormonde, blk h	(Valentine)	5	3	

Braden Direct, Russel Boy, Fay Richmond, Hal Boy also started.

Time—2:02¼, 2:00¾.

The Limestone, 2:18 trot, two in three, value $2000:

Zomrect, blk h by Zombro	(McDonald)	1	1	
Brescia, b m	(Rodney)	2	2	
Miss Pinkerton, b m	(Taylor)	3	7	

Brisac, Lu Princeton, American Girl, Daisy Todd, Grand Chimes, The Toddler, Alto Chimes also started.

Time—2:05¾, 2:06¼.

To beat 2:06 track record for stallions, made by Peter Volo:

Lee Axworthy, b h by Guy Axworthy (White) won

Time by quarters—:30¼, :59¾, 1:28½, 1:59½.

To beat 2:05 trotting:

Lucile Spier, br m by Directum Spier (H. Fleming) won

Time—2:03¼.

Thursday, Oct. 5.

2:21 trot, 3 in 5, purse $1000:

Daisy Todd, b m by George Todd	(Chandler)	6	5	1	1
Black Falcon, blk g	(Horine)	3	2	2	3
Zo Dillon, gr m	(McDonald)	4	3	3	2

Marie Constant, Peter Patchen, Great Governor Gunfire also started.

Time—2:09¼, 2:10, 2:09½, 2:12¼, 2:15¼.

2:0- pace, 3 in 5, purse $1000:

Hazel H., ch m by Governor Durbin	(Swain)	1	2	1
The Deputy Sheriff, b g	(H. Thomas)	2	1	2
Ashlook, ch g	(Grossman)	5	5	5

Strathtell, Dick Sentinel, Harvey K., Fern Hal, Areta V. also started.

Time—2:06½, 2:04¼, 2:04½, 2:05½.

Transylvania, 2:08 trot, 3 in 5, value $5000:

Mabel Trask, ch m by Peter the Great	(Cox)	1	3	1
St. Frisco, b h	(Murphy)	2	1	2
Sadie S., b m	(McMahon)	3	5	6

Donna Clay, Al Mack, Alma Forbes, Bacelli also started.

Time—2:05¾, 2:03½, 2:04¼, 2:08½, 2:06¼.

Friday, Oct. 6.

2:09 trot, 2 in 3, purse $1000, two heats trotted Thursday:

Brisac, br h by Bingara	(Murphy)	1	3	1
M. L. J., b g	(Leonard)	7	1	3
Miss Perfection, c m	(McMahon)	2	5	2

Zombro Clay, Ben Gregor, Fayre Rosamond, Sister Strong, McCloskey, R. C. H. also started.

Time—2:06¼, 2:05¼, 2:08½.

2:13 trot, 3 in 5, purse $1000:

Baby Doll, b m by Tom Smith	(Rodney)	4	1	1	8	1
Jeannette Speed, blk m	(Cox)	1	9	4	7	2
Virginia Barnette, b m	(Durfee)	5	3	7	1	3

Binville, The Proof, Winnie Lockhart, Vanko, Onward Allerton, George Patterson, Gum Drop also started.

Time—2:08¾, 2:08¼, 2:07½, 2:07¾, 2:10¾.

The Blue Grass, 2:10 pace, value $2000:

Ben Earl, br g by The Earl	(Childs)	1	1	1
Jay Ell Mack, b h	(Murphy)	2	2	3
Young Todd, b g	(Cox)	3	3	2

Sir Anthony Carter, Ashlook, Lottie D., Diumeter also started.

Time—2:02¼, 2:06¼, 2:02.

The Lexington, 2-year-old trot. 2 in 3, value $2000:

Emma Magowan, br f by J. Malcolm Forbes	(Murray)	1
Worthy Volo, ch c	(McDonald)	3
Kelly De Forest, b c	(Murphy)	2

Mary Coburn, Bertha McGuire, Mary Magowan, Poll Chrome, Hill Brooke Sage also started.

Time—2:07½, 2:07¾.

2:16 pace, two in three, purse $1000:

Spring Maid, ch m by The Abbe	(White)	1
Rayo de Oro, ch g	(Durfee)	2
The Aim, br h	(White)	5

Miss Patsy, Little Jay, A. P. G., Rythmaid, The Ai also started.

Time—2:08¾, 2:08¾.

To beat 2:17¼ trotting:

Hobnob, b g (4) by Siliko (Morrow) won. Time—2:08¾

To beat 2:17½ trotting:

Buck Watts b c (2) by General Watts, won. Time—2:09½

Saturday, Oct. 7.

The "Dinner" stakes, for 3-year-old trotters, two i three, $3000:

Michallowa, b f by Peter the Great	(Serrill)	1	
Ole Mistis, b f	(Ackerman)	2	

Time—2:24¼, 2:23¼.

2:17 trot, three in five, purse $1000:

Trusada, b m by Moko	(Cox)	1	1	
Gay Patch, b m	(Mazy)	2	2	
Poris Watts, b m	(Fleming)	3	4	

Also started—Trusty McKinney, Great Ivan, Alvy Coffman, Ray, Locust Bug.

Time—2:10½, 2:11¼, 2:11.

2:03 pace, two in three, $1,200:

Russell Boy, b h by Rustic Patenter	(Fleming)	1	5	2
Braden Direct, blk h	(Egan)	3	1	4
Judge Ormonde, blk h	(Valentine)	5	3	1

Also started—Peter Stevens, Hal Boy, Fred Russell.

Time—2:00¼, 2:01¼, 2:01½, 2:05¼.

The Breeders' Sweepstakes for two-year-old trotters two in three, $9,000:

The Real Lady, br f by Moko	(Murphy)	1
Harvest Gale, b f	(Cox)	2
*Miss Bertha Dillon, ch f	(Serrail)	4
*Toddy S., b c	(Lazell)	3

*Divided third and fourth money.

Also started—Tacita.

Time—2:10½, 2:04½.

The Kentucky, for 3-year-old trotters, 2 in 3, $2000:

Harrods Creek, ch c by Gen. Watts	(Engleman)	1	1
*Suldine, b c	(Traynor)	3	2
*Brownie Watts, b f	(Rodney)	2	3

*Divided second and third money.

Also started—Bingen Silk, Native Judge.

Time—2:08¼, 2:06¾.

To beat 1:50½ trotting: Lee Axworthy, b h by Guy Axworthy (White), won. Time—1:58¼. Time by quarters: :29¾, :58½, 1:27½, 1:58¼.

To beat 2:16¾ pacing: Alice Jolla (3), b f by Binjolla (McDonald), won. Time—2:11½.

To beat 2:14¼ trotting: Bintara (3), b c by Binjolla (Niles), won. Time—2:08¾.

To beat 2:08¾ pacing: Peter Look (3), br c by Peter the Great (Traynor), won. Time—2:03.

To beat 2:12¼ trotting: Mendosa T., b m by Tregantle (Magowan), won. Time—2:11.

Highly Bred Stallions in New Zealand.

Three highly bred trotting stallions imported to New Zealand from the United States are now in service at the farm of R. McMillan, Halswell, N. Z., which he has named the Santa Rosa Farm. Petereta and Great Audubon are by Peter the Great, while Nelson Bingen is by Bingen. The service fees of these stallions are $50 for Petereta and $75 for each of the others. The stallions are royally bred and should do much for the trotting stock of New Zealand. Petereta is out of a producing mare by Arion 2:07¾, second dam a producing mare by Wilton 2:19¼, third dam by Robert McGregor ,fourth dam by Alcyone. Great Audubon is out of a producing mare by J. J. Audubon 2:19, sire of Audubon Boy 1:59¼, second dam Zelda, dam of six in the list, by Kentucky Prince, third dam Broadica, great brood mare by Hambletonian 10. The Bingen stallion is out of Susette Baron 2:15¼ by Baron Wilkes, second dam Suzette 2:14¾ by Nelson 2:09, third dam by Kentucky Prince. In these three stallions the two leading sires in the United States are represented. Peter the Great is the greatest of all sires of 2:10 trotters and Bingen is not only the sire of the world's fastest trotter, Uhlan 1:58, but also sire of the dam of the world's champion trotting stallion, Lee Axworthy 1:58¼.

Henry Jr. 2:24¼, a winner at Erie, Pa., is a six-year-old son of Jack McKerron 2:07¼ and the noted Gold Cup winner Parthenia (w) 2:11½, by Liberty Chimes. This stallion is being raced by Sidney Dickerson, who, in ultra-polite circles, would be styled an intense brunette. Sid believes that he never gets any the best of a tight fit at the wire, and the past week remarked: "In the future, I'se not goin' to be satisfied with just beatin' another hoss; because why, Sid is goin' to win with daylight betwixt me and the other fellow, then I'se sure of first."—American Sportsman.

◈ ◈ ◈

Walter Cox, the New Hampshire horseman, will have in his string next year a pacer by The Patchen Boy that has the name of A Game of Chance. This pacer has a record of 2:13, made in 1915, and showed so well this season that John Farnum, of Reading, Mass., paid $3500 for him and turned him over to Walter Cox. It is said an agent of Tommy Murphy was just a few minutes late with the offer of a still larger price for the pacer.

◈ ◈ ◈

When George Loomis won the third heat of the 2:05 pace on the Great Western Circuit with Auto Zombro in 2:02½ he laughingly claimed a world's record. "It's the fastest heat ever paced by a horse wearing a crutch," said George—and he is right. Auto uses a spreader on his right leg only and the device works to perfection.

◈ ◈ ◈

The former California trainer, Charles James, who is now located in New Zealand, where he is meeting with much success, calls his training grounds Pleasanton Lodge, and has had to build new stalls to accommodate the many horses sent him.

OBJECTS TO THE GOOD ROADS BONDS.

Hayward, California, October, 1916.

Editor Breeder and Sportsman:—Your little article n last week's "Breeder" has brought the subject of ood roads once more to the attention of your read- rs, and while the subject is fresh in my mind I ould like to say something in regard to this most mportant subject to the public, whether they be orsemen or automobilists.

You say that the eighteen million dollars have een well spent and that every committee that has xamined and reported thereon has unanimously so lecided. And then you ask the question of your eaders, who are mostly horsemen, if we are willing o vote for fifteen million more. Then you answer hat you believe we will.

Now, just let us stop a moment and consider whether this is all true about the roads being what hey should be and whether a continuance of this ind of road building should be continued or not.

I am going to take a negative view of this ques- ion, and I hope that your very valuable paper can ind space to devote to the discussion of the ques- ion, both for and against.

In the first place, there is not one of the new high- ways that can be called "good" if judged from the standpoint of the horse-drawn vehicle, whether it be ight or heavy traffic.

The new roads are primarily designed with but one idea and that idea is to afford a speedy means of travel for rubber tired, motor propelled vehicles. The horse-drawn vehicle does not enter the calcula- tions of the highway engineers; if it does, the engi- neers are not aware of the requirements of the horse- drawn vehicle or the money to provide for their needs has not been available.

I wish to call your attention to one piece of the Lincoln Highway between Hayward and the Liver- more valley, known as the Bolmer Hill or Dublin road. This is the most glaring piece of road folly and will serve as a type of road that you are asking us to continue building. I wish it were possible for any one of the road engineers who had a hand in reporting on the "good roads" to take a ride with me some day, or night, over that road behind a horse. I venture to predict that his report would be different. That is, his report would be different if he ever got back alive to hand in a report, for I very much fear that unless he were used to the horse and knew how to negotiate that road he never would get back with a live horse or without injury to himself. Although this road is much shorter between Hayward and Pleasanton I never use it, but am using the Niles Canyon road instead.

Now, if any one can show me that by this kind of road improvement I am benefitted, I will be ready and willing to be shown. As a matter of fact at the present time, these roads are of just about as much use as if they did not exist at all, so far as useful- ness to a horse-drawn vehicle is concerned. We were infinitely safer before the improvement was made. Our horses never fell or slipped and we could make better time over the old roads.

Take the ordinary state highway, if you will, and let us see whether it is really a good road or not.

If you will concede that the proper designation of a "good" road is "a road that carries the traffic which it is now carrying in a safe and adequate manner," I believe that you will find very few of the new highways to fill the bill.

In the first place, there are few if any that have a surface that is not too smooth, for both automobiles and horses. They are practically made for the pas- sage of one vehicle at a time along their course. If two vehicles of any kind have to pass, one or both must turn out and use a stretch of roadway that is not level. In other words, the crowning of the road is a survival of past methods of road grading that must be abandoned, as our roads with a permanent surface do not wear away like the macadam road, faster in the center than at the sides.

With the present materials of concrete foundation and a renewable asphaltum or oiled macadam wear- ing surface, there is no longer the need of so much crowning. The drainage of the surface does not call for the steep crowning formerly required. As the water does not dissolve the road surface as formerly, a very slight grade is all that is required.

I was talking with a road builder the other day and called his attention to this mistake that they have been making, and he acknowledged that the engineers admitted that to be the fact, and that some changes had been already made in line with my suggestion.

Another very severe criticism of the present de- sign of the roads, is in the turn not being banked instead of holding to the same crowning on the turns as on straight stretches. It seems strange that this correction of road construction has not heretofore been made, but I can show many places where this fault causes many a dangerous place to travel over.

No road can be called good when any vehicle has to travel on an uneven "keel" practically the entire distance, except when there is no other vehicle in sight. No road can be called good when one must eternally and ever be turning "out" for the other fellow. No road can be called "good" where the surface is designed for motor vehicles only.

If one must have a road for all the traffic that must of necessity pass along its surface, the rate of speed of each class of vehicle must be considered. The present rules of the road are that the slower and heavier vehicles have to take the least desirable of the road surface. This not only is not right but it works an additional injury to the road surface. The sides of the new roads are woefully inadequate to bear any kind of traffic. In order to use the state highway with a horse and buggy one must hold his horse in a path just on the edge of the asphalt, with one wheel on the asphalt and one on the rocky side. As is well known, the present roads are not wide enough for two motor vehicles. The numerous accidents are sufficient testimony to that fact. Far better build wider roads and not so much mileage.

When the former campaign was on for the eigh- teen million dollar bond issue, the advocates of the bonds used many flowery arguments to show the ad- vantage to the farmer of the improvements. Most any one knew at the time that they were thinly veiled, and in reality were "molasses to catch flies," and the results, viz.: our questionable "good" roads are nothing but speedways for motorists. The "farmer" and his horse are not appreciably benefitted by this kind of improvement and I hope that no further similar improvement takes place until the road builders perfect a road surface and design the same to meet the needs of the present and future. In my opinion, it would be far better to wait a decade before making any more such highways as have been made with this first bond issue, with the hope that by that time the road engineers can give us what we need. The roads now down will be used a long time before they will finally be torn up and better ones laid, and let us hope that the day is not far away when a road will be found which will embody such features as a dustless surface that does not wave like the ocean, and at the same time is not so slip- pery that a horse is liable to go down every minute. Let me add that no road is right until it is possible for one to travel at a good rate of speed on an even keel, without having to turn out for others traveling in an opposite direction.

I hope that your valuable journal, devoted to the interests of the light harness horse, will be able to devote some space during the campaign for the new bond issue, to the discussion of what shall be done with the money if favorably voted. Those who are devoting some of their time to the improvement of the horse, will be able to furnish some data as to what is required in road construction, and I am sure the motor enthusiast will be heard from.

With best wishes, I beg to be

Yours very truly,

CECIL CORWIN.

CHAMPION STALLIONS AS SIRES.

Now that Lee Axworthy has become champion trotting stallion, the title having a peculiar value because of the fact that its holder is the first entire horse to enter the two-minute trotting list, the three oher members of that ultra select company previous to his advent being two geldings and a mare, interest in the horse centers about the question as to his possibilities as a sire of speed.

It always has been expected of a champion trotting stallion that he would prove a speed sire ever since Ethan Allen opened the 2:30 list of trotting stallions with a mile in 2:28, and a considerable proportion of the holders of the record for their sex have made good in that particular. Previous to the meteoric-like flash of Smuggler 2:15¼ across the trotting sky, I had no personal acquaintance with the reigning stal- lion, but, beginning with Smuggler, I have seen all of them, and in the light of what they showed me as to peculiarities of gait and other characteristics there is impressed on my mind a pretty definite idea con- cerning certain qualities which a stallion of which great things as a sire are expected should possess.

There was not one solitary reason, viewing Smug- gler in the light of what we now know about breed- ing trotters, why that horse should sire speed at the trot. He was a pacer—which fact did not necessarily condemn him, since Pilot Jr. and Blue Bull, pacers, were good sires of trotters in their day and genera- tion—but he was not a good pacer, either as to gait, or speed, else you may be sure he would have been permitted to pace. On the contrary, Charles Marvin, an unknown reinsman in those days, undertook to make a trotter of him, and succeeded. But while Smuggler, as a trotter, had in some measure the action that now would be considered an indispens- able part of the equipment of a stallion expected to sire speed, he was wholly an artificial trotter, and his hind action was of the sort that nowadays would be considered fatal to the chances of any horse as a sire, since he flexed the hock to an infinitesimal degree, bringing the hind legs forward with a stiff, awkward motion.

Furthermore, Smuggler had no trotting heredity. Neither did Blue Bull nor Pilot Jr., but they had individuality, which they transmitted, whereas in the matter of individuality Smuggler did not shine, and very naturally he was a disappointment in the stud. It might be argued, on the other hand, that Cresceus 2:02¼, a later champion among stallions, had a lot of individuality, and yet failed, considering his op- portunities, as a sire. True enough, but the two cases merely show that while a horse without indi- viduality cannot be expected to do much in the speed siring line another horse may have individual- ity galore and still not impart his good qualities to any considerable proportion of his get.

After Smuggler came Phallas 2:13¾, bred in top lines for his day, and of a family (that of Dictator) which produced a good sire and to some extent a good progenitor in Director. The last named was a much greater success in the stud than was Phallas, although both were by Dictator and from mares of the Mambrino Chief strain. Phallas had the faster record of the two, Director's best mark being 2:17, but although they met four or five times Director was so much the best race horse that Phallas went to defeat every time. Director beat Phallas out of sight as a sire, principally because he was gaited right for that purpose, while Phallas was not. Direc- tor was a true going, four-cornered trotter at any rate of speed from the jog trot to his best effort, while Phallas was noticeably rough gaited until he was going a 2:20 rate, when he would flatten out, and at top speed was worth looking at. Director and Phallas, contemporaneous on the turf and in the stud, got by the same horse, and from mares of the same family, are the best two examples in the books of what, apparently, the possession of a pure gait will do for a stallion when he enters the stud, and what a handicap a rough gait is under the same conditions.

Maxie Cobb, who succeeded Phallas, his record being 2:13¼, was an extra good gaited horse, a son of Happy Medium, but as a sire was a perfect blank. Like the rest of the Happy Medium family in those days, he had the name of being a little soft, and indeed it was not until Nancy Hanks came along that there was a Happy Medium trotter of any note that horsemen gave credit for real courage, and even then the general verdict was that the mare who now is famous both as a champion trotter and a producer, owed her greatness to the fact that her dam was by Dictator, a sire of real race horse trotters. So strong was this conviction that the Happy Mediums were soft that one man whose experience with the tribe, as well as with other strains of blood, had been extensive, refrained for years from buying a son or daughter of Peter the Great on the ground that they came of a bad stock in the matter of gameness. Finally, however, he became impressed with the merits of the modern edition of the Happy Medium output, and after seeing a yearling trot a quarter in phenomenal time paid $4,500 for her, and has had the pleasure of seeing the filly march triumphantly over all the two and three-year-olds she has met, her name being Volga (3) 2:04½.

Axtell (3) 2:12, Allerton 2:09¼, Nelson 2:09, and Palo Alto 2:08¾, who followed Maxie Cobb in the stallion championship, were good gaited trotters ,and succeeded as sires. Kremlin 2:07¾ is, for a great race horse and a richly bred one, a notable failure as a sire of speed, not having a single 2:10 trotter to his credit, and this is all the more remarkable when the class of the broodmares with which he was for many years mated at Allen Farm is taken into account. Yet Kremlin made a name for himself as a broodmare sire, and although practically all the 2:30 or better trotters from his daughters were sired by Bingara or Bertini (3) 2:22¼ (sons of Bingen), there is no rea- son to suppose they would not be equally successful, or perhaps even more so, if mated with representa- tives of other strains.

Directum 2:05½, who succeeded Kremlin as cham- pion stallion, was himself a decided success as a sire when it is considered that not only did he come of a none too prolific family in the speed producing line—that of Dictator—but was himself a trotter that needed toe weights of considerable heft to bal- ance him and make his stride effective. Still, Direc- tum's blood has not bred on in a noteworthy way, only twelve of his sons being sires of standard speed, while sixteen of his daughters have produced it.

Cresceus, the mightiest trotter of his day, the only stallion to hold the championship for his sex and the world's trotting championship at the same time, a horse whose tremendous deeds in the trotting line never can be forgotten, was practically a flat failure as a sire. He was trained and raced from the time he was a two-year-old until he was ten, and the tasks assigned him were such as only a horse of iron frame and unquenchable determination could have accomplished. All this strain on his vitality may, and probably did, handicap him as a sire, but, be that as it may, the bald fact remains that he left not a son or a daughter of more than mediocre ability as a trotter, while as speed producers they amount to little. The male line of the pedigree of Cresceus is not one that has produced any great sires since the days of Robert McGregor 2:17½, and that horse was a broodmare sire rather than a begetter of trotters.

The Harvester already has demonstrated his ability to sire extreme and early speed, but he has been too short a time in the stud for any useful estimate of his powers as a sire to be made.

Lee Axworthy not only has the fastest record of any entire horse, but he is, at least on paper, the best bred one for a sire. It would be a futile task at the present time to go into the details of the pedi- gree of Lee Axworthy with a view to showing why he should make a great sire, but it may be said that the main reason, aside from his speed and his perfect gait, is that he comes from sire producing families on both sides, going to Axworthy and Axtell in the male line, while his dam is by Bingen, the greatest progenitor of all time unless Hambletonian 10 be excepted. But Lee Axworthy's horoscope as a sire is well worth casting when there are not more im- portant things on hand, and some day I shall do the job.—[Henry Ten Eyck White.

Harness Horses and Horsemen

T. L. Barstow Sells All McKinney.

When T. L. Barstow, the San Jose horseman, gave his five-year-old pacing gelding All McKinney a breeder's record of 2:04 at Santa Rosa July 8th this year, those who saw the performance were ready to predict a very low race record for the son of Nearest McKinney when he was started for the money, and it was with much regret that the friends of Mr. Barstow have read during the past two months accounts of the horse being distanced in nearly every start. Mr. Barstow started All McKinney a time or two in Wisconsin and Nebraska for small purses on half mile tracks, and while the horse did not win he made a fair showing and it was thought that after he rounded to (All McKinney was very sick soon after reaching Omaha on his trip east) he would be able to show something of his actual speed. Whether he was started in the fast classes for the big purses too soon after his recovery, All McKinney has not been the same horse he was in California and we learn that while at Columbus Barstow sold the gelding to Denny Valentine, the well known trainer, for $1800. Barstow had started All McKinney several times on the Great Western and Grand Circuits and in every race he would get the flag after winning a heat or finishing close to the winner in fast time. After starting him at Columbus on Monday of the second week Mr. Barstow sold the horse, and on Saturday his new owner started All McKinney in the 2:11 pace, but could not get him to score on a pace, and was distanced. It is said that Valentine will in all probability put the straps on him, which all who saw the horse at work in California will regret, as there never was a cleaner gaited pacer than All McKinney. When he paced his mile in 2:04 at Santa Rosa he wore nothing but a harness and a pair of light quarter boots, paced as steady as a clock and was the freshest horse at the finish of his mile of any of the horses marked that day. We hope Mr. Valentine will be able to bring All McKinney to the races next year in shape to race and win in the time he is capable of showing. It is said that had not Valentine purchased the horse Tommy Murphy would have taken him off Barstow's hands at the same price.

May Yet Lower Uhlan's Mark.

The champion stallion Lee Axworthy, that reduced his record from 1:59½ to 1:58¼ last Saturday at Lexington, seems to be in a fair way to become the world's champion trotter without regard to sex, as well as the champion stallion. His record now is but one-quarter of a second slower than the gelding Uhlan 1:58 who holds the championship of all trotters, and is a quarter of a second faster than the champion mare Lou Dillon. If he can shave his present record a half second he will stand at the head of all trotters and as he is but five years old there is a possibility of his accomplishing the feat. Lou Dillon was a five-year-old when Millard Sanders started her in the summer of 1903 on her trials against time in which, at Readville, Mass., on August 24th, she became the first 2:00 trotter, and two months later, October 24th at Memphis, she trotted in 1:58½. Major Delmar that same year trotted to a record of 1:59¾ and he was six years old at the time. Then came the great gelding Uhlan that trotted to a record of 1:58 at Lexington October 8th, 1912, at which time he was eight years old. He had taken a record of 1:58¾ two years before when he was six years old, and while he trotted one mile in 1:59½ in 1911, he was a faster horse in his eight-year-old form than ever before and lowered his mark to a figure that has not been approached until Lee Axworthy came on the scene this year. The records of both Lou Dillon and Major Delmar are preceded by two asterisks in the Year Books which signifies that they were made behind a wind shield, in other words that running horse preceded them during the miles. Uhlan's mile in 1:58 and Lee Axworthy's in 1:58¼ stand unadorned with the little stars, however, as both were made in the open, the accompanying runners being kept alongside or behind them when the records were made.

As Major Delmar did not get to the top of his speed until he was six and Uhlan's best mile was made after he had passed his eighth birthday, the probability is that Lee Axworthy, whose races against time have thus far been very few, will train on so that if he does not lower his mark this year he will be able to do it in 1917, and become not only the champion stallion but the champion of all trotters.

Geo Lowery Returns Home.

Mr. George Lowery, of the firm of Dunne & Lowery, owners of the trotter Spriggan 2:08 and the pacer Dicto, returned last week from a trip to the Grand Circuit. Spriggan was left in the east, but Dicto will be brought back to California. Mr. Lowery states that Spriggan was taken sick during the extremely hot spell which struck Ohio on their arrival at North Randall, and never fully recovered. The horse's appetite failed him and he would not eat enough to gain strength. He was started a few times but after a heat or two would have to be withdrawn. Mr. Lowery states that all the California horses were affected by the hot weather and says he will ship east not later than March if he tries to race on the Grand Circuit again. He reported that Millard Sanders had been engaged to handle the colts and fillies on the farm of Mr. Titus of California, who now owns the famous Stony Ford farm in New York. Mr. Lowery also stated that Tim Sexton was enjoying the Grand Circuit races and would probably buy a couple of colts by Gen. Watts that he had seen and liked. While the California stables have not done very well this year, Fred Ward and Will Durfee had won enough to pay expenses and to buy return tickets for themselves and their horses. They will both race at Phoenix in November.

Peter McKlyo Is at Stockton Track.

Our whilom correspondent Geo. H. Tinkham writes as follows from Stockton: "James Thompson came over from Sacramento on Thursday of last week, bringing with him Peter McKlyo 2:06 and his two colts Klyo Boy 2:23½ and Charlotte Klyo 2:25¾. It is understood that Mr. Thompson came here to make an effort to lower Peter McKlyo's Santa Rosa record. The weather, however, has been very rainy. Tuesday of this week he gave the stallion a work-out in 2:21, last quarter in 29 seconds, and last eighth in 14 seconds. If the weather holds good for two weeks it is predicted that he will beat 2:04. If the meeting is held Mr. Henry may start Boretta D. for a faster time record, as the mare has frequently worked out in 2:10. Lanard P., another good one in the Henry string, paced a work-out in 2:14 the other day. Mr. S. H. Williams has a stable of five good colts, among them Prince Demonio, Demonio Prince and White Socks. The stallion Prince Demonio has paced quarters in 30 seconds and miles in 2:10 frequently. White Socks is a trotter of great promise; with but little work she trotted in 2:14. She traces back to Pancoast on her dam's side.

New Directors for P. C. T. H. B. A.

At a meeting of the Board of Directors of the Pacific Coast Trotting Horse Breeders' Association held in the Pacific Building, San Francisco on Tuesday, October 17th, 1916, four vacancies on the board were filled.

In place of John C. Kirkpatrick, deceased, Mr. Frank J. Ruhstaller, the well known brewer and horse breeder of Sacramento, was elected.

In place of A. B. Spreckels, resigned, Mr. Clarence Berry, the popular oil magnate of San Francisco, and breeder and owner of trotters, was selected.

Dr. I. B. Dalziel, the veterinary dentist who is favorably known to every horseman in California, was named in the place of Frank J. Kilpatrick, deceased.

Mr. Geo. Giannini, banker and commission merchant, popular president of the San Francisco-California Driving Club, and horse owner, was elected in place of Mr. T. J. Crowley, deceased.

This fills all the vacancies on the board of directors which is now composed of the following: E. P. Heald, president, Oakland; I. L. Borden, vice-president and treasurer, San Francisco; R. S. Brown, Petaluma, C. A. Durfee, Oakland, A. J. Molera, Monterey, John A. McKerron, San Francisco, F. J. Ruhstaller, Sacramento, Clarence Berry, San Francisco, I. B. Dalziel, San Francisco, and Geo. Giannini, San Francisco, F. W. Kelley, Secretary.

A committee from this board was appointed to meet with a committee from the State Board of Agriculture and take measures to promote the formation of a circuit of county fairs in California in 1917. This committee will meet during the present month.

It was ordered that the Pacific Breeders' Futurity No. 17 be advertised, with a total guaranteed stake of $2500, of which $1500 is for three-year-old trotters and $1000 for three-year-old pacers, both races to be held in 1920. It was thought best to give no part of the stake for two-year-olds, but should there be sufficient two-year-olds in training in 1919 then regular purses can be given for them.

Bishop, Inyo County, Enjoys Good Racing.

Way up in the mountains of Inyo county there was held a Harvest Festival last week during which there was harness and running racing, the local papers stating that the race program was the best ever seen in that county. The management of the races was in the hands of Mr. Guy L. Furley, a newcomer to that section from the east, who is engaged in the real estate business in Inyo, and whose previous knowledge of fairs and racing made him the logical man to select to manage the racing end of the festival. There were three days' racing and while rain made the track heavy, over 1000 persons were present each day to see the horses perform.

On Thursday the race for 2:40 trotters and 2:50 pacers for a purse of $200 was won by J. C. L., entered by M. Senter of Hanford, in 2:23¼, 2:24 and 2:25. Florence D. was second, Bill Irwin third and Geo. H. Parker fourth.

C. E. Johnson's Eva Osito won the $200 purse for 2:20 trotters and 2:25 pacers in 2:21, 2:25 and 2:21. O. Holland's Caroline Custer was second, Chief Direct third and Inyo-Benton fourth.

On Friday the $200 purse for 2:12 trotters and 2:19 pacers was won by M. Senter's J. C. L. in 2:26, 2:32 and 2:28. The third heat of this race was won by O. E. Holland's Al Hal in 2:25. Florence D. was third and Chief Direct fourth.

Saturday Mr. Senter's J. C. L. won his third race, taking first money in the $200 purse for the 3:0(class. He won in straight heats, best time 2:30. Bil Irwin was second, Caroline Custer third and Zositc fourth.

The $200 free-for-all was won by Al Hal, Eva Ositc second. Best time, 2:26. There were several quarter and half mile races for runners during the three days, the winners being Fisherman, George L. and Treasurer.

A great feature of the Harvest Festival was the big Indian parade and baby show. Over 300 Piutes were in the parade and no less than 33 papooses were entered in the baby show.

American Trotting Horse Breeders Elect Officers.

Announcement that the American Association of Trotting Horse Breeders had decided at its annual meeting in Lexington last week to hold a special meeting in New York in November is regarded in some quarters as indicating that the breeders may yet attempt to unify and control the machinery of harness racing now in the hands of the National and American trotting associations and the American Trotting Register Association. Some representative men were elected to office at the meeting of the Breeders' Association. J. W. Bailey, formerly United States Senator from Texas, was chosen president. The vice presidents are W. B. Dickerman, formerly president of the New York Stock Exchange; J. O. Winston, builder of the Ashokan dam, and Fred T. Moran, a prominent capitalist and business man of Detroit. The secretary is H. K. Devereux of Cleveland, now president of the Grand Circuit, and the treasurer is Sterling R. Holt, of Indianapolis. The directors are A. H. Cosden, formerly president of the Riker-Hegeman Company; W. A. Harriman, vice-president of the Union Pacific Railroad; J. O. Winston and W. G. Pollock, of Cleveland.

Bad Weather at Riverside.

The Riverside County Fair opened on Tuesday of this week, but owing to a very heavy track and bad weather, the harness races had to be postponed. Owing to the postponement of several other feature events the board of directors have arranged to hold the fair open over Sunday, and on that day the capital prize races will be run with purses amounting to $1500.

Owing to the bad weather which attended the opening day it is even possible that the fair will be extended to Monday or Tuesday of next week. Tuesday's events were as follows:

First race, quarter-mile (seven starters)—Ragtime won (Bowden up), Effie second (Nolan up), Blue Dog third (O'Donnell up). Time, :25½.

Second race, half mile (five starters)—Tallow Dip won (Chico up), Fight Boy second (Nolan up), Casa Loma third (Fay up). Time, :51¾.

Third race, three-eighths mile (eight starters)—Round-Up won (Chico up), Coyote second (Oriley up), Eugene Sue third (Nolan up). No time given.

Will Introduce a Pari-Mutuel Bill.

Secretary James C. Nealon of the Golden Gate Thoroughbred Breeders' Association, who also stands an excellent chance of being elected to the California Legislature from San Francisco next month, has received a letter from President Charles W. Clark outlining the bill that will be introduced at the coming meeting of the Legislature for some favorable action of the State lawmakers. President Clark is on his way to Arizona, and wrote from Los Angeles that he is in favor of a bill creating a State Racing Commission to control the sport, with the pari-mutuel form of wagering. Clark also sets forth that the bill will call for only thirty days' racing in the spring and fall, which will do away with the harmful continuous racing. He also states that a portion of the profits from the pari-mutuels should be donated to the State for charitable purposes. The Breeders' Association has taken the lead in introducing the bill.

Driving Club Races Sunday.

The San Francisco-California Driving Club offers the following program for the matinee at Golden Gate Park tomorrow afternoon. It will be noticed that Bradmont, W. J. K. and King Pointer will meet in the free-for-all:

First race, 2:20 mixed—Dibble Wilkes (S. Benson), George W. (Frank Burton), Minequa (M. Ford), Matawan (J. McNamara).

Second race, 2:15 pace—Little Jack (G. Conlan), Frank N. (L. A. Gielow), Emma M. (W. Malough), Pointer Belle (J. M. Kidd).

Third race, free-for-all pace — Bradmont (Richie Roberts), W. J. K. (W. J. Kenney), King Pointer (H. Campodonico).

Fourth race, 2:18 mixed—Rosa O (J. J. Ryan), Prospector (Frank Burton), Yoncalla (A. Giovanetti).

Miss Loula Long Thrown and Injured.

Kansas City, Oct. 7.—Miss Loula Long, widely known as a horsewoman, daughter of R. A. Long, wealthy lumberman, was injured seriously here last night when she was thrown from her mount during a potato race at the American Royal Live Stock Show.

Miss Long was holding a potato over her head at the end of a lath spear, defying attempts of opponents to knock it off the stick, when, in making a sharp turn, her mount fell to its knees. Miss Long was thrown.

[Continued from page 3.]

:nglish sire), Santa Maura, Simylla, Santa Palma, tc. This is also the immediate family of imp. Martinet, sire of Gainer, etc., for imp. Martinet is by Hartagon out of Silene, she by St. Simon out of Palmflower.

Magic obviously represents the best English blood n both sides of his pedigree, and he should be a reat acquisition to the American thoroughbred in-.ustry.

◈ ◈ ◈

"Racing men," says Rider and Driver, "are complaining of a lack of good jockeys. Some of the iding during the past season would seem to have given them sufficient reason. It is said that apprenices have been scarce and that, therefore, the boys available had to be put into the saddle for racing vents without proper preparatory training. A school night be established by the Jockey Club as a means of overcoming the difficulty, and if such a desirable nstitution should eventuate we hope the style of iding so common of late may be changed. Ever since Tod Sloane introduced the "monkey seat," nearly all the jockeys have ridden in that form and as Sloane was so successful with his mounts the conclusion has been generally reached by trainers and others that he must have hit upon an improvement over the former more graceful deep seat of the peerless Fred Archer. We have never been convinced that the Sloane seat is entitled to the credit t receives. Aside from its ungainliness, the rider has no leg control over his horse, being obliged to rely entirely upon the bit; and, having no seat, even hat control is minimized. In our opinion, admitting for the moment that throwing the weight of the rider on the horse's shoulders enables the animal to use his propelling muscles more freely, there are more races lost by the lack of seat and hand control than are won by the possible addition of speed. The subject is worth discussing."

◈ ◈ ◈

Clay Brothers have decided to dispose of their entire stud and the sale will be conducted by the Powers-Hunter Company at Lexington October 28th. The stallion Magneto, a brother to Magnet, will be offered with nineteen brood mares and fourteen weanlings. Among the brood mares is Rose Tree II., dam of the mighty Roamer and Thirty Third, the dam of Buckhorn, a Brooklyn Handicap winner.

◈ ◈ ◈

The war as New Orleans goes along merrily and warring factions seem to be as far away as ever from a settlement of their quarrel. The Business Men's Racing Association recently agreed to buy H. D. (Curly) Brown off by purchasing his track, but Brown is reported to have refused to accept on the ground that the offer should have been made earlier. In the meantime Brown promises to have his own troubles in Cuba, where Grant Hugh Browne and his associates promise to launch a brand new track early in December and offer a real opposition to Oriental Park, the "Curly" Brown track that has had a monopoly on the sport on the island.

◈ ◈ ◈

For the first time this year, the two-year-olds were asked to go a mile at Louisville, Kentucky, on October 3d. May W. won the race a head in front of Hester Smith. The time was 1:42 4-?5.

◈ ◈ ◈

A. K. Macomber has taken second call on Jockey Buxton. The boy will ride for the Macomber stable during the Latonia meeting. W. C. Clancy, trainer for the Wickliffe Stable, has first call on Buxton.

◈ ◈ ◈

W. J. Weber's Hodge, carrying 120 pounds, won the handicap at a mile and fifty yards at Churchill Downs October 4th, and in doing so created a new track record of 1:41 4-5 for the distance. The old mark of 1:42½ was made by John Bright on May 15, 1900. This is an odd distance and is seldom run nowadays. Hodge was best in the handicap, but he had to be hard hustled in the last sixteenth to beat Typhoon.

◈ ◈ ◈

Countess Eugenie Lazereff has written Algernon Daingerfield from Petrograd, Russia, telling of the safe arrival of Jockey Eddie Dugan, who will ride for her. She expresses herself as well pleased with the contract she has on Dugan and is confident that he will be a very valuable acquisition to the stable.

◈ ◈ ◈

Oscar Lewisohn's five-year-old gelding Boots by Hessian out of Little Flower, won the Baltimore Handicap worth $2650 to the winner at Laurel, Maryland, on Saturday last, breaking the track record by a fifth of a second, running the distance in 1:43 2-5 and being timed the final mile in 1:37. James Butler's Spur was second and August Belmont's Stromboli was third. Fairbrother had the mount on the winner.

◈ ◈ ◈

The 16-year-old stallion Bear Catcher is on his way to St. Kitts, British West Indies. He was purchased last week from Messrs. S. T. Bradley and Andrew Bowman of Lexington, Ky., by Dr. Lionel Shannon, who came to the States for two carloads of blooded stock. Bear Catcher is by imported Knight of St. George and was a frequent winner in California ten or twelve years ago. In 1906 he was in Walter Jennings' stable.

Notes and News

Lee Axworthy (5) 1:58¼ trotting, by Guy Axworthy 2:08¾.

◈ ◈ ◈

The Real Lady (2) 2:04¼ trotting, by Moko.

◈ ◈ ◈

Peter Look (2) 2:03 pacing, by Peter the Great 2:07¼.

◈ ◈ ◈

Volga (3) 2:04½ trotting, by Peter the Great 2:07¼.

◈ ◈ ◈

Harrod's Creek (3) 2:06¾ trotting, by Gen. Watts 2:06¾.

◈ ◈ ◈

Emma Magowan (2) 2:07½ trotting, by J. Malcolm Forbes 2:08.

◈ ◈ ◈

Sis Bingen (3) 2:06½ pacing, by Bingen 2:06¼.

◈ ◈ ◈

Tacita (2) 2:07¾ trotting, by Atlantic Express 2:08¼.

◈ ◈ ◈

Suldine (3) 2:08½ trotting, by Worthy McKinney 2:30.

◈ ◈ ◈

John Garver (3) 2:07¾ trotting, by Guy Axworthy 2:08¾.

◈ ◈ ◈

What a lot of "early and extreme speed" has been shown at Lexington this month.

◈ ◈ ◈

The Riverside Fair and race meeting is being held this week with a large attendance.

◈ ◈ ◈

The Kern County Fair will open on Tuesday, October 24, and there will be a fine race program.

◈ ◈ ◈

Buck Watts 2:09½ by General Watts is the fastest two-year-old trotting colt of the year.

◈ ◈ ◈

One of the most consistent and best campaigners of the three-year-old trotters this season is Harrod's Creek 2:06¾, a son of General Watts.

◈ ◈ ◈

The three-year-old pacer Sis Bingen went a good race at Lexington in the Futurity for $2000. She won in straight heats in 2:07¾ and 2:06½.

◈ ◈ ◈

J. B. Stetson, the Oregon horseman, reached Sacramento this week with a string of four or five trotters and pacers and will remain at the State Fair grounds during the winter and early spring.

◈ ◈ ◈

An honest to goodness State Fair and race meeting will open at Phoenix, Arizona, on November 13th and continue during the week. Every race but one has filled. Many California horses are entered, in fact they make up the larger part of the entry list.

◈ ◈ ◈

Emma McGowan by J. Malcolm Forbes 2:08 won The Lexington, the oldest two-year-old stake race, in handy fashion at Lexington last week, trotting the two heats in 2:07½ and 2:07¾, which makes it the third fastest two-year-old trotting race on record.

◈ ◈ ◈

Mabel Trask has won three races during the Lexington meeting. In her last race for the Castleton Cup, she defeated Saint Frisco, Donna Clay and Virginia Barnette in straight heats and lowered her record to 2:03¼, which ties Saint Frisco's record.

◈ ◈ ◈

C. The Limit 2:03¼, son of Searchlight and Bertha by Alcantara, took his fast record at the pacing gait, but he took a trotting record of 2:28 at Ancaster, Ontario, Sept. 6th this year. C. The Limit is now 12 years old. He was bred by Lou Crellin of Pleasanton.

◈ ◈ ◈

Lou Dillon 1:58½ (bred in California), the world's champion trotting mare, and the first trotter to get a record of 2:00, is now the dam of three in the 2:10 list. She is the dam of the trotters Lou Billings 2:08¾ by John A. McKerron 2:04¾, Expressive Lou 2:08¼ by Atlantic Express 2:08¼, and the pacer Ben Billings 2:07 by Bingen 2:06¼.

◈ ◈ ◈

Baby Doll 2:07½, in the third heat of a winning race that went to five heats at Lexington last week, seems to be a better mare than she ever was and they look for her to be a good one in her class next year. She is now seven years old and sound. Baby Doll is by Dan Hoffman's stallion Tom Smith 2:13¼ and her dam is Kate Lumry by Shadeland Onward. She was bred by J. W. Zibbell of Fresno.

◈ ◈ ◈

Mr. C. J. Uhl, a prominent fruit grower of Vacaville, Solano county, has two or three youngsters by Bon McKinney that he says he will put in training if a circuit is announced by January 1st for the season of 1917. Mr. Uhl still owns the pacer Solano Boy 2:07 and uses him occasionally in trips around home and through his orchards. Mr. Uhl will have about 250 tons of prunes this year and has already shipped several car loads to the eastern markets.

Buck Watts (2) 2:09¼ is a new 2:10 performer for Gen. Watts 2:06¾.

◈ ◈ ◈

J. Elmo Montgomery left his old campaigner Jim Logan at home after returning from Salem, Oregon, but shipped Lock Logan and Hal Logan to Riverside where he had them entered for this week's racing. They are also entered at Phoenix.

◈ ◈ ◈

The grand total of attendance at the Fresno County Fair this year was a little over 65,000. This in spite of bad weather. It is stated that the board of directors will give a bigger fair than ever next year, and make up a program of harness racing that will be for increased purses over those offered this year.

◈ ◈ ◈

The New Zealand Referee says: "Mrs. R. O. Duncan's mare Lady Derby, by Rothschild—Norice, has foaled a brown filly to the imported horse Logan Pointer. This is the first foal by Logan Pointer, and is a very well proportioned youngster and a natural pacer.

◈ ◈ ◈

A two-year-old black filly by Cochato owned by Mr. Van Kirk of Dayton, Ohio, trotted a half mile in 1:06, last quarter in 31 seconds and last eighth in 15 seconds at the Hamilton, Ohio, fair grounds last week, and was then sold to a Boston, Mass., man for $10,000.

◈ ◈ ◈

The Pacific Breeders' Futurity for foals of mares covered in 1916 is for $2500, of which $1500 is for three-year-old trotters and $1000 for three-year-old pacers. The provision for two-year-old races has been discontinued so far as this stake is concerned. See advertising columns.

◈ ◈ ◈

The two-year-old filly Symphony by Tregantle, dam Melody, trotted the last half of an easy mile in 1:02½ at Lexington, October 6th, with the last quarter in 31 seconds, and gives every promise of being a great three-year-old. She is owned by Mars Cassidy, the well known starter of running races.

◈ ◈ ◈

Buyers from six states were at St. Joseph, Mo., on Sept. 28th to attend the annual sale of the Northwest Missouri Hereford Breeders' Association. The St. Joseph Stocker and Feeder Show and Sale held during the week attracted many stockmen. A $218 average was made on 66 Herefords and this would have been raised considerably had some of the stock been in better condition.

◈ ◈ ◈

Do you need anything to make your horses comfortable this winter? Blankets, rubber sheets, or lotions for their legs? See Dave West at 1018 Fillmore street, San Francisco. He is the leading dealer in race horse goods in California and besides carries a big stock of all sorts of leather goods. You will find some high class things at his store that will make excellent Christmas gifts.

◈ ◈ ◈

Before President Geo. Giannini sold the little pacer Bradmont to Richie Roberts, the son of Alto Leyburn won four straight races at the Driving Club's matinees, and was then raced a few times on the circuit where he did not do so well. Since Roberts purchased him he has won three straight races, and looks to hold all the matinee pacers safe.

◈ ◈ ◈

Dr. Fillmore Young, of Marion, Ohio, has recently tucky, the three-year-old chestnut mare Queen of Kentucky, by Kentucky's Choice, dam by Rex Peavine. This mare was shown in Kentucky and Missouri this year and won nine firsts and four seconds. She is regarded very highly and will develop into a very high class mare.

◈ ◈ ◈

It is possible that a ten day meeting will be held at Southern Park trotting track, Youngstown, Ohio, next spring. Early-closing events ranging in value from $1000 to $2500 will probably feature the two weeks' racing. Sixty new stalls will be built at the track. Several other improvements will be made about the grounds, the grand stand will be enlarged and a cinder path will be built inside the track.

◈ ◈ ◈

Superintendent George Ryan of the Pleasanton track states that there are a number of horses now at that training ground and more are expected soon.. George Strate is on the way and will arrive this week with a half dozen high class young thoroughbreds from England, and a man from Idaho has written for stalls for several head. Mr. A. W. Longley's horses occupy ten stalls, S. Christenson has a half dozen, Mr. I. L. Borden's string is there and as soon as the races are over at Phoenix, several stables will head for Pleasanton.

◈ ◈ ◈

Just three days before the recent death of Mrs. J .B. M. Grosvenor, of New York, her old champion saddle horse Petroleum died at Emile Antony's farm near White Plains, where he had been a pensioner for more than ten years. Among all the horses Mrs. Grosvenor owned—and she had expended $200,000 in buying and showing harness and saddle horses—Petroleum and a pony by Dilham Prime Minister were her favorites, and she provided a home for both of them as long as they lived. Petroleum won the championship at the National Horse Show of 1904. He was a Kentucky bred horse, brought out by S. T. Harbison, of Lexington.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Champion Deer Getter.—Independence, Cal.—J. E. Bell doesn't pretend to be much of a deer hunter, but he is undoubtedly the champion deer getter. Last Thursday evening he got a fine buck while sauntering along in his automobile, and he didn't even leave the highway or fire a gun. His stunt is probably without a parellel. It would become popular if the deer would stand for it, but there is no likelihood of such a thing happening again.

Mr. Bell was driving into town and met the deer on the road. The animal was apparently blinded by the headlights and ran toward the machine until within a few feet, when it made a wild leap to one side. Along the highway at that point happens to be a strong barbed-wire fence, and the buck, a six-pointer, hit this.

Hearing no further sound, Mr. Bell and Mr. Crowley, who drove up behind him, got out to investigate. They found the deer dead, its neck broken by the collision with the wire. Mr. Bell loaded the buck on his car, brought it to town, and he and his friends have had plenty of fine venison since. Can you beat it?

Hunters Bring Down Bucks.—Despite the crowd of hunters which infested that section, the Tejon country tributary to Gorman Station yielded 62 bucks during the season just closed, as detailed in a list sent to the Fish and Game Commission, compiled by H. H. Hunt, the forest ranger resident there. The bucks are classified by killer and by locality as follows:

In Los Angeles county, one buck each by H. Sandberg, Liebre mountain; Charles Moore, Piru creek; E. D. Engerbritsen, Alamo canyon; W. S. Shepherd, Pine canyon; J. O. Maxwell, Elizabeth Lake canyon; B. Cherbbono, Liebre mountain.

Ventura county, one buck each by J. E. Barneburg, Upper Piru creek; C. H. Harrison, Upper Piru creek; Erwin Vineyard, W. J. David, A. Vineyard, on Mount Pinos; T. E. Atmore, Lackwood valley; William Black, Wagon Road canyon; Henry Sherer, San Guilmo mountain; L. A. Seaman and S. Rabacuba, both Frazier mountain; D. R. Crane, Snowy peak; C. H. Shrimpline, Telephone canyon; T. H. LaVelle, Dry creek; Glen A. Young, Frank A. Potter, A. B. Hardesty, all on the Henderson place; John E. Frazier, V. A. Chalker and Frank E. Proud, one each on Gold hill; C. W. Stuart, two on Sewart peak; T. J. and R. F. Harris, two each, and J. A. Harris, one on Alamo mountain; Milo Fane, two on Little Mutau; S. L. Ford, one on Bear gulch; J. A. Stewart, one on Snowy creek; and five unknown hunters on Frazier, Little Mutau, Snowy and Lookout point.

Of these hunters Rabacuba, Crane, Young and Stewart willed their limits, two bucks each.

In Kern county—Carl Weichelt, Cuddy valley; J. A. Barnes Jr., Neal canyon; G. H. Dillon, Tecuya ridge, got bucks; Charles Day, two in Salt creek; seven others unknown, three on Tecuya mountain and one above Castiac lake, also reported.

Pheasants Dying of Disease.—That the pheasants in Yakima county, Wash., are dying off as the result of disease more than shooting or severe weather, is the statement of Alex Fulton, U. S. immigration inspector, who has just returned from a hunting trip in the vicinity of Ellensburg. The fact that the game is much more scarce than it has been for many years may result in the declaration of a closed season for several years, Fulton asserts.

"The old birds seemed to have stood the winter and spring in excellent shape," said Fulton recently, "but the loss of the chicks through disease has been very marked. The cold weather is not believed to be the result, as the early hatchings weathered the late spring in admirable fashion.

"Some of the hunters thought that the practice of treating seed wheat with a chemical compound before planting might have been the cause of the wholesale loss of pheasants, but tests made by the county game warden showed that the preparation is harmless. Investigations are being made to determine the cause of the disease. It is probable that exhaustive tests will be made by scientists before the cause is known."

Boastful Hunter Arrested.—James Mast, Lagunitas nimrod who boasted that he could never be convicted of violation of the State game laws by a Marin county jury, has changed his mind. After being found guilty by a jury in Justice of the Peace Herman Rudolff's court, he was sentenced to serve five months in the county jail and pay a fine of $100. Sentence was pronounced by Justice Rudolff last Saturday.

Mast was convicted of killing a female deer while hunting near Lagunitas, about a month ago. He was arrested by Deputy Game Commissioner Dave Hoen, on information supplied by Gus Gallon, a former hunting partner of Mast.

Last year Mast and Gallon were arrested four or five times on similar charges. Each time they demanded a jury trial, and each trial resulted in an acquittal. As a result of one of the trials, Mast and Gallon quarreled. Shortly afterwards Mast supplied information to the authorities which caused Gallon's conviction on a charge of killing a doe. Gallon served five months in the county jail. Within a week after his release he "got even" with his former partner. Mast is the son of William Mast, a well-to-do horse dealer in San Francisco.

READY FOR OPENING OF DUCK SEASON.

Many Hunters Will Take Chance of Going Out on Sunday; More Birds Than in Years Past.

Get out the scatter-gun for the duck season. The season's opening is almost with us. According to Uncle Sam it will arrive at sun-up on Monday. The State of California lawmakers have set it down in the big book for Sunday morning. The conflict has had hunters all over the lengthy confines of the State puzzlinfi ever since the new zone regulations went into effect.

To play it safe and take no chances, it would be wise to wait until Monday. The Federal regulations take precedence over the State law and the Federal authorities could prosecute in case arrests are made. There a number of the boys, however, who have declared their intentions of turning out on Sunday. It is the fact that Sunday is the only day many hunters have of following their favorite pastime that makes the point of opening day so important. Some are loath to wait a whole weak for there is bound to be a lot of bombardment early in the week and it may put the birds to flight.

One mighty pleasing feature of the coming duck season is the numerous and persistent reports of birds being plentiful. At the Copper Kettle Club you can hear nothing but good news of ducks at all points about the bay. Usually you run into several who are pessimistic, but this year nothing but glowing reports have been made. The recent rains have not been considered hard enough to drive the birds inland and some excellent sport is expected when the bars are finally lowered.

Watch For Bands on Wild Ducks.—Washington, D. C.—If you kill or capture a wild duck bearing an aluminum band around one leg, having a number on one side, and on the other a statement requesting that the U. S. Department of Agriculture, or the Biological Survey, be notified, you are requested to send this band at once to the Bureau of Biological Survey, U. S. Department of Agriculture, Washington, D. C. This band if accompanied by a statement as to date, place, and circumstances under which the bird was taken, will be of service to the Survey in its efforts to determine the longevity of individual ducks and the routes o fmigration of the species.

The bands are being attached to considerable numbers of wild duck of several species which have been cured of the duck sickness prevalent around Great Salt Lake, Utah, and there released. The Department is particularly anxious to secure reports from these birds to determine their complete recovery from this malady which has killed hundreds of thousands of ducks in Utah.

Woman Catches Record Trout.—Mr. and Mrs. George Long and C. H. Bradshaw of Imperial hold the honors of bringing to shore the largest trout recorded in California this season. The trout were of the rainbow variety. Mrs. Long was the one responsible for the landing of the largest beauty of the catch. The trout measured thirty-two inches from tip to tip and balanced the scales at eleven and a half pounds. After hooking her prize Mrs. Long had a fight with the huge trout that lasted a little over an hour before landing it.

Mr. Long caught the next largest trout landed, which weighed just a little under that caught by his wife. He fought three-quarters of an hour before bringing his prize to shore. All of the fish were landed from the shore. In all of their catches they used light tackle with minnows.

Tule Fishing Now Illegal.—Carl D. Shoemaker, State Game Warden, wants it understood there is nothing in the Oregon laws prohibiting angling for steelheads and silversides at this time, but there is a misconception regarding certain species of fish now running in large numbers in the Sandy River, where the Fish and Game Commission is having a lot of trouble.

Anglers are under the impression that the fish that are running are silversides and steelheads. This is not the case. The species is known as a Fall salmon, and still better known as the tule. These salmon are going up to the spawning beds, where they deposit their spawn. They are unfit for eating and it is against the law to catch them or have them in possession.

CAN RICE GROWERS KILL DUCKS?

Question Comes Up Because Birds Destroy Property Out of Season.

The rice growers of California are up in arms, figuratively and literally, against the wildfowl ravages of their rice fields, and the problem of saving the wildfowl and their rice fields as well is one that is going to cause a lot of trouble and discriminating administration of the game laws. The Upper Sacramento Valley ranchers have suffered for years great losses in grain from the inroads of wild game, and they claim this loss has been sustained without much complaint and without redress; but now that they have gone into rice cultivation they claim the limit of patience has been reached, and, game law or no game law, they are going to protect their rice fields if they have to kill every duck that comes into them.

One ranchman gave out an interview that is a fair sample of the sentiment of all the rice growers. He said:

"I don't care what the game laws are. The blackbirds are destroying my crops and they make their roosts on my scarecrows. Blackbirds are costing me $100 a day, and I'm going to kill them.

"Wild ducks no longer migrate to the North, but make their home during the hatching season in the rice fields during the summer. If anybody wants to kill ducks this fall and winter send them to my ranch. I'll let them have free hunting grounds and will give them a good meal besides. Wild ducks and wild blackbirds, together with jackrabbits and cottontails, are a pest to rice growers."

Some ranchers claim that if the state insists that the game laws shall not be violated and that the game birds must be let alone during the closed season, then the state should pay them for grain losses; but for the state to collect hunting-license money and the ranchers pay the bill of feeding the game birds for licensees to shoot during the open season, without recompense, is unfair and inequitable, and they (the ranchers) do not propose to "stand for it."

It is an unfortunate condition and one that calls for dispassionate investigation on the part of the Game Commission of California, to determine if the statements of and positions taken by the ranchers are borne out by the facts, and if the game laws are working an injustice to them. If so, then special legislation must be enacted to correct the evil of which they complain and prevent open defiance of the game laws. If the statements are not borne out by the facts, then the Game Commission knows what to do.

Any section of a law that works an injustice brings the whole law into disrepute. A good law should not be so jeopardized.—American Field.

Plants Attract Ducks.—Increasing interest is being taken by owners of game preserves in the establishment upon them of growths of aquatic plants such as will attract wild ducks and hold on them ducks that have been bred in captivity upon the preserve. This movement is more or less in its infancy, but seems destined to great development. The country is indebted to the United States Bureau of Biological Survey and particularly to Mr. W. L. McAtee, Assistant Biologist, for extended research that has been made into the food of our wild ducks. Much of the information adduced is found in three Government publications, Circular 81 of the Survey, and Bulletins 58 and 205 of the Department of Agriculture, entitled, respectively, "Three," "Five" and "Eleven Important Wild Duck Foods."

These foods attract and hold wild ducks to a preserve, they also give the coveted wild flavor and, in the case of ducks that are captive-bred, add greatly to the fertility of their eggs.

During the present year Mr. McAtee made a survey of the Wilds-Walcott preserve at Norfolk, Conn., on which interesting and valuable experimental work having to do with the breeding, attracting and holding of ducks is being carried on, with a view to determining what food-planting would give most promise of success.

Frogs Eat Young Ducks.—For a number of years we have had on our lake at Millbrook, a few pairs of mallard ducks. We have let them take care of themselves, and have usually raised quite a number of young. This year we had numerous hatches, but one by one the young ducks disappeared. We thought that they were taken by either crows, cats or some other vermin. We shot a couple of cats, but the young ducks continued to disappear. We once heard that frogs were known to catch young ducks, but we did not believe the story. However, we thought it would be a good idea if we investigated, so, one evening, five men with clubs and electric torches went around the edge of the lake, and that evening we killed in the neighborhood of twenty-three very large frogs . We repeated this the following evening, and, all told, killed nearly fifty. Twenty-three of the largest of these frogs we opened, and in each found a young duck; in one of them a freshly swallowed duck and another one nearly digested.

This story I have told to many of the people in Millbrook, and it has caused much mirth and merriment. However, the above are the facts, although it sounds like a very queer tale.—(Morgan Wing, Millbrook, N. Y.)

NOT A GRIZZLY BEAR IN THE STATE.

Former U. C. Professor Also Calls Attention to Passing of the Sea Elephant.

Not in the whole length of the Grizzly Bear State is there to be found at large a specimen of any of the six species of grizzlies. And the sea elephant, once the playfellow of little California aborigines, is no more . These and other facts are deplored by Dr. Walter P. Taylor, formerly of the museum of Vertebrae Oology, University of California, in an article in the latest issue of the Scientific Monthly, in which he pleads for the conservation of native fauna.

Dr. Taylor was recently called to the Bureau of Biological Survey at Washington.

He bewails the day when the hills of San Francisco and the islands of the bay were overrun with deer—that was as recently as 1835—and incidentally he calls attention to a point of California supremacy not hitherto adequately celebrated, saying:

"Perhaps there is no more favorable unit in which to carry on our study than that comprised within the boundaries of California. Characterized not only by comparatively great area, but also by climatic features ranging from almost subtropical to boreal, and by a topography of almost infinite variety, it is small wonder that California possesses a mammal list including 369 different species or subspecies, as compared with 80 for Kansas, 94 for Nebraska, 152 for Colorado and 182 for Texas.

"Obviously the species likely to be in greatest danger everywhere are the game species, plus those species against which a public prejudice exists for one reason or another, and those species which, through the fur trade or otherwise, enter into the world's commerce.

"Although it must be admitted that much of her inheritance has passed away, there is still plentiful evidence to indicate that California possessed an early fauna of such generous abundance as to justify according her a place among the big game countries of the world."

According to one estimate, says Dr. Taylor, "California's fur bearing mammals, including only the bears, raccoons, skunks, badgers, river otter, mink, marten, fisher, red foxes and wolverine, at the present time produce an income which makes them worth $7,000,000 to the state."

Taking up the species, surviving or disappeared, he says of the sea elephant:

"We are prone to forget or overlook the intimate relation between the interests of man and the presence of the native animals. An illustration of what is perhaps one of the more unusual of these relationships is furnished by the case of the sea elephant, the abundant oil of which, according to Stephens, was much in demand as an illuminant in the early days in this state previous to the general use of coal oil. The market created by pioneer necessities, coupled with the sluggish temper of the animal, both mental and physical, evidently conspired to work its doom in our waters. Formerly found in some numbers, we must believe, along our southern coast and as far north as Point Reyes, it is gone completely from our shores, being reduced to a handful of survivors on Guadalupe Island, off the coast of Lower California.

In 1812 700 or 800 sea otters were killed in San Francisco bay; in 1910 the average price paid for these skins in London was $1703.33. A few of them are still seen off Monterey, says Dr. Taylor, and since the protective law of 1913 was passed they seem to be increasing.

Of elk, once hunted around the bay for its tallow—in those day they formed great herds—few are left, and the Roosevelt elk is making its last stand in Humboldt and Del Norte counties. The pronghorn and the bighorn have vanished, save for a few ghost-like herds occasionally reported.

There is hope in the black bear, however:

"Our biggest living carnivore is the black bear. One subspecies is found in the Transition and Boreal zones of the coast mountains north of San Francisco Bay, while the other, the exact status of which remains to be elucidated, occupies the Sierra Nevadas south to the vicinity of the Tehachepi Mountains. Apparently the black bear has never been found either in the coast district south of San Francisco or in Southern California.

"Although constant persecution has resulted in considerable reduction in its numbers, the black bear has proved a much more resilient and adaptable species than the grizzly; and there are good grounds for the hope that with fair treatment it may be counted on as an important big game and fur producing species for many years to come."

But while California has reduced the bulk of its species and extirpated at least eight, it is not alone, the same story being told in nearly every state of the Union and on other continents than America, says Dr. Taylor.

The first substitute for live pigeons was glass balls. They were first used in 1866. Since that time there have been many improvements.

• • •

Records compiled in trapshooting for eleven years show that there has not been an accident in that period. When one thinks of the hundreds of tournaments and thousands of trapshooters this is remarkable.

Treaty Precludes Further Question as to Constitutionality of Migratory Bird Law

The Canadian treaty preludes further question as to the constitutionality of the federal migratory bird law. It therefore makes it unnecessary to bring the case now pending in the United States Supreme Court to argument.

That the treaty is constitutional cannot be doubted. In Article VI, clause 2 of the Constitution, it is provided:

"This Constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the constitution or laws of any state to the contrary notwithstanding.

That noted author, Mr. Charles Henry Butler, in his very able work entitled "The Treaty Making Power Under the Constitution of the United States," gives as his opinion that the power to legislate in regard to all matters affected by treaty stipulations and rules is co-extensive with the treaty-making power, and that acts of Congress enforcing such stipulations, which, in the absence of treaty stipulations, would be unconstitutional, as infringing upon the powers reserved to the state, are constitutional, and can be enforced, even though they may conflict with state laws or provisions of state constitutions, or in other words, that a treaty or act of Congress enforcing its provisions annuls or abrogates all state laws and constitutions in conflict therewith, without any exception, even if the provisions thereof relate to matters wholly within state jurisdiction.

There has been so much discussion about the treaty between the United States and Great Britain relating to birds which migrate between the United States and Canada, that we herein reproduce it in full:

Article 1. The high contracting powers declare that the migratory birds included in the terms of this convention shall be as follows:

1. Migratory game birds:

(a) Anatidae or waterfowl, including brant, wild ducks, gees and swans.

(b) Gruidae or cranes, including little brown, sandhill, and whooping cranes.

(c) Rallidae or rails, including coots, gallinules, and sora and other rails.

(d) Limicolae or shorebirds, including avocets, curlew, dowitchers, godwits, knots, oyster catchers, phalaropes, plovers, sandpipers, snipe, stilts, surf birds, turnstones, willet, woodcock and yellow legs.

(e) Columbidae or pigeons, including doves and wild pigeons.

2. Migratory insectivorous birds: Bobolinks, catbirds, chickadees, cuckoos, flickers, fly-catchers, grosbeaks, humming birds, kinglets, martins, meadowlarks, nighthawks or bull bats, nuthatches, orioles, robins, shrikes, swallows, swifts, tanagers, titmice, thrushes, vireos, warblers, waxwings, whippoorwills, woodpeckers and wrens, and all other perching birds which feed entirely or chiefly on insects.

3. Other migratory nongame birds: Auks, auklets, bitterns, fulmars, gannets, grebes, guillemots, gulls, herons, jaegers, loons, murres, petrels, puffins, shearwaters and terns.

Article 2. The high contracting powers agree that, as an effective means of preserving migratory birds, there shall be established the following closed season, during which no hunting shall be done except for scientific or propagating purposes under permits issued by proper authorities:

1. The close season on migratory game birds shall be between March 10 and September 1, except that the close season on the limicolae or shorebirds in the maritime provinces of Canada and in those of the United States bordering on the Atlantic Ocean which are situated wholly or in part north of Chesapeake Bay shall be between February 1 and August 15, and that Indians may take at any time scoters for food but not for sale. The season for hunting shall be further restricted to such period, not exceeding three and one-half months, as the high contracting powers may severally deem appropriate and define by law or regulation.

2. The close season on migratory insectivorous birds shall continue throughout the year.

3. The close season on all other migratory nongame birds shall continue throughout the year, except that Eskimos and Indians may take at any season auks, auklets, guillemots, murres and puffins and their eggs for food and their skins for clothing, but the birds and eggs so taken shall not be sold or offered for sale.

Article 3. The high contracting powers agree that during the period of ten years next following the going into effect of this convention, there shall be a continuous close season on the following migratory game birds, to-witff Band-tailed pigeons, little brown, sandhill and whooping cranes, swans, curlew and all shore birds (except the black-breasted and golden plover, Wilson or jack snipe, woodcock and the greater and lesser yellowlegs); provided that during such ten years the close season on cranes, swans and curlew in the Province of British Columbia shall be made by the proper authorities of that province within the general dates and limitations elsewhere prescribed in this convention for the respective groups to which these birds belong.

Article 4. The high contracting parties agree that special protection shall be given the wood duck and the eider duck, either (1) by a close season extending over a period of at least five years, or (2) by the establishment of refuges, or (3) by such other regulations as may be deemed appropriate.

Article 5. The taking of nests or eggs of migratory game or insectivorous or nongame birds shall be prohibited, except for scientific or propagating purposes under such laws or regulations as the high contracting powers may severally deem appropriate.

Article 6. The high contracting powers agree that the shipment or export of migratory birds or their eggs from any state or province, during the continuance o fthe close season in such state or province, shall be prohibited except for scientific or propagating purpases, and the international traffic in any birds or eggs at such time captured, killed, taken or shipped at any time contrary to the laws of the state or province in which the same were captured, killed, taken, or shipped, shall be likewise prohibited. Every package containing migratory birds or any parts thereof or any eggs of migratory birds transported, or offered for transportation from the Dominion of Canada into the United States or from the United States into the Dominion of Canada shall have the name and address of the shipper clearly marked on the outside of such package.

Article 7. Permits to kill any of the above named birds which under extraordinary conditions may become seriously injurious to the agricultural or other interests in any particular community may be issued by the proper authorities of the high contracting powers under such suitable regulations prescribed therefor by them respectively, but such permits shall lapse, or may be canceled at any time when, in the opinion of said authorities, the particular exigency has passed, and no birds killed under this article shall be shipped, sold, or offered for sale.

Article 8. The high contracting powers agree themselves to take, or propose to their respective appropriate lawmaking bodies, the necessary measures for insuring the execution of the present convention.

Article 9. The present convention shall be ratified by the president of the United States of America, by and with the advice and consent of the Senate thereof, and by his Britannic majesty. The ratifications shall be exchanged at Washington as soon as possible and the convention shall take effect on the date of the exchange of ratifications. It shall remain in force for fifteen years, and in the event of neither of the high contracting powers having given notification, twelve months before the expiration of said period of fifteen years, of its intention of terminating its operation, the convention shall continue to remain in force for one year, and so on from year to year.

In faith whereof, the respective plenipotentiaries have signed the present convention in dplicate and have hereunto affixed their seals.

Done at Washington this 16th day of August, one thousand nine hundred and sixteen.

(Seal) ROBERT LANSING.
(Seal) CECIL SPRING RICE.

Trade Notes.—At a recent Saturday shoot of the West End Club, of Richmond, Va., M. D. Hart carried off the honors. Shooting Nitros, he scored 49x50. Louis Rueger won second place, shooting the same brand of shells, by breaking 47 of his 50 targets.

Some high scores were made on "Remington UMC Day" at the Lincoln Park Gun Club, of Chicago. C. W. Irrgang was high gun with a perfect score. He shot Nitro Clubs. The five well-known Graham brothers, all shooting Nitros, did some great shooting, making an average of 94 4-5%, and breaking 474 of their 500 targets.

Shooting against a heavy wind which made high scores impossible, J. S. Frink, Al Wallace and W. M. Carstens, tied for first place at a recent shoot held by the Luverne (Minn.) Gun Club, with scores of 148x160. In the shoot-off Al Wallace, who shot Nitro Clubs throughout the tournament won, scoring 22x25.

Signals For Hunters.—Signals for deer and other hunters who are in trouble have been prepared by Thomas B. Wyman, secretary of the Northern Forest Protective Association. Every Clover-Land hunter will be provided with the signals so that help can be rendered as soon as possible. Here are the signals:

HELP—Four shots in quick succession, as oooo.

INJURED—Shot, pause, two shots, pause, shot, as o-oo-o.

LOST—Three quick shots, pause, one shot, as ooo-o.

MAN FOUND—One shot, pause, three quick shots, as o-ooo.

CALL HEARD—Two quick shots, pause, two quick shots, as oo-oo.

Large placards are being placed in the woods by Mr. Wyman in order to keep the signals before the minds of hunters.

Sportsmen's Row

The Fort Sutter Gun Club was recently organized at Sacramento, Cal., with a membership of eleven, and will make life miserable for the ducks in the Gridley region this season. The club has leased 600 acres southwest of Gridley, adjoining the Wild Goose Gun Club, whose shooting is said to be the best in the state. The officers of the new hunting body are: President, E. M. Estrada; secretary, W. H. Kyne; treasurer, J. A. Burns. The other members of the club are: J. F. Bull, George Wisseman, W. A. Goehring, William J. Schilling, H. A. Borchers, C. H. Riley, G. T. Payne and Frank Waxon.

• • •

Midgley Marsden, one of the best known all-around judges in Great Britain, and who had been showing, handling and judging dogs for half a century, during which time he had acquired a reputation as one of the best judges of a dog in the world, died at the Jodrell Arms Hotel, Whaley Bridge, England, of which he was manager, about three weeks ago, at the age of seventy-three years, his death being caused by cardiac trouble. Mr. Marsden had judged in this country several times, the last time several years ago, at the L. K. A. show at Mineola, and during his visits made many friends who will sadly regret his demise.

• • •

Neaf Apgar has been elected president of the Westy Hogans for the eleventh time.

• • •

Eighteen states now prohibit the killing of female deer.

• • •

Canada leases lakes and hunting grounds in the Province of Quebec for the asking.

• • •

The Westy Hogans is an organization made up of professional trapshooters.

• • •

In New York licensed hunters must wear conspicuously displayed a button two inches in diameter, which is furnished by the state.

• • •

With the merging of the Allegheny Sportsmen's Association and the Cheat Mountain club, 90,000 acres of the finest hunting and fishing preserves in the East and South are joined together. They met at the headwaters of the Cheat and Elk rivers in Virginia.

• • •

Successful trapshots are made only by application and study.

• • •

Join a gun club early and then watch the veterans shoot if you wish to progress.

• • •

Club managers, are you alive to the fact that you can get more for a target barrel nicely rounded up with empty shot-gun shells than you paid for the same barrel full of clay pigeons?

• • •

Eagle Creek, near this city, is a veritable fisherman's paradise and reports of record catches are pouring into the offices of the State Fish and Game Warden. A total of 473 good-sized trout were taken out of the creek in two days by four parties. Four more catches were reported consisting of 150, 130, 124 and 68 trout, respectively.—(Piscator, Portland, Oregon.)

• • •

Another of the writing element who is going to be an adjunct to the dog world is "Jack" Brennan, who wrote "A Little Bit of Heaven." "Jack" made so much in royalties out of this song that he has bought himself a place out on Long Island, and he told the writer that as soon as he got settled he was going to get a nice little kennel. He is not sure yet what kind he will have, but it is pretty certain they will be Irish terriers.

• • •

Dog fanciers are still discussing the great feat accomplished by Croydon Radium, the American bred wire haired fox terrier puppy which carried off stellar honors at the Queensboro Kennel Club's show at Astoria. For a puppy terrier to be declared the best either smooth or wire of either sex is considered wonderful, but to earn these honors and then be declared the best dog in the show fanciers said was remarkable and showered praise on his owner, C. Ehlermann.

• • •

Trapshooting has taken such a hold on the miners of Treadwell, Alaska, that tournaments are held Saturdays and Sundays and sometimes during the week, even though the mines do not close excepting July 4th and Christmas. It is not a bit out of the ordinary to see a miner coming off his shift carrying a shotgun and go to the trapshooting club and shoot with a squad before going home.

• • •

That the Chinese Pheasant supply of Washington State will increase rapidly during the coming few years, due to the operation of the State game farm at Walla Walla, is the opinion of L. J. Esses, who has been managing the State game farm. The farm this year, Esses says, produced 1900 birds at a cost of $2600. But of this $2600, $1200 was spent for equipment which can be used for years to come. Excluding this item of $1200 the estimated cost of the birds would be $1.50 a pair.

• • •

Since the Interstate Association has been arranging events for women shooters in the programs of their big tournaments, and offering handsome prizes, there has been a noticeable increase in the number of women who have competed in registered tournaments. It required some such recognition as this from the governing body of trap-shooting to bring this about.

When Bass Bite.—It is a well known fact that black bass bite better in the cool months than they do in the warm ones, but just why no one has been able to figure out conclusively. At the same time, very good guesses may be, and always have been made, the general belief being that the fish are more voracious or hungry in the cooler months through the fact that the cooler water increases their activity, the same as it does that of human beings upon land. This, to a certain extent, however, is a fallacy in so far as the cool waters affect their appetite.

In the latter part of May and the first part of June they have been taking care of the spawning beds and have had no opportunity to go about in the search for the more delectable food, and as up to the spawning time they have had very little to eat in consequence of the long winter's hibernation, they are on the watch at all times for food during the latter part of June and while the waters are still somewhat cool. And the successful fisherman at this time is the one that selects (accidentally or otherwise) the bait that the fish are used to finding at this season, and serves it to them in the depths of the water at which they expect it to be. This is the time when the still fisherman comes into his own and the bait caster loses out.—Rod and Gun.

Officers of Golden Gate Club.—At the annual meeting of the Golden Gate Gun Club on Tuesday night officers were elected for the ensuing year. T. D. Riley, a popular member, was the unanimous choice for president and Clarence A. Haight was again selected as secretary. Dr. C. D. McGettigan will be vice-president and E. B. Thorning treasurer. The board of directors will be made up of George Thomas, J. Herby Jones and Frank Webster.

The members present at the meeting are already laying plans for a banner season in 1917, to be topped off by the staging of the Pacific Coast Handicap, if the club's application is looked upon with favor by the Interstate Association. The Alameda grounds will be improved so as to accommodate larger gatherings.

Southern Casting Scores.—Seemingly inspired by the ideal weather conditions and an interested crowd of spectators, Southern California Rod and Reel Club casters opened the winter casting season at Eastlake on Sunday by breaking club high marks and badly bending some of the world's records.

Several new men and most of the veteran casters of the club faced the targets and the pace that was set indicates that the winter of 1916-17 will be a banner season for both fly and bait casting.

E. J. Kennedy broke club records in the light tackle distance fly event with a 91-foot cast and the Roll fly distance by reaching the 82½-foot mark. Charles Van Horn also broke a club mark in the light tackle accuracy fly event with a percentage of .99 7-15.

The summaries as compiled by Financial Secretary J. Howard Smith are as follows:

Special 2½-ounce Surf Casting for Distance—A. E. Perkins, 174 feet 10 inches; Sherman Baker, 155 feet 2 inches; Oscar Lane, 86 feet 7 inches; E. J. Kennedy, 102 feet 6 inches; A. E. Roome, 77 feet 2 inches; Frank Kling, 110 feet 11 inches; C. Van Horn, 67 feet 8 inches.

Light Tackle Dry Fly Accuracy—Charles Van Horn, 99 5-15, E. J. Kennedy 99 8-15, J. J. Low 99 2-15, H. A. Richey 97 13-15.

Light Tackle Fly Accuracy—Charles Van Horn, 99 7-15, E. J. Kennedy 99 6-15, J. J. Low 98 14-15, H. A. Richey 95 14-15.

Light Tackle Fly Distance—Charles Van Horn, 74 feet 6 inches; E. J. Kennedy, 91 feet; J. J. Low, 80 feet 6 inches; H. A. Richey, 69 feet.

Roll Fly—Charles Van Horn, 73 feet; E. J. Kennedy, 82 feet 6 inches; J. J. Low, 60 feet; H. A. Richey, 55 feet.

Longest ¼-oz. Distance Cast—By Kennedy, 167 ft. 5 inches.

Longest 2½-oz. Distance Cast—By Baker, 226 feet 6 inches.

¼-ounce Accuracy—Oscar Lane 98.4, Sherman Baker 93.5, A. E. Perkins 97, C. J. Lenarth 97.2, H. A. Richey 97, George F. Borngrebe 80.5, A. E. Roome 83, Charles Van Horn 92, E. J. Kennedy 97.

¼-ounce Distance—Oscar Lane, 147.1, Sherman Baker 106.3, A. E. Perkins 79.3, C. J. Lenarth 76.3, H. A. Richey 63.2, George F. Borngrebe 23.4, A. E. Roome 18.4, Kennedy 160.5.

2½-ounce Distance (Regular)—Oscar Lane 137.6, Sherman Baker 201.7, A. E. Perkins 209.5, A. E. Roome 149.7, Kennedy 155.9, Kling 81.4.

WHEN IS A COOT A COOT, AND WHEN IS A COOT A MUDHEN?

Jack London Asks Question—Answer Is a Coot Is a Mudhen, According to Federal Law.

Editor, Breeder and Sportsman:

Here in California, when is a coot a coot, and when is a coot a mudhen? If a coot is a mudhen, then is a scoter a coot? Very truly yours,

Glen Ellen, Cal. JACK LONDON.

There are two birds locally called coots. One is the mudhen, which is correct, and the other is the scoter, which is erroneously referred to as the coot. They have frequently been classed under the same name while as a matter of fact they are of two entirely different families.

The Federal regulations for the protection of migratory birds have cleared up the questions by their classifications.

Anatidae, or waterfowl, include brant, wild ducks, geese, and swans and the scoter is classed as wild duck. It is a sea bird, which is commonly termed the sea coot to distinguish it from the mudhen. There is a bag limit of 25 per day on the scoter.

Rallidae, or rails, include coots, gallinules and sora and other rails. Mudhens come under this classification. There is no bag limit.

Accordingly, in answer to the question, a coot is a coot when it is a mudhen and not a scoter.

Los Angeles Club.—Nearly a hundred devotees of trapshooting turned out at the Los Angeles Gun Club on Sunday morning to compete in the final shoot on the season trophies.

"General" Frank Mellus, champion of the Coast on 400 targets, tied with R. Whitman for the Class A prize, each with a score of 93x100. All prizes were diamond medals.

The class B medal was won by Jack Milligan of Oxnard with a score of 95x100. Sheriff John C. Cline won the medal in Class C, breaking 86 birds out of 100.

Bob Bole won the out-of-town shoot, breaking 49x50 from 17 yards. Victor Rossbach won in the miss-and-out event. The 20-gauge shotgun event carrying the prize put up by the Hoegee Company, was won by Dr. L. M. Packard, and Mrs. E. C. Groat won the ladies' prize, breaking 45 birds out of 50 from 19 yards, a remarkable score.

Belgian Starts Fur Farm.—The son of the governor of West Flanders, Belgium, is about the start a fur bearing animal farm in Clover-Land or the Upper Peninsula of Michigan.

Louis Walleys, the only son of Desires Walleys not wearing the uniform of the Belgian army because King Albert has ruled that at least one son in each family must live in order to perpetuate the Belgian race, came to the United States with his sister Olga twenty months ago. His father had purchased eighty acres of Florida lands in Brussels long before the war began and his children came here to develop the lands, grow tropical fruits and make money while the others spent it for Belgium's sake.

The young Belgian built a house and barns only to find that the lands were useless. Then he began working for Mrs. Potter Palmer as landscape gardner until he had saved enough money to go north in search of a place where he might raise furs. His sister entered a hospital in Tampa, Fla., to learn the art of nursing in order to aid the sufferers in Belgium later.

Mr. Walleys has found what he long sought. He has purchased 120 acres in Marquette county from R. P. Bronson. The land includes Ross Lake, thus affording the Belgian an ideal location for his farm. He will raise cattle and sheep, operate a small dairy farm and gradually build up a fur farm. He will raise fox, skunks, beavers, muskrats and all other animals acclimated to that region. In a short time, he asserts, he will have Persian lambs there, and that the growing of these most valuable animals will be his main vocation.

"The climate and seclusion of this region is just what I have long sought," said Mr. Walleys. "I will surprise you Americans before I am through, and more than all, I will show the land sharks who sold my father the worthless lands that I can make a success where conditions are right."—[George W. Powell, Marquette, Mich.

A. A. T. A. Vice-Presidents.—The following vice-presidents have been elected for a term of one year. The new officers will head the organization of the A. A. T. A. in their respective states and will serve in an advisory capacity on the national council:

Arizona—W. E. Mullen of Ray, Ariz.

California—G. H. Anderson of San Jose, Cal., president California State Sportsmen's Association.

Kentucky—T. H. Clay, Jr., of Austerlitz, Ky., president Kentucky State Sportsmen's Association.

Nebraska—H. E. Palmer of Bradshaw, Neb.

Texas—Walter H. Bertrand of Dallas, Texas, president Texas State Sportsmen's Association.

Wisconsin—Ed. F. Leidel of Milwaukee, Wis., president Wisconsin State Sportsmen's Association.

Wyoming—C. F. Nelson of Rawlins, Wyo., president Wyoming State Sportsmen's Association.

CALIFORNIA RIFLE TEAM GOES EAST.

Crack Marksmen Now Competing in the National Matches at Jacksonville.

A private sleeping car rolled out of the Espee depot Sunday morning at the tail of the Sunset Limited, bearing sixteen of the youth and beauty of California in the form of the first civilian rifle team ever sent to a national rifle match by the United States government. The team wound up four days ater at the great national matches at Jacksonville, Fla., where are gathered teams of civilians from other states, teams of National Guardsmen and teams from the regular service, all gathered in less than thirty days' notice to do battle for the government historic rifle trophies.

In past years the government has paid the expenses of National Guard teams of the picked men of each state to these great shoots, where thousands of dollars are up in prizes, with the perpetual trophies of the historic matches of the National Rifle Association, but this is the first time in history that the government has paid the transportation of civilian riflemen in recognition of the presence of the 90,000 civilians shooting the military rifle under government restrictions. From each State will go a team of such men.

California, because of the limited time, held no tryout. Because of the standing of the Los Angeles Rifle and Revolver Club, national champions for 1915, third for 1916, the adjutant-general selected seven men and a team captain from the locals, while six men go from the famous Olympic Club rifle team of San Francisco, which landed fifth in this year's national club shoot.

Col. T. T. Cooke, formerly inspector of small arms practice of Iowa, and now an enlisted member of the Los Angeles club, goes as team captain, while the shots to represent the Golden State against the country consist of E. C. Crossman, H. C. March, E. C. Price and Dr. L. Felsenthal of Los Angeles and G. L. Wotkyns, A. L. Thomson and E. D. Neff of Pasadena. The Olympic Club is represented by C. W. Linder, C. T. Blank, T. C. Williams, S. F. Rogers and the famous pistol shot, George Armstrong. A. Rowland and W. C. Prichard complete the team list.

The team will fire through the program of the southern, the National Rifle Association, and then the great national individual and national team matches, the shooting ending October 26. As the new plan of sending civilian rifle teams was a pet measure of the local club, and urged by its friends on the National Rifle Association, the local men feel tickled pink over the success of their efforts.

Los Angeles. E. C. CROSSMAN.

Hand Trap Talk.—With the advent of the hand trap trapshooting became the most versatile of sports.

Under the old conditions sportsmen were wont to consider trapshooting as a sport which could be enjoyed only at certain places and certain times. The places were the gun clubs, and the times were the regular shoots held by those clubs. Now all is changed .

Trapshooting is no longer restricted to gun clubs and regular shooting days. It may be enjoyed whenever and wherever a shotgun may be used, and when two or more persons are so inclined. The change has been brought about through the hand trap, which may be taken off into the open field by a party of three or four persons and an impromptu shoot staged. Or it may be packed in a suit case and taken along on the vacation trip.

The owners of yachts and boats find the hand trap often comes in handy in helping entertain guests who find time hanging heavily on their hands and will gladly accept an invitation to participate in the most novel kind of trapshooting—over the water from the deck of a moving yacht. No such assortment of flights and angles of targets are possible with anything but the hand trap, and by the same token it affords more real fun and enjoyment in a half hour than any other kind of shooting does in half a day.

If you haven't tried it, get a hand trap and get busy now. You'll vote it the best and cheapest you ever had.

Breaking Up of Great Squad.—With the death of Alden B. (Dal) Richardson, the famous trapshooting squad comprised of Allen Heil, Billy Foord, Charley Newcomb, Richardson and Charley Billings, is no more, says an eastern writer.

This was considered the fastest moving and fastest shooting squad in the eastern states. It was never late at the traps; not one ever talked with the other while before the traps; not one of them ever showed anger or glee; every one went to the traps with extra shells, and not one took his foot from the mark until Allen Heil, shooting fifth, fired his last shot.

They observed trapshooting etiquette in every sense of the word; they went up to the mark to shoot, and take it from me they didn't do anything but go after the targets. They were warm personal friends, but that didn't deter any one of them from trying to defeat the other. They were all out to win.

An example of how few words were spoken by this quintet during the days they were shooting was shown at the Westy Hogans' tournament in Atlantic City, N. J., a year or two back. Richardson and Heil, shooting in fourth and fifth places, went three days without speaking to each other, and when the last shot was fired on the third day Charley Billings said:

"I am going to quit this squad."

The other four in chorus asked, "Why?"

To which Billings replied: "Richardson and Heil talk too much for me."

Seattle Association.—The opening of the duck season and the hunting in the eastern part of the state attracted most of the sportsmen October 1st and consequently only a few "gun bugs" turned out at the Sunday morning shoot of the Seattle Trapshooters' Association on the Harbor Island grounds. A stiff, cold, northerly wind added the realism of duck shooting to the targets, except for the fact that it shot the clays up at various degrees of angles and worked havoc with the scores.

C. E. McKelvey stood high man in the fifty event, scoring forty-five out of the bunch, Tom Wilkes running him a close race and taking second place with forty-three to his credit.

In the hundred-bird race both McKelvey and Wilkes scored the same, tying with eighty-six each.

Trapshooters of this city will be pleased to hear of the return to Seattle of Harry Williams, an old-time trap-shot who has spent the last six months down on Mexican waters, being stationed on the U. S .S. Colorado. Williams has not done any trapshooting for that length of time, but showed his old form at the traps.

Several new shooters started in the "sport alluring" and promise to make good at it. R. C. Goodale, Theo R. Dayton and W. K. Jackson Jr. shot for the first time at the traps and made some very good scores considering their inexperience.

Another new shooter in the squads was C. F. Reinhart, who used to do considerable trapshooting in Wisconsin, but turned out at this shoot for the first time in eight years. Scores were as follows:

50 Targets—C. E. McKelvey 45, Tom Wilkes 43, Harry Williams 34, C. F. Reinhart 23.

100 Targets—Tom Wilkes 86, C. E. McKelvey 86, Harry Williams 71, C. F. Reinhart 49, C. W. Bandy 38.

RAISING QUAIL IN LOS ANGELES.

[J. P. Goytino, Pres. S. Ignatius Club, Los Angeles, Cal, in "American Game Protective Association."]

I return you many thanks for the Bulletins you sent me. I have read them very carefully and they are certainly fully worth the trouble. Your article on quail breeding is splendid and complete.

We are raising at the St. Ignatius Club some valley quail (Callipepla Californica)—Gould). Two years ago we lost quite a number of young quail—about 175—but last year we were quite successful after getting some fine specimens from Ensenada—Baja Calafirnia, Mexico. The new blood has reduced the mortality to 17 per cent instead of 63 per cent as before.

We breed our quail by pairs, in cages of 3 feet x 18 inches, following the method so much praised by the French breeders and so much recognized by Remy Saint-Loup in his book, "Les Oiseaux de Paris et de Faisanderies,," page 136. We raise also, at the club, several kinds of pheasants: golden, silver, Reeves, Prince of Wales and ringneck.

I was much interested in your announcement of the publication of "American Pheasant Breeding and Shooting." It's quite time for us Americans to have some books on pheasants, as we are very much behind the English, the French and the Germans on that subject.

Get a Gun That Fits.—There are hundreds of trapshooters who do not improve their scores at the traps because the gun they are shooting does not fit them.

When purchasing clothes you get them to fit; it is the same with shoes, and all other things you wear—so why not get a gun that fits you, too? You feel better with shoes and clothes that fit you. It is just the same with a gun. A shooter can do much better with a gun that fits him.

There is no reason why a shooter shouldn't have a gun that fits him in these days of progressiveness. The professionals who tour the country and are at nearly every trapshooting tournament in the country all carry "try guns," and will measure any shooter and tell him the exact size of the gun stock, etc., that he should use.

The "try gun" is of English origin. It has adjustable screws and can be adjusted to fit any person. So, if your gun does not fit you, or you are thinking about getting a new gun, be measured with a "try gun," and then you will know the size of the gun you want.

Vancouver Game Association.—Although changing its name from the Vancouver Angling Society to the Vancouver Angling and Game Association, at the special meeting held in the Sportsmen's room of the Hotel Vancouver, the association found that the projected plan to incorporate under the Benevolent Societies Act was at present impossible for the reason that the act does not specifically include "game" associations among the bodies which may be incorporated under its terms. The matter of incorporation was then left in abeyance until such time as an amendment to the act which will bring the association within scope be passed, presumably at the next sitting of the legislature.

A new constitution was adopted at the meeting, one which sets forth the aims of the body in the direction of furthering the interests of fishermen and hunters and of game planting and preservation. The members present were heartened by the news that the total membership of the new association is at present about 150, and it was predicted that within a short time this number would be doubled. The association will at once take up several urgent matters in regard to the preservation of the fish and game resources of the province.

GOOD PROSPECTS FOR HUNTING SEASON.

Quail and Ducks Reported More Numerous Than in Many Years.

Among sportsmen, who have been awaiting the coming of the general game seasons for quail and ducks with greater impatience than ever, the one big, absorbing topic of conversation has been the effect of the early and heavy general rain upon the shooting prospects, which so far have been of the very best.

That this is to be an early season has been predicted by close observers because of the cool September and early southward movement of the migratory birds, although September rains are not so unusual as to warrant getting excited over them.

For such of the duck clubs as have independent water supply the rain is rather disadvantageous, as it fills up many others, scatters the birds and, worst of all ,tends to sprout the grain and weed seeds which form a chief source of food supply for ducks in this end of the State. This will show more plainly later and should be met by the clubs with a resumption of feeding operations.

There are so many sprigs and other ducks in the State this year that on the whole the rain will prove beneficial by giving more shooters a chance at them. Flights will not remain so long here as in dry years, but an early season with frequent storms means there will be a succession of flights which will bring in fine, fat birds from the San Joaquin and Owens Valley wheat sections.

As regards the quail, the rain will wash off the brush, lay the dust, start grass on the north slopes and make hunting far more enjoyable by permitting the use of a dog to advantage; will discourage "rattlers," and now seems certain to make of this by far and away the greatest quail year the state ever saw when the number that will enjoy the sport is considered by referring to the vast hunting-license totals. The Fish and Game Commission reports the sales of the Los Angeles office alone are mounting up to the 20,000 mark already, which is four-fifths of the entire total of last year, with the big opening-day rush to come.

Those with a few days' time resiring the best and most accessible sport have been bidden by the desert ranchers about the Salton Sea to make that country their headquarters, as the red-headed desert or Arizona quail are fairly taking the country, while ducks never have been so plenty.

Goat Island a Game Preserve.—An official executive order, signed by President Woodrow Wilson, setting aside Goast Island as a Federal game preserve, has been received by Frank H. Gould, United States Surveyor-General for California.

The President's order follows:

"It is hereby ordered that Goat Island, containing about one hundred and forty-one acres of land, situated in San Francisco bay, approximately midway between the cities of San Francisco and Oakland, Cal., shown upon Coast Survey Chart No. 5531, and as segregated by the broken line upon the diagram hereto attached and made a part of this order, is hereby reserved and set apart for the use of the Department of Agriculture as a preserve and breeding ground for native birds, subject, however, to the use of the island for naval, military and light house purposes in conformity to requirements of executive orders heretofore issued.

"It is unlawful for any person to hunt, trap, capture, willfully disturb, or kill any bird of any kind whatever, or take the eggs of such bird within the limits of this reservation, except under such rules and regulations as may be prescribed by the Secretary of Agriculture.

"Warning is expressly given to all persons not to commit any of the acts herein enumerated under the penalties of Section 84 of the United States Criminal Code, approved March 4, 1909 (35 Stat., 1104).

"This reservation to be known as San Francisco bay reservation.

"WOODROW WILSON.

"The White House, August 9, 1916."

Large stocks of quail and pheasants already have been turned loose on the island, and, according to the officials, the birds are doing unusually well.

Evidently from the perusal of the executive order, the Federal government recognizes "Goat Island" as the official designation. In the bay cities Goat Island is known to hundreds as Yerba Buena island.

Trap shooting is not a matter of population. This is proved by the fact that Hillsboro, Ill., a town with only 7000 population, sent ten shooters to the Grand American Handicap, the largest pro rata entry in the tournament.

Stock Breeders' Page

Report of the College of Agriculture.

The annual report of the College of Agriculture and the Agricultural Experiment Station of the University of California from July 1st, 1915 to June 30th, 1916, has been received and a copy of it should be in the hands of every farmer and fruit grower in the state. The reports of experiments on animals, soils, crops, etc., make most interesting reading and are of great value to the farmer or horticulturist who desires to learn something of those things which can only be learned by intelligent experiment. As examples of the subjects treated in this report are the following:

Effect of Barley on Milk Flow.—In order to determine whether barley has a tendency to dry up milch cows, as is sometimes claimed, five cows in the University Farm dairy herd have been fed rolled barley as exclusive grain feed for varying periods during the past two years. Woll reports that the production of one cow during the past two lactation periods on barley was considerably increased over that during the first lactation period when mixed grain was fed, while the other cows produced somewhat less milk or butter fat on barley than during corresponding periods when fed mixed grain. The results do not indicate that the feeding of barley tends to dry up milch cows, but they suggest that most cows do not do as well on barley alone as on mixed grain rations. Three of the cows had heavier average body weights when on barley than when fed mixed grain, while the opposite was true in the case of one cow.

Alfalfa as a Sole Feed for Dairy Heifers and Cows.—A study of the effect of exclusive alfalfa feeding on the growth and milk production of dairy heifers and cows was begun in April, 1914, and will be continued for several years in order that the effects of the practice of feeding alfalfa only to dairy stock may be fully understood. Thus far heifers fed alfalfa and mixed rations dropped somewhat heavier calves and produced during their first lactation period a marked increase in milk and butter fat as compared to heifers fed alfalfa only.

Tuberculosis in Farm Animals.—The high percentage of tuberculosis in cattle and hogs on certain ranches has been found to be due to the failure of the owners to remove promptly animals which develop visible indications of the disease. Physical examination alone, even when performed by an experienced veterinarian, cannot be depended upon, however, to remove all open cases or spreaders. Dependence on one tuberculin test alone will usually fail to stop the spread of the disease in badly infected herds.

The highest accuracy in the diagnosis of tuberculosis in cattle is obtained by alternating or combining with careful physical examination the various methods of tuberculin testing. In co-operation with owners, a total of 18,796 head of cattle have been tested by this station. Of these 2954 head, or 15.6 per cent, reacted. In herds where the percentage of reactors is small the disease may usually be kept in check by semi-annual testing and removal of reactors. In badly infected herds this method often fails to stop the headway of the disease until so many animals have been changed by repeated tests and additions that practically a new herd has been substituted. In all infected herds efforts should be directed to the protection of the new-born animals, feeding pasteurized milk and raising them in isolation from the older cattle.

Experiments have proved that pasteurization, as prescribed under the new California State Dairy Law, is sufficient to kill tubercule bacilli. Experiments have failed to immunize cattle to tuberculosis.

Care of Tractors Taught to Farmers.

So many people want to learn more about how to care for their automobiles that throngs are enrolling in the University Extension classes in the repairing of automobiles which the University of California is giving in San Francisco and Oakland. Now the farmer is to have his turn, for the University has announced a "Gas Tractor Short Course," at the University Farm at Davis from November 13th to 24th, in which farmers will be taught how to handle and repair gasoline tractors.

While the tractor is the draft-horse of self-propelled vehicles, it is far more important that its operator should be skillful in caring for its ailments than is the case with the city man who owns an automobile, for it is seldom possible to run a tractor to a garage when in need of repairs. Moreover, the tractor has to carry a heavy load continuously for days, while an automobile is seldom called on for more than a small fraction of its power.

The University has asked all who intend to attend the Tractor Short Course to write to the University Farm of their intention at least two weeks in advance of the opening of the course.

An even $200 average was recorded for the 62 Herefords sold at Centralia, Mo., on Sept. 29th under the auspices of the Central Missouri Hereford Breeders' Association. The 21 bulls averaged $199 and the 41 females $200.

HOW A BREEDERS' ASSOCIATION SELLS PERCHERONS.

That co-operation among horse breeders makes it possible to market purebreds at the high figure for the producer is brought out in the last year's record of the Delaware Co., O., Percheron Breeders' Association. During the year more than 40 horses, both stallions and mares, have been sold at prices ranging from $300 to $1,000 each. Practically all the stock was taken as soon as it was ready for the market.

While Delaware county farmers have bred Percherons since the '60's, getting their start from imported mares bred to the noted early Percheron stallions Normandy and Napoleon, no real co-operative effort was developed until 1913. Now the association is composed of 85 breeders all living within a radius of 12 miles of Delaware. It is the intention to keep 200 purebred mares for breeding in the section at all times and there are a few more than this number in the hands of the breeders now.

Prior to 1913 the colts from purebred mares were sold generally at gelding prices and the young stallions were picked up by dealers who fitted and developed them for market. Thus the profits were usually secured by the dealers. Since the organization has been developed the young stallions and mares are developed and fitted by the men who breed them. This has made it advisable for the breeders to organize, advertise and sell directly to the ultimate purchaser.

When a buyer comes to Delaware county, the secretary, who is located at the county seat, gives him a list of all the horses ready for sale. Each animal offered is classified according to breeding, age, sex, color, weight and price. Then the buyer is taken in an auto to the breeders whose classifications would seem to comply with his wants. In this manner the buyer can look over the horses of 10 or 12 breeders in one day and see the horses in their working clothes.

Practically all the mares and stallions are worked. Many of the breeders carry on their farm operations with the purebred Percherons and have little trouble from diseases and accidents. It is not uncommon for one member of the association to have five stallions in the same field during the rush season of farm work. The breeding of purebred horses is not a sideline, but a regular farm routine, and returns maximum profits.

The horses are raised unpampered. They are developed under natural conditions and are the offspring of mares which can earn their keep in the harness. The horses offered for sale are nearly always trained to work.

Twenty stallions are kept by members of the association in service, but none is owned co-operatively. Each member of the organization does his own buying and selling and no commission on sales goes to the association. Its funds are maintained through membership fees. All the fees are used for advertising purposes, advertisements being kept in live stock papers at all seasons. Circulars are also distributed at fairs and farm gatherings. The association merely brings the buyer to the breeder, allowing them to determine the conditions of sale.

Only two members of the association are importers of horses and practically all the mares are American-bred. A few stallions are brought in from breeding establishments outside of Ohio each year and likewise a few mares are added.

The record of Delia, an American-bred Percheron mare owned by one of the association members, serves to show the results of the association in securing better prices for breeding stock. Her first colt sold as a yearling for $175; her second at 6 months for $145; her third at 2 years for $725; her fourth at 3 years for $550; her fifth at 2 years for $725; her sixth at 3 years for $500; her seventh at 2 years for $900; her eighth at 22 months for $1100, and her ninth at 11 months for $500. The last three were sold since the organization of the breeders' association. In addition to her daily work in the fields Delia has returned more than $400 for each year of her life, the total sales of her colts amounting to $5,220.

About 25 members of the association make exhibits of their stock at fairs and a goodly proportion of the Percheron prizes at the Ohio State Fair go to members of the organization. Prizes have also been won by members at the West Virginia State Fair and at the Forest City Fair, thus indicating that high-class individuals are being constantly sought by breeders.—[Clarence M. Baker, Ohio State University, in Breeder's Gazette.

One of the big leaks on a dairy ranch frequently comes as a result of having too many dry cows at a time when they should be busy at the bucket. A good worker needs a month or two of rest each year between lactation periods, but when she exceeds this she gets into the loafing class. Allowing for a two months' rest period out of twelve means fifteen per cent of the cow's time. In other words, eighty-five per cent of the dairy herd should be at work and with an average of fifteen per cent resting. Instead of this relation however, it is not unusual to hear of dairymen with as high as fifty per cent of their cows in the dry lot chewing up alfalfa. Often this is the result of poor cows, and especially those with short lactation periods, or it may be the result of a poor system of feeding.

RATE ORDER POSTPONED ONE MONTH.

Chicago, Oct. 3, 1916.

Breeder and Sportsman:—The Interstate Commerce Commission has just issued the following order in the case known as "The National Society of Record Associations, et al., v. Aberdeen & Rockfish Railroad Company, et al.":

"Upon further consideration of the record in the above entitled proceeding, and good cause appearing therefor:

"It is ordered, That the order entered in this proceeding on June 29, 1916, and which was by its terms made effective November 1, 1916, be, and it is hereby, modified so that it will become effective on December 1, 1916, instead of on said November 1, 1916; but in all other respects the said order of June 29, 1916, shall remain in full force and effect.

By the Commission:

"[Seal] GEORGE B. McGINTY."

The reasons for the above postponement have been made known to the National Society of Record Associations:

Briefly, the railroads in the western classification and in the southern classification have accepted the decision laid down by the Interstate Commerce Commission, details re which were furnished to you some time ago, and are preparing their tariffs and classifications accordingly. The roads in the official classification territory from Chicago east, and south as far as the Ohio River, have petitioned for a rehearing in this case. Their request for a rehearing has been promptly answered by the National Society of Record Associations, and we do not believe that there is any probability that the decision handed down by the Interstate Commerce Commission will be modified, even in its application to the roads in the official classification territory. The delay incident to a consideration of this request for rehearing and of our answer has, however, made necessary a brief postponement of the effective date of the decision referred to.

Live stock breeders may rest assured that vigilant attention is being given to these matters, and this notice is being sent out in order to advise them of the reason for the 30-day postponement of the effective date of the order above referred to.

Proceedings have already been instituted to bring the weights, basic values, rates of increase for animals of higher value than the average, rate rulings on crated animals, and requirements as to attendants on intrastate traffic, into line with the decision just handed down by the Interstate Commerce Commission which pertains to interstate traffic. The railroads in the west have shown a commendable willingness to bring their intrastate regulations and practices into line with the decision of the Interstate Commerce Commission, and, while it will take some time to have the necessary hearings before the various State Railway Commissions or Public Utility Commissions, the work is being steadily prosecuted, and it will only be a matter of time until stockmen will enjoy the same favorable shipping facilities on intrastate traffic that they have recently obtained on interstate traffic.

I will thank you to give as wide publicity to this as possible in order that stockmen generally may understand why the effective date of the decision handed down by the Interstate Commerce Commission has been briefly postponed.

Very truly yours,

WAYNE DINSMORE, Sec'y.

According to the American Shorthorn Breeders' Association the season's shows have brought out a remarkable array of Shorthorn exhibits, both east and west. At the Iowa State Fair the number of Shorthorns on exhibition approximated 400, and entries in individual classes reached as high as 62. At the same time the Ohio State Fair brought out a large and worthy collection of high-class show Shorthorns. The steadily increasing registration reveals the growing inclination to breed registered Shorthorns. The popularity of the Shorthorn is showing a positive increase. This is not confined to a few sections of the country, but embraces practically the whole United States.

◈ ◈ ◈

The war demand for beef to feed the vast armies and navies of European countries is a great factor in holding up prices while the domestic demand is greatly stimulated by the industrial activity brought about by Europe's large purchases of various commodities, including war munitions. The war has resulted in greatly reducing Europe's cattle herds, and while it lasts the foreign outlet will be unusually heavy. Such countries as Germany, England, Scotland and France have slaughtered much of their breeding. Looking ahead, the time seems propitious for the farmers with the alfalfa to take on stockers and feeders at the present range of prices.

◈ ◈ ◈

In the dispersion sale of Holstein-Friesians held by Clarence E. Parker at Granville, N. Y., W. H. Mace, Cortland Co., N. Y., paid $1000 for the cow Fairview Veeman Korndyke.

◈ ◈ ◈

The Holstein-Friesian bull King Segis Pontiac Konigen, for which Fred F. Field, Brockton, Mass., paid Mrs. F. P. Smith, Alexandria, N. Y., $35,000, is by King Segis Pontiac and out of K. P. Dione Pietertje, a daughter of King of the Pontiacs.

THE FARM

THE FARMER'S BOY.

(Field and Farm.)

The farmer who figures that his boy's time is worth about thirty cents a week and an occasional bat over the head need not look for sympathy when the young man gets a job in town and takes it. A boy cannot be kept in a cheerful frame of mind by dosing him with fourteen hours' work and then giving him the price of a red lemonade on circus day as pay for his summer's toil. Thousands of boys who have aptitude and a natural liking for ranch work have been driven from home into occupations with no more outlook than a blind sow because some father who was tighter than the hide on a dropsica lshoat worked them like an eyeless mule on a tread mill for their board and clothes. Some men will blow in $75 on a trip to the Denver stock show, then go home and squeeze it out of the sweaty brows of their children, who have probably not been out of the county for fifteen years.

When a ranch boy sees the town youth earning his regular wages and spending it as he likes, while he himself lives on windy promises and a story book for Christmas, he feels like going out behind the barn and kicking himself o ffthe agricultural map.

We knew a boy who worked on the home ranch from the time he was nine years old until he turned his seventeenth birthday, and all he got out of it was a pig which his father gave him in a reckless spasm of generosity and filial affection. When the pig grew to man's estate the kind parent sold the animal and bought a second-hand manure spreader for the money. The laborer is right worthy of his hire and the boy should be paid something, if only a dollar a week—when it ought to be ten.

PACKING PRODUCTS FOR BETTER PRICE.

While quality is an essential requirement in the marketing of any farm and fruit product, it is by no means the only factor in selling at the highest price.

First of all, the packages used should be new and clean. The neater the package, the better the fruit will appear. While the products packed should be of uniform size and color throughout the package, the top layer should be arranged so as to attract the eye of the buyer. Further, the package should in every instance be well filled. The buyer is very quick to notice shortness in measure, or any deficiency in a well topped or rounded finish. In small fruit, such as the strawberry, particular attention should be given to have every berry in perfect condition, with the calyx or hull attached. The individual fruits are better arranged in layers in the box, the calyx showing as well as the red. For the best effect and for particular markets where the grower has steady customers, the berries should be graded into two sizes. This is to give uniformity to the fruit and will make the package more attractive.

Hog Floors.—The question of floors has worried hog raisers for many a year. In a permanent building, the earth floor even in this dry climate is decidedly unsanitary; so much so that its use can hardly be recommended. Brick and concrete have both been tried, but in many cases prove so cold that young pigs can not live upon them. Houses that have been so equipped have had to be remodeled and some sort of wood floor provided. If the floors are separated from the walls by a one inch layer of crown tar or some such material the transmission of cold is materially lessened. Wood floors, if properly constructed and used, are reasonably durable and if made so that they are removable there is no reason why sanitation can not be maintained in the swine-house without any great difficulty. Indeed, many hog raisers find that a movable wood floor to be used in the winter farrowing season is advisable. Creosoted flooring, or the brush treatment of both floors and walls, is a sanitary measure and also adds to the durability of the wood.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL
For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.
We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

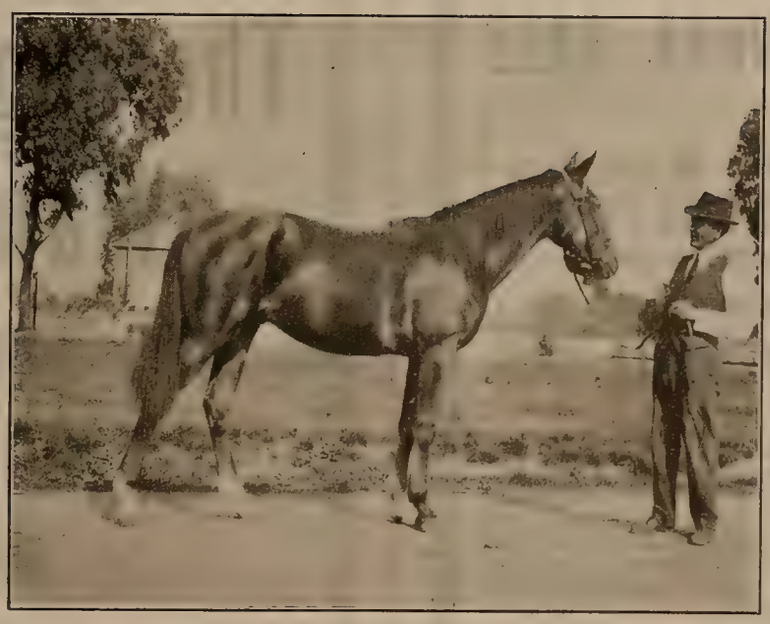
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

HAS A PACING SIRE BUT TROTS

Terry Patchen, yearling by Joe Patchen II, dam by Zombro. He has trotted a quarter in 38 seconds, and is owned by Mr. R. J. MacKenzie, Pleasanton.

$2,500 GUARANTEED — ONLY $2 TO NOMINATE MARE — GUARANTEED $2,500

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

Monday, December 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. :-: :-: $1,000 FOR THREE-YEAR-OLD PACERS

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

FIRST ANNUAL SALE

Santa Anita Rancho
ANOAKIA BREEDING FARM
ANITA M. BALDWIN, Prop.

TUESDAY, OCTOBER 24th, 1916.

AMONG THE OFFERINGS at this sale will be 19 head of as fine saddle horses as can be found on the Coast, several being sired by that peerless sire, REY EL SANTA ANITA and the famous Kentucky saddle horse DON CASTANO. There are a number of Arabian-Thoroughbred crosses, sired by the greatest Arabian in America, IBN MAHRUSS and out of Thoroughbred mares. For beauty, speed and endurance these cannot be surpassed. In addition there are 5 head of 2-year-old Arabian-Thoroughbred crosses not broke. These horses measure up fully to the well known Santa Anita Rancho standard of excellence.

There will also be a number of exceptionally good, heavy work horses and mules in the sale. Also some choice draft colts.

HENRY MILLER, one of California's notable men, died in San Francisco Saturday, October 14th, in his 90th year. Miller was born in Brackenheim, Wurttemburg, July 21, 1827. When 20 years old he emigrated to America, penniless, and worked as a butcher boy in the Washington market in New York City. In 1849 gold was discovered in California and Miller followed the hordes of gold seekers to the Pacific. In 1850 he was still a butcher boy in San Francisco. In 1851 he went into the business for himself and in 1857 formed a partnership with Charles Lux under the firm name of Miller & Lux. They went into the breeding and raising of cattle, as well as slaughtering them for the San Francisco market. The administration of the land laws was lax in those days and as Miller & Lux aspired to own much land upon which to pasture their herds, men were induced to use their homestead and settlers' rights to acquire title to land and then sell out to the firm. By this means and by purchase the firm acquired title to at least half a million acres in California and large tracts in Nevada and Oregon, but the story, often told, of their ability to drive a herd of cattle from Bakersfield to Oregon and camp on their own land every night, is pure fiction. In 1887 Lux died and afterwards Miller bought out the interests of the Lux heirs in the firm for five million dollars and incorporated the business under the firm name. Miller was the head and front of the Butchers' Board of Trade of San Francisco, which organization has been maintained for years to resist the efforts of the "Big Four" of Chicago to get control of this market, and which has been successful up to this time. Henry Miller knew beef cattle as few men in California knew them. He could guess the weight of a steer as close as any man and he had a wonderful memory for every detail of every ranch he owned. He married in 1860, but the only survivor of his family is a daughter whose husband has been the manager of the corporation for several years. The Miller & Lux corporation owns probably twenty million dollars' worth of property, the greater part of it in land and water rights—the firm owning several large irrigation systems. Henry Miller was an exemplification of what a man can accomplish by his own efforts in this country, starting with brains an energy as capital. In his will he remembered a large number of his employes with bequests of from $250 to $5,000, and left many hundred thousands to charity to be distributed after the death of his heirs, who are to hold his property in trust.

THE BIG CHICAGO SALE will be held this year beginning December 18th. There is said to be a good market in Chicago, and prices are expected to be better than for two years past. A California breeder and trainer has already made arrangements to ship about fifty trotters and pacers to this sale, but the Chicago Sales Company want 50 more, so as to have a California day at the sale. This is the best opportunity offered for California breeders for some time, as a special express train will be engaged to take the horses over at carload rates. Read the advertisement on page 12 and correspond with the company immediately.

The Victoria (Australia) Racing Club paid £73,340 in stakes during the season which ended in July last, and made a profit of £15,000, the whole of which has been handed over to war funds.

RIVERSIDE COUNTY FAIR RACES.

A very successful race meeting was held at Riverside in connection with the County Fair last week, racing being held on Tuesday, Wednesday, Friday and Saturday. Vera Hal paced the fastest mile of the meeting when she won the first heat of the free-for-all in 2:11¼, fair time for a half-mile track. Bon Cres in the 2:14 trot made a heat in 2:14¼, which was the fastest mile at the diagonal gait during the meeting, although Allie Lou by Kinney Lou trotted the third heat of the free-for-all trot in 2:14½, only a quarter of a second slower, and in this race she beat Bon Cres. Ward and Finley each drove two winning races. L. J. Rose, O. E. Holland and G. H. Judd acted as judges during the meeting and H. G. Stanley was the starter. O. P Sanders was an efficient and popular secretary. Summaries:

Ben Corbett, Jr., b g by Ben Corbett(Finley)	2	1	1
Silver Tips, b g by Morris A.....(Short)	1	2	5
Julia M., b m by El Angelo.....(Allen)	4	4	2
Zomar, ch s by Zolock.....(Walker)	3	3	3
A. B. C., ch g by Young Monterey..... .....(Chadbourne)	6	d	

Time—2:12¼, 2:12, 2:14

Free-for-All trot, purse $500:

Allie Lou, b m by Kinney Lou.....(Ward)	1	1	1
Bon Cres, b h by Bon Volage..(Chadbourne)	2	2	2
Danube, br g by Direcho.....(Cooper)	3	3	3
Harold C., b g by Bon Voyage.....(Cohen)	4	4	4

Time—2:15¾, 2:15½, 2:14½.

A Starting Barrier for Trotters.

Andrew Robertson of the Allendale Stock Farm, Australia, thinks harness horses could be started in this country by the Higgins starting barrier. He says that in Australia it has been the means of solving the problem of starting races to the utmost satisfaction, and abolishing all the controversy and trouble which the problem caused previously. Mr. Robertson has been around the Grand Circuit, and sincerely believes that the trotting game in the United States would be benefited by trying the innovations inaugurated by Australia. He is confident that the tiresome scoring would be done away with, and that the horses would be better matched. It seems that the Higgins barrier is a new invention that is meeting with success in Australia.

A Real Stake.

That is what the Western Horseman of Indianapolis calls its stake for foals of mares bred in 1916 to race in 1920. It only costs $1 to nominate each mare on or before November 1st, 1916. One year later, Nov. 1st, 1917, $5 will be due on each foal, and on May, 1918, there will be $5 more to pay. No additional payment till year of race. All the stake money and all the accrued interest will go into the stake and be paid out in spot cash to the winners. There will be a trotting division and a pacing division and the races will be for three-year-olds. See advertisement in this issue of the Breeder and Sportsman.

A Queer Decision.

It was nice autumn weather at Golden Gate Park last Saturday when the San Francisco-California Driving Club's matinee was held. Four races were on the card and some close finishes resulted. In the free-for-all pace W. J. Kenney's old delivery horse W. J. K. was in fine fettle and defeated Bradmont, Richie Roberts' horse, that had won his three previous starts. W. J. K. won in straight order in 2:12½ and 2:13¼.

Frank Burton captured the opening race with George W. and A. Giovannetti won the last race with his well bred trotter Yoncalla, defeating the pacers Senator H. and Rosa O.

There was disagreement between the judges over the placing of the horses in the third race, and finally over the opposition of Mr. John A. McKerron, the minority judge, the cup was awarded to J. M. Kidd, owner of Pointer Belle, although W. Malough's mare Emma M. stood best in the summary. At the end of the second heat of this race Emma M. and Little Jack each had a heat and second, while Pointer Belle had been third twice and Frank N. fourth twice. In the third heat Pointer Belle and Emma M. paced a dead heat, Little Jack was third and Frank N. fourth. The fourth heat was won by Pointer Belle, Emma M. second and Little Jack third. A majority of the judges then declared the race ended and awarded the cup to Mr. Kidd. As the summary then stood Emma M. was clearly entitled to the cup if the race was ended, but the proper ruling would have been to order another heat with Pointer Belle and Emma M. as the contestants. If in the dead heat Pointer Belle was credited with a win, then Emma M. should have also been given that credit, and as she had previously won a heat and Pointer Belle had not, Emma M. had won two heats and the race. We understand that the judges arrived at their decision by holding that after two horses make a dead heat the one that comes in first the following heat is entitled to the race. This is certainly an original way of determining the winner, and has no authority in racing laws. But then, "What's the constitution between friends"?

The summaries:

First race—2:20 mixed:

George W. .....(Burton)	1	1		
Minequa .....(M. Ford)	3	2		
Dibble Wilkes .....(S. Benson)	2	4		
Matawan .....(J. McNamara)	4	3		

Time—2:20, 2:21.

Second race—2:15 pace:

Pointer Belle .....(J. M. Kidd)	3	3	0	1
Emma M. .....(W. Malough)	2	1	0	2
Little Jack .....(G. Conlan)	1	2	3	3
Frank N. .....(L. A. Gielow)	4	4	4	w

Time—2:13½, 2:13¼, 2:13½, 2:14.

Third race—Free-for-All pace:

W. J. K. .....(W. J. Kenney)	1	1
Bradmont .....(Ritchie Roberts)	3	2
King Pointer .....(H. Campodonico)	2	3

Time—2:14½, 2:13¼.

Yoncalla .....(A. Giovannetti)	1	1
Senator H. .....(J. M. Kidd)	2	2
Rosa O. .....(J. J. Ryan)	3	3

Time—2:16¼, 2:15½.

The club will hold matinee racing at Golden Gate Park tomorrow and the races start at 1:30 sharp. The initial race will be a mixed affair for 2:20 trotters and pacers. The entries are Matawan, Dibble Wilkes and Minequa. The second race, a 2:15 mixed, will see Pointer Belle, Little Jack, Emma M. and Yoncalla entered. The third event is a free-for-all pace with W. J. K., Bold Harry Aerolite, King Pointer and Bradmont named. There will be much interest in seeing how Bold Harry races since his whirl on the circuit. The last race will be for 2:18 pacers, with Rosa O., Lew W., Senator H. and Frank N. entered.

Col. Ben Rhoades, the live stock auctioneer, announces the sale next Tuesday at auction of 19 head of fine saddle horses, by the thoroughbred Rey el Santa Anita, the Kentucky Saddle Stallion Don Castano, and the Arabian Ibn Mahruss, also five unbroken two-year-olds of the Arabian-Thoroughbred cross, and a number of good heavy work horses and mules to be offered as well as some choice draft colts. The horses are the property of Anita M. Baldwin, and the sale will be at Santa Anita Rancho, Los Angeles. This is the first of the sales that will be made at the breeding farm annually.

◈ ◈ ◈

In reply to an inquiry we will state that the two-year-old colt by Gen. Watts whose portrait adorned the front page of the Breeder and Sportsman last week is out of a young mare by Bon Voyage 2:08, second dam Perza by Allie Wilkes, third dam Anglia (full sister to Patchen Wilkes) by Geo. Wilkes, fourth dam by Mambrino Patchen, fifth dam also by Mambrino Patchen, sixth dam by Mambrino Chief, seventh dam by Brown's Bellfounder, and eighth dam by the thoroughbred Grey Eagle. The second, third and fourth dams are all in the Great Brood Mare table.

◈ ◈ ◈

"Coming events cast their shadows before." The promoters of wild west shows and buckero contests should take warning by the report sent out by the motion picture theatres that "wild west" reels are fast getting to be dead stock. The people have had enough of the "western stuff" and it is not profitable any longer.

CALIFORNIA SADDLE HORSES.

A Missouri Expert Highly Pleased with Their Showing at Our State Fair.

Mr. R. P. Royce, who came to the California State Fair from Missouri and witnessed the contests in the gaited saddle classes, has written the following account of what he saw there for the Missouri Stockman of October 14th, from which we quote as follows:

A visitor at the California State Fair held at Sacramento, September 2nd to 9th, would not have found it difficult to imagine that he was attending the State Fair of either Kentucky or Missouri. All the essentials of the best shows in the above states—well filled classes of splendid saddle horses, enthusiastic crowds, critical "rail birds" and one of the best-known judges of the country, Professor E. A. Trowbridge, tying the ribbons, were on hand.

California is rapidly becoming one of the important saddle horse states, and if the young stuff shown is a fair criterion, Kentucky and Missouri will have to look to their laurels in the very near future. The development of the saddle horse industry in this state has been very marked in the last few years, and is due largely to the efforts of a few real lovers of the American Saddle Horse, who have been sufficiently interested to go back to Missouri and Kentucky and buy the best that they could find. Notably among these few might be mentioned Mrs. McCormick, formerly Miss Adelaide S. Gillis, of Los Angeles, R. L. English of Chino, Judge E. A. Bridgford of San Francisco, Dr. W. J. Smyth of Oakland, Dr. Lee C. Deming of Anaheim, Mrs. Martha Freeman of Los Angeles, and Mrs. A. W. Pike of Redwood City. These enthusiasts are in the game because they like it, all are practical horsemen and horsewomen who are more ambitious to breed their winners than are some of the exhibitors further East. Another notable fact is the splendid sportsmanship manifested among the various exhibitors.

To one fresh from the East, the breeding classes were real surprises—both in point of number and quality of entries. Few classes had less than four or five entries, and in some classes as many as eleven were entered. The writer was particularly impressed with the show of young stuff. The class for yearling fillies brought together nine very high-class entries. First place was given to Gloria McDonald, a daughter of Grand McDonald and out of the great mare, The Matron. It will be remembered that this mare was purchased by Mr. English in E. D. Moore's 1915 sale. This young lady is a very fine and attractive filly with an excellent way of going and with reasonable luck should make a show mare of real class. Mr. English had another entry in this class that would easily have been tied above the winner had it not been for the fact that she was quite lame from a shipping accident. This filly is by Highland Monarch, by Indian Rixie, and out of the good mare Lizzie Cromwell. Just here it might be well to state that Highland Monarch owned by Mrs. McCormick is a sire of real merit, as demonstrated by four of his daughters in this class.

Mrs. McCormick uncovered a sensation in her three-year-old chestnut stallion, San Vicente, a Rex Peavine colt out of the great old Chester Dare mare, Undine. San Vicente is a real show horse any way you take him. Indeed, I doubt very much if there is a three-year-old stallion in either Kentucky or Missouri that could take this good colt's measure.

One of the most consistent winners of the week was the English mare Helen Idlewood. Missouri horsemen will remember this Rex McDonald mare when she was brought out by O. J. Mooers, who later sold her to the Minnesota Agricultural College. That institution traded her to E. D. Moore, who in turn sold her to Mr. English. She is still the same beautiful mare, but is much more settled and in the hands of trainer Jefferson, makes a most creditable show. Mr. English showed two other excellent mares that would look well in most any show—Tarna Denmark by Lord Denmark, and Angelus Butterfly by Sterling Chief.

Among the aged stallions were several well known horses, notably Highland Monarch and Don Castano by Golden King, both from the McCormick stable; Comedian by Rex McDonald out of Helen Middleton, and King of The Highlands, formerly at the head of Eaton string; also Jurist, by Bourbon's Best. Jurist is a very clever little horse, but a trifle small to make a real show horse. Judge Bridgeford showed his three-year-old Grand McDonald colt, LeGrand McDonald. This colt gives much promise and will no doubt develop into one of the really good horses on the Pacific Coast. Mrs. Martha Freeman showed a two-year-old colt by Highland Monarch and out of Undine that bids fair to make a show horse, and the English stable had out a good two-year-old colt by Dr. Hockaday.

There seems to be a dearth of geldings of horse show calibre on the coast. State Fair visitors were disappointed that Jack Barrymore was not entered at Sacramento. Confidence, by Rex Chief A, and out of a mare by Charles Reade, was the class of the gelding division. This gelding is a wonderfully fine horse, with an exceptional flashy way of going and as soon as he is more settled at his gaits, especially at the walk, he will be a "bad medicine" in most any show.

Each night of the fair was given over to a horse show. Most of the classes were for saddle horses or combination horses. Harness horses of class were notably lacking and it is to be hoped that California will take a livelier interest in this end of the show game. Several San Francisco riding schools were on hand with polo ponies and jumpers, and nearly every class for them was well filled.

Professor E. A. Trowbridge of the University of Missouri judged both the breeding classes and the night horse shows, and much comment was made upon his ability as a judge.

It is understood that efforts are under way to secure a Coliseum for the State Fair. At present, the night horse shows are held under a large tent.

A sensational saddle mare that has been entered in the National Horse Show at New York in November is called Pretty Baby and is owned by Hugh Willoughby. She is five years old, a chestnut just under 15.2, and is by Grand McDonald, sire of the three-year-old LeGrand McDonald, that the Bridgford Company, of Knightsen, California, won the junior championship with at the P. P. I. E. in 1915, and that was second to Mrs. Adelaide Gillis McMormick's grand three-year-old San Vicente in the Pacific Coast Five Gaited Horse Futurity at the California State Fair this year. Pretty Baby was brought out in the novice class at Louisville a few weeks ago and won everything she tried for, winding up with the championship of the show.

◈ ◈ ◈

C. K. G. Billings has engaged twelve stalls at Durland's Riding Academy for Uhlan 1:58 and the other saddle horses he will ride in the park this season. To accommodate the champion trotter Mr. Durland has thrown two box stalls together, giving the black gelding more room than is in the parlor of most family aparments in New York.

THE NATIONAL TROTTING ASSOCIATION.

Office of the Secretary,
Hartford, Conn., Oct. 12, 1916.

NOTICE.

A regular meeting of the Board of Review will be held at the Murray Hill Hotel, New York, N. Y., at 10 o'clock a. m. on Tuesday, December 5th, 1916, in accordance with the By-Laws.

W. H. GOCHER, Sec'y.

N. B.—The President authorizes the announcement, according to precedent, that a special meeting of the Board will be held in the early spring of 1917, to accommodate those whose convenience or necessities will be served thereby.

All communications intended for the consideration of the Board at the December meeting must be forwarded to the Secretary not later than November 21, and all parties who desire that their cases should be acted on at the Spring meeting should immediately notify the Secretary to that effect.

The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

BAKERSFIELD PROGRAM.

The Kern County Fair will open next week. There is an excellent half mile track at Bakersfield over which racing will begin on Wednesday, the 25th and continue for three days. There will be two harness races each day, entries for which have already closed, and two running races, entries to close over night. The program of harness races is as follows:

Wednesday, October 25th.

2:20 Pace, $400.—J. C. L., Directess Mac, Mono Ansel, Jim Donnelly, Irene D., Silver Tips, Julia M., Breezy Marie, Caroline Custer, Harry Mac, Lock Logan.

2:15 Trot, $400.—Columbia T., Trigione, Miss San Francisco, Dr. S., Dick W., Harold C., Hanford Mac, Sweet Bow, Bon Cres, Bert Kelly.

Thursday, October 26th.

Free-for-All Pace, $400.—Pointer's Daughter, Teddy Bear, Leata J., A. B. C., Vera Hal, Walter C., Jim Logan.

2:12 Trot, $400.—Columbia T., Eloise Dell, Dr. S., Hanford Mac, Sweet Bow.

Friday, October 27th.

2:13 Pace, $400.—Lottie Express, Ben Corbitt, Jr., Nifty, Soumise, Patti C., A. B. C., Verna McKinney, Breezy Marie, Caroline Custer, Walter C., Lock Logan.

2:30 Trot, $400.—Eloise Dell, Golden State, Trigione, Miss San Francisco, El Angelo, Dr. S., Neal Hall, Ira Mac, Jake Logan.

The owners of the champion trotting stallion Lee Axworthy 1:58¼ are H. K. Devereux, Frank Ellis, Boburn Haskell and P. W. Harvey, who constitute the Pastime Stable, under which name Lee Axworthy has raced against time so successfully this year. The stallion will make the season of 1917 at the famous Castleton Stud, near Lexington, now owned by David M. Look, of New York. Mr. Look will be remembered as the man who paid $225,000 to the late James R. Keene for the Castleton farm, a few years ago, and then stocked it with trotters by purchasing William Bradley's entire stud, which included the sire and dam of Uhlan 1:58 and many other noted animals. Bingen 2:06¼ died shortly after he was purchased by Mr. Look, and the new king of stallions will now take his place. By a singular coincidence he was bred by Mr. Bradley, from whom Bingen had been purchased. No stallion that has held the world's record ever went to the stud with better prospects of success as a sire.

LAST FOUR DAYS AT LEXINGTON.

Monday, Oct. 9.

2:14 trot, three in five, purse $1000:
Trusada, b m by Moko.....(Cox) 2 1 2 1 1
Winnie Lockard, b m.....(Taylor) 5 2 1 2 2
Onward Allerton, b g.....(Fleming) 1 3 3 5 3
Alice L. Woodford, Belgian, Vanko, Gum Drop, Aegan Girl, also started.
Time—2:09¾, 2:09¼, 2:13¼, 2:12¼, 2:14½.

Champion futurity, four-year-old trot, $5000:
Mary Putney, b m by San Francisco (Cox) 2 2 1 1 1
Allie Watts, ch m.....(Edman) 1 1 2 2 2
Humfast, b m.....(Murphy) 4 3 4 3 3
Binland, Bacilli, Daisy Todd, De Roche, also started.
Time—2:07¼, 2:07½, 2:07½, 2:10¼, 2:10¾.

The Castleton cup, 2:07 trot, two in three, $3000:
Mabel Trask, ch m by Peter the Great.....(Cox) 1 1
*St. Frisco, ch m.....(Geers) 3 2
*Dona Clay, b m.....(Valentine) 2 3
Virginia Barnette, b m.....(Durfee) 4 4
*Divided second and third money.
Time—2:07½, 2:03¼.

To beat 2:05¾ trotting: Zomrect, blk h by Zombro (McDonald), won. Time—2:03¼.

To beat 2:13¼ trotting: Miss Bertha Dillon, ch f by Dillon Axworthy (Serill), won. Time—2:10.

Tuesday, Oct. 10.

2:07 pace, 3 in 5, purse $1000 (three heats Monday):
Beth Clark, blk m by Joe Patchen.....(Hedrick) 2 4 1 1 2 1
Camelia, br m.....(Cox) 9 1 3 2 1 2
Colleen, br m.....(Thomas) 1 2 4 4 3 ro
Altawood, Solomon Boy, Birdonna, Canute, Strathtell, Comswogue also started.
Time—2:05¼, 2:04½, 2:08¾, 2:07½, 2:06¼, 2:08¼.

The Ashland, 3 heats, 2:14¼ pace for non-winners of $2000, value $1000:
Early Don, ch g by Cole.....(Valentine) 1 1 1
Brisac, br m.....(Murphy) 2 2 4
Lu Princeton, b h.....(Cox) 4 4 2
Brescia, b m.....(Rodney) 3 3 3
Time—2:06¼, 2:07¼, 2:06¾.

2:08 trot, three in five, $1000:
Peter Billiken, ch h by Peter the Great....(Thomas) 8 1 1 7 3
Pittsburgh, ch g.....(Murphy) 3 2 10 1 4
Sister Strong, b m.....(Valentine) 7 10 2 2 1
Miss Pertection, Harry J. S., Bonington, Esperanza, Ben Gregor, Miss Pinkerton, R. C. H., Nathan Axworthy, also started. (Finished under rule at end of fifth heat.)
Time—2:07¼, 2:07½, 2:06½, 2:06¾, 2:09½.

2:15 pace, three in five, $1000 (unfinished):
Queen Hal, ro h by Gold Hal.....(McPherson) 1 1 2
Badon Wood, br h.....(Fleming) 5 2 1
Spring Maid, ch m.....(White) 2 3 3
Rayo de Oro, Major A., Colonel Hedgewood, The Aul, All McKinney, also started.
Time—2:06½, 2:08¾, 2:06½.

Wednesday, Oct. 11.

First race, 2:15 pace, three in five, purse $1000 (three heats Tuesday):
Queen Hal, ro m by Gold Hal..(MacPherson) 1 1 2 1
Baron Wood, br h.....(Fleming) 5 2 1 2
Spring Maid, ch m.....(White) 2 3 3 5
Rayo de Oro, Major A., Colonel Hedgewood, The Aul and All McKinney also started.
Time—2:06½, 2:08¾, 2:06½, 2:07¼.

Second race, The Cumberland, 2:05 pace, three in five, value $2000:
Miss Harris M., b m by Peter the Great.....(McDonald) 1 1 1
White Sox, b m.....(Durfee) 2 2 3
Goldie C., b m.....(Valentine) 7 4 2
Sayde Densmore, Fred Russell, The Savoy and Auto Zombro also started.
Time—2:03¼, 2:03¼, 2:03¼.

Third race, free-for-all pace, two in three, purse $2000:
Single G., b h by Anderson Wilkes.....(Geers) 4 4 1 1
Ben Earl, b g.....(Childs) 1 2 2 2
Hal Boy, b h.....(McMahon) 3 1 6 3
Braden Direct, Russell Boy, Roan Hal, Anna Bradford also started.
Time—2:01½, 2:01½, 2:03¼, 2:02½.

Fourth race, Pacing Futurity, three-year-olds, two in three, $2,000:
Sis Bingen, blk f by Bingen.....(Murphy) 1 1
The Aim, br c.....(McMahon) 2 2
Edward P., b c.....(McDonald) 3 3
Time—2:07¾, 2:06½.

Fifth race, 2:05 trot, two in three, purse $1200:
Rose B., b h by Petronius.....(Wright) 1 1
Azora Axworthy, b m.....(Murphy) 2 2
Joan, b m.....(McDevitt) 3 3
Zombro Clay, Esperanza, also started.
Time—2:05¼, 2:05¼.

Sixth race, two-year-old trot, two in three, purse $1000:
Worthy Volo, ch h by Axworthy.....(McDonald) 1 2 1
Harvest Gale, br f.....(Cox) 2 1 2
Bertha McGuire, b f.....(Ackerman) 3 3 3
Mary Magowan, Buck Watts and Eoddy S. also started.
Time—2:11½, 2:07¾, 2:10½.

To beat 2:10½ trotting: Alma Forbes, br m by J. Malcolm Forbes (Ackerman), won. Time—2:07¼.

To beat 2:08¾ trotting: Hobnob (4), b g by Siliko (Railey Macey), won. Time—2:08¼.

To beat 2:10¼ pacing: Ashlock, b g by Ashland (Crossman), won. Time—2:07¾.

Thursday, Oct. 12.

First race, 2:20 trot, 3 in 5, purse $1000:
Locust Bug, b g by Sidney Prince....(Valentine) 1 1 1
Zoe Dillon, gr m.....(McDonald) 2 2 2
Marie Constant, b m.....(Green) 3 3 3
Alvy Coffman, Bernice Moore, Alto Chimes, Roy, Peter Patchen, also started.
Time—2:08¾, 2:11½, 2:09¾.

Second race, 2:10 pace, 3 in 5, purse $1000:
Little Frank D., b g by Little Frank (Valentine) 1 1 1
Hal Leaf, b h.....(Whitehead) 3 2 2
Lady Venus, br m.....(Stout) 2 4 5
*Majora, *The Deputy Sheriff and Dick Sentinel also started. *Divided fourth money.
Time—2:08¾, 2:06½, 2:04¾.

Third race, 2:12 trot, 2 in 3, purse $1000:
Binville, blk h by Binjolla.....(Tipling) 1 1
The Proof, b h.....(Spencer) 2 2
Henry Todd, b g.....(Rodney) 5 3
*Yanko, *Virginia Barnette, American Girl also started.
*Divided fourth money.
Time—2:10¾, 2:09¾.

To beat 2:15 trotting: Tacita (2), ch f by Atlantic Express (Dickerson), won: 2:07¾.

To beat 2:10 trotting: Barbara King (4), ch m by King Bellini (Dickerson), won: 2:07¼.

To beat 2:13¼ trotting: Suldine (3), b c by Worthy McKinney (Traynor), won: 2:08¼.

To beat 2:07 pacing: Ashlook, ch g by Ashland A. (Crossman), won: 2:05¾.

To beat 2:15 pacing: The Aul, gr h by The Eel (Morris), won: 2:08.

To beat 2:10½ trotting: John Garver (3), ch h by Guy Axworthy (Roberts), won: 2:07¾.

The fastest three full brothers on record are Canute 2:05, Auto 2:04½, pacers, and the trotter Octoo 2:07½. They are by Great Heart 2:12¼, dam Demarius by Royal Fearnaught.

Thoroughbred Matters

Important New York Betting Decision.

During the past two years racing has had a revival in New York owing to the fact that oral betting has been permitted at all the tracks, and it is said that as many as 100 layers of odds have operated on the stake days at the tracks close to New York City. It has been claimed that so long as no printed odds were publicly displayed or no record kept of the bets by the layer of odds, that the Hughes law was not violated, but on the 11th of this month an important decision was handed down by the Appellate division of the Supreme Court of New York which puts a different light on this view. The decision written by Justice Edward B. Thomas holds that a man does not have to write down bets to be guilty of bookmaking. He may be held guilty, although the wagers are made orally. The opinion while general in effect was written in the specific case of Morris Solomon and Julius Cahn, who were convicted for soliciting a bet from detective Horn at the Aqueduct track last July. These men were notified that they will have to serve terms in the workhouse. When Solomon was sentenced to fifteen days and Cahn to thirty, both men appealed. The court said:

"It is not necessary that the bookmaking should be in writing. In this case, the accused announced odds to persons drawn to him and he conducted his operations as openly as he deemed safe. No one who applied to him to bet was rejected, not even the detective."

It was urged in behalf of the defendant that the statute was passed against professional gamblers, and the accused operated for too short a time to be placed in that category. "That would mean," says the Court, "that one person could with impunity have his day of doing what would be a crime if done for a time longer. It is not the duration of the alleged act, but what contrivance is used and its relation to the public that is determining."

George Strate arrived at Pleasanton on Monday last with the following horses which have come direct from England, and are owned by Geo. Wingfield of Nevada and J. H. Rossiter of San Francisco:

Brown colt, yearling, by Mauvezin, out of Berenice.

Agnes Velasquez, bay mare, 14, by Velasquez, out of Agnes Galliard. This mare is the dam of Volta, by Valens, and she is now in foal to the same popular sire.

Berrill's Choice, b f, 3, by Berrill, out of Sunny South.

Berrill's Image, b f, 3, by Berrill, out of Proud Beauty.

Santa Malta, broodmare, by Sanctuary, out of a daughter of Knight of Malta. This mare is accompanied by a weanling foal.

Black colt, yearling, by Mauvezin, out of Berenice.

Yearling colt by Grey Leg, out of Bernina.

Weanling filly by Squire Jack, out of Santa Malta.

◈ ◈ ◈

Thoroughbred foals of 1916 must be registered with The Jockey Club, 18 East 14th Street, New York, by November 1st. The registration fee is $2 for each animal which will include certificate. A name must be claimed through the Registry Office of The Jockey Club on or before March 1st for foals of 1915. No horse will be allowed to race on tracks racing under rules of The Jockey Club unless duly registered and named.

◈ ◈ ◈

The City Council of Covington, Kentucky, in the limits of which town the Latonia track is situated, has passed an ordinance which puts a tax of $100 on each race run at Latonia, the same to be paid into the Covington treasury each day. The club will contest the ordinance in the courts.

◈ ◈ ◈

Both Louisville tracks have lost money this season, and the ruling of the Kentucky Racing Commission that the Louisville associations give no purse less than $800 is said to be the reason. Secretary Hachmeister says that the proposed tax of 2½ per cent on the money passing through the mutuals will result in purses being reduced to $300 if it is made a law.

◈ ◈ ◈

Boots, winner of the Baltimore Handicap, an account of which was given in last week's Breeder and Sportsman, was bred by the late J. B. Haggin, taken to England as a yearling and sold. He is by Hessian, a son of Watercress, and his dam is Little Flower by Star Ruby. Mr. Haggin bred both sire and dam of Boots.

◈ ◈ ◈

Mr. A. K. Macomber has purchased the five-year-old gelding Boots, paying $15,000 for him. Boots ran for his new owner the first time at Laurel, Maryland, on Saturday last in the Washington Handicap, one mile and a furlong, for three-year-olds and upwards. He won easily by a length and a half from Spur who was second, Reeves third, Shortgrass fourth and Borrow fifth. The time was 1:51 1-5. The race was worth $2100 to the winner .

Thoroughbred Saddle Horse a Feature.

New York, Oct. 17.—New directors of the National Horse Show Association have this year recognized the utility of the thoroughbred horse and in consequence there will be more opportunity at the coming show for horses registered by the Jockey Club than ever have been presented before at a show in Madison Square Garden. In the program for the association's thirty-first annual exhibition from November 11 to 17 there are classes exclusively for thoroughbred saddle horses, thoroughbred hunters, thoroughbred polo ponies and thoroughbred sires suitable for getting cavalry horses.

Mr. J. R. Muurling has this year given a notable special prize for thoroughbred hunters to be ridden by women over the fences four feet high. This class marks a new departure at the National Horse Show, as it is the first ever given for thoroughbred horses to be ridden by women over the jumps in the Garden.

F. Ambrose Clark has donated $350, including a cup valued at $150, for thoroughbred mares or geldings suitable to become hunters. The nominations must be under 3 and not exceeding 7 years of age and not under 15.3 hands, to be judged on their conformation, quality, substance, manners and way of going at a walk, trot and gallop.

Besides these special prizes the National Horse Show Association gives $350 in cash for the best thoroughbred hunter registered in the Jockey Club stud book. In another class the association gives $175 for saddle horses that are registered thoroughbreds, their pedigrees to be given in entering them. Prizes of $200, $100 and $50 are given for the best thoroughbred stallions suitable for improving the breed of horses for general use and army purposes. Then there is the Jockey Club plate, a special prize offered by the turf governing body for the best horse suitable for United States cavalry mounts.

John E. Madden, the largest breeder of thoroughbred race horses in the United States if not in the world, has accepted an invitation to judge the thoroughbred stallions at this year's show. The saddle horses will be judged by Lady Beck of London, Ont., and James G. Marshall of New York, while H. V. Colt of Geneseo, N. Y., Henry L. Bell of Bayside, N. Y., and Richard Wallach of Warrenton, Va., will judge the thoroughbred hunters.

Mrs. Keene Dies in New York.

New York, Oct. 10.—Mrs. Sara Daingerfield Keene, widow of the late James R. Keene, financier and turfman, died at her home, Cedarhurst, L. I., at 6:30 o'clock last night after a lingering illness.

Mrs. Keene was born at Rich Hill, near Winchester, Frederick county, Va. She was the daughter of Leroy Parker Daingerfield and Julia Parker, his wife. The grant of land to Rich Hill was issued in 1660, and she was the direct descendant of Col. William Daingerfield of Greenfield, Essex county, Va.

Mrs. Keene was named for her Aunt Sara Jay Bogardus, wife of Commodore Foxhall Parker. She married James Robert Keene in California on November 3, 1863, at the residence of her brother, Judge William Parker Daingerfield, in San Francisco, Cal.

The family moved to New York in 1876 and resided on Twenty-sixth street for a number of years, afterward moving to Newport, R. I., and then to their present home, Cedarhurst, Long Island.

Mrs. Keene is survived by two children, Foxhall Parker Keene and Jessica Keene Frost.

She was a sister of the late Major Foxhall A. Daingerfield, who attained a wonderful measure of success up to the time of his death as manager of the Castleton Stud in Kentucky for Mr. Keene.

The Manly Memorial Steeplechase, the stellar cross-country event of the Maryland Jockey Club's approaching Autumn meeting, and one of the most important jumping races ever given in this country, will take place at Pimlico on Election Day, Tuesday, November 7. Named in honor of the late William M. Manly, a sterling sportsman and for many years president of Maryland's historic racing organization, the conditions have been so framed that all the best timber-toppers in training have been entered to the extraordinary number of seventy. The steeplechase is a handicap for four-year-olds and upward, by subscription of $10 each, with $5,000 added, of which $1,000 to the second, $500 to the third and $250 to the fourth. Those not declared by Sept. 15, 1916, liable for $25 additional. Starters to pay $50. Entries closed Saturday, June 3, 1916. Weights announced by 5 p. m. Thursday, November 2, 1916. Two miles and a half.

◈ ◈ ◈

Westy Hogan, John Whitlow's two-year-old son of Dick Finnell—Carrie Jones, last Saturday demonstrated that he is the best juvenile in the West, when at Latonia he won the Fort Thomas Stakes, at six furlongs, and negotiated the distance in 1:12 3-5. He carried 114 pounds, and beat Sunbonnet, A. K. Macomber's filly, by three lengths. Mary Belle finished third, a length behind the placed horse. There were nine starters and the race was worth $2825 to the winner.

◈ ◈ ◈

An auction sale of horses in training was held at Latonia last Saturday with the following results: Signorette, Frazier & Farris, $525; MacMonde, Kay Spence, $175; Ague, A. Woodman, $260; San Vega, J. Troxler, $360; Lee Hall, M. Moore, $225; Useful, M. Moore, $225; Honey Shuck, W. Fuechter, $700; Polly H., O. A. Bianchi, $325; Elizabeth Thompson, W. Covington, $400.

Praise for Thoroughbred.

In discussing the superior qualities of thoroughbreds as hunters and jumpers at the recent races at Piping Rock, Thomas Hitchcock, a member of that club and an amateur horseman who has developed more high-class steeplechasers and hunters than probably any other man in the country, had this to say on the subject to a reporter of The New York Times:

"There is no horse in the world that is comparable to the thoroughbred as a hunter, or, as a matter of fact, for almost any purpose. You will find men decrying him as being too 'hot' to give satisfaction when put to any other task than racing. There never was a greater mistake. Persons who talk in that fashion have never had anything to do with the higher type of thoroughbred, and their experience has come from contact with culls which have been discarded because of their shortcomings.

"As a matter of fact," continued Mr. Hitchcock, "the thoroughbred is not as hot as the half-bred, if the same animals are subject to equal tests. Put a half-bred horse in training and ask as much of him as you do of the thoroughbred, and the result will be surprising. The half-bred would not stand the acid test of racing and come through with a perfect disposition. The thoroughbred has been bred for 150 years, and the culls during that time have been eliminated.

"I have had twenty-five years' experience with thoroughbreds, and during that period I have experimented with them widely. My twelve-year-old son has ridden them in the hunting field on Long Island, and another of my children, only 6 years of age, has ridden them in the show ring. They are more easily broken to harness than any other horse in the world, and, illustrating this, let me tell you something I saw S. T. Harbison do at Lexington, when the thoroughbred market was at its lowest ebb some years ago. He bought a lot of young stallions, mares, and geldings, from 1 to 3 years of age, and turned them all into a big paddock. They agreed famously, and it was not three weeks till those that were old enough were broken to harness and being sold all over the country.

"The half-bred horse is fine, too," continued Mr. Hitchcock, "and we have to bring in the grade in order to secure an average of size, just as in Ireland they went to the cart horse to secure a larger hunter type, but the thoroughbred, when you get him large enough, meets all these requirements.

"Jolly Dixon, by Sir Dixon, out of Merry Maiden, winner of the heavyweight championship at the recent Piping Rock horse show, is 16.2 hands and weighs 1,460 pounds. He has stood up under ten years of hard service. Cavalier, by Stalwart, out of a Potomac dam, weighs 1,260, while another good thoroughbred hunter in my string is Coniston, by Yankee-La Sorella, that tips the scale at 1,300 pounds. Surely these are big enough for any purpose.

"The breeding bureau of The Jockey Club is doing splendid service in standing thoroughbred sires in various parts of the State. It is really doing the work of the Federal Government, or what foreign countries are doing, in order that they may have a sufficient number of horses of the cavalry remount type . The greatest menace to horse-breeding in the United States is the growing scarcity of the light mares which mate so well with the thoroughbred sire. During a recent visit to Wyoming I found breeders raising the heavy draft type. There was a market for the smooth young mares unbroken at two and three years of age at good prices, and they bred them in preference to anything else.

"The trotting mare is an ideal mate for the thoroughbred sire. Her qualities have been developed by racing also, and those communities which have any number of dams of this type should conserve them. It is only a question of time until the authorities at Washington realize that we need these mares. France, Germany, and Russia have them, and trotting contests are a feature of race meetings everywhere on the Continent.

"Thoroughbred blood has played its part everywhere in the horse world, and it has benefitted all other strains. Whence does the trotter derive his sterling qualities? Is it from Messenger or Bellfounder? Why, the former, of course, and therefore I maintain that racing should be encouraged all over the country. The more racing we have the more of this coveted blood we are going to have infused into other families, and in the end we should produce horses second to none in the world."

J. C. Dinue returned last Saturday from Spokane, Wash., and Billings, Montana, where he was superintendent of the track and speed departments at the big fairs held at those cities this year. "Jack" says the Inter-State Fair at Spokane was greater than ever, and had a larger attendance than ever before. The Midland Empire Fair at Billings is a new institution and spent about $75,000 on buildings, barns, etc., before the fair opened and will spend nearly as much more next year. There were over 40,000 persons passed through the gates at Billings during the four days of the fair, and at Spokane they had about that many in one day.

◈ ◈ ◈

Dr. R. W. McCully has purchased the unbeaten Last Coin, a four-year-old son of Ultimus and Half Crown, from James Butler, of New York, for a reported price of $10,000. He will be shipped to Kentucky, where he will take his place in the Wickliffe Stud of Corrigan & McKinney.

Harness Horses and Horsemen

PETER McKLYO TO START NEXT SATURDAY.

Son of Peter the Great Will Attempt to Beat 2:06 at Stockton.

[Special to the Breeder and Sportsman.]

Stockton, Oct. 19.—Peter McKlyo 2:06, son of Peter the Great 2:07¼ and Klyo by Jay McGregor, owned by L. H. Todhunter of Sacramento and trained and driven by James Thompson, can now trot the race of his life. On Saturday last in a work-out he trotted the first quarter of the Stockton track in 30½ seconds, and the first half in 1:00½. Thompson then pulled him back and he jogged the mile out in 2:10½. Wednesday he made the half in 1:02 and the last quarter in 29 seconds.

If the weather holds good Thompson will start Peter McKlyo Saturday, October 28th, to beat his record of 2:06 made at Santa Rosa last August.

G. H. TINKHAM.

Pleasanton Driving Park Is Ready.

Geo. Ryan, the genial superintendent of Mr. R. J. MacKenzie's Pleasanton Driving Park, has everything in readiness for the trainers who will be heading for the horse centre as soon as the fall racing is over. This famous winter training track never looked better than it does now. Every stall is clean and ready for occupancy, and there is not a square foot of the 100 acres enclosed that does not look "spick and span." While nearly all the race horses are absent, the meetings at Bakersfield and Phoenix being yet to come, there are a number in training at Pleasanton and there is plenty to interest any lover of horses who spends a day there.

George Ryan is looking after the MacKenzie horses, which consist mostly of broodmares and their colts that are running in knee-deep alfalfa in the infield. There are fifteen or twenty mares with foals at foot, and Ryan is expecting quite an interesting time when he starts to wean the bunch of youngsters, which will be very shortly. Among them is a foal by Mahomet Watts out of Mildred Togo by Togo, and one by the same sire out of Zombro Belle that particularly struck the writer's fancy, while the foal by Joe Patchen 2nd out of Merry Widow by Red Pac is also one that a person will look twice at before turning away.

In the stalls Ryan has a yearling colt by Joe Patchen 2d 2:03¼ out of Zombro Belle that they are all talking about. He is a big growthy looking fellow, sort of loose-jointed and with a sensible head that does not seem to be worried at anything that goes on about the place. Ryan took him up from the pasture field on August 15th this year, and has him pretty well broken. Two weeks ago this yearling (Terry Patchen is his name) stepped a quarter handily in 38 seconds. No, he is not a pacer, but is a square going trotter and has not offered to make a break in harness since he learned to wear one, nor does he try to go any gait but the diagonal one. He looks like a good prospect in the two-year-old stakes for 1917.

Another yearling in the MacKenzie string is Carl Vernon by Vernon McKinney out of a mare by Carlokin. He has also been in the kindergarten school since the middle of August. Carl Vernon is a pacer and a quarter in 37½ seconds is what he was able to show several days ago. Another pacer is a yearling by Vernon McKinney out of a mare by Searchlight, second dam by Direct, that is only just broken, but is a nice looking fellow and considered a good prospect.

A two-year-old by Quintell out of a Nutwood Wilkes mare is also just getting accustomed to harness and has not been asked to do anything but obey the lines.

Mr. Ryan has a two-year-old of his own that he showed with pride. This is a colt by Frank Perry out of Miss Harris by Sidney Dillon. Miss Harris is the dam of Miss Bond (2) 2:17½. This colt is a pacer and has shown a half in 1:10 and a quarter in 34 seconds.

A four-year-old mare by Zombro 2:11, and one of the last of his get in California, has been running out, but is now up and will be worked. She has trotted quarters at a 2:20 gait and looks to be worth training. Her breeding is good as her dam was by Diablo and second dam by A. W. Richmond.

The stallions Vernon McKinney 2:01½, pacing, and Anvil 2:02¾ trotting, are both fat and healthy, and will doubtless make the season of 1917 at Pleasanton. Both had fair seasons last year and were bred to some fine mares.

Mr. A. W. Longley, of Oakland, has thirteen horses in training at Pleasanton, and with Hiram Rapelje to look after the management of affairs and Schuyler Walton to do the training, there is nothing lacking. When the writer looked in on them Saturday, Mr. Longley and Walton were looking over a big fat bay mare that looked as if she had been fed for the fat stock show. This mare is now eight years old, and is known to California horsemen as Dorothy Ansel. She was a wonderfully fast yearling and trotted a quarter in 31 seconds or "in that vicinity," and as a two-year-old won a $1000 stake at Woodland in 2:20 and 2:22½. As a three-year-old she did not do so well, and failed to win a race out of three starts. Since then she has been running out and when Schuyler gets the fat off her will see if she has any of the speed she had as a yearling and two-year-old. She is by Prince Ansel out of Lucy B. 2:17¼ by Alexander Button and is a fine looking mare. She belongs to Det Bigelow of Yolo.

Another trotter that Mr. Longley is giving a trial is a chestnut gelding with a silver mane and tail, owned by Henry Scott of San Jose. Harry McKinney is the name of this trotter and he is by Bon McKinney, dam by Scott McKinney 33749, second dam by Boswell Jr., third dam by Guy Wilkes. He shows some speed.

Pedlar Direct is looking well after his campaign this year and will be able to knock a few seconds from his record next year if raced.

Hiram led out a couple of fine two-year-olds for inspection. One is a bay filly by Demonio, dam by Geo. Washington, that showed a quarter in 35¼ seconds as a yearling. She is a well proportioned miss, with good feet and legs and a nice way of going. A quarter in 34 and an eighth in 16 seconds is all she has been asked to do as a two-year-old as she is not staked.

What the writer calls a very handsome gelding is a two-year-old by True Kinney, dam by Hawthorne, second dam by Director, that Mr. Longley purchased at the Woodland Stock Farm sale when a yearling. He is a trotter and was lame when brought to Pleasanton from the sale, but is all right now and has shown a quarter in 38 seconds very handily.

Millard Sanders reached Pleasanton Saturday with three horses that he said had just been brought out of the hills on Mr. Rudolph Spreckels' ranch at Sobra Vista, Sonoma county. One is a chestnut mare by Washington McKinney out of Annie Rooney 2:17 by Strathway, second dam Jewel by Oakland Boy. This mare is six years old and is said to have won a matinee race at Sonoma two or three years ago in 2:12½. She is a pacer. Another is a gelding, pacer, three years old by Guy Dillon out of Annie Rooney, and the other is a bay mare trotter, by Washington McKinney out of the great mare Hulda 2:08¼ by Guy Wilkes. This mare is five years old, never trained but can show a 2:40 gait. All three are in the rough as they have been running out for the past year or two, but are in good condition and Millard will handle them for a few months before Mr. Spreckels decides what he will do with them.

C. E. Berry has ten head, nearly all youngsters, which he is handling for Mr. I. L. Borden, vice-president of the Pacific Coast Trotting Horse Breeders' Association. The horses raced this year all look well and are only getting jog work, but there are six coming two-year-olds that are getting first lessons in harness by being driven about with the lines before being hooked to anything. There are youngsters by Major's By Guy, Barney Barnato and Ed McKinney, of which more can be said after they learn to pull a cart and make the circle of the track. Several of these youngsters are well staked. All in Mr. Berry's string look well and there is no sickness among them.

The Kentucky Sale.

The annual auction sale of trotters and pacers held by the Kentucky Sales Company at Lexington closed on October 6th after four days of selling. Two hundred and eight head were sold for a total of $44,390, an average of $213 per head. The Peter the Greats sold for good prices. The top price, $2950, was paid by L. G. Winings, of Indianapolis, for the yearling brown colt by Peter the Great, out of Baron Lassie, by Baron Wilkes, a brother to Peter Billiken 2:07¼ and Lady Wanetka (2) 2:10. Two yearling pacers that could show fast, in the consignment from Hamburg Place, were bought by Mr. Winings for $1,1,00 and $700 respectively. Charles R. Thompson, of Lexington, paid $1,075 for the weanling filly by Peter the Great, out of Sorrento Hall, by Walnut Hall 2:08¼, and R. L. Nash paid $900 for a miss of the same age out of Lady Moko, second dam Lady Ham. William Simpson bought two Peter the Great weanlings for $600 each.

A yearling colt by Gen. Watts out of Rose Bingen by Bingen went to C. D. Renick of Indianapolis for $600, and another by the same sire and out of a mare by Tregantle brought $625. A weanling bay colt by Peter the Great, dam by Allerton, was sold for $925. Many highly bred youngsters that did not suit the fancy of the buyers sold for a song, and bargains were picked up at from $75 to $200. For instance, a yearling colt by Peter the Great out of Elsie Leyburn 2:27¾, dam of Jack Leyburn 2:04¼ and three others with standard records, brought but $185.

Mr. E. R. Dunn sold his three-year-old gelding The Puzzler by Cochato at this sale, Mr. Clift, a Kentuckian, paying $220 for him. The five-year-old mare Miss Felipe by San Felipe out of Miss Kinney by Kinney Lou is given in the sale summary as being purchased by Mr. Dunn for $300, but this was probably a retaining bid on his own mare.

The 19-year-old stallion The Tramp by Jay Bird out of the great brood mare Sorrento, dam of The Bondsman, Jay Hawker and many other great sires as well as seven standard trotters, sold for the insignificant sum of $140.

The fact that 208 head, many of them weanlings and yearlings, and quite a number old and of no particular use or value, can be sold for an average of $213 per head speaks pretty well for the Standard horse market.

Bon Guy 2:09¼ Goes to British Columbia.

Breeder and Sportsman: S. S. Bailey announced early in the week at Salem, Oregon, that he would sell the stallion Bon Guy after the 2:12 trot. Bon Guy won the race and took a record of 2:09¼. Mr. Bailey put the stallion up for sale as he had announced. Starter McNair called for bids and the son of Bon Voyage was sold to J. G. Von Herberg, a motion picture magnate from Seattle, for $300, a ridiculously low price for such a fast, game and extra fashionably bred trotting stallion as Bon Guy. Von Herberg took his new purchase along with a carload of Holstein cows to his prize dairy farm at Kent, Washington, and Bon Guy at once took the vocation of hauling prize milk to the Kent creamery, and like the good game horse he had always shown to be made good at his new job and did it like as if he could do any old thing on a dairy farm. When his milk hauling was over he was put in a nice bull pen beside a prize bull for company.

The writer has always been an admirer of Bon Guy and I am pleased to say that I have made a satisfactory sale of this good trotter for Mr. Von Herberg, and via tonight's steamer I am shipping Bon Guy to a new owner to whom I sold him. The new owner is a real trotting horse fan and a man who not only loves a good horse but trains and races them successfully. His name is Elwood Bourgoyne, 1629 Keefer street, Vancouver, British Columbia, and every good sportsman in that country should be proud of Ed Bourgoyne and the fact that he has brought to Canada one more highly bred, fast, game and extremely beautiful trotting stallion.

All of which goes to show that the harness horse business is not dead, nor is it going to die if I can help it to live. Yours truly,

C. A. HARRISON.

Seattle, Oct. 17, 1916.

The Champion Lee Axworthy 1:58¼.

By his superb exhibitions of speed, manners, gameness and what not that go to make an ideal champion, the little Cleveland speed marvel Lee Axworthy trotted his way to undying fame at Lexington, Ky., recently, when he lowered the record for trotting stallions to 1:58¼ and then pulled a matinee wagon in 2:02¾ in an effort to beat the world's best time for such an exhibition.

Lee Axworthy, therefore, is king of trotting stallions. Brought out by W. J. Andrews from a trotter his owners had despaired of, Lee earned a time record of 2:28; as a two-year-old at Detroit. Starting in his first race at North Randall the next year, Lee won in straight heats, taking a record of 2:08. He was opposed to Peter Volo that year, and while not quite able to beat the big horse then, proved the master of Volo the next season in a special match race at North Randall. Both trotters were four years old and Peter Volo won the first heat in 2:02, Lee Axworthy taking the next two in 2:03¼, 2:04¼.

Upon retirement of W. J. Andrews, Ben White took charge of Lee Axworthy and other members of the Pastime Stable.

In his first start this year Lee Axworthy trotted the North Randall track in 2:00¼ in an effort to lower the stallion record of 2:01, then held by The Harvester. Later in the week when weather conditions were poor he trotted in 2:00¼. At Syracuse he trotted in 2:00, all quarters being in thirty seconds. In his first trial at Lexington, Lee trotted in 1:59½. The same week he reduced that to 1:58¼, and then a few days later, driven by H. K. Devereux, one of the members of the Pastime Stable, owners of Lee Axworthy, the little horse lowered the stallion record for a mile to wagon of 2:05¼ held by Peter Mc, by trotting in 2:02¾.

Her Pa and Her Ma Were Californians.

Mary Putney that trotted to a record of 2:05½ as a three-year-old in 1915, and that tied the four-year-old record of Joan by trotting in 2:02¾ at Lexington, is considered by many of the horsemen who saw her in action as the fastest trotter now in training with the exception of Lee Axworthy 1:58¼. When Mary Putney trotted in 2:04¾ she trotted the last three-quarters of the mile in 1:30¼ and was wide on the track at all times. She trotted the second quarter of the mile in 30 seconds and the third in 29 seconds, at which point she was well up with the leaders in the race and only came the rest of the way fast enough to win. We can almost look upon Mary as a Californian as both her sire San Francisco and her dam Mendocita were bred in this State. Mendocita is the dam of three trotters and one pacer with standard records and as her name implies is by Mendocino, a son of Electioneer that had a lot of thoroughbred blood in his veins which he got through his dam. The dam of Mendocita was the famous thoroughbred mare Esther by Express that is the dam of four standard trotters, seven producing daughters and two producing sons. Mary Putney's blood lines are McKinney, Nutwood Wilkes, Electioneer and thoroughbred, and that is a combination hard to beat for trotting instinct and staying qualities.

Nineteen head of fine saddle horses, some sired by that peerless thoroughbred Rey el Santa Anita, some by the champion Kentucky Saddle Horse Don Castano, and some by Ibn Mahruss, the noted imported Arabian stallion, will be sold next Tuesday at the first annual auction of the Anoakia Breeding Farm, owned by Anita M. Baldwin at Santa Anita Rancho, Los Angeles. See advertisement.

Notes and News

Do you own any trotters or pacers?

◈ ◈ ◈

Do you desire to sell them for spot cash?

◈ ◈ ◈

The big Chicago Sale will be held December 18th to 21st.

◈ ◈ ◈

A California breeder and trainer has consigned fifty head and the Chicago Horse Sale Company wants fifty more from this State.

◈ ◈ ◈

The horses will be shipped on a special train that will leave San Francisco for Chicago by way of Pleasanton and Los Angeles, and single horses can be shipped at carload rates.

◈ ◈ ◈

Now is the opportunity to sell in the best market in the United States and at less expense than at any other sale. Read the big advertisement on page 12 and look out for still further particulars next week.

◈ ◈ ◈

Peter Look 2:03 is a three-year-old and not a two-year-old as has been stated.

◈ ◈ ◈

The Portland, Oregon, Horse Show will be held on Friday and Saturday next, October 27th and 28th.

◈ ◈ ◈

At the Coschockton, Ohio, meeting there were five races that went to six heats before a winner was declared.

◈ ◈ ◈

The weanling colt by Peter the Great 2:07¼, out of Lady Moko, by Moko, brought $950 at the Lexington sale.

◈ ◈ ◈

Hal B. Jr. 2:02½ buzzed around the double-O at York, Pa., last week in 2:06¾, 2:06 and 2:05½, breaking the track record three times.

◈ ◈ ◈

Colleen, daughter of Charley D. 2:06¼ and Cricket 2:10, reduced her record to 2:05¼ in a race at Lexington last week.

◈ ◈ ◈

Geo. Bain, the peerless auctioneer, says the name of the Pastime Stable, owners of Lee Axworthy 1:58¼ and Volga (3) 2:04½, should be changed to the Fastime Stable.

◈ ◈ ◈

Lee Axworthy 1:58¼ will be in the stud next season at Castleton Farm, David M. Look's Kentucky estate. It has also been announced that Etawah 2:03 will again stand for service at Castleton.

◈ ◈ ◈

Up to October 18th, twenty-four two year-olds by Star Shoot had won races this year in the United States, and nineteen two-year-olds by Ballot had been returned winners.

◈ ◈ ◈

Bakersfield's race meeting will open next Wednesday and then the horses will move to Phoenix, Arizona, where the last meeting of the year will begin Nov. 13th.

◈ ◈ ◈

A gentleman who owns two high class mares was inquiring this week as to what trotting bred stallions would be in service in California in 1917, and where they will stand.

◈ ◈ ◈

Emma Magowan (3) 2:07½ was timed a half mile in a minute in a race at Lexington in which she was given the word when on a break. She is by J. Malcolm Forbes.

◈ ◈ ◈

The Grand Circuit ended at Atlanta, Georgia, this week. We suppose "the turkeys gobbled and the sweet potatoes started from the ground" when the horsemen marched through on their way to the new racing plant.

◈ ◈ ◈

Fifty Herefords sold in Kansas City, Mo., Oct. 6, during the American Royal Live Stock Show, made an average of $854. It was one of the most enthusiastic auctions of the year. The cattle were a uniformly high class collection, representing leading herds.

◈ ◈ ◈

Hobnob, that took a four-year-old trotting record of 2:08¾, is a richly bred one. He is by Siliko (3) 2:11¼ (son of Moko and Silicon 2:13½ by Wilton) and his dam is Nancy McKerron (3) 2:10½, by John A. McKerron 2:04¾, second dam the famous Nancy Hanks 2:04. Hobnob is one of Siliko's first crop of colts and is his first 2:10 performer.

◈ ◈ ◈

October 10th, at North Easton, Mass., the Langwater Farm's Guernsey sale made an average of $1080, for 74 head. The event made new Guernsey history, the public sale price for Guernsey cows being twice broken. C. L. A. Whitney, Albany, N. Y., paid $6,150 for Langwater Dairymaid; John A. Ames bought Langwater Generous at $5,000. The top price for a bull was $3000, paid for Langwater Foremost. The cattle went to 12 States.

Peter Volo 2:02 and Volga 2:04¼ are now the world's fastest trotting full brother and sister, displacing Donna Clay 2:06¼ and Early Don 2:06¼, records made also this season.

◈ ◈ ◈

The Chicago Horse Review announces that after November 1st, its subscription price, owing to the high cost of paper, will be increased from $2.50 to $4.00 per annum.

◈ ◈ ◈

Pacific Breeders Futurity No. 17 will close for the nomination of mares bred in 1916, on Monday, the 4th of December next. The colts and fillies will trot or pace as three-year-olds in 1920.

◈ ◈ ◈

Volga (3) 2:04½, now the champion three-year-old trotting filly, is the seventh 2:05 trotter to the credit of Peter the Great 2:07¼. And she is also the fifth three-year-old by the same sire to win the Kentucky FRuturity.

◈ ◈ ◈

Daisy Todd 2:09½, a winner at Lexington, is certainly an inbred Todd, both her sire (George Todd 2:07¾) and maternal grandsire (Cochato (3) 2:11½) being sons of the famous son of Bingen 2:06¼. Her grandam produced Bob Douglas 2:04½.

◈ ◈ ◈

The record of Harrod's Creek (3) 2:06¾, the fastest of the get of General Watts (3) 2:06¾, is not only the same as his sire, but the records of each were taken at the same age and in the same event—The Kentucky.

◈ ◈ ◈

Sacramento 2:09½, a new 2:10 trotter for San Francisco 2:07¾, is an own brother to the pacer Robert Frisco 2:05¾, their dam being Alice Edgar 2:12¼, who has only produced three foals, the third being Sweet Alice 2:13¼, by Walnut Hall 2:08¼.

◈ ◈ ◈

Vera Hal's two heats, each in 2:10¼ over the Riverside half mile track last week, when she beat Teddy Bear and Pointer's Daughter, show that Harold Cohen's mare is in fine fettle after the season's campaign.

◈ ◈ ◈

W. J. Kenney, Secretary of the San Francisco-California Driving Club of this city, has been engaged to do the starting of the races at the Kern County Fair, which opens at Bakersfield next week. The race program begins on Wednesday, the 25th.

◈ ◈ ◈

Napoleon Direct 1:59¾ is reported to have broken down at Lexington, and may never start again. Geers thought a mile in 1:58 or better was within the stallion's capability and it is to be hoped that the injury is only a temporary one.

◈ ◈ ◈

Peter Hart, the yearling brother of Peter Billiken 2:07¼ and Lady Wanetka (2) 2:10, was sold for $2,950 at the Lexington sale last week. Greeley Winings, of Indianapolis, presumably acting for Stoughton A. Fletcher, was the high bidder for the youngster.

◈ ◈ ◈

Three mares have produced two 2:10 or better three-year-old trotters. They are Orianna (dam of Czarevna 2:07¼ and Grace 2:08), Dorothy T. (dam of Adion 2:07¾ and Rusticoat 2:08¼), and Lou Dillon (dam of Expressive Lou 2:08¼ and Lou Billings 2:08¾).

◈ ◈ ◈

Never try to oil old dirty harness without first taking it apart and thoroughly washing it, then hang it up and apply the oil before the harness is thoroughly dry. When leather is damp it will absorb the oil much more readily than when it is dry.

◈ ◈ ◈

The normal pulse of a healthy horse varies according to sex. In that of a stallion, it averages from 28 to 32 beats to a minute, in a gelding, 33 to 38, and in a mare, 34 to 40; the younger they are the more rapid the beats; foals about a month old will run about 80 to 90 in a minute.

◈ ◈ ◈

Directum I., p, 1:56¾, who holds a long string of records, including that of 2:02¾ over the "Historic Track," will appear at Goshen, N. Y., on Saturday, Oct. 28th, in an endeavor to shatter the half mile track's "best." W. Averill Harriman, president of the Goshen Driving Club, will drive the beautiful chestnut stallion.

◈ ◈ ◈

It is many a day since harness horses raced for money at New Orleans, La., and for the first time in years they will be given twelve opportunities during the National Farm and Live Stock Show at the fair grounds. The dates are Nov. 13-18, and $5,400 is the total of the race purses, which range from $400 to $700, as per the program that has been published.

◈ ◈ ◈

The Golden Gate Thoroughbred Breeders' Association has decided to purchase a number of thoroughbred stallions and distribute them throughout the State of California where they will be mated with thoroughbred mares free of charge. The association hopes by this means to revive the breeding of thoroughbreds in this State, an industry which has fallen off to almost nothing in recent years except on the farms of a few wealthy breeders. At a meeting of the association to be held on Thursday evening, November 2d, details of this new venture will be settled and other subjects of deep interest to horsemen will be discussed.

Kremlin 2:07¾, whose death was announced last week, is said to have been the first of the stallions that have held championship records to have made the record to a low wheel pneumatic tired sulky. Kremlin was not a great success as a sire of 2:10 trotters but his daughters have done well, especially those bred to Bingara, son of Bingen.

◈ ◈ ◈

The splendid race won by Roan Hal at Lexington, in which he defeated Single G. and earned a new record of 2:00¾, emphasizes that half mile track stars possess class. Single G. and Roan Hal were defeated in half mile track races, although Single G. was not in top form when he was beaten. Now one has reached the two-minute mark and the other is very close to it. As it is in baseball, the "big league" trainers find it best to go to the "minors," or half mile tracks, to get their racing material.

◈ ◈ ◈

The Grand Circuit wound up at Atlanta, Georgia, this week, and the racing has been good but the fields small, seldom more than four or five horses starting in a race. On Wednesday, the third day of the meeting, Atlanta was visited by a hurricane and an earthquake but little damage was done to the racing plant, and racing was resumed the next day. This is the first time the Atlanta track has been a members of the Grand Circuit and it has probably proved an expensive experiment.

◈ ◈ ◈

One of the Breeder and Sportsman's subscribers, P. H. MacLean of Rolla, North Dakota, reports the loss of his mare May Stannel by Stannel 44276. The mare died just before foaling. She was a very handsome animal, and was raised by Mr. MacLean and was never for sale. Mr. MacLean is keeping up with the procession, so has opened an auto repair shop in connection with his general blacksmithing. He says the Dakotans have gone crazy over the gas wagons but thinks perhaps they will take up the reins again for real pleasure.

◈ ◈ ◈

One of the best performances during the meeting at Lexington was that of the trotting gelding, Royal Mac, a recent addition to the stable of Tommy Murphy. The horse trotted a mile in 2:04½, which was in itself a high class performance, but the best part of it was that the last half was trotted in 1:00½, and the last three-quarters in 1:31½. The horse was recently bought by Murphy for $2,500 and looks like a rare bargain. He won three races over the half mile tracks in as many starts and secured a record of 2:09½ his first start on a mile track.

◈ ◈ ◈

While entries were made by W. G. Durfee and Chas. Spencer at Atlanta, none of their horses have started during the three days of racing held up to this writing, and the probability is that all the California horses were shipped from Lexington to Phoenix, probably stopping off at some of the Texas points on the way. The Phoenix meeting will open November 13th, and it may be that the Durfee string will be back in Los Angeles this week, and be shipped from there to Phoenix where it looks as if they should be able to win a few races.

◈ ◈ ◈

Mr. Roland C. Drake, formerly of Lexington, Kentucky, but now Assistant General Agent, Pacific Department of the Hartford Live Stock Insurance Company, is now located in San Francisco and will devote his time to the building up of the live stock insurance business of this coast for his company. Mr. Drake once trained trotters and having lived at Lexington so many years has an acquaintance with nearly every horseman that ever visited the blue grass section. We commend Mr. Drake and the company he represents to the owners of live stock in California.

◈ ◈ ◈

The protest of M. L. Woy against the action of the California State Board of Agriculture will come up for decision before the Board of Review of the National Trotting Association at its next meeting. The protest, as our readers will remember, is against the action of the judges in the Occident Stake at the California State Fair this year, who ordered a fourth heat to be trotted to decide which horse stood best in the summary—Mr. Woy's filly Lulu B. and Mr. Durfee's colt Hermes having stood equal at the end of the third heat. The Board of Review will meet December 5th.

◈ ◈ ◈

One of the best sales of a trotter consummated during the Lexington meeting was made by John W. Stout, of Versailles, who sold his four-year-old trotting stallion, The Royal Knight 2:08, to the Pastime Stable for a large figure, which was not made public, but which was probably $10,000 or $12,000. The little stallion is one of the best trotters in training at Lexington this year and just before his sale trotted a mile for his breeder-owner-trainer in 2:05¾, the last half being caught by some in 1:01. Ben White, trainer for the Pastime Stable, got up later and drove him a mile in 2:08¾, after which the deal was made. The stallion resembles Lee Axworthy very much and it is said that the two will probably be started for a record to pole, and if they take kindly to this kind of hitch, seem to have a chance of beating the pole record of 2:03¼, held by Uhlan and Lewis Forrest. The Royal Knight seems to be a much faster horse than Lewis Forrest was at the time he made the record with Uhlan. The Royal Knight is by Border Knight, a son of Bingen, and his dam is by Achille, also a son of Bingen.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Newbert on Inspection Tour.—President Frank M. Newbert of the State Fish and Game Commission, just back from a 1,000-mile inspection tour through Superior California, with Commissioner Carl Westerfield of San Francisco, reports fish and game conditions excellent. He states that the people everywhere have realized the benefits of the Commission's efforts toward the conservation of game and are assisting in every way possible.

Deer everywhere were numerous, does and fawns were seen in especially large numbers. In spite of the severe winter last year there has been an increase in the number of deer throughout the northern part of the state, he says.

"One of the best indications of the way the people up there are working hand in hand with the Commission in protecting the game," says Newbert, "is the way they are penalizing violators of the game laws. The laws are strictly enforced and non-observers are fined the limit."

The commissioners stopped over for a two-day hunt in the Modoc lava beds and two large mule tail deer and a black bear were killed. The deer weighed about 245 pounds each and the bear weighed 450 pounds. John Hess of Alturas was with the Commissioners on the hunt.

Most of the inspection trip, which took about thirteen days, was made by auto. The route was from San Francisco to Eureka, Redding, the Sisson hatchery, McCloud, Bartle, to McArthur, Lookout, Lower Klamath Lake, Dor's and Sacramento.

Hunters' Club Meets.—The first regular meeting of the Hunters' Club was held at Cedarbrook Park last Week. The following officers were elected and installed: President, George T. Kerr; vice-president, Robert E. Higgins; secretary, John Rizzo; treasurer, P. H. H. Richter; sergeant-at-arms, Milo Oneto.

The striking feature of the occasion was the large attendance of enthusiastic sportsmen from various parts of Santa Clara county.

George Kerr, the president of the club, thoroughly explained the objects and purposes of the organization. He dwelt upon the game laws and urged those present to do their utmost to secure new members and spread the gospel of protecting fish and game, and also song birds. His remarks were vigorously applauded.

Mr. Kerr also stated that aside from working for the lawful protection of fish and game the club hoped to give social entertainments and promote fraternity among the members, but that positively no politics would be tolerated.

Remarks were also made by Vice-President Higgins, Ernest Strickler, Joe Texiara, Emmett Rhew, M. Oneto and various others.

Committees were appointed to draft a constitution and by-laws an order of business. Regular meetings will be held each Wednesday evening.

It was decided to give a wild game feed next Wednesday evening at Cedarbrook park, and on Sunday, October 29th, a big barbecue will take place, when a large class of new members will be initiated. Wild game feeds at regular intervals will be held and the members all expressed themselves confident that the Hunters' Club will be a great success.

That the various feeds and social features will be a success is certain, as President Kerr appointed an entertainment committee of experienced hunters. H. Richter, R. E. Higgins and John Rizzo are the members on whose shoulders the task of making the entertainment a success will fall.

All of those present will start out on the opening day after game of various kinds.

Kerr is going t othe San Joaquin after ducks, Strickler and Rizzo to the Alviso marshes, and Higgins, Richter, Burns, Texiara and others will hunt quail. Portal, Keffel and Rottanzi have promised game of some kind.

After a song by Ernest Strickler the meeting adjourned.

Sacramento Coursing Club.—Editor, Breeder and Sportsman: The Capitol City Coursing Club is trying to revive the sport of coursing, and last year held several successful winter meets. Many San Francisco sportsmen had entries and took part in these meets, some of them being Mr. John Rosseter, Judge John Grace, R. K. Malcolm, H. A. Deckelman, Harry Murray, also Geo. Heintz of Oakland.

Many entries were received from San Francisco and the bay cities. and the honors for the Rosseter Cup Meet were carried off by an Oakland greyhound, first, and a Richmond one, second.

This year the Capitol City Coursing Club is planning to hold more successful meets than ever before, and as they have one of the grandest open fields to run on, it makes the sport very interesting.

The membership dues for the club are to be increased, beginning October 16. It was also voted that only club members shall be allowed to have entries in future meets, and that all greyhounds entered must be registered with the club.

Several letters have been received from eastern coursing men requesting information on the winter meets, for as soon as the October Waterloo Cup, National Futurity and Aberdeen Cup stakes are run in Nebraska, they intend to send their entries out to the coast to take part in the meets held at Franklin this coming winter. The club is to hold meetings at 630 I street, Sacramento, every other Thursday night and all members are requested to attend.

This year's meets are attracting great attention and a successful year is expected. Some of the best dogs in the east will be here and all the local state dogs will be run.

Trusting you will give us a little publicity in this matter, we remain,

Very Truly yours,
THE CAPITOL CITY COURSING CLUB,
EUGENE F. PANARIO, Sec'y.
Sacramento, Cal.

CLOSED DEER SEASON FOR MARIN COUNTY.

San Rafael Advocates Move For Two Years to Give the Game a Chance.

This season has brought home to the lovers of deer hunting the fact that forked horns are scarce on the mountain side, and outside of the Water Company preserve on the mountain, which virtually supplies the whole central district of Marin county, there are but few male deer left.

No one loves the sport better than the editor himself, but it is useless to tramp the hills for day after day and never see sign of a horn. On the Lucas Valley ranges it is safe to say that there are over a hundred does, but no bucks. The same can be said of other sections of the county.

When the Marin Municipal Water District is taken over the preserve on the mountain will be increased and therefore give the bucks a chance to accumulate. At the present time the Country Club and the Lagunitas Rod and Gun Club secure the only shooting in the county worth speaking of. In fact, the deer are so tame in this section that it is more like taking a shot at a fat cow. It is no trouble to hunt them. But it is not fair to have two clubs enjoy all the shooting at the expense of the other sections of the county.

We would advocate a closed season for one or two years, in order to give the deer an opportunity to accumulate. While we are cutting out shooting of every kind in Marin county for the next two years, so that no one will have an excuse to carry a gun in the hills. This will assist the game warden in patrolling the county and aid members of the Marin County Game Association in hunting down the game law violators.—San Rafael Independent.

Catch 45-Pound Salmon.—It took four Woodland fishermen just fifteen minutes to land a forty-five-pound salmon from the Sacramento river above Knights Landing on day last week. The anglers who fought with the big fish were Leslie Button, who hooked him in the first place with a shad hook, Beverly Coil, Joseph Armstrong and Robert Parker.

The party went to the river understanding that salmon fishing was particularly good, but such a catch as it was their luck to fall upon was hardly expected. Nor did they get the salmon without a struggle. When Button snagged the fish it did not take him long to find out that he had more on the end of his line than he could handle. The other three members of the party rushed to his assistance and fought with the slashing fish for many minutes before they were able to land him.

Several smaller fish were also caught by the party, about fifty pounds in all being brought home.

Acquire Taste For Swordfish.—Up to a few years ago it never occurred to anybody to eat swordfish. It was ignored, or caught only as a curiosity. Now great quantities are sold in Boston and other New England cities. It tastes much like catfish. Many persons prefer it to halibut. It has become an important source of income to New England fishermen. Yet it can seldom be bought in fish markets outside of New England. There is "no demand for it," fish dealers say. The public simply doesn't know about this fish.

A far more general ignorance prevails regarding the goosefish, otherwise known as the "devilfish." According to Dr. Hugh M. Smith, of the United States Bureau of Fisheries, the steaks of this fish are just as rich in flesh-building material as sirloin steak. As for taste, the goosefish is esteemed as a great delicacy in Europe. North Sea trawlers never supply the demand in Germany, where it brings four times as high a price as fresh mackerel. In England 3,000 tons of goosefish are eaten every year. And yet there is absolutely no market for it in America, although it is very plentiful along the Atlantic coast. A fisherman who happens to catch one—and they are easy to catch—throws it back into the sea.

WAYS OF WILD DUCKS IN FLIGHT.

Birds Are Creatures of Uniform Habits and Show Preference for Inland Waters.

Those who speak of the wild duck are not always aware that the term covers over thirty species. Only a few of these species are familiar even to sportsmen; some are not edible ducks, whilst the remainder are very rare visitors indeed, if visitors at all. It is not, however, the intention to digress further upon the varieties of duck with which a gunner may meet, but rather to speak in general terms of the sport which the commoner kinds provide.

Ducks are creatures of uniform habits; their preference is for inland waters, except in very bad or sever weather, when they take themselves to the sea to escape the freezing of their homes. It must be admitted, in addition, that some birds prefer the sea even when climatic conditions are mild; but these ducks are generally migrants which have not yet discovered a river or piece of inland water to their liking. But whether it is the sea or some inland water which the ducks patronize by day, they spend the greater portion of the daylight hours in rest, and it is only when the dusk of evening falls that they sally forth on their food-hunting expeditions.

It is then that the sportsman takes his chief toll of them. Night after night, unless unduly alarmed, the ducks will follow the same line of flight, and it is this knowledge of their habits that enables the gunner to post himself so that he may intercept them in their journeyings. There are few more exciting forms of shooting. Crouched in his hide among the reeds, are behind the sand dunes, the sportsman conceals himself as much as possible, often in the bitterest weather, motionless, waiting, listening. His ears are his chief aid to success; only dimly in the failing light can he see around him, and the first coming of the ducks will be heralded by the well-known whistling of their wings. His attention thus arrested, he searches the gloom for the dark, quickly traveling specks; for a second he espies them, just long enough to get off his two barrels, and then they are gone in the night, leaving behind them, if the aim be true, one or two of their number to fall with a resounding splash or thud.

Flight-time lasts in the evening for some thirty minutes. During this time, if there are many birds about, a gunner may fire as many or more shots. On other occasions he will have to be content with the expenditure of two or three cartridges and an empty bag; while yet again, he may return home with a clean barrel. Many things make for success—concealment, knowledge of the lines of flight, good shooting, of course, but above all, a strong head-wind blowing against the ducks, so that they will be forced to fly low to get along against it, and so bring themselves within range of the guns. For ducks are cunning creatures; much shooting has taught them that the higher they fly the safer they are, and on calm, still nights they seldom fly within range unless the gunner is lucky enough to be posted just where they are dropping down to feed.

The morning flight, which occurs again just as darkness turns to dawn, is more generally productive of sport. For one thing, it is more prolonged, and for another, it is growing lighter every moment instead of darker. In the early autumn of the year the ducks will be fighting over the stubbles to feed; later on they are more difficult to locate, and then preference may be for some grass field lightly covered with flood water. In really hard weather the surest place to wait for them is some unfrozen piece of running water; the ducks must have water, and they will find it if there is any to be found, and, moreover, they will come great distances to it.

For those who indulge in fight shooting a strong and plucky dog is essential, it does not matter much whether it is spaniel or retriever, so long as it will bring birds quickly to hand. Certain breeds of the first-named variety are perhaps the best, for they are happier in the water than out of it, and do not mind breaking the ice to go in. Ducks which fall at flight time often cannot be marked down with the eye so that the dog is really as necessary then, as if they had dropped, as many do, into the water.—B. C. Tillett, Rod and Gun.

Birds Eat More Than Men.—According to "Tidbits" birds can eat and digest from ten to thirty times as much food in proportion to their size as men can. If a man could eat as much in proportion to his size as a sparrow is able to consume, he would need a whole sheep for dinner, a couple of dozen chickens for breakfast, and six turkeys for his evening meal. A tree sparrow has been known to eat 700 grass seeds in a day. Relative to the bird's size, these seeds were as big as an ordinary lunch basket would be to a full-grown man.

A bird's strength is equally amazing. A white-tailed eagle, weighing 12 pounds with a wing-spread of 6 feet, has been known to pounce on a pig weighing 42 pounds, raise it to a height of 10 feet and fly off with it. The bird had covered a distance of half a mile before the pig's owner succeeded in shooting the thief.

Trapshooters know the rules of their sport much better than the participants in any other sport.

THE FIELD FOR MISSIONARY WORK.

TrapShooting Improves Aim and Skill of the Hunter in Bringing Down Game.

The coming of the hunting season which each year takes several millions of red-blooded sportsmen into the woods and fields in quest of game, ought to point a strong sermon to the trapshooting men of the country. There are, in round figures, a half million trapshooters in these United States. The hunters, at least those regularly registered through the medium of the hunters' licenses in the various States, number six to eight times as many at a conservative estimate. The problem the trapshooters are confronted with is either to induce every one of these hunters to become a trap shot, or if this is not possible through some failure in the shooting system, find what that objection may be and seek to have it eliminated.

That large proportion of men who handle the shotgun, who love the lure of the shell and powder and shot, yet who do not take part in trap shooting, must point either to the necessity of more strenuous missionary work or to some change that this great body of men would like made in the present mode of trapshooting. In either case the duty of all trap shooters, and particularly those men who are most closely identified with the promotion of the sport and with its government, whether in a national, state or local degree, is plain. They should more vigorously camp on the trail of all non-shooters who own shotguns.

Great gains have been made in the conversion of followers of other sports to trap shooting. How much easier would it be to divert those who already own guns, who know how to shoot, who appreciate its many attractions and benefits, and who are in reality almost trap shooters, into the ranks of trap shooting. Think what an imposing array an army of three or four million shooters would make. It would be so tremendous that it would completely dwarf all other sports.

If the fault is the lack of promotion effort, let's all put our shoulders to the wheel and do the work by individual solicitation. If the fault rests with trapshooting itself, we should see to it that a remedy is discovered that will make the sport more closely conform to what the hunters really desire.

San Jose After Coast Handicap.—San Jose, through the San Jose Blue Rock Club, is out to secure the 12th annual Pacific Coast Handicap trapshoot in 1917. O. N. Ford has announced that his application on behalf of the organization to be awarded the shoot is on its way to the headquarters of the Interstate Association in Pittsburg, Pa. The shoot, if held, will be staged in the early summer.

The annual Pacific Coast handicap is one of the five stellar trapshooting events in the country, second only in interest to the Grand American Handicap. Four sectional shoots are held under the auspices of the Interstate Association, and the crack shots of the particular district included are always in attnedance, as rich money and trophies are always hung up. San Jose will offer a large financial bonus to the association to procure the shoot.

George H. Anderson, the president of the San Jose club, is also president of the California and Nevada State Association. C. R. Arques is vice-president and O. N. Ford, the secretary and manager.

The grounds of the club on the King road offer a fine site. There are four sets of trap throws in operation, and all are so placed that the sun from 9 a. m. to 6 p. m. is on the shooters' backs. A beautiful skyline, with nothing to obstruct the view of the shooter clear to the Mount Hamilton range of mountains, 20 miles away, is another feature of the location which is expected to appeal to the Interstate Association in making the award.

Send-Off for Joslyn.—William A. Joslyn, for several years assistant to T. E. Doremus, the president of the Interstate Association, and manager of the Sporting Powder Division of the Du Pont Company, has gone to San Francisco to take charge of the Du Pont headquarters in that city. Joslyn is one of the most popular trap shooting men in the country, a hustler and of a sunny disposition that made many friends. He is also a high class shot, averaging as a rule better than many of the regular shooting professionals. He has made some notable records, especially in Westy Hogans tournaments. At the Mid-Summer Handicap, last July, he made a run of 99 out of 100 from 21 yards. He will be succeeded in Wilmington by E. R. Galvin, a man of many bright and valuable ideas on the subject of trap shooting, and who has originated many of the things now incorporated in the sport.—Sporting Life.

Pheasant Season Closed.—At sundown Sunday night, the open season for hunting China pheasants in Oregon closed. The State Game Commission lopped off 15 days of the season in view of the fact that the ringnecks were scarce this year due to the heavy snow of last winter. The birds this season were also smaller than they were last year.

Sportsmen in various sections of the Willamette Valley are of the opinion that the State Game Commission should import some male pheasants this year. They say that the importation of the males is the only thing that will replenish the birds in the state, despite the fact that 2000 birds will be liberated at the state game farm next spring.

Duck and Quail Season Comes In With Prospects Bright For Excellent Sport.

The duck and quail season in California is now officially opened with no confliction of the Federal and State law to worry hunters. Hundreds took advantage of the State lowering the bars on Sunday and turned out in force. Upwards of 200 birds alone were shipped into San Francisco and hundreds more were bagged in other sections of California.

No trouble was expected by the boys who took a chance against the Federal regulations, which set Monday as the opening date. The authorities doubtless did not want to dabble in technicalities. It is hoped that the matter will be threshed out next season for the convenience of all parties concerned.

Prospects for a promising season are the best in years, declare the hunters and game experts. M. L. Clark, a deputy, reports that bluebills are on the Bay at this early date. It is their earliest arrival in years. Clark attributes the cause to a severe winter coming.

Most of the birds around are home bred, and about November 15 the northern flight is expected to put in an appearance. Quail hunters were out in full force and found more birds than in many seasons past.

Interest in hunting is at fever heat, as is indicated by the many licenses being taken out. The local office alone has sold 17,250 tags so far, which is 6000 more than at the same time in 1915. The total of 160,000 for the State will likely be exceeded this year.

Game violations have been scarce in comparison to other seasons. Only a few "early" hunters were apprehended, and the laws are better understood and respected.

Henry Abrahms shot down in the vicinity of Gustine, just below Newman. He got the limit, too, and has the following report to make for the benefit of hunters:

"Shooting was extremely good. Sprig, teal and widgeon, especially the first two, are plentiful. We saw only a few mallards, and none of the northern birds. One of our party shot a tree duck, at least that is what the local expert called it. We heard of good shooting in the Dos Palos country, and that teal were abundant."

This party was one of the most successful of any which went out. All five of the hunters secured limits. They were Drs. T. E. Bailey, William E. Stevens, W. O. Montgomery, T. G. Braunberg and Henry Abrahms.

Henry Kleversahl of the Humboldt Bank reports that the Suisun country supplied limits. While none in his party secured the full twenty-five, all had sacks of eighteen or twenty. In this party were Captain John Seymour, H. C. Kleversahl, T. D. Hopper, C. W. Neal, Charles Randall and T. H. Haskins. One of the party bagged a "can."

Dr. A. T. Dirby shot the limit in the Suisun marshes.

Jerome B. White, who banged open the season at Hog's island up the San Joaquin, didn't have the luck of those that went farther down. His bag was eight birds.

Charley Urfer dropped fifteen nice ducks in the Alvarado marshes. George Dupuy went out for quail and returned with ten and two rabbits. He hunted near Point Reyes.

Dr. C. E. Young took the limit from the rice fields near Colusa. The general report from the rice country is that owners will not allow hunters into the fields. The rice is now almost ripe, and not until it is headed will hunters have free swing. About the middle of November will be the best time in this section, according to those who have made the trip up the valley.

San Joaquin Valley Reports.—Fresno.—Returning hunters had nothing or little to complain of as to the plentifulness of game. G. L. Blau and Larry Adamson of the Gem Barber Shop came back from the hunting grounds early Sunday afternoon, both having secured limit bags before 11 o'clock.

Reports are coming in thick and fast of good bags from the Tulare Lake country and in spite of high flying, results are exceptionally good.

Reports from the West Side are also good and all open land was more than well patronized.

R. L. Quigley, who went out early Sunday morning and found refuge in a haystack while waiting for sunrise, awoke to find a band of ducks waiting to be shot. Needless to say this is what R. L. did and soon filled his bag.

Frank Hansen and M. C. Derr did their hunting at Tulare Lake and both returned with limit bags of assorted birds, and spent the greater part of Sunday afternoon showing their catch to admiring friends.

R. D. Chittenden at the Temple Gun Club preserves got twenty birds. Tom Hughes also did well, doing his shooting at Tulare Lake, but admitted not getting the limit, all of which puts Tom in the Truthful James class.

Doves, valley and mountain quail are more than plentiful this year and hunters are bringing in tales of how easy they are to get.

Stockton.—Wild ducks, for which the season opened Sunday, were scarce in the market Monday morning and few had been received at the stores up till noon. Some were expected to arrive later in the day, however. The dealers are now largely dependent upon the hunters in the Los Banos and Chico sections to supply the local trade with ducks, comjaratively few coming from the island district these days.

Prices at which the retail men expect to sell the ducks are as follows: Per pair, mallards, $1.65 to $2; canvasbacks, $1.75; sprig, $1.25; teal, 75 cents to $1; widgeon, 85 cents to $1; blackjack, 85 cents; spoonbill, 60 cents.

Quotations on wild geese are as follows: Gray, $1.15 per pair, white, 90 cents per pair, brant, $1 per pair.

Cottontail will sell at 30 cents each.

Coalinga.—Every hunter that returned from the lake Monday brought back a nice bunch of ducks, and reports the shooting better than in former years. The members of the Coalinga Gun Club this year had several boats built, and in this manner are able to get out to all parts of the lake to place their blinds, and also gather up their game. They have rented a small house near the southern end of the lake, where they store all their supplies and bunk, which makes an expedition more pleasant, and greatly adds to the sport and pleasures of the season.

Los Banos.—Sportsmen were busy all night locating places for the season's shoot and the bombarding began by the light of the moon regardless of law. When the sun showed his dim face through the thick mist or veil that covered the landscape, birds were flying high—so high that very few hunters were fortunate in securing a limit or even enough for a meal without buying them from some other fellow.

There were birds enough to supply the whole state but they were wise to the man behind the gun, and many flew away to quieter fields. There were so many hunters in parts of the territory which was easily reached by automobile that the birds had no chance to alight all day. Heavy shipments left this city. An extra car was switched on the 9:20 passenger. Dos Palos and Firebaugh also sent out many bags of game.

There is plenty of water for a radius of fifty miles and pop holes or blinds galore which means good hunting for the season.

Plenty of Birds at Woodland.—Many a dining table in Woodland was featured Monday evening by the sight of a roast duck or friend quail, the spoils of the hunt of the masters of the household on Sunday, the first day of the season for these two game birds. And if every home from whence an aspiring hunter went forth did not enjoy such a feast it was because said hunter was a poor shot or a very bad hunter.

For, according to the word of all those who took the field bright and early Sunday morning, ducks are thick in the vicinity of Woodland this year. Especially is this true in the rice fields, but the marshes have an unusual supply of the birds. With so many hunters out Sunday the game was kept on the wing so that shooting was particularly good. Teal and the other smaller varieties of ducks were bagged mainly, but hunters are confident that the mallards will come in later on.

So far no report has come in of any of the local hunters falling in with any federal game officer whose duty it would have been to make an arrest for violating the federal law of no hunting on Sunday.

Those hunters who went out for quail were unable to report such good luck as the duck shooters. All claim that there are many birds but from all evidences they have been shot at before the opening of the season, being so wild that it is hard to get a shot. They seem to keep to the thick brush and it takes a quick and sure shot to get even as much as a feather. Rev. W. E. Bobbitt, who went out Sunday, reports the biggest killing so far, having bagged fourteen quail.

From all appearance scatter-gun shooting is to be even more popular than usual this year and with the ducks plentiful even more successful than it is ordinarily.

Sport at Santa Cruz—Santa Cruz, Cal.—The woods, the hills and the lagoons were sought by many hunters Monday at the opening of the game season.

Among the returns were, for quail, Robert Anderson and Delos Wilder, 15 on the Wilder ranch; Dr. Edward Morgan and Dan Staffler, 8 quail, 2 rabbits and three ducks up the coast; Walter Cox, 2; William Mathews, 2; Martin Krilanovich, 8; 15 rabbits at Happy Valley. Slim Gregory, 15; Bob Gross 13; Ted Barley, of San Jose, 11, and 4 rabbits; T. Rodriguez, 13; Cleve Rodriguez, 15, and 9 rabbits. These were killed beyond Boulder creek. Frank Shelbey and son, 16, on Newell creek; A. Guidici, up the coast, 11; Lee Briody, 6 and 3 rabbits; H. Feathersline, at Felton, 15; J. Haynes, 15, and A. Loratelier, 15 at Felton.

Chief of Police F. K. Hannah, under sheriff R. H. Rountree, E. B. Kalar, and Clarence Dake, each got the limit at Gianoin's up the coast; Van O'Linda, the limit near Gilroy; C. J. Gillen, 1 at Waddell; John Strobben, 7 at Waddell; Ed Kilfoyle, several at Scotts Valley; Ted Kilfoyle, 5; Joe Williams, 4, at Scotts Valley; David Wilson, J. E. Ray, Toney Williams and C. W. Rose, got 60 ducks near the mouth of the Salinas river; James Francis about 20 at Wood Lagoon.

Sportsmen's Row

The agreement which has recently been arrived at between the Government of U. S. A. and Canada for the protection of migrating birds is an example to be followed by European nations when they have got through with their fighting. The principal clauses provide that no bird important to agriculture as a destroyer of insect pests shall be shot at any time, and no open season for any species of game birds shall last longer than three and a half months, and that the open seasons shall be so fixed as not to include the breeding season. The result is that 1,022 species and sub-species of the most interesting birds of North America will now be protected from the Gulf of Mexico to the North Pole.—British Sportsman.

It is good news from Mr. J. E. Pritchard, secretary of the Birmingham Dow Show Society, that an effort is being made to hold a show next January. Bingley Hall not being available, and as there is not another building in the city with the necessary capacity, the proposed show will have to be on somewhat restricted lines, and negotiations to that end are now proceeding. Cruft's Great Doggery Carnival will also be held as usual in February, for which Dogdom has every reason to be truly thankful.

• • •

The National Field Trials Club's great Free-for-All Champion Stake will start on January 22, 1917, and will have the same great purse for the winner, $1,500, besides the large silver cup, which must be won twice by the same owner to become his personal property. A small cup, however, will be given outright to the winner each year as a leg on the big cup. The thirty-doy privilege allowed in paying nominations in the National Club's stake applies only to the Derby and All-Age and not to the Free-for-All Champion and Stud Dog stakes, payments being required in those stakes at the time the nominations are made. Entry blanks or any desired information in reference to any of the above stakes or the club's trials may ybe obtained from the secretary, W. W. Titus, West Point, Miss.

Surprise has frequently been expressed at the large number of deaths from snake-bite in India. According to government reports, over 22,000 people lose their lives through venomous serpents every year, but a well-known big game hunter expresses the opinion that most of these fatalities were really murders. It was a common practice in India for natives to fix a snake in a bamboo stick and push it through the window of a hut, and make it bite a sleeping man against whom they had a grudge, so that when the body was found in the morning it appeared as if death had been due to the bite of a poisonous snake.

• • •

The Hungarian plain known as the Hortobagy, where the Austrians, Germans, Turks, Roumanians and Russians will soon be in deadly conflict, is an immense tract of country known in the dry season as the favorite haunt of partridges, bustards and quail, and in the winter as the resort of countless wild gees and innumerable flocks of ducks and other wildfowl. In the autumn the heavy rains fill up the rivers to overflowing, and generally convert the plain into tracts of shallow lakes and muddy creeks. It is then the wild-winged hosts arrive from the frozen north, and there they stay until the frost binds everything as hard as iron, when they depart for more congenial quarters.

• • •

Attention is called by the Fish and Game Commission to the fact that the satte law protects shorebirds as well as the federal regulations, and will be enforced against all but snipe and plover, yellowlegs also excepted. The snipe known as Wilson, English, jack, etc., is the common long-billed brown bird of the fresh-water marshy edges, not ever found along the beach.

• • •

When a big four-pointer buck jumped over the fence into C. D. Spencer's garden near Redding at 4 o'clock Sunday afternoon and commenced to nibble cabbage, Spencer took down his shotgun and blazed away from his back porch. He killed the buck, which dressed 161 pounds. The deer was a day too soon on its raid for cabbage, for the open season closed Sunday night. It would have been unlawful on Monday for Spencer to have shot the deer even in defense of his cabbage patch.

• • •

It is a singular and inexplicable fact that for two seasons no salmon have gone up the McCloud river to the United States fishery at Baird. This fishery was established thirty years ago, and two runs of salmon have come every year, each yielding millions of eggs, up to two years ago. The racks were not put in at all last season until fall, and then no salmon came. There are no salmon in the McCloud this season. Why they should quit coming and whither they have gone instead to spawn is not known.

• • •

"Baron" Shroeder, G. Pete and eight other members of the Alvarado Gun Club got limits before noon in the Alvarado marshes.

D. Sutro, Mrs. McKinstry and a party got limits before 10 o'clock. About a third of the birds were sprig, the rest teal and spoonbill, all in good condition. The same proportions hold good in the majority of bags brought in from various parts of the state.

Laurence Perris and Howard Johnson brought down limit bags from the neighborhood of Alviso.

From the Gridley rice fields came four local men with limit bags and tales of more limits to be got. They were Con Geary, L. C. James, Pete Burke and George McLoughlin.

Ross Wilson and Harry Johnson had some good shooting of quail about Bird's Landing on the Sullivan ranch. They got the limit of quail and some rabbits.

James Dow got the limit of rabbit and a few quail in the Halfmoon Bay country.

• • •

Four and a half inches of rain in the first storm gave Lytle Creek a winter scouring and washed down several thousand of the recently-planted fry from the Fish and Game Commission. Yet some think because they find few fish after such floods as last January's that it is because of under planting, and argue that fish cannot be storm-killed.

Tie Trap Match at Portland.—The difference between an eight cylinder touring car and a one-lunged roadster is 50 practice birds, in the equation of the Portland Gun Club trapshooters.

Last week Henry Roscoe Everding challenged Frank Halsey Templeton, Pacific Coast champion, for a match shoot at 50 birds. Twenty-one invited guests attended.

Henry R. bundled himself into the eight-cylinder gas thirst and started on the 11-mile trip to the traps. Frank Halsey did likewise in the tubercular-looking crude oil burner.

Henry R. waited and waited for Frank Halsey. He grew nervous and concluded to practice at 50 birds to quicken up his eye. In due time Frank Halsey arrived. They immediately rushed into a clinch, the egg shaped champion taking no time for preliminary warm-up.

Henry R. broke 49 out of the 50 saucers; Frank Halsey did likewise. On the shoot-off, Henry R. broke 48; Frank Halsey did likewise. They called it quits for the day.

Henry R. patted Frank Halsey affectionately on the back. "Temp, old boy, you're a real champion."

Frank Halsey patted Henry R. on the back: "Hi-old boy, you ought to be the champion."

Twenty-one invited guests, simultaneously patting Henry R. and Frank Halsey on the back:

"Boys, you're both the champion trap shots of the world."

Tapshooting Between County Clubs.—Something new in the way of trapshooting competition took place recently in Lexington, Ky. It was a county team race between trapshooters representing the counties of Fayette, Bourbon, Scott and Clark—every shooter residing in the county that he represented.

The Fayette county team was composed of members of the Fayette Gun Club, of Lexington; the Clark county team of members of the Winchester Club; the Scott county team of members of the Georgetown Club, and the Bourbon county team of members of the Hill Top Club. All of these clubs are within twenty miles of Lexington. The contest attracted persons from all four counties.

County team races are mighty good things for gun clubs to work up. They will add additional interest to the workings of the organization. Team races of any kind, whether they be inter-city, inter-county, inter-sectional or in leagues, are wholesome things for the sport, and interest many more persons than individual competition.

No Rain in Washington.—That the continued lack of rain in this section for the past six weeks has had a marked effect upon the hunting is the statement of hunters who have recently returned to Tacoma after trips to the foothills and mountains. The effect has been that the deer have gone to the highlands where there is still green grass, while in the low country the verdure is practically burned by the protracted dry weather.

Not until the fall rains arrive and with them snow upon the mountain ridges do the sportsmen expect to find game in the lower levels. This is particularly true of the Olympic peninsula, where sportsmen declare deer are usually found in large numbers during this season of the year.

Sportsmen returning to Tacoma from the Hoods Canal district bring word that elk are to be seen in much greater numbers in that section than ever before. The protective policy regarding elk has resulted in these large animals multiplying much more rapidly than had been hoped, although many perished in the severe weather last winter, while others have fallen victims to cougars.

The cougar, however, has been more deadly to the deer than to elk. The latter is much larger and the bull elk is a formidable opponent even for the mountain lion. Hunters predict that within a few years elk will be so numerous in the Olympic mountains that the restrictions in the present game laws can be safely removed. Until the rains set in, however, hunters who have already been in the field advise others to remain in the city as it is is almost impossible to penetrate into the high levels where the game is to be found at this time.—[Tacoma, Wash. October 17th.

HOW ABOUT IMPORTING MEXICAN QUAIL?

Sportsmen to Meet This Year to Take Up Question of Another Trial.

San Antonio, Tex.—Secretary D. F. Houston, Washington, D. C., Department of Agriculture, under date of January 20, 1916, issued a circular letter stating that "further permits for importation of quail are suspended, account quail disease; that a meeting would be held in Washington this autumn to discuss the advisability of future importations, etc. All persons interested are invited to attend the meeting and give their views," etc.

If there is a probability of discontinuing quail importations, what are the sportsmen to do for quail shooting and field trials? Quail have rapidly diminished in numbers every year until now some states have a closed season for as long as five years, and unless certain states propagate their game a closed season is not sufficient to counterbalance the toll the enemies take. Therefore, quail, under proper restrictions, should be allowed to be imported, and I sincerely trust the sportsmen of the whole country will urge their game commissioners to represent them at this meeting, and lend their aid to the discussion.

I am aware of the fact that quail disease has developed in nearly every instance where quail have been shipped in large numbers from the different states, or from Mexico. So has typhoid fever been epidemic in the armies whenever soldiers were mobilized in large numbers, until we learned the lesson of eternal vigilance and cleanliness.

If quail are given sanitary quarters, not overcrowded, in new crates, and the latter so built that the food and water cannot be contaminated or infected by their fecal matter, in my opinion, quail can be handled for three or four months and remain healthy. If the northern states that have such severe winters and deep snows would resort to trapping their quail and holding them through the severe weather, and liberate them in the spring, a much better showing would be made.

My experience in Mexico in trapping quail the past season gives me knowledge sufficient to speak with authority. During the month of December, 1915, the records of Collector of Customs of Eagle Pass, Tex., show that I imported over 8,000 Bob White quail, and the last batch was not delivered to their destination until the last week of January, 1916, making two full months these birds were held in crates, as some of them were trapped in November, and no quail disease developed. Letters from game commissioners from the following states, viz., New Jersey, Idaho, Utah, Pennsylvania, Maryland, New Hampshire, Washington and Arizona, give reports of birds purchased during 1915-16 season as having mated and hatched satisfactorily.

I consider this sufficient proof that exotics can be safely imported without risk to native birds, and the sportsmen should get together and at least demand another year of probation, as I have yet to learn of a single instance of an epidemic among quail in their native haunts. FRANK KENT, M. D.

Seattle Association.—The feature of the day was the remarkable record made by a squad composed of Williams, McKelvey, L. Reid, Tom Wilkes and Hugh Fleming when, in a twenty-bird event, every one of the shooters "went straight." The Club has announced a series of month-end feature shoots and will start on Oct. 29th by making it a chicken day. Scores on Sunday, October 8th were:—

50 targets—C. E. McKelvey 49, *L. H. Reid 49, Tom Wilkes 48, Hugh Fleming 48, Deskin Reid 47, Harry Williams 46, Geo. Scripture 46, C. W. Bandy 40, Jack Lewis 33, J. U. McPherson 19.

100 targets—C. E. McKelvey 97, *L. H. Reid 96, Tom Wilkes 94, Hugh Fleming 92, Harry Williams 86, Geo. Scripture 80, Jack Lewis 64, J. U. McPherson 55. (*Propessional.) Yours,

Seattle, Wash. E. A. FRY.

Outdoor Dog Season.—One of the most prosperous and successful canine seasons in the history of America dogdom is rapidly waning. In patronage, dogs benched and class of contestants the summer of 1916 will stand out as one in which the dog reached a height beyond the dreams of the most stanch adherent of the dog world. In only one region of the country were the dogs neglected and that was on the Jersey coast, where for some unknown reason, several towns were canceled. However, the influx of cities heretofore off the beaten path made up for the loss of Long Branch and other New Jersey cities. Among the big exhibitions that stand out in the memory of those attending the shows of this past summer is the Southampton. Under the guidance of Frank S. Dole, superintendent, this annual display was made the biggest outdoor show of the year, rivaling for that matter the Westminster Show of the indoor season. Among the final shows of the outdoor season will be the three-day attraction at Danbury, Conn . This annual fixture is the oldest in America, and from all reports will be patronized this year with greater zest than ever before. With the return of dog fanciers to New York for the winter, kennel masters are getting ready for the indoor displays, the first of which probably will be at Astoria, Long Island. This is the Queensboro Show, an American Kennel Club fixture, and should attract an unusual entry of smart dogs.

"ALL ALIVE" SHOW AT SAN JOSE A SUCCESS.

English Judge Named Mrs. Bell's Yokshire Terrier, Billie Boy, Best Dog on Exhibition.

San Jose, Cal., October 9.—A record attendance witnessed the last day, on Saturday, of the "all alive" show held in the Auditorium rink, and including a dog, cat, poultry, pigeon and rabbit show, came to a glorious finish. It was with a sigh of regret that the happy visitor reluctantly trailed from the noisy hall and realized that the vast conglomeration of dogs and cats and birds would all be packed away and shipped to widely separated homes in the morning, and that the many pleasant hours spent in interested inspection and contemplation would soon be but memories of the past.

A signal success, from the double standpoint of the public and the officials in charge, the largest of its kind recorded, and splendidly conducted and patronized, the show will long be remembered with pleasure. The dogs were all judged by Mr. W. J. Phillips of Birmingham, England, with the exception of the Boston terriers, which were passed on by Mr. H. I. Burton of Los Angeles. Mr. Phillips, whose hobby is Airedales, is a noted judge, and his decisions were all made from a fair comparison of point with point, so that everyone was satisfied.

In the afternoon the variety classes were judged and the specials for the best brace and best team in the show. The ladies' variety (non-sporting) was won by Mrs. M. Colverds' old English sheep dog, 'Shepton Lassie." The ladies' variety sporting was won by the Anoakia Kennels sheep dog, "Bushnell True." The gentlemen's variety sporting was won by H. M. Robertson's "Whippet." Rossmoyne "Dancing Girl" and the toy variety class was won by Mrs. J. A. Seiler's Pomeranian, "Sherwood Ursala."

The best brace in the show was won by R. W. Taylor's Airedales and the best team by Mrs. E. F. Brown's collies.

Mrs. N. B. Smith's Cragwood Kennels took first prize for the best decorated kennel in Santa Clara county, and Mrs. E. F. Brown's Browndale collie kennels took first for the best decorated kennels outside of Santa Clara county.

In the evening the crowds gathered around the ringside to watch the finals; prizes for the best dog in the show, the best puppy in the show, and the best owned and handled by a lady. The interest was intense and conjecture and hope ran high. The "fans" picked the winners beforehand for their admiring and less prophetic friends, and Mr. Phillips was truly the man of the hour. The most coveted and sought-for trophy, for the best dog in the show, was won from a wonderful field, including more than one famous dog, by Mrs. Anna Bell's Yorkshire terrier, "Billie boy." After a most exciting and breathless interval R. W. Taylor's Airedale terrier, "Medway Cadet," was chosen by Mr. Phillips as the best puppy in the show. The best owned by a lady was won by Mrs. F. M. Tryon's Boston terrier, "Tryon's Queen Adele." This ended the judging, and the crowd gradually dispersed.

The cat show, held in the large room at the northwest corner of the building, came to a happy, although somewhat tearfu lending.

In respect to the number and value of the cats exhibited, the show has never been surpassed in the city, and the number of cups and trophies offered prompted the benching of numerous rare cats from all parts of the State. The best cat in the show, a beautiful shaded silver, "Gene Winter,," is owned by Mrs. H. F. Eckhart of Oakland. This cat is an undefeated champion, who has carried off the highest honors in all parts of the State. Both his parents were cats of the best blood and undefeated champions.

Mrs. Al Schroder's "Little Lady Silverine" won the best kitten in the sho wtrophy, also winning three firsts; a winner and a special. Mrs. Dr. H. J. Nims' 'Berkeley" won the best Neuter in the show. "Berkeley" was a big winner at the P.-P. I. E. show recently.

One of the most beautiful cats exhibited and barely nosed out of winning the best cat in the show trophy, Mrs. George Lisle Mapes' "Sun Star," carried off for its proud owner a first, winner and a special, and the W. A. Sandbo cup, offered for the best brown tabby in the show. This is the third time that "Sun Star" has been judged a champion. These cats will be shown within the next two months at San Diego, Sacramento, San Francisco and Oakland.

When seen just before the signal was given for closing the doors, Charles R. Harker, the show secretary, who has officiated for many years at the San Jose show and who filled a similar capacity for many years at the Madison Square shows, said:

"This show has been the largest in point of entries and the best in point of quality in all departments in the 19 years history of the exhibitions. The attendance has been the greatest we have ever had and people have come from all over the coast and many from far distant points to visit here. Many have come for the express purpose of exploring the Santa Clara valley with a view to locating here permanently —if not now, at some future time.

"The board of directors is particularly pleased with the keen interest taken in the exhibits by the general public as well as by the fanciers and breeders. The show is not a profit-making enterprise, but is given solely to promote public interest in the valuable livestock of the several departments of the exhibition. The show is, moreover, a most desirable form of advertising. It is favorably mentioned throughout the year in scores of journals all over the country, and there is abundant evidence at hand to demonstrate that, from a publicity point of view, the shows have been of much solid cash value to Santa Clara county."

Charles H. Vodden of Los Gatos made the following winnings with his Barred Plymouth Rocks at the San Jose show: First and third exhibition pens; first and second cockerels; second cock; second and third pullets; second and third hens; also winning the sweepstakes special for the best Barred Plymouth Rock in the show, and grand special for best display.

Good Word From Los Angeles—Los Angeles, Cal.—Quail, rabbit and duck season rounds into its third day and from everywhere the reports come flocking in that game is still plentiful. As usual the first-day hunters frightened hundreds of quail, rabbits and ducks and caused them to seek shelter in parts of the country where the bang of the hunter's gun and the whizzing of shot did not fill the air.

But the second-day hunters found game so thick they were prone to believe that they were the first ones to hunt this season. And now the third day is upon us and still the surrounding country is full to the brim with the feathery prizes of the air, while rabbit is in abundance everywhere.

Sportsmen who have hunted in Southern California for years, and others who have hunted in and out of Southern California for years, say this is the best season they have witnessed in years. Forest Ranger Clercy, who covers the territory in and around Lake Elsinore, declared that he has never seen anything to compare with the present season during his career as a ranger, and Clercy has been on the job for a number of years.

Lake Elsinore has been crowded for the past two days, and though every hunter has not come back with the limit of duck, every one has come back well satisfied. Billy Daze, owner of the boats on Lake Elsinore, writes that the largest crowd that has ever visited that town has been there during the past two days and will be there for several days to come.

Daze states that hunters returning with the limit is a common sight, while the nimrods who went farther into the Perris valley in search of quail and rabbit returned with limits or near limits of both quail and rabbit, and every hunter brought back the same glad tidings concerning the abundance of game.

S. A. Taber, Robert Pooke, R. A. Painter, R. C. Grinnell, F. C. Foster, Herbert Whelstine, R. R. Tombouer, A. Kleiman, H. H. Toney, all of Los Angeles, returned from Lake Elsinore and each brought with him a limit of duck. For the most part the ducks were butterballs, although a number of sprig, spoonbills, widgeon and teal were brought down.

And up in Orange county fish and game deputies who patrol the roads and clubs report various estimates of 500 to 1000 men shooting outside, not counting those who were within the domains of the gun clubs. This scene has been enacted during the past two days and today brought forth the same thing.

Despite the terrific cannonading brought on by these many guns, everybody who has been able to hit 'em has bagged game in varying numbers from limits down to a mere mess. Squabbles over birds a dozen men have shot at and perhaps at least half a dozen hit have been numerous, and each case has been laughable t othe noncombatant.

Because of the early rain many of the early sprig have passed on, while spoonbills and teal have figured more prominently than usual on opening days. Nor have the birds been in the exceeding fatness of drier seasons, although the spoonies and teal have been quite fat enough.

A few mallards have been brought down on the San Joaquin club premises, where snipe are coming in freely. General comment upon the prime condition of the cinnamon teal has been made. These birds have averaged better than the greenwings. Feeding like spoonbills, they share the same fare, insect larvae in the warm pond waters, small seeds and other stuff too minute for most ducks.

Many Hunters at San Jose.—San Jose, Cal.—Thousands of hunters from the bay cities, including a large percentage of the 6,000 licensed shooters of this county, took advantage Sunday of the opening of the season in this district on duck and quail. Thirty automobiles carrying no less than 150 hunters were actually counted in one canyon where good shooting had been enjoyed in the past and, as a result of the rush for the good shooting country, very few birds were bagged. Quail have been fairly plentiful throughout the county, according to reports to the game warden, I. L. Koppel, owing to the increased acreage on which shooting is being absolutely prohibited and enforcement of the game laws.

As a result of the abandonment of large shooting preserves and baited ponds on the Alviso marshes, duck shooting is almost a thing of the past in Santa Clara county. Hunters state that birds are now all flying between the Alvarado and Mt. Eden ponds and the salt water north of the Dumbarton bridge. Quite a few local shooters who towed scull boats with launches from Alviso to the bay off Alvarado enjoyed good shooting, as did the 26 San Jose hunters belonging to San Jose hunting clubs controlling 300 acres of baited ponds and land at Alvarado.

Frank L. Baker, of San Jose, brought in one of the handsomest limits of ducks ever seen at the Drawbridges. The majority of his kill were sprig, there were a number of mallard and widgeon, and a few teal. All were in prime condition. An unusually large number of widgeon, for this time of the year, were noticed on the marsh.

Practically all of the hunters who shot over Alameda county preserves Sunday brought home limit bags. It was noticed that there was no shooting at all on one or two of the larger preserves. There is a possibility that this was due to the fact that the federal law prohibits shooting of ducks until Monday.

Detective Charles Hertell of the San Jose department was one of the hunters who went to Madrone Springs for the opening of the quail season. He reported having seen ten hunters for every quail flushed. Hertell came home with six birds and two cottontail rabbits in his hunting coat.

S. F. Fly-Casting Scores.—The San Francisco Fly Casting Club staged a two-day tournament at Stow lake on Saturday and Sunday. Some good scores were set, according to the following results:

Saturday Scores.

Salmon Fly, distance—W. J. Davis, 122 feet, Joe Springer 110, S. Forbes 123.

Fined for Early Shooting.—G. C. Gregory of Lebec found a few ducks he shot October 4th were very costly meat when Justice Flournoy of Bakersfield, on complaint of Deputy Fish and Game Commissioner Stout, collected a $50 fine to go to state protection and propagation work. Gregory shot the ducks near Castiac Lake.

Last week five sacks were confiscated from the Merchants' Ice and Cold Storage Company in Los Angeles and the owners are to be prosecuted. Damage done by ducks to rice and other crops is made the excuse for some ante-season "soonering" by those with no crops to protect, and ranchers after trying poison, shooting, etc., are now hiring cheap Mexican peon labor to herd the birds with better results.

Salmon Club to Give Prizes.—At a meeting of the Salmon Club of Oregon board of directors at Portland it was decided to extend the time of awarding prizes for fish caught in coast streams from October 15 to November 1.

According to the booklet issued by the club, this competition would have closed last week. Owing to the fine run of late salmon, it was decided to extend the time and give the members a chance to make up for the backward season this summer, when rain and cold weather prevented the anglers from participating in their favorite sport.

Of the 15 merchandise prizes offered for button fish, only five have been won so far, leaving 10 to be awarded.

Ray Winter has received telegrams and a letter from friends of his in Tillamook stating that salmon fishing on Tillamook bay and Nehalem bay is now at its best.

Trade Notes.—A. H. Aber of McKeesport won the fob in Class A of the post-season shoot of the Western Penn. Trapshooters' League, held by the Herron Hill Gun Club of Pittsburgh recently. Shooting the perfect combination of Remington pump gun and Nitro's he tied with H. G. Gillespie at 97 hits in 100 targets and then won in the shoot-off. S. F. Barson, shooting Nitro Clubs, won the fob in Class B with a score of 95x100.

A very successful shoot was held recently by the Wolcott (Ind.) Gun Club. C. H. Peck, of Remington, Ind., shooting the perfect combination of Remington pump gun and Nitro Club shells, won first place with a score of 146 x 150.

The boats from the Alviso district brought in hundreds of ducks. The lower decks were fairly covered with the birds of hunters. J Riordan, W. C. Allan and Howard Naybor were among the lucky hunters in that district. They got limit bags before the sun go through the fog.

The Strawberry. — The strawberry adapts itself to a wide range of soils and climates, and in this respect it differs from the other members of the berry family.

Strawberries bear almost the entire year in several of the coast counties, and the same may be said of the plants properly mulched and irrigated. In laying off ground for strawberries the first essential point is to grade the plot so it has a gradual fall, so that no part of the rows will become submerged in irrigating. There are a number of methods for laying out strawberry beds, but the one mostly followed by commercial growers is to plant in rows, hilled up and about two feet apart, with a ditch between for irrigating. Set the plants eighteen inches apart in the rows. The best time to set the plants is late in the fall after a heavy rain or any time in January or February. It is very important during the fruiting season to keep the plants in an active state of growth by irrigating, weeding and cultivating. In order to obtain large, highly flavored fruit, pinch off the runners as fast as they appear, and this will cause the plants to stock out as it were, on which the very finest strawberries may be expected the following season.

Manure For Alkali Spots. — Those alkali spots that are spoiling the appearance of the alfalfa field and are cutting down the yield can be at least partially eliminated by applying fresh horse manure as surface dressing or disking it into the soil, according to R. I. Throckmorton, assistant professor of soils in the Kansas agricultural college.

The horse manure should be as fresh as possible when applied. The spots are caused by the accumulation of alkali salts leached out of the soil and carried to these areas by seepage waters. Several applications of manure are necessary in most cases, but soon a change can be noticed in the tilth of the soil and the growth of the plants.

DO YOU WANT TO SELL?

Trotters and pacers with or without records suitable for winter racing or next season's campaign — choice breeding stock — stallions, broodmares, colts and fillies — good horses of all kinds for the show ring and ready to use on the road for pleasure and business are very scarce in the East and will bring top prices at the forty-ninth regular

Chicago Auction

DECEMBER 18 TO 21, 1916.

IN THE INTERESTS OF THE ATTRACTIVE CALIFORNIA CONSIGNMENTS ALREADY SECURED we have arranged SPECIAL EXPRESS TRAIN SERVICE from Pleasanton, San Francisco, Los Angeles and other coast points; also for responsible experienced horsemen who will be in constant attendance enroute and at the sale.

WE ARE NOW ABLE TO OFFER CALIFORNIA OWNERS who want to sell one or more without making the long expensive trip carload rates with the best service at very low cost.

There is every indication of an active and advancing market that should be at its best after the presidential election and about the time of this sale.

Many of the new buyers in the field through profitable war contracts are now in a position for the first time to indulge their wishes to own good horses and will eagerly compete with regular buyers from all parts of this country, Canada, and even Europe.

We offer the best and largest sale building at the greatest live stock market in the world where you can show extreme speed action and manners in safety, regardless of the weather. The accommodations for man and horses are far in advance of all other sale points combined and the charges most reasonable.

The sale is two months off, plenty of time to get stock in good condition. This is the best opportunity, time and place to sell one horse or more.

Write or telegraph to-day. We will forward entry blanks and give you full particulars.

Incorporated 1900

$1.00 NOMINATES YOUR MARE IN

THE WESTERN HORSEMAN

STAKE NO. 11.

FOR FOALS OF MARES BRED IN 1916---FOALS OF 1917

TO RACE AS THREE-YEAR-OLDS IN 1920

A REAL STAKE—A FIXED PERPETUAL ANNUAL CLASSIC

Every Cent Paid in Payments—With Accrued Interest **TO BE PAID TO THE WINNERS AND NOMINATORS IN 1920**

CONSERVATIVELY ESTIMATED VALUE $10,000.00

And if Worth More The Winners Will Get More

$300 WILL BE PAID TO NOMINATORS OF THE DAMS OF THE MONEY WINNERS

Total Cost to Year of Race Only $11.00

CONDITIONS—Open for the nomination of mares bred in 1916—foals of 1917, to close November 1, 1916. A fee of $1 will be charged for each mare nominated. Nominations must be made on or before November 1, 1916, at which time the nominator must give the name, breeding and description of the mare, and the name of the stallion to which she was bred in 1916.

PAYMENTS—On November 1, 1917, a payment of $5 will be due on each foal which it is desired to keep eligible, when color and sex of foal must be given, and on May 1, 1918, an additional payment of $5 must be made on all foals kept good, including substitutes. All payments received up to and including May 1, 1918, will be apportioned 65 per cent for trotters and 35 per cent for pacers. Thereafter, all payments received on trotters will go to the trotting division, and all payments received on pacers will go to the pacing division.

NO ADDITIONAL PAYMENT TILL YEAR OF THE RACE, and not one cent liability at any time beyond the amount paid in or specifically contracted for. On May 1, 1920, the year of the race, a payment of $40 on trotters and $20 on pacers will fall due, and on the first day of the meeting at which it is raced, a starting fee of $100 on trotters and $50 on pacers must be paid.

THE ABSOLUTE GUARANTEE of The Western Horseman Co. is that every dollar received on payments, and every cent of accrued interest (we never use a cent of stake money, but put every dollar out at interest the day it is received), shall go into the stake, and be paid out in spot cash to the winners.

SUBSTITUTION—Any nominator may, up to November 1, 1917, substitute any other foal regardless of breeding, or by whom bred, for the one originally nominated, but only original nominator may substitute.

RACING CONDITIONS—This stake will be raced during the fall of 1920, when nominated foals are three years old, over a first-class mile track, and will be contested under the 1916 rules and regulations of the parent association in which the track holds membership.

MONEY DIVISIONS—The sum of $200 will be retained from the trotting division and $100 from the pacing division, and will be paid to the nominators of the money winners in the same ratio as the purse money is divided, in accordance with the number of money winners.

The total amount received for each division (with deductions noted above) will be divided among the winners in the ratio of 50, 25, 15 and 10 per cent, the usual four moneys. If less than four starters are eligible to the money at the close of the race such part of the stake as remains shall go to the winner. Races best two in three, mile heats. Trotting and pacing horse breeders, both large and small, are cordially invited to consider the liberality of this stake and its absolute equity and fairness and to send their nominations to

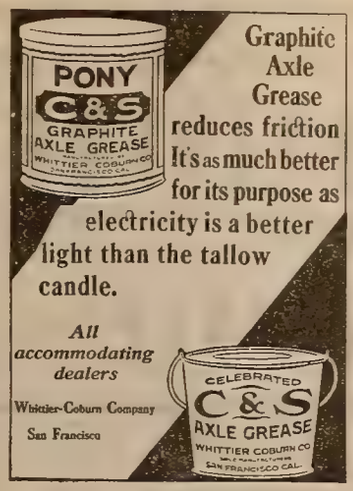
THE WESTERN HORSEMAN COMPANY, Indianapolis, Indiana

THE FARM

HARVEST CALENDAR.

Somewhere, every month in the ear, harvesters are clicking. Here is ıe world's schedule for cutting grain:
January—New Zealand, Argentina.
February—East India, upper Egypt.
March—Egypt, Chile.
April—Asia Minor and Mexico.
May—Asia, China, Japan, Texas.
June—Turkey, Spain, southern United States.
July—United States, Austria, southrn Russia, England, Germany, Switzrland.
August—Canada, Holland, Belgium, enmark, Poland.
September—Scotland, Sweden, Noray, Siberia.
October—Northern Russia, Siberia.
November—Southern Africa and
December—Uruguay, Australia.
Then it all starts over again, begining with New Zealand and Argenna. The United States exports harsting machinery to all the countries amed, and also many others. And ıeir grain products compete with urs and affect our prices.—E. L. arker in The Great Divide.

Make Your Own Grape Juice.—In ural World C. K. Francis says that ıe following directions have proven atisfactory for making grape juice:
All containers should be sterilized ı boiling water before use. To two nd one-half pounds of grapes, without ems, add one pint of water and cook ntil soft. Drain through a jelly bag nd add one pound of sugar to the ice, then bring it to boiling and boil or five minutes and bottle at once, hot. e certain to fill the bottle within an ch or two of the stopper. This juice hould keep an indefinite length of me and may be diluted to suit the ste when serving. A small piece of mon added to each glass may imrove the taste.
Grape juice may be made by the soalled cold process by adding one galon of sugar to each gallon of juice. ee that the bottles are perfectly clean nd well sealed when filled, as in the revious method.
Prepared by either of these methods, he juice should contain no alcohol.



GOMBAULT'S
CAUSTIC BALSAM

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

WINCHESTER

NICKEL STEEL REPEATERS, EXTRA LIGHT

Nickel Steel, which has about twice the tensile strength of the steel commonly used in guns, is utilized entirely in the construction of the Winchester Model 1912 repeating shotgun; and, consequently, it is the lightest and strongest repeater on the market. It is also considered the handsomest. It is made in 12, 16 and 20 gauges, and although on the market but a short time, is now the biggest selling repeater. Get one.

Use ***WINCHESTER*** "Leader" or "Repeater" shells in Winchester guns, and in guns of any make, as on account of their patented construction and uniform loading they always give the best results. Winchester shells were used by the winner of the Grand American Handicap.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

OLUME LXIX. No. 18. SAN FRANCISCO, SATURDAY, OCTOBER 28, 1916. Subscription—$3.00 Per Year

OVER THE JUMPS.

Kentucky, a five-gaited horse owned by Mrs. Adelaide Gillis McCormick of Los Angeles, that has made good on mountain trails and as a general utility horse on the San Vicente Rancho.

ANNOUNCEMENT

TO

OWNERS AND BREEDERS OF LIVE STOCK

THE HARTFORD LIVE STOCK INSURANCE

The Hartford Fire Insurance Company and the Hartford Accident and Indemnity Company of Hartford, Conn., the "Two Hartfords," have established a Pacific Department with offices at 438 California St., San Francisco, California; thereby being in a position to write insurance covering owners and breeders in the event of loss arising from the

Death of Live Stock
FROM ANY CAUSE

The "TWO HARTFORDS" Have
RESOURCES EXCEEDING $30,000,000

and are prepared to offer to owners and breeders of live stock facilities which have never been hitherto approached in the business of live stock insurance.

The "TWO HARTFORDS" will be able to issue policies for amounts adequate to protect the interests of the owners of valuable stock.

Your patronage is solicited and communications bearing upon any phase of live stock business will have prompt attention.

The "TWO HARTFORDS"

offer the LARGEST ASSETS, UNSURPASSED SERVICE and UNEQUALED REPUTATION.

Address all inquiries to

DIXWELL HEWITT, General Agent,
PACIFIC LIVESTOCK DEPARTMENT, HARTFORD FIRE INSURANCE COMPANY,
438 California Street, San Francisco, Cal., or
ROLAND C. DRAKE, Asst. Gen. Agent.

SECURITY

Before leaving on your vacation, deposit your valuables in a Safe Deposit Box in our Armour Plate Vaults. This will relieve your mind of all unnecessary worry.

$2,500 GUARANTEED **ONLY $2 TO NOMINATE MARE** **GUARANTEED $2,500**

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

Monday, December 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. **$1,000 FOR THREE-YEAR-OLD PACERS**

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

IF THE PACIFIC BREEDERS' FUTURITY for oals of 1917, which is to close for the nomination of mares December 4th, and which is guaranteed by he Pacific Coast Trotting Horse Breeders' Associaion to be worth $2500, should receive a larger number of entries than the stake for foals of 1916, the association will be encouraged to increase the size of the guarantee for the stake of 1918. The last stake had but 71 nominations, but if the owners of mares bred to trotting and pacing stallions this spring will but take interest, the stake which closes December 4th will have a much greater number. Colt stakes are the life of the horse breeding business, so far as the light harness horse is concerned, and the only way they can be kept up will be for the breeders to take enough interest to nominate their mares in them. One of the tremendous successes of the harness racing season of 1916 was the meeting held at the half mile track at Goshen, New York. The horse breeders and owners of New York State made it a success by giving it an entry list that assured a financial profit. Many of these horse owners and breeders who did not have a horse that they could start in a race, made nominations in the purses and paid in the money just to assure the success of the meeting. The result was one of the greatest meetings ever held and a profit of $10,000. Now there are enough horse breeders in California to assure the success of Pacific Breeders Futurity No. 17, if they will only nominate the mares they bred to good stallions last spring. Breeding has not been heavy this year but there must have been several hundred mares bred, as we know of several instances where stallions served from 25 to 40 mares. Every stallion owner should take interest enough in the success of the Pacific Breeders' Futurity to make entries himself and to induce the owners of mares that were mated with his stallions to make nominations. Harness racing is still the greatest sport in the United States, is participated in by more persons and is witnessed by more people than any other sport at which money is paid at the gate. The small sum of $2, which is all that is required to nominate a mare in the Pacific Breeders' Futurity, if paid on December 4th on two hundred mares would do more to boose and help the harness horse breeding interests of California than any one thing that could be done by horse owners. A big entry list for this stake and an early announcement of a California circuit will certainly aid in increasing horse values. Let every breeder who reads these lines decide that he will nominate every mare he sent to a trotting or pacing stallion this year, and induce as many of his acquaintances to do the same thing as he possibly can.

THE SUGGESTION made by the Breeder and Sportsman a few weeks ago that a California Circuit for 1917 be organized early and dates and purses announced by January 1st, has seemingly received the unanimous endorsement of all horsemen, and men who have not been represented on the trotting tracks for years are letting it be known that if a circuit is thus arranged and announced they will be back in the game with trotters and pacers to compete for the purses offered. It only remains for the towns that held meetings this year to send representatives to a meeting in December and agree upon dates to make the circuit a certainty and to put two or three hundred horses into training. Just as soon as the existing associations show their willingness to get together and agree on dates, there will be several towns where good tracks are located but which have no existing fair or racing organization, that will be anxious to join in and take their places on the circuit. A little prompt and energetic work now by every person interested in the light harness horse will make a California Circuit a certainty. If you are a horse owner residing in any town that has a track on which a meeting can be held, get out immediately and do a little missionary work towards having your town represented on the California Circuit of 1917. One is going to be arranged and you do not want to be left out.

The Adaptability of the American Saddle Horse.

Kentucky, a seal brown gelding, by Bay Jeans, dam Bertie Wells, is a wonderful example of the adaptability of the five gaited saddle horse. He is owned by Mrs. Adelaide Gillis McCormick of Los Angeles. When this horse was purchased and brought from Kentucky to the Pacific coast in 1912, it was stated that he was not suitable for the mountain trails of California. Since then he has demonstrated that the five-gaited horse can compete with and equal the western horses on steep trails. He has been used for general utility purposes on the San Vicente Rancho, and has even been used for hauling and plowing, and as a steadying partner for young colts during the breaking season. He has learned to enjoy a morning canter on the beach and a bath in the surf and responds to the secret signs of the High School Order.

This fall, after four years of ranch life, he was taken to the California State Fair and shown in all classes in which he was eligible. He won the Blue Ribbon in the "Aged Gelding" class and in the "Combination Gelding" class. He won the second ribbon in the "Mare and Gelding" class and second in the class for "Stallion, Mare or Gelding, owned and ridden by Non-Professional," being defeated only by Helen Idlewood, the well known show mare formerly owned by Ed. Moore of Columbia, Missouri, and now the property of R. L. English, of Chino, California.

The photograph on the title-page of this issue shows Kentucky in a hunting class, which further proves the many uses of the American five-gaited saddle horse.

First National Horse Show.

The first national horse show ever held in the United States took place at Springfield, Massachusetts, October 19-22, 1853, on a field of twenty-two acres just east of the federal arsenal, and brought together noted horses and horsemen, as well as many noted men, from all over the country. The prizes aggregated $2,500 and the gate receipts were upwards of $10,000. On the second day of the show the attendance exceeded the population of Springfield. About three hundred persons were on the grounds. The Morgans were in the hey-day of their popularity in 1853, and it was estimated that more than half of all those shown were of this breed, the founder of which had been foaled within a stone's throw of the show grounds, fifty-eight years before his descendants came together there.

In its report of the show the Springfield Republican said that on the second day James M. Wayne, a Justice of the United States Supreme Court, judged a class of thirty-three stallions. Another distinguished judge was Anthony Colby, Governor of New Hampshire, who awarded the prizes for "fancy teams," which would now be classified as pairs of high stepping harness horses. The grand prize of the show, $200, was won by the trotting stallion Cassius M. Clay, whose likeness is preserved in bronze in the equestrian statue of Washington in Union Square. The horse was then owned by Joseph H. Godwin, one of New York's pioneer builders of sulkies and road wagons.

Among the distinguished men who witnessed the show were Governor John H. Clifford, of Massachusetts, with his staff, done up in the stiffest military costume of the period; Horatio Seymour, then Governor of New York and candidate for President in 1868; John B. Floyd, of Virginia, later to be Buchanan's Secretary of War; John Minor Botts, also of Virginia, statesman and breeder of the noted race horse Revenue; John Jay, of New York, afterward Minister to Austria; Abbott Lawrence, of the American Legation in London; Marshall P. Wilder, the elder, who was president of the United States Agricultural Society, and P. T. Barnum, who managed a race track before he became a showman.

Exports of horses and mules from the United States to the European war zone will have passed the 1,000,000 mark before the end of the year. In round numbers 85,000 horses and 88,000 mules went over before January, 1915. During the next year the exports increased to approximately 440,000 horses and 120,000 mules, making a total of 653,000 to the end of 1915. In the first seven months of 1916 the total was 147,000 horses and 57,000 mules, according to official reports of the Department of Commerce at Washington. Assuming that the same rate of shipment continues through the year the totals will then be about 252,000 horses and 97,000 mules, making the grand total for the period of the war of 1,002,000 head, of which 777,000 are horses and 225,000 are mules.

KENTUCKY WOMAN SUCCESSFUL MANAGER.

Miss Elizabeth Daingerfield, Who Directs Affairs at Kingston Stud.

Lexington, Ky., Oct. 21.—Prominent horsemen from the North, and their name is legion, who came down here during the winter to look over the weanlings and yearlings and racing prospects for the coming year, would consider their trip to the Blue Grass country, of which this city is the center, incomplete without having seen and chatted with Miss Elizabeth Daingerfield, the young woman who manages the Kingston Stud of Messrs. McKinney and Corrigan of Cleveland with marked ability, and still finds time to contribute reviews of books and essays of interest to the leading newspapers of the State.

Kingston comprises 700 acres of rolling blue grass pastures and spacious paddocks on the Russell Cave pike, three miles from Lexington. There are six sires, sixty brood mares and more coming, twenty-six yearlings and twenty-eight weanlings, as this year's foals are termed, and these, together with the men and women necessary to run such an establishment, are under the care of Miss Daingerfield, who is the last word in efficiency. Miss Daingerfield is assisted by her sister Jay.

During the life of Major F. A. Daingerfield his elder daughter was his chief aid when he was in charge of Castleton for James R. Keene, and it was under her eye that the famous Commando family was brought to its highest state of perfection. Her theories, which were responsible for the production of a tribe of horses whose winnings ran well up to the million dollar mark, are regarded as those of an expert.

"I always tried," said Miss Daingerfield, in talking of them, "to follow along the lines set down by my father. Sometimes I am afraid, when I haven't him to turn to for counsel and aid. My idea is to find the blood and individuality you want and then intensify.

"Ultimus represented the apex of endeavor on the part of my father, and he is an illustration of what I mean. He is by Commando, a son of Domino and out of Running Stream. The ideal sire must have speed and courage. He must not be too big—sixteen hands at the most. He must be muscular. I am a firm believer in inbreeding, but care must be taken to avoid weaknesses.

"With an inbred sire the greatest care must be taken in selecting mares. We were in good shape in this respect when the fire destroyed so many at Castleton, and then came the dispersal sale after Mr. Keene's death and we had to begin all over again. The crop of weanlings here is the first that is comparable to what we once produced. Mr. McKinney wants quality rather than quantity.

"I prefer mares with the blood of Amphion, Galopin, and Hampton. I would prefer mares that had not raced much, and my choice would be the untrained sister of a very good performer. Mares which have been raced for a long period should have at least two years' recreation before being bred. Every mare should possess speed of a high order.

"I am not in favor of racing two-year-olds. Many of our best youngsters are broken down by trials before their bones and muscles are set. Yearlings and two-year-olds should get their educational work in galloping on grass, and we are now rolling an oval on one of our pastures, over which we will break our youngsters this year. We have the yearlings nicely under way now. They stand in line and spring away at the word of command. The turf is springy, and we shall keep them off the unyielding dirt as long as possible.

"Our system of racing is not well balanced. Too much money is offered for two-year-olds. Properly trained, our horses should stay as well as any in the world. It will be a happy day for the turf when the spring trainer is no more."

The Australian Trotting Record of September 28th had the following to say about First Voyage, the California bred son of Bon Voyage 2:08 and Elsie Downs by Boodle 2:12½, that was sold to Australia several years ago and is now six years old and a sire of stake winners: "First Voyage, the premier trotting stallion of the Belmont Stud Farm, Bendigo, once more demonstrated his ability as a high-class trotter by winning at Elmore by 2½ yards behind scratch. He cut out the mile and a quarter in 3:12, which is a fraction better than 2:20 to the mile. This, with the exception of Emulator's 2:17 1-5, is the fastest Australian record taken in a race by a trotting stallion. The crowd admired the horse's bold action. Mr. T. H. Buss, his owner, booked 20 mares during the day, and was very pleased with the reception given the stallion by the public."

"Polo mounts," not "polo ponies," as of old, is the caption over the competition that will most interest followers of the galloping game in the newly issued prize lists for the Thirty-first National Horse Show, to open on Saturday, November 11, at Madison Square Garden, and to continue with day and evening sessions until the following Friday night. There are two classes for polo mounts, respectively, for light and heavy-weights. In each, the judging will be for manners, handiness and conformation, and the owner or a polo club member must be in the saddle.

FASTEST RECORDS OF THE YEAR.

It is hardly probable that any of this year's records held at the close of the Lexington meeting will be lowered, and the following will stand as the best records made by trotters and pacers during the year:

TROTTERS.

One-Year-Old.

Colt—Dr. Elmore, by J. Malcolm Forbes 2:08, dam Mendosa Worthy 2:17¾, by Axworthy 2:15½ 2:24½

Filly—Anna Davidson, by J. Malcolm Forbes 2:08, dam Alma Vista 2:20¼ by Direct, p., 2:05½ 2:27¼

Two Years Old.

Colt—Buck Watts, by Gen. Watts 2:06¾, dam Miss Belle Chimes, by Liberty Chimes 2:22½ 2:09½

Filly—The Real Lady, by Moko 24457, dam Fruity Worthy 2:25¼, by Axworthy 2:15¼ 2:04¼

Three Years Old.

Colt—Harrod's Creek, by Gen. Watts 2:06¾, dam Axalea 2:24¼, by Chimes 5348..... 2:06¾

Filly—Volga, by Peter the Great 2:07¼, dam Nervolo Belle, by Nervolo, p. 2:04¼..... 2:04½

Four Years Old.

Colt—The Exposer, by The Exponent, dam Emma Conductor 2:21¼ by Conductor.... 2:06

Filly—Mary Putney, by San Francisco 2:07¾, dam Mendolito, by Mendocino 2:19½..... 2:04¾

Aged.

Stallion—Lee Axworthy, by Guy Axworthy 2:08¾, dam Gaiety Lee 2:16¾, by Bingen 2:06¼ 1:58¼

Mare—Mabel Trask, by Peter the Great 2:07¼, dam Miss Nutonia, by Nutwood 2:18¾, and Lucile Spier, by Directum Spier 2:11¼, dam Lucile 2:07, by Brummell 9679 ..... 2:03¼

Gelding—M. L. J., by Red Will 32948, dam Narcissa 2:28, by Marquette 9941..... 2:05¼

PACERS.

One-Year-Old.

Filly—The Completion, by The Exponent 2:11¾, dam Bonella, by Axmoor 2:20..... 2:18¾

Two Years Old.

Colt—Poorman, by The Northern Man 2:06½, dam Mary Lloyd, by Vice Commodore 2:11 2:07¾

Filly—Manricobel, by Manrico 2:07¼, dam Molise, by Mobel 2:10¼.. .....2:17¾

Three Years Old.

Colt—Peter Look, by Peter the Great 2:07¼, dam Pilatka 2:14¼, by Bingen 2:06¼..... 2:03

Filly—Sis Bingen, by Bingen 2:06¼, dam Sis Directum, by Directum 2:05¼.....2:06¼

Four Years Old.

Colt—Gen. Todd, by Geo. L. Todd 2:07¾, dam Miss Chorister, by Oratorio 2:13..... 2:04

Filly—Miss Harris M., by Peter the Great 2:07¼, dam Mary Allen Stout, by Ondale 2:23½ 2:01¼

Gelding—Young Todd, by Director Todd 2:07¼, dam Woodford Belle, by Ondale 2:23½ 2:02¼

Aged.

Stallion—Napoleon Direct, by Walter Direct 2:05¾, dam Lady Erectess, by Tom Kendle; Directum I., by Directum Kelly 2:08¼, dam Izetta R. 2:13½, by Pactolus 2:12¾.. 1:59¾

Mare—Miss Harris M., by Peter the Great 2:07¼, dam Mary Allen Stout, by Ondale 2:23½ 2:01¼

Gelding—Ben Earl, by The Earl, p. 2:14½, dam Bonnie, by Nutpick 2:25¾..... 2:00¼

—o—

The Marion, Ohio, Chamber of Commerce is laying great plans for the entertainment of the Ohio Fair Association which meets in that city November 27th and 28th. This association will have representatives from all the live fair associations in Ohio, and will discuss many questions in regard to the holding of fairs as well as arrange dates for next year. One of the features of the entertainment of the delegates will be an auto tour of the city, including a visit to the McMurray and the Houghton sulky factories. Marion estimates that 85 per cent of all sulkies used in the United States are manufactured in that city.

◈ ◈ ◈

David M. Look sold to Stoughton A. Fletcher, of Indianapolis, the weanling bay colt by Peter the Great, out of Harvest Girl, sister to The Harvester 2:01, for $2,000 and has contracted the 1917 foal of Harvest Girl at the same figure, providing it is a filly. Mr. Look did not desire to sell the foal if it should be a colt. To A. C. Hall, Mr. Look sold the yearling brown filly by Manrico, out of Emily Hope by Bellini, for $1,000, and the bay colt by The Northern Man, out of Cociara by Bellini, for $500.

◈ ◈ ◈

The world's champion three-year-old pacing stallion, Peter Look (3) 2:03, has been sold by Joseph Kleckner, of Cynwyd, Pa., to Dick McMahon, of Libertyville, Ill., the latter acting for Stoughton A. Fletcher of Indianapolis, Ind., for $8,500. The colt will probably be trained and raced the coming season for Mr. Fletcher by McMahon, and looks like the best pacer in sight for the 2:09 classes for 1917.

◈ ◈ ◈

Free entrance, with seven per cent deducted from winners, was one of the features of the Hamilton Fair races in the speed department. Starting Judge Earl Swepston, of Chillicothe, Ohio, handled the large fields in his best manner and not a single protest was registered against the official.

ATLANTA SUMMARIES.

Monday, Oct. 16.

2:05 class pacing, three in five, purse $1000:
Goldie G., blk g by Will Tranby.....(Valentine) 1 1 1

Thursday, Oct. 19.

2:12 class pacing, three heats, $2000:
Ben Earl, b g by The Earl-Tidal Wave (Childs) 1 1 1
Spring Maid, ch m by The Abbe-Miss Burlap .....(White) 3 2 2
Young Todd, b h by Director Todd-Woodford Belle .....(Cox) 2 3 3
Peter Pointer also started.
Time—2:08¾, 2:08¾, 2:06½.

2:18 class trotting, three in five, purse $1000:
Ridgemark, b g by Wilask-Eolite..(Traynor) 3 1 1 1
Truesada, b m by Moko-Trouzetta.....(Cox) 1 2 2 2
Locust Bug, b g by Sydney Prince..(Valentine) 2 3 4 4
Daisy Todd also started.
Time—2:12, 2:11¼, 2:11¾, 2:13¼.

2:07 class pacing, three in five, purse $1000:
Altawood, gr m by Altanwood-Alcrasa(Murphy)1 1 3 1
Camelia, b m by Cummer-Vesta S.....(Cox) 4 3 1 4
Birdonna, b m by Don Cale-Bird....(Stout) 2 2 4 2
Sellers D. also started.
Time—2:09, 2:07¼, 2:16, 2:09.
Ben Earl, b g by The Earl-Tidal Wave(Childs), to beat local track record of 2:05¾, won. Time, 2:04¾.

Friday, Oct. 20.

2:08 class trotting, three in five, purse $2500:
Mabel Trask, ch m by Peter the Great-Miss Nutonia .....(Cox) 1 1 1
St. Frisco, b s by San Francisco-Clara Cantrell .....(Geers) 2 2 2
Bacelli, b s by Bertini-Ban.....(White) 3 4 3
Also started—Sadie S., Humfost.
Time—2:08½, 2:09½, 2:07¼.

Two-year-old trotting class, two in three, $500 added:
Mary Coburn, ch f by Manrico-Alma Sedley.... .....(White) 2 1 1
The Real Lady, b m by Moko.....(Murphy) 1 2 2
Time—2:16¾, 2:19¾, 2:12¾.

2:11 class pacing, three in five, purse $1000:
Little Frank D., b g by Little Frank..(Valentine) 1 1 1
Dr. Griffin, b g by Bambetta Wilkes-Annie Fox .....(Stiles) 2 2 2
Lady Venus, br m by Lord Roberts-Black Venus .....(Stout) 4 3 3
Also started—Miss Bell Patchen and Queen Hal.
Time—2:07½, 2:10, 2:08¼.

To beat Georgia State trotting record, 2:05:
Lee Axworthy, by Guy Axworthy and Gaiety Lee (F. B. White).....won 1:59¾
By quarters—:30¾, :29¾, :30, :29¼.

Saturday, Oct. 21.

2:07 class trotting, 3 in 5, purse $1000 (two heats to complete event started Friday):
Bonington, ch s by Bellini-Nettie King (Geers) 5 3 1 1 2
Miss Direct, b m by Directwell-Vida M.... .....(McDevitt) 3 2 2 2 1
Miss Perfection, b m by Gen. Watts-Sue Fletcher ..... McMahon) 2 1 3 4 4
Also started—Zombro Clay and Azora Axworthy.
Time—2:07¾, 2:09¾, 2:12¼, 2:08½, 2:08½.

2:15 class trotting, three-year-olds; 2 in 3, $500 added:
Harrod's Creek, ch c by Gen. Watts-Axalea..... .....(Engleman) 1 1
Suldine, b h by Worthy McKinney-Carrietta..... .....(W. Traynor) 2 2
Time—2:11½, 2:12¼.

2:15 class pacing, 3 in 5, purse $1000:
Hal Connor, br h by Argot Hal-Barbette .....(Childs) 2 2 1 1 1
Spring Maid, ch m by The Abbe-Miss Burlap .....(White) 1 1 2 2 2
The Aim, b g by The Exponent-Grattano .....(McMahon) 3 4 3 3 3
Also started—Tony B. and Count Marque.
Time—2:09¼, 2:09¼, 2:07¾, 2:09, 2:08¾.

2:00 class pacing, 2 in 3, purse $1500:
Roan Hal, r h by Hal Defacto-Maud C....(Murphy) 1 1
Hal Boy, b g by Hal B.-Altalina.....(McMahon) 2 2
Time—2:10¼, 2:03.

2:16 class trotting, 3 in 5, purse $1000:
Ridgemark, b g by Wilask-Eolite (C. Traynor) 3 1 1 1
Blanche Carter, br m by Lord Roberts-Anna Carter .....(Stout) 1 6 4 3
Truesada, b m by Moko-Trouzetta.....(Cox) 6 2 2 4
Also started—Humfast, Marie Constant, Locust Bug.
Time—2:10¼, 2:09¾, 2:12, 2:11¼.

Exhibition to beat 2:04¾:
Mary Putney, br m by San Francisco-Mendocita (Cox) .....lost 2:06½

—o—

At the Rockport, Ohio, meeting two weeks ago, a trotter entered as Nick Carter, by Symboleer 2:09½, was carded to start in the 2:27 trot, and as it was rumored that he was the trotter California B., a request for his identification was filed with the judges. Prior to the start of the race the man who made the entry was informed of the demand and he immediately withdrew his horse.

◈ ◈ ◈

More than one hundred pacers have entered the 2:10 list this year and about one-fifth of them are in the 2:05 list.

Last Sunday at Golden Gate Park.

One of the most perfect days ever seen at the three-quarter track in Golden Gate Park, San Francisco, resulted in fast time and excellent racing, but the day was marred by a distressing accident in the last race in which Joseph Kidd's fast pacer Senator H. broke his leg and had to be destroyed. The accident occurred in the second heat of the event. Senator H. had won the first heat in 2:16½ and was in the lead turning into the straight in the second heat, but half way down the stretch the horse was seen to falter and was pulled up. Driver Hanks dismounted and saw immediately that the pacer's leg was broken. As soon as the heat was finished Mr. Kidd examined the horse, saw that the horse was suffering and asked mounted patrolman Chas. Budd to put the horse out of his misery with a pistol shot, which was done. Senator H. was a bay gelding, eleven years old, by Diablo out of a mare by Montana Director. He was bred by Henry Helman of Salinas, and had a record of 2:10½ made in a race at Pleasanton in 1913. He was a game race horse and one of the stadium favorites.

The feature race of the afternoon was the free-for-all pace in which Bradmont, King Pointer, Bold Harry Aerolite and W. J. K. were the starters. King Pointer took the first heat in 2:10½, with Bold Harry Aerolite second, W. J. K. third and Bradmont fourth, but when it was learned that Richie Robert's little horse had lost a toe weight, it was understood why he had finished last. The toe weights were made fast before the next heat and Bradmont won this heat and the next in 2:09¾ and 2:10½, with King Pointer the contender in the second heat and W. J. K. making a strong bid in the third.

The 2:20 mixed went to Mr. Ford's Minequa, and Emma M. captured the 2:15 class event in fast time for the class—2:12¼ and 2:13.

But for the accident to Senator H. no better day's sport was ever seen at the stadium. Results:

First race—2:20 mixed:
Minequa .....(M. Ford) 1 1
Dibble Wilkes .....(S. Benson) 2 2
Matawan .....(J. McNamara) 3 3
Time—2:19½, 2:17.

Second race—2:15 mixed:
Emma M. .....(W. Malough) 1 1
Pointer Belle .....(Joe Kidd) 2 2
Yoncalla .....(A. Giovanetti) 3 4
Little Jack .....(G. Conlan) 4 3
Time—2:12¼, 2:13.

Third race—Free-for-all pace:
Bradmont .....(Richie Roberts) 4 1 1
King Pointer .....(H. Campodonico) 1 2 3
Bold Harry Aerolite .....(G. J. Giannini) 2 3 4
W. J. K. .....(W. J. Kenney) 3 4 2
Time—2:10½, 2:09¾, 2:10½.

Fourth race—2:18 pace:
Frank N. .....(L. A. Gielow) 2 1
Rosa O. .....(J. J. Ryan) 3 2
George W. .....(F. Burton) 4 3
Senator H. .....(Joe Kidd) 1 0
Time—2:16½, 2:20.

The Inter-State Mountain Circuit.

Joseph Waddell, secretary-treasurer of the Inter-Mountain Fair and Racing Circuit, writes the Breeder and Sportsman as follows under date of October 17:

"I have recently returned from Salk Lake City, where the last meeting of the Inter-Mountain Circuit for 1916 was held. During the entire eight weeks we had but two rainy days prior to reaching Salt Lake. There it rained four days out of the six and we raced in the mud. The Utah State Fair directors are to be commended as they raced off the entire program and paid every purse. The time was slow but the races were keenly contested and appreciated by the management and the public. The general opinion seems to be that the Inter-Mountain Circuit succeeded fully as well as could be expected during its initial year. Not one written protest was filed during the season. Patrons and horsemen generally seem to be pleased and indicate their desire to go again. Six new associations want to become members of the circuit in 1917.

"The largest money winning trotters in the circuit were The Corsair, by Wayland Hall, and D. J. Burk, by The Corsair, both in the stable of Joe Huber of Bozeman, Mont. D. J. Burk is but a colt, and not fully matured; he looks like a 2:08 trotter. We had several more very promising trotters and a lot of high class pacers that will bear watching in 1917."

Board of Appeals Meeting.

Notice is hereby given that the next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, Tuesday, December 5, at 10 o'clock a. m., for the transaction of such business as may properly be presented to the board for consideration.

All new applications and written evidence must be received at this office not later than November 4.

—W. H. Knight, Secretary.

—o—

The champion trotter Uhlan 1:58 was exhibited under saddle at the Virginia State Fair at Richmond last week, and was a great attraction. As at Lexington, Ky., he was ridden by Andrew Billings.

◈ ◈ ◈

The Exposer, the handsome four-year-old trotting colt by The Exponent 2:11¾, now carries a record of 2:06. He is the season's champion for age, gait and sex.

Thoroughbred Matters

The Reno Fall Meeting has come to a close and is said to have been successful from both a financial and a racing point of view. While the population of Nevada is not sufficient to support racing where purses of good value can be given, the horsemen seem willing to race their runners for small purses so long as there is enough play in the mutuals to make winning profitable. Purses and salaries were cut unmercifully from the advertised amounts during the fall meeting and the association managed to reduce the $7500 loss of the spring meeting to about $3500. Spring and fall meetings will doubtless be given in 1917, and with a more judicious selection of dates should be profitable.

◈ ◈ ◈

The Los Angeles Racing Association, of which Anita Baldwin is one of the directors, allowed its charter to elapse through non-payment of the corporation license and franchise taxes to the State. Application was recently filed with Secretary of State Jordan for reinstatement of the association, and checks covering all delinquencies accompanied the application. As efforts are to be made during the coming winter to induce the California Legislature to permit mutual betting machines to be operated on race tracks in this State, the inference is that the Los Angeles Racing Association desires to be prepared to resume racing should such a law be placed on the statutes.

◈ ◈ ◈

Advices from Reno are to the effect that the money taken at the gate every day was relatively small, but that the betting system has caught on and there was from $15,000 to $25,000 played through the mutuals each day. The larger amounts are received on Saturdays and holidays, the regular week day play being not much over $15,000. Taking out five per cent from this amount would mean $750 for the association, so that even with the poor attendance the association takes in enough to provide the purses which are usually $150. It will be seen that the betting privilege is as necessary to sustain racing at Reno as it is any place where the meetings run longer than five or six days.

◈ ◈ ◈

In response to inquiry from the big auction firms that conduct the sales of thoroughbred yearlings every fall in Kentucky and New York, James Cofroth of the the Lower California Jockey Club, and Joseph Murphy of the Business Men's Racing Association at Ned Orleans, have both replied that their associations will give races for two-year-olds, beginning January 1st, 1917. Mr. Murphy states that his association will give a race for two-year-olds every day after January 1st. H. D. Brown writes that he has not yet decided if there will be races for two-year-olds at Havana.

◈ ◈ ◈

The well known jockey, W. Buxton, better known on the eastern tracks as Happy Buxton, has signed a contract by which Mr. A. K. Macomber will have first call on his services for 1917. In many instances during the past season Mr. Macomber's horses suffered from bad riders, but as Buxton can ride at light weight, this difficulty will be overcome. This stable also has first call on Jockey Loftus who cannot ride at less than 120 pounds,.and does better at even heavier weight. Little Jockey Phillips will remain with the stable as light weight.

◈ ◈ ◈

The Travery yearlings that August Belmont had shipped over from France this summer and which are now at the Nursery Farm in Kentucky will be wintered at the Palmetto Park track in Charleston, S. C. They will be sent to the latter place before the cold weather sets in and Willie Brennan, foreman for S .C. Hildreth, will have charge of breaking and handling the youngsters. The winter colony at Charleston promises to be even larger than last winter when over 100 horses were stabled at Palmetto Park.

◈ ◈ ◈

Racing will open at Tijuana November 11th and is advertised to continue for 100 or more days. The meeting at Juarez will not open until November 30th and will also continue for 100 or more days. This will carry racing in Mexico over into April and perhaps into May.

◈ ◈ ◈

The champion of the year on the running tracks is Campfire, the two-year-old son of Olambala and Nightfall, owned by H. T. Wilson Jr. Campfire has won six races and been second in nine others, and has $50,035 to his credit. He is one of Olambala's first crop of colts.

◈ ◈ ◈

Matt J. Winn announces that the winter meeting at Juarez will open Thanksgiving Day and will continue for one hundred or more days. The purses will be $300 and the pari-mutuel form of betting will be used.

◈ ◈ ◈

W. H. Shelly, one of the most popular racing officials in Kentucky, has been appointed racing secretary at the Juarez track.

The Early Racing of Two-Year-Olds.

The Jockey Club, of New York, which controls thoroughbred racing on the principal race tracks in the United States, has a rule which prohibits two-year-olds from being raced before April 1st of their two-year-old year. In the days of winter racing in California, the first race for two-year-olds was usually given on January 1st, and the Tijuana management has recently sent a letter to the New York Jockey Club, suggesting that the rule prohibiting racing of two-year-olds before April 1st should not be made to apply to this coast. The well known breeder, Chas. T. Boots of Milpitas, recently wrote to the San Francisco Bulletin as follows in regard to this matter:

San Francisco, Oct. 19, 1916.

San Francisco Bulletin: In Wednesday's Bulletin there appeared an article on the future racing at Tijuana. In that article was a copy of a letter sent to the New York Jockey Club in regard to two-year-old racing, in which was the statement that the Tijuana association was trying to again interest the California breeders and bring the old breeders back.

If the Tijuana association thinks that by racing two-year-olds in January or any other winter or spring months they are going to bring back the old breeders of California they are altogether mistaken, and if they think they will influence the New York Jockey Club to change its rules in regard to early two-year-old racing they are also mistaken.

The only breeders of thoroughbred horses who favor early two-year-old racing are the breeders who are in the game to make money and to make it as quickly as possible. I make this statement without fear of contradiction, and challenge anyone to name a single breeder, not alone in California, but in the United States, who is in favor of early two-year-old racing who is not in it primarily to make money.

It is such methods of racing and betting as advocated by the Tijuana association that brought about the California legislation in 1909 and 1911 that stopped racing on the coast. It has been just such methods that have stopped racing wherever is has been stopped. Men like Capt. C. B. Cassatt, R. L. Wilson Jr., Harry R. Whitney, August Belmont and Mr. Sanford of New York realized where one of the great troubles began and very wisely declared for no two-year-old racing before April 1. If they had adopted the rule of the French Jockey Club, and said no two-year-old racing before August 1 they would have done very much better. But they have made a good start and can rest assured they are not going to change, even though the president of the Tijuana association says he will do as he pleases anyway.

It is just such statements and acts as the above that closed the race tracks in California, and the real lover of the thoroughbred knows that what closed the race tracks is not going to open them.

There are many in California who are anxious to see the thoroughbreds once more on the tracks, but are not anxious enough to see them if they also have to see all the evils of the track in operation once more.

If California could only have some commission to regulate horse racing such a condition of affairs would not be possible at our doors. For the bringing back of the breeding of thoroughbreds and the preservation of what are left on the coast it is to be hoped the next legislature may enact some protective laws.

Yours very truly,

CHARLES T. BOOTS.

Last Coin, which was recently purchased by McKinney & Corrigan from James Butler of New York, is to be placed in the stud at Kingston Place, Kentucky. He is now four years old, but has not raced since he was a two-year-old in 1914, in which year he started four times and never was beaten. His first start was at Belmont Park on the last day of racing at that course in that year, and he won so easily as to proclaim himself a speed marvel. Later that season he started three times in Maryland and again won on each start. In his last appearance at the Laurel track, High Noon, his stablemate, ran second to him. At that time the Butler horses were trained by the late "Dick" Benson. While High Noon has gone on, Last Coin has never been brought back to the races, but he is expected to distinguish himself in the stud.

◈ ◈ ◈

George M. Hendrie's Rancher has won more money this year than any other horse owned in Canada, $8,710 being his earnings to date. Thornhill, owned by Messrs. Barry and Starr, of Montreal, is the only other Canadian-owned horse to win more than $6,000, which he surpassed by $1,690. The possibilities of the turf are illustrated by the records of Manokin and Monocracy. The former, a gift to H. G. Bedwell, earned $8,080. Monocracy, a three-legged horse, running in cheap selling races, has won $7,250 since the first of January, and, like Manokin, is still going.—[Tronto Globe.

◈ ◈ ◈

It is one of the anomalies of racing that in England such leading turf men as J. B. Joel and Leopold de Rothschild did not win a race this year until in September at the Newmarket Third Extra meeting. There Mr. Joel's North Star, by Sunstar—Angelic, won the Barton Mills Nursery Handicap for two-year-olds and of the net value of $4,400. Mr. Rothschild's victory came when his two-year-old The Speaker, by Cicero—Keliba, won the Witchford Selling Plate of $1,460 and was then bought by John Day for 730 guineas ($3,700).

The Best Horse John Huggins Ever Saw.

John Huggins, one of the few American trainers who enjoys the distinction of having trained an English Derby winner, was asked the question at New York the other day, "What was the best horse you ever trained?" and replied very promptly: "I haven't any idea, but I can tell you the best horse I ever saw, and that was Persimmon. I have seen many good racehorses, some really great ones, but I have no hesitation in pronouncing Persimmon the greatest of them all.

"Persimmon was a big horse, that is, a tall horse, fully 17 hands high, I should think, but his younger brother, Diamond Jubilee, was considerably stouter for his height. I do not mean to say that Persimmon was slender, much less weedy, but he had long legs and not a little daylight under him. He had a brilliant turn of speed and he could stay to the end of any racehorse distance. There was a very fast colt over there which was afterward imported to this country. I saw him winning at five and a half furlongs or thereabouts, and he looked to be invincible, but I saw him sent out to work with Persimmon one morning for not more than six furlongs, but Persimmon simply lost him right from the first jump.

"I have no doubt that the wonderful successes achieved by Persimmon, Diamond Jubilee and other immediate descendants of St. Simon on the turf have had much to do with the high favor in which the St. Simon strain is held in England, France, America and elsewhere, but, of course, some of the sons of St. Simon have been brilliantly successful in the stud, and that has shown that the value of the strain is persistent. Rabelais, by St. Simon, is one of the great sires of France. Diamond Jubilee is working wonders in South America, and there are successful sons or grandsons of St. Simon in every country where they are breeding racehorses, but the 'St. Simons' are not without their faults (some of them have abominable tempers) and the St. Simon strain is not without formidable rivals.

"I like these lasting and persistent crosses," John Huggins continued. "When they show racing quality in one generation after another, like Polymelus, tracing straight back through good ones to Stockwell, and that Blacklock strain which runs from St. Simon back through Galopin, Vidette and Voltigeur, and Isinglass going right back through Isonomy, Sterling and Oxford to Birdcatcher, it means something."

"The Bend Or strain is one which seems to be steadily coming to the front, and as it constitutes an out-cross with that of St. Simon as well as the Oxford-Sterling-Isonomy-Isinglass family, the latter having only one Stockwell cross through Isola Belle, the dam of Isonomy, the union should be a good one. Polymelus, one of the most fashionable English sires of today, goes straight to Stockwell in the male line through his sire, Cyllene, Bona Vista, Bend Or, Stockwell, with but one intervening cross of Sterling which comes through Arcadia, the dam of Cyllene and the daughter of Isonomy."

Mr. Huggins talked rather conservatively about the two-year-olds which have shown themselves on the American turf during the season of 1916. Campfire and Hourless stood out by themselves, and he would feel doubtful as to which was the better of the two. Both were unquestionably good colts. In the three-year-old division he also was very much in doubt. Friar Rock had run some wonderfully good races, brilliant ones in fact, but he also had run some bad ones. Spur had run a lot of good races and although he had had bad luck at times, he might be rated as a really consistent colt. Star Hawk had run some good races and in the early part of the season some bad ones, but allowance was to be made for him in view of the fact that this was his first year in America.

When asked to put a price on Hessian (son of Watercress and Colonial by Trenton), sire of Boots and other good horses, John E. Madden replied: "I will sell Hessian for the same price that was reported to have been paid for his son Boots, namely, $15.000." Mr. Madden secured Hessian for the very nominal sum of $3,500 at the dispersal sale of James B. Haggin's Elmendorf Stud held last October, and in commenting on his sagacity as a buyer, W. H. Rowe, Registrar of the Jockey Club, said at the time: "John E. Madden did a shrewd thing from a breeder's viewpoint in buying Hessian. Mr. Madden has a number of Star Shoot mares which ought to nick particularly well with Hessian, as in the comparatively near past both Star Shoot and Hessian run into the same family, and an excellent one at that."

◈ ◈ ◈

The stewards at Latonia have refused the further entry of any horses owned by G. L. Strang, or entered in his name. The ruling is based on a printed letter, signed by Strang, in which he says he has the betting privileges on these horses and requesting the man to whom it is addressed to place bets with him. Strang admitted that it was his signature and the stewards questioned him no further. Horses affected by the ruling are Samuel R. Meyer, Rhyme and Jane Straith. Strang is part owner in the horses Deliver and Chief Brown, and they probably will be sold at auction. as Trainer Will Perkins is interested in them.

◈ ◈ ◈

Seven favorites won at Latonia one day last week and the price against each horse was less than even money.

Harness Horses and Horsemen

Home From the Grand Circuit

T. D. Sexton, the popular building contractor and amateur reinsman of Oakland, returned last week from a three months' trip across the mountains, during which time he took in nearly every meeting on the Grand Circuit, and got a view of harness racing that he will never forget. He saw all the great stakes trotted and was present every day of the Lexington meeting when so many records were broken. He witnessed the driving of Geers, Cox, Murphy, Rodney, Valentine, Childs and all the other celebrities, but says that none of them have anything on W. G. Durfee whose string of trotters got off when it struck a hot wave immediately on arrival at North Randall. He saw Lee Axworthy take the world's stallion record and says the son of Guy Axworthy is a most wonderful trotter, but is a small horse, not over 15.1 and weighs less than 900 pounds. Mr. Sexton wanted to buy a Gen. Watts colt to bring back to California, but said the prices were a little too high for him. While at Lexington he visited all the big stock farms in that vicinity, saw Peter the Great 2:07¼, now the sire of fifty 2:10 performers, also went to Walnut Hall farm and saw what he called a perfect horse and horseman's paradise. He attended the Kentucky Sale of trotters at Lexington and when he saw the good California trotter Geo. Hammett (3) 2:15¼ going for a song, put in a bid for $225 and got him. He turned the horse over to W. G. Durfee who will probably race him next year. Mr. Sexton is a native of California and this was his first trip east, but he enjoyed it so much that he says he would like to repeat it another year and have Future Tramp 2:09¼ and one or two more racing in his colors in some of the important events. He fully realizes that it takes a high class horse in perfect condition to win on the Grand Circuit, but that the quality of the sport is so high that a real good sportsman can enjoy it even though he does not win regularly. He says that Will Durfee is very popular with the horse owners and trainers all along the line and that were he to locate over there he could get all the horses to train that he could possibly attend to.

Nellie Coovert Will Visit Hal Paxton.

C. A. Harrison, of Seattle, made a deal with Hunt Spar of Aurora, Oregon, whereby Mr. Harrison was to select a stallion to suit Mr. Spar's great brood mare Nellie Coovert 2:15¼. This mare is the dam of Gray Ghost 2:11¼, and also of Hal Grey 2:08, both by Hal B. 2:04¼, and she is by Touchet 2:15, son of Altamont and the great brood more Tecora. Mr. Harrison has selected as a sire with which to mate Nellie Coovert, the stallion Hal Paxton 2:06¼. This horse is not only a very handsome individual but he is fast and game. At Centralia he was a dead lame pacer yet he went out and won over a field of classy pacers such as Zombrino, Hal Edo, Indian Hal and others in 2:09¼, 2:09½ and 2:09¾, and at Yakima put in a heat in 2:06¼. At Salem he was still lame yet he was right up on the leader and winner in fast time, so Mr. Harrison thinks he should produce well with such a good mate as Nellie Coovert. The mare has not been bred for the past three years, her last foal being a gray colt now three years of age. Harrison went out and saw this colt and he looked so good that he bought and paid for him and closed the bargain for the breeding of the dam before ever leaving the pasture. This three-year-old is by Hal B. and is now at Sacramento in charge of J. B. Stetson. His name will be Grey Hal, and every horseman in California will hope that he will be a two-minute pacer while Mr. Harrison owns him.

Death of Mrs. Millard Sanders.

The many friends of the well-known trainer Millard Sanders will regret to learn that his wife, Ida Fox Sanders, died three weeks ago at the home of her sister at Stockton. Mrs. Sanders had been in poor health and her death came sooner than expected, but her husband, son and other near relatives were at her bedside when she passed away. Mrs. Sanders was a devoted wife and mother, and a woman of noble character. The sympathy of everyone who knows Millard Sanders, the famous trainer of champion trotters, or his estimable son Millard Sanders Jr., will be extended to them in their great affliction.

Horse Show to be Held at Oakland.

The success of the saddle horse show at the State Fair last year has led to the Pacific Coast Five Gaited Saddle Horse Association making arrangements with the Idora Park management in Oakland by which a horse show will be given at that popular park next year directly after the California State Fair. Idora Park has all the buildings and other accommodations necessary for the holding of a first class horse show and we do not doubt but one can be arranged that will be the biggest drawing card ever secured for that place of amusement. The prizes will be not only numerous but generous and there will be a big entry list to a certainty.

California Horseman Praises Inter-Mountain Circuit.

Mr. L. L. Cannon, of Penn Grove, Sonoma county, who while looking after the affairs of a large farm, finds time to act as President of the Sonoma County Driving Club and have a few horses in training, has just returned from a trip through the Inter-Mountain Circuit, and paid the Breeder and Sportsman a visit this week. Mr. Cannon admits that he and one or two more Californians entered their horses on that circuit in the hope of winning easy money, but found that the game was much harder than they expected. But while the trip was not profitable in a financial way Mr. Cannon returned with nothing but praise for the way the circuit and the racing was managed by Mr. Joseph Waddell, of Baker, Oregon, who was the circuit secretary. Seven of the eight meetings on the circuit were financially profitable and rain prevented the other from being so. The entry lists were very large at every meeting, there being over thirty entries in many of the races. The Inter-Mountain Circuit was not an easy one to organize and manage, as there were places where the shipment from one place to the next was 300 miles. Mr. Waddell made a success of it, however, and every horse owner and trainer who raced there is loud in his praise of the way the races were managed. Mr. Waddell went clear through the circuit and acted as the manager of the race program at each place. He thoroughly understands the game, which is one of the reasons for his success, and he knows how to arrange programs to please the horsemen as well as the public. Mr. Cannon is certain that if California could secure the services of such a man as Mr. Waddell a circuit of twelve or fifteen meetings could be arranged that would attract a bigger list of entries and result in better racing than this State has seen in years. Mr. Cannon suggests that California should have an early spring circuit of races for small purses and a summer and fall circuit for larger purses that would be held in connection with the annual county fairs. He states that there are many horses in Sonoma county that will be put in training if a California circuit can be announced by January 1st, but that otherwise some will never see a race track.

Woodland Will Have Meeting in 1917.

Several thousand dollars is to be spent in improving the old Woodland Stock Farm property, including the famous race track of this city, says the Woodland Democrat. Charles F. Silva, the present owner of the property, and Lon Daniels, trainer of Silva's horses, returned to Sacramento Friday evening following an inspection trip over the farm to determine what should be done to put the property in first-class condition.

Among the improvements decided upon will be the repairing of the grandstand and many of the box stalls, and the building of a new half mile track. The racing path will be constructed on the lot within the mile track, which will also be kept in good condition.

Silva and Daniels plan to make the local farm the wintering place for some of California's best racing stock, and have already received assurances that several training stables will be quartered here until the racing season opens next year. Silva and Daniels will bring their own stock here next week from Sacramento.

An effort is being made to stimulate state-wide interest in the trotting and pacing sport, with a view of having races on every available track in California next season.

Silva will begin an early campaign to assure a meeting in Woodland.

Hemet Farm Horses Win Prizes.

The horses from Hemet Stock Farm won about all the prizes in the exhibition classes at the Riverside County Fair this year. Wilbur Lou headed the list and took first prize for stallions four years old and over. The other prizes won by the farm are as follows: Geldings (3 years old)—Don de Lopez, first. Yearling stallions—Sequoia, first; Wilbur Boy, second. Mares (4 years old and over)—Allie Lou, first. Three-year-olds—Gertrude Fives, first; Fiesta Lou, second. Two-year-olds—Zeta Lucile, first; Louise de Lopez, second; Matilda Lou, third. Yearlings—Hemet Queen, first; Edith Carter, second. Sucklings—Wilbur Lou-Zeta W. filly, first. Brood mare with foal at side—Zeta W., first. Best standard bred mare with two or more foals—Zeta W. with Oro Lou, Zeta Lucile with a suckling, first. Best standard bred sire with three or more of his get—Wilbur Lou with Gertrude Rives, Zeta Lucile, Matilda Lou and Sequoia. Best three animals (all standard and registered) produced of one stallion owned by exhibitor—Allie Lou, Matilda Lou and bay colt unnamed. Best three animals, produce of one mare, all owned by exhibitor—Oro Lou, Zeta Lucile and bay colt unnamed.

Get a Peter the Great For a Dollar.

The yearling colt by Peter the Great that is to be disposed of for the benefit of Mrs. Curt Gosnell, whose husband lost his life as the result of an accident this summer, is out of Nell Worthy 2:22, dam of Worthy Prince 2:06¾ and grandam of Bingen Silk (3) 2:07¼, by Axworthy 2:15¼, second dam the great broodmare Nell by Estill Eric, third dam by Embry's Lexington. The yearling is registered as Peter Estill and any person will stand a chance to own him that sends one dollar to the Western Horseman for the Curt Gosnell fund.

Matinee Season Will Close Sunday.

The approaching rainy season has warned the amateur horsemen who race under the auspices of the San Francisco-California Driving Club in this city that dry tracks and clear weather will be uncertain during the next four or five months, consequently Sunday, Oct. 29th has been set as the closing day of the amateur season and a program of four races will be trotted and paced tomorrow in Golden Gate Park as a wind-up. The sport has been excellent during the summer months and many fast races have resulted. The best horses in the club will appear tomorrow. In the free-for-all trot Ella M. R., Harold C., Yoncalla and Minequa will start, and in the free-for-all pace Vera Hal, Bradmont, King Pointer and W. J. K. will be the contestants. There should be just as good racing in these two events as any that has been seen on the California circuit this year, while the 2:12 and 2:18 pacing events should both furnish excellent racing. The events and entries for tomorrow are:

First race, 2:12 pace—Emma M. (William Maclough), Little Jack (G. Conlan), Pointer Belle (J. M. Kidd).

Second race, 2:18 pace—Rosa O. (J. J. Ryan), George W. (J. Burton), Frank N. (L. H. Gielow).

Third race, free-for-all pace—Vera Hal (H. Cohen), Bradmont (R. P. Roberts), King Pointer (H. Campodonico), W. J. K. (W. J. Kenney).

Fourth race, free-for-all trot—Ella M. R. (G. J. Giannini), Harold C. (H. Cohen), Yoncalla (A. Giovanetti), Minequa (M. Ford).

Judges—J. McTigue, F. Lauterwasser and Luke Marisch. Timers—Fred Clotere, J. A. Wilkins and J. M. Kidd.

Now Is the Time to Boost.

The last Pacific Breeders Futurity Stake that closed was the one for foals of 1916. It closed last February with only 71 nominations. If you own a mare that was bred to a trotting or pacing horse this year make up your mind right now that you are going to lend a hand and give the trotting and pacing horse interests a boost by nominating the mare in stake No. 17, which is for mares bred this year. This stake closes December 4th, and if it receives more entries than stake No. 16 it will be a good omen for everybody in the horse business. Let's have 100 mares nominated, at least. That will be an increase of nearly 50 per cent over last year. There must be five or six hundred mares in California that were mated with trotting bred stallions in 1916. It only costs $2 to nominate a mare and the stake is guaranteed to be worth $2500. Now is the time for every horseman to boost.

Nebraska Horseman Buys Demonio Filly.

J. B. Stetson, now at Sacramento, has purchased from C. A. Harrison the bay filly Santa Clara by Demonio, dam Mamie Airlie by Prince Airlie, he by Guy Wilkes, second dam Mamie Comet by Nutwood. Mr. Stetson was acting as agent for Mr. E. D. Gould of Kearney, Nebraska, in this purchase. Mr. Stetson has also purchased for Mr. Gould the bay three-year-old colt Royal Hal by Hal B., dam by Lord Lovelace, second dam a full sister to the once Oregon champion Blondie 2:15 pacing and 2:24¼ trotting, by Lemont, third dam Mollie by Frank Chapman. Blondie had a trial of 2:06¼. Mr. Stetson will winter at Sacramento where he expects to train quite a few horses as well as develop Mr. Gould's colts. He has been a successful trainer and race driver and is a credit to his chosen profession and a good acquisition to any community in which he may reside.

Arion (2) 2:10¾ Was Some Colt Trotter.

This has been a wonderful year for two and three-year-old trotters, but the item that came over the wires the other day to the effect that the estate of M. W. Savage had given to Mr. Lester Witherspoon of Versailles, Kentucky, the 27-year-old stallion Arion 2:07¾, recalls the fact that Arion still holds the world's record of 2:10¾ made to a high wheel sulky when he was a two-year-old. Senator Stanford, who bred him, afterwards sold the colt for $125,000, the largest sum ever paid for a trotting horse. When one considers the difference between the old high wheel sulky and the present day bike, Arion's 2:10¾ in 1891 was certainly as good as 2:06 today.

A. B. Kinney Now Owns True Kinney.

During the recent Oregon State Fair Mr. F. A. Urban, of Seattle, Wash., sold at public auction the beautiful, highly bred and game trotting stallion True Kinney 2:12¼, sire of El Paso (2) 2:18, winner of the Pacific Breeders' pacing futurity of 1916, to A. B. Kinney, formerly assistant to C. A. Spencer at Woodland Stock Farm. Mr. Kinney is now a public trainer at Washington State Fair Grounds, North Yakima, where he has placed True Kinney as a public stallion. It was Mr. Kinney who broke True Kinney for Spencer & Keefer and he bought the horse at a low figure. It is to be hoped that owners of well bred mares in the Yakima valley will avail themselves of True Kinney's services.

Kentucky Two-Year-Olds for California.

Will Durfee has brought back to California the two-year-old bay filly by Manrico, out of Helen Stiles 2:06¼, also the full sister to Manrico 2:07¼, which is the last foal of the great brood mares Silurian. Both are the property of Mr. E. T. Barnette, breeder of Manrico, Virginia Barnette and others.

Notes and News

Lon Daniels will train the Silva horses at the Woodland track.

◈ ◈ ◈

Eastern secretaries are already claiming dates for next year and some of them are announcing purses.

◈ ◈ ◈

Seven different trotters took records below 2:05 during the Lexington meeting.

◈ ◈ ◈

Mabel Trask leads all money winners for 1916 with $33,720 to her credit.

◈ ◈ ◈

Zomrect 2:03¾ is the fastest trotting stallion ever bred in California and also the fastest of the get of Zombro.

◈ ◈ ◈

Tommy Murphy leads all drivers for 1916 with winnings of over $80,000, while Walter Cox is next to him with about $75,000 to the good.

◈ ◈ ◈

Lee Axworthy trotted the last three quarters in 1:30 when he pulled a wagon to the world's record of 2:02¾.

◈ ◈ ◈

They are now looking for the dam of Saint Frisco 2:03¼. Her name is Clara Cantrill, but who owns her at present is not known to the public.

◈ ◈ ◈

Who can guess what Guy Axworthy 2:15¼, sire of Lee Axworthy 1:58¼, will bring when he goes under the hammer at the Old Glory sale in November?

◈ ◈ ◈

Ed Geers has a yearling colt by San Francisco 2:07¾ out of a mare by The Spy (son of Chimes) that he bred himself and thinks a good deal of.

◈ ◈ ◈

Twelve head of hunters imported from England and sold at auction in New York week before last realized $16,595, an average of $1383.

◈ ◈ ◈

Look out for the young Teddy Bears. The youngsters by this son of Del Coronado are most promising.

◈ ◈ ◈

Zombro Clay 2:09¼ is one of the 2:10 class trotters that is expected to trot several seconds faster than his present mark next year.

◈ ◈ ◈

There is just one way to have a real revival in trotting horse affairs in California and that is to organize and announce a circuit for 1917 and do it as soon as possible.

◈ ◈ ◈

A Lexington turf writer says that Peter Billiken 2:06½ might just as well be called the "meat horse." He was bred by Hart Bros., is owned by Warren Bacon and is trained by J. W. Liver.

◈ ◈ ◈

Lady of the Manor 2:04¼, once the champion pacing mare, is dead at the age of 22. She produced six pacers with standard records and three of her sons are producing sires.

◈ ◈ ◈

Contention B. 2:10, the pacer by Copa de Oro that Will Durfee took east with him, was sold to W. J. O'Neil of Pittsburg and has won several races since on the half mile tracks.

◈ ◈ ◈

Will Durfee expects to reach Phoenix this week or next. He has been making the journey from Lexington to Arizona by easy stages, stopping off at different places to rest the horses and see the sights.

◈ ◈ ◈

◈ ◈ ◈

If you are interested in live stock insurance you should read carefully the advertisement of the Hartford Live Stock Insurance Co. on page 2. This is a thirty million dollar company and it pays its losses promptly.

◈ ◈ ◈

Lee Axworthy went marching through Georgia, or rather that portion of it on which the Atlanta mile track is situated, in 1:59¾, which is a new State record and one that will hold the "crackers" for a while.

◈ ◈ ◈

Lee Axworthy, the champion stallion, has a record of 2:28¼ as a two-year-old, 2:08 as a three-year-old, 2:03¼ at a four-year-old and 1:58¼ as a five-year-old.

◈ ◈ ◈

Ben Ali 2:10¼ by Wealth, dam by Ulmar, second dam by Outcast, will be in Walter Cox's stable next season. He has been a mile in 2:07¼ on a half mile track and is eligible to the 2:13 class. Wealth, his sire, is a son of Gambetta Wilkes.

◈ ◈ ◈

Among the new 2:10 trotters of the season is Miss Bertha Dillon 2:10, a two-year-old trotter. Her sire is Dillon Axworthy 2:10¼ that is by Axworthy 2:15¼ out of the Santa Rosa brood mare Adioo Dillon 2:24¼ pacing, she by Sidney Dillon out of that great brood mare Adioo, next dam the famous By By by Nutwood.

Five hundred horses weighing from 1400 pounds up have been shipped to various points from Klamath Falls this year, by Wells, Fargo & Co., for this company's own use. They were purchased at an average price of $150.

◈ ◈ ◈

A movement has been started among the Kern county farmers to have the Board of Supervisors purchase the grounds of the Kern County Agricultural Society, erect new buildings and provide a first class fair grounds. A bond issue is suggested.

◈ ◈ ◈

Who will get Guy Axworthy and Bingara at the coming Old Glory Sale is a question now widely discussed. Either or both would make a valuable addition to any locality as their services would be in great demand.

◈ ◈ ◈

Ed. Lafferty, former trainer for the Oakwood Park Stock Farm and the Vendome Stock Farm in California, is now a resident of Goshen, New York, and week before last won a race with his trotter Just So, at the Virginia State Fair, the fastest heat in 2:13¼.

◈ ◈ ◈

General Superintendent B. H. Heide of the International Live Stock Exposition, Stock Yards, Chicago, Ill., calls attention to the fact that entries close on Dec. 2 and all indications are that it will be the largest and most successful event of the kind ever offered.

◈ ◈ ◈

There will be a payment due January 1st on foals of 1916 that are nominated in the Pacific Breeders' Futurity for foals of this year. Better get your weanlings named in that stake up and look them over now, then see that they get good care and plenty of feed this winter. A well developed colt stands a better chance to win a stake than a stunted or half-starved one.

◈ ◈ ◈

Wonder if there was anything the matter with this yearling. His sire is Moko, his dam is Markala 2:18¼, dam of Walnut Tree (2) 2:10¾ by Peter the Great 2:07¼, and his second dam the great brood mare Nancy Hanks 2:04, once champion of the world. Yet the yearling sold for $130 at the Lexington sale. And the very next yearling sold, a colt by Peter the Great out of a mare by Adbell, brought $1100.

◈ ◈ ◈

Jim Logan 2:01¾ looked so well and seemed to be in such good shape when Elmo Montgomery was ready to ship to Bakersfield that the latter reconsidered his intention to retire the old horse and took him along with the other Logans, Hal and Lock, to the metropolis of the oil district. Jim started in the free-for-all pace on Thursday, won two heats and paced a dead heat with A. B. C.

◈ ◈ ◈

The five-year-old Hackney stallion Irvington Sunbeam was purchased last week by William Ziegler Jr. of New York for the purpose of showing this high going and fine acting stallion at the National Horse Horse Show in Madison Square Garden. $5,000 was the sum paid for the horse to W. D. Henry, of Pennsylvania, his breeder. Mr. Ziegler will change the stallion's name to Master Mariner.

◈ ◈ ◈

Says the American Sportsman: "At the recent examination of our 1916 list of new 2:10 trotters, we found that the sons of Axworthy (3) 2:15½ lead, with ten; the sons of Bingen 2:06¼ and McKinney 2:11¼ with nine; the sons of Peter the Great 2:07¼ with two. Grandsons of Bingen 2:06¼ also sired five new 2:10 trotters and four new 2:10 pacers. The above figures are given from a list not as yet complete.

◈ ◈ ◈

That Wilkes Brewer 2:08¼, by Nutwood Wilkes 2:16½, is by far the most remarkable trotter that has raced over the half mile tracks, is shown by a summary of her races this year, she having won eleven straight races, most of them stakes of $1000 or more. She beat 2:10 over six different half mile tracks, a feat which has never been equaled. She should prove a wonderful mare on the mile tracks next year if she retains her form of this season.

• • •

There was a race at Rockport, Ohio, recently in which there were twelve starters, and in the auction pools every horse was sold separately. One ticket was as follows: Shipmaster $80, Baby Bertha $25, Mary Coastman $25, Mary Rosalind Parr $25, Queen Hal $20, All Wilkes $18, Black Ball, Zuila Zoo and Kate McKinney, each $10, Cliff Moquette $8, Hal Leaf and Mischief, each $5, making a total of $241. Baby Bertha won, making the ticket win $216 for $25.

◈ ◈ ◈

The race program of the Kern County Fair at Bakersfield opened on Wednesday of this week. Mono Ansel won the 2:20 pace, with Lock Logan second, Silver Tips third, Julia M. fourth and Jim Donnelly fifth. The best time was 2:12¾. Bon Cres won the 2:15 trot with Columbia T. second and Harold C. third.

On Thursday, Jim Logan won the free-for-all pace, A. B. C. second, Teddy Bear third and Vera Hal fourth. The best time was 2:15. The 2:12 trot resulted in Miss San Francisco and Dick W. standing the same in the summary at the end of the three heats, consequently both winning the same amount as it was a three heat race. Eloise Dell won a heat but was withdrawn after the second heat. Dr. S. was also a starter. Best time 2:24½.

Dr. Cecil Corwin, who has a lease of the San Lorenzo track, would like to interest horsemen in that place as a training or racing plant. The track is a half mile oval and could be made a very fast one for summer racing. There are about 20 box stalls. The electric line between Oakland and Hayward passes the entrance gate.

◈ ◈ ◈

The fair grounds and mile track at Woodland, Yolo county, California, now owned by Chas. Silva, the well known horseman, are to be improved in many ways. There are only about 55 acres in the tract and this has always been found too small to accommodate the live stock and other exhibits when a fair was held, owing to so much of it being taken by the mile track. Mr. Silva now proposes to construct a half mile track, which will allow plenty of room for cattle sheds and exposition buildings, and a high-class fair ground can be made of the property. There is no better point in California for a county fair on first class lines than this Woodland plant.

$50,000 HORSES NOT RARE.

Ten trotters and about the same number of runners have been sold in this country for $50,000 or more, and of this number two trotters and two runners have realized $100,000 or more. Rock Sand holds the record, August Belmont having received $141,000 for the famous English thoroughbred when he went to France. For St. Blaize, imported by Mr. Belmont's father, $100,000 was paid at auction by Charles Reed, of Gallatin, Tenn., and this is the American record for horses under the hammer. Meddler brought $72,500 at auction and Watercress $71,000 when the late J. B. Haggin's stud was sold at Van Tassell & Kearney's about ten years ago. Hamburg was sold for $70,000, Hermis for $60,000 and Sir Martin for $55,000.

Arion 2:07¾ ranks as the highest priced trotting horse ever sold, J. Malcolm Forbes having paid Governor Stanford, of California, $125,000 for him shortly after he set the record for two-year-olds at 2:10¾, in 1891. Axtell 2:12, the colt that lowered all records for trotting stallions when three years old, was sold for $105,000 by his breeder and trainer, C. W. Williams, in 1889, to a syndicate headed by W. P. Ijams, president of the American Trotting Association. When A. H. Moore, of Philadelphia, purchased Director 2:17 from Monroe Salisbury of California, in 1892, it was said he paid $75,000 for the fifteen-year-old stallion, then in the limelight as the sire of Directum 2:05¼, and Direct 2:05½.

The highest price ever realized for a trotting horse at auction was paid by H. S. Henry, a Philadelphia amateur, for the California stallion Anteeo 2:16¼, sold by S. A. Browne, of Kalamazoo, Mich., in 1891, for $55,000. Mr. Browne had previously sold Bell Boy 2:19¼, a four-year-old son of Electioneer and Beautiful Bells, for $51,000 at auction. This was in 1889. The buyers were G. M. Hopper, of Unionville, Ohio, and Judson H. Clark, of Elmira, N. Y. The horse was burned to death shortly afterward. Sold privately for $50,000 by L. J. Rose to W. S. Hobart, both of California, in 1889, Stamboul 2:07½ probably would have been added to the list of horses that brought $50,000 under the hammer if his record had not been questioned on the eve of his sale in New York soon after Mr. Hobart's death, in 1892. As it was, E. H. Harriman paid $41,000 for him.

Quite as notable and remarkable as the sale of Arion for $125,000 when coming three years old was that of Peter the Great 2:07¼, last winter for $50,000 when he was twenty-one years old, no other horse of any breed in any country having commanded such a sum at such an age. S. A. Fletcher, the Indianapolis banker who bought him from W. E. D. Stokes, is said to have "won him out" in one season at the stud, reports from Kentucky stating that more than one hundred mares were bred to him this year, largely by artificial impregnation, at a fee of $1,000.

William Simpson, of New York, gave $50,000 for McKinney 2:11¼, then the leading sire of 2:10 trotters, when he was seventeen years old. C. K. G. Billings is believed to have paid a little more than this to the estate of the late August Uihlein, of Milwaukee, for The Harvester 2:01, then holder of the record for trotting stallions, but the exact price was not made public.

The only trotting mare ever sold for $50,000 was Hamburg Belle, conqueror of Uhlan 1:58, in the fastest race on record. H. M. Hanna, of Cleveland, paid this price for her between heats to John E. Madden, of Lexington, Ky. It is well known that William H. Venderbilt could have sold Maud S. 2:08¾, in the heyday of her fame for much more than the price paid for Hamburg Belle, but he preferred to let Robert Bonner have her at his own price, which was voluntarily fixed at $40,000.

No other horse than a trotter or a runner ever realized as much as $50,000 in any part of the world, so far as is known, though the Clydesdale draft stallion Baron o' Buchlyvie came close to this mark when offered under the hammer in Scotland to close a partnership a few years ago. One of the partners bid $47,500 for him, and made money by the seemingly extravagant investment, it has been said. A one-half interest in Carnot, a French Percheron draft horse, was sold last winter for $20,000, which is the record for this breed. English hackneys, Kentucky saddle horses and French coachers have sometimes changed hands at prices running into five figures, but nothing like $50,000 or even $25,000 is known.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Hunters Kill Rare Animal.—Freestone, Cal.—A party of Sebastopol business men consisting of H. S. Swensen, Sam Creek, Frank McDonald, Alvin Harrison and George Pease, motored to the Gerald O'Farrell ranch, near Freestone, Sunday, and all shot the limit of quail. Mr. O'Farrell said that the reason they all shot the limit was they got the right dope from George Pease.

There was some great excitement during the afternoon when Mr. Swensen shot what he thought was a cottontail; but when examined by the party they found it resembled a large wood rat more than it did a cottontail. After holding a consultation over its body for about one hour they decided it was an animal supposed to be extinct for hundreds of years, but very common in the days of our antediluvian ancestors. Mr. Swensen took the strange animal home to have it stuffed, and will then present it to the Smithsonial Institute at Washington, D. C.

Shooting From Motor Boats.—Deputy Fish and Game Commissioner William R. Malone arrested fourteen men for shooting ducks out of power boats in Bear Valley on opening day.

Complaints have been frequent that shooting at big bands of ducks from outboard motor boats, driven full-tilt, "sput-sput," right into them, had alarmed a thousand ducks for every one shot, and spoiled the sport for everybody last year. The Federal courts have held that any boat not anchored or moored is in motion, and the intent of the power-boat law plainly was to prohibit shooting ducks from any boat with power in her. It is to be enforced with that understanding by the Fish and Game Commission.

Redheads and canvasbacks are coming early into Bear Valley, another sign of an earlier winter than usual. Good shots can kill a limit of ducks morning and evening and catch a trout limit in the middle of the day. One doesn't need to be much of a fisherman to do that nowadays, so hungry are the four-pounders in the cold water.

Tuna Club Awards Prizes.—President J. A. Coxe of the Catalina Tuna Club has announced the prizes awarded the winners of the different events during the summer tournaments. To N. A. Howard of Piedmont goes the honor of hauling in the biggest fish during the summer, having snagged a giant bass weighing 493 pounds.

Following are the different events and their winners:

Tuna—A. W. Hooper, Boston, 109 pounds.

Swordfish—H. R. Johnstone, Hamilton, Mass., 363 pounds; Dustin Farnum, New York City, 322 pounds; W. C. Boschen, New York City, 316 pounds.

Spearfish—J. A. Wiborn, Avalon, first of season; J. W. Jump, Los Angeles, smallest of season.

Giant bass—N. A. Howard, Piedmont, 493 pounds.

LIGHT TACKLE CLASS.

Tuna—Ben Williams, Los Angeles, 55½ pounds.

Yellowtail—R. M. Putman, Fullerton, 39½ pounds.

Albicore—Shelden A. Wilber, Los Angeles, 36 pounds.

White Sea Bass—A. E. Eaton, Avalon, 41 pounds.

Air Gun vs. Wild Cat.—That an air gun, even though it be one of the "pump" variety and looks like a real, sure-enough rifle, has not sufficient "punch" to bring a wild cat out of a tree is the statement of Robert Hughes, aged 11 years. While hunting on the shores of American Lake near Tacoma with Mortimer Wright, a boy of the same age, they ran foul of a wild cat. That is, the dog that accompanied them did, and Mr. Wild Cat ascended a tree.

"Just wait till I get my old gun to working," said Robert, after his knees had stopped knocking together. He was not afraid, but this was the first time he had been in the presence of "big game."

"Buck fever" of a violent sort resulted in four clean misses before he finally got the gun trained at the wild cat.

"Sssspit!" went the air gun, and the dust of the cat's side was kicked up enough to show that a hit had been scored.

"Sssspit!" replied the cat, laying back its ears and showing its teeth just like a regular feline.

"I got the range now," said Robert; "now watch me bring that old tiger down."

Although several more hits were made, the only effect was increasing irritation on the part of the cit.

"We don't seem to be getting along at all," complained Mortimer, who had a desire to see if he could not bag the game. "Let me take a whack at it."

Mortimer also scored some hits, and by this time the wild cat was thoroughly peeved. Were it not for the decidedly active presence of the dog, the cat would have doubtless descended and sent the boys about their business.

"I'm going to get a gun that will bring that old wild cat out of that tree," said young Hughes, after 50 rounds of ammunition had been used with no effect. "You stay here and keep him treed and I'll get a gun."

He failed to find a gun himself, but Prof. D. W. Finch of the Lake City school replied to the S. O. S. signals of the boys and brought down the cat with a single shot from his rifle. Now the boys are trying to devise some way in which the skin can be equally divided that it may be retained as a trophy of the chase.

The wild cat had been seen frequently near the Lakeside Country Club of late, where it had been stealing chickens. It was killed not more than 100 feet from the clubhouse.

BRITISH COLUMBIA FIELD TRIALS.

San Francisco Dogs Carry Off Honors, Melrose Dude and Boy Being Winners.

San Francisco dogs were to the fore in the Ladner field trials being held by the British Columbia Field Trials Club, Melrose Dude, owned by A. G. Wilkes of San Francisco and trained and handled by the Delta Kennels, winning first in the All-Age stake, and Boy, owned by Mr. Scott of San Francisco, winning first place in the Shooting Dog stakes.

The day was a much better one for running the dogs than either of the previous days, and the dogs performed in perfect style. There was an abundance of game, and those present were treated to beautiful displays of bird dog form.

Six dogs in all ran in the All-Age, the first series of which was begun on Friday, with 16 dogs running. Of the six left, Melrose Dude got first place, Florette, owned by the Delta Kennels, got second, and Mr. C. Cocking's Count was third. Both second and third dogs ran fine races and well earned their places.

There was a large entry in the Shooting Dog class, and the competition was so keen that third money had to be divided between Lassie of the Delta Kennels and Mr. Wilson's Queen. Mr. C. E. Godson's pointer, Shotover, gave Boy, the winner, a hard race and was placed second.

Whether the championships would be run had not been decided, but field trial club officials were of the opinion that the requisite four entries would not be forthcoming and that the class would not be represented at this year's trials. If the entries are sufficient, however, there may be a championship race later.

Club officials have every reason to be optimistic after the very successful trials just run. Entries in all classes were numerous, and the competition and interest was strong from the very first race. A large number of local owners were induced to enter their dogs for the first time, and gained many good ideas on the way a dog should behave in the field, whether their entries won prizes or not.

Dogs of War.—Charles D. Muller, a London live stock buyer who is now in this country, says that it is almost impossible in England to get hold of dogs that may be regarded as of the "middle class." Mr. Muller speaks very interestingly of matters pertaining to the dog and war. He declares that bulldogs and those of the smaller breeds are the only ones available because they are not suitable for use on the battlefields.

"But try to get hold of Airedales, sheep dogs, and such," said Mr. Muller, "and you will have trouble. The dogs that are left in England of the kinds used on the battlefields are very scarce and high priced. They are bench show dogs that cost too much for soldiers to have. But even the ranks of the highly bred dogs are more or less depleted, because very often some patriotic rich fancier will give a regiment his dog, or perhaps three or four dogs, considering that it is better for his pets to be striving for glory in the great war than for 'tin-cups' at the shows.

"The bulldog is very fortunate, because though considered a fighter, he really is not, at least not on the battlefield, being too clumsy, short-winded and delicate, catching cold very easily and getting tired when on long hikes.

"It's a fact, nevertheless true," concluded Mr. Muller, "that conditions in London are such that if an able-bodied, long-legged animal is seen on the streets people remark as to the reason he has not gone to the war. He is considered almost as unpatriotic as a man who would refuse to enlist to fight for his country."

Preserve for Marin County.—Stretching from the southern end of Woodacre to the northern boundary of Mill Valley, and comprising all of the northern watershed of Mount Tamalpais, a great game preserve will be located shortly in Marin county, if the plans now under way succeed.

If the Fish and Game Commission decides to accept the offer, and it looks upon it with great favor, a bill will be introduced in the next legislature creating the preserve, providing for its policing, and making it a felony to use firearms within the boundaries.

FISHING SEASON OVER IN THE SOUTH.

Water Is Full of Phosphorus and Cool Weather, A Two Reasons for Early Closing.

Fishing in salt waters is over for this year, so fa as Southern California is concerned. Such is th opinion of the experts who have been out during th past two weeks. The first week of this month foun the fish biting fairly well and all were predicting late season, but now no fish are being caught at al

Two reasons are given for this shortage, the mai one being that the water is full of phosphorus. an the other is the cool weather. The one that is reall causing poor fishing is the phosphorus, which i heavier now than it has been for the past fiftee years. Generally the red phosphorus comes in du ing the months of June and July and then stays awa for another year. This year the usual heavy pho phorus came in during the expected months and the disappeared. Now it is back again worse than eve

The peculiar part about the phosphorus at presen is that instead of being red it has blue mixed with i C. J. Lenarth, who is one of the best known angler in the Southland, and who has fished in souther waters for the past sixteen years, predicts some kin of an unusual season. Never before has he seen th phosphorus so thick. It appears almost heavy enoug to cut with a knife. The mixing of the red and blu phosphorus is said to be a most beautiful sight an thousands of people have just gone to the beache during the past week to see it.

When the phosphorus comes it always means poo angling, for the fish are almost the same as lifeless They float around in the water just like they wer dead. During the past week a number of angler have gone out. J. Oscar Lane and a party of fou went out in a boat and spent a whole day afte yellowtail. They could see the fish floating aroun in the water, but did not get a single strike.

The fish just float around close to the surface an do not even make an attempt to swim unless scared Of course the phosphorus came at a time when i did not affect fishermen much, for the season is prac tically over, but the old timers predict that it wil drive the fish away and if it continues so thick wil kill many of them.

* * * *

With the end of the 1916 fishing season at han many people are wondering if is was more successfu than in past years. At the start the season was no so good, but after the first two months of what i termed the fishing year better angling was neve had in the Southland. Up to three weeks ago an angler who went out had no trouble in landing fish.

Of course the big fish, yellowtail, albicore and bar racuda have not been so plentiful this year. There are many different reasons given for this deficiency but the main one seems to be on account of the com mercial fishermen.

J. Howard Smith of the Southern California Rod and Reel Club gave out a list of the largest fish which were registered by the Southern California Rod and Reel Club members this year. Smith thinks this was one of the best seasons the Southland has ever had and sincerely hopes for an even better one next year.

C. J. Lenarth is the yellowfin champion of the Rod and Reel Club. During the year he has registered fifteen yellowfin with Secretary J. Howard Smith. The largest fish, and one that captured the club prize, weighed 4 pounds 8 ounces, while the second largest yellowfin tipped the scales at 3 pounds 14 ounces. No one came within five ounces of getting a fish as large as Lenarth's. He caught all his large yellowfin at Holton Station, which is his favorite fishing haunt.

C. Van Benthuysen will capture the prize for the largest corbina caught. He landed a 6-pound 13-oz. beauty at Melrose. The closest fish to this mark was landed by Jo Lensfield; it weighed 6 pounds 5 ozs. A. W. Dunn had the third largest corbina, which weighed 6 pounds 4 ounces.

Blanche Mills, who is a member of the Southern California Rod and Reel Club auxiliary, caught the largest yellowtail of the season. It weighed 22 pounds. F. A. Perkins has the largest black sea bass recorded. It was caught at Catalina and weighed 204 pounds. He also landed one that weighed 179 pounds.

James J. Jump, who is recognized as one of the best anglers in the South, and who has fished in all the waters of the Pacific ocean, has the largest swordfish recorded to his credit. The fish weighed 201 pounds. He also caught the largest leaping tuna, which weighed 35 pounds 8 ounces, and the largest bluefin, which tipped the scales at 96 pounds 8 ozs. Jump landed all these large fish at San Clemente island and Catalina.

Gus Lobos gets credit for landing the largest albicore of the year. His fish weighed 23 pounds 6 ounces. He also had the second largest, which weighed 22 pounds. Frank Kling landed the biggest spotfin croaker, which tipped the scales at 8 pounds 3 ounces. Charles King had the second largest, 7 pounds 11 ounces. R. P. Caufield has the largest baracuda recorded. His fish weighed 8 pounds 15 ounces.

F. A. Perkins has the largest rock bass recorded and it weighed 6 pounds 9 ounces. The only eel caught during the season was by Sherman Baker and measured 34 inches.

Of course this season does not close until the last day of October, but from present indications few fish will be landed from now until that time.

TRAPSHOOTING SECOND ONLY TO BASEBALL.

Cost of Grand American Nearly Equal to That of the World's Series.—Big Events of Sportdom.

You've read all about the "world's baseball series" in your favorite newspaper and of the vast amount of money that was turned over each day by the "fans" to witness these contests. The receipts ran about $65,000 daily.

But this is only a portion of the money that was spent during the series. There were the special trains for the baseball players, magnates, both big and little, newspaper men and rooters, and the hotel expenses of these and other thousands. Considered from all angles it is the biggest and most costly of American sporting ventures.

Americans are madly interested in baseball. It is a "cradle to grave" game. Everyone plays, or knows of, it. Therefore, it is the National Pastime. Thirty years ago if you had ventured the prediction that baseball would enjoy the popularity it does today you would have been greeted with much laughter.

This preamble brings us to the real meat of this story, yarn, or whatever you may choose to term it. I want to tell you, and briefly, too, of a sport that is second only in importance to baseball—a typically American sport—trapshooting.

Like baseball it has its world's series—the Grand American Handicap and Tournament. In a way this is just as big an event as the baseball world's series, and the cost of the tournament pretty nearly equals the cost of the baseball classic.

There were 619 men and women, boys and girls, shooting in the recent Grand American. They came from every State in the Union and from Calada. It is safe to say that it cost each one at least $100. That makes $619,000—and that is a low estimate. Shooters who entered in every event paid nearly $100 in entrance fees, and there were many of them.

The purses aggregated more than $15,000, of which the trapshooters put up about $10,000. There were 227,250 targets thrown during the tournament and an equal number of shells were fired. Figuring at the rate of seven cents for each and every shell and target the cost would be $15,907.50 to the trapshooters.

These figures give you an idea of just how important a sport trapshooting is. There isn't another sport where the competitors have so much money at stake. In baseball the player never takes a chance. Trapshooting is growing faster than baseball. Five years ago there wasn't 100,000 trapshooters in the United States; now there are more than 500,000. Five years from now trapshooting will be just as big a sport as baseball is today.

Far be it from me to venture a prediction as to how big a sport trapshooting will be a decade from now. It is growing too fast for predictions. It is a sport that will not fall back, for nearly all those interested are competitors. No one remains in the role of a spectator any great length of time. It is called the "sport alluring." It is. You can't watch a tournament without becoming a "gun bug." It's great sport. Some time when you have the opportunity, go to a gun club and see for yourself.—Peter P. Carney.

Seattle Association.—Only a few of the trap artists turned out to the Harbor Island grounds on October 15, the foggy weather undoubtedly being the cause of the small attendance. The blue rocks, however, loom up as large as cartwheels in this thick atmosphere and the shooters received some very nice targets.

C. E. McKelvey took the honors in both the 50-target and 100-target programs with 47 and 95 broken targets to his credit.

Tom Wilkes ran McKelvey a very close race in both programs, being just one target under McKelvey's scores in both events, and standing second in the list.

After a long obsence from the game, John Considine appeared at the "posts" and did some very good shooting. H. E. Gleason shot on the grounds for the first time this season. A shooter who has showed consistency and much improvement since starting the "sport alluring" and who made a fine showing by "going" 25 straight is C. W. Bandy.

The "chicken shoot," as planned by the Seattle Trapshooters' Association to be held on their grounds Sunday, October 29, is causing considerable interest among the gun "bugs." The club has planned a series of month-end feature shoots during the winter. This is the first. The scores:

At 50 targets—C. E. McKelvey 47, Tom Wilkes 46, John Considine 44, Harry Williams 43, Ralph Kinzer 42.

At 100 targets—C. E. McKelvey 95, Tom Wilkes 94, Harry Williams 88, John Considine 86, Ralph Kinzer 85, C. W. Bandy 47x50, W. B. Taft 40x50, H. E. Gleason 28x50.

Elmer E. Shaner in Accident.—Elmer E. Shaner, the tournament manager of the Interstate Association, and the man ho has built up trapshooting to its present high state, had a narrow escape from death when his auto, which he was driving, recently, went through the side of a bridge, hurling out Mr. Shaner and its occupants. Mrs. Shaner was severely hurt, suffering a broken pelvis. Mr. Shaner's father also suffered severe injuries to the side, leg and eye, but neither is in any serious danger. Mr. Shaner escaped without a scratch, as did Miss Bambis, his stenographer, the fourth occupant of the machine. Mr. Shaner was on his way to his farm near Butler for a week-end visit and was driving carefully on the muddy roads. In making his way down a hill to a bridge crossing a small run, the car refused to respond to the wheel.

Registered Tourneys on Coast.—A. W. ("Pop") Bruner, founder of the Vernon Gun Club and southwestern representative of the Peters Cartridge Company, left last week on a business trip through Arizona and New Mexico. He announced before leaving that a series of registered trapshooting tournaments will be held in the principal cities of the Cactus State and will be wound up by a registered shoot at the Vernon Gun Club in Los Angeles next month.

The gun club at Ray, Ariz., will hold its affair on November 9 and 10. A shoot at Phoenix will follow on November 13, 14 and 15. This will be the Arizona State tournament. It is expected that the entire squad of star shooters of Arizona will then turn their way to Los Angeles to compete in the Vernon competition, the dates set for November 19, 20 and 21.

Advertising the Northwest Shoot.—Imagine a mammoth cloth sign 10 feet long and 3 feet wide, with green and white letters 10 inches deep on a white background. Imagine the sign reads:—

NORTHWEST SHOOT.

June 4-5-6-7, Portland, Ore.

$850 in cash added to purse. $2500 in trophies.

Then imagine shipping this sign around the Northwest from shoot to shoot, so that hundreds of sportsmen had an opportunity of reading it. Could there be a more effective manner of advertising a shoot?

This was the plan followed by the Portland Gun Club. The sign was displayed at Spokane May 7-8-9-10. At Albony, Oregon, during the State shoot on May 14-15-16. At Chehalis, Wash., May 20, and at Seattle during the State shoot May 21-22-23-24.

The entries in the Northwest Shoot numbered 102, a fine showing in that western country, where long distances prevail, and equal to double the number in the middle West and East.

Little Danger at Traps.—With the hunting season at hand and its innumerable accidents caused generally through ignorance of the handling of firearms, it is pleasing to recall that there has not been a fatal accident in the history of trap shooting for the past 11 years. When it is considered that a half-million trap shots compete each season and in that time fire at millions of targets the absence of fatalities in this sport is positively amazing. The answer is not hard to find. In trap shooting the contestants are first taught the safe and proper method of handling firearms and they have it so thoroughly impressed upon them, and their future conduct is so finely hedged in by the necessary restrictions that it would be difficult indeed to bring about a situation that would lead to a trapshooting fatality. When it is considered that the gun and shell contain elements of the gravest danger the absence of fatal accidents in trap shooting speaks wonders for the mental control that the sport imparts to its devotees.

Admission Free to Trap Shoots.—While the baseball fans solemnly declare that they will forever shun the bleachers at major league games unless the admission price is reduced to "two-bits" and then walk right up to the ticket window and shell out 50 cents, gun bugs pursue the "even tenor of their way" witnessing their favorite sport without cost, for be it known, there is never any charge made for entrance to a shootfest.

In discussing this phase of trapshooting, a well-known sportsman remarked: "Jmagine the baseball barons announcing that no charge would be made for admission to the World's Series! Yet, this is precisely what the Interstate Association does when the Grand American Trapshooting Handicap is staged for the 600,000 trapshooters in the United States, for the G. A. H. is the 'World's Series' of this great American sport.

"Think of being admitted free t oa nevent in which more than 900 amateurs and nearly 100 professionals take part! Or imagine seeing, without cost, the champions of 44 States shoot for the national amateur title. What other sport can show such a spirit of liberality to its followers and friends? I'll tell you, trapshooting has it on them all."

Accidents Are Few.—Despite the crowd, casualities have been very few, and the percentage would indicate hunting to be one of the safest sports that men play instead of the popular conception of a hazardous diversion.

Criminal carelessness in allowing loaded guns to point at things they are not intended to shoot at accounts for all accidents, and observance of the simple rule never to allow a muzzle to line up with anything not to be killed will avoid all accidents.

Handicapping or classifying shooters is probably more difficult than rating athletes in any other line of sport. The margin of difference between the performances of even the best shots is so much greater from week to week that it is absolutely impossible to always properly rate the men. Therefore trapshooters should have a little patience and not complain so bitterly every time a mistake is made in handicapping.

PACIFIC COAST TRAP SHOTS RANK HIGH.

Unofficial Averages Show That Seven Amateurs and Four Pros. are in List.

Seven amateurs and four professionals represent the Pacific Coast in the official averages of the Interstate Association based on the marks made in registered trapshooting tournaments up to October 1, as compiled by "Sporting Life." Only the records of those who have shot at more than 2000 registered targets have been announced.

Only two other amateurs in the United States have shot at more registered clay birds than Oswald Newton Ford, of San Jose, Cal., who had 4710 "rocks" thrown to him up to October 1, breaking 4470 for an average of .9490. J. F. Dodds, of San Diego, Cal., has shot at 4380 and averaged .9384, while N. A. Howard of Piedmont, Cal., has broken 2683 out of 2950, for an average of .9125.

Peter H. O'Brien, Oregon State champion, of the Portland Gun Club, has shot at 2150 and broken 2003 of them for a mark of .9316, and Charles A. O'Conner of Spokane, Wash., is credited with a mark of .8565, because he smothered 1713 out of an even 2000 targets.

A. W. Strowger, president of the Portland Gun Club, is the only other Oregonian outside of O'Brien in the coveted 2000 class. He had 2150 released to him, but he managed to see only 1754, for an average of .8158. Frank M. Troeb, the Vancouver, Wash., amateur, who made such a remarkable showing at the Grand American Handicap at St. Louis, Mo., last August, shot at 2550, broke 2334 of them and registered .9153.

Among the Pacific Coast professionals, Peter J. Holohan, of Portland, averaged .9346 out of 3150, while Hugh E. Poston, of San Francisco, with 3007 broken ones out of 3150, averaged .9546. Les H. Reid, of Seattle, Wash., smashed 2291 out of 2400, for an average of .9545, while Frank C. Riehl, of Tacoma, Wash., broke 2051 out of 2200 for a mark of .9322.

Once a Trapshooter Always a Trapshooter.—At the twenty-third Montana State Shoot held in Deer Lodge, Mont., the last week in June a special feature was the shooting of a number of men who participated in the first State Shoot 23 years ago. The old-timers were E. S. Paxson, Frank Conley, John Bielenberg, Nick Bielenberg, J. F. Cowan, C. H. Smith and Sam Baillet, and these young old gentlemen have not forgotten how to break clay targets, as their scores indicate.

Shooting Paradise for Baseball Men.—A number of baseball magnates headed by Captain T. L. Huston, vice-president of the New York American League Club, have purchased the Dover Hall Club game preserve in Glynn county, Georgia, and intend to spend the greater part of the winter season there shooting and fishing.

Dover Hall is situated on a tidewater peninsula 10 miles by water and 14 miles by land from Brunswick, Ga., and is 17 miles from Jekyl Island. The preserve embraces 2434 acres, all in virgin woodland, heavily timbered, except 200 acres, which are under cultivation. It is stocked with deer, wild turkey, quail, snipe, duck, rail and plover, and is considered the finest game preserve in the South. There are also four miles of oyster beds, plenty of trout, bass, whiting, etc. There is also a safe harbor for yachts.

On days when it will be impossible to shoot in the field, trapshooting will hold forth; in fact, trapshooting will be one of the features of the life at Dover Hall. Several club houses have been erected and individual bungalows have been constructed for many of the members.

Mr. Huston is president of the organization and George T. Stallings, manager of the Boston Braves, is vice-president. A few of the others who will enjoy the pleasures of Dover Hall are John K. Tener, president of the National League; B. B. Johnson, president of the American League; Edward Barrow, president of the International League; Jacob Rupert, president of the New York American League Club; Harry N. Hempstead, president of the New York Giants; John J. McGraw, manager of the Giants; Robert Lee Hedges, formerly owner of the St. Louis Browns; Charles Comiskey, owner of the Chicago Americans; Harry Stevens, Frank Stevens and John Conway Toole, director of the New York National League Club; Robert Davis and Norman Davis, formerly of the Jersey City International League Club; Archie Hurburt, Bud Fisher, the cartoonist, and Irvin Cobb, the humorist.

Big Game Plentiful.—Everett (Wash).—Working at a shingle bolt camp near Silver Lake, Irving Spaulding saw two black bear heave in sight. Spaulding had a rifle with him and bagged one of them.

Bear, deer and goats have not in years been so plentiful and close to Everett as they have this fall. This is explained as being due to the heavy snows of last winter, which remained without melting last summer and prevented the usual crop of blueberries on which bear feed. In the absence of the berries they come closer in to find food. Last week six hunters came in and each had a bear, shot within twenty miles of Everett.

The snow wiped out most of the Chinese pheasants, but native grouse and quail are still quite plentiful.

Sportsmen's Row

See before you shoot. It may be a man.

• • •

Pennsylvania has enacted a law giving protection to the bear. The bag limit is one bear per year.

• • •

Quail are so plentiful in and about Los Angeles that the public parks are becoming brooding places for the birds.

• • •

Wyoming has passed a law prohibiting the leaving in the woods of the meat of elk or deer killed. There should be a similar law in every State relating to deer meat.

• • •

The New York Athletic Club, which does no trapshooting during the summer months, will open its season for 1916-1917 today, October 28, and close it on May 12, 1917. The club will shoot every Saturday and Sunday and all holidays during the season, the shoots on Saturdays to be known as club day shoots. Shooting will start on all days at 2 o'clock p. m. sharp. The Olympic Club of San Francisco, and the other big athletic and social clubs of the Pacific Coast should take up the sport alluring.

• • •

In an effort to make Spokane county, Washington, as popular as Yakima county for Chinese pheasants the Spokane County Game Commission is securing all the eggs available and having them hatched by poultrymen throughout the county. Nearly two hundred Chinese pheasants have been liberated in the county this year and as many more will be turned loose as soon as the eggs now on hand are hatched and the young birds are large enough to care for themselves. "The Chinese pheasant is large and hardy and winters in fine shape," says Al F. Wiseman of the Spokane County Game Commission. "Every year we will receive a number of birds from the state game farm at Walla Walla, but we will not be content with this supply. We plan to buy all the eggs that are offered for sale and turn them over to farmers who are interested in game propagation for hatching. The birds are as easily raised as tame chickens."—[Game Enthusiast, Spokane, Wash.

• • •

The annual show of the Airedale Club of America will be held Saturday, December 2 at the McAlpin Hotel, New York. Theodore Offerman will be the judge. Last year there were 149 dogs comprising 204 entries and there is hope that this will be exceeded this year. It is promised that there will be more than $1,000 in cash and plate offered this year.

• • •

Hunters and residents of the Salmon Mountain country report inroads upon the deer by Coyotes, the prospectors about Know Nothing Creek, near Gilta, reporting having found dozens of deer skeletons. Even through the summer months the coyotes have been busy and it is not unusual for hunters to hear the cry of the deer when caught. Bucks are caught most frequently, as the does do not stand at bay.

• • •

A shipment of 35,000 small rainbow trout, first of a consignment of 200,,000 given the Reno Commercial Club and the Nevada Fish and Game Commission by the Government, has been planted at the Verdi hatchery by Secretary Raymer of the Commercial Club and Commissioner J. P. O'Brien. After they become acclimated they will be placed in the Truckee river.

• • •

John Berrick, Bill Young and Bob Brown, well known Los Angeles sportsmen, have just returned from the T. C. Erringer ranch, near Piru, each bringing the limit of quail, while they report jackrabbits and sage bunnies in abundance. The boys were royally entertained by Orville Erringer to game dinners and some exciting sport, trapping coyotes, etc., this country abounding in wild animals. Now that coyote skins are bringing $8 this is not only good sport but remunerative as well. Several bobcats were seen and, as reported by Bill Young, one large mountain lion. Since the recent rains Mr. Erringer's large fruit orchards are beautiful and thriving, which bids fair to produce a large crop next year.

• • •

Returning from the Nisqually flats after a day of successful shooting, a party of nine hunters declared they had never seen such a variety of ducks on the flats. In the party were George Scoville, H. F. Bartlett, J. A. Pritchard, N. Mills, George Kern, E. McMasters, Edward Zaugg, Toney Beherns and Carl Coon. This party killed 50 ducks and made the trip to the flats on the launch LaThea, under the command of Capt. Mart Gismervig. "I never saw so many kinds of ducks in one place," Carl Coons said, "but it proved rather hard picking for the hunters. There were mallards, sprigs, teal, widgeon, bluebills, butter balls, canvasbicks and mud hens galore. We left the municipal dock Saturday at midnight and got in at 8 o'clock."

• • •

Two dozen desert quail from the Coachella Valley have been placed on Mt. Rubidoux in Riverside county by Recorder Logan. There are 500 valley quail on the mountain now and they consume over 100 pounds of wheat fed to them each month. Desert quail are discouraged wherever the better valley bird can live.

Close to the bodies of eight prospectors found near Matheson, Ont., during the recent forest fires was the body of a large bear with its paw up as if it had been clawing the air. Nearby a moose was found dead . A prospector who was able to escape from another part tells of a wildcat which came and rubbed up against his legs in friendly fashion and lay down beside him while it rested and took breath.

• • •

One of the best equipped parties that has left San Francisco this season "for the wilderness" started last week for Mendocino and Humboldt counties, intending to go from there into Oregon. Of the party were Dr. George M. Chase and wife, Leo Bibo and Christian Holtumn. With them they took rifles, guns and fishing tackle galore, there being a gun for almost every kind of game likely to be encountered and a hook for each kind of fish. The party will be gone a month and perhaps longer.

• • •

Crawfishermen who couldn't wait until October 15, but desired to stock up in advance at the State's expense by setting traps before the law allowed, have had a hard time of it lately. Last week Deputy Pritchard smashed up fifteen traps near San Pedro, and Sunday, Deputy Barnett wrecked all the traps he could find near Ventura. So the fishermen who thought to "steal a march" on their competitors cheated themselves out of their equipment, and must begin late. Waiting would have been better business.

• • •

Clarence Nauman will not attempt to race quail any more after the experience he had during the week. He was driving Newton H. Neustadter's machine from a hunt in Santa Clara county when a traffic cop hauled him in. Clarence explained that he had been chasing elusive and speedy quail all day and had lost his customary idea of distance and speed.

Game Raised in Washington.—H. Rief, Game Warden, King county, Wash.: "We have up to this time reared 1,920 birds to a good size. I am advised that the State Experimental Station at the penitentiary at Walla Walla, Washington, has reared 1,828. Most of these birds were liberated before they reached maturity. They are all ringnecks.

In addition to the number above mentioned, the county department has raised some 50 or 60 Prince of Wales, a number of Reeves, Golden, Silver, Green and about one dozen California Valley quail. We are not in the quail business this year, and the lot which are mentioned herein were wished on us. Next year I believe that our game farm will branch out into quail propagation."

New Regulations for Alaska.—The Secretary of Agriculture has issued the following amendment to the regulations for the protection of game in Alaska, with the object of protecting moose and mountain sheep on the Kenai Peninsula and adjoining region in Alaska:

"The sale of carcasses or parts thereof of moose and sheep in the region south of latitude 62 degrees north and between longitude 141 degrees west and the western outlet of Lake Clark in longitude 155 degrees west; or the shipment of carcasses or parts thereof of said animals for sale from Anchorage, Seward or other points on the Kenai Peninsula, is hereby prohibited until October 1, 1918, and no carcasses or parts thereof of said animals shall be accepted for shipment to other points in Alaska unless accompanied by affidavit of the owner that they were not purchased and are not intended for sale."

N. W. Inter-City Fly-Casting.—Walter F. Backus of portland was the prominent figure in the first intercity fly and bait casting tournament held by the Seattle club at Woodland Park, on October 15th. The tournament, which is the first of its kind ever held there, was a big success.

Thirty entries from the Northwest and Seattle took part in the meet, in which Portland, Tacoma and Seattle were the principal participants.

The Multnomah angler was the star caster with three out of five firsts. John Monette, of Seattle, led in the bait events, taking first in the accuracy and the distance. R. S. Hays was also a winner.

The tournament was a preliminary affair to the big Northwest event, which will be held in Seattle next summer. The scores:

Half-ounce accuracy bait—Monette, Seattle, 97 per cent; Bailey, Tacoma, 96 8-10 per cent; Nason, Tacoma, 97 7-10 per cent; Flammant, Seattle, 96 per cent; Allen, Seattle, 97 10-15 per cent; Conway, Seattle, 97 3-15 per cent.

Accuracy fly—Backus, Portland, 99 10-15 per cent; Hayes, Seattle, 98 10-15 per cent; Fredell, Seattle, 98 3-15 per cent; Hutchinson, Tacoma, 98 10-15 per cent; Allen, Seattle, 97 10-15 per cent; Conway, Seattle, 97 3-15 per cent.

Quarter-ounce accuracy bait—Nason, Tacoma,98.6 perecnt; Monette, Seattle, 96 per cent; Hutchinson, Tacoma, 93.4 per cent; Bailey, Tacoma, 92.8 per cent; Bryant, Seattle, 92.5 per cent; Backus, Portland, 92 per cent.

Distance fly—Backus, Portland, 105 feet; Hayes, Seattle, 85 feet; Bailey, Tacoma, 81 feet; Farr, Seattle, 78 feet; L. F. Hayes, Seattle, 78 feet; Fre-dell, Seattle, 75 feet.

Half-ounce distance bait, average of five casts—Backus, Portland, 133 feet; Monette, Seattle, 132 feet; Bailey, Tacoma, 130 feet; Shaffer, Seattle, 123 feet; Gilkey, Tacoma, 109 feet; Flammont, Seattle, 100 feet.

PLENTY OF QUAIL, BUT HARD TO FIND.

Bird Is Smartest of Feathered Tribe and Fool Many of the Hunters.

Sacramento, Cal.—The fact that very few qua hunters returned with the limit after the first shoo ing of the season has created an impression amon many that the birds are scarce. This, Deputy Fis and Game Commissioner George Neale wishes t dispel, as he declares that the foothills are fairl alive with the birds.

The California valley quail is not only the games little bird on wings, he says, "but is also one of th smartest of the feathered tribe. It takes an experi enced hunter and a crack shot to outguess and exac toll from them. The man who imagines that it i only necessary to walk out among them and tak the limit has a rude awakening when he puts hi theory to the test.

"Early in the season he may be able, if he is tha sort of a 'sport,' to pot or 'ground sluice' one or two that is, if he plays Indian and sneaks up on a unsuspecting bunch, but once they get to cover, an that is where they go without lingering to say good bye, the inexperienced hunter might just as wel save his time and energy.

Plenty of quail but few if any limits are the re ports. Later in the season, when we have had goo rains so as to enable a dog to work, and the leave are off the trees, then you will hear of more limits and more satisfactory quail hunting.

Duck hunters—but only in certain sections where there is plenty of water and where the birds were bred and raised—had satisfactory shoots. There is an abundance of home-bred birds in California this year—all kinds of them, but they will stay on the home grounds until the rain storms scatter them The storms will bring the northern bred birds, and if all reports are true, they will be here this year in amazing numbers.

There is almost as much science in hunting ducks as there is in hunting quail. To be a successful duck hunter you must know their habits; feeding grounds; how to make a blind; how to arrange your decoys; how to call the birds, or "talk to them", and a thousand and one other things. A wild duck is as wary and suspicious as a pawnbroker. Let him get an idea that there is something wrong and he is not coming anywhere near you, and you have to be mighty cute to keep him from thinking that something isn't wrong.

Upland hunters report seeing or killing very few cottontail or brush rabbits, and many came home with the impression that there are few of them to be found, but this is probably accounted for by the bright moonlight nights just now, when the rabbits feed at night and hunt close cover for sleep during the cold hours of early morning.

S. F. Fly-Casting Scores.—The "regulars" made up the squad that represented the San Francisco Fly-Casting Club at Stow lake Saturday and Sunday. Many members were absent, but those who put in an appearance found casting conditions excellent. Saturday a light southwest wind prevailed, but on Sunday the weather was clear, with no wind. As a result, good distance casts with salmon flies were made.

Colonel Burgin made a cast of 137 feet, the best of the day. S. Forbes came second with a toss of 128 feet. The results of the Saturday and Sunday casting follow:

SATURDAY.

O. C. Johnson of Lindsay, who is lying in the sanitarium suffering from a double bite from a rattlesnake, remains without much change in his condition. Johnson's pulse is still very low. When he was bitten, his brother who was with him, tied a bandage very tightly around his leg to prevent the poison spreading. Johnson removed this bandage himself some time after the wound had been cauterized in Corcoran, allowing the poison to spread and aggravating his condition.

DUCK AND QUAIL SEASON OPENS GOOD.

Hunters Have No Complaint About Their Luck; Dos Palos Ships Out the Most Birds.

The duck and quail season is now two weeks old and the hunters have no serious complaints to make. Quail have been hard to bag but they are plentiful and the scatter-gun artists are counting on better luck later on. Ducks have been bagged at points about the bay but they are not flying up in the rice fields as yet. It will take a heavy rain to improve the sport inland.

Dos Palos is credited with being the best hunting spot for ducks so far. Last Sunday, for an example, 800 birds were shipped from the San Joaquin Valley, according to a statement made to the Fish and Game Commission by Wells, Fargo Express Company. From Sacramento valley 120 were shipped. The express companies are compelled under the law to keep track of the shipment of dead game.

Of the 800 ducks from the San Joaquin 330 came from Dos Palos. Shipments from other towns in the San Joaquin, such as Firebaugh and Mendota, were nowhere in comparison with Dos Palos. And, the records show, the beating administered by Los Palos to other localities in number of ducks shipped is nothing new or novel. Every season, every week, every Sunday Dos Palos ships more ducks into San Francisco than does any other locality.

Now the question arises: Where is Dos Palos? A locality that ships more ducks than any other in the State is certain to be claimed and made much of by the county in which it is located.

But there's the rub. Dos Palos as a hunting ground is in three counties. Part of it, and probably the biggest part, is in Merced county; but it extends into Fresno and Madera counties. Each county can claim a slice, while Dos Palos itself, through its Chamber of Commerce, can swell up and invite the State's sportsmen to come and visit the swellest, finest, ideal happy hunting grounds of California.

Hunting around the bay Sunday last was very good, and particularly so in the district of Alvarado, Alameda county, ten members of the Pastime Club getting as many limits. One member, in fact, became over-enthusiastic and killed twenty-seven, for which he has been cited to appear in court. E. L. Hogg was one of several who obtained limits in the Suisun marshes, and S. M. Burlew, H. Smith and J. C. Wilson were others.

While the birds were still plentiful and a few limit bags were shot Sunday, duck hunters report that they had to wait longer and work harder for good results than on opening day. Not only are the birds said to be flying high, but great flocks of them cling to the middle of the bay and it is impossible to approach them. A good, stiff wind of a day or two would drive these flocks, which number far into the thousands, to the bay edges, breaking them into smaller flocks and making the shooting better.

• • •

Marty Egan and Louis Ratto picked up some stray birds about Mount Eden, managinfi to fill up their duffle bags.

• • •

G. A. Hebgen, M. W. Sexton and B. Sawden each brought in a limit bag from the Chiquita Club in the Suisun marsh.

Los Angeles, Cal.—One week of the big hunting season for Southern California has passed, and during this opening week reports of good duck, quail and rabbit hunting have been brought into Los Angeles by the thousands of hunters who have journeyed out.

On the opening day there was too large a crowd out hunting to make it comfortable for any one. The crowds of hunters were so numerous and created so much excitement that the duck shooting has been nothing wonderful since, although the birds are known to be there.

But hunters have refused to worry as yet. All who have gone out have gotten some game, even though it was only one bird or one cottontail. The damp foggy weather which the Southland has had during the past week is ideal for ducks. With the exception of stormy, rainy weather it is the best to hunt in.

The best duck-hunting weather is when it is raining or when it is cold and the wind is blowing. One thing that makes the hunting so good on the lakes or on an open stretch of water is that the ducks like to get out where there is plenty of wind.

For quail it is different and also for rabbits. A fairly warm day with sunshine seems to suit the rabbits and quail best, for it is upon these days that most of them are shot. Quail will be numerous all this season. Such is the opinion of all the old-time hunting experts, who have made a study of the hunting conditions.

Early rains have started the grass growing on the mountains and many of the quail have gone to the high regions. But they will not stay there all the time. Later they will come down to the lowlands and feed upon the grain and other birds will then fly to the mountains. This assures the hunters of a continual new supply of quail all the time.

Duck hunting will be better than ever in another month when the heavy rains start in the north. The ducks are not usually so numerous during the early part of the season, as they are now, but the early rains have caused some of them to come south. Soon as the heavier rains start more ducks will start coming southward, and then hunters can begin looking for some of the best shooting that has ever been had in the section.

Of the local shooting places the district around Los Alamitos, Sunset Beach and other southern lowlands seem to be attracting the largest crowd of hunters. Here ducks have been shot all week long and still they are coming in.

CALIFORNIA RIFLE SHOTS WIN HONORS.

[By E. C. Crossman.]

State Camp (Fla.), Oct. 23.—When the last bullet of the last string of shots at the 1000-yard range went hissing up the cold head wind to the dim target in the great national individual match Monday, A. L. Thomson of the Los Angeles Rifle and Revolver Club was found with a strangle hold on fourth place out of the 933 sharks entered. Also, the estimable Mr. Thomson had gathered in $65 and a gold medal, presented to the fourth man in the match.

Not until Spencer, another civilian shot of the Mound City Rifle Club of St. Louis, had fired his last shot, a five, on the faintly-lighted target, was the result of the match determined. A slip on his part would have put the Los Angeles man and the two men in second and third, above his total, but he came through with 274 in fiendish conditions of light and wind, while Thomson, with a 269 out of 300, apparently good for first, had finally to take fourth.

The great shoot breaks any records in this country for men entered, nearly 1000 riflemen facing the targets, and a cold head wind that brought tears to the eyes, and still more when the scores were posted. Each man fired twenty shots rapid fire, at 200 yards, twenty shots at 600 and twenty shots at 1000 yards, no sighting or trial shots allowed.

The high, cold wind, the fag end of the storm on the lakes, put many a shark shot on the slide in the rapid-fire stage, which is shot in the kneeling position, while more grief came at the 1000-yard range, where bullseyes and misses alternated.

In the first 20 men out of the aforesaid 900 odd, C. T. Blank of San Francisco and Pritchard of the same town, both men fellow-members of the California Civilian Rifle Team with Thomson, landed eleventh and thirteenth, with 268 each, which also carried with it a gold medal and $30 cash. Tuesday morning the team match for the team championship of the country starts at 7 a. m., twenty-five civilian teams of twelve men each and thirty-six militia and service teams in the first shoot ever opened to the civilian rifle shots.

The California civilian rifle team, composed of men from the Los Angeles Rifle Club and the Olympic Club of San Francisco, has taken eight places in the first thirty-five in the aggregate of the association matches, and fourth, eleventh and thirteenth in the greatest individual shoot ever held in this country. "Here's to California."

A Story of a Robin.—I was experimenting last year with a new and very early strawberry, which began to show color as early as the twenty-eighth of May. I had only a few plants and allowed but few berries to mature.

A pair of robins had built a nest in the top of a large honeysuckle vine surrounding my piazzi, and in due time hatched out their little ones. My attention was frequently called to them, not only because of the number of insects the old birds were constantly bringing to the nest, but the peculiar cry of the little ones made as the old birds approached the nest with food, sounding as though they said, "It is my turn next," interested me.

Awakening a little earlier than usual one morning, I determined to devote an hour to discovering just how many insects the old birds brought to the nest during that time. Imagine my surprise when I counted no less than forty-six, consisting of a large, white caterpillar, a few white millers, and a soft, quite large worm, that looked in the distance like a cutworm. Not a particle of vegetable matter of any kind was taken, although a half-acre of strawberries was only a few feet away. Before feeding the worm the old bird always stopped in a gravel path near by, held it in its claw, pulling it through with its beak and breaking it up, so that when it was fed it was soft and limp.

Now the summer days are long, and yet I never passed that nest but that I could hear the cry for more, and see old ones coming and going, always with an insect of some kind. Imagine the number of insects that pair of birds destroyed in those long summer days! The loss of my few strawberries was nothing compared with the gain from the destruction of insects. I enjoyed my hour of study of those industrious little harbingers of early spring, and I must agree with the American Game Protective Association that "the extermination of the insect-eating birds will prove a detriment to the fruit-growers in the long run."

Mr. Townsend, who subscribes himself "farmer and fruit-grower," in submitting his little story, gives us its interesting history, which is as follows:

"This little story of the robin was written fifteen years ago, at a time when the farmers of New York and New Jersey were trying to get passed a law giving farmers the right to kill robins found on their premises. A legislator of New Jersey told me this story defeated the bill."

HISTORY OF LAST ELK IN STATE OF UTAH.

Head Is Recovered After Lying at Foot of Pine Tree For Thirty Years.

Probably there is not an elk head in Utah with a more unique history and few handsomer ones than that in the possession of W. J. Seely, deputy state auditor.

For thirty-two years the head lay at the base of a pine tree, marking the place on East mountain, Emery county, where fell the last of the herd of elk that ranged the mountains east of Sanpete county when the pioneers came.

The animal was shot in the fall of 1881 by Mr. Seely's father, Justus Wellington Seely II, a resident then and now of Castle Dale, Emery county. Mr. Seely has kept as a souvenir the huge slug that he fired int othe body of the elk from a rifle of old-time pattern. The bullet was found just under the skin of the animal on the opposite side of the body from the point of entrance. One shot was sufficient.

Dressing the carcass, Mr. Seely stood the head, with its spreading antlers of a dozen points, up against a pine tree. With the assistance of J. H. Wilcox and C. E. Larsen, also settlers of Emery county, he loaded the meat of the elk on two pack mules and took it into the valley, where the hamlets of Orangeville and Castle Dale were just beginning an existence. The meat was distributed among the settlers.

Three years ago the head was recovered by J. W. Seely, Jr., of Castle Dale. He found it, from directions given by his father, just where it had been left more than a fourth of a century before.

It in turn was placed upon a pack mule and taken down into the valley, then shipped to Salt Lake to Mr. Seely of the state auditor's office.

Some trouble was encountered in getting the skin of a head that would suffice for a covering, so large was the ancient skull. One was finally obtained from near Yellowstone National Park and mounting of the historic head was possible. Upon seeing the completed head, Mr. Seely felt amply repaid for his trouble and expense. It does not look as if it had lain for more than thirty years at the foot of a pine tree o na mountain top.

Mr. Seely, who shot the animal, is now 66 years of age. He was born in Salt Lake City in 1847, of pioneer parents. He was a pioneer of Castle valley and an Indian war veteran. He is a brother of John H. Seely of Mt. Pleasant and of Orange Seely of Castle Dale, after whom the nearby town of Orangeville was named. He weighs about 100 pounds less than his brother, Orange, who feels in the best of health at 285 pounds.

That the elk killed by Mr. Seely was probably the last of the herd that ranged the mountains between Sanpete and Emery county when the settlers first moved in has been made apparent from the fact that none is known ever to have been seen there since that time until the mountains were recently restocked by the state. The immense size of the animal is credited to the fact that of all the herd it alone had possessed the speed and sagacity to persist after all its fellows had been either shot by hunters or pulled down by the mountain lions that were numerous in the section at that time.

Shoots "a Duck a Minute".—Hall McAllister, ex-Supervisor of San Francisco, returned the first of the week from a record duck hunt in the Suisun marshes. McAllister celebrated his fifty-fifth birthday by bagging the limit of twenty-five ducks in twenty-five minutes.

The blind was reached a few minutes before 6 o'clock Sunday morning, and at exactly 5:50 o'clock McAllister opened fire. At 6:20 he had bagged his limit, which brings the time to approximately a duck a minute. The birds were shot one by one, no flock shots being taken. McAllister started shooting ducks on the Suisun marsh in his fifteenth year, back in 1876. His shoot Sunday was his fortieth season on the marsh.

The other members of the Cordelia Club and guests that bagged limits were: James Otis, Louis Weinmann and W. Hoag.

Game Deputies Appointed.—Results of the recent examination for deputy fish and game commissioners was announced as follows by the civil service commission:

Los Angeles Diserict—C. C. Brenner, Desconso; W. A. Weymouth, San Diego.

Sacramento District—J. H. Sanders, Truckee; E. W. Bolt, Gridley; R. E. Ludlum, Los Molinos; W. B. Pendleton, Loomis; C. M. Blodgett, Sacramento.

San Francisco District—E. V. Moody, Santa Cruz; F. B. Nesbitt, Salinas; H. S. Prescott, Crescent City.

California Rifle Team Wins.—Jacksonville, (Fla.), Oct. 24.—The California National Guard team with 2923 points out of a possible 3600 was leading the eight teams, which tonight finished the team match of the national board for promotion of rifle practice. The Ohio civilian team was second, with 2880, and the Missouri civilian team third, with 2856.

The remaining five teams which finished shooting today in the fact of a cold, tricky wind, are: Michigan civilian, 2790; South Dakota civilian, 2577; Utah civilian, 2477; Arkansas civilian, 2165, and Florida Military Academy, 1935.

A REWARD FOR MERIT.

Prize Boy Farmers of California Set Forth on Transcontinental Journey.

In quest of new ideas in good farming, the twenty-four champion boy farmers of California have set forth on a nine-thousand-mile journey. They won this month's trip in a special car by defeating eleven hundred competitors in the University of California's annual crop-growing contests for high school agricultural clubs. In reward for such achievements as that of Aubrey Williamson of Brentwood, who netted $95.90 from a single acre of feterita by raising three times as much of this sorghum to the acre as the California average, or Logan Briscoe of Madera, who fed two pigs so that in 210 days they gained 478 pounds, these boys are to be led by Professor B. H. Crocheron of the University of California on a visit to the most famous orchards, breeding farms, and agricultural industries of America, so as to bring back to California the stimulation of knowledge of the best methods in farming in other parts of the country. The University's object is to help train leaders for country life in California.

After attending a two-day State convention at the University of California Farm at Davis, where 350 prize-winners from the boys' high school agriculture clubs of California were present, and spending a day at Berkeley, where the 350 boys were welcomed to the university at exercises in the Greek theatre, taken underground into the university's experimental mine, and to the top of the 300-foot Sather Campanile, the twenty-four champions left Berkeley in a special car. After a daylight ride on Monday, October 16, past Mount Shasta and Mount Lassen, the only active volcano in the United States, Tuesday, October 17th was devoted by their itinerary to seeing flax fields and general farming near Salem, Oregon, and visiting the stock yards in Portland; Wednesday, October 18, to a visit to canneries and the experiment station near Tacoma and the University of Washington at Seattle; Thursday, Oct. 19, to an automobile tour through the Spokane Valley; Friday, October 20, to an automobile ride through the country about Missoula, Montana, and a visit to mines and smelters at Butte; Saturday, October 21, to the journey across Wyoming, and Sunday, October 22, to a trip around Denver and a daylight ride across Colorado.

Monday, October 23, has been assigned to a visit to the Kansas State Agriculture College at Manhattan, and to Kansas City; Tuesday, October 24, to a visit to the Chicago stock yards; Wednesday, October 25, to a visit to Niagara and to seeing the grain elevators and lake shipping of Buffalo; Thursday, October 26, to inspecting factories in Rochester and, by automobile, neighboring fruit districts and the Irondequoit vegetable section; Friday, October 27, to inspecting the works of the General Electric Company at Schnectady and a visit to Albany.

Arriving at Boston on October 27, on Saturday, October 28 they will visit the Fish Pier, the commission district, and other sights of Boston, and go by automobile to Cambridge, Lexington, and Concord.

Sunday, October 29, they will arrive in New York and have a morning visit to the Bronx Zoological Park and an afternoon automobile ride to Grant's Tomb and to Central Park. Monday, October 30, they will see the selling of California fruit in the New York commission district, visit the East Side, and have a theatre party at the Hippodrome. Tuesday, October 31, they will visit the Metropolitan Museum and the American Museum of Natural History, and then go to Plainsboro, New Jersey, to visit model dairy farms and barns. They will spend that night in Philadelphia, and on Wednesday, November 1, see historic sites and make an automobile tour to farms about Philadelphia. Thursday, November 2, they will spend in and about Baltimore, and from Friday, November 3 to Sunday, November 5, they will be in Washington. Monday, November 6, they will visit the Hampton Institute at Old Point Comfort and have an automobile tour about Norfolk. Tuesday, November 7, they will visit Richmond and have a daylight ride across the Valley of Virginia. Wednesday, November 8, they will spend at Lexington, Kentucky, seeing the neighboring stock farms. Thursday, November 9, they will visit Chattanooga, and Friday, November 10, New Orleans. Saturday, November 11, they will see sugar factories and sugar cane plantations near Franklin, Louisiana, and go by automobile through farming country around Lafayette. Sunday, November 12, they will have a daylight ride across Texas. Monday, November 13, they will visit the farm of the University of Arizona at Tucson and inspect great irrigation projects in the neighborhood. Tuesday, November 14, will be spent in seeing citrus orchards and other crops in the region of Los Angeles, where more wealth per acre per annum comes out of the ground than anywhere else in America. Tuesday night, November 14, the boys will scatter to their homes.

In the sale of Blackfaced rams held at Lanark in Scotland recently a new record for the breed was established when Mrs. Waters, Glenample, Perthshire, paid $1,500 to James Clark, Crossflat, for a shearling. The highest price previously was $1,250.

◈ ◈ ◈

The closing-out sale of all the Percherons owned by the late T. A. Shepherd, Pawnee, Ill., on Oct. 5th proved a successful auction and drew bidders from a number of states. The stud sire sold for $1000 and the average for the entire sale was $442.

Horse Breeding in Denmark.

With reference to light horses, the Danish Gov ernment expert reports that during recent yea there has been an improved demand for and sale horses of that stamp which are derived from t United Kingdom and Sweden, also in former yea from Germany, and some are also bred in Denmar a percentage of them being by English-bred sires.

The average price before the war for the Frederi borg horse or Danish light horse was about £40, b it has probably gone up since then under the pre sure of German demand; exact statistics are not yet available. The average prices realized at t chief Jutland foal auctions are quoted at from £ to £25, and such prices show a tendency to increas so that breeders have no reason to complain.

Seeing that most of the horses are sold befo they reach the age of four, full-aged animals a scarce on the market, and they go up to £50 higher. Prices for stud horses are naturally in exce of those quoted and more variable; for a good th oughbred sire, preferably of British pedigree, plen of money is forthcoming. Several horses and mar of that class have been imported into Denmark f breeding purposes, and they have generally do well. The climate seems to suit them all right.—London Live Stock Journal.

Alfalfa Produces Cheap Pork.

"Alfalfa as a feed for hogs will produce more por per acre than any other forage crop grown in Ka sas," asserts Ray Gatewood, instructor in anim husbandry in the Kansas State Agricultural colleg

"By experiments conducted on the college farm says Mr. Gatewood, "it was shown that 170 pound of green alfalfa, cut and fed in a dry lot, was equ to 100 pounds of corn. Six pounds of corn wa necessary to produce one pound of pork, so the 17 pounds of alfalfa produced 16 2-3 pounds of por Estimating that during the season an acre of alfalf will yield 20,000 pounds of green hay, this, if cut an fed green with corn, would make 2,000 pounds o pork. Figuring the pork at 6 cents a pound, it woul mean that an acre of alfalfa was worth $120.

"In an experiment on pasturing, it was shown tha an acre of alfalfa pastured for 163 days produce 591.8 pounds of pork. Care should be taken not t pasture too closely, as alfalfa will not stand heav foraging. It is best to so pasture that at least tw cuttings of hay may be taken off in addition to tha eaten by the hogs."

◈ ◈ ◈

One of the biggest mule sales ever held in th South occurred on Oct. 10th at the farm of Lewi Motlow, Lynchburg, Tenn., 206 head selling for ap proximately $40,000. Some mules sold under th hammer for as much as $560 per span. About 2,00 people attended the sale.

$1.00 NOMINATES YOUR MARE IN

THE WESTERN HORSEMAN

STAKE NO. 11.

FOR FOALS OF MARES BRED IN 1916---FOALS OF 1917

TO RACE AS THREE-YEAR-OLDS IN 1920

A REAL STAKE—A FIXED PERPETUAL ANNUAL CLASSIC

Every Cent Paid in Payments—With Accrued Interest **TO BE PAID TO THE WINNERS AND NOMINATORS IN 1920**

CONSERVATIVELY ESTIMATED VALUE $10,000.00

And If Worth More The Winners Will Get More

$300 WILL BE PAID TO NOMINATORS OF THE DAMS OF THE MONEY WINNERS

Total Cost to Year of Race Only $11.00

CONDITIONS—Open for the nomination of mares bred in 1916—foals of 1917, to close November 1, 1916. A fee of $1 will be charged for each mare nominated. Nominations must be made on or before November 1, 1916, at which time the nominator must give the name, breeding and description of the mare, and the name of the stallion to which she was bred in 1916.

PAYMENTS—On November 1, 1917, a payment of $5 will be due on each foal which it is desired to keep eligible, when color and sex of foal must be given, and on May 1, 1918, an additional payment of $5 must be made on all foals kept good, including substitutes. All payments received up to and including May 1, 1918, will be apportioned 65 per cent for trotters and 35 per cent for pacers. Thereafter, all payments received on trotters will go to the trotting division, and all payments received on pacers will go to the pacing division.

NO ADDITIONAL PAYMENT TILL YEAR OF THE RACE, and not one cent liability at any time beyond the amount paid in or specifically contracted for. On May 1, 1920, the year of the race, a payment of $40 on trotters and $20 on pacers will fall due, and on the first day of the meeting at which it is raced, a starting fee of $100 on trotters and $50 on pacers must be paid.

THE ABSOLUTE GUARANTEE of The Western Horseman Co. is that every dollar received on payments, and every cent of accrued interest (we never use a cent of stake money, but put every dollar out at interest the day it is received), shall go into the stake, and be paid out in spot cash to the winners.

SUBSTITUTION—Any nominator may, up to November 1, 1917, substitute any other foal regardless of breeding, or by whom bred, for the one originally nominated, but only original nominator may substitute.

RACING CONDITIONS—This stake will be raced during the fall of 1920, when nominated foals are three years old, over a first-class mile track, and will be contested under the 1916 rules and regulations of the parent association in which the track holds membership.

MONEY DIVISIONS—The sum of $200 will be retained from the trotting division and $100 from the pacing division, and will be paid to the nominators of the money winners in the same ratio as the purse money is divided, in accordance with the number of money winners.

The total amount received for each division (with deductions noted above) will be divided among the winners in the ratio of 50, 25, 15 and 10 per cent, the usual four moneys. If less than four starters are eligible to the money at the close of the race such part of the stake as remains shall go to the winner. Races best two in three, mile heats. Trotting and pacing horse breeders, both large and small, are cordially invited to consider the liberality of this stake and its absolute equity and fairness and to send their nominations to

THE WESTERN HORSEMAN COMPANY, Indianapolis, Indiana

THE FARM

PRUNING TREES AFTER FRUIT IS OFF.

[From Pacific Rrural Press.]

There is considerably more late te summer pruning of apricots, aches, and prunes, this season than er before. Its maximum benefits ill be obtained by those who pruned rectly after the fruit was off, but seems worth while to do it at any ne now.

Arguments against the practice are at is removes functioning organs eaves) of the tree, starving it to that tent; it opens the inside to danger sunburn; and in some districts it ay help the disease known as apri- t rust.

Arguments for the practice are in neral, that it directs all the energy the tree into the fruit spurs which main, developing them so they can t and mature fruit; it tends to use the leaves remaining, to func- on later in the season, thus making for the loss of those pruned out; prevents waste of plant food in de- loping wood, buds, and spurs which ould be pruned out in winter any- ay.

mong those who practice apricot mmer pruning is G. H. Waters of omona. He wrote us July 22: "I ink I have demonstrated beyond any estion that summer and fall rpuning apricots is much the best. While e crop was very short this year, it as not from any fault of the prun- g, but because of heavy rains we id at the time they were in full oom. Peaches I do not prune heav- in the fall, but usually in January. e are figuring now on pruning apri- ts in August and September."

Another is J. M. McKinnon of Sarata. This is the fourth year he has uned apricots right after the fruit as off; and several of his neighbors sited him this summer to learn and actice his system. He has about o acres of Blenheims 20 years old id 1½ acres seven years old. Since e young trees were later in matur- g their fruit, the old trees had been uned before all fruit was picked om the young ones this season.

From the 3½ acres, he got 16 tons een this year; 17½ or 18 tons last ear; about 23 tons in 1914. The ar before that, the orchard not hav- g been summer pruned, there was ly 11 tons. However, the young ees were too young to bear much at year anyway.

Previous to that, the orchard had en bearing irregularly; and one rner had never borne at all to speak That corner is now the best elding part.

"Since I've been summer rpuning I et strong blossoms and good crops," ys Mr. McKinnon.

The older trees do not grow after ie fruit is off, but the young ones . For this reason, the young ones re pruned later, as the new growth not desired or necessary here. Some its on the young trees this summer ere an inch in diameter.

No irrigation is given in fall, and ie trees have given no evidence of nburn. No fertilizer at all has been iven the apricots.

Peaches and prunes are also pruned ght after the fruit is off, though this so late that the benefit is less no- ceable.

MEASURING HAY IN THE STACK.

Estimating the number of tons of ay in a stack by measuring is often esorted to when it is inconvenient or npractical to weigh it. It is impos- ble to give a rule for measuring hay hich is entirely satisfactory. The fol- owing one has often been used, states rof. E. G. Schafer, of the Washing- on experiment station, at Pullman, nd approximates the correct weight: "Width plus over, divided by four nd squared, then multiplied by the length and divided by 512."

The above rule assumes that the cross section of a stack may be obtained by dividing the width plus over measurement by four and squaring it. Stacks vary so much in shape that this cannot be absolutely true with all stacks. The above rule also assumes that there are 512 cubic feet in a ton. The length of time a stack has been built, the size of a stack or the amount it has settled, also the kind of hay, all influence the weight of a certain volume of hay. The above or other rules should not be relied upon unless it is impossible to weigh hay when it is sold.

Problem—Assume that a hay stack measures 18 feet wide, 26 feet over (distance from ground on one side up over the stack and to the ground on other side), and 30 feet long.

The solution would be: Eighteen plus 26, equals 44; 44 divided by 4, equals 11; 11 squared, equals 121; 121 times 30, equals 3,630 cubic feet in stack; 3,630 divided by 512, equals 7.09 tons.

Pumpkins As Hog Feed.—Pumpkins and squashes form an appetizing ration for fall and winter for young pigs and brood sows.

Hogs that are being fed for fattening purposes should receive all the concentrates they will eat before they are given the pumpkins. When feeding pumpkins, most of the seeds should be removed, because when they are fed in large quantities with concentrates, they have an injurious effect upon the urinary organs.

Pumpkins will take the place of roots in winter and form a succulent food. Their feeding value is not as high as that of turnips or mangels. adjuncts to the more concentrated kinds of foods, but cannot, if fed alone, be depended upon for fattening. Pumpkins, like wheat bran, are useful

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

WINCHESTER

NICKEL STEEL REPEATERS, EXTRA LIGHT

Nickel Steel, which has about twice the tensile strength of the steel commonly used in guns. is utilized entirely in the construction of the Winchester Model 1912 repeating shotgun; and, consequently, it is the lightest and strongest repeater on the market. It is also considered the handsomest. It is made in 12, 16 and 20 gauges, and although on the market but a short time, is now the biggest selling repeater. Get one.

Use *WINCHESTER* "Leader" or "Repeater" shells in Winchester guns, and in guns of any make, as on account of their patented construction and uniform loading they always give the best results. Winchester shells were used by the winner of the Grand American Handicap.

THOROUGHBREDS

Like a blooded horse or a pedigreed dog.. the Remington UMC Pump Gun is trim, clean cut, dependable under every condition. It's thoroughbred from butt to muzzle. If a gun could possess a heritage, the Remington UMC name should represent all that is progressive and modern in gun making—a whole century of experience in manufacture lies back of Remington UMC.

Thousands of critical sportsmen at home and abroad hail Remington UMC as the consummate achievement in arms manufacture.

Your nearest sporting goods dealer will be glad to serve you.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

MONDAY, DECEMBER 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. :-: :-: **$1,000 FOR THREE-YEAR-OLD PACERS**

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

erms—One year, $3; six months, $1.75; three months, $1. oreign postage $1 per year additional; Canadian postage 50c per year additional.

Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

ommunications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ONE MONTH FROM TODAY nominations will lose for the 17th Pacific Breeders' Futurity. When his stake was inaugurated seventeen years ago, the harness horse breeding and racing industry was not n a very flourishing condition in California. It had ot recovered from the slump of 1897 and 1898, when lispersal sales of such farms as the San Mateo Stock arm and others showed that the demand for trotting bred horses was not heavy. Who of those that ttended the sale of the above named farm at San Mateo in 1898 will ever forget how its founder ooked as he sat on the platform and saw his choicest mares going at from $35 to $120 a head, while the oung stallions could hardly attract a bid? Prince Airlie, a finely bred horse that he had selected to ake the place of Guy Wilkes, was knocked down or the insignificant sum of $270 and was purchased by Mr. Gardner F. Williams and shipped to Kimberly, South Africa. The horse business was at a low ebb hen, but many of the colts and fillies sold at that ale for ridiculous prices were re-sold a few years after at a large profit and many of them took low records. Mares that went for a song became great broodmares and their produce brought their owners large sums year after year. About that time there was little harness racing in California and that year but three or four meetings were given in California, the Pacific Coast Trotting Horse Breeders' Association endeavoring to supply a want by giving a three weeks' program of dash racing at Oakland with most disastrous results to the association's treasury. That was the year the appropriations for district fairs were cut off and they have never been renewed since. But as times grew better horse values increased and after a year or two something of a California circuit was arranged by several of the mile track towns holding meetings. Then the Pacific Coast Trotting Horse Breeders' Association came to the rescue and in 1900 Pacific Breeders' Futurity Stake No. 1 was announced. Soon the horse breeding business revived and as the stakes were closed each succeeding year they received from two to three hundred nominations. During the past few years there has been another slump here in California and the last Pacific Breeders' Futurity received but 71 nominations. But there is a rainbow on the horizon of the trotting horse industry and there is every indication of bright sunshine during the next few years with prices much greater than they are at the present time. A good colt that is well staked, that is, has earning capacity, will not go begging when the foals of 1917 are two and three years old. We will have a good circuit of fairs in California by that time. We had a little circuit this year—just a small one—with many intervals and long jumps, but the horse people are demanding a real circuit and they are going to get it. So this is the time to nominate your mares in the futurities. We think there will be a few more nominations than last year, which will show that the business is getting better. We think so because several nominations have already been received. One man that made but one nomination in the last stake has already named four mares in Stake No. 17. And the date of closing is a month off yet. Several others have already made nominations and the indications are that the stake will fill well. So if you own a mare that you believe to be in foal to a trotting or pacing horse, send in her name before December 4th. It will only cost $2 and if you own a mare that you thought enough of to mate with a stallion, you should think enough of her to give her the opportunity to show she can produce a stake-winner. If she has already produced one give her a chance to produce another. Get in and boost the business, if only the $2 worth.

LEADING MONEY WINNERS.

Murphy, Mabel Trask and Miss Harris M., Driver, Trotter and Pacer, Respectively, in the Lead.

As has been the case in several past seasons, Thomas W. Murphy heads the list of winning drivers, while Cox is a closer competitor than the former has had in past years. Murphy's total this year is $1,280 less than he won on the Grand Circuit last year with the world's one-season biggest money winner, Peter Scott, in his string, while this year he drove the fourth, fifth, seventh and ninth biggest winning trotters in the list of twelve and the second best winning pacer.

As a winning driver Cox made a record for himself this season with a total of $73,339 to his credit. This we believe to be the largest amount the New England driver has ever won in one season. This year he won $30,605 more than last year, his total winnings in 1915 being $42,734. The figures show that while the difference between the two leading drivers last year was $40,456 in favor of Murphy, this year it is only $8,571, again in favor of the Poughkeepsie horseman.

Lon McDonald, who holds third position, reached the same figures he won last year, being short only $440 compared with his winnings in 1915. In spite of his retirement from racing twice during the season by accidents and injuries, Pop Geers still holds fourth position in the list, but is short of $9,275 compared with last year. This shortage, however, was practically made up by his horses driven either by Frank G. Jones at North Randall and Detroit and by Murphy later in the season.

Next to Cox, Charley Valentine, the Columbus driver, makes the best showing compared with 1915, as after absenting himself from three meetings—Poughkeepsie, Hartford and Syracuse—he won $8,260 more than in 1915, and stands fifth in the list, while Ben White, next in line, shows an increase of $7,598 over his winnings of last year.

The total amount won by the seventeen drivers listed, was $360,679, or an average of $21,220 each, leaving still quite a snug amount to be divided among others that were only occasional visitors to the big line or carted around horses of ordinary quality.

Winning Horses.

Had the table for winning trotters extended further, there would be another dozen or more that won over $2,000, and a half-dozen at least that reached the $3,000 mark, also pacers of the $2,000 mark. The list of the twenty-four biggest winners given here totals $215,281, or $145,416 less than amounts won by the drivers, showing that as far as performing horses were concerned the distribution of purse and stake moneys were wider compared with the smaller fields of starters almost everywhere than in former seasons.

The dozen biggest trotters took away $144,994, or an average of $12,082, headed by Mabel Trask, who as the season's topnotcher won over $17,000 less than last year's best winner, Peter Scott, showing that at least that much more was distributed among others, and the twelve made a far better winning record than the same number in past seasons.

No pacer reached the $10,000 figure as a winner through the Grand Circuit, Miss Harris H. topping this list with $9,537, while the next in line, Jay Ell Mack, was exactly $2,000 behind. Compared with former seasons, there was a notable reduction in the value of stakes for pacers, the $5,000 events being cut to less than half in number, and there was a general reduction in the early closing events.

The number of sensationally fast pacers down the line this year was a record for the Grand Circuit, while fields in feature events and in many regular classes were so closely balanced that it made money distribution wider than among trotters. The fact that the dozen biggest winning pacers won a total of $70,241, or an average of $5,682 each, showed that a greater number of starters shared in the prizes than formerly, while those that looked like sweeping winners found strong competition.

Following is a list of leading winners in the Grand Circuit of 1916:

Drivers—Murphy, $81,910; Cox, $73,339; McDonald, $30,560; Geers, $28,341; Valentine, $27,965; White, $23,308; Durfee, $14,203; Engleman, $11,284; McMahon, $9,769; Murray, $9,355; Edman, $8,476; Rodney, $7,965; Snow, $7,705; Grady, $7,095; M. Childs, $6,915; Chandler, $6,565; W. Traynor $5,724. Total, $360,679.

Trotters—Mabel Trask, $33,320; St. Frisco, $23,175; Volga, $17,045; The Real Lady $13,662; Expressive Lou, $12,784; Harrod's Creek, $11,284; Azora Axworthy, $7,437; Donna Clay, $6,385; Brisac, $6,223; Bingen Silk, $4,982; Early Don, $4,857; Allie Watts, $3,840. Total, $144,940.

Pacers—Miss Harris M., $9,537; Jay Ell Mack, $7,537; Ben Earl, $7,040; Napoleon Direct, $7,015; Roan Hal, $6,865; Diumeter, $6,852; Single G., $5,894; Young Todd, $5,780; Spring Maid, $3,722; Peter Look, $3,696; White Sox, $3,203; Little Frank D., $3,200. Total, $70,341.

POPULARITY OF SADDLE HORSES.

Reports From Everywhere Show That Interest in Horseback Riding Is Increasing.

The daily papers of Chicago, New York, Boston, Denver, St. Louis, Kansas City and many other points are beginning to have a weekly saddle horse column, and many of them are devoting full-page illustrations to the saddle horse and his owners on Sundays. The publicity thus being given to the sport and recreation of horseback riding is remarkable as it is pretty good evidence that the automobile is becoming passé with a great number of people who can get more real exhilaration and enjoyment out of a saddle horse than they can in sitting back in a deep cushioned auto seat and trying to see the swift passing scenery.

The St. Louis Republic says "the past few months have witnessed a great revival of horseback riding among the younger set, and any evening a half dozen society debutantes, and many society matrons too, can be seen swinging along the drives of Forest Park at a brisk canter, with color in their cheeks and a happy smile on their lips."

The Denver News reports the organization of a riding club among the society young ladies of that city and states that there were fifteen charter members and that they ride well and often.

Indianapolis also announces the organization of a riding club with a large membership. The Star of that city says the women are following the fashion and discarding the side saddle. The revival of the sport in Indianapolis is only following the fashion of other cities, for in Chicago, New York, Boston and especially Washington, the fad for riding has become a leading pastime with many women in the last year or two and the bridle paths through the parks are no longer deserted for the motor roads.

San Francisco and Oakland are both noticing renewed interest in this sport, and the riding schools are getting new pupils every day.

Judge E. A. Bridgford of this city has brought his blue ribbon winning stallion Le Grand McDonald down from the farm at Knightsen and has quartered him at the Park Riding Academy on Fulton street. He is now training him in harness and we may expect to see Le Grand McDonald shown in the combination and harness classes at the horse shows next summer which will be given at the State and county fairs. Le Grand McDonald will be four years old when shown next season and besides being a very high class five gaited horse, will be able to make a showing in harness that will make him a hard horse to beat.

The many friends that Miss Loula Long, of Kansas City, made in California during the P.-P. I. E. horse show, will rejoice to hear that she is fast recovering from the accident by which she was seriously injured a few weeks ago. In a letter to the editor of the Missouri Stockman, Miss Long speaks of the accident thus:

"My friends have been so lovely to me, that it has made my accident almost a pleasure. Can you imagine such a thing? My pony slipped and we both went down. She stepped on my neck, and all over my right arm. I had a perfectly lovely black eye, and surely looked like 'the morning after.' I am having a lot of trouble with my arm and the doctor says I will, for some time, as the nerves were badly crushed."

The National Western Stock Show is to be held at Denver, Colorado, January 22 to 27, 1917, and one of the greatest horse shows ever given in the west is to be part of it. In addition to the usual attractive classification, the Colorado Stake of $1000 for five-gaited saddle horses will be one of the features. Some of our California horses should win in that event or make some Missouri or Kentucky horse work hard to keep them from doing so.

The Portland, Oregon, Hunt Club held a horse show last week in that city which was a great success. There was a big attendance and many entries. Sir Patrick, a beautiful chestnut gelding owned by Mr. and Mrs. R. H. Jenkins, won first in the gentleman's saddle horse class, Kentucky Dare and Sir Patrick carried off the blue in the saddle tandem, Flashlight, a handsome black gelding, won first in the class for ladies' saddle horses, ridden by his owner, Mrs. Coe McKenna. In the five-gaited class, Rastus, a black gelding owned by Mr. O. H. Fithian, took first prize. Mrs. James Nicols' Edgewood Girl won the blue ribbon for best lady's hunter. The officials were: E. B. Tongue and A. C. Ruby, judges; A. M. Cronin, ring master; John E. Cronan, announces, and Sheldon A. Z. Volkman, clerk.

Stock Yards for Sacramento.

Thirty thousand dollars will be spent in arranging stockyards and constructing the necessary buildings on property in West Sacramento near the end of the car line.

When the stockyards are completed auction sales of fine cattle and horses will be held at regular intervals. Architect Clarence Cuff is now working out the plans for the yard buildings, which will include a central exchange building, sales pens and stables and warehouses.

The yards will be known as the union stockyards of West Sacramento.

There are 79 new 2:10 trotters this year and forty-three trace in the male line to George Wilkes and twenty to Electioneer.

THE REAL LADY A SURPRISE.

Tommy Murphy Thought Her Stable Mate Was a Much Faster Two-Year-Old.

The two-year-old filly The Real Lady 2:04¼, owned by A. H. Cosden and developed and driven by Thomas W. Murphy, was not broken to harness until late last winter, and as late as June 28th, when she started in public for the first time, making a record of 2:19½ against the watch at Poughkeepsie, she was not regarded as anything more than a promising Futurity prospect. Both Murphy and Cosden thought they had a much faster two-year-old in Harvest Lad, son of The Harvester 2:01 and June 2:11½, by Bellini 2:13¼. It was because this colt showed such extreme speed early in the season that his owner and trainer decided to hold him over for the futurities of 1917 and go on with the less promising filly this year.

The Real Lady improved so rapidly after Murphy took her away from home that she worked an easy mile in 2:13¼ at Cleveland during the Grand Circuit meeting there, and at Detroit she reeled off a trial in 2:10, with the last half in 1:02. At this time Harvest Lad was the faster trotter, and it was not until the filly had shown she could probably hold her own with anything in training that Murphy let up on the colt and sent him home to be turned out.

At the second Cleveland meeting, on August 21st, The Real Lady trotted her first race, winning the American Horse Breeders' Futurity in 2:09¾ and 2:10 and trotting the last half of the first heat in 1:02¾. Her second start was at Poughkeepsie, where she met the crack two-year-olds of the Orange county circuit and beat them in straight heats, but not without being strung out to the utmost limit of her speed, Ante Guy forcing her to trot in 2:08¾ and 2:09½, with the last half of the second heat in 1:02½ and the last quarter in :30½, a 2:02 clip.

At Columbus, on September 18th, she won easily in 2:09¼ and 2:10, Emma Magowan this time forcing her out. Her next engagement was in the Kentucky Futurity for two-year-olds, at Lexington on October 2nd, and here she won again in straight heats, beating eight of the best youngsters of the year. The time was 2:07½ and 2:07, each heat being faster than any other filly of her age ever trotted in a race, while the third quarter of the final heat was in :29¾—a 1:59½ gait.

Five days after this brilliant performance The Real Lady started in a private sweepstakes of $9,000 on the same track, and after winning the first heat in 2:10¼, cut loose and shattered all records for two-year-olds by trotting the second heat in 2:04¼. This was more than three seconds faster than any other filly of her age ever trotted a mile in or out of a race, and faster by a quarter of a second than the champion record for two-year-olds, made by Peter Volo over the same track in 1913, with Murphy driving.

She met her first defeat at Atlanta, where after winning the first heat of the race, Mary Coburn beat her the next two in slow time.

The new champion is a brown filly, about 15.2 hands high, by Moko, out of Fruity Worthy 2:25¼, by Axworthy 2:15½. Though foaled at the Walnut Hall Farm, in Kentucky, she was bred by L. V. Harkness of New York, while her dam was bred by John H. Shults of Port Chester, and the sire of her dam by A. B. Darling. Fruition 2:25¼, the granddam of the new champion, was bred by William E. Spier, of Glen Falls, N. Y., who was then president of the International Paper Company, and who bred Major Del Mar, the first trotter to beat 2:00 with the aid of a wind shield. Fruition was by Abdell 2:23, the champion yearling trotter of his day, out of Expectation, the dam of Major Del Mar, and she out of the old gray pacing mare Miss Copeland 2:25½, dam of the trotter Copeland 2:09½.

The wonderful improvement in speed among baby trotters and pacers is, no doubt, due as much to the methods used in preparing them for the test as to improvement in breeding. Everybody knows how easy it is to overwork a growing youngster, and any one who had advised giving a two-year-old ten miles work on the day of her greatest race would have been judged of unsound mind. And yet that is exactly what Tommy Murphy did to The Real Lady the day she trotted in 2:04¼ at Lexington. Starting her with the first mile at her own gait, he kept on increasing the speed until he reached 2:09, giving the filly the usual rest and cooling out between each mile, so that when she came to score up for the race she had already been on the track for three hours and had trotted three miles better than 2:10 with eight slower ones, several no better than three minutes. This is treatment that makes or breaks, and the colt or filly that stands up under it will be in condition to go the limit of speed.

For a period of 29 years, from 1880 to 1909, the two-year-old trotting record was held by sons and daughters of Electioneer, Fred Crocker and Wildflower, Sunol and Arion, foaled on one farm, the famous Palo Alto ranch, established by Governor Leland Stanford.

Not until the pneumatic sulky was invented to give the twentieth century trotter an advantage of five seconds or more over Arion and those that went before him did the champions from Palo Alto lose their supremacy. Arion's record of 2:10¾ to high wheels had stood for 18 years when Murphy drove the Kentucky bred filly Native Belle to a record of 2:07¾ at Lexington in 1909. Four years later W. E. D. Stokes had the pleasure of seeing Peter Volo carry the record down to 2:04½ with Murphy in the sulky.

The Poughkeepsie trainer has driven every champion two-year-old since Arion, just as Charles Marvin drove that colt, Sunol and Fred Crocker, of the earlier champions.

The following table shows the reduction of the record from Doble's 2:42¾ to The Real Lady's 2:04¼:

Doble, blk c, 1870, by Ericsson 2:30¾—Belle, by Davy Crockett; Lexington, Ky., October 16, 1872 (S. Price)	2:42¾
Doble; same track, October 19, 1872	2:40¾
So-So, b f, 1875, by George Wilkes 2:22—Little Ida, by Edwin Forrest; Lexington, Ky., September 12, 1877 (Crit Davis)	2:38¼
Orient, ch f, 1875, by Cuyler—Eden Lassie, by Golddust; Lexington, Ky., Oct. 12, 1877 (George Brashfield)	2:38
So-So, same day and track	2:31½
So-So, same day and track	2:31
Sweetheart, br f, 1878, by Sultan 2:24—Minnehaha, by Bald Chief; Sacramento, Cal., September 25, 1880 (J. W. Donathan)	2:26½
Fred Crocker, b g, 1878, by Electioneer—Melinche, by St. Clair; San Francisco, Cal., November 20, 1880 (Charles Marvin)	2:25¼
Wildflower, b f, 1879, by Electioneer—Mayflower 2:30½, by St. Clair; San Francisco, Cal., October, 1881 (Henry McGregor)	2:21
Sunol, b f, 1886, by Electioneer—Waxana, by General Benton; San Francisco, Cal., October 19, 1888 (Charles Marvin)	2:20½
Sunol, same track, October 27, 1888	2:18
Arion, b c, 1889, by Electioneer—Manette, by Nutwood 2:18¾; Stockton, Cal., October 6, 1891 (Charles Marvin)	2:15¾
Arion, same track, October 21, 1891	2:14½
Arion, same track, November 10, 1891	2:10¾
Native Belle, b f, 1907, by Moko—Julia D. C., by General Wellington; Lexington, Ky., October 6, 1909 (Thomas W. Murphy)	2:07¾
Peter Volo, b c, 1911, by Peter the Great 2:07¼—Nervolo Belle, by Nervolo 2:04½, pacing; Columbus, Ohio, September 25, 1913, (Thomas W. Murphy)	2:06¼
Peter Volo, same track, October 6, 1913	2:04½
The Real Lady, br f, 1914, by Moko—Fruity Worthy 2:25¼, by Axworthy 2:15½; Lexington, Ky., October 7, 1916 (Thomas W. (Murphy)	2:04¼

—The Horse Journal.

Frank Caton Home From Russia.

After 23 years of active business in Russia Frank Caton has returned to America to remain permanently, writes Guy Rockwill of Cleveland. Twenty-three years ago Mr. Caton left Forest City Farm, located where the North Randall race track now stands, just outside of Cleveland. He left the employ of C. F. Emery and went to Moscow, Russia. He had heard of opportunities in the land of the Czar for a hustling American and he set out in search of fortune. That he succeeded there is no doubt. He made good from the start in Russia, made a host of friends, introduced the bike sulky and many other American contrivances as well as ideas in Russia, and by his honest way of doing business won his way into a prominent station among the royal families of Russia.

Caton thought he was home to stay about a year ago, but business demanded that he return to Russia. Since then Count Vartsoff, for whom he worked, has died, so after selling off all of the Count's horses and closing up his business, Mr. Caton has returned for his much needed vacation.

This year the Catons drove horses to victories that netted a combined total of 675,000 rubles—a ruble being about a half-dollar in American money.

Sam, the youngest son, led the trio by winning 275,000 rubles. William won 260,000, and the father, who was in the Czar's domain less than half of the year, won 140,000 rubles.

And in addition they won special prizes in medals, jewels and trophies valued at close to 40,000 rubles.

Instead of the war having killed off racing in Russia, Caton says the sport is going bigger than ever.

The winter race meets at Moscow and Petrograd have each paid out over a million and a half rubles for less than four months' racing.

And, five times in six months racing at Moscow, the total betting for one single day has gone over 1,000,000 rubles.

Caton didn't bring back any horses with him.

"You can't get horses in or out of Russia," says he, "except across Siberia and by the Pacific route, which would mean six or seven months travel for the animals.

"But horses are bringing wonderful prices these days over there. Before I left I sold the 64 trotters from the stables of Count Varntsoff, who died a few months ago.

"Those horses averaged 5,660 rubles in sale price, Ier, a three-year-old that hadn't been raced, bringing 15,600 rubles, and another pair bringing 26,000 rubles.

"They race differently in Russia from what they do on this side of the water. There are no races in which the horses score 12 or 15 times. If a horse spoils three starts he is sent to the stables.

"And there are no races that run into a long number of heats. All except the biggest races are over in a single dash.

"And there are only two heats in big races, the horse making the fastest time winning the race.

"If a driver thinks his horse has won the first in sufficiently fast time, he doesn't have to race the second heat.

"Races start at four in the afternoon. It gets dark at five and they continue on till about nine o'clock by electric light."

End of Matinee Racing Season.

It was an excellent card of racing that the members of the San Francisco-California Driving Club provided for the pleasure of a large crowd of spectators at the stadium track in Golden Gate Park last Sunday. The time was fast, all the heats being faster than 2:14 except in the 2:18 class pace, and the three horses in that event put up an excellent race with the heats in 2:19¼ and 2:16½.

In the 2:12 pace with three starters, J. M. Kidd's Pointer Belle won the first heat in 2:13½ with Little Jack second and Emma M. third, but Mr. Malough's mare took the next two in 2:12¼ and 2:13¼ with Pointer Belle second each time and making a real horse race of each finish.

The free-for-all pace had four of the fastest pacers in the club as starters, Harold Cohen arriving from Bakersfield a few hours before the race was called with his wonderful little mare Vera Hal and bringing her in a winner in straight heats in 2:11 and 2:09½, an excellent performance, Bradmont was second the first heat, but W. J. K. came with a rush down the stretch in the second heat and Cohen had to shake his little mare up to beat the old fellow.

The free-for-all trot made a good race also. Cohen had Harold C. in this race and managed to land him in front the first heat in 2:13 with A. Giovanetti's Yoncalla second, Ford's Minequa third and President Giannini's Ella M. R. fourth. The next two heats the daughter of Lord Alwin was a real trotter and she won them in 2:12½ and 2:13, the time of the second heat equaling the track record. Many expect this mare to enter the 2:10 list next season as she is now a better trotter than ever before during the time she has been trained. The showing made by Yoncalla in this race was most excellent. He was second in every heat and a contestant every time. He was separately timed in 2:12½ and acted like a real race horse. Yoncalla has never had the advantage of professional training and is looked upon as a horse that would give a good account of himself on the main circuit, could his owner be induced to enter him there next year. Yoncalla, as our readers know, was bred by the late Mrs. Frank Burke of San Jose. He is by Bon Voyage 2:08 and his dam is the roan mare Birdie (dam of Bodaker 2:13) by Jay Bird, second dam Lady Lyle by George Wilkes, third dam Dame Tansey (dam of 3) by Daniel Lambert. Yoncalla is a good gaited trotter and has the racing instinct. If he makes a break he does not lose his head but gathers quickly and seems intent on making up the lost ground. He races from wire to wire and is as game as a pebble. Yoncalla is a handsome chestnut and is only five years old, having been foaled in 1911. He bids fair to be the stadium champion trotter in another year.

The summaries of the afternoon's races are as follows:

First race—2:12 pace:

Emma M.	(William Malough)	3	1	1
Pointer Belle	(J. M. Kidd)	1	2	2
Little Jack	(G. Conlan)	2	3	3

Time—2:13½, 2:12¼, 2:13¼.

Second race—2:18 pace:

George W.	(Frank Burton)	1	1	
Rosa O.	(J. J. Ryan)	2	3	
Frank N.	(L. A. Gielow)	3	2	

Time—2:19¼, 2:16½.

Third race—Free-for-all pace:

Vera Hal	(Harold Cohen)	1	1	
Bradmont	(Richardt P. Roberts)	2	3	
W. J. K.	(W. J. Kenney)	4	2	
King Pointer	(H. Campodonico)	3	4	

Time—2:11, 2:09¼.

Fourth race—Free-for-all trot:

Ella M. R.	(G. J. Giannini)	4	1	1
Harold C.	(H. Cohen)	1	3	3
Yoncalla	(A. Giovanetti)	2	2	2
Minequa	(M. Ford)	3	4	4

Time—2:13, 2:12½, 2:13.

To win enough to make a campaign through the Grand Circuit profitable these days, a horse must have extreme speed and racing ability. There were but six pacers that won over $6,000 on that circuit this year and it will be admitted that any horse that goes through the "Raging Grand" and wins less, is not a very profitable animal to his owner. The six that won $6,000 and over are Miss Harris M., by Peter the Great, $9,932; Ben Earl, by The Earl, $7,970; Jay El Mack, by E. J., $7,887; Diumeter, by Dium, $6,700; Single G., by Anderson Wilkes, $6,687, and Roan Hal, by Hal De Facto, $6,335.

◈ ◈ ◈

Wallace McKinney 2:26¼, son of McKinney 2:11¼ and Leonor (dam of 7 in the list) by Dashwood, was sold by auction at the administration sale of the late Charles Marks' horses in Ohio recently. Wallace McKinney was foaled in 1903 and is the sire of forty standard performers, including two pacers in the 2:10 list. He sold for $600 and an eight-year-old mare by him sold for $500.

◈ ◈ ◈

C. C. Mayberry, of Boston, has sold the trotting mare, Nancy Bingen 2:15¼, by Bingen 2:06¼, to John E. Madden, of Lexington, Ky. Nancy is a granddaughter of Nancy Hanks 2:04, and will be used as a brood mare.

Thoroughbred Matters

The advisability of racing two-year-olds before April was never discussed until winter racing began on this continent. When the long winter meetings at San Francisco, New Orleans, Juarez and other points were inaugurated, purses were offered for two-year-olds as early at January 1st, when a majority of the youngsters starting were not over twenty-one months old, and from that time the question as to whether two-year-olds should be raced before April has been discussed pro and con. The New York Jockey Club has made a rule that two-year-olds could not be raced before April and nearly every breeder of horses who has given the matter any study endorses this rule. Mr. Charles Boots, one of the leading thoroughbred breeders of the Pacific Coast, opposed to racing two-year-olds before April and his views on the point were published in these columns last week. Mr. James Coffroth, president of the Tijuana racing association, has replied to Mr. Boots' article in a San Francisco daily and we republish his letter in full this week. Mr. Coffroth, in not being a practical horseman, does not seem to grasp the full meaning of the reasons given against the early racing of two-year-olds, as he says that the racing at Tijuana and Juarez is just the same in January as at New York in April. There is no disputing this fact, but a colt foaled in April does not reach his second birthday any sooner by shipping from south. The reason why two-year-olds should not be raced in January is because they are not sufficiently matured to stand the strain of racing by that time. It probably will not injure the average colt to start him in a three-eighths race on the first of January of his second year, but when races for two-year-olds are given every day from that time on, the youngsters that are broken down become very numerous, and this is why The Jockey Club has provided the rule which prohibits two-year-old racing before April.

Star Hawk Beaten for Latonia Cup.

Latonia, Oct. 28.—With the possible exception of Derby day, the largest crowd ever within the gates of the Latonia racetrack today saw Pif, R. L. Baker's crack route horse, beat Star Hawk by the margin of a nose in the Latonia Cup Handicap.

The race was 2¼ miles, and it was not decided until the last jump. So close was the finish that the placing judges could have given it to either horse, but their decision was a popular one, as the vast crowd realized that they had seen a horserace par excellence. Star Jasmine finished third, beaten four lengths for the place.

The time for the race was 3:51 2-5, which is within three-fifths of a second of the track record, made last year by Star Jasmine when she won the same stake. The last part of the race was run unusually fast considering the fact that it was such a long distance affair.

There were seven starters in the big event, and it was the best cup field that ever went to the post around here. This gave the winner a net value of $4,895, the second horse $800, the third $600 and the fourth, Kilanna, saved her stake.

The other three starters were Rancher, Fair Mac and Hodge and the showing of Rancher and Fair Mac was especially disappointing. They were never contenders, and both were backed with a lot of confidence by the Canadian contingent on account of their good races in that section.

Although beaten, Star Hawk was not disgraced by any means, as he is a three-year-old and he was giving away plenty of weight to his older opponents, especially the horse that beat him. He hung on with bulldog courage in the final sixteenth of a mile when Pif Jr. was on even terms with him, but the latter could not be denied. At that, Star Hawk did not weaken in the least, but he was simply beaten by a better horse under the conditions. Jockey Buxton rode a perfect race on him and followed Trainer Walter B. Jennings' instructions to the letter.

In addition to the monetary value of the Latonia Cup Handicap Mr. Baker, owner of the winner, received a silver service valued at $1,000. The presentation speed was made by Steward Charles F. Price, and Mr. Baker responded in a neat speech.

Dates for Tijuana Stakes.

All arrangements are completed and everything is in readiness at the track at Tijuana for the meeting which opens on the 11th inst. It is said that 500 horses are already on the ground. Dates for the stakes have been announced as follows:

The Tijuana selling stakes, $1500, December 16.
San Diego business men's handicap, $2500, Jan. 13.
Los Angeles high weight handicap, $1100, Jan. 27.
Spreckels' handicap, $1500, February 10.
The Coffroth handicap, $5000, February 22.
Coronado selling stakes, $1500, March 3.

A string of the Macomber horses will be raced at Havana this winter.

◈ ◈ ◈

Charles W. Clark will send a stable of his racers to the New Orleans meeting in charge of John Lowe.

COFFROTH REPLIES TO CHAS. BOOTS.

James W. Coffroth, president of the Lower California Jockey Club, writes the following letter in reply to one recently published in the Bulletin as to the early racing of two-year-old horses:

"San Diego, Oct. 26.

"In deference to a recent letter published regarding two-year-old questions as written by Mr. Boots, I will take the liberty of answering him through your columns.

"I have never had the pleasure of acquaintance with Mr. Boots, but, despite this, I do agree with him on several of the points in question. Personally, I never did approve of early racing for thoroughbred colts. Would the governing racing body of America follow the French rule and prohibit the two-year-old from racing until August 1, I would gladly advocate such an amendment. But I must agree with Judge Joseph A. Murphy, who insists there is no difference between racing in New Orleans and Tijuana in January or racing in Kentucky in April. Mr. Boots must admit this if he is familiar with climatic conditions.

"Again I declare that I do not wish for early two-year-old racing. It is only in answer to the cry of the breeder, not only in California, but in the Middle West as well, that I have decided on staging these races beginning January 1. All our breeders are not so wealthy as Mr. Boots, perhaps. Yet, they feel for the horse fully as deeply. It would be suicide for them to raise horses and then have them weighted on their hands for the extra months.

"Mr. Boots is decidedly wrong if he insists that only the commercial breeder is in favor of early racing. Following here I will only attempt to name a few of our California breeders who are anxious for it and will prove so by racing their colts at Tijuana: George Van Gordon, Pleasanton; A. B. Spreckels, Napa; A. B. Klepstein, Bakersfield; Ward E. Hall, Sacramento.

"So far as race track promotion is concerned, Mr. Boots is wrong again. Why would I, with eight hundred horses in my stalls, look for the two-year-old to furnish me with betting races? I can fill ten races a day that would surpass them from a speculative standpoint. Firstly, the public and even the talent is in the dark regarding their capabilities; secondly, three-eighths of a mile races do not savor of any particular thrill to the racegoer.

"I take great pleasure in quoting Judge Joseph A. Murphy, who is the head of the New Orleans Business Men's Association, and who is one of the foremost personages of the turf. Only the other day Mr. Murphy said:

"The Business Men's Association of New Orleans will offer a two-year-old race every day of its meeting, beginning on January 1. I had so many requests from horsemen and breeders asking for this decision that it would seem that our best interests will be served in offering these races. I am in receipt of a letter from a prominent breeder, saying that the rule in respect to two-year-olds has lowered the average price of yearlings in the Kentucky sales $200 per head. I am not in position to judge the correctness of this estimate.

"Many of the horsemen who are to race with us do not wish to divide their strings, and I do not wish to waste my stalls with unavailable material.

" 'If all the governing bodies will adopt the French rule to race no two-year-olds until August 1 the Business Men's Association will abolish its two-year-old races. But two-year-old races in New Orleans and Tijuana in January and February are no earlier than two-year-old races in Kentucky and Maryland.

" 'Racing two-year-olds develops them. Over-racing ruins them. A two-year-old can be over-raced in September as easily as in January. Westy Hogan and Harry Kelly, the crack two-year-olds of the West, were developed in New Orleans last winter.

" 'My personal idea is that breeders and horsemen have encountered too much tough sledding the past ten years to curtail their earning capacity until they get their feet under them.'

"There you have the voice of my sentiments. Mr. Boots does not encourage the early racing of the thoroughbred. But so far as we know Mr. Boots, the 'exemplary' breeder, does not favor the racing of the aged horse, as well. It has been a long time since we have seen his colors, and still he claims he has the game deepest in his heart and is longing for the return of the horse. We must all race and work to bring the game back, not sit back and remain an 'exemplary' breeder with criticism—and no horses to effer.

"J. W. COFFROTH."

Strang-Perkins Horses Bring Good Prices.

The horses of G. L. Strang, which the stewards gave permission for him to sell, after refusing their further entries in Strang's name, were sold at auction in the Latonia paddock Thursday of last week.

Auctioneer Mickey Shannon got the horsemen into a good humor with some Irish wit and then proceeded to unload at the following prices:

Rhymer, b c (2), by Dick Welles—Outwai; B. J. Brannon	$2,700
Jane Straith, b f (3), by Dick Welles—Anna Brooks; William Perkins	2,100
Deliver, br f (3), by Dick Welles—Anna Brooks Hiter & Ford	2,200
Chief Brown, br c (3), by Bannockburn—Merida; Hiter & Ford	1,400
Samuel R. Meyer, ch g (7), by Handsel—Sallie Appleton; Hiter & Ford	1,400

Many Thoroughbred Importations.

Figures in the possession of Walter S. Vosburgh, the official handicapper of The Jockey Club, give some idea of the shrinkage in the United States during the past decade. This official has a minute record of his labors for the twenty-seven years he has been adjusting the weights, and from them it is gleaned that the high-water mark for the racing of thoroughbreds in this country was reached in 1903, when he handicapped no fewer than 9,200 individual horses.

When it is remembered that there were other thousands of horses that did not race on The Jockey Club courses—Mr. Vosburgh's jurisdiction not extending to any of the courses in Canada, California, Kentucky, Louisiana, or other distant points—some idea of the magnitude of the thoroughbred breeding industry may be obtained. The number varied from the maximum in 1903 down to less than 3,000 in 1914, while to date this year 4,000 different horses have come up for official consideration. By the close of the Maryland season perhaps the total will reach 5,000.

The brighter days which will come for the turf will no doubt see a very material increase for 1917. The foal registrations in The Jockey Club's stud book for the current year are better than in 1915, but the total is not as great as many would think, much of our brood mare stock having been sold overseas or put to menial uses, many good mares having become producers of mules instead of race horses.

It is from the extensive importations of English and French stock that this new material will be recruited. Already more than 400 head of yearlings, brood mares, and sires have been imported in 1916, and with Thomas Welsh, J. O. Keene, and others abroad eager for bargains, there will be at least 500 foreign-bred thoroughbreds on our shores by the beginning of next year.

Racing in Cuba.

Havana, Oct. 28.—Horse racing at the beautiful Marianao course is expected to prove more popular than ever this winter, for never have Cubans had so much money to spend and visitors from the United States will be very numerous. The management of the Cuba American Jockey Club has laid careful plans to attract high class horses.

There will be eighty-odd days of racing, a preliminary season of three weeks starting December 7th, with racing three days a week.

Beginning Christmas Day, the regular season will be started, with racing six days a week. The smallest purse will be $400, and they will range in value up to $1,000.

Death of John Stringfield.

The Thoroughbred Record of October 28 announced the death of John K. Stringfield, press agent for the Louisville and Latonia race tracks and one of the foremost turf authorities in Kentucky, who died suddenly at the Hotel Honing, Cincinnati, Oct. 22d. After cating a hearty meal he took his little daughter to a picture show. Returning to his room at the hotel he was taken sick. Clerk Robert Kelly, in answer to a call from Mrs. Stringfield, sent for several physicians, but he was dead before one arrived, having died from heart failure, precipitated by acute indigestion. John K. Stringfield was known to horsemen throughout the country. He had been a familiar figure on the Kentucky courses for more than a quarter of a century. His knowledge of thoroughbreds and their breeding was excelled by few followers of the turf in America. Legions of friends among horsemen, breeders, jockeys, and even stable boys, mourn his death.

The London "Horse and Hound" of October 14th says: "Mr. J. B. Joel has just sold the well-bred young mare Wilful Maid by Sundridge out of Marian Hood (a half-sister to Polymelus), who is certain in foal to Prince Palatine. The buyer is the Hon. J. N. Camden, to whose stud in Kentucky she will shortly be shipped. The sale was negotiated by the British Bloodstock Agency, Ltd., who also recently bought for clients abroad the well-known colts Jack Anandale and Farigold. Another recent purchase is Gallice (by Gallinule), in foal to Corcyra, who goes out to Mr. Arthur B. Hancock's stud in Virginia, together with a chestnut colt foal by Polymelus out of Half a Slice. The Agency has also sold the smart Irish two-year-old Trevisco by Tredennis from The Test by John o' Gaunt, who won the Baldoyle Foal Stakes, and Mr. K. W. Alexander, of Kentucky, is the purchaser."

◈ ◈ ◈

At the close of the Australian racing season of 1915-16, the list of winning stallions was headed for the first time by Wallace, by Carbine—Melodious, and he is the first Victorian horse to achieve the distinction since Pilgrim's Progress did so in 1903. The progeny of Wallace won in stakes $124,275. Second on the list is the imported Linacre, by Wolf's Crag—Lismaine, with $90,105, third place being filled by Bobadil, by Bill of Portland—She, with $82,340. The first half-dozen are completed by Malster, by Bill of Portland—Barley, $70,030; Grafton, by Galopin—Maid Marian, $69,230, and Pistol, by Carbine—Wenonah, $66,160.

◈ ◈ ◈

The population of the United States has increased by 24,000,000 people in the last fifteen years, and the number of beef animals has decreased 6,000,000 and sheep 10,000,000, while hogs have increased only 11,000,000.

Harness Horses and Horsemen

Peter McKlyo Trots Two Fast Miles.

The following account of the workouts by Peter McKlyo at Stockton last Saturday has been sent us by our correspondent, Geo. H. Tinkham:

Peter McKlyo, the famous five-year-old stallion, driven by his trainer James Thompson, trotted two exhibition miles on Saturday last in the fast time of 2:05¾, 2:06.

A large number of old-timers were present ,over two hundred attending, this including many ladies and visitors from Pleasanton, Merced, Modesto, Sacramento and other points.

The crowd was much disappointed in the time made. Expecting too much, they believed Peter McKlyo would trot in 2:05 or better. But the conditions were very unfavorable for fast time as the track was not in the best of shape for trotting and the weather was cloudy and cold.

Thompson gave the horse a warming up in 2:20. As Peter McKlyo came down the track for the trial mile he was moving not faster than a 2:15 clip. He trottel to the quarter pole in 34 seconds, some watches said, but warming up on the back stretch, he passed the half in 1:04 and rapidly trotting down the home stretch, the judges timed him in 2:05¾.

Many of the crowd, believing that the exhibition was ended, left the grounds. Thompson was disappointed and immediately he said, "We'll give him another trial, boys." After "blowing out" the stallion was again started. He moved under the wire at a much faster pace than the first mile and trotting to the quarter in 31½ seconds, passed the half in 1:03 and at that point paced by a runner as in the first mile, trotted under the wire in 2:06, so the judges announced.

There were five watches in the judges' stand and every one of them caught the time as less than 2:06. L. H. Todhunter, the owner of the stallion, caught each heat in 2:06. James Thompson's watch said 2:05¼, 2:06. The judges were three reliable men and timers: S. H. Williams, J. N. Jones and M. Henry.

[While it had been announced that Peter McKlyo had been taken to the Stockton track to lower his record, conditions were such that the horse was not started in an official effort to do so. There was no application made for authority to hold an official meeting and the two miles were simply exhibitions, with no official judges or timers.—Editor B. and S.]

Expressive a Wonderful Broodmare.

The blood of the great trotting mare Expressive (3) 2:12½ is breeding on just as the late Senator Stanford figured it would. Expressive was by Electioneer, her dam the thoroughbred mare Esther by Express, and it was a foundation of this sort that the Senator was building on when his death changed the order of things at Palo Alto Stock Farm. Expressive is the dam of six standard trotters, one of them with a record of 2:07¾. She has three producing sons including Atlantic Express 2:07¾, that only had sired 15 living foals, all two-year-olds, up to the close of 1915, and of these 10 had taken standard records. This year three of his produce have shown their ability to trot well below 2:10. One, Expressive Lou, took a winning race record of 2:08¼ and was second to Volga when that filly trotted in 2:04¼, Expressive Lou being officially timed in 2:06 in that heat. Another was the three-year-old filly Stellamaris that was a close second to Bingen Silk in 2:07¼, but was taken sick and died. The third is a two-year-old, Tacita 2:07¾, and her record was made against time. She is regarded as one of the most phenomenal two-year-olds ever seen. There were five two-year-olds by Atlantic Express to take records this year. Another son of Expressive that is making a name for himself is Expressive Mac 2:25½, sire of Clara Mac 2:04½, Vera Hal 2:05, Madam Mac 2:07¼ and many other fast ones. Expressive Mac is owned by J. H. Nelson, of Selma, Fresno county, California, and while the stallion has been well patronized every year, his opportunities are limited because there is so little harness racing in California. The thoroughbred mare Esther does not owe all her fame to Expressive 2:12½ as she is also the dam of Mendocita, that is the dam of that great trotter Mary Putney that has a three-year-old record of 2:05½ and a four-year-old mark of 2:04¾. Esther produced four standard trotters, has two prodding sons anu seven producing dams.

Death of the Pacer W. Wood 2:07.

Word comes from Mr. J. F. Colburn of Honolulu, who for several years has owned the old pacer W. Wood, to the Breeder and Sportsman that the gelding died October 19th. Time was when W. Wood was the pride of the California harness racing circuit. That was twenty-three years ago and W. Wood was then five years old, so the old fellow was 28 years old at the time of his death. W. Wood was foaled in 1888 at the once famous Oakwood Park Stock Farm at the foot of Mount Diablo in Contra Costa county, owned at the time by Seth Cook. He was by Steinway and his dam Ramona by Anteeo, second dam by Capt. Webster, son of Williamson's Belmont. His first appearance in a race was at the half mile track at Concord during the Contra Costa county fair of 1891, when he was three years old. He was entered in the free-for-all in a purse of $150 and won in straight heats, best time 2:28¼. That was his only start as a three-year-old, but the next year in his four-year-old form he made a great campaign through the California circuit, starting in ten races, winning six, was second in three and third in one. He met all the best pacers in California that year and took a race record of 2:11¼. At the end of the season he was taken to Stockton where he paced two different miles in 2:07 over the Kite track, but the record, along with the 2:07½ of Stamboul, and all the time records made at the meeting, were rejected as irregular. The following year as a five-year-old he again started ten times, won six races, was second in three and outside the money in another. That year he met the four-year-old Diablo and the latter defeated him every time they met. At Woodland in the free-for-all pace, purse $700, W. Wood and Diablo paced a dead heat in the first heat, and Diablo won thenext three with Wood second each time. In the second heat of this race Diablo took his record of 2:09¼, which at the time was the world's record for four-year-old pacers. The racegoers of 1892 in Southern California who are alive today will never forget the meetings of W. Wood, Silkwood and Our Dick at Santa Ana and Los Angeles. W. Wood was the pride of the north as Silkwood was of the south. At Santa Ana, the home of Silkwood, the Steinway gelding defeated the black son of Blackwood Mambrino, and paced to a record of 2:08½ in doing it. The next week at Los Angeles Silkwood turned the tables on him and beat him in straight heats, the first heat in 2:08¼. Thousands of dollars changed hands on these races. In 1894 W. Wood paced to his record of 2:07 at San Jose. This was against time. The next year he again defeated Silkwood at Santa Ana, but Seymour Wilkes beat them both at Los Angeles during the early part of the week and then W. Wood beat Pathmont, Seymour Wilkes and Silkwood the last race of the meeting. W. Wood started a few times during the next two years, but in 1897 or 1898 he was sold to parties in Honolulu and raced at many of the meetings there. He won a good many races in hula hula land and was a great favorite with racegoers.

Edith Carter, Season's Fastest Yearling.

Edith Carter, yearling filly by Kinney de Lopez, dam Louise Carter by Lord Alwin, is the fastest trotter of her age and sex that has appeared this year. In the lists recently published of the season's fastest records the filly Anna Davidson 2:27¼ has been given as the fastest yearling trotting filly for 1916, but Hemet Farm's production, Edith Carter, is a full second faster. Fred Ward will take her to Phoenix this month and it need surprise no one if the little daughter of Kinney de Lopez should return with a still lower mark, as she will be sent for a reduction in her record if she reaches Phoenix in good shape and conditions are favorable. Others of the Hemet Farm youngsters that will be started at Phoenix are Hemet Queen (1) 2:22¼ pacing, Zeta Lucille (2) 2:19¼ trotting, and Louise de Lopez. Hemet Queen looks as if she might lower the record for yearling fillies now held by Rose Magee 2:19½.

Still Enjoying the Matinee Sport.

Mark Twain once sent word to the press that the reports of his death had been grossly exaggerated, and the popular steamship traffic manager and amateur reinsman, Adolph Ottinger of this city, is also of the opinion that many of his friends have been furnished with false information in regard to his physical condition. It is true that he had a sick spell a few weeks ago and went to a hospital for treatment, but he did not stay in that resort long and is out and attending to business as usual. He was at the closing matinee of the San Francisco-California Driving Club last Sunday and outside of having lost a few pounds looks as well and is as "full of pep" as ever, and that is about as full as the ordinary human frame will hold. Ottinger is one of the veterans of the California turf and since the days when he owned Aster, that the late Tom Keating campaigned along about 1892, he has been more or less actively engaged in racing, both professional and amateur. With Keating as trainer and driver he campaigned on the Grand Circuit several seasons and was known as one of the heaviest bettors in the ring. During recent years Mr. Ottinger has retired from all but amateur racing, and since selling his horses at the Indianapolis sale last spring has not done much road driving, but his interest in the game is as great as ever and he seldcm misses a matinee in Golden Gate Park.

Madera County Fair Incorporates.

Chowchilla, Oct. 29.—Today articles of incorporation were filed for the Madera County Fair and Live Stock Association. Ever since the one-day fair held here on October 14th met with an unexpected measure of success, it has been apparent that the time was ripe for the formation of a legally incorporated association to hold annual fairs here. Frank Ady, A. L. Gambrill and O. Garlinghouse were the prime movers in starting the organization that gives the assurance that hereafter Madera county is to have an agricultural and stock show annually. It is understood there is to be no difficulty in securing excellent grounds for the purpose at the town limits of Chowchilla.

Henry Helman Marked Prince Zolock in 2:04½.

Henry Helman, lessee of the Salinas race track, returned from his trip to the northwest about two weeks ago. He did quite well with Prince Zolock and wound up the season by giving him a breeder's record of 2:04½, which is two seconds faster than his race record made at North Yakima in 1915. As Helman had the pacer Mack Fitzsimmons 2:07¾ in his string also, he tried the experiment of shifting the son of Bob Fitzsimmons to the trot, as otherwise both his horses would be in the same class. Mack did not prove to be as good a trotter as he is a pacer, so Helman has concluded to race him on the pace hereafter. His best money winner should have been the green pacer Paul, owned by Paul Johnson of San Juan, Cal., but the horse took sick early in the season and did not round to all summer. Paul is by Kinney Lou 2:07¾ and his dam is a mare by Benton Boy 2:16¼, and he will yet be heard from. Helman brought home with him five head of green ones all owned in Walla Walla. Three are by that good son of Peter the Great Blue Peter 2:16¼, that since being taken to Washington has already sired quite a list of standard performers, one is by another producing sire, Bonnie McK., and another is by Zolock. All are out of well bred mares and Mr. Helman thinks he has some good material to work on for the season of 1917. The only one of the get of his stallion Alconda Jay that was out this year in California was Chas. Silva's mare Eloise Dell, and the showing she made as a race and money winner proved that she was a game trotter and was always trying her best.

H. K. Devereux Favors Orloff Outcross.

H. K. Devereux of Cleveland, President of the Grand Circuit, amateur reinsman, and the guiding spirit of the syndicate known as the Pastime Stables, which own the champion trotting stallion of the world, Lee Axworthy 1:58¼, as well as the record-holding three-year-old filly Volga 2:04½, is a close student of the horse and, while primarily interested in the trotting family, can see merit in other types. He is in harmony with any movement looking to the production of a family that will be thoroughly representative for general purposes.

Upon being told that the war authorities, from Generals Wood and Scott down, favored the half or three-quarters bred horse for cavalry, and that most of the best ones came from a blending of the thoroughbred and trotting families, using the clean-bred horse as a top cross, Mr. Devereux said:

"I have gone on record as being opposed to the thoroughbred cross in trotting families when it is close up, , but I am open to conviction, and those who have had much to do with representatives of this horse should be competent to judge. The half and three-quarters bred hunters and saddle horses I saw at the New York State Fair at Syracuse recently were fine types and possessed qualities we all admire. It was the first time I had given them close attention, and the fact that many of the best of them were out of trotting dams impressed me.

"Our own champion's pedigree is buttressed with thoroughbred blood and that other great trotter Mary Putney's second dam is the thoroughbred mare Esther by Express. When Lee Axworthy finished his mile in 1:58¼ the other day with a prompter on either side of him he tried his best to beat them, and though tired he never wavered or wanted to do anything but trot. The warm blood did not hurt him any then."

"The best trotting families," resumed Mr. Devereux, "have, I think, quite as much courage and staying powers as the thoroughbred. It has been put into them through the test of racing. Why should not the mingling of these strains produce good horses?

"The future holds a menace, however," he continued. "We are inbreeding our trotting families too intensely, and an out-cross is needed. I believe that the Orloff is our salvation. Some years ago two mares of the Chetsey type, a blending of the American standard-bred and the Orloff, were sent to Cleveland to be bred to my stallion, John A. McKerron 2:04½. They were both handsome mares, big-bodied, on short legs—ideal dams to throw cavalry horses, and one of them had a record of 2:11½. She failed to get with foal, but the other threw a colt named Levar that when three years old lowered the Russian record five seconds for trotters of his age. He did still greater things later on. The Russians then bought Harry McKerron, a son of John A. McKerron, and although a double-gaited horse, his progeny gave such satisfaction to the authorities that they wanted still more of the blood. Frank Caton, the American trainer, cabled to Toronto and bought Jack McKerron 2:07¼, for $3,500. He sold the horse in a short time for $15,000, and Caton, who is here, tells me that $20,000 was refused for Harry McKerron. The progressive spirit of the Russians is shown by the offer of the Imperial Trotting Club of Petrograd to give a race of the value of 50,000 rubles, open to the world, and a special invitation to American owners to participate.

"Mares of this Chetsey type should go a long way toward helping us solve our problem. Mated to our best sires—thoroughbred or trotter—they should help us develop a useful family of horses big enough for any purpose, and having the courage and other qualities which would carry them through any task, whether the emergency came in peace or war. I, for one, believe the experiment would be well worth while."

Notes and News

Racing begins at Phoenix one week from Monday next.

◈ ◈ ◈

The election will be all over and everybody will be glad, even the losers.

◈ ◈ ◈

There will be some high class racing with California well represented.

◈ ◈ ◈

Bingara's list of 2:10 trotters has received three additions this year. He now has nine.

◈ ◈ ◈

Lu Princeton 2:09¾ is the third new 2:10 trotter for San Francisco 2:07¾.

◈ ◈ ◈

Gen. Watts 2:06¼ is the sire of seven of this season's new 2:10 trotters.

◈ ◈ ◈

Peter the Great 2:07¼ and Zombro 2:11 each has four new 2:10 trotters to his credit.

◈ ◈ ◈

Gaiety Lee 2:16¼, dam of Lee Axworthy 1:58¼, is in foal to San Francisco 2:07¾ this year.

◈ ◈ ◈

The official report of the Bakersfield meeting did not reach us until too late for insertion in this issue. It will appear next week.

◈ ◈ ◈

Persons who ought to know say that it would not be surprising to find Philadelphia bidding for a Grand Circuit place next season.

◈ ◈ ◈

The dam of the new 2:10 trotter, Gunfire 2:09½, by Gen. Watts 2:06¾, is Evening Grey 2:24¼ by the former stallion champion, Cresceus 2:02¼.

◈ ◈ ◈

Albert M. Billings drove Margaret Druien 2:03 and Lettie Lee 2:06¾ a mile to wagon over Curles Neck Farm track recently in 2:09¼, last half in 1:02.

◈ ◈ ◈

Millard Sanders is getting quite a string of horses together for the spring training. He now has a stable of seven or eight.

◈ ◈ ◈

Lilly S., the dam of Zomrect 2:03¾, is said to be safely in foal to Nathan Axworthy 2:09½, the stallion owned by Andrew Albright of Newark, New Jersey.

◈ ◈ ◈

W. G. Durfee should bring home some of the bacon from Arizona as he has a horse entered in every race except those given exclusively for Arizona horses.

◈ ◈ ◈

There were 79 standard bred and registered stallions licensed for service in California this year and 64 trotting or pacing bred stallions that are not registered.

◈ ◈ ◈

Helen Simmons 2:11¼ enters the list of dams of two or more 2:10 trotters, she having produced the new trotter Barbara King (4) 2:07¼ and Spriggan 2:08¼.

◈ ◈ ◈

The horse recently added to Tommy Murphy's stable was Poorman (2) 2:07¾, Coldstream Farms' joint holder, with Directly, of the two-year-old pacing championship.

◈ ◈ ◈

Hal B. 2:04½, the famous pacing sire owned by C. A. Barber, Williamsfield, O., is now the sire of 15 in the 2:10 list. Hal Edo has reduced his record this season from 2:11 to 2:09¼ and Hal Paxton has reduced his record from 2:10½ to 2:06¼. Lady Hal, a daughter, has reduced her former record of 2:09¼ to 2:05¼ also.

◈ ◈ ◈

Mr. R. C. Simpson of Armadale, New South Wales, Australia, now owner of the stallion Don Pronto 2:02¼, is having shipped to him from the factory at Marion, Ohio, a McMurray sulky, an exact duplicate of the one in which The Real Lady (2) 2:04¼, the world's champion two-year-old trotter, took her record. Duplicates of this sulky have been drawn three times in two minutes this season.

◈ ◈ ◈

Mr. C. S. Blake, of Orland, Cal., was paid $300 for the loss of a fine Guernsey cow the other day, and Mrs. Clara R. Swanger of Stafford, Arizona, this week received a check for $1500 insurance on a draft stallion that met an accidental death. Both animals were insured in the Hartford Live Stock Insurance Company whose office on this coast is at 438 California street, San Francisco. Better be insured than to wish you had been.

◈ ◈ ◈

Dunne & Lowery, owners of the $20,000 stake winner Spriggan, have added a Peter the Great trotter to their 1917 string by the purchase from C. A. Harrison of the mare Peter's Queen that Millard Sanders trained last spring at Pleasanton. It is said that the price paid for this mare was $650. She is a nice trotter and showed a lot of speed at Pleasanton before she was taken sick just prior to the opening of the California circuit, when all her engagements were cancelled.

Alameda and Sonoma counties led all other counties in the State this year in the number of trotting bred stallions licensed for public service. There were 12 licensed trotting bred stallions in each county.

◈ ◈ ◈

It is rumored that the fifty head of trotting bred horses that were to be consigned to an eastern sale by a California horseman are all sick with distemper and cannot be put in condition in time for the sale.

◈ ◈ ◈

Peter the Great now has 39 trotters in the 2:10 list, more than twice as many as any other. General Watts leads all sires in the number of new 2:10 trotters for 1916 with no less than seven to his credit, which gives him eleven in all at 12 years of age.

◈ ◈ ◈

Al Schwartz is to have a new pacer in his string. The well known San Francisco sporting man, James J. Ryan, owner of Directess Mac, has recently purchased and turned over to Schwartz a five-year-old mare by Charley D. 2:06¼, dam Ruth C. by Guide.

◈ ◈ ◈

Henry Thomas, the young western trainer whose success this season with Miss Densmore 2:07¼, Sayde Densmore 2:02, and Colleen 2:04¼ has been the subject of favorable comment, has been engaged to train for Stoughton A. Fletcher, of Indianapolis. He takes up his new duties December 1st.

◈ ◈ ◈

The death of the veteran trainer, Hiram Tozier, which accurred three or four months ago, has just been reported. Mr. Tozier was about seventy years old, and lived in Waterville, Maine, at the time of his death. At one time he was head trainer at C. H. Nelson's Sunnyside Farm, and later trained for William G. Snell, of New Bedford, Mass.

◈ ◈ ◈

Harold Cohen may send Vera Hal 2:05 to the Chicago sale. The little mare could win a lot of money on the half mile rings as she is always ready to pace three heats below 2:10 on almost any sort of a track, but there are very few races for a pacer in her class here in California. More's the pity.

◈ ◈ ◈

The Australian Jockey Club Derby was run at Randwick October 3rd, and resulted in the success of Kilboy, with Eastcourt second and Colbert third. Sixteen ran and Kilboy was the favorite at 5 to 4, while it was 12 to 1 against Eastcourt and 33 to 1 against Colbert. The mile and a half of the race was covered in 2:39¾.

◈ ◈ ◈

W. C. Brown, of Vancouver, B. C., has sold his three-year-old filly by Nearest McKinney to parties in Calgary. This filly has every indication of being a very fast trotter, having been a mile in 2:25 this year with very little training, and trotted a half in 1:09 and a quarter in 34 seconds as a two-year-old with but a little work. Her new owner is Mr. McGowan of the Royal Bank of Calgary, Alberta.

◈ ◈ ◈

A correspondent asks when and where Bernice R. made her record of 2:07¼. It was at Fresno in 1912. She was one of seven starters in the 2:11 class trot for a purse of $1,000. Bernice R. won the first, second and fourth heats in 2:07½, 2:07¼ and 2:07½. The third heat was won by Densmore in 2:10. Bernice R. got into a pocket in this heat, and in trying to pull her out of it she broke and finished fifth.

◈ ◈ ◈

A. Edstrom, of 1210 Fifty-second Avenue, Oakland, owner of the handsome pacing stallion Hallie's Star 01908, reports that 38 mares were bred to that horse last season, and that the season of 1917 looks to be just as promising. Mr. Edstrom says he knows of a number of owners who will have their horses trained if a California circuit is announced by the first of the year.

◈ ◈ ◈

Clarence J. Berry will race his trotters and pacers in California next year. Mr. Berry, who is one of the new directors of the Pacific Coast Trotting Horse Breeders' Association, thinks there will be more pleasure in racing at home where he can see his horses competing with those of his near friends and neighbors than there is in sending them across the mountains, even though the prizes to be won there are much more valuable.

◈ ◈ ◈

"Steve" Bailey, who once owned the Pleasanton track and sold it to the present owner, Mr. R. J. MacKenzie, has already wagered a big sum of money on Wilson, his favorite in the Presidential race. The papers report that at Seattle last Thursday he deposited $7000 in a prominent bank to cover an equal amount wired from New York by a Wall street firm. Mr. Bailey must have ten thousand dollars or more up on the result of the election, as he had already made several large bets with San Francisco and Seattle parties.

◈ ◈ ◈

There are many things horsemen and trainers of horses will need during the next few months that they do not use during the racing season. Stallion owners who are getting their horses ready for the breeding season of 1917 may need stallion bridles, hobbles, blankets, shields and many other necessary articles, and time would be saved if they would call on David West at 1018 Fillmore street, San Francisco, and look over the big stock of horse goods that he has there. There is nothing a horse needs from bridles to medicine that West does not keep in stock. Then his prices are right and he gives every patron his full money's worth.

The well-known Kentucky horseman, R. S. Strader, is now manager of H. J. Schlesinger's Fairland Farm, the home of Belwin 2:06¾ and Beirne Holt (3) 2:11¼. This, however, will not interfere with Mr. Strader's business at Forkland Farm, as usual, he will have personal charge of Peter the Great 2:07¼.

◈ ◈ ◈

Many of the late meetings being held on the half mile tracks in the Eastern and Middle West States are having big fields of starters in every race. These meetings close their entries after the Grand Circuit racing is ended and only a week before the racing begins. The result is that the percentage of starters added to the number originally entered is very large which assures financial success.

◈ ◈ ◈

There will be a greater number of fairs held in California in 1917 than for several years past. The educational value of a first class show of products has been thoroughly established, and live stock breeders as well as farmers and fruit growers are becoming regular patrons of the State Fair and enthusiastic advocates of county fairs. And every efficient and successful secretary affirms that without a good race program and horse show the largest crowds cannot be had.

◈ ◈ ◈

At a meeting of the Golden Gate Thoroughbred Breeders' Association held at the St. Francis Hotel in this city on Thursday evening of this week, a committee composed of William F. Humphrey, Walter Martin and Charles T. Boots was appointed to draft by-laws for permanent organization. It was also definitely decided that the association will secure a number of thoroughbred stallions and distribute them about the State to encourage the breeding of thoroughbreds.

◈ ◈ ◈

Among the stallions now owned in California are representatives of all the leading and most fashionable families. We have stallions here that carry the blood of Peter the Great, Axworthy, McKinney, San Francisco, Moko and other great sires, and as there are many high class mares there is no reason why California breeders should not produce as many high class trotters and pacers in the future as they have in the past. No good mare should be allowed to go unmated in 1917. The demand for horses that can race will be greater in the next few years than it has been during the past few.

◈ ◈ ◈

There is a rumor that James Thompson will be sent east next season with Mr. Todhunter's stallion Peter McKlyo 2:06 to try conclusions with the trotters on the Grand Circuit. As Peter's mark is a breeder's record he is eligible to all classes and any horse that can trot two such heats as he did in his workout at Stockton last Saturday, should be able to win a few purses on the big ring if he is in good shape on his arrival in that part of the country and escapes illness and other afflictions that so often strike the California horses when they cross the mountains.

◈ ◈ ◈

The five-year-old stallion Silkworthy 58175, owned by Dr. Winslow Anderson of this city, is a highly bred member of the Axworthy family, now so popular. Silkworthy is by Morgan Axworthy, son of Axworthy and a mare by May King, sire of Bingen 2:06¼. The dam of Silkworthy is Clear Silk by Prodigal, second dam The Real Silk, dam of 6, by Baron Wilkes, third dam the famous Nannie Etticoat by Bellwood 756, son of Belmont 64, fourth dam Soprano, dam of 10, and full sister to Steinway (3) 2:25¾ by Strathmore, fifth dam by Marshal Ney and sixth dam by the famous thoroughbred Bertrand.

◈ ◈ ◈

Mr. Ansel M. Easton, of Burlingame, proprietor of the Blackhawk Stock Ranch, which has the finest collection of Shire stallions and mares on this coast, has recently purchased 1200 acres of land, a part of the old Oakwood Park Stock Farm, Contra Costa county, and will establish thereon one of the finest breeding farms on the coast. He will retain the name Blackhawk Stock Ranch and has already engaged Louis Mullgardt, the San Francisco architect, to prepare plans for a distinctive and ideal country home and stock breeding farm, with the buildings in the old Spanish style of architecture, with gardens and other landscape effects.

◈ ◈ ◈

We notice where the pacer Colusa by Chester has been racing again this year after a retirement for a couple of seasons. He won a race in straight heats over the half mile track at Malone, New York, last month, each heat in 2:14 and a fraction. It will be remembered that he appeared at the California State Fair in 1912, in his first start finishing a close second to Manitoba in each heat of the 2:15 pace in 2:05, 2:06¼ and 2:07¼, and a few days later was outside the money in the 2:11 class in slower time. He was afterwards sold in the east, and has won several races this year on the half mile rings.

FOR SALE—My highly bred trotting filly by Prince McKinney by McKinney out of Zorilla by Dexter Prince. Dam Duckens by Baronwood by Baron Wilkes out of Belle Dick by Magnetizer. Thoroughly broken. Will be 3 years in February. 16 hands and weighs 1100. Won 1st premium, Ventura County Fair. Greatest speed prospect I have ever driven but have not time to use her. Also thoroughbred colt coming three years old unbroken, by Wild Oats. PAUL HARVEY, R. F. D. No. 1, Santa Barbara, Cal.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Shooting Quail for Market.—In 1861 my father, John Ralston, trapped quail on and around the old home ranch on the Corte Madera creek, where he had located three years before. He captured sixty dozen birds in his traps, and confined them in cages built of split redwood, but being offered only 25 cents a dozen in San Francisco, the one available market, he tore open the cages and set the birds free.

I began shooting for market in 1868, using a muzzle-loader, but it was not until ten years later that I did any wing shooting. At that time I met a Mr. Johnson, who was a wing-shot as well as a "ground sluicer" and who was out shooting birds for market. He asked me to take one side of a ravine and shoot it out, while he took the other with a breechloader. Though I was no shot on the wing, I took my side, and to my own surprise dropped the first three birds that rose. This gave me courage, but I soon found that to stop and load my muzzle-loader was too slow. The advantage of a breech-loader was apparent by my friend's success, and I immediately purchased a breech-loader and began wing-shooting.

In those years we hunted six months open season. I used a fourteen-gauge Parker shotgun, and with a single load in this gun I have killed 26, and by using both barrels, 29 quail. My highest record on ground shooting in any one day was 121 birds, and on straight wing-shooting 106 birds out of 129 shots. This last record was made in an ideal place in grass left by the reaper alongside of a narrow willow run three-fourths of a mile in length.

Mr. Johnson, as evidence of the abundance of quail in this part of San Mateo county in the early days, states that he bagged five dozen birds while walking from his home to the stage station at San Gregorio, a distance of a few miles.

It was not until about 1869, when the Chinese flocked into this great quail section and began grubbing and clearing the hills and flats, that quail began to lessen in number. They were thus driven out of their feeding and watering places, away from cover and protection, and cattle and horses, in feeding on the wild grass, exposed and destroyed their nesting places, contributing largely to the decrease of the next few years.—[Report of E. B. Ralston to Fish and Game Commission.

Chain of Game Refuges.—Believing that a chain of game sanctuaries can best insure our game supply, the Fish and Game Commission is co-operating with the United States Forest Service in gathering data relative to suitable situations for game refuges within the national forests. The supervisors of the various national forces have recommended twenty-two new refuges comprising a total area of 925,125 acres. Five supervisors are opposed to the creation of refuges in their respective forests, but all of the rest recommended one or more areas.

Some of the areas recommended are too large and others will not be available for other reasons. Nevertheless, when the present plans are worked out, a chain of sanctuaries extending from San Diego county to Siskiyou county will be established, either by federal enactment, if the Chamberlain-Hayden bill is passed by Congress, or by state enactment at the next session of the legislature.

Fish Get "Stewed."—Tacoma, Wash.—"Honest to goodness, it's getting so it's no sport to catch salmon out of Commencement bay any more than as though they were as tearful and unresisting as a sole."

The speaker was "Dad" Rice, veteran of the waterfront and an authority on all things piscatorial so far as Commencement bay and contiguous waters are concerned.

"Wassamatter, dad?" inquired a friend.

"Too many stewed fish," retorted Rice. "Since the cops have been dumping all that confiscated booze in the Puyallup river I have yet to see my first sober fish. So help me, the most of them are maudlin, especially those you get over by the Milwaukee dock. They don't know a flicker spoon from a side of bacon, but they swallow it, thinking that it is probably a chaser for some of that 40 rod squirrel whisky they have been drinking.

"The salmon is indigenous if not autocthonous to our latitude, and as a general thing he is about as game a fish as you would want to hook, but let Mr. Old Tyee get a load of some of that bonded contraband under his scales and a crab has more fight. On the level, I have hauled up some in the past few weeks in such shape that I expected them to burst into tears at any minute and tell me what a grand little fish their wife was and how sorry they were for her when they got pickled like this."

"Dad" Rice is incensed that the fish should be treated like this and poor human beings are ranging the hills and valleys for a wee drap of poison preventive. He admits that after dining off a salmon captured at the mouth of the Puyallup river a slight elevation or exhilaration is to be observed, but he contends that the "kick" is entirely too much diluted under these conditions to warrant a man eating a 25-pound salmon in order to get into a frame of mind in which to sing or argue religion.

SOUTHERN CALIFORNIA KENNEL SHOW.

Event Will Be Staged on November 23, 24 and 25; Other Doggy News.

The Southern California Kennel Club will give a show on Nov. 23, 24 and 25th. The club is offering a long list of trophies, there being nearly two hundred in all to be competed for, all the most popular breeds that are exhibited upon the Pacific Coast being catered to. Dr. J. E. De Mund, of New York City, who is to judge all breeds at this fixture, is no stranger to Coast fanciers, having judged here on several occasions previously, and his work has always been satisfactory.

The officers of the club are: President, Mrs. Gertrude Brennan; first vice-president, Mrs. Chas Winterman; second vice-president, Mrs. L. C. Smith; secretary, Mrs. W. W. Cockins; treasurer, Mrs. A. K. Tate. The show secretary and superintendent is Mr. R. C. Halstead, who has for many years held this very responsible position satisfactorily with the oldest show giving club in Southern California. The Pasadena Kennel Club, and on different occasions has been called upon to superintend and conduct shows for other clubs.

Fanciers who have not yet received a premium list may write to Mr R. C. Halstead, 400 W. Colorado Street, Pasadena, Cal.

• • •

The greyhound bitch, Blue Streak, owned by W. E. Lloyd of the University Farm, whelped eight fine puppies, six dogs and two bitches, to Pepper Kid on September 2nd. Pepper Kid, owned by Thos. Kennedy of Sacramento, won two out of three stakes last year and is said to be the fastest hound in California, while Blue Streak will run him a close second.

Coursing at Sacramento.—The Capital City Coursing Club has definitely fixed Sunday, November 19, as the date for its first meet, which will be a 32-dog stake with $5 fixed as the entrance fee. Practically enough entries have been spoken for to fill the stake, about 24 dogs being expected from bay cities and eight from Sacramento.

Entries will close Monday night, November 13th, and the drawings will be made on November 16th. Owing to the number wishing to enter a limit of two dogs will be placed on each owner.

A feature of the meet will be the first appearance on the Coast of two English imported hounds, owned by John Rosseter. The dogs recently arrived from England and ran in the Aberdeen cup meet in Kansas. Rosseter has wired East asking the trainer to bring the dogs to San Francisco immediately.

George Malcolm, well known among coursing enthusiasts on the Coast, will attend the opening meet here. Malcolm, who resides in China, is now in New York on business and has wired that he will stop over for the local meet while en route to the Orient.

Malcolm nominated Sacramento Boy in the John Grace cup race in December, 1900, Sacramento Boy winning the trophy that year.

Secretary Eugene Panario of the club reports increased interest this year and a busy season is scheduled. At its last meeting the club voted in four new members and received ten applications for membership.

Laws Protect Fur-Bearing Animals.—Washington, D. C.—In spite of the steadily diminishing supply of animals from which the finer furs are obtained, the value of the raw fur production of the United States and Canada has grown enormously in recent years, according to Farmers' Bulletin 783, Laws Relating to Fur-Bearing Animals, 1916, recently issued by the U. S. Department of Agriculture. The earnings of the trappers of North America in 1915 are estimated by the author of the bulletin to have been not less than $20,000,000, although exports of raw furs for the year were only about half the normal proportion. In large part, the industry owes its continued success, the bulletin indicates, to legislation passed in recent years protecting fur animals in much of the territory where the business is important.

Two additional States—Kentucky and Mississippi—passed state-wide laws for the protection of fur-bearing animals during 1916. In addition, Virginia passed a general law but provided that the act shall not become effective in any county until the board of county supervisors shall have adopted it.

As a result of the legislation for the year the total number of States protecting one or more species of fur-bearing animals by State-wide laws is increased to 39 in addition to Alaska. The bulletin contains an outline of the provisions of existing laws by States and the Provinces of Canada. Copies of the publication may be had free on application to the U. S. Department of Agriculture as long as the Department's seupply lasts.

CALIFORNIA HAS BEST CIVILIAN RIFLE TEAM.

Local Militia Lands Nineteenth in the National Shoot Held in Florida.

[By E. C. Crossman.]

State Camp (Fla.), Oct. 25.—With a hair-breathing finish at 1000 yards, in which Pritchard of the California civilian rifle team pulled seven straight before finding the target, the California riflemen cleaned the twenty-four other civilian rifle teams at the great shoot and made a good job by also beating twenty-three State Militia teams, landing ninth place in the shoot out of fifty-six teams entered.

But for Pritchard's string of misses at the start the team would have landed in third place, having third until the last pair came up to fire.

Not only did the California civilian riflemen clean up the civilian teams in the division in which they were entered, but they won the historic soldier Marathon trophy for a year and the highest rank in the big shoot ever taken by a team from California heretofore confined to the State militiamen.

The civilian team from California trimmed the California militia team, otherwise the State team, by about forty points, the guardsmen getting nineteenth place. Each particular lot of teams shot in a separate division, using the same course and firing at the same time. The ambition of the California men was to first win the civilian rifle team championship of the twenty-five teams of twelve men entered, and second, to clean up the California militia team, both of which they did with plenty of points to spare.

The lowest place occupied by the California Rifle Club shots was eleventh during the long two days' struggle over three ranges, and they pulled up steadily until the slide of Pritchard.

March of Los Angeles also presented his team with three misses, which also helped slide his team from third out of the fixty-six to ninth.

Most of the match was shot in a drizzle that increased at times until the targets could not be seen.

The California civilian team was made up hurriedly on receipt of word of the shooting of the matches of 1916 from the rifle shots of the Los Angeles Rifle and Revolver Club and the Olympic Club of San Francisco, and was shipped East with a week's warning and no practice. Col. T. F. Cooke of Los Angeles was team captain; E. C. Crossman of Los Angeles, team coach. The same Los Angeles men also acted as adjutant and coach of the picked 16-man civilian team that fired today in the united service match against the best of the marines and the militia.

The militia teams in the great shoot, sixteen men, of whom twelve shot in the match for each State, were the pick of the militia of the States represented—in some cases the best of 8,000 or 10,000 State soldiers. For the pick-up team of California civilian riflemen to trim the two-score militia teams in addition to the two dozen civilian teams entered was as much of a surprise to the California men as to the militiamen getting trimmed.

The Californians shot slowly for the last pair, because of the misses of Pritchard, and the score board of the California targets was crowded with men from other teams before the last pair finished, watching the westerners batting out bullseyes at the target more than a half-mile away, when they finally found the right sight set in.

Each man of the California team gets a bronze national trophy medal for being third team of the three classes and landing in the first division instead of down in the civilian division in which it was supposed to compete against organizations of its own class.

The California men were led by the marines, New York, Iowa, New Jersey, Minnesota, Pennsylvania, Indiana and Georgia. The rest of the State teams took the dust of the California civilians. The scores of the team over the 200 rapid fire, 600 slow fire and 1000 slow fire, twenty shots per man per range, follow:

E. C. Crossman	90	90	83

Million of Ducks in Flight.—Deputy Fish and Game Commissioner George Neale, of Sacramento, just back from an inspection trip through the rice fields, reports having seen the greatest flight of ducks he ever witnessed in Superior California.

"There were millions of them," says Neale. "I am not exaggerating when I say that when they rose from the ground they made a noise like a locomotive and clouded the sun.

"There was an immense flock of birds on a long island, and when we approached they started to rise, at one end first, until when the last of them were just leaving the ground it looked like a huge blanket stretched across the sky."

Neale reports more birds coming into the rice fields each week, being mostly sprig and mallard from the north. There are also many geese, mostly of the white and gray varieties, coming into the valley.

DUCKS NO MENACE TO RICE CROPS.

President Newbert Makes Investigation and Finds Reports Are Not True.

[By Frank M. Newbert, President California Fish and Game Commission.]

A deal of publicity has been given in the public press of late regarding the alleged damage done to growing rice in California. It is the custom of this Commission to investigate all reports concerning the welfare of the fish and game of the State. If certain game birds or animals are a menace to the property of any community, the Commission realizes the necessity of some action for relief.

If they are not, then the idea of game conservation must prevail. Reports of immense damage by ducks were made. Offers were made by alleged rice farmers to board, lodge and furnish ammunition to an army of shooters from all over the State.

Hunters were induced to travel long distances to Marysville, Gridley, Biggs and Colusa, only to find that the rice farmer did not want relief from the hunter, but had posted his land with "positively no shooting" signs and, in some instances, was patroling the road with a gun in an endeavor to keep men and dogs from entering the rice field.

An investigation has been made for the Fish and Game Commission by Deputy George Neale and myself, interviewing many rice farmers, members of Chambers of Commerce and business men financially interested in the great future of rice culture in the counties named, and all without exception stated they could not point to one instance where damage could be shown. Mr. Gohm, who farms 800 acres, stated that if ducks were injuring his crop he had never known it, but that the blackbirds were very destructive and that the ducks were blamed for the depredations of the blackbirds. J. H. Stevens, President of the Rice Growers' Association, states that wild ducks do no damage to rice whatsoever on his farm.

The facts, as learned after investigation, are that ducks do not eat green or unripe growing rice, or until the kernels are in a ripe condition. Blackbirds are very destructive to rice.

There are three stages of the development of rice, the milk stage, the dough stage and the ripe grain. The blackbird eats it in all the stages. The wild duck eats what is threshed out by blackbirds and the grain left by the harvester.

Hunters do not shoot ducks on the rice fields, but on the overflowed areas of drainage water, which comes from the rice fields when drained, and which carries much feed with it. Growers say that if this rice was allowed to remain on the ground and become what is known as volunteer rice, it eventually becomes red rice, the same as cheat is to degenerated wheat or barley, and which is the real menace to the rice grower at this time.

Some of the rice growers state that the wild duck is a benefit. Ducks feed on the rice stubble fields at night, scarcely ever in the day time. They frequent the fields in day time while the water is there, but it is to feed on the water larvae, tender grasses, bugs and other insects, which are quite numerous.

The investigation was made in justice to the growers of rice. This new industry is making giant strides in Northern California and the Fish and Game Commission realizes that to allow the false reports to be given to the world unchallenged would have the effect of keeping capitalists and farmers away who wish to engage in the new and rapidly growing industry. As one grower put it, "We don't want hunters to tramp our rice down. We want people to eat more rice."

Striped Bass Transplanted.—The long-delayed striped bass transplanting experiment was tried last week, when 20 cans of these fine food and game fish were brought down in the State fish car with the remainder of the Sisson hatchery's allotment of trout for Southern California.

They were taken with an undersized beach net confiscated by deputies. Delays came from bad weather, which prevented getting enough bass together within three days to make a shipment.

These fish were liberated in Alamitos, Newport and False Bays, in Orange and San Diego counties. It is thought by the Fish and Game Commission's experts that this is the most favorable season in many to tary the bass, as the streams stayed up well all summer and the early rains have helped pour fresh water into the lagoons.

Striped bass require brackish water and congregate where fresh mingles with salt. They are splendid either as food or game fish, and proved one of the most successful artificial propagations ever conducted by the fish commissions of Cfalifornia, being an introduced fish in the Sacramento river.

Run of Striped Bass.—Sacramento fishermen report a big run of striped bass in the Sacramento river and good catches are being made every day. Favorite spots for fishermen are in mid-stream above the Southern Pacific bridge and at the mouth of the American River. A 24-pounder was landed near the bridge.

Good black bass fishing is reported in the reservoir between Clarksville and Green Valley, fishermen having little difficulty in catching the limit. The reservoir is within easy motoring distance and the roads are good, either via Placerville or via Folsom.

Turkey Shoots Improved.—Thirty or forty years ago, when it was announced that there would be a turkey shoot at John Smith's on Thanksgiving Day, it was undeerstood that the shoot was to be at live turkeys; that the turkey would be placed in a box with a hole in the top of the box through which the turkey would protrude its head, and then the participants would be stationed at a certain number of yards from the box and be given the privilege of shooting at the turkey's head at so much a shot with a rifle, or that the turkey would be placed three or four times the distance away and the shooter would be allowed to shoot at the whole turkey, either from an off-hand position, kneeling or prone, but in the two latter instances at greater distances than when shooting off-hand. This method of holding turkey shoots, while it displayed a man's skill with the rifle, was cruel and inhuman, as the turkey would frequently be mortally wounded but not killed, and shooting at it would continue until it was finally killed, a turkey often bringing the management three or four dollars before it was put out of commission and another bird put up as a target.

This way of holding turkey shoots, however, was some years since abandoned because of its cruel nature, and nowadays when a turkey shoot is held the contestants shoot at a bullseye on a target, if using a rifle, or at inanimate targets if shooting is done with a shotgun, and the most humane person in the land can engage in the sport without feeling that he is doing anything cruel or inhuman.

At a properly conducted, up-to-date turkey shoot nowadays the turkeys are taken to the location where the shoot is to be held—either alive or dressed—and when a man by his superior marksmanship wins a bird he goes to the crate, or into the club house—if the turkeys are dressed—and selects his prize. In many sports the American people have made great progress within the last forty years, and the manner of conducting turkey shoots at the present time proves conclusively that sportsmen are a humane and progressive class of people.

HERE THEY ARE—TEN LIMITS OF DUCKS IN ONE PARTY.
Members of the Mud Hen Club at Alvarado having been enjoying excellent sport. Those in the picture taken by Al Durney are (left to right, on the rail), H. C. Peet, Homer Craig, Dr. Roscoe Day, Bob Valleau, H. P. Martine and George Thomas. Below are Lou Schroeder, Mark Fontana and Charley Hollywood.

Christy Mathewson at Traps.—"Christy" Mathewson, Bucknell '00, for many years on the pitching staff of the New York Giants, and now the manager of baseball's Jonah team—the Cincinnati Reds—is a "gun bug."

"Matty" gave a lot of his spare time to golfing the last year or so he was with the Giants and last fall he went along on the ball players' trapshooting team with Chief Bender, Harry Davis and Otis Crandall, though he was a novice, and now he golfs no more. All the time he has to spare away from baseball is given to trapshooting.

There will be no tour of the ball player-trapshooters this fall, but if there was Mathewson would be one of the party. He filed his application early. "Big Six" was a novice at the trapshooting game when the trip began, but he knew a lot about the "sport alluring" before he got through.

He became just as much of a student of trapshooting as baseball. He became interested in the sport, then a devotee, and then decided that he wanted to know just how to break 'em all the time. Matty talked with the cracks that it was his pleasure to meet and all of them supplied him with good advice, and as he made the rounds from Richmond to Omaha and back to Boston he picked up something in every city.

"Matty" was very frank in saying that his eyes were opened to the realization of the widespread interest in trapshooting. He never thought it was such a good sport or that so many people were interested in it. Since the trapshooting trip Mathewson has invaded the fields, too, and with Frank Stevens went into the North Carolina woods for ten days last winter.

Good baseball players as a rule make excellent trap shots. It is an accepted fact that it requires the same concentration, the same "pilot eyes," the same acting in unison of the eye, brain and nerves to become a successful baseball player that it does to become an expert trapshooter, and in either sport it requires practice to become a leader.

Trap Guns Made to Order.—The shooting of blue rocks at the traps has undergone an evolution in the last few years and the average scores have been getting higher and higher. Beyond doubt the greatest factor in this has been the change in gun equipment.

In other words, to hold your own with the cracks of today you must have a gun built for shooting blue rocks and that alone. A great many shooters who take out to the traps their field or duck guns, and find the game too fast, would be right among those who average the highest if they had only provided themselves with the proper gun. The pump gun was the first step in the evolution, and for that matter holds a prominent part to this day.

How often you have seen the seasoned sportsman, with a Scott or Purdy or some other high-grade American or foreign-made work of art, line up in the squad with a beginner armed with a cheap pump and come out of the race with the small end of the score to his credit—and after a repetition or two of this experience place his gun in the cabinet and devote his attention thereafter to fishing or golf.

But the sportsman who hesitated to add a pump or automatic to his collection (and a man shooting an automatic once won the Grand American) can now be supplied with up-to-date blue rock guns, both of foreign and domestic makes, of almost any grade and price.

One of the best bits of evidence to prove the correctness of these statements is found in the trapshooting squad that bettered all previous world's records at Maplewood, N. H., on July 7, by breaking 497 out of 500 targets. A. C. King, R. L. Spotts, C. H. Newcomb, the late A. B. Richardson and Fred Plum, all used guns that were built for the breaking of clay targets.

Further proof that the trapshooter of these days intends to keep in the swim was given at the recent Westy Hogans tournament in Atlantic City, N. J. Fully 98 per cent of the guns used were especially designed for blue rock shooting. You shooters of some years back, it is up to you. You can turn a weak 90 per cent into a strong 95 per cent in the averages if you use a gun that fits and is built for the breaking of clay targets. Try it and see for yourself.

Portland Club.—E. H. Keller was high gun and Felix Friedlander, shooting at bluerocks for the first time, the surprise at the weekly shoot of the Portland Gun Club at Everding Park on October 25th.

Keller shot a score of 92, which was two better than J. C. Morris and C. J. Schilling, the latter a professional.

L. Top Kenney started out like a Tom Marshall, breaking 12 out of his first 15, and 14 out of the second 15, but the strain was too much and he came a cropper (Picadilly stuff) in the last 20.

The scores follow: L. Topperwein Kennedy, 76, R. A. Cronin 72, E. L. Clark 72, C. N. Parker 72, H. R. Everding 86, E. H. Keller 92, C. J. Schilling (pro.) 90, W. C. Bristol (20 gauge) 72, J. C. Morris 90, and Felix Friedlander 66.

Sportsmen's Row

Billy Wilshire, the 20-gauge enthusiast, is another who added to the list of small-bore limits Sunday near Saugus. One of the latest dove limits reported was that of a party of prominent local physicians Saturday in lower Orange county, when Drs. Clarence Moore, George McCoy, William Toland and Edwin L. Hedderly got into a belated flight and then drove to the San Joaquin Gun Club for a big duck shoot the next day, one of the party killing a dozen mallards. All these gentlemen operate in the field with twenty-bores.

• • •

Snipe are coming in more strongly on the freshwater marshy edges and good sport with the longbills may be looked for another week. Geese have not come down at all as yet. They are due in November. All up and down the big interior valleys of California, shooting is splendid, and duck hunters report birds fat.

• • •

Now that a majority of the fishermen have deserted Catalina Island, the fish are running in great quantity, according to President Coxe of the Tuna Club. "Shorty," one of the boatmen of the island, returned to Avalon last Monday with a tuna weighing thirty-six pounds.

• • •

Al Durney, accompanied by Mrs. Durney, took a trip up in Sonoma county last week and did some fast and fancy shooting to get the limit of quail. He did not go out until 3:45 in the afternoon and by 5:30 he had his bag full.

• • •

O. N. Ford, the San Jose crack shot, had the misfortune to fracture two ribs and has been laid up for the last week. He was visiting some friends near his place at San Jose and in the darkness stepped off a porch and suffered a heavy fall. Bobbie was figuring on going to the registered shoots in Arizona but may be compelled to give up the trips.

• • •

George L. Knight of Fresno has emblazoned his name in the hall of fame as a huntsman of big game. Knight went forth in quest of big game with the opening of the season, and, using three shells, he brought down two deer and a bear. Knight secured his deer and bear back of the Big Meadows on Boulder Creek.

• • •

Four Fresno men, Pete Loinaz, Dr. Thomas Sample, Frank Wyatt and Mr. Brophy, have departed for Williams, Arizona, where they will be the guests of Lilo Perrin, in a bear and big game hunt. The party following their arrival at Williams will strike off into the mountains with a complete big game hunting equipment, there being six pack mules used to carry this equipment.

• • •

Thomas Hale, of Tennessee, is the only trapshooter who has won a State championship three times, and he has accomplished the feat in successive years.

• • •

You never hear the expression "Didn't know it was loaded" at a trapshooting tournament. Safety first is the rule that applies to all scattergun enthusiasts. No trapshooter puts a shell in his gun until he is going t oshcot. That's the reason there are no accidents at trapshooting tournaments.

• • •

After spending the summer in the White Mountains instructing women in the art of trapshooting Annie Oakley (Mrs. Frank E. Butler) is again at Pinehurst, N. C., and will instruct in the "sport alluring" there this winter.

• • •

The Arizona State championship tournament will take place at Phoenix on November 13, 14 and 15.

• • •

In a recent tournament in California Len Hawxhurst, a professional, broke 48 targets out of 25 pairs, which is pretty nearly a record for doubles shooting.

The Vallejo Gun Club is planning to reorganize and add a number of business men to the club roster. With the classy shooting of Andy Flickinger to stimulate interest, it is expected that Vallejo will enjoy a banner season in 1917.

• • •

The Fish and Game Commission has issued its fourth publication on the conservation of wild life through education. It contains many interesting and instructive articles. Thousands of copies have been distributed to sportsmen throughout California.

• • •

Bass fishermen are having good sport. The sloughs are filled with fish, this condition being offset by the fact that plenty of natural food is to be found by the "stripes." Frend Engle got a seventeen-pounder near Black Point. Joe Gabarino took one weighing eight pounds at Wingo.

Trout to be Rescued.—At the suggestion of the Forest Ranger Bert Stephenson of the Cleveland National Forest, a fund is being raised in order that 'rout imprisoned in the rapidly drying pools of some of the mountain streams may be rescued. According to Ranger Stephenson, between 4,000 and 5,000 trout can be saved if proper steps are taken: Although there are many places in Orange county trout streams where trout have been caught in pools, yet most of the fish in danger are located in the San Juan Hot Springs and the Trabuco Canyons.—California Fish and Game.

Do Anglers Buy Fish?—There is an old adage that "it takes a thief to catch a thief." This saying has nothing to do with the following incident, however:

About two weeks ago Ray Winter, one of the best-known anglers in Portland or vincinity, made a trip to Nehalem City, which is located on Nehalem bay, in quest of silverside. He was duly equipped with all the necessary rods, tackle, lures, reels, etc., which as secretary of the Salmon Club of Oregon he should be familiar with.

Before leaving, he promised Mrs. Winter that he would send her some of his first catch on the day of his arrival there.

Ray's intentions were all right, and he has the necessary experience and training to hook a trout or salmon if there is one within a couple of miles of his bait.

Upon getting out in Nehalem bay, however, he didn't have to wait long to discover that the silversides were not biting. Ray did get one strike, but the near-victim managed to get away, and at noon he went back to the city, empty handed.

After reaching the dock he remembered his promise to Mrs. Winter, and immediately oiled up the cylinders in which his gray matter is stored. Perceiving some seiners on the dock, busily engaged in hauling some fine silversides out of their net, he approached gingerly, with a furtive glance around, and asked whether he could buy a couple of them.

"Certainly," was the response.

After selecting two of the best specimens, he was just in the act of paying for them when he felt a heavy hand on his shoulder and heard a hearty, "Why, hello, Ray, what are you doing here?"

Turning around he beheld Walter F. Backus, secretary of the Multnomah Anglers' Club, and another of the best-known anglers in the Northwest, standing beside him.

Ray was caught red-handed in the act, and had no alibi to make. Consequently, he made a clean breast of the situation, and as one secretary to another, endeavored to keep the transaction out of the spotlight of angling circles.

The joke was too good to be kept, however, especially when Ray is known to be one of the greatest practical jokers among the club. Others got hold of the tale and passed it along.

Mrs. Winter received the fish, all right, and unless she should happen to see this story, she probably will never be any the wiser.

Anglers to Build Club House.—Seventeen members of the Lake Grove Anglers' Club, a newly formed organization of Portland, pledged themselves to subscriptions amounting to $255 for the construction of a club house on the club grounds at Oswego lake.

This was done at a recent meeting and it is anticipated that there will be no trouble in raising $500, which is needed to finish the first section of the club house. It is planned to add other sections later.

Stock is to be issued and a company incorporated. Blocks of stock can be purchased for $5 each, members to take as many as they wish.

Construction on the building will start within the next month, and it is planned to have it finished before the first of the year.

The Lake Grove Anglers' Club at present has nearly forty members, and has already had a great many black bass fry planted in the lake. It has constructed a large water wheel at the lake inlet and will shortly have both royal chinook and steelhead fry planted there, marking the first experiment of putting these ocean varieties in a land-locked stream in this vicinity.

Trade Notes.—Frank McCloughan and Frank Seymour won first and second places respectively at a recent shoot of the Ferguson (Mo.) Gun Club. Both of these gentlemen shot the perfect combination of Remington auto gun and Nitro Clubs. McCloughan missed only 3 of his quota of 50 birds, while Seymour was close on his heels with 4 misses.

At a recent shoot of the Libertyville (Ill.) Gun Club the three high amateurs all used the perfect shooting combination of Remington pump gun and Nitros'. T. E. Graham, E. McCormick and Geo. Lawrence took the honors, scoring 97x100, 97x100, and 91x100 respectively.

Scottish Deer Forests.—What is going to be done with the Scottish deer forests after the war? Some authorities say that some 2,000,000 acres throughout the Highlands will be taken from deer-forests and converted into sheep-walks. In 1891, 2,562,,133 acres of Scotland were devoted to deer. By 1911 this had been increased to 3,599,744 acres, all devoted to sport. Since 1911 more land has been taken, but, according to Sir John Stirling Maxwell, the amount of food the deer-forests produce is negligible. This land could never be productive, but it is argued that where so much has been taken from sheep and given to deer, the land might again revert to sheep. Then the question arises, Does the land produce more money as a deer-forest or grouse-moor than a sheep-walk? The shooting undoubtedly has it, but this does not solve the problem.

ADVOATES REGISTERED SHOOTS SUNDAYS.

California Trap Shot Writes to Back Up Breeder and Sportsman in Appeal for the Event.

Editor, Breeder and Sportsman:

I would like to write a few lines for your valuable paper on why the Pacific Coast should be allowed to have Sunday shoots registered. I was pleased to note that the Breeder and Sportsman went on record as favoring having the events out in this section of the country.

In 1914 only five amateurs in the State of California shot the required 2,000 shots to entitle them to an average. In 1915 there were only eight. Every shooter would like to shoot 2000 shots in registered tournaments and we have fifty in California who do, but one-half of them do not count as the big day is always Sunday.

If our Sunday shoots could be registered, California alone would furnish enough registered tournaments for all the trap shots to shoot the required 2,000 for an average. Furthermore, it would help the game, as every shooter would like to know if he attended the shoot what his mark would be, for the season.

When we California shooters look for other registered tournaments, Portland, Ore., is the first jump. Now, listen,—how many Eastern shooters would go to a shoot if they had to go 1400 miles? Well, that's what the Los Angeles and San Diego boys hove to do, and San Francisco shooters have to travel 775 miles.

I believe in the old adage, "When in Rome, do as Romans do," and as long as Sunday shooting is the big thing on the Pacific Coast we should be allowed registered tournaments on that day. I believe that the Interstate Association will do the right thing and a good thing for the trapshooting game if they will recognize Sunday shoots out here. Here's hoping that we get registered shoots on Sunday in 1917.

Yours respectfully,
A CALIFORNIA TRAP SHOT.

Pacific Coast shooters seem to be of the same mind in desiring registered shoots on Sundays. The matter has been brought to the attention of the directors of the Interstate Association and it is understood that the question will come up at the annual meeting in Pittsburgh next month. The reason the Interstate Association has not recognized trapshooting on Sundays was doubtless due to the blue laws existing in many Eastern states. Conditions are different out here, however, and it would seem to be a good move to permit registered tournaments as requested by the Pacific Coast devotees of the sport. Easterners would have no complaint to register and it would unquestionably be the means of creating more interest in trapshooting on the Coast.

Seattle Association.—Starting out with almost perfest weather and finishing the second part of the program with a direct north wind which "jumped" the targets at verying degrees, the shooters attending the Sunday morning shootfest at Harbor Island on October 22nd were given some handicaps that were not reckoned with.

Tom Wilkes stood at the head of the list in the 50-target program with 47 smashed "clays" to his credit. Three shooters tied for the second position honors in this event, C. E. McKelvey, Hugh Fleming and George Scripture each scoring a forty-five.

Hugh Fleming shot to the high score position in the hundred-target program, breaking ninety-four out of the bunch, while McKelvey stood second with ninety-two and Wilkes third with ninety-one.

J. M. Veder, a member of the Los Animas Gun Club, Los Animas, Colo., was a visiting shooter. The results:—

At 50 targets—Tom Wilkes 47, C. E. McKelvey 45, Hugh Fleming 45, George Scripture 45, W. B. Taft 44, J. M. Veder 43, C. W. Bandy 42, *D. Rhodes 39, John Considine 38, J. U. McPherson 23.

At 100 targets—Hugh Fleming 94, C. E. McKelvey 92, Tom Wilkes 91, George Scripture 86, W. B. Taft 84, John Considine 77, J. M. Veder 75, *D. Rhodes 74, J. U. McPherson 40. (*Professional.)

Yours, E. A. FRY.

Eastern Brook Trout Fry Obtained in Nevada—Our supply of eastern brook trout fry was increased considerably this season, as the Nevada State Fish Commission did not operate their hatcheries and we were able to secure the privilege of collecting eggs from Marlett Lake, Nevada. The Carson City Hatchery was taken over by the California Fish and Game Commission and the Eastern brook trout eggs collected from Marlett Lake were shipped to the Carson hatchery, where they were eyed and prepared for shipment. At this station 690,000 eggs were collected, 527,000 of which were shipped to Sisson hatchery to be hatched and reared for distribution in the streams of California. In addition to this lot, 110,000 eggs were shipped to the Verdi hatchery where they were hatched and reared. The fry resulting from these eggs will be distributed in the streams and lakes in the vicinity of Lake Tahoe.

The second monthly fly and bait-casting tournament of the Southern California Rod and Reel Club's auxiliary will be held at the Eastlake park grounds on November 12. The program will be an all-day affair, with a program in the morning and one in the afternoon. This is done because no tournament will be held in May on account of the trout season opening the first of that month.

TRAPSHOOTING COMPARED TO OTHER SPORTS

Cost Is Not as Great as Golf, as the Figures Are Wont to Prove.

[By Harriet D. Hammond.]

When people hear that it costs at the present time, owing to the high price of paper, felt, brass, lead and other metals, at the rate of one dollar and five cents to shoot a round of twenty-five shots, they hold up their hands in horror and without stopping to think, say, "None for mine: trapshooting costs too much for me—guess I will play golf for my recreation." Little do they stop to consider the cost of playing golf. Golf belongs to the Country Club, and to join such a club a person has to pay on an average fifty dollars for a share of stock and perhaps the same amount for annual dues, making the cost at the beginning of the first year about one hundred dollars. This does not take in the equipment necessary to the golfer, the minimum cost of which is about twenty-two dollars, not counting the cost of balls which are approximately nine dollars a dozen. Then, too, there are many little expenses connected with the game of golf that we will speak of in detail in another paragraph.

When we compare the cost of shooting to the cost of playing golf, some of the people who called us extravagant when we first started will immediately take off their hats to us and to the shooting game in general.

The first year the average cost of belonging to a trapshooting club is three dollars initiation and two dollars annual dues, making a total of five dollars against one hundred dollars. A good trap gun, such as has been used by many winners in trapshooting events, can be purchased for thirty-two dollars and fifty cents. This is an up-to-date gun and is the only necessary equipment. The equipment:

Golf—1 Caddy Bag, $5.00; 1 Driver, $3.50; 1 Brassie $3.50; 1 Cleek $2.50; 1 Mid Iron $2.50; 1 Mashie $2.50; 1 Putter $2.50—total, $22.50.

Trapshooting—Standard Trap Gun, $32.50.

It is true the shooter pays out more cash money to shoot during an afternoon than a golfer does to play eighteen holes of golf, unless the golfer has hard luck and breaks a club or loses several balls, but we must take into consideration the fact that the shooter has no other expenses connected with his sport. The average shooter finishes his game and goes home. Now the golfer besides his caddy fee has a number of other expenses. You know in golf there is a little game called "A ball in a hole" where the loser pays out almost enough in balls to buy a box of shells for his brother shooter, and then the golfer does quite a little entertaining, treating his friends to refreshments after the game and more often invites them to take dinner with him. Of course he does not pay for all of this at the time and probably loses sight of the amount he is spending, but at the end of the month when the bill clerk presents him with a statement, it makes him whistle. He never realized how many little items he had charged to his account during the month. Now at the Gun Club there is nothing but the sport and when everyone has finished shooting, the Secretary closes the club and the members all file home. Not having extra expenses the trapshooter is not nearly so apt to go beyond the amount he sets aside for sport as is his brother, the golfer.

Of course, the estimated fifty dollars annual dues in a Country Club entitles a member to all privileges of the club such as tennis, golf, billiards, swimming, skating, etc., but when you consider the many detailed expenses connected with each one of these sports, a person has to have a pretty good income to belong to a club of this kind.

Another thing, the average trapshooter is satisfied with one afternoon a week at the club, but the golfer spends a part of every afternoon on the links, usually after office hours, however.

Both the golfer and the trapshooter become extravagant and attend tournaments certain seasons of the year, and on that score they are just about even. They do not care at those times how they spend their money, for the tournaments spell Vacation for them and it is the only time in the whole year that the majority of business men take any time from their work.

In the above comparison of figures we certainly find that trapshooting is by no means the most expensive of outdoor sports, but on the other hand can be enjoyed by men and women who cannot afford to belong to the local Country Club.

Do not misunderstand me, please, I do not mean to say anything against the sport of golf, which we all know is one of the best and most popular forms of outdoor recreation. What I have tried to do is to convince the sport-loving people of our country that trapshooting is not the expensive sport they think it is and my only means of doing this is to compare its cost with the cost of other sports. To get my figures, I consulted with a brother sportsman who is a golf enthusiast and after he had given me the data I needed, we had a little heart-to-heart talk about sports in general and the cost of belonging to clubs and taking an active part in them. We came to the conclusion that sport is just like anything else in the world—the better the quality the greater the expense.

Getting some good wholesome exercise out in the open for an afternoon does a person more good than a week's treatment from a physician and is not nearly so expensive.

In this day of perpetual rush when work of all kinds is nerve-trying and there is such a great danger of a nervous breakdown for all of us if we do not take the proper care of our minds and bodies, it is absolutely necessary that we engage in some form of outdoor sport, and there is none more healthful than trapshooting.

One thing you can do, Mr. Trapshooter, during this period of financial stress, is to shoot economically. By that I mean to concentrate on every target and aim to break each and every one you shoot at, so that at the end of a string of twenty-five you will feel so well pleased with your efforts that you won't have to shoot seventy-five or a hundred before you can go home feeling satisfied with your day's sport and yourself. This self-discipline will not only help the condition of your pocketbook, but will improve your shooting wonderfully and you will soon get in the habit of making only good scores.

CALIFORNIA'S OLDEST GAME WARDEN IS DEAD

Alonza F. Lea died on Thursday, October 26th, in a Santa Rosa, Cal., hospital after lingering a week from a fractured skull sustained in falling from a step-ladder at his home at Cloverdale.

This news sentence tells of the passing of California's oldest fish and game deputy, in point of service, and one of the best-known and best-loved of the men who patrol the hills and streams for the preservation of wild life. While a comparatively young man of 49 years, Lea was recognized as one of the first to protect the interests of wild game.

J. S. Hunter, secretary of the Fish and Game Commission, pays a high compliment to the memory of Alonza F. Lea and declares that his loss is deeply felt. He says:

"Alonza F. Lea was one of the most experienced and active workers the Fish and Game Commission had in the field. Back in the nineties he was following his favorite vocation, to which he was so admirably adapted. He patrolled the length and breadth of the State of California. In 1903 he was regularly appointed and has seen continuous service in Lake and northern Sonoma and Mendocino counties. It was practically on his account personally that deer hunting in those sections is still in good shape.

"Lea was one of the most conscientious and painstaking deputies in the service of the Commission. He had the happy faculty of making a friend of the man he arrested. He was a wonderful judge of human nature. While he overlooked not one item in doing his duty as a deputy, he did it in such a manner that he won respect and friendship. His loss will be felt in the field. He cannot be replaced."

Vernon Club.—Stanton A. Bruner won the gold bar watch fob emblem in the 50-bird trap shooting tournament at distance handicaps held Sunday at the Vernon Gun Club.

His score was 49x50. This is the third bar won by Bruner. Meek and Fish were the runners up, each with scores of 48x50. Guy Holohan, DuPont professional, broke 105 straight throughout the day's shooting. The results follow:

Trophy Shoot—Holohan (handicap 19 yds.) 50, Blanchard (18) 46, Meek (18) 48, Fish (18) 48, F. H. Nichols (18) 43, Pugh (18) 42, Bole (17) 43, C. F. Nichols (17) 45, S. A. Bruner (19) 49, Dierdoff (18) 44, Mrs. C. E. Groat (18) 43, C. E. Groat (18) 47.

Practice Scores—Holohan 75x75, Blanchard 41x50, Meek 70x75, Fish 45x50, Greenberg 21x25, Keeny 54x75, Pugh 41x50, Bole 62x75, C. F. Nichols 46x50, S. Bruner 42x50, Mrs. Groat 23x25, C. E. Groat 24x25, Kimble 21x25.

Black Fox Is Only a Cat.—Assessor Frederick J. Spencer of Lexington, a director of the New England Fox Hunters' Club, went out fox hunting recently, and before he returned from the chase had solved the great mystery surrounding the black fox, which has been seen by several Lexington hunters this fall. The black fox is a rarity in this part of the country, and is a valuable animal, and all along, despite the reports from reliable sources that such a fox was living near Lexington, Spencer doubted the report. But he, too, nearly changed his mind, for while on Bannon's Hill, near the Burlington-Lexington line, he was startled to see what at first looked like a small fox running through some brush quite a distance off. As the fox passed a little nearer, however, Spencer's trained eyes saw that the fox was not a fox, but only a big black angora cat. The black cat was being chased by a bulldog, and was soon lost to sight.

Watch for Bands on Ducks.—If you kill or capture a wild duck bearing an illuminum band around one leg, having a number on one side and on the other a statement requesting that the United States Department of Agriculture or the biological survey be notified, you are requested to send this band at once to the bureau of biological survey, United States Department of Agriculture, Washington, D. C. This band, if accompanied by a statement as to date, place and circumstances under which the bird was taken, will be of service to the survey in its efforts to determine the longevity of individual ducks and the routes of migration of the species. The bands are being attached to considerable numbers of wild ducks of several species which have been cured of the duck sickness prevalent around Great Salt Lake, Utah, and there released.

QUAIL SHOOTING DUE FOR IMPROVEMENT.

Early Rains Scattered Birds; Duck Hunters Also Experience Better Sport in All Sections.

Quail Shooting is due for a big improvement, if you can take the word of such an experienced hunter as William H. Cameron. He was out on opening day with Bill McDonald down in Santa Clara county near Mt. Hamilton, rated as one of the finest quail-hunting spots in California. Cameron was surprised to find so few birds in flocks and he has reached the theory that the rains of early October was the cause.

"Ordinarily, rain is looked upon as a good thing for quail shooting," he says. "It is if it rains only a day or so. This year, however, there was a steady downpour in that section of the country for ten days before the opening. The natural result was that the birds were scattered.

"With the coming of the warm weather of the past couple of weeks the quail will congregate again and I look for some excellent sport. One thing is assured—the birds are plentiful in all sections. I have talked with hunters all over the State and they are enthusiastic over the abundance of game."

Reports are to the effect that duck-winging has improved, although in some parts the birds are still flying high and feeding well out into the bay. Even so there were approximately 1500 ducks shipped into San Francisco on Saturday and Sunday, which is an indication that some of the hunters must have been winging them.

Clarence J. Berry, the well-known San Francisco sportsman, brings word that the sport is picking up in the rice section up near Colusa. At his preserves at Live Oak, Berry shot the limit of ducks on Sunday and bagged fifteen geese, He says the northern birds are beginning to put in an appearance. His brother Frank Berry and Frank Kellar, who were with him, also experienced good luck.

Toney Prior, the well-known and efficient trap shot, has made a couple of trips to his preserve at Alvarado, but owing to his pond being dry he has not done much bombardment. Last Sunday he brought back a mixed bag of eight ducks, a couple of rabbits and a few quail. Leave it to Toney to get game if the birds are there.

Club hunters generally report fair success, although the majority of sportsmen feel that really good shooting will not begin until the influx of the northern birds. A few stragglers have come in and several flocks of bluebills have been observed, but the flight is not on yet.

No Hunting in Rice Fields.—Fish and game reports last week indicate plenty of ducks in the valley, but owing to the rice harvest, which is now on, it is difficult to get permission to go on the rice fields. There is good shooting on low lands near the rice fields, however. The noise and activity of the harvest is frightening many birds away from the rice. The State Fish and Game Commission reports:

Weaverville—Fishing on South Fork of river very good. Limit caught easily. Fish from six to ten inches long.

Taylorsville—No northern birds coming here. The weather clear. A few local ducks but they are gunshy. Fishing fair in all streams.

Sutter Creek—Mountain quail are all in their winter quarters from West Point, Calaveras county, to Fairplay, El Dorado county. Valley quail are well scattered at present, having been hunted hard during the first week of the season.

Truckee—Lots of ducks in and about Lake Tahoe. After first few shoots ducks went out on lake. Lots of mudhens. Big run of white fish up the Little Truckee river.

Red Bluff—Quail are quite plentiful. Ducks and geese scarce.

Place Feed for Ducks.—This is the exceptional year when all clubs and others interested in duck shooting should feed most heavily. Otherwise the birds will not stay in this end of the State, and all shooting will be a matter of flights, new ducks coming and going as soon as they find the fare so lean. Ordinarily they stand two or three shoots. Grain of all kinds is very high, but some damaged beans can be had reasonably. Barley is the best small grain, but corn is the most acceptable food for big birds, also most costly.

Quail hunters report the birds lying very close in the cool grass, and requiring much slower, more methodical working-out of the ground to get them up. This, of course, is exactly what the possessor of a good dog most desires. All such are fortunate.

Champion Woman Huntress.—Yoncalla, Ore.—One of the most successful woman hunters of the state is Mrs. Gus Peret of this city, who killed the limit of three deer and in addition bagged a big bobcat on her recent hunt near Loon Lake, Or. The party consisted of Gard Sawyer, the guide, Dolph Samler and Mr. Peret, in addition to the fair Diana. Seven bucks were brought down by the entire party and Mrs. Peret bagged nearly half of them. Two bucks, a three pointer and a fork horn, were killed on the morning the season opened at a distance of 150 yards with a .250 calibre Savage rifle. Mrs. Peret fired four shots, three of which were hits. The other three-point buck was killed at 175 yards, using five shots, three taking effect. After a chase of three miles a hound finally treed the cat and it was shot with a remodeled U. S. government rifle.

Stock Breeders' Page

To Save Children from Bovine Tuberculosis.

To aid farmers to protect their own and other people's children and also their cows and pigs from tuberculosis, is the object of a circular on "Bovine Tuberculosis" written by Professor C. M. Haring and just published by the University of California. Human beings can get tuberculosis by drinking unpasteurized milk or eating butter from tuberculous animals. So can calves or pigs. And it pays to prevent the disease.

Everyone in California who owns a cow or has to do with cattle ought to read this circular, in the opinion of Dean Thomas F. Hunt. It is particularly timely because the new milk-pasteurization law has just gone into effect. It will be sent free to anyone who writes to the College of Agriculture at Berkeley for it.

No farmer can afford to let tuberculosis continue on his farm, in the opinion of the University. Not only does he want to suppress it for protection to his family and his customers, but also just from the pocket-book point of view it pays to control tuberculosis among farm animals.

To get rid of tuberculosis, the first step is to find out how many cows are infected. Professor Haring tells how this is done by the tuberculin test.

If less than fifteen per cent of the cows are tuberculous, then Professor Haring advises that all found infected be separated from the rest of the herd, that the premises be thoroughly cleaned and disinfected, with constant attention to the complete removal of all manure, that the herd be re-tested in two or three months by the ophthalmic method, and every six months thereafter by the intradermal or subcutaneous test, and that no new cattle be admitted to the herd unless they pass the tuberculin test and unless they come from herds comparatively free from tuberculosis.

Buy your cattle from sound herds, urges the University, for even an animal which does not react to the tuberculin test may really be tuberculous, if it has come from an infected herd.

Sometimes the veterinarian finds that seventy or eighty per cent of the cows in a herd have tuberculosis. In badly infected herds, all animals which show to the eye that they are tuberculous should be removed from the herd. A large proportion of these can be slaughtered for beef, under inspection.

All calves born of tuberculous cows should be removed immediately upon birth and raised on boiled or pasteurized milk, and all healthy young stock separated absolutely from tuberculous cows or infected fields and water. Since calves are very seldom born tuberculous, if the young stock could be kept free from contact with tuberculous animals or infected fields and water, a single generation would put an end to tuberculosis in cattle.

On farms where it is impracticable to keep the healthy cattle away from infected cattle, then at least there should be frequent and careful physical examinations by a veterinarian, to eliminate "open cases," or animals in such condition as to spread the disease. This makeshift system is, however, far less satisfactory than complete separation, since it can only reduce the disease, and not eradicate it. In large herds, the cattle should be kept in small units, with separate corrals for each group of fifty or sixty cattle, and separate water troughs for each corral. Calves should not be fed with sweepings from the feed-troughs. Hogs or goats should be excluded from the corrals. Cattle should not be allowed access to ponds or water-holes. Direct sunlight is the best possible disinfectant, and barns should have as much window-space as possible and be well ventilated.

The greatest cleanliness should be practiced in milking, and in cooling and transporting milk. Not only is a clean stable important for the people who drink the milk, but for the health of the cows themselves.

Hogs or cattle should not be given access to manure-piles, since manure is a means of spreading tuberculosis. The walls and ceilings of milking sheds should be kept free from dirt, dust, and cobwebs. The interior of the stable should be whitewashed at least twice a year.

No milk from tuberculous cows should ever be fed to calves or pigs until it has been boiled, or pasteurized by heating for twenty-five minutes at a temperature of at least 140 to 145 degrees Fahrenheit, for neglect of this precaution spreads tuberculosis.

And exactly the same thing is true as to milk for babies and children. For people to drink, it is usually preferable not to heat milk above 145 degrees Fahrenheit.

People who buy milk and butter hereafter will be protected by the beneficent new State law, which became effective October 1, 1916, forbidding the sale of milk or butter which has not been pasteurized unless the milk came from cows proved healthy by the tuberculin test.

In the farm home, children, as well as the calves and the pigs, should be protected, just as are city dwellers now, by the rule that no milk from tuberculous cows shall be used until it has been pasteurized.

MARKETING LIVE STOCK AND MEATS.

Washington, D. C., Oct. 16, 1916.—Marked variation in methods of marketing meat animals in different sections of the United States and in methods of marketing different classes of animals in the country as a whole has been found by specialists of the U. S. Department of Agriculture from a survey of the live-stock marketing conditions of the country. The data obtained by the survey have been published as Part V of a report of an exhaustive study of the meat situation in the United States.

The three general methods of marketing found to be in most common use are:

Shipping to the large centralized markets, selling to local butchers and packers, and the sale of farm-prepared meats to dealers or consumers. The bulk of the animals from the Central States, it was found, is sold through the centralized markets, while some form of local marketing predominates in the extreme eastern, western, and southern sections.

The great central markets handle four-fifths of the sheep and lambs, two-thirds of the hogs, and approximately one-half of the beef cattle. For local slaughter about one-third of the beef cattle, one-eighth of the sheep and lambs, and one-twelfth of the hogs are sold. Nearly one-third of the hogs and about one-tenth of the beef cattle and one-twentieth of the sheep and lambs are slaughtered on farms and ranges. Relatively more sheep are shipped in carload lots by owners than any other class of live stock. Cattle, hogs, and calves follow in the order named. In sales to local buyers hogs lead, with calves, cattle and sheep following in order.

The study discloses that the time of buying stockers and feeders and the selling of finished animals is restricted too generally to a few months of the year. Should stock-feeding operations be better adjusted to market conditions, a decided influence toward a more even distribution of the supply would be the result.

Co-operative associations of cattle raisers are becoming an important factor in marketing, the report shows. Seven hundred and fifty organizations which market cattle in a co-operative way now exist in 15 States. Four hundred and thirty of these organizations are primarily live-stock shipping associations. The greatest activity of this sort was found in Minnesota, where 215 co-operative live-stock shipping associations are located. The Department specialists declare that these associations bring greater returns to the farmers because of the reduction of marketing expenses and the realization of the prevailing prices at the centralized markets, and that they are also valuable because of their educational features.

Stockyards and Packing Establishments.

The system of centralized live stock markets in the United States is the largest single factor in the marketing of meat animals. It is noteworthy that this system is peculiar to the United States, no other country having developed such markets for their live stock. Not only is live stock sold for slaughter at the centralized markets, but a large proportion of stocker and feeder cattle also passes through these market centers.

The chief outlet for food producing animals in this country, the study discloses, is wholesale slaughtering and meat packing. Such industries usually are associated with the great centralized markets. More than 1,200 slaughtering and meat packing establishments were operating in the United States in 1914, and turned out products worth $1,651,765,424. The specialists report that one of the striking features of the industry is the concentration of ownership. Packing establishments buy directly from the producer in California to a greater extent than in any other State or section. This practice, which in the opinion of the specialists, will continue to be important in those parts of the country remote from centralized markets, is most characteristic of the western group of States in general. There is a decided difference of opinion among producers, marketmen, and packers as to the effects of this practice in sections supplied with central markets on the general market prices of live stock and on the prosperity of cattle raisers.

Municipally owned or controlled abattoirs are becoming increasingly important in the local marketing of live stock, the report shows, and are displacing rapidly the old type of slaughterhouse. Public abattoirs have been established in 22 cities and 13 States. Local conditions should determine whether or not a city should build its own abattoir, and a thorough examination of conditions, therefore, should be made before definite action is taken.

Great variations were found to exist in the losses of and damage to live stock in transit on different railroads. On one road the claims paid amounted to 19 per cent of the revenue during a certain period, and on another to less than 5 per cent. The total claims for such loss and damage in 1913-1914 on 27 railroads were $1,245,477.81. The average rates on live stock for the years 1911 to 1913 were found to be 10 cents per hundred pounds for eastern or official territory, 11.9 cents for southern territory, and 14.9 cents for western territory.

The correlation between average live stock and meat prices over relatively long periods is closer than is generally understood. When the price of live stock rises or falls, meat prices tend to change in the same directions, but the meat prices are not subject to abrupt daily fluctuations, which are one of the most adverse features of live stock market conditions.

Market Returns.

In order to secure information as to the relative cost of the different factors or steps in the processes of marketing animals and the proportions of the final price reaching the farmer and other parties to the transactions, the specialists traced several typical lots of beef cattle from producer to consumer, both through centralized markets and where the animals were disposed of locally. In the former case the farmer's share of the gross returns ranged from 54 per cent to 85 per cent, while from 2 per cent to 5 per cent went to pay market expenses, 2 per cent to 9 per cent was received by the packers, and 8 per cent to 33 per cent by the retailers. In the local sales, from 62 per cent to 84 per cent of the gross returns was received by the farmer and from 15 to 38 per cent by the retailer. The detailed figures indicate, however, that even when account is taken of the fact that lower grade stock is sold locally the returns from such sales are not as great relatively as those from sales through centralized markets.

Unusual Livestock Show.

For the last two years the Wisconsin Livestock Breeders' Association has planned and exhibited at county fairs in that state a kind of exhibit which might well be copied in other states. It should bring big results in the Association's campaign for more and better livestock.

The exhibit is called the Wisconsin Profitable and Unprofitable Livestock Show, and places its lesson and plea for better livestock before the people in the form of striking contrasts. For example, in the beef class this year, two animals were shown. The first was a choice baby beef steer, aged sixteen months, weight 1040 pounds, value $109.20 at $10.50 a hundred weight. Beside this animal was another of the common, rough type. This animal weighed only 920 pounds at three years, and was worth but $59.80 at $6.50 a hundred pounds.

The first year that this type exhibit was made by the Association a high-grade steer that had accumulated $95 worth of baby beef in thirteen months was shown beside a neighbor, a common, rough scrub, that had been able to lay on only about $45.65 worth of meat in two years . The latter steer had probably done his best, but he simply hadn't been planned to accommodate high-priced cuts of beef. His legs were long and scrawny, his hind quarters shallow and flat, and his ribs were concaved from his backbone in such a fashion that no amount of corn was ever going to push them out. He presented a pitiful contrast to the low, finely compacted, squarely built fellow on the other side, whose general make-up said: "My porterhouse steaks may cost you meat eaters thirty-five cents or more a pound, but they'll be worth it."

Of the two dairy cows exhibited this year, one besides possessing most of the desirable outward attributes of a good milk and money maker, had a record of 461.8 pounds of butterfat in 1915, worth $150.75. The total feed bill for this animal amounted to $60.92, giving a profit of $89.83 to her owner. The cow at her side had produced in 1915 exactly 136.5 pounds of butterfat, worth $45.24. The profit made was $3.90.

The first year of this type of exhibit, a pen of rough, inferior hogs was worth $7 a hundred-weight on the open market, or $9.80 a hog, while the good butcher hogs next door were worth $25.79 each, at $8.90 a hundred-weight. In the face of such figures no one had the hardihood to say that a pure-bred boar on the farm was a nonpaying investment.

This year the hog exhibit consisted of four hogs. Two were prime butchers, with an average weight of 250 pounds and valued at $10.05 a hundred-weight. The two other hogs were scrubs which tipped the beam at about 125 pounds each. Eight dollars a hundred was all that could be secured for them.

Two kinds of lambs were also shown with similar contrasts between the appearance and value of the trimmed and untrimmed, between the choice and cull lambs.

In every case not only were the animals themselves presented for inspection, but the weights, production records, selling value and present worth were made plain on large placards. These records were actual, having been obtained by the field agent of the association, and then verified.

Wool Sale at Cloverdale.

Cloverdale, Oct. 28.—The annual fall wool sale at Cloverdale this week resulted in the highest price being paid for the clip in years. About 350 bags of northern Sonoma and southern Mendocino clip was sent to San Francisco, having been sold during the day.

Several buyers were present from San Francisco and the bay section. Prices were good, ranging from 17½c to 20c a pound. Buying was so keen that several buyers were disappointed because the early ones on the scene had gone around before the sale and secured options and sales.

At the fall sales a year ago wool sold for 15 cents per pound and mohair at 27 cents. Prices this fall have been the highest in many years. Not since 1887 have the growers received as high a price for their product. In that year the average price for fall wool was 20 cents per pound. In 1911 growers received but an average price of 8¾ cents for their fall wool, that being the lowest price recorded since 1897, when fall wool brought only 6 cents per pound.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Gombault's Caustic Balsam will give you immediate *Relief.* A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

By Using It You Are Safe and Sure

Read for Yourself:

"I Want the Whole World to Know What This Medicine Has Done For Me," writes Frank Stevens, of Greenwood, Ind. "Save-the-Horse has cured bone spavins, thoroughpins, blood spavins and one with a sprained stifle—also a neighbor cured his rheumatism with it," etc.

J. W. Sponseller, of Dixon, Ohio, is foresighted and knows he never can tell when he will need our remedy, so is always prepared. He writes us that he has cured two bog spavins as large as a fist, so that you cannot tell where they were, and sold his horse at a good profit. "I consider your bottle was worth $100 to me. People said I could not have them off, but you have proved them wrong."

"There Is No Other As Good," says Fred Simmons, Antelope, Oregon, who also writes: "I have used your Save-the-Horse with great success," etc.

"Billy Completely Cured of Bad Case of Splints and Tendon Complications." "Used one and a half bottles of Save-the-Horse on him," etc., writes Fred Courtland, Waches, Wash.

"I Have Had Your Save-the-Horse For a Year or More—Think it O. K." W. D. Hudson, Clayton, Del.

"Uses Save-the-Horse With Great Success in Training Stable," so writes Harry Dunn, 719 Dryden Road, Zanesville, Ohio.

$5 Every bottle sold with a Signed Contract to return money if Remedy fails on Ringbone, Thoroughpin, SPAVIN, or ANY Shoulder, Knee, Ankle, Hoof or Tendon Disease.

WINCHESTER

NICKEL STEEL REPEATERS, EXTRA LIGHT

Nickel Steel, which has about twice the tensile strength of the steel commonly used in guns, is utilized entirely in the construction of the Winchester Model 1912 repeating shotgun; and, consequently, it is the lightest and strongest repeater on the market. It is also considered the handsomest. It is made in 12, 16 and 20 gauges, and although on the market but a short time, is now the biggest selling repeater. Get one.

Use ***WINCHESTER*** "Leader" or "Repeater" shells in Winchester guns, and in guns of any make, as on account of their patented construction and uniform loading they always give the best results. Winchester shells were used by the winner of the Grand American Handicap.

THOROUGHBREDS

Like a blooded horse or a pedigreed dog, the Remington UMC Pump Gun is trim, clean cut, dependable under every condition. It's thoroughbred from butt to muzzle. If a gun may be said to possess a heritage, the Remington UMC name most certainly represents all that is progressive and modern in gun making—a whole century of experience in manufacture lies back of Remington UMC.

Thousands of critical sportsmen at home and abroad hail Remington UMC as the consummate achievement in arms manufacture.

Your nearest sporting goods dealer will be glad to serve you.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

$2,500 GUARANTEED ONLY $2 TO NOMINATE MARE GUARANTEED $2,500

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

MONDAY, DECEMBER 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. $1,000 FOR THREE-YEAR-OLD PACERS

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

AN EARLY ANNOUNCEMENT of a California circuit for 1917, as suggested in these columns some weeks ago, is meeting with great favor from horse owners and from the managers of fair associations all over the State. The nine associations in California that gave race programs this year will give them next year and in every instance there will be an effort made to give a little larger purses for a few more classes. It these associations will send representatives with power to act to a meeting in December, it will take but a few hours' work to arrange and announce a circuit that will draw horses from Oregon, Washington, Idaho, Nevada and other points and make the circuit one of the best ever arranged on the Pacific Coast. From every track where trotters or pacers are trained we hear of trainers getting new horses to begin work on, while there are more than fifty colts and fillies on which payments have been recently made in the two-year-old stakes for 1917, while the number of coming three-year-olds to be trained is even greater. Any good aged trotter or pacer that has speed enough to give reasonable assurance that he can win a part of the money in the 2:30, 2:20 or 2:15 classes can be sold for a fair price in this State, and if the proposed circuit is announced by January 1st, a still better price can be obtained. The whole question of whether or not there will be a California circuit in 1917 worth training horses for is up to the horsemen and the associations. It is the duty of every horse owner and trainer to do what he can to induce the association in his county to make an official statement that it will give a race program in 1917. It is the duty of every association that desires to give a race program to make such an announcement, and it is the duty of the leading ones to get the representatives of all the associations together at as early a date as possible to select dates, arrange programs and announce the same. The leading fairs and associations in California are the California State, the Fresno, the Kings, the Alameda, the Kern, the Ventura and the Riverside county associations, and the Pacific Coast Trotting Horse Breeders' Association. These all gave race programs this year, and the officials of each one have said they would give meetings next year. But the time for announcement must not be put off until late in the spring, as there will not be sufficient horses to fill a program if there is such delay, while an announcement made by January 1st will put so many horses into training that there will be no difficulty whatever in filling a program that is intelligently arranged. And the great Arizona State Fair should be taken into consideration in arranging a circuit, as it desires to affiliate with California. The Phoenix association is well patronized by California horsemen. It gives a grand wind-up to a Pacific Coast circuit and its officials should be invited to meet and consult with the officials of our California associations. But the main thing is an early meeting of the associations' representatives. December is the proper month for this meeting and we hope it will not be delayed beyond that date.

A WELL KNOWN BREEDER of thoroughbred horses expressed the opinion to the editor of this journal, the other day, that a meeting and conference between the breeders of thoroughbreds and the breeders of trotting and pacing horses might be held in this State that would result in great benefit to both interests. Time was in California when at every fair that had a racing program, the runners and the harness horses were alike provided for and all the prominent breeders of the State met at these fairs in friendly association and rivalry for the honor of winning. This was before the advent of the bookmaker, the individual who made wagering on a horse race so obnoxious to the general public that the legislature adopted a drastic law that has put the thoroughbred and almost put the trotter off the map in California. The writer believes that the State and every county fair association in California should make up its racing program with both running and harness events. He also believes that the California State Agricultural Society should announce stakes or futurities for thoroughbreds as well as standard breds and that every legitimate inducement and encouragement should be given to the breeding of both breeds of horses in California. If such men as Geo. L. Warlow, M. L. Woy, I. L. Borden, C. A. Berry, Ben. F. Rush, L. H. Todhunter, L. L. Cannon, Frank L. Turner, A. W. Longley and many others among the trotting horse breeders could meet and consider the many questions relating to the breeding and racing of horses with such men as Messrs. A. K. Macomber, C. W. Clark, Edward Cebrian, A. B. Spreckels, Albert Joseph, R. J. MacKenzie, Chas. Boots, Rudolph Spreckels, E. J. Molero, E. P. McDaniels and others among the breeders of thoroughbreds, we believe something could be accomplished whereby the sport of racing both thoroughbreds and trotters could be revived in California on a higher plane than it has enjoyed for many years, and out of such a conference might come some plan by which Californians would have the pleasure of seeing their horses raced here at home and racing become what it should be, the most popular of all sports with the best people of the land.

English Blood in America.

When the great European war first broke out, England very foolishly decided to put up the bars and limit the exportation of thoroughbred blood, but the folly of this was soon realized. It must be clearly understood that the best stock has not left England and will not leave. It is beyond purchase. There has, however, a great deal of good material come to us across the Atlantic and this will be of incalculable value to this country although, in my opinion, in many cases the prices paid have been somewhat sensational. This has been due to the fact that a number of Americans, eighteen months or so ago picked up some very good stock and, when the panic broke out, others wrote and cabled without avail, and being unable to obtain what they wanted quite a number lost their heads and jumped at anything in sight. Thus, at the sale of the Clarence H. Mackay yearlings, bids of two hundred dollars each were rained upon the auctioneer for a horse that was standing in the ring and coughing his head off. This was the height of sensationalism. I am not decrying the magnificent stock sold by Mr. Mackay, but I think the average of three thousand three hundred dollars for the fifteen head sold seems rather optimistic when compared with a number of yearlings from well known stables which brought only an average of nine hundred and forty-five dollars at Newmarket in November, 1915.

Of course, it would be idle to attempt to minimize the value of such strains as Sun Star, Chaucer, Polymelus—said to be the greatest horse in England today—Spearmint, Marajax, St. Amant, Swynford, Cicero, Santry, Roquelaure, Roi Herode and a number of others; and it must not be forgotten that Roquelauere is a half brother to the famous Rock Sand which cost Mr. August Belmont, if I remember aright, in the neighborhood of one hundred and fifty thousand dollars. His services were lost to this country by the rabid action of ex-Governor Hughes.

So, looking at the subject impartially, I think that those owners among whom Alexander Smith Cochran is especially prominent—who have pinned their faith to well-bred horses of American blood, will not regret it and I think they will come out on top. Such good English horses as Crimper, Star Hawk and a number of others, will hold their own, but the story of the English horse Short Grass is already the tale in italics to all those who are able to run and read. The period of becoming acclimated is close at hand and I fancy the English horses now racing will go stale. That clears the deck for this year. As to what the English yearlings will do in 1917, it is of course on the knees of the gods, but for my part, I have no fears for the results and I expect to see the best of our American bred stock hold its own—and then some—with the best of the importations from foreign lands, so far as mere speed is concerned. The value of many of the foreign blood lines in the animals recently imported is incalculable.—[Will F. Pond.

The fame of Zombro continues to grow after his death. Four of his get are in the list of new 2:10 trotters for 1916, and Peter the Great only has four in the same list.

SADDLE HORSE NOTES.

The illustration occupying the title page of the Breeder and Sportsman this week was taken by photographer Richardson at the California State Fair this year, and shows a portion of the parade of saddle horses on stock parade day. There are but a few of the five gaited horses shown in the picture. Mrs. Leota Zapp on her high school horse Jupiter leads the group, and the horse ridden by the gentleman beside her is the trick horse that delighted the large crowds in the tent each night by his marvelous performances. Next is Billie Fredela, ridden by J. J. De La Mater of Modesto, and next is A. D. Davis and his stallion Shield Montrose. The docked horse is Mr. E. S. Heller's Star I., ridden by Mr. Kramer, and the last horse in the photo is King Cyrus, a three-year-old by Dom Pedro, ridden by C. Bork.

Miss Ruth Ward, a society lady of San Francisco, rides almost daily in Golden Gate Park from the Park Riding Academy. Miss Ward is an expert horsewoman.

Capt. John Dilbam, the foremost and best known riding instructor on this coast, is drilling a class of some twenty members on Wednesday evenings from 8 to 10 o'clock at the Park Riding Academy. The first hour is devoted to instruction and the last to drills and jumping. On Friday nights the Captain and his charming wife, who is a splendid horsewoman, conduct a class for beginners. Among the riders are Mr. and Mrs. Chas. Hoar, Mr. and Mrs. Reilly, the Misses Comal, Healy, Schaffer, and the Messrs. Titus, Fitzgerald, Heller, Myerstein and O'Conner. Last Wednesday the pupils and their friends enjoyed an exhibition of high school riding given by Mrs. C. J. Zapp.

The Park Riding Academy, 2934 Fulton street, is now in charge of Gordon L. Smith, late with the Durland Co. of New York, and formerly stable manager of the late E. H. Harriman.

Mr. E. O. McCormick, vice-president of the Southern Pacific Company, is a daily rider in Golden Gate Park. Mr. McCormick has always been a patron of the horse. When the late Col. J. C. Kirkpatrick was alive, Mr. McCormick was a frequent guest at the Kirkpatrick bungalow at Pleasanton, and often enjoyed a mount behind one of the Colonel's trotters on workout days.

Longview Horses Average $218.87.

The most important event of the season in the saddle horse world took place at Longview Farm, Lee's Summit, Mo. (near Kansas City), Tuesday, October 31st, when the inaugural sale of Longview Farm's show horses was conducted and the 31 head of young saddle horses made an average of $218.87 or a grand total of $6,785. In fact, this is a record average for inaugural sales of saddle horses of this age, as most of the offerings were not of serviceable age. It was one more of those glorious days for Longview's premier stallion, My Major Dare. This was not the first time that he has caused countless numbers to stand aghast at his excellence, as he has been one of the truly great show animals of the last quarter century; nor was it the first time he has caused expert horsemen to be amazed by his ability as a sire, as those great futurity shows at Mexico and other great colt shows of the land, where the progeny of this beautiful stallion have been such successful entries, are not forgotten. However, it was not the first time in his career that he has been seen at his home court and with his get not only on exhibition, but selling for the high dollar, which is after all the supreme test. The sale average testifies to the decision of those present. When he was brought before the audience and exhibited he seemed a greater horse than ever before. He was prouder, gamer and more supreme. If he was a popular horse on the many occasions when he was crowned king of saddle stallions he was more popular and appreciated here. After his exhibition Kentucky's Best was brought out, and only the tremendous ovation given My Major Dare dimmed the cheers which greeted his appearance. Had this horse been in any other stable in America he would have been as greatly appreciated as My Major Dare was.

In opening the sale, R. A. Long made a stirring speech in which he welcomed the visitors and explained fully the policies of Longview. In expressing their views he stated that Miss Loula's greatest admiration was for the high acting harness horse and his for the five gaited saddle horse.. He declared that My Major Dare thrilled him every time he was exhibited as nothing else had ever done and at the very moment My Major Dare was being paraded before him and everyone appreciated the fact that his presence was responsible in a large measure for this, Mr. Long's most thrilling speech.—Missouri Stockman.

[We have not space to give a complete summary of the sale, but will state that the highest priced horse of the sale was Bon Ton that sold for $700, Major's Aurelia, a yearling, coming next at $600, and Imperious King third at $310. Four horses brought $300 each, and five sold for less than $100, the lowest priced animal bringing $50.—Ed. B. and S.]

KERN COUNTY FAIR AND RACES.

The Kern County Fair held at Bakersfield this year was a big success. Fifteen thousand dollars was realized from gate receipts, entries, sale of space and concessions, according to a statement given out by C. A. Barlow, general manager. Of this total $11,000 was from admissions. The county board of supervisors gave the fair association $2,000, making a total of $17,000 revenues with which to meet disbursements. It is believed the fair will have a small surplus but that will include the cost of 85 new stalls for the stock exhibits. During the fair a petition was circulated and heavily signed, petitioning the county supervisors to take over the fair grounds as a public enterprise and to conduct the fairs in the future as county fairs. The exhibitions of live stock were large and excellent. Few localities in the United States can make a better showing than Kern county and none can make a more diversified exhibit.

The races during the fair were excellent and while there were no large fields the contests were keen. Owing to rain and the fact that the track was very deep and dusty, the time made over the half mile was very slow, but the public thoroughly enjoyed the race program and the grandstand was crowded every day. The results of the harness races were as follows:

Wednesday, Oct. 25.

Time—2:22½, 2:23½, 2:20¾.

Wilkes Brewer, a daughter of Nutwood Wilkes, is the champion half mile track trotter of 1916 and is now picked by some excellent judges as the best thing in sight for the big Grand Circuit purses of 1917 which will be for 2:07 or 2:08 class horses. She was overlooked a year ago when she trotted a mile at Lexington in 2:07½. None of the Grand Circuit jocks figured her a good buy, but Fred Jamison, who is a topnotch reinsman, performing mostly on the two-lap courses, liked the mare and last winter succeeded in getting hold of her for this season. She has not lost a race, has taken a half mile track mark of 2:08¼ (the best over that sort of course by a trotter in a race), and looks like a sure 2:04 or better proposition next summer on the fast mile tracks, as she is sound, well bred and has the best of manners.

◈ ◈ ◈

Iviolette, by Moko, is certainly destined to become extremely famous as a producer, her every foal which has so far appeared having secured a trotting record as a yearling. Her three consist of Emma Magowan (1) 2:22½, (2) 2:07½, U. Forbes (1) 2:21½, (2) 2:12¼, and Jay Lee (1) 2:28. Emma Magowan was one of the season's sensations and was separately timed a half right at a minute in a race, while U. Forbes holds the world's record for yearling trotters over a half mile track.

◈ ◈ ◈

Emma Magowan (2) 2:07½, by J. Malcolm Forbes (4) 2:08, is the new world's champion two-year-old trotter over a half mile track, having placed the record at 2:12 at Goshen, N. Y., last month. In this great performance the filly trotted a half in 1:03¾.

◈ ◈ ◈

John A. McKerron 2:04½ secured credit with another fast record performer last week when the three-year-old Irish Voter paced to a mark of 2:10.

DEATH OF NUTWOOD WILKES 2:16½.

Stallion Bred by the Late Martin Carter Dies From Old Age at Springfield, Ohio.

Word comes from Spruce Lawn Farm, Springfield, Ohio, that the great California sire Nutwood Wilkes 2:16½ died from old age on that farm Sunday, October 29th. It was in 1891 at San Jose that this son of Guy Wilkes first came into notice. He was a three-year-old, having been foaled at Nutwood Stock Farm, Alameda county, in 1888. The late Martin Carter, who bred him, had entered him in a field of aged horses, the others being Billy Thornhill, Delmas and Bay Rum, and the followers of the trotting game, having seen the colt at work, made him favorite in the pools. Delmas won the first heat in 2:29½ with the colt second, Nutwood Wilkes won the next two in 2:29½ and 2:27½, but Billy Thornhill took the next three in 2:28½, 2:32½ and 2:31, with Nutwood Wilkes second every heat and making a fight for first money. He stamped himself a game colt then and while his racing career was not much, had it not been for lameness he would have made a highly successful race horse. He reduced his record to 2:16½ in a winning race several years after, but it was in the stud that he made his greatest success and sired many fast race winners, and the sires and dams of many.

Nutwood Wilkes was bred by the late Martin Carter and was the premier on the Nutwood Stock Farm until Mr. Carter's death, when he was sold at auction at a dispersal of the farm horses, bringing $2,300, which was the bid of Mr. John H. Wilson, proprietor of Spruce Lawn Farm, Springfield, Ohio, who owned him until the horse's death last month.

Up to the close of 1915 Nutwood Wilkes had sired

72 standard performers, and several new performers by him have entered the list this year. He was the sire of John A. McKerron 2:04¾, Wilkes Brewer 2:08¾ and Prof. Heald 2:09¼, trotters, and Copa de Oro 1:59, Del Rey 2:03¾, Nutmoor 2:05¼, Happy Dentist 2:05¾, Tidal Wave 2:06¾, Miss Idaho 2:09¼ and others. His daughters have been great producers, and Martin Carter often remarked to the writer that it was as a broodmare sire that he expected Nutwood Wilkes to make his greatest reputation. He sired the dam of that great sire San Francisco 2:07¾, also the dams of Lady Mowry 2:09¼, Redeem 2:10, Dan McKinney 2:10, and the pacers Mona Wilkes 2:03¼, Miss Georgia 2:08½, Demonio Wilkes 2:09¾ and several more with records below 2:10. One of his daughters, Trix Marshall, has produced three pacers with records below 2:08.

Nutwood Wilkes was a handsome chestnut in color, and stood 15.3 hands, was a good headed horse and a fine individual.

While he was mated with quite a number of well bred mares on the Nutwood Stock Farm, the number of standard bred mares sent to him by outside parties was not large, although he always had a fair season in the stud.

Nutwood Wilkes, as the majority of our readers know, was by Guy Wilkes 2:45¼, dam Lida W. 2:18¼ by Nutwood 2:18¾, second dam Belle by Geo. M. Patchen Jr. 2:27, third dam Rebel Daughter by Williamson's Belmont.

The picture of Nutwood Wilkes herewith is from a photograph taken at Pleasanton in 1909, the day he was sold at auction to Mr. Wilson for $2300. It is an excellent likeness of the famous horse as he looked then. He was at the time twenty-one years old.

Harold Dillon, son of Sidney Dillon and Guycara by Guy Wilkes, exported to New Zealand in 1905, has proven a very successful sire in that country. During the season of 1914-15 his get won 40 races, and in 1915-16 they had 41 winning races to their credit. They have won at all distances from one to three miles. Harold Dillon's fee is now $50.

The mile of Lee Axworthy 1:58¼ in 1:59¾ over the Atlanta, Ga., track, in his exhibition to beat the Georgia State trotting record of 2:05, was under existing conditions one of the most wonderful feats in the career of the great stallion.

Four-in-Hands to Race for $1000 Cup.

William H. Moore and J. Campbell Thompson wi not have the contest to themselves this year for th Vanderbilt Memorial Cup for road four-in-hand team at the National Horse Show, as they did in 191 Encouraged by his victory over Mr. Thompson i a similar class at the Westchester County Hors Show, William Ziegler Jr. has entered the lists a the Garden. Both Mr. Moore and Mr. Thompson ar going to show brand new teams; a tacit admissio that George H. Hulme was right when he said h could not see a road four in either lot last year. M Moore's four grays, he thought, were too ligh waisted for road work, and they seemed unable, h said, to go along at the pace road fours are expecte to show. Mr. Thompson's horses impressed th judge as being a more substantial and serviceabl lot, but they showed no such speed as would hav been required to win if their only competitors ha not been equally lacking. Knowing that Mr. Thomp son was driving them in defiance of the Doctor orders, the judge assumed that they could hav shown more speed if called on, and so they wer placed first. If the ring committee had sanctione such a thing both teams would have "got the gate. Mr. Moore's new team will not be open to criticisr as lacking in substance and power, if reports fro Pride's Crossing are true. The wheelers are sai to be 16.2½ hands and the leaders 16.1 hands, wit bone and substance in proportion.

The Vanderbilt Memorial Cup is the most valuabl trophy ever offered at an American horse show, bein of solid gold and costing $1,000. It must be wo three times to become the property of an exhibito This means that it will be in competition many years if the future can be judged by the past. The origina Waldorf-Astoria Cup for gig horses offered on th same conditions, was not won outright until 1906, 1 years after it was donated by Geo. C. Boldt. Horse men complained that it was too hard to win ou right, and when Mr. Moore finally captured th trophy with Forest King and replaced it with anothe trophy called the Forest King Cup he changed th conditions so that it could be won outright by tw instead of three victories by any owner. This please the exhibitors, but it prevented the Forest King Cu from becoming any such classic of the show rin as the Waldorf-Astoria Cup was. The most covete trophy of this kind in Britain is the Cawdor Cu a perpetual challenge trophy, which never can b won outright, and this is true of the America's Cu in yachting, and of the International Trophy in pol When the American Hackney Horse Society last yea donated $1200 for two competitions for hackneys i harness at the National some of the members though it would be of far more benefit to the breed to giv a perpetual challenge cup with a miniature of th original to the winner of the class each year, bu the opposite view prevailed then and again thi year.—New York Herald.

San Francisco S. P. C. A. Awards Medal for Kindnes

The members of the San Francisco Society for th Prevention of Cruelty to Animals at their fort eighth annual meeting, held recently, awarded th Society's medal to Sam H. Harris, a private of Troo C, Tenth Cavalry, with General Pershing's column i Mexico, and unanimously passed resolutions com mending the trooper for his kindness and devotion t his horse.

Harris' troop was in the fighting at Carrizal an was entirely surrounded when Harris escaped b riding his charger through the lines of the enem Both he and the horse were wounded and later h was compelled to abandon the animal. Harris' stor in which he attributed his escape to the courage an faithfulness of his horse, was widely published an came to the attention of the Society.

Matthew McCurrie, secretary of the Society, a dressed a communication to the commander of th troop inquiring as to the truth of the story and reply was read at the meeting from Lieut. Benjami F. Hoge, commanding troop C, at Colonia Dublan who stated: "Your letter in regard to Private Sa Harris of this troop was duly received. Harris wa wounded at Carrizal and has been away to a hospit in the States. For that reason my answer was d layed until his return in order that I might verif the story you mention.

"Upon careful investigation I find the facts of thi case are essentially as reported, and I believe Harri would appreciate as well as deserve any credit o recognition that your Society might extend to hin Also I believe it would serve as a splendid exampl to the other soldiers, and help to create a fine spir among the men."

Reports of the officers for the year were read a the meeting showing that a total of 10,863 cases wer investigated in San Francisco. Eighty-three case were prosecuted and 2,694 reprimands were admi istered. The animals involved were 31,701 and r lieved 13,591. Officers examined 18,895 horses an 75 horses, 3,344 dogs and 7,388 cats were humanel destroyed. Two hundred and sixty-one disable horses were moved in the ambulance.

The previous board of trustees was re-elected f another year. The members of the board are Joh Partridge, Geo. M. Mitchell, Geo. A. Smith, J. Hutchinson, Ira B. Dalziel, John McGaw, Theodo Kytka, W. K. Gutzkow, John I. Walter, Frank Harris, John M. Ratto, Geo. U. Hind, C. Heller, B. Brisac, Edgar T. Cutter.

Thoroughbred Matters

Tijuana Opens Today.

The Mexican racing season opens at Tijuana, Lower California, today, and reports sent out by the publicity department of the Lower California Jockey Club predict a highly successful season with from 600 to 800 horses quartered at the track. Of course none of the leading eastern stables will be represented at this meeting, but the smaller stables and the owners who race primarily for the purpose of betting on the results will be very numerous and there will be many of the better known trainers and jockeys who find in winter racing an opportunity to earn considerable money. California breeders will doubtless be well represented at the meeting as this is about the only chance they have to run their horses at a regular race meeting without going to the heavy expense of shipping across the mountains during the summer. As the Tijuana track is a fast one and the climate of Tijuana almost perfect except during the heavy rain storms, there is likely to be a large attendance, especially at week ends, as they race on Sundays in Mexico and many go down from Los Angeles on Saturday for two days of sport.

Kentucky Spring Dates Set.

With the closing of the Kentucky racing season last Saturday, members of the State Racing Commission met at the Latonia track and allotted dates for the spring meeting. General W. B. Haldeman stated that in his opinion there should be less than 100 days of racing in Kentucky, and that most of the complaint of the surfeit of racing pertained to Louisville.

The Kentucky association asked for twelve days, to begin April 27, but General Haldeman opposed such an allotment, as it was an increase over last season. On the same ground the request of the Latonia track for twenty-four days was cut down to twenty-one days. H. C. Applegate, who represented Churchill Downs, was ready to submit officials for next season virtually the same as those serving this year, with the exception of J. B. Campbell as secretary, instead of Edward Jasper.

The naming of the officials was deferred on request of John Hachmeister, who was of the opinion that thirty days before the opening of the racing season would be time enough to name the officials for each track. The dates follow:

Kentucky Association, Lexington, April 28 to May 10, eleven days; New Louisville Jockey Club, Churchill Downs, Louisville, May 12 to 25, twelve days; Douglas Park Jockey Club, Douglas Park, Louisville, May 26 to June 9, thirteen days; Latonia Jockey Club, Latonia, June 11 to July 4, twenty-one days.

Legislation to be Asked in Illinois.

The success of the short racing meeting held at the historic Hawthorne track last summer has led to the starting of a campaign by Chicago sportsmen who are interested in seeing running races conducted in Illinois once more. It is the intention of those back of the movement to introduce a bill for passage in the next Illinois Legislature. The campaign will start in earnest immediately.

According to the bill the backers of the movement have in mind, a commission named by the Governor or the Legislature will have full control of the sport, with authority to either grant or refuse permits for race meetings. The dates will be divided so that there will not be any conflicts in the different cities. No one track will be permitted to conduct a meeting for longer than twenty-five days at one time.

Army Riders at National Horse Show.

Army officers from the Mexican border made a flying trip to New York under permission granted by the War Department at Washington to compete for The Jockey Club Plate and other prizes in military classes at the National Horse Show in Madison Square Garden.

The officers went on special leave of absence from the War Department and shipped their horses direct to the Garden, arriving on Friday, Nov. 10th, the day before the opening of the show. Under the new law, which has cut off all appropriations to defray the expenses of army officers competing at horse shows, the War Department has merely detailed the officers to take part in the exhibition, and will bear no part in their expenses. The men will therefore be the guests of the National Horse Show Association this year.

The military contingent will include Lieutenant Gerald T. Hanley, who has entered Lansdowne, Haro, Ironsides, and Vickery; Captain J. A. Barry, Second Cavalry; Captain A. H. Platt, First Cavalry; Captain R. G. Alexander, Captain G. M. Russell, Captain D. D. Pullen, Captain D. P. Card, Lieutenant M. M. W. Youngs, Colonel C. W. Fenton, Captain C. G. Harvey, Major William Mitchell, Lieutenant P. R. Frank, and Captain A. Miller, Troop F, First Cavalry.

The attendance at the Atlanta meeting was the best of any during the summer at the mile tracks.

New Orleans Controversy Ended.

New Orleans, La., October 28.—"I think it is fair. The agreement ought to be binding on both," said H. D. "Curly" Brown today as he signed the final agreement with the Business Men's Racing Association, thereby ending a controversy which threatened to kill the sport of kings here during the coming winter season. Brown receives $40,125 for signing the agreement by which he agrees not to race here in eight years. The business men get City Park track with all of its buildings.

The agreement was signed at two o'clock this morning in a room in the Hennen Building. No one here but the men intimately interested knew it was taking place. Brown was got out of bed to attend it. He went with Chris Fitzgerald, W. P. Ball and A. B. Letellier accompanied President A. MacDiarmid of the Business Men.

During the discussion the matter of financing the $75,000 which the Business Men are to pay Brown was considered. Brown said he appreciated that the task was not an easy one to be accomplished in twenty days in view of the fact that the Business Men are obliged to invest about $55,000 in the farm show.

"So far as that is concerned," he finally said, "while I do not want to put it in the agreement, if I can do so without financially embarrassing myself, I will extend the time ten days rather than see the deal fall through."

The business men decided to sell the sixty per cent of stock which they have not issued or so much as may be necessary. It is not expected they will find any difficulty in placing enough stock to provide the $35,000, which added to the $40,000 they are to post on Monday, will close the transaction.

C. H. Berryman Buys Ballot.

Charles H. Berryman has purchased from the heirs of the late James B. Haggin that very high class race horse and sire Ballot, and the son of Voter and Cerito will be placed at the head of Mr. Berryman's stud at Sakonnet Farm.

Ballot was a very high class race horse and stake winner at two, three and four years old of seventeen races of the value of $145,505, and in second and third moneys, $7,750, while in England he won the Select Stakes of $1,347, making a grand total of eighteen races of the value of $154,602. He won the Double Event, Neptune, Matron, Iroquois, Invincible, Great Republic, Century (twice), First and Second Specials, Election Day Handicap, Edgemere, Standard, Advance (twice), Equality and Suburban Handicap. Ballot was bred and raced by the late James R. Keene.

Ballot's blood lines are exclusively English, for both of his parents are imported animals. His sire, imp. Voter, will be remembered as one of the most brilliant milers in American turf history, and those who hold that the chief attribute of a successful stallion is "speed" have obviously no need of looking further than imp. Voter for their ideal. Voter's sire, Friar's Balsam, was himself a racehorse of which it might well be said that no one really knew how good he was. Then, too, imp. Voter's dam, imp. Mavourneen, was a daughter of the unbeaten Irish-bred Barcaldine, for which no course was too long and no weight too high.—[Thoroughbred Record.

Madden Sells 27 Star Shoot Weanlings.

One of the biggest deals in the thoroughbred line in recent years was consummated Thursday of last week, when John E. Madden of Hamburg Place sold to H. Price Headley, Beaumont Farm, who with W. B. Miller of New York, owns Uncle (son of Star Shoot), twenty-seven foals by Star Shoot. No price was given out but a very substantial sum is known to have been received for them.

Mr. Madden raises more than a hundred foals every year and a similar sale to this was made in 1915, when Gifford Cochran purchased forty head of yearlings, half of them by Star Shoot and half by Ogden.

These weanlings are now at Hamburg Place, but will be transferred to Beaumont next week, and with the foals by Uncle now at Beaumont will give Messrs. Headley and Miller a most promising lot of yearlings for 1917.

Good Year on Irish Turf.

London, Nov. 3.—Horse racing has enjoyed a good season in Ireland this year, due principally to the many entries of English horses ridden by English jockeys. In the list of winning owners H. Ellis, whose Furore won the Irish Derby, is at the top with $14,675, and close up at second place is W. A. Wallis with $14,165, an amount due almost entirely to the double event scored by his useful filly, Captive Princess, in the Irish Oaks and St. Leger. Richard Croker is third with $12,125, and Mr. Parkinson, who has won thirty-four races, is fourth with $9,950.

Other fortunate owners are James Daly, $8,455; C. J. Blake, $7,870; R. B. Dobell, $5,720, and Albert Lowry, $5,690.

P. Behan heads the list of winning trainers with eighteen winners, worth $23,385, followed by J. J. Parkinson with thirty-two winners, valued at $20,925; James Dunne, seven winners, $18,915, and J. Arnott, twenty-three winners, $16,055.

Fungleman is the leading sire with three winners of the value of $16,525. Captivation is second with four winners worth $14,840, and Earla Mor third with six winners, totaling $9,200.

Why Alien Horses Disappoint Owners.

There are a number of disappointed owners of young foreign race horses in the United States. The cause of their disappointment is the failure of yearlings imported by them from England and France to show high class form as two-year-olds against American horses of their own age in races on metropolitan tracks last season. Liberal prices were paid for these baby racers of royal breeding, whose performances here fell far short of the deeds of their sires and dams on the French and English turf.

Of the one hundred and fifty youthful alien thoroughbreds imported and raced by Americans within the last year only one has proved himself to be a performer of real quality. The single exception is August Belmont's French bred two-year-old Hourless.

This colt, whose sire is Negofol, a one-time French Derby winner, took a long time to convince sceptical horsemen of his greatness in spite of the fact that a stake victory over James Butler's speedy colt Ivory Black marked his initial effort on an American track in the Juvenile at Belmont Park on May 27 last. Subsequent failures led many horsemen to believe that his spring victory was of the fluke order, but later performances at Saratoga last August and in Maryland recently have compelled all to hail him as one of the best of his age in this country.

The disappointing races run by the other horses of foreign breeding have given rise to all sorts of conjectures as to the reasons for the same. Explanations offered by different authorities for their failures are as varied as the colors of a rainbow, but the one most generally accepted by old time horsemen and breeders is that the horses have not yet become acclimated and will not reach that state until next season.

W. H. Rowe, registrar of The Jockey Club, an authority on the subject in the United States, is a strong supporter of that theory. Mr. Rowe believes that no horse born and bred in Europe, regardless of age, can show his best racing qualities until he has been here a year and a half or two years. And Mr. Rowe has indisputable data to support his contention.

"The bitter experience of American sportsmen of today with foreign race horses is not new to those who have followed the fortunes of imported stock in races on the American turf," said Mr. Rowe.

"More than twenty years ago," he continued, "Mr. John A. Morris met with like disappointment with a string of young horses he bought in England at high prices. All failed when put to the test here. In the lot imported was the celebrated sire Ornus. This horse was brought to the United States when a yearling. Mr. Morris had high hopes for the horse on account of his superb blood lines and speed trials in England, but he failed to win until he was a four-year-old, although he started many times as a two and three-year-old. In the stud he sired such good horses as Olambala and Oiseau.

"That experience convinced Mr. Morris that the game was not worth the candle, for the reason that the element of chance was too great to justify the big outlay of money involved in the transactions. He therefore hit upon the idea of sending some American brood mares to England, mating them with high class stallions there and bringing the produce to this country as weanlings. It was a happy scheme, because several of these weanlings earned high honors on the American turf when they reached racing age. The Friar and Bowling Brook were two of the most notable weanlings thus bred and imported by Mr. Morris.

"The success achieved by Mr. Morris' schemes convinced me that a successful thing for a prospective purchaser of foreign race horses is to buy weanlings or mares with weanlings and ship them here, or send American mares abroad and mate them with the best stallions. Mr. Morris, as well as the present day buyers of alien stock, purchased with a view to the two-year-old stakes because they are more valuable than prizes offered in events for older horses.

"If an American pays a big price for a yearling abroad and has to wait a year or two for the animal to attain his true form, those years of waiting represent a most fortunate period of unproductiveness on the part of the importation. In other words, after the valuable two-year-old and possibly three-year-old events are decided the animal begins to show high form when his greatest opportunities have passed. It reminds me somewhat of the saying, 'The operation was successful but the patient died.'"—[N. Y. Herald.

Columbine, a chestnut-coated daughter of Garry Herrmann, and Navarre's Hope, from the stable of George D. Widener, was an easy winner of the Walden Stakes, which was the turf feature run for by two-year-olds over the mile distance at Pimlico last Saturday. A half-dozen lengths back of the winner was the Kentucky Stable's Courtship, who ran a game race and just managed to beat Samuel K. Ross' Cadillac by a neck for second money, while Waukeag, the top weight, was beaten but a head for third money.

◈ ◈ ◈

John E. Madden has made the announcement that he will have seven stallions at Hamburg Place for the coming season. Star Shoot, Ogden, Friar Rock, Pataud and Plaudit will be private, while the fee for Hessian will be $300 and Ormondale $100.

Harness Horses and Horsemen

Made a Successful Campaign.

The stable of Sutherland & Chadbourne returned to Pleasanton last week after a most successful trip through the California circuit. It did not look early in the year as though we would have a circuit here in California, but we finally got moving and there were harness race meetings at Santa Rosa, Dixon, Sacramento, Pleasanton, Fresno, Hanford, Ventura, Riverside and Bakersfield—nine meetings in all, and had they all been announced together early in the spring, the entry lists would have been much larger. As it was Sutherland & Chadbourne, with the senior member of the firm to look after the management of things, and Fred to do the training and driving, started in 45 races on the circuit, won 17 firsts, 14 seconds, and came third or fourth the rest of the time with two exceptions, when they were outside the money. As their horses all reached home in good condition they feel very well satisfied with their summer work.

The Indianapolis Speed Sale.

Frank P. Kenney will open his speed sale at the State Fair Grounds, Indianapolis, on Tuesday next. Two hundred and twenty-seven horses have been catalogued and among them we notice the following familiar to Californians: -

Searchlight 2:03¼, sire of eight in 2:10, consigned by Ray Moore, Agent. Searchlight is now 22 years old but is said to be in prime condition.

Raisin Girl, trial 2:10½, a seven-year-old brown mare by Tom Smith 2:13¼ out of Lady Owyhee by Owyhee. This mare was bred by J. W. Zibbell, of Fresno.

Hedgewood Patchen 2:09¼, record made on half mile track in a winning race. This chestnut pacing gelding, bred by Dick Wilson, is well known to all the Pleasanton horsemen, as he got his first work there. This horse is consigned by Stoughton A. Fletcher who states that he is selling several horses as he intends to confine all his horse interests to breeding, developing and racing the Peter the Greats. At Cleveland this year Hedgewood Patchen worked a mile in 2:05¼. He is now six years old and took his race record this season.

Edna Ansel, a two-year-old by Prince Ansel, dam Edna Saunders (sister to Adlon (3) 2:07¾, Rusticoat (3) 2:08¼ and Dorothy Axworthy (2) 2:21½) by Axworthy, that was bred by Woodland Stock Farm and sold east, is consigned to this sale by Mr. E. Beckwith of Aurora, Illinois. She is well staked.

Diamond Mac 2:15¼, a trotter, and son of Kinney Lou 2:07¾, is also one of the California bred ones to be sold. He is now 13 years old, but was better than a 2:12 trotter this year on half mile tracks. A. J. Wood, of Goshen, Indiana, consigns him.

This sale will furnish a good gauge of the Indiana market for trotting bred horses.

Breeding Horses to Color.

Commenting on a statement made not long ago by Professor W. S. Anderson of the Kentucky State Agricultural College that recent discoveries concerning the laws of heredity make it possible to breed horses of any desired color, the New York Herald says:

To establish a family, strain or breed of chestnuts is a very simple matter. It is only necessary to mate chestnut mares with chestnut stallions. No attention need be paid to the ancestors of the parent stock, for no matter what may have been their color there will be no more bays, browns, blacks, grays, roans or duns if only the sire and dam are chestnut. Just this was done in England centuries ago by the breeders of Suffolk draft horses, and today there is not a pure bred Suffolk in the world that is not a chestnut horse. More than twelve thousand of them have been registered in the stud book and they are all of one color. Scientific men say they have lost the power to transmit any other color to their offspring, hence the Suffilks must remain a breed of chestnuts so long as the breed remains pure.

The old English breed of coach horses known as the Overland bay runs true to color if, as the scientific men maintain, brown is only a shade of bay. Bay parents do not always insure bay foals, except in this particular breed. But there are bay horses that when mated with black or chestnut mares always produce bay colts. When these individuals that are pure dominates for bay have been discovered the problem is practically solved, for this process of selection in two or three generations will give the skillful breeder a pure family of bays.

Several experimental breeders have established strains of gray Arabs, shires and hackneys by using gray stallions and mares that proved to be pure dominants for their own color. These individuals are not very common among gray horses, as shown by the records of turf and stud. Many carry latent elements from which chestnuts, blacks and bays are produced, but when those that breed true have been found and mated it is then only a question of time and elimination until every mare of the family, when bred to a horse of the family, can be counted on for a gray foal.

Establishing a family of black horses is much the same as evolving a strain of bays. Starting with black parents and eliminating those that do not breed true will in a few generations give to the breeder animals in which the power to produce any other coat color has been lost.

The law of heredity involved in the transmission of coat color is regarded as the key to other problems in breeding which have puzzled generations of horsemen and scientists. And the remarkable progress made in the last few years in working out the laws relating to color are by many believed to presage developments of the first importance in breeding for speed, action and other valuable attributes or traits.

The Higgins Starting Machine in New Zealand.

A large majority of the harness races held in Australia and New Zealand are handicaps. Horses are handicapped by seconds on a majority of the tracks, with a large starting clock that ticks the seconds and rings a bell for each horse to start. Recently horses have been handicapped by yards instead of seconds and there has come a demand for a machine that will enable the fields to be properly controlled and sent away on even terms. The New Zealand Referee of recent date describes a new starter that has been patented by Mr. M. Higgins and called the Higgins Starting Machine, which is said to quite fill the bill. Of a trial of this gate made recently at Addington, New Zealand, the Referee says:

"Considering that the apparatus was quite new to the horses, they moved off well when the barriers were released, and it would seem to be only a matter of education to get them properly accustomed to it. The barrier, for which Mr. Higgins holds a complete patent in the Dominion, is as effective as it is simple. It consists of a wire running in pulleys along either the inside or outside rail of the track, held at the starting post by a lever, and attached to a strong spring fixed at the rear of the limit handicap mark. At each handicap mark a pin attached by clip to the wire holds a single strand elastic barrier to a brass block, also affixed to the rail. Each barrier, consisting of rubber and cord, is attached to the opposite rail of the track. When the horses are all facing their respective barriers the starter releases the lever. The tension of the spring instantaneously releases all the barriers, which fly as one to the opposite rail. The machine worked quite satisfactorily at its second trial."

Those who have seen runners started here in California with a single strand barrier, will readily understand the simple working of the Higgins machine from the above description. There is one of these barriers at each handicap distance and behind each barrier is the horse handicapped to start at that distance. As standing starts, or starts without scoring are the custom in New Zealand the Higgins machine should be very successful, and were some such thing introduced in this country we do not doubt but handicaps for trotters and pacers could be arranged and perhaps become popular. The machine has one recommendation at least, it is inexpensive.

Trotting Horses in Austria.

John Splan received recently an interesting letter from the American trainer, George Bodimer, for many years one of the leading horsemen of Vienna, Austria. The letter bears the date of August 12 and says that conditions in that country as a result of the war are not nearly as bad as might be expected and that as soon as it is over there will be a great demand for good trotters, race horses and stallions for the Austrian market. He asked Mr. Splan to keep watch for some good sons of Peter the Great and mentioned some other stallions over here that he thought would suit over there. Mr. Bodimer said that his health, which had not been very good for some time past, was much improved, and that both Edward and James Benyon were achieving great success in that country, as was that other American trainer, Charley Lyons, who has been there for a number of years. Mr. Bodimer expressed himself as well pleased with a two-year-old filly by Shady G. 2:10¼, out of Early Alice 2:06¾. Mr. Bodimer bought the stallion, Ernest Axtell 2:08¼, through Splan, and is well pleased with him, as his letter tells of a colt that he sold for $1,000, which was less than a year old and had never been broken.—[Western Horseman.

Light Harness Horses for the Cavalry.

The fact that the arguments of certain prominent officers of the U. S. Army, as to the vaunted superiority of the thoroughbred for military purposes, is ineffable twaddle, designed to create public favor for the running tracks by securing government recognition of that breed, is significantly proven by the experience of the foreign nations now at war. Writing to The Rider and Driver, R. de Pravohensky, of the Department of Agriculture at Petrograd, Russia, states that more than half of the number of horses taken for military use in that country have trotting blood in their veins, and some of them have fast records. As to their utility for the army, he quotes from the report of the Imperial Board of Horse Breeding in Russia, which contains a statement from a well known general in the Russian army, to the effect that "the progeny of developed speed horses demonstrated more endurance and stamina than the other breeds." By speed horses is meant the standard bred American trotter, which Russia has been extensively importing and breeding for many years, and her own native Orloff trotters, and not the modern fragile five-furlong sprinters of the thoroughbred tracks.

The writer above quoted adds that the government will, after the war, apply more attention to the acquirement of stallions exclusively of registered trotting and racing track records.

Mr. Walter Winans, the well-known London patron of the American trotter, in another letter to our contemporary, substantiates the assertions of the Russian writer by citing the fact that the governments of Russia and Austria employ a settled policy to encourage the breeding of trotters for army purposes by giving sanction and aid to harness racing, allowing no horse over nine years of age to race, and in the principal events no gelding, in order to preserve them for the purpose of improving the breed for military use. Mr. Winans states that in Austria one of the $10,000 purses has a proviso that the winner must stand for sixty government mares at a low fee. It is a rather deplorable fact that our own army officials have not sense enough, or, if they have, are so devoid of national pride, that they cannot recognize these important facts which have been deduced from the experience of other nations with far larger and better opportunities for knowledge upon the subject.—[The Trotter and Pacer.

New York Horse Market Good.

"Any horse fit to work finds a ready buyer," is the way Frederick Wagner, president of the Fiss, Doerr ½ Carroll Company, described the present situation in the New York horse market. "The demand for good, serviceable horses," he added, "really exceeds the supply. Last Monday morning a carload of draft horses arrived at our auction mart in East Twenty-fourth street. These animals found buyers within a few hours after their arrival. The Standard Oil Company of New York bought a majority of the lot." Mr. Wagner also said there had been unusual activity in their equipment department, the demand for blankets and robes, as well as harness, being very heavy. Two of the large taxicab companies bought several hundred robes.—[N. Y. Herald.

An Inbred Prize Winner.

A saddle colt exhibited at the Kentucky State Fair this year won first in the class for fine harness colts and second in the ring for saddle colts, each ring containing about 15 entries. This is the most inbred colt that has ever been seen at the Kentucky State Fair, yet he was one of the best ever shown there. He was sired by the saddle stallion Roosevelt, his dam was by Roosevelt, his second dam was by Bourbon King, the sire of Roosevelt, his third dam by Wait's Indian Chief and his fourth dam by Harrison Chief. Harrison Chief sired Bourbon Chief, he sired Bourbon King and he in turn sired Roosevelt. The colt was foaled May 10th, 1916, and Sept. 1st measured 12 hands, 1 inch high, and weighed 375 pounds. His dam was a poor suckler and the colt was thin.

Horses Loved by Soldiers.

The fact that King Ferdinand, of Bulgaria, has a favorite black charger which he has named Varna, after the place of that name on the Black Sea, where his summer place is located, reminds one of the affection which has existed between celebrated soldiers and the horses which have accompanied them through their numerous campaigns.

One of the most famous war horses was Lord Roberts' gallant charger, Volonel, which died a few years ago, and lies buried near the Royal hospital, Dublin. Volonel was a gray Arab, which Lord Roberts bought in India, and he rode the animal to Kandahar.

Lord Roberts was very much attached to the animal, and when Queen Victoria awarded medals to the soldiers who had gone through the Afghan war the hero of Kandahar proudly hung round his charger's neck the medal with four clasps and the Kandahar star of bronze.

The best known of Lord Kitchener's war horses was a handsome chestnut which he named Omdurman. The animal carried Kitchener during the battle, and ultimately went with his master to South Africa during the Boer war—[Westminster Gazette, London, Eng.

RACES AT ROHNERVILLE.

A day's racing was given at the Rohnerville, Humboldt county, half mile track on September 17th this year. There was a free-for-all pace with three starters and a race for named horses in which four horses started.

The judges were M. Clausen, F. Rolley and Robert Niles, while Geo. Graves, A. Mason and W. M. Bryant acted as timers. Ramona, winner of the pace and Octo C. and Frank Ellery, first and second in the other race, had but five weeks' training up to the day of the race. The summary:

Free-for-all pace (2 in 3), purse $200:

Ramona, by Cassiar	(Jennings)	1	1
Myrtle T. P.	(Noble)	2	2
Young Monterey	(Alford)	3	dr

Time—2:16, 2:17¼.

Named race (2 in 3), purse $100:

Octo C., by Cassiar	(R. T. Bryant)	3	1	1
Frank Ellery, by Cassiar.....	(East)	1	2	2
Lady Dillon	(Toninni)	2	3	3
Peggy Dillon	(Landgerin)	4	4	4

Time—2:25, 2:24¼, 2:26.

Notes and News

Phoenix meeting opens next Monday.

The season's records will not be final until that is over, as there is usually some record breaking there.

After raising a colt by Manrico 2:07¼, Judson Girl 2:07¼ is back in the stable of Walter Cox.

All McKinney 2:04 is the fastest five-year-old pacer of the year.

Bonington 2:04¾, the handsome little stallion, goes to The Old Glory Sale.

J. Malcolm Forbes 2:08 now has twenty-six yearlings in the standard list, eleven being his score for this season.

Hemet Stock Farm expects to mark a few colts and fillies at Phoenix next week, and perhaps hang up a world's record or two.

Charlie Valentine was the only trainer who had a larger number of horses at the finish of this season than he had when he started in the early summer.

The race record at Atlanta was set at 2:07¼ trotting and 2:03 pacing, by Mabel Trask and Roan Hal respectively.

J. Malcolm Forbes (4) 2:08 is now credited with twenty-six yearling trotters in the list, eleven of the number having secured their records this season.

Inquiries are already being made as to the stallions that will be in public service in California next spring. It is not too early to make announcements now.

The number of new 2:10 trotters is now said to be 81 for 1916. There may be one or two more before the last horse is thrown out of training for the season.

The idea of announcing a California circuit early in January is being endorsed by horsemen all along the line. Several old timers among the horse owners are getting ready to do the "come back."

It is strange, but true: W. M. Hogoboom of Walla Walla is called "the silent man" by the Washington horsemen, yet he is an own brother to H. S. of this State.

We were informed last week that a Youngstown, Ohio, gentleman offered $20,000 for Lucile Spier 2:03¼ and owner George W. Slaughter of Detroit, Mich., refused it.

There was a reversal of records in an item in these columns last week, in regard to the get of Hal B. Hal Edo's record is 2:06½ and Hal Paxton's 2:09¼, but the item referred to placed them just the other way.

The total amount of money won by the horses on the Grand Circuit this year was $472,418. There were 782 heats trotted and the average time was 2:08.09. The total number of races was 248 and the number of starters was 1,549.

At the auctions in San Francisco these days all kinds of double work harness sells well. Any harness from that used on delivery wagons up to the heaviest of team harness will bring lively bids. Light buggy harness, however, is in the dumps.

The Oakland Driving Club expects to have an excellent season of amateur sport next year. If no other track is available the one at Sixteenth and Peralta will again be used and will be put in good order for racing.

S. F. Bennett, a horse buyer for the entente allies, during a visit to Lander county, Nevada, last week stated that it was very difficult at this time to even gather a carload of suitable horses in any one district, the supply of animals having been almost exhausted by agents of the allied governments. The best he could do in Lander county was to ship a mixed carload of pack mules and work stock.

Danny Maher, famous American jockey, died in London last Thursday after an illness which compelled his retirement from the turf three years ago. He was a star performer on English race courses for nine years prior to his retirement. In this time he rode to victory in three derbies, his mounts being Rock Sand, Cicero and Spearmint. He also captured the Oaks in 1906 with Keystone II, the Doncaster St. Leger in 1903 with Rock Sand and the same classic race in 1906 with Bagardo. He was reputed to be worth a large fortune as the result of his turf victories.

S. S. Bailey, the Seattle horseman and mining magnate, must have cleaned up pretty well on the election. He is credited with having about $20,000 up on Wilson.

C. A. Durfee left for Phoenix, Arizona, this week and will take in the races at the Arizona State Fair next week in which his son W. G. Durfee has an entry in about every race.

Forty mares have been booked to Lee Axworthy 1:58¼, at $200 each. The young stallion will be allowed to serve no more than that number next spring.

James Benyon, the American driver, at last reports received from Austria, had won twenty-seven races this year, while the number credited to his father, Edward Benyon, was twelve.

The sum of $6,000 has been refused for the New York trotter, Legal W. 2:15½, Thomas J. Griffin of Dorchester, Mass., having made the offer last week at Woonsocket.

It does not look as though there would be any auction sales of trotting bred horses in California this winter, but should a California circuit be announced by the first of January a February sale might be given with success.

Now that the election is over, better think about nominating that mare of yours in the Pacific Breeders' Futurity to close December 1st. The guaranteed value of this stake is $2500 and it only costs $2 to nominate.

R. W. Scott, of Bishop, California, has consigned twenty head of trotting bred horses to the big sale at Chicago Auction, December 18th to 21st. These horses were raised in the mountains and are from stallions that trace to Gen. Benton and Electioneer.

One of the gamest of trotters on the eastern tracks this year is Petrena 2:16¼, by Kentucky Todd, and she is not 15 hands and only weighs 750 pounds. The Horse Review says Petrena can stay "till the cows come home." Many small horses are bears for endurance.

Sheriff Donald McRea, who was shot and severely wounded in the clash between the authorities and members of the I. W. W. at Seattle on Sunday last, has many friends among the California horsemen who have visited that city. He has owned a number of trotters, including the mare Vallejo Girl 2:10¼.

Galindo, son of McKinney and the great broodmare Elsie by Gen. Benton, has proven a successful sire in New Zealand and is still in service there at a fee of $50. He was bred at Palo Alto, but sold to New Zealand by C. A. Durfee who purchased him when a colt at a Palo Alto sale.

Thirty-six head of trotting bred horses were sold at auction at Davenport, Iowa, October 25th, for an average of about $150. The Deputy Sheriff 2:04¼ five year old pacing gelding brought $1400 and was purchased by Magnus Flaws for Carl Mueller of Rock Island.

The Special Breeders' Number of the New Zealand Trotting Journal is at hand. It has a gold-mounted cover and besides containing many fine photo-engravings of New Zealand trotters and pacers, is replete with excellent articles on horse breeding and kindred subjects. It is a credit to its publishers.

A Pennsylvania court has recently decided that the rule of the road is "pass to the left" when passing another vehicle from behind. If the left is obstructed or there is not room there one may be justified in passing to the right, but not otherwise. Where there is no law in regard to the passing of vehicles, the rules of the road will govern.

Practically all harness racing stables of the season, both over mile and half mile tracks, have now returned to winter quarters. A majority of the Grand Circuit contingent was shipped home after the finish at Lexington, while comparatively few went to Atlanta for the wind-up. Practically all the leading trainers will be busy from now until the end of the year in preparing that part of their strings which are headed for the big sales of which three are of the greatest importance and will be held in Chicago, Indianapolis and at Madison Square Garden in New York City.

They all want to come to California to race their trotters and pacers. Fred Woodcock, of Forest Grove, Oregon, who raced Hal Paxton 2:09¼ at a couple of meetings here this year, writes that he would like to come again. He says in a letter to the Breeder and Sportsman: "I hope California has a good circuit next year. I want to come down and see 'the boys' again. They treated me pretty well this year." Mr. Woodcock started in eleven races this year and was behind the money but once. He has a good horse in Hal Paxton and was second to Prince Zolock when that horse paced in 2:04½, and was timed separately by Elmo Montgomery and Woodcock in 2:05 flat.

Silver Axworthy (4) 2:10, a new 2:10 trotter for Axworthy (3) 2:15½, is out of the fast record pacing mare Easter Lily W. 2:06¼; grandam the noted Flaxy, which produced Audubon Boy 1:59¼, etc. He is a very handsome stallion and as a two and three year old had about as much speed as the best, but was very difficult to control and utilize to advantage.

Work will soon be started on the new half mile track at the Woodland Stock Farm and it is to be laid out according to the regulation rules. County Surveyor Asa Proctor has the matter in charge, and and when the track is finished it should be one of the fastest in the State. Half mile tracks are becoming so popular in connection with fairs that many of the big eastern fair grounds are providing half mile rings for their races.

Al Schwartz is back at Pleasanton after a trip clear through the California circuit. His handsome little mare Miss San Francisco came home as fit and sound as when she was shipped to the opening meeting. She started in 16 races and was never unplaced, and Schwartz is very much pleased with the daughter of San Francisco 2:07¾. She is still eligible to the 2:16 class on mile tracks and the 2:20 class on half mile tracks and looks like 2:10 would not stop her next season.

A horseman writing in the Horseshoer's Journal tells of a pacer that was a bad knee-knocker being brought to him to shoe. He drove the horse a few blocks, noticed that he crossfired and then shod him with a set of shoes he thought suitable. He then drove the horse a quarter, and he hit his knee so badly that it swelled up to the size of a derby hat. The shoer then took the horse back to the shop, changed the shoes from one foot to the other and on the next trial the pacer never touched a hair and could fairly fly.

Ben Billings 2:07, the gelded son of Bingen 2:06¼ and Lou Dillon 1:58½, possesses speed of an extraordinary nature at the pace, despite his limited preparation, and when started for his record he stepped the last half, officially timed, in 1:01½. Had Thad Logan known the great speed of the gelding he could have marked him in 2:05 at least. After being shipped back to the farm he paced a half at Curles Neck in 59 seconds, a performance equal to 57 seconds over a course in the condition the Lexington one was during the trots.

The big thoroughbred stallion Yellowcrest has been entered in the National Horse Show in the class for stallion best suited to improve the breed of cavalry horses. This ten-year-old son of Yellow Tail and Playful was raced as Captain John, but he did not reach his full measure of greatness until he was sent to the show ring. He has been exhibited four times and on each occasion has carried off the blue ribbon. At Madison Square Garden he was winner in 1913-14-15 and in 1914 he was also winner at Bryn Mawr.

It will not cost a great amount of money to breed a mare to a highly bred stallion in 1917. R. O. Newman, owner of that well bred stallion Best Policy 42378, says he will stand him next spring at $20 for the season. Best Policy is a producer of standard speed, he was sired by the great Allerton 2:09¼, sire of ten in the 2:10 list, his dam is Exine 2:28½, a producing mare by Expedition, whose daughters have produced six in the 2:10 list, his second dam is the great broodmare Euxine, dam of 6, by Axtell (3) 2:12, sire of 8 and the dams of 12 in 2:10. As Mr. Newman remarks: "Best Policy is surely a dandy little horse and if he had a chance he could win good money in next season's races."

The cup offered by the Eastern breeder of Hackneys, J. Macy Willetts, for the first registered hackney that will trot a mile in three minutes, is still waiting for some horse of that English breed to win it, although the registered mare Starlight, by Dilham Prime Minister, came dangerously near winning it at Columbus, Ohio, during the recent Grand Circuit meeting there when, driven by Chas. H. Allen, a well known trotting horseman who has been training her all summer, she trotted a mile in 3:02¾, but it is stated that she will make no further attempt this season. During the recent fair at Troy, N. Y., a well known New York breeder of hackneys started the registered mare Princess to beat three minutes, but as near as she could come to it was 3:16½, not near enough to offer much encouragement to the belief that she will train on enough to cut off sixteen and one-half seconds. Even supposing a hackney should, after long training trot a mile in three minutes, what will be proved, in a practical way? Trotting at all of any value for a trotter that can trot no faster than three minutes is not regarded as having any value as a speed horse or even as a road horse. A three-minute hackney would not have ting alone is of no value for a trotter that can trot ting field and necessarily he would have to lose some of the action so dear to the hackney breeder's heart, so that he would no longer be of much use in that particular field where the breed now shines—that of the high stepper. Then what's the use of talking about a three-minute hackney or trying to drive a hackney that fast?—[Horseshoer's Journal.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Trains Kill Deer.—Deer are now on their migration from the higher altitudes to the winter feeding grounds. Recently, as usual at this time of the year, a number of them have taken to the railroad tracks as a path or trail from the mountains.

Consequently quite a number have been killed or injured by being dazed by locomotive headlights. Several have been so severely wounded of late that they had to be killed.

Through the co-operation of the railroads the Fish and Game Commission has been able to have these animals brought to Sacramento, where they have been donated to charitable institutions. The Southern Pacific Railroad has instructed its train crews to assist the Commission in its charitable work.

Hunting Dogs Come Back.—Not in years has the highly-sporting practice of using a good dog enjoyed such stimulation as this season, the rapidly-growing ing one's birds, always problem enough, besides grass adding considerably to the difficulties of findmaking quail much harder to find in the first place by encouraging them to lay close.

As the dampness causes scent to hold well also, and enables a dog to do twice as much work, providing more natural water holes to roll in as well as to drink, it may be said that 1916 has fully put the thoroughly broken bird dog on the California sportsman's map.

The best of hunters and shots are all but lost without one, and has to down twenty-five birds to get his limit. Good dogs get even crippled quail, their noses work out the devious wanderings of the winged; they indicate where the birds are hiding and warn the gunner to be ready, take his attention from the slain by relieving worry as to loss, and this enables concentration upon the shot that is about to offer.

From every viewpoint the dog is now to have his day, and with these intelligent creatures added fienerally to the equipment of the small-bore shot, the splendid game qualities of the valley quail in California will make of him an attraction asset superior even to that of his relative, the Bob White of the Carolinas and Southern States generally, which annually draws as many wealthy sportsmen to that section as all other things taken together.

The idea that dogs were no use on the valley quail died hard, but the sermon has been preached by practical demonstration. Close workers, broken, not for field-trial work, but to work of the gun, have so established themselves that many of our best hunters will not hunt without a dog at all.

Tahoe Fishermen's Union.—At the recent annual meeting of the Tahoe Fishermen's Union, held in Tahoe City, the following officers were elected for the coming year: President, W. C. Johnston of Sacramento; vice-president, A. J. Mueller of Sacramento; secretary, R. C. Elson of San Francisco, and treasurer, W. D. Foote of Tahoe City. Resolutions were unanimously adopted to offer the California State Fish and Game Commission assistance, while the creeks are low, in cleaning various tributaries to Lake Tahoe of the debris which is the breeding place of leeches, so deadly to the spawning trout. The Union recommends having at least three buoys in front of the creeks, so as to avoid any possible chance of a violation of Section 632 of the fish and game law. It also favors having such buoys, as at Meeks Creek and Taylor Creek, set out into blue water as in their present position they are no protection to the fish tempering before ascending the stream. Resolutions were also adopted requesting the California Fish and Game Commission to get in touch with the Nevada commissions, to have legislation enacted having a uniform law on this body of water. R. G.

Tahoe City, Cal.

Quail Respect Autos.—Quail must be classed as a modern bird, or at least one that has kept right a-step with progress, according to M. S. Clark, a game deputy. He says quail are getting so wise that they can almost tell the makes and models of automobiles. The reason is that so many hunters are making use of their gasoline vehicles for hunting purposes that the quail know that trouble is coming the second they hear the whirr of the motor or the honk, honk of the horn.

"It's a fact," says Clark, "that quail will take to flight the minute they hear an automobile approach. I have noticed it time and again. The birds seem to know that hunters are coming after them, and will fly to get out of range."

Famous Hunters Lucky.—Dr. Edward Salisbury and Dustin Farnum returned last week from a three days' hunting trip north of Bakersfield. They brought back the limit in geese, duck and quail. They were the guests of William S. Tevis at his famous Stockdale ranch, and were turned loose on the 450,000 acres of the Kern Land Company.

"The hunting was immense," said Dr. Salisbury. "We had the limit in duck and geese by 9 o'clock and in quail by noon. I never expected to find such excellent shooting."

The two hunters motored up to Bakersfield and did most of their killing on Saturday. Both would sooner hunt than eat. When Farnum is not acting before the camera, he's out hunting. Dr. Salisbury practically lives with a gun in his hand. He has hunted all over the world.

William Farnum intended to join these two hunters in Bakersfield, but could not get away. However, he shared the spoils.

COAST FIELD TRIALS IN DECEMBER.

Setters and Pointers Will Contest at Bakersfield During the Week Commencing on the 13th.

The Pacific Coast Field Trials Club has completed arrangements for the holding of the 34th annual trials at the grounds just outside of Bakersfield, during the week commencing December 13th. There was a meeting of the executive committee in San Francisco on October 25th and all details were settled.

Present at the meeting were President A. G. Wilkes, J. S. French, J. A. Chanslor, Phil M. Wand, Martin I. Smith of Los Angeles and Secretary S. Christenson. A program of features was mapped out, which includes the Coast Derby, with $250 guaranteed, open to all, with $20 to enter and start, and the All-Age Sweepstakes, with $20 to enter and start. Entries will close December 12th, the night before the trials commence.

J. W. Flynn and John Shoemacher were named as judges, with Phil M. Wand as associate. H. L. Betten was elected an honorary member for valuable services rendered in the past as judge and secretary in the past as judge and secretary of many trials. Reports secured from Dick Ashe, the patrol man, are to the effect that conditions are better than ever before to make the events a success. Plenty of birds are in evidence and the ground is in ideal condition for the sport.

The Coast field trials have been held annually for the past thirty-three years. The men who first introduced the game out here were the pioneer fanciers of the hunting dog. For a time interest in the sport waned, but indications are that more dogs will be in competition next month than in recent years. Setters and pointers are now in training, and it is expected that there will be several Eastern dogs to make a try for the titles.

Charley Murray, the colored handler, has arrived with a string of splendid California dogs that cleaned up the trials held in the Northwest. They are Mrs. A. G. Wilkes' Melrose Dude, that won the open stake at Washington and Vancouver, B. C., and Western Boy, J. Walter Scott's favorite, that carried off the honors in the hunting classes. J. S. French also has a couple of dogs in Murray's charge. The color line is drawn in field trials and the chances are that the owners will handle their own dogs in the Bakersfield trials.

John W. Considine, who has long been a devotee of the field sport, has arrived from Seattle and has announced his intention of being on hand at Bakersfield. Fanciers from all sections of the State will likely be on hand, with a special car running from San Francisco.

Dogs For Coursing Meet.—Many entries are being received for the Capital City Coursing Club's opening meet at the Elliott ranch on November 19th, and no difficulty is expected in filling the 32-dog stake. The present outlook is that the best greyhounds on the Coast will participate in the meet.

Among the entries are the following:

Roy S. Avery has entered Expensive Board and Thread of Fire, two dogs who are returning from the Middle West where they participated in the Waterloo Cup, Waterloo Futurity and Aberdeen Cup events. Expensive Board is a new hound on the Coast.

John Rosseter and Bob Malcolm have entered two imported dogs.

W. E. Lloyd of the University Farm at Davis has entered Blue Bell and Blue Streak.

George Heintz of Oakland has applied for three entries, the dogs to be selected from his kennels.

Mrs. A. Leitch of Oakdale has made one entry.

P. Carroll of Mayhews has entered Mayhews Boy and County Boy.

C. T. Newton of Yolo has made one entry.

Sportsmen of Vermont purchased 13 deer in 1875 and turned them loose in the forest a few miles from Rutland. There was no deer shooting for 22 years—and then deer were more plentiful than voters. The first year the bars were let down 7,186 deer were killed, but the law is stricter now.

PLENTY OF PLACES TO HUNT DUCKS.

Hunters Are Welcome in Many Spots in Counties to the South.

Reports gathered by the Fish and Game Commission from its field patrol deputies and checked up with the verdict of sportsmen all over the State leave no room for doubt as to the remarkable shooting of the present season, now being enjoyed by duck and quail hunters.

The usual complaints are being heard, but usually, eliminating the cases of genuine "hard luck," the fault has been with the shooter and not the shooting, as quail are plentiful and ducks in all the great valleys seem to be present again in something like the supply of old times, which made California a by-word among the men whose happiest days are spent with the gun and rod.

Although duck shooting about Los Angeles in the nature of things, within easy drive of a city of 600,000 population, is largely preserved for duck club members, those who do not shy at the time and expense of a night's ride on the sleeper can reach just as good duck shooting as the la wallows, with quail for additional attraction.

The Owens valley sloughs and even the soda lakes are alive with ducks. On the salt inland oceans, the birds are mostly spoonbills, but on the marshes along the aqueduct plenty of fine mallards can be had. This section is well stocked with doves, quail and snipe, too. The gunner with a week to spare can find plenty for diversion anywhere between Independence and Bishop, the town hotels being fairly comfortable and the people more than ready to welcome the visiting sportsman. Up in Inyo they realize the value of their fish and game as an attraction and will cheerfully direct the steps of the newcomer, even taking time enough to go along and show him what their beautiful country has to offer. Such courtesies are usually repaid a hundred fold in estimation of the recipient.

In the Imperial section the same is true, California hospitality being well exemplified. Down that way where the desert has been made to bloom as the rose game is actually so plentiful that it does damage, and ranchers vie with one another in offering every encouragement for the sportsman to shoot on their places. The "no shooting" signs no gunner ever believed in are conspicuous for once by their absence. In many of the towns directions are cheerfully given to the visitor, and good comfortable accommodations can be had at a fair price. Trains leave Los Angeles late in the evening, arriving at Imperial Valley points early the next morning in ample time to get out and connect with the quail or ducks. Most hunters go to Mecca as the nearest point to the "sea," as they know the Salton lake out that way. Any fair shot can kill his limit of fine ducks any day on that muddy expanse; the birds fly up and down the shores morning and evening and much of the shooting is done from the tops of mesquite trees, carefully denuded of their thorns, as a mesquite is no sporting proposition in its natural state.

Those who have connections in the Tulare lake sections can have wonderful duck shooting there, but it is a game one must be fixed for, as the birds swing well clear of the shore line except in high winds, and the best sport is had from sunken tank blinds out on the flats. Men knowing the country get a good lot of shooting away from the lake in places beneath the aerial trail to feeding grounds in outlying ponds.

Probably no better shooting is to be had anywhere than that offered along the shores of Buena Vista lake on a good day when the birds are working well. Just why they fly one day and do not the next, and may be the next two in conditions of weather seemingly identical, is not explained to the satisfaction of hunters, but it is the fact and those going there should allow themselves several days to be sure of catchings things "right." When they do the experience never will be forgotten. The fine rice and barley fed birds are choice eating. It calls for a long and devious trip by way of Bakersfield, owing to the high stage of the water and the new levee.

Farther up in the San Joaquin about Los Banos and Firebaugh, the sloughs are full and it may be said there is an unbroken stretch of duck shooting from the Tulare lake-bed to San Francisco bay, better in places than others, but good at intervals everywhere.

Rice Growers Protest.—Some rice growers in the Colusa and Biggs sections are taking exception to the statement of Frank M. Newbert of the State Fish and Game Commission that the ducks are doing little or no damage to the rice fields in that section. Some ranchers declare that fully one-fourth of their crop has been destroyed by the ducks and mud hens this year.

"We made a thorough investigation on our last visit up there," says Newbert in answer to these statements, "and with few exceptions the farmers have signs posted warning hunters off their fields. I admit that there may be a few places where damage is done, but as far as we could ascertain, this is very small compared to the total acreage.

"It's the blackbirds that hurt the rice. The ducks eat the waste rice that falls to the ground, while the blackbirds eat it from the stalk. Furthermore, the ducks do not come to the rice fields in big numbers until the crop is almost ready to harvest, and they have but a short time to get at the rice."

CHANGES IN FISH AND GAME LAWS.

Bag Limits on Waterfowl and Upland Game Too Large, Writes C. A. Wood.

Some radical changes in our game laws are suggested in the following letter. Some of the points are well taken although all may not agree as to the desirability of many of the suggested changes. The letter follows:

"Although I believe that our Fish and Game Commissioners are doing what they think best for all, I believe that our laws should be made more strict and a tighter line drawn. It is my opinion that our daily bag limits on both waterfowl and upland game are in many cases too large and should be cut down. My reasons for wishing to see this change are these: The present bag limits permit a man to kill more than he can use himself, and allows him to distribute the surplus among his friends. It encourages him to slaughter, and encourages his friends to depend upon him for their supply of wild game.

"Were the bag limit reduced to an amount sufficient only for a man's own needs, it would cause him to be appreciative of his privilege to hunt wild game, would take him out more frequently into the open, which would mean more to his health, and would give him more practice with a gun. On the other hand, the man who has been depending upon his friend for his game supply would be called upon to hunt for his own, thereby bringing others out into the open to get healthful exercise. It would also encourage the use of the gun, thereby making more and better marksmen to defend the country in time of trouble, and would help swell the state's fund through additional licenses.

"Our present 'district system,' I believe, should be abolished, thereby allowing a party killing game in one part of the state to take it into another. Instead of dividing the state into districts certain sections and streams of each and every county should be closed to hunting and fishing for certain periods, say from one to three years at a time; then when these sections are opened other sections of the country should be closed, and so on. At the same time the present open and close seasons should prevail in the open sections. This would allow fish and game a splendid opportunity to breed and multiply unmolested in a district during the close season. And as hunters would not frequent the closed sections the game therein would become man-shy and thus afford plenty of sport to the hunter. This would in a short time give to this state a greater reputation as a game state than it has ever enjoyed and place good hunting within the easy reach of all.—Cal. Fish and Game.

Game Seasons in Oregon.—The following letter from a federal officer who is well informed on all points of the federal migratory bird laws warns Oregon hunters to be careful in regard to the closed season, a false account of which was carried in a Portland paper last week. The letter is as follows:

"The statement appearing in one of the Portland papers that the waterfowl season does not close in certain counties in Oregon until February 15, and in Clatsop an additional open season extends from March 1 to April 30, and in Ccos county from December 31 to January 31, is entirely erroneous.

"The federal migratory bird law does not permit shooting of geese, brant, wild ducks, coots, gallinules and jacksnipe after sunset January 15 throughout Oregon and Washington.

"Black-breasted and golden plover and the greater and lesser yellowlegs open season closes sunset, December 15 throughout Oregon and Washington.

"A closed season extends throughout the United States until September 1, 1918, on the following migratory game birds: Band-tailed pigeons, little brown, sandhill and whooping cranes, wood ducks, swans, curlew, willet and all shore birds except the black-breasted and golden plover, Wilson or jacksnipe and the greater and lesser yellowlegs.

"All shooting of migratory game birds is prohibited between sunset and sunrise throughout the United States.

"Insectivorous birds are protected indefinitely.

"A state date has the call when it opens the season later or closes it earlier than the federal regulations if the state game authorities so order, and which will not be in conflict with the federal regulations.

"If you will give the above information due prominence it may be the means of keeping innocent sportsmen out of serious trouble with the federal authorities."

New Game Laws for Washington.—That a new game law, especially referring to the protection of upland birds, will be introduced at the coming session of the Washington state legislature, is the prediction of Fred Edwards, chairman of the Pierce county game commission. In addition to the losses through hunters, a large percentage of the birds were killed by the inclement weather of last winter and spring.

The cold, raw winds and rains of the spring did much to cut down the number of birds on both sides of the mountains. In Yakima and Kittitas counties this was especially true. Hunters, who crossed the mountains at the opening of the upland bird season there, declared on their return that there were never less birds than this season.

"The best way out of the difficulty is to either curtail the season materially or have it closed for a year or so," Commissioner Edwards said recently. "This should apply only to pheasant, grouse and quail, as ducks are more plentiful this season than they have been in years. Exceptionally large kills have been made, yet the birds are found on the flats in greater quantities than ever before."

That the upland bird season should be made later in the fall, is the contention of many hunters. That both quail and pheasant raise a second brood of chicks that do not hatch until September is shown by the many young ones found in this section of the country at the opening of the season, September 15.

Quail not more than two or three days old were seen and caught by hunters, who declared that the season opened entirely too early and that if the birds were to be protected, provisions should be made for a later season.

While the Tacoma game associations have not yet taken action towards preparing a measure to be introduced at the coming session of the state legislature, it is expected that with the close of the hunting season meetings will be held and the situation discussed. There are two game associations there, the Peirce County Game Protective Association and the Washington State Game Protective and Propagation Association. Both of these organizations have always taken a nactive interest in the game laws and it is expected their influence will be felt at the coming legislative session.

Reports from Sacramento.—Many geese have been arriving in the Sacramento Valley during the week, according to reports received by the State Fish and Game Commission. They are mostly of the gray and brant type. The ducks are mostly sprig, although some northern mallard are appearing. The northern birds can be distinguished by their brighter red feet.

Quail are still reported hard to find, as they keep well hidden. The hunters are waiting for rain and frosts to improve conditions. Reports from the game wardens follow:

Hayfork—Weather too cold for fishing. No ducks here. Few quail.

Dana—Ducks are scarce. Trout plentiful. Hard to catch.

Truckee—Lots of Eastern brook trout. Fishing in all streams good.

Sutter Creek—Several flocks of wild pigeons in the central part of Amador county.

Susanville—Fishing good. Ducks rather scarce.

Grass Valley—Fishing season quiet account of early cold weather. Quail hunting not at its best.

Lodi—Ducks plentiful on the preserves, but scarce on other land because there is no water. So far all satisfied with quail shooting. Lots of quail along Mokelumne river and in vineyards.

Red Bluff—Trout plentiful. Quail reported plentiful.

Warm Welcome For Hunters.—Elmer E. Shaner, manager of the Interstate Association, has a farm, "Crestview," in Butler county, Pa., and on that farm is a sign which is something different than the ones you will find posted on other farms the country over. Here is what it says:

CRESTVIEW.

"Hunters and Fisermen Welcome.

"But please respect the owner's rights. Kindly do not injure stock nor damage property. When the bell rings come to the house and have dinner."

Seattle Association.—Breeder and Sportsman: A chicken shoot on October 29th was the first of several "feature" events throughout the season planned by Seattle Trapshooters' Association. The turnout was not good owing to extremely bad weather conditions which rather reminded the shooters of good duck hunting than that of shooting clays.

Mrs. Newell Miller, daughter of Tom Wilkes, was a visitor from San Francisco. G. B. Fraser, Western representative of the American Amateur Trapshooters' Association with his headquarters at Portland, Oregon, was also a visitor at the shoot. The scores:

At 100 Targets—Tom Wilkes 96, C. W. Bandy 90, Ralph Kinzer 89, C. E. McKelvey 89, R. S. Searle 88, John Considine 88, Hugh Fleming 86, Fred Landwehr 86, D. F. Williams 77, W. B. Taft 71, L. H. Reid* 48x50, H. E. Gleason 36x50. Yours,

Seattle, Wash. E. A. FRY.

Grand International Shoot.—Editor, Breeder and Sportsman: We have much pleasure in forwarding to you under separate cover, a copy of the St. Thomas Grand International Handicap Shoot program, which shoot takes place here December 4th to 8th. We have forwarded a copy to every sporting editor in Canada, and to a great many in the United States.

We shall appreciate it very much if you will make some announcement of our tournament in your paper. This tournament will be the second largest held on the continent this year. We will give in the neighborhood of $2000 in cash and trophies. We have one of the finest shooting grounds on the continent and have spent the whole year in making everything perfect for the shooters who will attend our tournament.

We trust you will give us a strong write-up. This will be good news to the shooters, a number from your district having attended our past tournaments.

Yours very truly,

THE ST. THOMAS GUN CLUB,

St. Thomas, Ont. W. J. McCANCE, Mgr.

ARGUING ABOUT THE GRAND AMERICAN.

California Trap Shot Writes, Suggesting That Handicaps Be Dropped.

Editor Breeder and Sportsman:—

As the G. A. H. is over and the shooters are all talking about that grand affair and many seem to have a kick coming, or something did not please them and the one howl is the handicaps—a funny thing, as after each G. A. H. you always hear the same kick and you always will if it is shot, and handicaps used as they have been. Each committee has done as near right as it could, and still something is wrong. Personally, everything about the G. A. H. suits me, but I can see where it can be made a bigger success and please far more trap shots, and all the kicking will be done away with and never heard again.

Just drop your handicap committee! What good did it do at St. Louis—didn't a man win the G. A. H. on a far better score at 19 yards than the champion of each State could make at 16 yards? Isn't 99x100, at 19 yards, far better than 99 at 16 yards, and if those 100 straight State champions at 16 yards could beat this score, then why should some of them stand one, two, three and four yards farther back?

Now, where is the shooter who wanted his one chance each year to win? Did he get it? He probably would be far more happier if he had 525 chances to win, and any one would make him feel happier and feel and shoot better.

My plan is to all shoot at 16 yards; shoot 4 or 5 100-target events, and the 5 high men each day not be allowed to compete further. There is a fixed purse of, say, $300 to $500, to each, and the balance of the purse divided equally among the next 100 high guns, with 5 trophies to the 5 high guns each day. The 5 high guns will be pleased to be spectators and boosters for the game, and you will find as many 16-yard men and men who never won a State championship among the 5 high guns each day as you will among these imaginary unbeatable State champions. Let's see how this G. A. H. would come out.

Say we gave the 5 high gun men $1800, we would have left enough to give the next 105 $40 each. That includes fifty-five .92 and .93 men who also ran. I advocate all events $17 entrance. If it had been so at St. Louis, with just that entry list we would have had $85 each for every man who broke .92 or better ,and as it was, only 15 shooters got more than $75 each.

Now Brother Trap Shots, how many shooters do you think would attend the next Grand Championship of the world if each man had 525 chances to win his entrance and expenses? You know we would have over 1000 at the next shoot. Twenty-five would go from California, I am sure.

Now a word about the G. A. H. being held in the East: It is on good grounds, I am sure. We may have just as much right to want it held in California, yet no shooter in the State would think of such a thing. My opinion is that it has always been held in the right locality, from Kansas City on west to Columbus in the East. We are unfortunate to be two or three thousand miles away, but we had more men in the G. A. H. than two Eastern States that have 50 shooters to our one. If they would not go 600 to 1000 miles, they would not be boosters if held in the East.

In 1917 let us hope it will be the banner shoot of all, and every man who goes ask no odds of his brother shooter, and see what kind of a shoot we will have. It will be a good one, run by The Interstate Association, no matter where, or what kind of a program. The shooters are going to go, whether pleased or not. They have got the habit and must shoot just so much each year.

Yours respectfully,

A CALIFORNIA SHOOTER.

Young America and Trapshooting.—It is with keenest delight that the grown-ups in the trapshooting game see the youngsters of fifteen years and thereabouts, embracing the sport and being encouraged by their parents. And the results are nothing short of wonderful, as will be noted from published scores which appear almost daily in papers in different parts of the country.

There is something lacking in the man who is not thrilled with pride when his young hopeful faces the trap and beats his dad. So far, the returns show no one who is not just about as tickled as though he had landed the Grand American Handicap.

It is just such encouragement which every trapshooting dad should bestow upon his boy, presuming, of course, that the lad is one of those wholesome, full-blooded kids of which America so pardonably boasts. If he be of the other sort, he might not like the sport, but happily, the sport will like him and do much toward bringing him to a mental and physical condition of manliness.

Therefore, Brother Shooter, look your boy over, for be he the one or the other, you owe it to him to place him on the firing line with a gun in his hand and coach him in America's king of sports.—George Peck.

At least 10 conventions to Atlantic City during the past three months have remained an extra day so as to give the delegates a chance to enjoy the trapshooting school.

• • •

Yale has won the intercollegiate trapshooting championship eight times in as many years.

Sportsmen's Row

Frederick K. Burnham of Martinez, well known as a trap shot and hunter and fisher of big game, has planned a trip to Australia to enjoy his favorite sport. He expects to leave next week in company with Nat Boas. Last year Burnham took a trip to Honolulu and landed some big tuna.

• • •

Chief of Police Walker and Superintendent of Police Caldwell, of Battleford, Can., are expert trapshooters, and in the recent Alberta and Edmonton tournaments were right up with the "big winners."

• • •

Trapshooting Leagues are becoming plentiful in and about Philadelphia. Besides the Philadelphia Trapshooters' League, there are the Berks County Trapshooters' League, the South Jersey Trapshooters' League and the Gloucester County (N. J.) Trapshooters' League. All told, these leagues take in 25 cities. There seems to be a field for a league around the Bay.

• • •

Preparatory schools who have taken up trapshooting and organized teams for competitive purposes are Cedarcroft, Hill, Hotchkiss, Kingsley, Mercersburg, Northwestern, Pawling, Peddie, Taft and Tome.

• • •

Fish and Game Commissioner Counell got into the snipe on the Bolsa grounds after his round with the ducks, and sent part of his limit to San Francisco—a return migration post-mortem that is rather unusual in bird annals.

• • •

Bill Richards sent his friend Tom Sharkey six nice birds from Suisun marshes. E. R. Diamond, E. L. Hogg, L. Sloss and Fred Siebe were others who sent down limits from that section.

• • •

John T. Connolly and Fred Hardesty took a trip to La Monda on the coast on Friday and got the limit of quail. Jim and Gus Zononi, who were in the party, also got limits.

• • •

Here's a piece of advice that you doubtless know, but should remember—don't go shooting in a cemetery. An Italian tried the stunt at the Holy Cross Cemetery during the week and was caught redhanded by Deputy Bert Leahy and was arrested. As early as 1872 cemeteries were made bird sanctuaries, but this Italian was banging away at quail over the headstones.

• • •

J. S. French and John W. Considine intend going out during the coming week for their first shoot of the season.

• • •

Members of the Chiquita Gun Club, which has headquarters near Grizzly island, have been out twice and each time have all secured limits. The following members were out one day this week for a shoot: Dr. Chismore, N. W. Sexton, M. Sawdon and A. G. Hebegau.

• • •

Charles Mow has just returned from a vacation and hunt in the Big Bar country in Butte county. The fishing has been excellent in that section, Mow says. Grouse are fairly plentiful, but doves are scarce. He reports that signs of bears are numerous.

• • •

Mr. and Mrs. A. G. Wilkes have been getting in some good shots at the Greenhead Club up near Colusa way. They were joined by Mr. and Mrs. Roy Avery for the week end. Frederick K. Burnham and Colonel Dorsey have also been up giving a good account of themselves, as their friends will testify.

• • •

More than 700 gun clubs were formed in the United States this year, but only 59 have applied to the Interstate Association for trophies, which are given to all newly-organized clubs.

• • •

Visitors are welcomed at all trapshooting clubs. The word "welcome" is conspicuously displayed. Trapshooters are the most hospitable bunch in the world.

• • •

The mammoth electric light sign—the largest and most wonderful in the world—over the Million-Dollar Pier in Atlantic City, N. J., has been changed to show a man and woman shooting alternately. It attracts more attention than ever.

• • •

Women shooters hope to be allowed to shoot in squads with men in the next Grand American. Mrs. Vogel was the only woman who shot in a man's squad in St. Louis, excepting Mrs. Topperwein, the professional.

• • •

Trapshooting under electric light is getting to be a favorite diversion. Quite a number of clubs have tried it with satisfactory results.

• • •

No more Sunday hunting for John P. Fisher at Los Bancs. He found the country as great as advertised so far as birds were concerned, but hunters were just as numerous. It was a bombardment from sunup until sundown. Fisher managed to bag six, but he didn't get a chance for many other shots.

Stevenson, Wash., Shoot.—Portland trapshooters, for the most part, carried off the honors at the big merchandise shoot held under the auspices of the Stevenson Gun Club at Stevenson, Washington, on Oct. 29th. High amateur honors in the regular 50-bird event was divided between Henry R. Everding, ex-president of the Portland Gun Club, and A. L. Zachrisson also of Portland, each with 45 broken birds. In the shoot-off Everding was bested.

Everding distinguished himself by winning the long-run trophy. Despite the high wind and rain, which blew into the faces of the contestants, the Portland man made a run of 28 during the 50-target race. C. J. Schilling, a Portland professional, was high gun of the day with a mark of one better than the leading amateurs.

Joseph St. Martin, of Stevenson, won the class B trophy after a shoot-off with W. C. Bristol, of Portland, while George Bertz, of the Rose City, won the class C prize. He tied with J. Rrchibald Stutt of Portland and R. M. Wright of the local club, but Bertz had no opposition in the shoot-off. Class D honors were captured by W. G. Rufford, Mayor of Stevenson and secretary of the gun club. Low prize was won by H. Swisher of Stevenson, with 13 breaks out of a possible 50.

The feature number on the program, the 25-bird affair for 20-gauge gunners, went to Bill Bristol of Portland. He made the remarkable record of 22 out of the 25 with the small bore "cannon." Miss Gladys Reid, of Portland, not only took first prize among the women trapshooters with 44 out of 50, but she was in second place among the 20-gaugers with 21 "dead ones" to her credit out of the 25. There were 26 entries in the regular event ,and all except five competed in the smaller contest.

James K. Simpson, president of the Stevenson Gun Club, was host to the Portland delegation at a banquet after the shoot.

Mrs. James E. Reid, Mrs. George Bertz and F. M. Hurd accompanied the Portland party, but did not shoot. A. W. Strowger, president of the Portland Gun Club; Harry A. Pollock, vice-president and manager, and Frank M. Templeton, secretary of the Portland organization, were unable to attend because of the open season on ducks. Following are the scores:

C. J. Schilling* 46; H. R. Everding, Portland, 45; A. L. Zachrisson, Portland, 46; Miss Gladys Reid, Portland, 44; James E. Reid*, Portland, 43; Peter J. Holohan*, Portland, 42; Charles Ziegler, Stevenson, 41; Mrs. Ada Schilling, Portland, 41; Joseph St. Martin, Stevenson, 38; W. C. Bristol, Portland, 38; James C. Morris, Portland, 36; Ray C. Winters, Portland, 66; Earl R. Goodwin, Portland, 34; George Bertz, Portland, 33; J. Archibald Stutt, Portland, 33; R. M. Wright, Stevenson, 33; H. E. Sawyer, Stevenson, 32; and the following, all of Stevenson: Clay Knox 30, James K. Simpson 30, A. Billington 26, W. Totten 24, W. G. Hufford 24, N. S. Doumitt 17, Rex May 16, H. Swisher 13.

Following are the scores in the 20-gauge gun race: W. C. Bristol 22, Miss Gladys Reid 21, H. R. Everding 18, A. L. Zachrisson 17, James E. Reid 17, Mrs. Ada Schilling 17, J. C. Morris 15, C. J. Simpson 13, Roy Marcum 14, J. K. Simpson 13, George Bertz 12, Earl R. Goodwin 11, Charles Ziegler 11, Joseph St. Martin 11, J. A. Stutt 10, R. C. Winters 7, Felix Friedlander 6, G. Christensen 6, W. G. Hufford 5 and A. Billington 8.

The Novice in Trapshooting.—I was asked recently what I considered the first essential toward an early mastery, on the part of a novice, of the subtle art of target breaking, and my reply was, "Familiarity with a shotgun."

It has now become quite common to teach people to swim, either individually or in class, by putting them through a course of swimming movements, and finally when they enter the water for the first time, they strike out naturally.

By the same token, a novice who can be carefully coached in the handling of a shotgun, placing it to his shoulder, assuming a correct shooting position and pulling the trigger, as certain objects on the wall or elsewhere are covered, is going to make rapid progress when he takes his position on the firing line of a trapshooting club.

It isn't necessary to snap the hammer of the gun while indulging in this practice. Assuming that the hammer is already down, a pressume of the trigger is sufficient when the object is covered and the brain signals. Later, those same signals will be flashed when the novice is pointing at a moving target with a loaded gun, and if his mechanical construction is in tune, he will hit the object.

It would seem that a shotgun were the most awkward and illy balanced object in the world, judging from the positions assumed by nearly every novice, and it is right at the start that he forms queer and often lasting bad habits if not checked and carefully coached.

Properly instructed thus, for position and poise, he can be counted upon to take his peg with the air of a veteran and if he lacks a little assurance 'way down deep in his heart, he will only have to squeeze the trigger behind a real load once or twice to waken to his possibilities.—By "Trapshooter."

A five hundred pound bear, one of the largest killed in Kern county in many years, was bagged in the hills near Caliente last week by Isaac Chapman, Archies Goodrich, Matt Logan and William Scott of East Bakersfield.

Vernon Club.—Mrs. C. E. Groat, amateur champion woman trapshooter of the world, tied with Stanton A. Bruner in the Sunday competition held by the Vernon Gun Club Sunday morning for a leg on the season trophy and for a watch fob emblem in the design of a gold bar. Each broke 49 birds out of 50.

The tie was shot off at 25 targets, Bruner firing from 20 yards and Mrs. Groat from 18. Bruner broke 24x25 and Mrs. Groat 23x25. It was one of the closest shooting matches ever held on the Vernon grounds.

Bruner in beating Mrs. Groat in the shoot-off won the bar, it making his fourth trophy in about that many weeks.

Polly McLarry, second baseman with the pennant winning Angels, took a try on the firing line with the Vernonites and succeeded in breaking 38 out of 50 and bruising his face up considerably. His gun didn't fit him and it kicked Polly every time he pulled the trigger. The results follow:

Trophy Shoot—S. A. Bruner handicap 20 yds.), 49; Bill Pugh (18) 45, V. A. Rossbach (18) 43, Lou Mellus (18) 46, C. W. Fish (19) 46, Bob Bole (17) 42, Mrs. C. E. Groat (18) 49, Millard (16) 36.

Open Competition—Bill Pugh 48x50, S. A. Bruner 50x50, V. A. Rossbach 48x50, Polly McLarry 38x50, Lou Mellus 23x25, J. D. Dierdoff 22x25, C. W. Fish 47x50, Van Nest 51x75, Bole 39x50, Groat 38x50, Mrs. Groat 48x50, Millard 20x25, French 23x25, and Kimble 22x25.

Be Careful—More Advice.—When going into the woods the hunter should tie a cow bell loosely around his neck, in such a way that it will ring freely. This may scare off the most of the game, but it is far better to shoot nothing than to be shot yourself. Besides, the guide expects to shoot your deer for you.

When the guide is going out hunting and there is a poker game on in the camp, don't insist on going with him. You are in the woods for pleasure, and a long tramp through the woods is no pleasure, to say nothing of the danger you incur. By remaining in camp on these occasions you will almost certainly get home alive, and in good spirits.

Guides do not often shoot those for whom they are working, but it sometimes happens that they do. To avoid this have a heart-to-heart talk with the man you employ the first night of camp and tell him how dear life is to you and how much you desire to avoid being killed.

If he is a reasonable man, and most guides are when they have a thorough understanding, he will heed your admonitions and not fire at you when you are on the trail.

If you are still hunting for deer, it might be well to build a small fire near where your post is. This of course, is liable to spread and burn down the woods, but the mere matter of property must not be considered when human life is in danger. The fire should afford you ample protection, for most people in the woods will assume that no deer or other animal will build a fire.

Besides that, it will keep you warm and will better enable the guide to find you when it is time to go to camp.

But first of all bear in mind that so long as you don't leave your camp you are in little or no danger of being shot. The moral is obvious.

Value of Birds.—To demonstrate the value of birds as insect pest destroyers, Sir Boverton Redwood, in May, 1914, at the British Science Guild meeting held at the Mansion House, stated that "statistics proved that vast loss occurred in the United States by the destruction of birds, and it was estimated that the birds still left in Massachusetts destroyed 21,000 bushels of insects daily. In Nebraska birds ate ten cartloads of insects each day, and a single species of hawk saved the farmers of Western States $175,000 yearly by destroying grasshoppers and field-mice. Fevers, yellow and typhoid, are disseminated by insects, yet people persisted in killing birds that would devour them."

Strange Animal Killed.—The Portland Oregonian tells a story of a fire warden who shot a strange animal on Mt. Emily's Peak, Le Grande, Oregon, and didn't know what it was, but realized it resembled a large house cat. It proved to be a pet tabby that strayed from a mountain cabin in that vicinity almost five years ago.

In its response to the call of the wild, it had weathered ten foot of snow, escaped coyotes and predatory animals, hunters and trappers. The isolation doubled its size and made it a wild beast. J. H. Bleumenstein, a mountaineer, identified the carcass as his lost kitty.

Prize Greyhound Poisoned.—Dog lovers will regret to hear of the death of that beautiful greyhound, Sweet Princess, owned by S. E. Portal of San Jose. Princess was the victim of that worst enemy of man's best friend, the dog-poisoner. Her sensational wins at San Jose show a year ago under Judge Shuttleworth, who not only knows a greyhound, but loves them, was her first and last appearance on the bench. Best greyhound in the show, best dog of any breed in Santa Clara county and best bitch of any breed in the show were the phenomenal wins credited to her that day. She was only beaten by Mrs. Anita Baldwin's imported champion bulldog, Fallsworth White Knight.

Soon after the show, while chasing a jack rabbit, she was so badly injured by barbed wire as to be put out of the show game for good.

DOGS STILL BEING BUTCHERED BY HOSPITALS

Here's a Case of Licensed Thoroughbred Daschund Taken by Letterman Hospital for Vivisection.

Once again it comes to notice that the hospitals of San Francisco are promiscuously accepting pets for vivisection purposes. Not so many weeks ago there was a scandal about the Affiliated Colleges taking dogs and cats without investigation and butchering them. It was thought that was a lesson. Vivisection may be necessary but it certainly seems a pity that the dumb animals, man's best friends, should be subjected to so much suffering. The latest case at hand was told during the week by the following account in one of the afternoon dailies:

"Hans" is a thoroughbred black daschund and his master, Chas. A. Mohaupt, 3 Dawson Place, has petted him more than eight years.

Wearing license 3808, "Hans," who is valued at $250, went walking a week ago.

Today he was returned, but he was not the same "Hans." He was barely able to wag his tail at the sight of his master.

And today the dog's master is visiting the district attorney's office, the Society for the Prevention of Cruelty to Animals and the bond and warrant clerk's office in an attempt to obtain a warrant for employes of the Letterman general hospital.

After "Hans" disappeared a week ago, Mohaupt went to the city pound, where he was told that employes would watch out for a dog wearing license 3808. Today the pound notified "Hans'" master that his pet was at the Letterman hospital.

"Not here," was the curt reply one hospital gave a member of the Mohaupt family who called for the dog.

"Sure he is," said another. "Laboratory dog; you'll find him in the stable."

Sure enough, "Hans" was in the stable. There were two holes punctured in his abdomen and a great strip of skin had been torn from his body. He was weak from pain and loss of blood—and license 3808 was still on his collar, says Mohaupt.

Mohaupt has sworn unceasing war against vivisection.

The record for ratting, according to Our Dogs, is as follows: Twenty-five rats killed in one minute and twenty-eight seconds by Jimmy Shaw's dog, Jacko, London, August 20, 1861; sixty rats, two minutes and forty-three seconds, Jacko, London, July 29, 1862; one hundred rats, five minutes and twenty-eight seconds, Jacko, London, May 1, 1862; two hundred rats, fourtee nminutes and thirty-seven seconds, Jacko, London, June 30, 1862; one thousand rats, less than one hundred minutes, Jacko, London, May 1, 1862.

Vinton P. Breese, one of our most conspicuous and spectacular dog show judges, was recently married to Miss Carlotta de Felice, a devotee of the stage and screen.

• • •

James Rolph, Jr., mayor of San Francisco, was invited to judge Cocker Spaniels at the San Mateo dog show. Mayor Rolph is the owner of the Mission Cocker Spaniel Kennels, and is considered an authority on the breed.

Angling Prizes of Oregon.—M. E. Cayples did not catch the biggest fish of the Salmon Club of Oregon's coast stream season, but he is the most envied of all light tackle anglers. Cayples carried off one-half of the prizes awarded by the club for light tackle angling up to October 15.

This envied angler caught the first bronze button fish of the season and he also landed the first three bronze button fish, the largest bronze button fish, which entitled him to first place in class A, and all three prizes in class B. To win a bronze button an angler must catch a fish weighing 20 pounds or more, fish of 30 pounds or more to entitle the angler to a silver button and those weighing 40 pounds or more to a gold button.

Cayples was crowded out of the honors in the silver button class by Walter F. Backus and A. S. Archer and in class D by H. Beach, but he pulled out the first gold button fish and carried away the first prize in class F, which is open tocompetition for all anglers catching fish in classes A, B, C, D and E.

The honor of catching the biggest fish of the season on light tackle was won by O. H. Reed, who hooked, gaffed and landed a salmon weighing 44½ pounds. This is the heaviest fish caught on light tackle since the organization of the club and as a result Reed becomes honorary president of the Salmon Club of Oregon and his name will be engraved on the club's permanent trophy.

A. E. Burghduff, who caught the largest fish during the 1915 season, landed the second bronze button fish. Walter F. Backus landed the first silver button fish and A. S. Archer caught the second. H. Beach caught one fish, but this one was enough to entitle him to three prizes. It was the largest and heaviest silver button fish landed, which gave him the prize for catching the second largest number of fish in all classes, because it was the heaviest landed outside of the one caught by O. H. Reed.

The following are the Salmon Club prize winners on coast streams:

Class A: Prize No. 33—First, bronze button fish, M. E. Cayples, rubber boots. Prize No. 34—Second, bronze button fish, A. E. Burghduff, assortment of spoons and bait.

Class B: Prize No. 39—Largest number of bronze button fish caught by one angler to October 15, M. E. Cayples, Duxback suit. Prize No. 40—Largest bronze button fish caught to October 15, M. E. Cayples, Simplex free spool reel. Prize No. 41—First three bronze button fish caught by one angler to October 15, M. E. Cayples, special fly reel.

Class C: Prize No. 42—First, silver button fish, W. F. Backus, special fly reel. Prize No. 43—Second silver button fish, A. S. Archer, Rustic reel.

Class D: Prize No. 44—Largest silver button fish to October 15, H. Beach, Eureka rubber boots. Prize No. 45—Largest number of silver button fish caught to October 15, H. Beach, antiback reel, 100 yards line and assortment of spoons and bait.

Class E: Prize No. 46—First gold button fish, M. E. Cayples, "dirigo" fily rod.

Class F: Prize No. 47—Largest number of button fish caught by one angler, all classes, to October 15, M. E. Cayples, special dry fly rod. Prize No. 48—Second largest number of button fish caught by one angler, all classes, to October 15, H. Beach, waterproof gum rubber coat.

Gun Club Gives Barbecue.—Newport, Ore.—The barbecue given last week by the Newport Rod and Gun Club was a successful affair. Nearly 100 members were present, and a fish and game supper provided by the losing side was enjoyed by everyone.

An enlarged photo of the winning catch of trout was presented to the club by Photographer Roper, of Newport. This consisted of 198 trout averaging more than 12 inches in length, and was brought in by a fishing party consisting of President Schumacher and three other members.

Venison from the Yachats country, barbecued to a queen's taste, was a delicious accompaniment to the trout.

Steps were taken to formulate a plan to acquire the building and grounds now occupied by the club.

A Talk on the Ways of Wild Owls Found In The Hills of Northwest.

[By E. A. Kitchin, well-known ornithologist of the Northwest.]

Tacoma, Wash.—The shooting season for upland birds closed last week, and many hunters, while tramping through wood and field, have met and perhaps become better acquainted with that most interesting family of birds, the owl.

We have in this locality a good variety, which is always a treat to the local bird men, although some of the local ranchers do not always agree with them. A little study, however, should be convincing that with the exception of one or two species, the owls are very beneficial and destroy quantities of mice and myriads of grasshoppers, and other harmful enemies of the farmer.

One can hardly expect to go out and find an owl, but those of us who spend much of our time in the woods and prairies think it no rare sight to come suddenly on one of our silent, wise-looking bird neighbors.

Probably the owl that is seen most by the hunters is the short eared owl, commonly found on the tide-flats. He is a day hunter, as well as night, and spends much of his time skimming low over the swampy ground in search of field mice. Back and forth he hovers, noiselessly, until his sharp eyes and ears find his prey; down he drops, quickly and lightly, seldom missing, and then to retire to a post or log for his feast.

Often on a cloudy day several may be seen hunting together. Each one seems to have a territory of his own. Once when we were returning along the plank road that crosses the flats, we were attracted by two short-eared owls, one hunting on one side of the road and one on the other. We stopped to watch them. One evidently made up his mind that the hunting was better on the other side and flew across, only to be met by cries and claws of the other who promptly drove him back. After a few turns he made another attempt but was again driven back. Again he came; it was great fun for us, and this time he got past the first attack of the defender, but was at once pursued and made to go back on his side of the road. After several more attempts he gave up and retired to sentinel duty on an old "for sale" sign, while the victorious defender entrenched itself directly opposite, on the root of an old tree brought in by some high tide.

Largest of all our owls, and the fiercest, is the dusky horned owl. He is the big fellow we occasionally meet in the deep woods. More often we come on the remains of his midnight repast and it generally consists of a few bones and feathers of some game bird.

A search, however, at the base of its nesting tree discloses the fact that he preys on many small animals, as well as birds, as the bones of rabbits or the tail of a squirrel will testify. One peculiar relish they seem to have is for the skunk, as several specimens locally collected plainly bore evidence. There was no mistake about it. They are the first birds to nest in the spring, generally laying two eggs, and the old nest site is used year after year if not disturbed. The young are slow growers and weeks are spent in the nest before they attempt flight. Think of the quantities of birds and animals that are brought in nightly by the parent birds to satisfy the hunger of these young demons!

The screech owl, in looks, is a small edition to the horned owl. He is probably the most common of all our owls, and is the little fellow we hear at night in our gulches, and many inhabit the woods around the fresh water lakes in this vicinity. In fact, a favorite nesting site seems to be a hollow in a tree bordering on a fresh water lake. This owl is of more good to mankind than evil, as his chief food consists of mice and other small animals that are harmful to crops. Of course, if a colony of blackbirds start a nursery on his lake he is very apt to occasionally visit their nests and collect toll, but it is only during the hard winter weather, when food is scarce, that we have records of him killing anything in the game line, and as our winters are seldom severe, we can generally pass on him as a friend and benefactor. His weird, mellow trilling at night, to one who loves the birds, is certainly not a screech as his name suggests.

We have locally even a small edition in the saw wheat owl, a bird very seldom seen; in fact, the local bird man would consider it his red-letter day if he should be lucky enough to run across this little fellow. His habits must be very near that of the screech owl, but, of course, his small size clears him completely from being a game destroyer, or anything detrimental to the farmer.

These last three mentioned birds have the tufts, or ears, but can readily be distinguished by their difference in size, the horned owl apparently about two feet long; the screech, pigeon size, while the saw wheat would not look much larger than a sparrow.

Our smallest owl, even smaller than the saw wheat, is the pigmy owl. He is rare, but is frequently found, generally perched on some stump in a strip of burned off woods. We probably see more of him on account of his being a "daily" birds as well as "nightly." Totally different in looks from the above mentioned birds, lacking the tufts, the feathers of his head lie flat back, as if brushed, and his countenance lacks the cat-like look that most owls have. His food consists chiefly of mice and grasshoppers, though one can hardly imagine how he can get away with a good sized mouse, so small is he. Catching his prey on the ground, nature has provided him with a very stiff tail, which he seems to use as a lever in case his victim tries to pull away. His flight is different from most owls, not the light, wavy movements, but a rapid, direct flight, not unlike that of the robin.

Far up on the highest hills, far removed from any civilization, dwells the rarest of this species, the spotted owl. He is a big fellow, nearly as large as the horned, but his round head and numerous whitish spots flaked over his brownish body are enough to identify him from others of his kind. He must live an easy life, as the trees are too thick for any daylight tormentors to bother him and mankind seldom sees him. No enemies and plenty to eat—that is the life!

Some time ago four of us took an auto trip up the mountain road, our idea being to hunt the higher hills in search of ptarmigan or some of the rarer birds that inhabit the higher altitudes. We left the machine about five miles beyond Ashford and tackled one of the highest hills. A local rancher told us it would take three and one-half hours to reach the summut, where we would find a small lake hidden in the woods. This sounded good to us and we started off with big strides, eager to get to the top. Three and a half hours—the idea—we would make it in an hour and a half. We did get to the top—in four hours of the toughest climbing imaginable—no trip for anything but a wild goat, or maybe one of our local mountaineers. The last part of the journey was through very thick woods, without underbrush, an ideal place for owls, and we stopped every now and then to give a mouse-like squeak—a call that will generally attract an owl—but none answered.

Never did anything look so pleasing as did that little toy lake look to us when we finally spied it through the trees. Hurrying forward we found the water clear and cold and stopped to rest and drink before exploring its shore line. Half of the surface was frozen over and the ground on one bank was frozen, with patches of old snow still lingering. Here and there was a bunch of heather and each one picked a spray to bring home. We had not rounded more than half of the lake when our attention was attracted to some large object tied to the branch of a tree swaying in the wind. It was a large bird of some kind and with a bound we reached it to find that someone had shot a big spotted owl and had left him for us to find. Here was luck! Here was the bird that every local bird man would prize more than anything, waiting for us after our severe climb! Well were we rewarded. Hardly a collection can boast of a spotted owl, for as our leading bird man describes him, he is "the rarest bird found in Washington."

We came down that hill in half an hour!

Stock Breeders' Page

Scientific Weather Signs.

One of the most trusted weather maxims is "The weather must change with the change of the moon." This, however, was tested five thousand times in succession by a government weather bureau, but while the weather changed eighteen hundred times there were thirty-two hundred times when it did not.

But there are plenty of soundly scientific weather signs. For instance, the "ring around the moon," which is produced by a thin, filmy cloud made up of minute particles of ice, generally means it will pour "cats and dogs" within three days at most. In eighty-six cases out of a hundred the rule holds good. A still better sign is the "ring around the sun."

This is science pure and simple, and so is the old maxim: "The farther the sight, the nearer the rain." It is not pessimism that makes people along the coast predict a downpour when they can pick out the separate houses on a far-away island, or people in mountainous regions call it "too good to last" when a distant peak, generally invisible, comes into view.

They are shrewd meteorologists in making these predictions, and also in declaring that sounds carry better when a rainstorm is brewing.

Of all nice convincing weather signs, however, a "sickening sky" is pretty nearly the most reliable. When the deep warm blue grows paler, and then whitish, and your spirits drop, and shadows fray at the edges and disappear, then you have a sickening sky.

Rain is not being brought up ready-made from afar, it is being manufactured directly overhead.

The color of the sky, then, is a fairly trustworthy sign in and of itself, and so is the color of the clouds. Intensely white clouds against an intensely blue sky mean bright weather ahead. Greyish clouds on a lightish blue foretell rain.

Sufficient Power Is Necessary.

The mistake is often made, says an exchange, of keeping barely enough work animals to till the land in seasons of ordinary rainfall, or in normal conditions. Those who do this may be greatly embarrassed when the season proves to be an extraordinarily unfavorable time for tillage. In such cases the manager with not enough work stock may have many difficulties with the result that some of the crops are not properly cultivated, thus causing the farm manager loss.

A safe rule is to keep sufficient work stock to till the farm in the best manner, even should the season be unfavorable. It may happen in such events that one or more animals are not used to their full capacity, but this will be economy. The risk is too great to begin with insufficient teams, as the worst may come and cause you to hire in the busy season, provided you can, or neglect a part of your crop.

If there is neglect for any reason, the garden, truck crops, orchard, pasture crops, sowing, etc., generally suffer, for it is human nature to take care of the money crops first.

Especially important is it that there be plenty of horse-power in breaking. If the tractor is used this applies as it also does when horses and mules furnish the power. Good farming cannot be done without plenty of power.

Good Sale of Holsteins.

An auction sale of purebred Holstein-Friesian cattle was held at the state fair grounds, Sacramento, last week and substantial sums were received for practically every animal.

The sale was considered very satisfactory by both consignors and buyers. A. W. Morris, of the firm of A. W. Morris & Sons of Woodland, expressed himself as well pleased with the results of the sale of 77 head of high bred Holsteins. Hewitt & Hewitt, of Dixon, disposed of 20 animals; Dr. E. J. Weldon and Fred Kiesel of Sacramento each contributed ten animals to the sale.

The largest individual buyer was J. L. Gibson of Williams who purchased 19 animals at a cost of over $10,000. He paid $1,350 for K. K. S. V. Elzevere Barnum from the herd of Dr. E. J. Weldon of Sacramento; $1000 for Dora De Kol Jeek 2d, purchased from A. W. Morris & Sons, Woodland; and $875 for K. K. S. V. Star-Rena, owned by Dr. E. J. Weldon.

Other purchasers of representative animals were: Dr. T. J. Cox, J. M. Henderson, Jr., C. H. Hobart, F. Kiesel and A. A. Merkley, of Sacramento; Ginn Co. of Courtland, Bridgford & Co. of Knightsen and A. W. Morris & Sons of Woodland.

Nevada Cattle Will Fatten at Porterville.

Porterville, Nov. 4.—What is said to be the finest lot of range cattle ever brought to Porterville were delivered here today when 400 head of fine grade steers were brought here from Fallon, Nevada, for the Porterville Alfalfa Company's feeding yards. The stock, in charge of W. E. Premo, the manager of the alfalfa company, and M. M. Dale of the Poplar district, were brought through by special train in record time. The addition of this stock to the company's plant will make 1900 head all told being fattened for the block by this corporation.

The Status of the Percheron Trade.

The following, signed by President E. B. White and Secretary Wayne Dinsmore, has been issued from the office in Chicago of the Percheron Society of America:

"Your society has enjoyed a healthy growth in business during the current year. Importations, of course, have been practically nil, but more American-bred horses have been recorded this year than have been recorded in any year heretofore. Careful inquiry throughout the breeding districts, particularly in Illinois, Iowa, and Ohio, the three leading states, reveals the fact that there are very few stallions three years old rising four in the hands of the original breeders, and not many stallions two years old rising three that have not already been purchased by dealers or by farmers who desire to use them. While the majority of the yearlings rising two are still in the hands of the breeders, the demand for horses of this age has been greater than ever before. Dealers are buying more horses of this age because they have not been able to obtain horses from abroad, and must make their purchases in this country. To obtain the best colts and to give them fair opportunity to grow out, it has been necessary to buy a year younger than they have been in the habit of buying colts in France. The keen demand for well-bred yearlings of first-class type and size has given great encouragement to small breeders and farmers. It will unquestionably result in greater care in breeding, and in more adequate feeding of the weanlings and yearlnigs.

Selection of the Ram.

Sheep men will agree with A. M. Pateson, assistant animal husbandman of the Kansas State Agricultural College, as to the importance of the ram in raising sheep.

"The ram must be strong in the points in which the ewes are deficient," said Mr. Paterson. "It is a known fact that like begets like, and if both the ewe and the ram are weak in the same points, these weaknesses will be intensified in the offspring.

"In the first place select a breed. Then decide on the amount that is to be paid for the ram—from $35 to $40 will buy a desirable ram. If it is possible visit the breeder, and select the ram; otherwise order from a breeder with a reputation for square dealing, and let him know the exact type of animal desired.

"In case the flock is small a ram lamb will be all right. In case there are more than 30 ewes the ram should be two years old. The ram selected will depend upon the type of ewes in the flock. If the ewes are small and light boned, get a heavy weight and heavy boned ram. In selecting the ram special attention should be paid to type, mutton qualities, and denseness of fleece. Quality of mutton is the prime factor in the farm flock and should receive most attention."

Changing Sheep Pasture.

An old shepherd who was unusually successful says that sheep should be changed from one pasture to another occasionally. He finds that this is desirable even though it is necessary to change from a good pasture to one not so good. He says he finds that when sheep have access to good grazing and there is evidence that their stomachs are full, if you turn them into another pasture they will begin grazing and seem to relish it, like they were hungry.

It is a fact that a frequent change of pasture permits the pasture to become purified to some extent. The animals are then removed from their old grazing ground where the manure and the pasture, as English shepherds say, is "sheep sick"

This shows the importance of plenty of grazing. It means that there should be pastures for a change, even if they must be small. No doubt this will mean less parasites and better health in the flock.

Will Winter in California.

Newman, Nov. 4.—Several special freight trains unloaded fifty-three cars of Nevada cattle at the local stock yards Thursday, coming to California to escape the snows and cold of the ranges in that state. The cattle are the property of the Lander County Live Stock Company, and are in charge of Manager F. W. Hobart of that county. They are being driven up into the foothills, to a big tract owned by the Oristimba Ranch company, a corporation which has large holdings of rough land along the border of the Stanislaus and Santa Clara counties. Most of the cattle will probably be returned to the Nevada ranges in the spring.

Shorthorns Average $673.

At a sale of Shorthorns held in Chicago week before last 43 head totaled $30,315, an average of $673. The leading price for bulls was $1,825, paid by Dr. J. R. Raby, Gatesville, Tex., for Cumberland Marshall 2d, consigned by Mr. McDermott. The top price paid for cows was $2,000 commanded by Lady Craigstone from Uppermill, with bull calf at foot by Villager, on bid of J. A. Countryman & Son, Rochelle, Ill. Breeders were present from many states and the animals were widely scattered.

Aberdeen-Angus Average $428.

An average of $428 was realized on 46 Aberdeen-Angus cattle sold at auction on Tuesday by C. D. & E. F. Caldwell at Burlington Junction, Mo. There was a large attendance of breeders and farmers from many states. The highest price for a bull was $1500, and for a female $1000.

Heredity and Joint Ill.

Professor G. H. Wooldridge, of the Royal Veterinary College, London, England, in a paper read before the members of the Royal Counties Veterinary Medical Association, made some remarks on the vexed question of joint-ill, and the bearing heredity may have on its reappearance in succeeding generations. He said:

"It has been suggested that infection may be hereditary in that the succeeding progeny of some mares become affected, and this view is somewhat supported by those few reported cases in which the joints of foals are enlarged at birth, the result of intra-uterine infection. In my view, however, although that may occur, a more common hereditary feature is that all the progeny of certain dams have a very slowly citracising umbilicus due to a rather large umbilical ring, and obviously such an hereditary condition must be regarded as a predisposition. Another reason for progeny developing the condition year after year is frequently that they are born in the same old places without proper care having been taken to disinfect them. In fact that is the case to such an extent that one might almost regard the disease as one of old lambing folds. I have known a farm where year after year most of the foals developed joint-ill. They were all born in the same big, roomy loose box, the only attempt at disinfection being occasional whitewashing of the walls. Good results were only obtained when the farmer, who would not pay attention to detail, was persuaded to allow his mares to foal out at grass as the lesser of two evils. This was immediately successful, and the mares which were thought to have transmitted it were proved 'not guilty.'"

Shorthorns Bring Big Money in England.

According to English advices, pedigree Dairy Shorthorns are making big money in England. A new record was established at Samuel Sanday's sale at Puddington, Chester, where 115 head made an average of $605, or $85 per head better than the Tring dispersal record of 12 months ago. The highest price was $2,900 given by Thomas A. Rigby for the four-year-old cow Darlington Day Dream, a daughter of Oxford Record and Darlington Cranford 10th. A two-year-old bull out of this $2,900 cow brought $1,050. The next highest price was $2,750, given by Capt. Fitzherbert Wright for Puddington Prince Furbelow 2d, a yearling red by Barrington Prince and out of a Furbelow cow. Many reached the $1,500 mark. The $2,900 cow is an own sister to Royal Darlington, sold to go to the United States for $2,000. Non-pedigree Shorthorns likewise are selling freely. J. L. Shirley disposed of 35 cows at an average of $240 each.

Earth Roads Crowned Too High.

It is possible to have too much even of a good thing, and easy to use a good tool in a wrong fashion. This is what has happened in Iowa, where the road drag has been used so thoughtlessly that the surfaces of some roads have been dragged to a dangerous peak. The center of the road has been built up too high for safety or comfort. A high crown and steep sides create a double danger. It is a case of zeal without judgment. The misuse of the drag cannot be held against that valuable implement or surface preservation by its systematic employment. The Iowa State Highway Commission disclaims responsibility, as it is without authority in such local administration. It suggests complaints from travelers to the dragger or the road superintendent, the county engineer or supervisor. Of course the water will run off the more readily the steeper the sides of the road, but so will the vehicles. The ditch is the place for the water but not the wagons or cars. It is easy to get the crown too high, just as it is bad to get it too low. It is all in the operator, and the operation is simple enough when horse-sense is used.—Breeders' Gazette.

The Shire stallion Neuadd Hillside, imported to this state from England by Henry Wheatley of Napa, and sold to Jack London a few years ago, died last month at London's farm near Glen Ellen, Sonoma county. Neuadd Hillside was eight years old and was imported as a four-year-old. He won at shows in England and was a frequent winner in California, his last appearance in the show ring being at the California State Fair, where he won the championship for Shire stallions. Mr. London has a couple of colts by this horse that he thinks will be worthy successors to him.

British horse buying in Chicago was suspended early last week, according to the Breeders' Gazette, and it is understood that policy will be adopted everywhere. French contracts are also being terminated and it is expected that purchasing on European army account will be materially contracted during the winter. Army business is being done largely at $150@175. Commercial trade is fairly active. Chunks weighing 1,400 pounds or more are selling at $190@225. The range on drafters is wide, few big horses being available. Feeders are picking up a few at $150@210.

One of the features of the next annual National Western Stock Show at Denver, Colo., which opens on Jan. 20th, will be a full-fledged dairy show. It will be held under the auspices of the Colorado State Dairymen's Association. Dairy cattle of all the principal breeds from all of the Rocky Mountain states will be on exhibition. A full classification has been provided, with more than $5,000 in premiums.

THE FARM

THE RAISING OF TURKEYS.

Size and vigor vary as much in the different breeds of turkeys as they do in chickens or other birds. Some are small and runty no matter how much or how good the feed is they get. Others have a larger frame and better digestive system to assimilate the feed supplied, hence they grow faster than those with poorer vigor. Still others have a fine vigorous system for assimilation of the elements in the feed, and they are also a large type.

It is generally an uphill fight and discouraging to the breeder to attempt to make his turkeys big fat birds when the parent stock was scrawny and lacking in vigor. It is a pleasure to notice the quick growth and increasing fullness of body of birds that have been hatched from a vigorous strain of turkeys such as the Giant Bronze or the big White Holland.

There are different methods of feeding ready for Thanksgiving or Christmas, but when we see some scrawny birds, masquerading under the name of "turkeys," hung up for sale, the fact is shown that some people believe a little extra feeding during the last two or three weeks is sufficient. Many of these birds have had to hunt for their food all summer, in many cases a scarcity of bugs making it impossible for a few weeks' feeding to make fat birds of them.

All through the season every bird should be sent to roost with a crop full of feed, preferably grain, and if two feeds a day are supplied the finishing process of fattening will be so much easier. If the birds have a range to roam over, the feed in the morning may be lighter than the one at evening, especially if they have access to growing alfalfa, or if there is an abundance of bugs around.

Birds intended for Thanksgiving should be selected for feeding as early as the first week of October, and they should be the heavier ones with good vigor. The lighter and younger ones should remain for Christmas. There is no better combination for fattening than corn, wheat and buttermilk, followed by a run in an alfalfa patch. All milk must be fresh daily, and the fount cleaned, or indigestion may result.

One of the most successful breeders gives his flock a mixture of cracked corn. Egyptian corn and wheat, in troughs, plenty of fresh buttermilk in the shade, and the birds have a run in an alfalfa patch. They eat all they want of the grains, and they show results of the management by the fine appearance of the flesh and size when the owner is ready to sell.

By sending birds to market that weigh not less than ten pounds for females and thirteen pounds for males, all with a full rounded breast of flesh, the highest price can be obtained, and the markets are especially desirous of getting the biggest and fattest ones.—J. E. H., in Rural World.

Pure Bred.—California has only commenced to realize the importance of pure bred beef cattle, and is therefore just in its infancy asa pure bred beef state; but it is destined to become of more good herds than any state in the Union, because of our favorable feed and climatic conditions.

Warranted to give satisfaction.

GOMBAULT'S.
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FEEDING
Wins Health, Wealth and Productivity. You can gain the best returns by learning the most modern and practical methods of using the main feeds and of turning your by-products into solid profit. Professor Woll in PRODUCTIVE FEEDING OF FARM ANIMALS has sifted and made practical the results obtained from the experiments carried on in all parts of the world. There can be but one result,—health, weight, strength and productivity for the animals, money in the bank for you.

362 pages. 96 illustrations. Octavo. Handsome cloth. $1.50 net. Postage or express charges extra.

DRIVING CAPS AND JOCKEY CAPS

THE CONQUEROR KNEE SPREADER

They stop any pacer or straight line trotter from hitting their knees. They increase the speed of a horse and never tire him, because they work on ball bearings using rubber only from hoof to stick leaving the action of the horse free. Clasp adjustments. They never hit the shafts are easily attached, fit any shaft and are durable. Patented 1914. I guarantee them for 6 months, except the rubbers. Price, $20.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Turn Your Hand Trap Stunts Into Dollars

TELL us your "stunts" with the Hand Trap at camp, picnic parties, aboard motor craft, in the woods and fields, at the shooting club's joker trap, or any place where the Hand Trap has given amusement, instruction and experience to yourself and friends.

We Will Pay Cash for Illustrated Stories

For the best descriptive story of the most novel and practical Hand Trap experience accompanied by at least three group photographs of actions described, (containing more than one person) we will pay a first prize of $15.00; a second prize of $10.00; two prizes of $7.50; five prizes of $5.00 each; FIFTEEN PRIZES of $2.50 in CASH.

ALL STORIES AND PICTURES MUST BE SENT BEFORE DECEMBER 1, 1916

For desirable pictures, (publication rights released to us) accompanying stories not accepted, we will pay ONE DOLLAR on receipt of film.

IF YOU HAVEN'T A HAND TRAP RENT ONE OF YOUR DEALER when you buy your shells and targets.

Get your ideas "rounded-up,"—plan your exposures and let your camera earn a few dollars.

No restrictions as to age or sex of contestants or number of stories and photographic groups submitted, but prefer stories not over 600 words.

Get a copy of DU PONT HAND TRAP BOOKLET,—reading what has been done may give you the "hunch" that gets the bunch of money we're going to pay. Write for your copy today.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

WINCHESTER

NICKEL STEEL REPEATERS, EXTRA LIGHT

Nickel Steel, which has about twice the tensile strength of the steel commonly used in guns, is utilized entirely in the construction of the Winchester Model 1912 repeating shotgun; and, consequently, it is the lightest and strongest repeater on the market. It is also considered the handsomest. It is made in 12, 16 and 20 gauges, and although on the market but a short time, is now the biggest selling repeater. Get one.

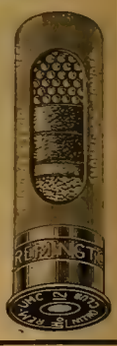
Use ***WINCHESTER*** "Leader" or "Repeater" shells in Winchester guns, and in guns of any make, as on account of their patented construction and uniform loading they always give the best results. Winchester shells were used by the winner of the Grand American Handicap.

Remington UMC

REMINGTON UMC

REMINGTON UMC

EVERYWHERE in these prosperous times, men are treating themselves to new guns —for thousands of old models and compromise makes are being discarded for Remington UMC.



Every new stride a man takes forward in his shooting—every demand he makes for better results from his gun and his ammunition —is a step toward Remington UMC.

Here are the two Remington UMC Shotguns—celebrated all over the world—used everywhere—sold wherever there is a dealer alive to the progressive spirit of the times.

Remington UMC Pump Gun—The first hammerless repeating shotgun. Six shots. Positive Slide Action. Easily and quickly loaded. Smooth working. Rapid in fire. Solid breech, closed top and sides. Loading and ejection at bottom—shells, smoke and gases go down.

Remington Autoloading Shotgun—Five Shots, each fired, loaded and ejected by pressing the trigger. Solid breech, closed top, ejection at the side. Giving great penetration and high velocity.

The point is that Remington UMC is the livest issue of the day in arms and ammunition. No one knows this better than the alert dealer—the man who features the Red Ball Mark of Remington UMC, and finds his store becoming Sportsmen's Headquarters in every town.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

$2,500 GUARANTEED — **ONLY $2 TO NOMINATE MARE** — **GUARANTEED $2,500**

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

MONDAY, DECEMBER 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. **$1,000 FOR THREE-YEAR-OLD PACERS**

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

erms—One year, $3; six months, $1.75; three months, $1. oreign postage $1 per year additional; Canadian postage 50c per year additional.

Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

ommunications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THE PACIFIC BREEDERS' FUTURITY for the foals of mares bred this year, to trot and pace as three-year-olds in 1920, will close for nominations on Monday, December 4th. It has a guaranteed value of $2500 and it only costs $2 to nominate. The other conditions will be found in the advertisement on another page. Now it is up to the owners of stallions and mares that are of the trotting and pacing breeds to see that this stake is filled. The breeders of draft horses, cattle, sheep, hogs and chickens in California, and the growers of fruit and grains are all organized and working together to see that the market for their productions is made as profitable as possible, but the trotting horse breeders rather let things drift and seem content to take things as they come—no, not content, as they do a deal of grumbling over conditions as they are now. If they will the Pacific Breeders' Futurity No. 17 with more nominations than No. 16 received they will only be doing something to help their own business and increase the values of their stallions, mares and colts. It will only take the nomination of 100 mares in this stake to make an increase of nearly 50 per cent over last year's stake. There were enough mares bred to trotting or pacing stallions in California last year that are owned by men who would not miss the $2 nomination fee required to name the mares in this stake, to fill the stake with several hundred nominations. But the P. C. T. H. B. A. does not expect several hundred, but would be very pleased to receive 100 nominations. Such an increase over last year when only 71 were received would be very gratifying and also very encouraging to all concerned. Let's have that 100. The stake will close on Monday, December 4th, and the Breeder and Sportsman will have but one more opportunity to remind you of the fact before the stake closes. Decide today that you will nominate your mares, and tell your neighbor who owns a mare or two to nominate them. A general boost for the game is needed at the present time.

MORE HARNESS RACES were held in the United States this year than ever before in the history of the American trotting horse. Not only were there more races, but there were more meetings held and the percentage of profitable ones is said by some of the eastern statisticians who have been keeping records to be greater than ever. There is no doubt but harness racing is the greatest of all American sports, both in the money invested and in the number of people who are interested and engaged in breeding, training and caring for trotting and pacing horses. As an amusement feature of the county fair, harness racing is the one indispensable article that the public demands, no matter how many other attractions there are. From Maine to California it is the harness races that fill the grandstands and draw the crowds. Nine fairs were held in California this year at which harness races were the main amusement, and with a little more effort and a little more team work on the part of harness horse breeders themselves the number of fairs and race meetings can be doubled in 1917. What are you doing, Mr. Trotting Horse Breeder, to see that more fairs with harness racing are given? You are more vitally interested in the financial part of the game than anyone. Are you alive to the situation and are you doing your part to boost the sport and make your horses more valuable? If not, why not?

AMONG THE LAWS voted on and carried by the people of California at the recent election was one which prevents a member of the California Legislature from holding any other salaried office under the State government. The Attorney General has now been asked to give an opinion as to whether the office of member of the State Board of Agriculture and like officers are salaried in the meaning of the law. Members of the State Board of Agriculture are only paid mileage and a certain amount for attending each meeting held and this amount probably does not cover the sum paid out by the member in attending these meetings. Hon. Ben F. Rush, who was re-elected Senator from the district of Solano, is and has been for many years a valued director of the State Agricultural Society and it would be a distinct loss to that Society and the live stock interests of California if Mr. Rush should be compelled by this new law to retire from the directorate. A peculiar feature of the recent election and one that showed the independence of California voters was manifested when the votes for Senator were counted in the district composed of Napa and Solano counties. Napa county gave Hughes, the Republican candidate for President, a majority of something over 800, and at the same time gave Silva, Democratic candidate for Senator who resides in Napa, about the same majority over Rush, Republican. Solano county, which is the home of Rush, gave Wilson a majority of over 1000 and gave Senator Rush a still larger majority and elected him.

THE IDEA of a California circuit for 1917 is taking a strong hold on the horsemen of this State and they are anxiously awaiting an early announcement of dates. A meeting of secretaries of the associations that gave meetings in 1916, and intend to give meetings in 1917, should be called for not later than December. There are many owners who are only waiting for the announcement of a circuit to put their horses into training. Horse owners these days do not spend their money for training expenses unless they see some sport in sight. Training is a rather expensive business and few horse owners expect full returns on the money paid out, and there are a great many of them who will not begin to incur this expense unless they see a chance to get some of it back. They do not ask a guarantee to win but only the opportunity to race. Associations should remember that it has been fully proved that the earlier the announcement of a circuit is made the larger will be the entry lists. And it is entrance money that makes racing possible and profitable for the associations.

DON'T WAIT until the season is about to open before getting out the advertising for your stallion. Owners of mares are beginning to figure now on mating theim next spring, and if you don't get a card or an advertisement of your horse before them, they may overlook him. Getting off to a good start is a very important thing in a race. And it is the same in the stallion business. Let the public know now where your horse will stand next spring, and what the service fee will be.

REDUCTION OF RECORDS INCREASES INTEREST.

The meeting of the Kentucky Trotting Horse Breeders' Association held during the first two weeks of October will have a wider influence over the market values of young trotters, a greater tendency to herald the prowess of the light harness horse, and will create more interest in the trotter throughout the length and breadth of the land than any other given during the year, and for the very good reason that a greater number of startling performances took place over the famous course than during the entire campaign down the Grand Circuit. The rank and file of those interested in the performances of the trotter are enthused when they read of some remarkable mile, some new record made, and while they may keenly enjoy a stirring finish when present to witness it, the mere announcement that a record has been lowered attracts their notice where the story of a desperate struggle would be taken as a matter of course. There are in this country many thousands of men and women whose interest in the light harness horse is very keen, yet who rarely witness a record breaking performance or see one of the champions in action. These men and women read of the extraordinary miles trotted at Lexington and are so enthused that every other race meeting held during the year is but a half forgotten memory.

Of the tens of thousands who keep in a measure in touch with passing events, how many can name the winner of any of the rich purses of the Grand Circuit or remember for a week the duels between great horses about which they read in the dailies? Yet these thousands, from one end of the continent to the other, read that The Real Lady, a two-year-old, has gained a record of 2:04¼, lowering the mark but recently made by Peter Volo; that Volga in winning the richest prize of the year trotted in 2:04½; that Lee Axworthy reduced the record for stallions and missed equaling that of Uhlan by one-quarter of a second; that fast miles were every-day occurrences, and that the Lexington track was the fastest piece of ground ever seen. These things do more to proclaim the greatness of the trotter than all else combined, and it is because of this that the Kentucky Trotting Horse Breeders' Association wields a wider influence on the breeding industry than any other organization.

As long as the time test is the all important one, and records count for more than a mere victory, such a meeting as the one recently brought to a close will do more to give publicity to the accomplishments of the trotter than where nothing sensational in the way of time is done. The sport-loving public delights in a close contest in which the finishes are desperate struggles between two or more of the starters, but these struggles, while they furnish excitement and are in reality what give to the spectators the thrill that comes with a contest, have little to do with the making of history and are only remembered by those who witness them. It is the fact that something sensational has been done, some heroic feat accomplished that is known to the thousands of admirers of the trotter who are furnished their information by the press, both daily and weekly. The bare statement that the two-year-old Breeders' Stakes produced a desperate struggle carries with it little that is important to the horse lovers who were not present, yet the announcement that the winner trotted in 2:04¼ becomes known to tens of thousands and is spoken of and written about until the record has been surpassed.—[American Horse Breeder.

NATIONAL HORSE SHOW NOTES.

Only reports of the opening day of the National Horse Show in Madison Square Garden, New York, have reached us so far, but there were many interesting occurrences on that day.

The class for ladies' saddle horses exceeding 15.2 hands was won by Mr. John A. Hartford's Kentucky mare Gossip. Miss Louise Beaver-Webb, who has ridden Gossip in most of her performances this year, was in the saddle.

Miss Loula Long of Kansas City did not make any entries in the show as she is still suffering from the result of her accident and is unable to show the horses herself.

One of the interesting classes at the morning show on opening day was for saddle horses of heavyweight type up to carrying two hundred pounds. Not one of the twenty entries was over 15.2 in height, an indication that tall horses are not wanted to pack weight. Lady Wilton, a chestnut trotting bred mare exhibited by Mrs. Josephine Williams, won the blue with Mr. A. Lincoln Stadler's The Knight second.

Mrs. David Wagstaff, of Tuxedo Park, won the largest saddle class of the day with her black gelding Pointer. There were thirty-two entries, and among them were such well known winners as A. W. Atkinson's Sparking Moselle, Alfred Meyer's Northern Star, Daniel Guggenheim's The Knut and W. H. Rhodes' Radiant.

Philadelphia exhibitors scored heavily in the harness classes on the opening day. Miss Constance Vauclain's imported hackney mare The Whip, for which she paid $10,000 in England a few years ago, came to the front in slashing style in the strongest class of the day for high steppers in single harness. Miss Vauclain, in an effective costume which harmonized with the color of her horse, drove the chestnut daughter of Leopard with masterly skill.

Miss Isabella Wanamaker, the daughter of William H. Wanamaker Jr., captured a prize worth winning for the Philadelphia contingent with her high stepping chestnut hackneys Eve and Netherhall's Pride. The latter horse was shown in the class for hackney stallions last year by an exhibitor who brought him all the way from Alberta, Canada, to exhibit at the Garden.

E. R. Bowne, George Willing and Pierre Lorillard Jr., the judges of trotters, had their work cut out for them in the class for light harness horses having records of 2:30 or better. Louis Lee Haggin, a nephew of the late J. B. Haggin, sent into the ring a beautiful brown mare called Chetah, driven by "Bobby" Moreland of Lexington, Ky. W. M. V. Hoffman, one of the oldest exhibitors of trotters at the Garden, was represented by his chestnut gelding Teneriffe, winner of championship prizes galore.

John R. Thompson, of Chicago, sent on the speedy and promising four-year-old, Britton Forbes, that has shown 2:10 speed, and Edward T. Stotesbury, president of the Horse Show Association, exhibited both Trixie Briggs, a winner last year, and Ebony King, a black stallion that has been almost unbeatable at the summer shows. There was some tall going on the tanbark before the ribbons were tied, and the judges finally settled down to the stallion as the best one in the lot. Teneriffe finished second, Mr. Haggin's entry was third and Mr. Stotesbury came in for the white rosette.

754 HORSES FOR OLD GLORY SALE.

Largest and Most Notable Consignment of Recent Years Will Pass Through the Garden Auction.

Entries to the Old Glory Sale, to be held at Madison Square Garden during the week of November 20th, closed last week and the returns show that a total of 754 horses, all trotting bred, will be sold during the year's biggest and most important sale, during six days and evenings, writes A. G. Asdikian.

This is the largest number consigned to this sale for several years past, and even in the absence of the regular sale catalogue, which will be issued next Monday, it is certain that the lot to be offered to the highest bidder will also surpass others of recent years in quality, judged by advanced announcement and notices of the leading consignments.

The greatest feature of this sale will be the two important dispersals, both due to the death of their respective breeders, men known all over the country as two of the best trotting horse breeders of many years standing, namely, William Russell Allen and Jacob Ruppert of Pittsfield, Mass., and Poughkeepsie, N. Y., and respectively owners of the two noted breeding nurseries, Allen Farm and Hudson River Stock Farm.

These dispersals are absolute—that is, none of the two magnificent collections, including noted stallions, brood mares and promising youngsters, will be reserved, unless sickness and accidents make some of them temporarily unfit for the sale ring between the time they were listed and the day they are scheduled to be sold.

Each of these consignments is headed with a stallion which, as speed producers, hold a unique record in the annals of trotting horse breeding, for age and number of standard and champion speed performers. Bingara, the premier of the Allen Farm, surpasses all other speed-producing stallions in history for age, as official records show that at the age of 14—that is at the close of the racing season of 1915, he now being 15 years old—he has put no less than 112 in the speed list, while his nearest competitor at the same age is Allerton, with sixty-four to his credit, and the next best is Axworthy, with forty-six, both of the latter being sensational young trotters of their days.

Judged by his record as an early and extreme speed sire, Bingara, in the unanimous opinion of horsemen and breeders, is the most valuable stallion of his age ever sent to a public sale, consequently he is looked upon as the star of the entire collection and one that is expected to top the price list.

The close similarity between the Allen Farm and Hudson River Stock Farm is that the latter's consignment is also headed by a young and sensational speed-producing stallion — namely, Guy Axworthy, which came into prominence as a sire of speed earlier than any other stallion in the breeding ranks except Bingara. At the age of 11 Guy Axworthy had placed fourteen in the standard speed list, which was one more than credited to his sire, Axworthy, at the same age, although the latter is the leader among all old-timers.

After passing to the Hudson River Stock Farm, Guy Axworthy climbed up steadily until at the close of this season he added no less than twenty-two to his standard list, including his son, Lee Axworthy 1:58¼, by all odds the greatest trotter the world has ever known, one that trotted within a short few weeks no less than five heats in 2:00 or faster. This record alone is sufficient to make Guy Axworthy the contending star of the sale with Bingara, and the latter the greatest speed sire ever sent to a public auction.

The grood mare contingent of both sales include matrons that have been selected from the choicest each former owner could buy, irrespective of cost and after long years of study in producing bloodlines or performances on the turf, with the result that never in the history of Old Glory Sales were as fine a collection of matrons sold as will be in this one.

It is another peculiar coincidence that in the juvenile contingent of both consignments, mostly by the two stallions mentioned, and out of select matrons, those offered are all trained to the minute and hold their positions as the greatest collection of futurity prospects and future racing candidates. As indicators of present and near future demand for light harness horses of the highest breeding, such two consignments are hardly recorded in one public vendue.

In the absence of the official sale list details pertaining to other consignments are not yet obtainable, but judged from the sources they come and the quality of stock they are descended from, the great majority will surely represent the finest ever sent to a public sale. Prospective buyers have some ideas about another consignment of merit and quality, namely, the twenty-nine weanlings by The Harvester, the erstwhile champion of the world, and out of the magnificent lot of brood mares that has been collected for Mr. C. K. G. Billings with which to stock his now famous Curles Neck Farm in Virginia, a collection never before gathered in one breeding farm.

An effort is being made to organize a club that will give a harness race meeting at Douglas Park, Louisville, Kentucky, next season. Several very prominent trotting horse breeders are interested.

◈ ◈ ◈

While the harness racing season in the United States was most successful this year it is already predicted that there will be more meetings and larger purses in 1917.

A SOLDIER'S HORSE.

A recent issue of The People, a popular London weekly, has this among its war stories:

"A sergeant tells the following story of his men: 'Whilst out with his battery a man with tears streaming down his face as the result of the German use of lachrymatory shells, saw that his horse was similarly affected. Pulling down his mask to save himself, he proceeded to cut up his smoke helmet to protect his horse, and was thereupon taken before the colonel to answer for destroying government property. Asked for an explanation of his action, the man replied that he loved his horse. The sergeant was asked by the colonel if he thought the man really had such an affection for the animal, and the sergeant replied that he could quite believe the man's story, as he once saw him crying for half an hour beside his dead horse. The man was let off with a caution.'"

An indignant protest was made by Mr. Henry Benson, a veteran of the turf, in the London press, and was a spirited reminder of the regard which soldiers always hold for their faithful servants. Mr. Benson wrote from a bed of illness so serious that physicians were visiting him twice daily, as follows:

"Firstly, let me say that I am confident that I am expressing the opinion of every lover of horses when I state that I am proud that the British army possesses such a splendid humanitarian as the soldier referred to, and I blush with shame when the story reveals that it embraces such a colonel.

"Apart altogether from the God-made law of duty of man to his beast, the soldier was actually, from the sordid pecuniary point of view, serving the nation faithfully, since nobody will question the comparative value of a trained army horse and a smoke helmet. And yet, forsooth, 'my little great Lord, the Colonel,' with all that insolence which office and brief authority too often bring in their wake, actually 'dismisses him with a caution,' whereas he ought to have paraded the regiment and pointed the trooper to his fellows as the model of what an English horseman, sportsman, or soldier should be.

"And for the benefit of the colonel and his kidney, if any there be, in the British army, may I, sir, give a few examples of the treatment meted out by the greatest soldiers in the world's history to their steeds? Without exception, they never failed to remember that their noble and faithful servants had been transported from comfortable stables to the battle-plains to share the sufferings that they and their men were called upon to endure, and that a sacred bond of obligation was thereby placed upon their riders. Indeed, many war-steeds have been immortalized and in the English mind the most prominent is Wellington's Copenhagen. The famous charger was a full, rich chestnut, grandson of the mighty Eclipse, standing barely 15 hands high and purchased by the Duke for £400. But his powers of endurance were wonderful. 'I rode him," said Wellington, 'at the battle of Waterloo from 4 in the morning until midnight. If he fed, it was in the saddle. At the end I personally saw that he was fed and attended to before I touched my despatches.' (Mark that, my little great colonel!) In Spain he carried his master hundreds of miles, and in addition to Waterloo he was present at Vittoria and Toulouse. He died at Strathfieldsaye in 1835, at the ripe old age of 27. (And now, my little great lord colonel, I am going to give you a terrible shock!) He was buried with military honors; and the Duke—yes, the Iron Duke, God bless his memory!—caused the following inscription to be placed over his resting place:—

"'God's humble instrument, though meaner clay,
Should share the glories of that glorious day.'

"Scarcely less famous was Napoleon's love for his white stallion Marengo, whose skeleton, I believe, may be seen at the Royal United Service Institute, whilst no man had no greater regard and affection for a horse than the late Earl Kitchener. Indeed, every 'officer and gentleman'—the two terms were formerly synonymous in the British army—has a peculiar love for his charger and probably there are few distinguished soldiers who have not in their possession mounted hoofs as mementoes of their departed favorites. Copenhagen and Marengo, to say nothing of Lord Kitchener's Democrat, by no means end the roll of honor, and, compiling a short list from memory, what romance attaches to Caligula's Incitatus, King Arthur's Spurnador, Alexander's Bucephaius (whom nobody but his master could mount), Raymond's Aquiline, Richard II.'s Roan Barbary (to whom Shakespeare refers, my little great lord colonel!), Richard III.'s white Surrey (also immortalized by the bard of Avon), Lord Marmion's Bevis, William III.'s Sorrel (whose stumble in a mole hole brought about his master's death), Lord Cardigan's Ronald, whom he rode in the Balaclava Charge, and Earl Roberts' favorite charger, whom Queen Victoria decorated with the South African medal? To that list let me add just one other. Amongst the many war documents which I have read since August, 1914, none impressed me more than a letter sent by a private in the Dragoon Guards to his mother, which contained the following passage: 'They shot my greatest friend from under me—my horse Minnie, the most faithful animal in the world. God forgive them for that. I never will.' (And now, my little great lord colonel, I dismiss you with a caution.)"

Dr. Henry A. Tuttle died at Boston, Mass., October 30th, aged 41 years. He was the manufacturer of the well known veterinary preparation Tuttle's Elixir.

DEATH OF PROMINENT OHIO BREEDER

Mr. C. F. Emery, one of the foremost horse b
ers of Ohio, died at his home near North Ra
October 31st. Mr. Emery was 84 years of age a
time of his death and his Forest City Farm wa
one time one of the leading breeding farms in
Soon after reaching his majority Mr. Emery o
eighty draft horses and had the largest teaming
ness in Cleveland, and became greatly intereste
trotting horses.

Emery's parents objected to his interest in
horses but that did not stop him. He was determ
to own some good trotters and pacers.

Slipping away to Kentucky back in the early
Mr. Emery bought a trotter called Parana. The
was supposed to be kept quiet, as he did not
his folks to know that he had invested so he
in fast horses. The news beat him home, howe
and Emery had his hands full explaining mat
The mare turned out to be just as good a one a
had picked her to be and she won a long strin
races, starting in at Chicago, and finally was
for $16,500.

Mr. Emery also bought Nugget 2:26¾; Her
2:27½, by Harold, the sire of Maud S. 2:08¾; Br
Wilkes 2:21¾, Mattie Hunter 2:21¼, Patron 2:1
McAdams 2:18¼, and numerous brood mares w
he purchased after carefully selecting them for t
breeding, conformation and gait.

George Whitney drove Matie Hunter for En
and raced her in a remarkable campaign aga
Switzer, Sleepy Tom and Lucy. Going into Can
Mr. Emery purchased the stallion Patron. He tu
Patron over to George Fuller to race and after a
cessful campaign Patron sired a large numbe
good horses, including Ananias 2:05, a famous pa
horse, who was raced by Fred Keyes.

Patron's greatest performance occurred at G
ville in a battle with Clingstone. Patron won
first two heats, taking a record of 2:14¼, which
one second slower than the stallion record then
by Maxie Cobb. He lost the race, but it was
to a bad start more than to any inability on the
of the horse.

In addition to being a foremost breeder in
country Emery was the first man to export ho
to Russia. John Splan had shipped trotters
Europe earlier but they went to France.

In 1893 Emery sent Winter Set, Yonondio and
Brown Wilkes and two fillies by Genoa to Russi
charge of Charles Page. That was mid-winter, 1
The following fall Frank Caton, after many urg
requests had been made for a capable Ameri
trainer to go to Russia, left his home at Forest
Farm, where he had been in Emery's employ si
the farm was purchased, took his family, consis
of a wife and four children, to seek his fortune
the land of the czar. It was a hazardous under
ing, and many, including Mr. Emery, thought
Caton would not go through with his plans.

Caton was determined, however. He took
chance and made good. During his first year in
far-off country he sold fourteen horses for his
employer and by dint of hard work, pleasing per
ality and skill he quickly made a place for himsel
his new home. Caton spent twenty-three years
Russia, during which time he won a high place am
the royalty, made much money and gained the ho
of being the man who really built up the racing ga
in Russia.

When Mr. Caton left Forest City Farm he was
ceeded by Fred Keyes, who also went to Rus
later.—[Guy T. Rockwell in Cleveland Plaindeale

To Encourage the Breeders.

Marion, Ohio, November 9th, 191

Breeder and Sportsman: We have been much
terested in the interviews given by Frank Caton
his return from Russia, especially the follow
statement:

"When one considers that 20 per cent of all w
nings go to the breeder, some idea of the interest
breeding and racing in Russia may be gained."

Every one who has given any thought to the fut
of trotting in America knows that we have got to
something to encourage breeding.

Why can't we pattern after the Russian syste
If not on so large a scale, then in a more mod
manner. For instance, let 5 per cent of each hors
winnings be retained and presented to the breeder
that horse.

In addition to encouraging breeders it would
as a check against ringing. A breeder would h
to prove his claim to his percentages.

We believe that a discussion on these suggestio
could not help but prove beneficial to all interes
in the light harness sport. The time to talk th
things over is before the meeting of the Joint Ru
Committee in December.

Very respectfully,

THE HOUGHTON SULKY CO

A few days ago Lon McDonald worked the thr
year-old trotting colt, Forest B., a mile in 2:10¼ o
the Indianapolis track. McDonald purchased For
B. at the recent Lexington sale, giving something li
$500 for the bay colt. He is by Mainleaf 2:08¼
of Anna Clark, by Prodigal 2:16.

◈ ◈ ◈

Fricka, the daughter of Bingen 2:06¼, that p
duced Fair Lady 2:07½ and Erda 2:09¼, gets a n
2:20 trotter in the two-year-old filly Our Ruth 2
by San Francisco 2:07@.

Thoroughbred Matters

It is announced that the Tijuana Jockey Club has been organized in San Diego and that its purpose according to James W. Coffroth, who made the announcement, is to replace the old Pacific Jockey Club, the body which at one time tried to control the racing of thoroughbreds on the Pacific Coast. Isn't it rather presumptuous for a few men who are promoting racing in Mexico to set themselves up as a governing body and attempt to control the sport of racing thoroughbred horses in the western part of the United States?

If there is to be a body governing running racing here it should and probably will be organized by the men who are actually engaged in the breeding and racing of that breed of horses. Nevada now has a racing Commission that allots dates and is the governing body for that State. At the coming session of the Legislature in California an effort will be made to have the laws provide for a racing commission in this State, and if any more of the Pacific Coast States desire such commissions they will probably have them, but we do not think the breeders and owners of thoroughbred horses will ever again submit to dictation as to when and how they shall race, from any organization that is running a race track. It was just such control that made racing a business, and brought about its suppression in California, and the breeders know this to their sorrow. If racing comes back in California it will come back with some class to it and will then be controlled by the men who breed horses for the purpose of improving them and the sport of seeing them run, and not by the men whose chief interest in the Thoroughbred is in making a profit out of the money wagered on the result of races.

Some Incidents of Danny Maher's Career.

Danny Maher, whose death was reported from London last week, was a native of Hartford, Conn., and the son of a blacksmith. He learned to ride under "Father Bill" Daly, who has given to the turf a greater number of prominent jockeys than any other American trainer. Maher began to ride in 1894, when 13 years of age, and his first mount was on a horse named Fagot. At that time he was apprenticed to his uncle, "Big" Mike Daly, a brother to "Father Bill," who had developed young Maher from an exercise boy.

In 1897 Maher was under contract to A. J. Joyner, and from Joyner he went to William H. Clark, whose horses at that time were trained by Matt Allen. Maher won the Brooklyn Handicap of 1899 for Mr. Clark on Banastar, but in the Suburban the same year he was left at the post with the Clark horse. This part of his career will never be forgotten, for Mr. Clark and his friends accused the jockey of having deliberately having his mount left, and in punishment Mr. Clark "set him down."

Maher did not ride again until his contract was purchased again by Joyner. It is only fair to Maher's memory to say that his honesty had never been questioned except in this Suburban, and Banastar wheeled at the break, and to many who saw the runner his being left was no fault of the rider.

It was in the autumn of 1900 that Maher went to England for Pierre Lorillard, and almost from his first appearance on the English turf he made an enviable reputation for himself.

He wore the silks of Lord Rosebery for more than seven years at a retaining fee of $20,000 a year, while Lord Derby paid $10,000 for second call on his services. His gentlemanly behavior made him such a great favorite with the aristocracy of England that he spent his winters yachting with Lord Rosebery in the Mediterranean, and with both Lord Rosebery and Lord Derby shooting on their preserves in Scotland.

Maher rode 5,626 races in England and won 1,421 of them, a winning percentage of 25.30. Among his triumphs were three victories in the Derby. In 1903 he finished first with Sir J. Miller's Rock Sand; in 1905 piloted Lord Rosebery's Cicero to victory, and in 1906 captured the blue ribbon event of racing with Major E. Loder's Spearmint.

Now that the question of two tracks at New Orleans has been settled, H. D. ("Curly") Brown is giving all his attention to the Havana track. The staff at Oriental Park will be the same as last season. C. J. Fitzgerald will be the presiding steward; C. H. Lansdale, associate steward; A. T. Dobson, patrol steward; M. Nathanson, presiding judge; P. A. Brady, associate judge; J. F. Milton, starter; C. C. Campeau, associate judge, clerk of the scales and entry clerk, and W. W. Lyles, paddock judge.

Col. Phil Chinn has gone to England to try and pick up some racing material for use in this country next season. He will make a tour of the principal stock farms of England, Ireland and France, and has commissions from several prominent American horsemen to fill.

◈ ◈ ◈

All the county fairs in California expect to provide for thoroughbred races next year.

MR. BOOTS REPLIES TO MR. COFFROTH.

During the month of October Mr. Chas. T. Boots, the well known breeder of thoroughbreds at Milpitas, California, addressed a letter to the San Francisco Bulletin in which he opposed the racing of two-year-olds before April, upholding the rule of the New York Jockey Club. This communication was replied to in the columns of the Bulletin by Mr. James W. Coffroth, president of the Tijuana Jockey Club, who contended in favor of the early racing of two-year-olds. To this communication Mr. Boots wrote a reply which for some reason the Bulletin declined to publish, and Mr. Boots thereupon sent the same to the Breeder and Sportsman. It is as follows:

San Francisco, Nov. 2, 1916.

In answer to the letter of Mr. J. W. Coffroth on the early racing of two-year-olds at Tijuana, as published in the Bulletin of Oct. 30th, I desire to state that I stand by my former statement "that those who are in favor of early two-year-old racing are in it for the gambling and the financial gain," and I will substantiate it by Mr. Coffroth's letter.

First. Mr. Coffrfoth states that it would be suicide for the breeders to keep their two-year-olds idle for the extra months, from January 1st to April 1st. In other words, the money must be gotten out of them as soon as possible, no matter what the result on the future racing. I ask, is that for the benefit of the owner's financial condition or for the improvement of the thoroughbred horse? Is that racing for sport or for money?

Will Mr. Coffroth please inform me when Mr. A. B. Spreckels ceased to be a breeder of thoroughbreds other than for the public market? I would also like to know how many coming two-year-olds Mr. A. B. Spreckels has for the Tijuana 1917 meeting?

Mr. A. B. Spreckels has been selling the produce of his Napa Stock Farm as yearlings for a number of years and if by chance he has one or more that have not been sold he leases them. Does Mr. Coffroth call that breeding and racing for sport and the improvement of the breed of horses, or to get what money you can out of them, and get it in the shortest possible time?

Second. Mr. Coffroth writes that I am decidedly wrong in stating that only the commercial breeder is in favor of early two-year-old racing, and named the following breeders as examples of those who are in it for sport: Geo. Van Gordon, Lawrence and Comstock, and A. B. Spreckels.

I should like to ask Mr. Coffroth when Messrs. Van Gordon, Comstock, Lawrence, and A. B. Spreckels ceased breeding for the market and began breeding and racing for sport and the improvement of the thoroughbred horse?

Mr. Van Gordon is a good sportsman and likes a good horse, but desires immediate financial returns; but even he, I understand, has decided not to race his two-year-olds in the early months of 1917.

I should like to ask Mr. Coffroth if it is not a fact that the Messrs. Lawrence & Comstock have sold all their thoroughbreds except their yearlings, which are also now for sale? Of course, if they have thirty odd yearlings for sale they most likely desire a market for them, and the sooner the better.

Mr. Coffroth also states that as far as he knows I do not favor the racing of aged horses and have gone out of the breeding and training of thoroughbreds. I beg to inform him that I have at the Elwood Farm, near Milpitas, over seventy head of thoroughbreds and have a stable in training at the San Jose race track. I also wish to inform Mr. Coffroth that if he will adopt the pari-mutual system of betting instead of bookmaking, and conduct a race meeting instead of a gambling joint, and get his race track concession at Tijuana recognized by the "de facto" Mexican government instead of by a governor of a territory which is in almost a condition of revolt, I will be glad to prove to him that I do favor the racing of two-year-olds after April 1st, and the racing of aged horses at any and all times.

Yours sincerely,

CHAS. T. BOOTS.

El Paso Business Men Feature Juarez Meeting.

Word comes from El Paso that the opening of the Juarez meeting on Thanksgiving Day will be welcomed by the business men of the Texas border city. The Chamber of Commerce has just announced that this body sanctions the meeting and that practically every member of the organization would attend the opening. In a booklet just issued by the El Paso Chamber of Commerce, they feature the Juarez racetrack as one of the greatest attractions El Paso possesses.

Bearcatcher, whose sale and shipment from Kentucky to the West Indies was announced in these columns recently, died on the voyage. The son of St. George and Sallie McAllister was a fast horse and a good winner and won many races in California in the colors of Walter Jennings. As a two-year-old in 1903 he won four races and was a stake winner at both three and four years old. His opportunities in the stud were limited but he sired a number of fair race horses, including J. C. Welch, M. Bert Thurman, Susan B., Behest, Oakland, La Cazadora, Wild Bear, Frank Ruhstaller, etc.

Thoroughbreds as Stage Horses.

New York, Oct. 30.—The Coaching Club of New York during its recent outing of four days to the Maryland estate of Mr. William Woodward, president of the Hanover National Bank, in Maryland demonstrated that there are still in the possession of the members of that organization some horses of quality, and that the thoroughbred, though out of his natural element, played his part most notably during the final stage of the journey when the conditions were least favorable of the entire trip.

In speaking of the occasion Mr. F. K. Sturgis, vice-chairman of The Jockey Club, in active charge of the Breeding Bureaus, himself a breeder of high class heavy harness horses at his farm in the Berkshires, said:

"We had a most delightful trip, leaving the Knickerbocker Club at 9 o'clock on the morning of October 11, and passing the first night at Princeton. The second night we spent at Wilmington and third at Baltimore, reaching our destination, Bellair House, Bellair, Md., on Wednesday at 3:30 p. m. We employed during the trip 64 horses, of which all but 24 were furnished by members of the Coaching Club, and every horse, including those hired from dealers, was of good strong coaching type that stood up to his work admirably and made the occasion one to be remembered with pleasure. We averaged eleven miles to a stage.

"That portion of the trip which impressed us all, and should carry a lesson to the horse breeders of the country at large," continued Mr. Sturgis, "was the final stage, on which Mr. Woodward furnished the horses. There were four thoroughbreds, while the cock-horse was also clean bred, and there wasn't one of them under 16 hands. They were big hefty specimens, which whirled us along over the loose sandy roads at an amazing rate of speed. The Pioneer, with its passengers and guard weighed 5,300 pounds, and the ability of this team to handle such a load in the manner they did was a splendid tribute to the bone and sinew of the thoroughbred as a harness horse.

"We remained at Bellair House," resumed Mr Sturgis, "until 3:30 p. m. on Sunday, and returned to New York by train. I am glad to say that it is Mr. Woodward's intention to engage extensively in the breeding of thoroughbreds at his farm, which consists of 2,500 acres of good land. He has a good sire in Heno, the sire of He Will, and mated with the right kind of mares he should be a success."

Mr. Sturgis, like many other members of the Jockey Club, is fond of the standard-bred, and believes that the blood of the best trotting families nicks with the best thoroughbred most acceptably. In speaking of this he remarked: "The trotting sire of the right sort to breed to thoroughbred mares of size and quality has proved the efficacy of the blending of these strains. At my place at Lenox I have bred harness horses of the highest quality in this manner. They were animals of great endurance, balance and action, and had beauty as well."

New Yorkers and all who come to Gotham to attend the approaching National Exhibition at Madison Square Garden will have a chance to see a notable example of the trotting top cross on the thoroughbred dam in Melrose, a member of Sir Adam Beck's string of half-bred hunters from London, Ontario. This very sensational performer was sired by the trotter Adbaron, while his dam was clean bred. He has as much quality as Sir Edward and Sir Thomas, stable companions by the thoroughbred sires Tupelo and Philosophy respectively. He was good enough to cross the water a few seasons ago and win a championship at the Olympia Show in London, England, over a class of more than 300 competitors. Horses of mixed trotting and thoroughbred lineage are notably successful in the saddle classes, but few with the trotting top cross achieve championship honors over the timber, while a great majority of the champions are the result of the mating of the thoroughbred sire and the trotting dam. This is an interesting fact and worthy of the attention of the student of breeding problems.

The management of the National is coming in for much commendation for the manner in which they have catered to the thoroughbred this year. If they will print the breeding of each of these contestants of pure blood in the catalogue visitors will be able to follow the fortunes of the clean bred entrants when they try conclusions with the half or three-quarter breds in the open competitions.

Big Increase in Stake Money.

Nearly all the spring stakes of the Westchester Racing Association, New York, which closed on Wednesday of this week, have been increased in value. The Metropolitan Handicap has been changed from $2000 added money to a guaranteed stake of $5000, the Toboggan Handicap will have $2000 added against $1500 given at the last running, the Suburban will be $3000 added instead of $2500, the Juvenile remains at $5000 guaranteed, The Bouquet is increased from a guarantee of $1000 to one of $1500, The Belmont will be for $7500 guaranteed which is an increase of $2500, the Withers is raised from $3500 to $5000, and a number of other stakes have been increased in value. The confidence the racing associations feel that racing is now on a safe and sound basis in New York accounts for this increase in stakes.

Harness Horses and Horsemen

HEMET QUEEN, CHAMPION FILLY.

Hemet Stock Farm Shows Two Wonderful Yearlings at Arizona State Fair.

California bred yearling fillies now hold the world's records at both the trotting and the pacing gaits. The world's record for a yearling filly pacer is 2:16¼ and it was made last Tuesday at Phoenix, Arizona, by Hemet Queen, driven by Fred Ward. Hemet Queen is by the premier stallion of Hemet Stock Farm, Wilbur Lou, himself holder in 1910 of the world's yearling trotting record for stallions, which he placed that year at 2:19½. The dam of the new champion pacing filly is Hemet Girl, an eight-year-old daughter of Geo. W. McKinney 2:14¼, the second dam Lady Woolsey, a great brood mare by Woolsey, full brother to Sunol 2:08¼. Woolsey was by Electioneer out of Waxana, whose dam was a thoroughbred. The third dam of Hemet Queen is Sespie by Crichton, a son of imported Glencoe. Hemet Queen on September 4th this year paced to a record of 2:22¼, which was a world's record for a yearling pacer on a half mile track, and now, two months later, she has reduced the world's record for all yearling pacers to 2:16¼.

On the same day at Phoenix, Fred Ward drove Hemet Stock Farm's yearling filly Edith Carter a mile in 2:18¼ at the trotting gait, which is within three-fourths of a second of the record held by that California bred filly Anselila 2:17½ by Prince Ansel, made at Lexington last year. Edith Carter is by the chestnut stallion Kinney de Lopez, like Wilbur Lou a son of Kinney Lou 2:07¾. The dam of Edith Carter is Louise Carter (3) 2:24, dam of Wilbur Lou 2:10¼ by Chestnut Tom 2:15, son of Nutwood Wilkes 2:16½, second dam the famous brood mare Ingar, dam of John A. McKerron 2:04½, by Director 2:17. On September 4th, this year, Edith Carter trotted to a record of 2:26¼ over the half mile track at Hemet.

On Thursday Zeta Lucille, a two-year-old trotting filly by Wilbur Lou, dam Zeta W. by Nutwood Wilkes, second dam Zeta Carter by Director, third dam Lida W., the dam of Nutwood Wilkes trotted to a record of 2:12½, a reduction of seven seconds from her record made at Hemet in September.

Then Louise de Lopez, a daughter of Kinney de Lopez and Louise Carter, dam of Wilbur Lou by Chestnut Tom, reduced her record from 2:19½ to 2:14¼. She is a two-year-old.

From the showing made by the youngsters sired by Wilbur Lou and Kinney de Lopez it is certain that Hemet Stock Farm has two young stallions that are proven sires of early and extreme speed. No other stock farm in the country has sent out two yearlings this year, one of which has lowered all records for her sex and age and the other taken a mark within three-fourths of a second of the world's record for her age and sex. It is truly a wonderful showing and Hemet Farm, its proprietor Mr. W. F. Whittier, its colt trainer Frank Rees, and its driver and race manager Fred Ward, are each and all entitled to some of the credit which goes with such performances. And we know that the dean of them all, Budd Doble, who doubtless planned the mating of the parents of these two wonderful fillies when he was the manager of Hemet Stock Farm, will be as pleased as anybody at their showing.

A Well Conducted and Successful Fair.

W. J. Kenney, secretary of the San Francisco-California Driving Club of this city, acted as starter of the races during the Kern County Fair at Bakersfield last month. Mr. Kenney says he has been visiting California fairs for thirty years and he has never seen one that was conducted any better than this one at Bakersfield. There was one feature that particularly impressed him. When a race was called not a person was allowed on the track except the drivers of the horses. The entire track was absolutely clear and there was not a man permitted to pass until the heat was ended. Mr. C. L. Claflin, the presiding judge, was the right man in the right place and kept everything moving and strictly to rule. During one of the days several thousand Kern county school children were admitted to the fair grounds free, and were escorted through the pavilions and stock sheds by President Hall and everything explained to them. This was praised by everyone as a splendid educational feature for the children. Kern county can grow anything that any other county in the United States can, from apples to oranges, from wheat to cotton and from sugar beets to tobacco. Its live stock interests are very great and some of the finest beef and dairy herds in the world are owned there. Mr. Kenney says he has never attended a fair that was more successful.

The National Western stock show is to be held at Denver, January 22nd to 27th, 1917, and one of the greatest horse shows ever given in the west is to be part of it. In addition to the usual attractive classification, the Colorado Stake of $1000 for five-gaited saddle horses will be one of the features.

SPORT FOR SPORT'S SAKE.

Owner of Emma Magowan (2) 2:07½ Gives Unique Matinee at Chester, New York.

Why light harness racing holds its own with other sporting attractions in the United States was pretty thoroughly demonstrated by Richard Delafield at Chester, N. Y., Saturday, Nov. 4th, to those who assembled at Brook Farm that day and viewed with keen enjoyment the program of racing provided by Mr. Delafield. The explanation of the survival of trotting and pacing races was made quite clear. All carried away the impression that light harness racing maintains its position in the realm of sport because of the loyal spirit of sportsmanship back of it. And considering the exposition of that idea provided by Mr. Delafield it would be difficult to account for it in any other way. At much expense to himself Mr. Delafield staged a series of matinee races without a cent of revenue from any outside source. He not only paid for all the expense incidental to the races, but entertained more than twenty-five hundred persons at luncheon at Brook Farm and presented each driver in the races with a stop watch.

The same spirit inspired a dozen wealthy New York men to finance the recent Grand Circuit meeting at Poughkeepsie, which turned out to be one of the best trotting meetings of the season and probably the most successful one held in years on the old upstate track.

That the spirit exhibited by Mr. Delafield is general among owners of light harness horses is shown by the motto of the Road Association of New Jersey and the Road Drivers' Association of New York, which is, "Sport for sport's sake." That the sentiment spells success is evidenced by the present flourishing condition of both organizations. Members race purely for the fun of the thing. No betting is permitted and ribbons and cups are the only awards. And the men who hold membership in the New Jersey and New York organizations spend thousands of dollars for new horses every year. Some employ professional trainers and drivers, others train and drive their own horses.

The democracy of the racing side of the meeting also appealed strongly to the spectators. Amateur drivers, including one Justice of the Supreme Court of New York, raced their horses against professional reinsmen.

The expense assumed by Mr. Delafield in staging the meet was only an incident in a series of events leading up to it. Last winter when he came down to Madison Square Garden he spent several thousand dollars at the Fasig-Tipton auction sale for the horses whose triumphs on the track caused him to hold the celebration at Brook Farm. He bought the horses for the pleasure of sitting in the grand stand and seeing them race. Usually the buyer of young horses at public auction fails to get the pleasure he hopes for from his newly bought stock. But good fortune favored Mr. Delafield's selections this season and he drew a capital prize in Emma Magowan, winner of a purse for two-year-olds at Goshen in the fastest time made by a trotter of her age on a half mile track.

The Jersey sportsmen who hold their races at Weequahic Park, in Newark, admit all to field and grand stand free of charge. All expenses are borne by them. That the sport is popular with Jersey folk is shown by the attendance figures. Frequently fifteen thousand persons have viewed the races on a Saturday afternoon. New Yorkers can view the speed contests of the local organization on the Harlem River Speedway. There is no seating capacity provided for the visitors, but this is not regarded as a hardship by Manhattan and Bronx devotees of the light harness racing. Five to seven thousand of those sometimes stand in lines four deep on each side of the Speedway between 181st and 201st streets on Sunday afternoons during the season. Perhaps they, too, have imbibed the enduring spirit of the light harness racing world.—[N. Y. Herald.

Outsiders Can't Hold Stakes at New Orleans.

A sad blow has been handed those of the race track followers who last year and the year before went to New Orleans during the race meeting at the Crescent City and held jobs as stakeholders. For the most part these men have been bookmakers' clerks, who in recent years have found their periods of employment few and far between, and for them New Orleans has been the real mecca.

Announcement has been made that all stakeholders at New Orleans must be "native sons," thus bringing an element of politics into the sport in that section. This rule is expected to be adhered to, and it may prove a lean winter for New Yorkers who have been expecting to make the trip down toward the sunshine.

In addition to this new rule governing stakeholders, the Business Men's Association, which runs the New Orleans meeting, has announced that all bookmakers who intend to do business in the "palm garden" during the coming meeting must show a bank roll of satisfactory size before they will be allowed to "cut in." And so some of the "shoestring" men, as well as the clerks, may meet with disappointment.

The Big Fair Circuit, which comprises tracks in New Jersey, Delaware and Eastern Pennsylvania, has already held a meeting of secretaries and announced dates for 1917. Programs will be announced in January.

JAPANESE WANT SMALL THOROUGHBREDS

Officer of Mikado's Army Offers $7500 For Booge Red But Offer Is Refused.

In these warlike times the world's military powe are losing no opportunity to possess themselves pedigreed horses suitable to become the sires of hi class hunters or cavalry mounts. That fact was e phasized by two incidents of the opening of the N tional Horse Show at New York last Saturday.

One of the morning classes brought into the ri three stallions suitable for getting polo ponies. T blue ribbon was won handily by Mr. Allan Pinke ton's chestnut stallion Booger Red. Of thoroughbr stock, this animal is believed to be the best po stallion in the world. He was bred in Texas, w foaled in 1905, and is the son of Rancocas and t grandson of Iroquois, famous racer owned by t late Mr. Pierre Lorillard, the only American-br horse that ever won the English Derby. Mr. Pinke ton brought the stallion to the Garden from his st bles at Islip, L. I., in a padded motor horse van an was taking the winner away in the same vehicle s soon as he had captured the blue trophy.

Before Booger Red could leave the scene of h triumph a businesslike little Japanese, who, it wa learned afterward, was an officer and agent of t Mikado's army, approached Mr. Pinkerton and offere him $7,500 for the stallion. The animal was wante for a station which the Japanese have established i Corea for the encouragement of breeding superio cavalry mounts for their fighting men. That s strong a bid was made for a polo stallion only tw and a quarter inches above fourteen hands in heigh was spoken of as evidence of the Japanese prefe ence for small or medium sized mounts for thei service.

Mr. Pinkerton refused the offer, as he had refuse two years ago one from a British officer, who bi $8,000 for the same thoroughbred stallion. Booge Red, until he was nine years old, was a speedy race and the winner in many a warm contest. He wa then relegated to the stud.

Among those who were at the ringside studyin this splendid animal attentively were Mr. Augus Belmont, president of The Jockey Club, with Mrs Belmont; Dr. J. O. Green, also of the Jockey Club and the veteran turfman and poloman, Mr. H. L Herbert. All of these experts are taking a deep in terest in studying the utility of the thoroughbre racehorse elsewhere than on the track, in his capac ity either as saddle horse, polo pony, hunter or offi cer's mount.

In the same class with Mr. Pinkerton's stallio had been entered as a competitor, and catalogue as such, the bay stallion Christopher Columbus, sire by one of the most famous polo ponies in England Messrs. Harry T. Peters, Russell Grace, Allan Pin kerton and Horace Havemeyer had combined to ob tain Christopher Columbus and bring him to thi country in time for the show, and he was expected to create a sensation. When this entry failed t appear in the competition inquiry revealed the fact that the British government had intervened at the last moment and had refused to permit the exporta tion from that country of an animal so valuable as a sire of army mounts.

The two episodes serve to illustrate how jealously the military Powers are now conserving their own best equine stock and how keenly some of them are alert to the possibility of assimilating the best Amer ica has to offer.

In the competition for the Biltmore Challenge Cup, a gold trophy valued at $250, for the best saddle horse, the mare Sceptre, owned and ridden by Mrs. Robert Todd, was the winner.

Saddle Horses Sell Well in New York.

The first auction sale of saddle horses in New York since last spring was held at the Durland Riding Academy on Oct. 31st when 18 head of Kentucky-bred horses owned by S. T. Harbinson & Co. were disposed of. The bidding on the best specimens was spirited. The 18 head brought $8,515, an average of over $470. Cozzette, a chestnut mare, went to W. A. McGibbon at $925; Play Wright, a chestnut gelding, to Charles Butler at $875; Ime Broke, a bay gelding, to J. J. Dwyer at $850; Seagoing, a bay gelding, to L. E. Waring at $700; Breeze, a brown gelding, to Sal Frank at $600; Blue Stocking, a bay mare, to B. L. Belt at $420, and Annie Farral, a bay mare, to J. Deegan at $435.

The registration of all horses that race on association tracks is being advocated again by some of the turf journals. This paper advocated this years ago, and such a measure is in force in Australia and New Zealand at the present time. There are no requirements except that the name and full description of the horse, with his pedigree so far as known, must be given and registered before the horse can start in any race on an association track. Such a rule would not only serve to identify every horse but it would result in making pedigrees easier to trace than they now are. Only a small fee should be required, but registration for racing purposes should be compulsory.

◆ ◆ ◆

It looks as if those two grand sons of McKinney, Wilbur Lou and Kinney de Lopez, are about as good at siring early and extreme speed as any young stallions in the country. And their opportunities have been limited at that.

Notes and News

Those Hemet Stock Farm colts are certainly stepping some at Phoenix.

◈ ◈ ◈

McKinney 2:11¼ is now the sire of seventeen trotters in the 2:10 list.

◈ ◈ ◈

Nancy Hanks 2:04 has produced two 2:10 trotters and has a daughter that has produced one.

◈ ◈ ◈

The Phoenix meeting closes today. This will wind up the harness racing season of 1916.

◈ ◈ ◈

Up to Friday Will Durfee had won two $1000 purses and got second money in another at the Phoenix races.

◈ ◈ ◈

Tom Gahagan, the well known turf writer, is now in the employ of the Houghton Sulky Co. of Marion, Ohio.

◈ ◈ ◈

The new 2:10 trotters numbered 84 for 1916 up to the first week in November, and the season is not entirely over yet.

◈ ◈ ◈

None of the youngsters raised at Patchen Wilkes Farm will be sold at auction this year, but there are 130 listed for sale in a pamphlet recently published.

◈ ◈ ◈

Sidney Dillon now has nine 2:10 trotters to his credit. Zoe Dillon 2:08 is the latest addition to the list. Her dam is by Rex Americus.

◈ ◈ ◈

Nervolo Belle, dam of three two-year-old 2:10 trotters, is in a class by herself. She is also the dam of two three-year-old trotters that have records below 2:05.

◈ ◈ ◈

Conundrum: If Arthur Caton Thomas is the Houghton Owl what is Tom Gahagan?—[American Horse Breeder.

Can't classify him exactly, but he is some live bird.

◈ ◈ ◈

Only 16 days will elapse until the $2500 Pacific Breeders' Futurity will close for the nomination of mares bred this year. Don't miss making a nomination in this stake.

◈ ◈ ◈

Must have been an English cockney that sent out the report of the filly by Wilbur Lou breaking the world's record for yearling fillies at Phoenix last Tuesday. Her name is Hemet Queen, but all the daily papers had it Emmet Queen.

◈ ◈ ◈

Clarence Berry, C. A. Durfee, Fred Ward, Chas. DeRyder, C. A. Spencer, W. G. Durfee, W. Smith, Elmo Montgomery, E. R. Finley, William Best, Ted Bunch, Ben Walker and others made up quite a contingent from California at the Phoenix races this week.

◈ ◈ ◈

Ben Corbitt Jr. looks like one of the good prospects for 1917. He is owned by Blosser & Finley of Santa Maria, California and is a much better pacer now than he showed at the opening of the season in California. In the hands of young Finley he has won two races, was second twice, third once and fourth once out of six starts and is still eligible to the 2:10 class. He won a heat at Fresno in 2:07½ and one at Phoenix this week in 2:06¾ but they were not in winning races. He is a nine-year-old gelding and one of the "old fashioned" breeding. His sire was Ben Corbitt 2:21, son of William Corbitt and a mare by A. W. Richmond. The second dam of Ben Corbitt was by the thoroughbred Ben Wade, son of Woodburn. William Corbitt was by Arthurton out of Lady Signal by Signal 3327. The dam of Ben Corbitt Jr. is Miss Thompson by Thompson 2:14½, a son of Boodle 2:12½, he by Stranger that was a son of the famous champion Goldsmith Maid 2:14.

◈ ◈ ◈

We have received the catalogue of the Old Glory Sale which has 765 horses listed. We notice that the blood of California horses is conspicuous all through the catalogue, although there are no horses consigned from this State. No. 535 in the list is a four-year-old mare that would have sold for a good figure in this State a few years ago on her breeding alone. She is by Peter the Great, out of the producing mare Hattie Fowler by Robin 2:22¾, second dam Maud Fowler 2:21¾, dam of Sonoma Girl 2:04¼, etc., by Anteeo 2:16½, third dam the great brood mare Eveline, dam of 5, by Nutwood 2:18¾. The catalogue states that this is a handsome mare. Wonder what she will bring? Others that are well known here and have been consigned to this sale are Anselila (1) 2:17½, world's champion yearling trotting filly, now two years old, by Prince Ansel, Kid Cupid 2:08¼ by Cupid, Josie Ansel 2:14 by Prince Ansel, and Miss Griffith 2:14¼ by Bonnie Direct. The Old Glory Sale will open at Madison Square Garden, New York, on Monday next, and should furnish a fair appraisement of the values of trotting bred horses in the United States at the present time.

The 2:07 pace at Phoenix last Wednesday resulted in a red-hot contest and was won by Elmo Montgomery's Lock Logan, although Ben Corbitt Jr. driven by Finley won the third and fastest heat of the race. Lock Logan won the first and second heats in 2:07¼ and 2:07½, with the ten-year-old stallion Teddy Bear second each time. In the final heat Ben Corbitt Jr. took Lock Logan's measure in 2:06¾, which is the fastest heat this son of Corbett has paced and is a new record for him.

◈ ◈ ◈

Mr. J. T. Wilson, recently of Medford, Oregon, where he has been engaged during the past year in the automobile business, is in California on a visit and will probably remain here during the winter. Mr. Wilson was formerly prominent as a trainer of trotters and pacers and a few years ago campaigned a string through the northwest. He trained and drove Indian Hal 2:10¼, McAlzo 2:21¼ and several colts by R. Ambush. If a California circuit were announced by January 1st, we should expect to see Mr. Wilson back in the game again.

◈ ◈ ◈

Chas. T. Silva, owner of the Woodland Fair Grounds and race track, has cleared out the infield of the mile track and has the surveyors at work laying out a half mile track. It is so planned that none of the fine oak trees in the infield will be disturbed, and few changes are contemplated in the first turn. The grand stand will remain where it is, and no race track in the country will have a stand that affords a better view of the races. Lon Daniels has the Silva horses stabled there for the winter and will probably have a few two-year-olds by Teddy Bear 2:05 to begin on in the spring. There is a colt by this horse out of a Zombro mare that looks like "the goods."

PHOENIX, ARIZONA, SUMMARIES.

The official reports of the Phoenix meeting which opened last Tuesday will not be received until next week, but reports of the races for the first three days of the meeting are here given as sent by the press despatches:

Tuesday, Nov. 14.

2:12 trot, purse $1000:

The Proof	(C. Spencer)	2	1	1
Esperanza	(W. G. Durfee)	1	4	2
Allie Lou	(F. Ward)	3	3	3
Columbia T.	(Smith)	4	2	4

Time—2:08¾, 2:10¼, 2:09¾.

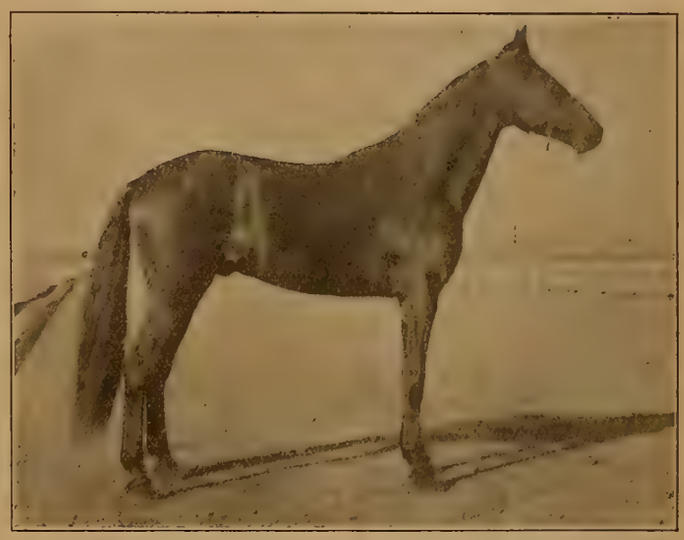
Two-year-old trot, purse $500—Won in two straight heats by Belzebola, DeRyder driving, in 2:27, 2:17¾. Dr. Davidson second, Slats third.

2:20 pace, purse $1000—Won by Zombrino, Bunch driving. Time—2:11¾, 2:12, 2:11. May Dell second, Gay Tommy third

Two-year-old pace, purse $500—Won by Miss Cheatham, Cheatham driving, in two straight heats. Time—2:30¼, 3:28. George D. second and Bill third.

Wednesday, Nov. 15.

Three-year-old pace, purse $500, best 2 in 3 heats:



Pine Knot	(Carmen)	1	1	
Lelia Mack	(Wheat)	2	3	
Little Marguerite	(Yore)	3	2	
Lady Leland	(McNab)	4	4	

Time—2:27 1-2, 2:32 1-4

2:07 pace, purse $1000, 3 heats, every heat a race:

Lock Logan, br g by Zolock	(Montgomery)	1	1	2
Ben Corbitt Jr.	(Finley)	3	3	1
Teddy Bear	(Smith)	2	2	4
Rayo de Oro	(Durfee)	4	4	3
Zomar	(Walker)	5	5	5

Time—2:07 1-4, 2:07 1-4, 2:06 3-4

THE PROOF, A WINNER AT PHOENIX.

The Proof furnished a surprise on the opening day of the Arizona State Fair when Charley Spencer landed him a winner over Will Durfee's Esperanza after that mare had won the first heat in 2:08¾. The Proof took the next two heats in 2:10¼ and 2:09¾. Allie Lou, driven by Ward, was third in each heat, and Columbia T. driven by Smith was second in the second heat and fourth in the other two. All races at Phoenix were on the three heat plan.

◈ ◈ ◈

Mr. Charles Hubbard, of Riverside, Fresno county, is still breeding a few standard breds, although he has been breeding mules principally during the past few years. Mr. Hubbard states that he has a couple of fine mares that he purchased at one of the Warlow sales that he intends doing something with, but will not race them. He owns the standard bred stallion Don McKinney 59001 but breeds him to very few outside mares. Mr. Hubbard is still interested in trotting horses even though he does not race them.

◈ ◈ ◈

"They say" that the line of march for 1917 for the trotters and pacers in California will be about as follows: Pleasanton, Santa Rosa, Dixon, Woodland, Sacramento, Stockton, Fresno, Hanford, Bakersfield, Ventura, Riverside, Phoenix. That's an even dozen and will furnish three months' racing. With a little energetic work three or four more tracks could be drawn into the circuit. What's the matter with Salinas, San Jose, Petaluma, Marysville and Newman getting into the game? There is a good track and grounds at all of them.

◈ ◈ ◈

Thos. F. Pollock, of Flagstaff, Arizona, and owner of the three-year-old Miss Axworthy Dillon, has been very successful at the Arizona Fair. His horses won three races on Wednesday, Pineknot by Dean Hall winning the three-year-old pace, Bellzebola by Redlac the 2:25 trot, and Mona Hall by Dean Hall the two-year-old trot. Chas. DeRyder has been driving some of his horses although Mr. Pollock's regular trainer, Carmen, is up behind a majority of them.

2:25 trot, purse $1000, 3 heats, every heat a race:

Bellzebola, br m by Redlac	(DeRyder)	1	1	2
Lillian Van	(Best)	3	2	1
Meridian Jr.	(Carmen)	2	3	d
Miss Della	(Selman)	4	4	d
Alice E.	(Evans)	d		
Fred Mc.	(Walker)	d		

Time—2:16 1-2, 2:17, 2:11 1-2.

Two-year-old trot, purse $1000, 2 out of 3:

Mona Hall, b m	(Carmen)	1	1
Arizona Duchess	(Selman)	2	2
Lady Direct	(McNab)	3	3
Butcher Boy	(Yore)	4	4

Time—2:57, 2:54.

Thursday, Nov. 16.

2:09 trot, purse $1000:

Esperanza, b m	(W. G. Durfee)	1	1	1
The Proof, b s	(C. A. Spencer)	2	2	2
Vallejo King	(Thomas Smith)	3	3	3
Columbia T.	(W. S. Smith)	4	4	4

Time—2:09¼, 2:07¾, 2:07¾.

2:12 pace, purse $1000:

Zombrino	(Bunch)	1	1	1
Hal Logan	(J. E. Montgomery)	2	2	2
Mona Ansel	(Finley)	3	3	3
Ellen Douglas, b m	(Carmen)	4	4	4

Time—2:07¼, 2:07, 2:06¼.

2:18 trot, purse $1000:

The Lark	(W. G. Durfee)	1	1	4
Zolock Zar	(Marsh Thompson)	3	3	1
Don de Lopez, b g	(F. E. Ward)	2	2	2
Sadie View	(DeRyder)	4	4	3

Time—2:11¾, 2:11¾, 2:12¼.

Ted Bunch is keeping up his lick with the pacer Zombrino. He won the 2:20 pace, purse $1000, on the opening day of the Arizona State Fair at Phoenix with this son of Zombro. The time was 2:11¾, 2:12 and 2:11. On Thursday Zombrino won the 2:12 pace in straight heats in 2:07¼, 2:07 and 2:06¼ and paced the last half of one heat in 1:00 flat.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Great Year for Hatchery.—Frank A. Shebley of the Fish and Game Commission's hatchery department has gone to Independence, where he will take charge of the salvaging operations after the big Southern California hatchery is completed.

Shebley has had a wonderful experience in fish cultural work in California, and considers the Oak Creek plant certain to prove one of the State's greatest assets, as his repeated examinations have convinced him that not only is every condition there favorable for fish rearing, but the supply of rainbow trout eggs in the Rae lakes, only five and one-half hours above by the new trail, is beyond even the vast plans for this establishment's future work in restocking the Southern California streams to something approaching their capacity.

One of the men drowned in Bear Lake last week was Willis F. Weismore, the man who built the Bear Valley dam, and probably knew more about it than any other, possibly excepting John S. Eastwood, who designed it. Weismore built most of the cabins in Bear Valley and had many more in prospect. He was a lifelong sportsman, an artisan of rare ability and most unusual taste. The Japanese villa of H. H. Garstin on Tamarack Island was one of the latest tributes to Weismore's constructive genius, the Japanese theme being as faithfully worked out as if planned and executed by an oriental. All who knew Weismore are at a loss to imagine how of all men such a rare combination of energy and resourcefulness should have met his untimely end in such a manner.

Reduce Limit on Trout.—The Multnomah Anglers' Club went on record at its last meeting as being in favor of cutting the one day's limit on trout from seventy-five to thirty-five. Notwithstanding the fact that more trout are being planted every season, lovers of trout fishing see that the sport is gradually declining, owing to the fact of the limit being so large and to the numerous power plants erected which kill the fish. The two power plants on the Clackamas river; one at River Mills and the other at Cazadero, slaughter many trout. Power plants also cause the rivers to raise and lower very suddenly because at different times of the day they use more water. Many small trout are left stranded on the banks where they die. Through the club's president, Dr. Earl C. McFarland, steps will be taken to have the matter brought up at the next meeting of the Oregon Sportsmen's League, to be held in Portland in December. Should this powerful organization view the subject in the same light, there should be no trouble in introducing and passing a bill which will prevent the depletion of the trout in the future.

Portland, Ore. HIGHLANDER.

Southern Fly-Casting.—Fly and bait casters of the Southern California Rod and Reel Club's auxiliary gathered at the Eastlake Park casting grounds Sunday and two complete programs were participated in. The May tourney was held at this time on account of the trout season opening on May 1 and all casters would rather hunt for the speckled beauties than cast.

John Low won the special 2½-ounce handicap event with a heave of 117 feet average. King had the best throw in this event, which was 226 feet 3 inches.

Oscar Lane is said to have equaled the world's record for the half-ounce distance bait event. He had an average of 209 feet 3 inches, while the world's mark he equaled was 225 feet 3 inches for a single cast. The summary:

May Events.

Heavy tackle dry fly accuracy—Kennedy 99 4-5; Van Horn 99; Low 99 1-5.

Heavy tackle fily accuracy—Kennedy 99 11-15, Van Horn 99 1-5, Low 98 5-15.

Heavy tackle distance fly—Kennedy 92, Van Horn 79.6, Low 79.

Half-ounce distance bait—Kennedy 98, Lane 97.5, Baker 96.9, Lenarth 96.5, Perkins 96.5, Van Horn 95.7, Richey 94.6, Kling 94.3, Roome 94, Borngrebe 91.6, Low 90.3.

Half-ounce distance bait—Lane 209.30, Kennedy 180.40, Perkins 179.60, Baker 160.60, Low 111.30, Kling 98.36, Borngrebe 90.11, Roome 75.10, Van Horn 58.10, Lenarth 55.00. Longest single cast, Lane 225.3 feet.

Two and one-half ounce distance bait — Baker 218.70, Perkins 192.00, Cerciat 188.11, Roome 174.70, Low 170.40, Lane 157.00, Kling 153.50, Borngrebe 46.00. Longest single cast—Perkins, 258 feet.

Two and one-half ounce surf distance handicap—Low 177, Kling 175.50, Lane 168.11, Baker 147.20, Borngrebe 116.20, Van Horn 110, Lenarth 102.10, Roome 71.60. Longest single cast—Kling, 226.3 feet.

November Events.

Heavy tackle dry fly accuracy—Kennedy 90, Van Horn 97 3-5, Low 95 4-5.

Heavy tackle fly accuracy—Kennedy 99 11-15, Van Horn 99 3-15, Low 98 8-15.

Heavy tackle fly distance—Kennedy 90, Low 77.6, Van Horn 74.9.

Half-ounce accuracy bait—Lane 98.5, Kennedy 97.5, Perkins 97.1, Lenarth 96.6, Baker 96.5, Richey 95.6, Borngrebe 93.8, Roome 93.4, Van Horn 93, Low 91.5.

Half-ounce distance bait—Kennedy 202.3, Lane 193, Baker 154.2, Lenarth 151.6, Low 133.2, Perkins 131.1, Van Horn 66.5, Borngrebe 50, Kling 43.1.

Longest single cast—Kennedy, 220.6 feet.

Two and one-half ounce distance bait—Perkins 249.2, Baker 179.3, Low 130.1, Borngrebe 127.8, Lane 120.6, Roome 116.1, Creciat 96.3, Kling 25.6. Longest single cast—Perkins, 261 feet.

Two and one-half ounce distance handicap—Borngrebe 205.7, Kling 199, Low 152.5, Baker 145.6, Lane 127.1, Van Horn 122, Perkins 109.5, Lenarth 38.2. Longest single cast—Kling, 229.7.

Effects of Snake Bite.—Examine the finest cambric needle under a high power microscope and its point will look rough and blunt. A snake's fang similarly inspected appears perfectly smooth and sharp. In each fang is a groove which connects by a tube with a sort of bag—the poison gland—just beneath the eye. When the snake strikes a muscular contraction simultaneously forces the venom out of the bag through the tube and along the groove into the flesh of the person attacked. Snake poison, generally speaking, has two effects. It destroys in some mysterious way the fibrin of the blood, thereby causing the latter to behave as if diluted and to filter through the walls of the veins and arteries. In addition, it paralyzes the nerve centers and so affects the heart, sometimes bringing death by suffocation.

TWO ANGLERS.

A barefoot boy,
A white birch pole;
A can of worms,
A swimmin' hole,
A baited hook,
A tug and swish;
A steady haul,
A string of fish.

A white duck suit,
A canvas boat;
A costly rod,
A patent float,
A gaudy fly,
A dash and swish;
A pretty sight,
But nary fish!

King Seal Winner.—The King still lives and rules. On the throne of Seal Rocks, surrounded by his many subjects, one night last week sat Bill Taft, king of seals, after he had vanquished an ambitious rival in a combat which continued all afternoon and into the night.

On the beach, washed in by the tide, lay the carcass of the invader.

Visitors at the Cliff House and beach saw a fierce fight start between King Taft and the latest pretender to the throne. Several seals, springing to the defense of the king, were killed by the interloper.

Just as the gray fog began to roll in King Taft vanquished his opponent. With a mighty roar King Taft made his way to the throne and bellowed a raucous challenge for further combat. But the ambitious aspirant for regal honors lay dead on the beach and there was none to say King Taft nay.

The Novice in Trapshooting.—A very important thought in connection with giving a beginner his first lesson in trapshooting is placing in his hands a gun which, as near as conditions will permit, fits him.

If he brings his own gun, assuming that his gunning experience ends with the field, it in all probability will be found, owing to stock measurements, to be useless as a target-breaker.

Then, in all fairness to the novice, a trap gun should be borrowed, but instead of a "hit-or-miss" selection, the shooters should be carefully looked over until one is found as near the build of our friend as may be. Thus equipped, the beginner has a fair start, and, watched carefully against bad position habits, will quickly settle into the proper swing, which will carry with it a confidence that must eventually spell mastery.

If a new shooter enters your ranks, don't let him fight it out alone. If he lifts his gun as if it weighed a ton, and bends back at an angle of 45 degrees, it is your cue as a sportsman to step forward and ask if you may presume to offer him a little advice based on your own experience, and, nine times out of ten, you will find you have made a friend for life, for such are the refinements of the sport.

Balanced well on both feet, body inclined slightly forward of the perpendicular, with butt-plate of the gun well inside of the shoulder joint, your new friend is headed in the right direction, and you will soon see him breaking targets with creditable consistency. He has yet much to learn, and volumes which cannot be taught, but must be automatically absorbed through personal experience and those corresponding factors, cause and effect.—[By "Trapshooter.]

WHY FISHES SPROUT FROM THE EARTH.

Oakland Professor Explains Freak Happening at Tulare.—Other Cases on Record.

In the news dispatches of Oct. 27, under the title: "Live Fish Hurled from Bowels of Earth by Quake-Sprung Well at Spa," I read:

"Tulare, Oct. 26.—Earth shocks of Sunday night are believed to have developed a freak well in the Spa district south of here, according to C. A. Peairs, dairy inspector for this county, who returned from that section today.

According to Peairs' story, within a few hours after the quakes an artesian well, which has a depth of 1200 feet, began to spout live fish and this strange geyser has continued intermittently since that day. The fish are from two to ten inches in length, and aside from the fact that they are blind closely resemble the common lake trout.

In connection with this fact, I am pleased to extract from the manuscript of my work, "Causes of Earthquakes," the following illustrative pieces:

Volcanoes and geysers sometimes do wonderful things. There are instances on record where fishes mixed with mud were thrown up from them. An erudite Japanese writer, by the name of Tit-Singh, relates that in the year 1793 a volcano on the island of Kiu-Shu threw up in the air in a few hours, an enormous quantity of fish, mingled with torrents of muddy stuffs.

This strange phenomenon is probably due to some free passages existing between the crater of a geyser or a volcano and some subterranean lakes hidden in their flanks just at the time when the force of impulsion from below constrains the muddy waters of those lakes to overflow. The same might also explain the queer mixture of large quantities of fish, water and mud, belched forth by the volcano Cotopaxi (Ecuador) and other American volcanoes.

This explanation becomes the more plausible if we consider that the animal species which is thus forcibly expelled during certain eruptions, is the only one able to live in the high or subterranean lakes which, during the process of secular percolation, have been formed along our mountain ranges, especially in the Cordilleras of the Andes.

These fish, charged with electricity, are eyeless and belong to the class of the Silurids, and are also known to the zoologists as "Pimelodes of the Cyclops."

Fish eruptions are, after all, not so very rare. Humboldt relates that the Cotopaxi, during the terrific eruptions of 1741 emitted such quantities of these pimelodes over the surrounding fields, that their decaying bodies poisoned the very air.

Towards the end of the eighteenth century, the town of Iburra was decimated by an infectious disease, caused by the miasmata emanating from enormous quantities of decomposing pimelodes erupted by a neighboring volcano.

The waters of the famous Mammoth Cave of Edmonton county, Kentucky (the most imposing grotto in the world) are also inhabited by various species of blind fish called "Siredons," "Ablyopsis Spelaeus," etc. But the most peculiar among those eyeless animals are the "Ciprynodonts" which quietly pass their long lives in the sombre waters of the subterraneous river Styx of that wonderful cave.

In these blind fish the sense of sight has been replaced by such a delicate sense of hearing that they perceive the least movement occurring in their watery environment, and in their gloomy abode they gradually lose their scaly colors and become very pale.

Now, returning to the aforesaid earthquake, happening on Oct. 22 in the Spa district (Tulare county), I will add that it was due to the sun-spots produced by the conjunction of Jupiter with Mercury, which occurred October 8.

And, according to my theory, the very powerful electro-magnetic energy generated by this predominant planetary phenomenon has been the principal cause for the production of the severe hurricanes, earthquakes and the exceptionally heavy storms which on October 22-23 occurred respectively in the southeastern sections of the United States and over the Great Lakes, as I forecasted a month in advance.

And the same energy will yet be the direct cause for the production of some other storms and earthquakes, which will occur during November.—Prof. Albert F. Porter, Oakland Enquirer.

Raising Wild Ducks for Market.—On October 20th mallard ducks were placed on sale in two stores in Minneapolis, Minn., and those fond of roasted duck could buy one of these birds for about the same price as it costs for a resident small game hunting license in that state. The ducks placed on sale were reared on C. D. Velie's game-breeding farm at Maxwell's Bay, Lake Minnetonka. Mr. Velie, it is said, obtained permission from the state game warden to place 150 ducks on sale to determine how much of a demand there was for them, and if the sale warranted such a movement, the various game protective associations of the state will attempt to have a law enacted at the next session of the state legislature permitting farmers and others to raise ducks and other game birds and, under certain restrictions, place them on the market. How great the demand was for the birds that were placed on the market by Mr. Velie we have not learned, but we presume it was sufficient to encourage the passage of the law mentioned above. —American Field.

CALIFORNIA RIFLE TEAM IS HOME.

oach Tells of Good Marksmanship of Civilians in National Matches.

By E. C. Crossman, Team Coach California Civilian Rifle Team.]

With their vests and hats bulging under the strain f the occasion, the members of the championship alifornia civilian rifle team are straying back to alifornia from their clean-up at Jacksonville, Fla., he last week in October. From their belts dangle he scalps of every other civilian rifle team entered t the government national rifle matches—twenty-our such aggregations—and of twenty-three state ilitia teams into the bargain.

Behind them via freight comes the beautiful and istoric "Soldier of Marathon" trophy, a magnificent ronze figure that has been in competition for the fiemen of this country since 1876. The bronze is reclining figure about three feet long on a heavy edestal, one of the Greeks who turned back the tide f Asiatic invasion at the battle of that name.

Three great trophies are awarded to the winning eams in each class at the great government rifle atches to be held for one year by the teams landing hem. They are "The National Trophy," a massive ronze plaque showing Mars holding in leash the ogs of war, given to the highest team at the shoot; he "Hilton Trophy," for the winning team in class , and the "Soldier of Marathon" for the high team n class C. Ordinarily, before the intrusion of the estiferous civilion into the national matches, the ree classes contained roughly fifteen teams in ach, all militia, and the classification determined y the showing in the matches of the previous year.

This year the State militia and the national serv-e teams, such as the Marine Corps, were put in lasses A and B, and the civilians, from whom little as expected, were put in class C.

Upon which a number of civilian rifle teams, such s the California civilian and the District of Colum-ia civilian, proceeded to shoot so well that they limbed out of class C, across class B, and into class , the fifteen supposed strongest rifle teams in this ountry.

Hence the straight-shooting California men won the rophy for class C.

Next year the California civilian team will have o fire in class A, and to win a trophy will have to eat the strongest teams in the country and take the National Trophy," the others being now denied to hem because of their higher classification.

The members of the team were awarded "National rophy" medals, replicas of the handsome "National rophy," for landing in class A, and the members aking the picked united service team, the sixteen est shots of all the civilian teams, will be given andsome medals for making their places on this ar aggregation.

These men include Col. T. F. Cooke (team adju-ant), E. C. Crossman (team coach), A. L. Thomson, r. L. Felsenthal, H. C. March, C. T. Blanck, C. W. nder, E. C. Price, G. Frahm and C. F. Williams.

The Californians are extremely well satisfied with heir showing in the great shoot, particularly in view f the fact that they were picked from only two rifle ubs in this State, the Los Angeles Rifle and Re-olver Club and the Olympic Club of San Francisco, nd were without opportunity for practice over the ew course and without acquaintance and team work etween the pairs firing.

Out-shooting in the great team match, for which hey were sent East, every other civilian State rifle eam, they beat all but eight of the militia teams into he bargain, losing only to the crack organizations f the great Eastern States, such as New York, Penn-ylvania, Indiana and New Jersey. Until the last ir fired the westerners stood in third place, and nly the momentary loss of judgment on the part of ritchard of San Francisco, when he scored a miss or his first shot at 1000, put the team down to ninth.

Not until his eighth shot kicked up a dust on the utt below the far-off paper did he or his agonized eam-mates have the slightest idea where his bullets ere going. Then to prove his nerve, he ran out traight bullseyes from the shot that glanced from he butt into the paper. The slide of Pritchard was nfortunate, but even then he put on enough com-ortably to defeat the nearest civilian rifle team.

March of Los Angeles pulled the same sort of bone-ead play, finding the paper for a "three" barely on he edge of his third shot, and then because of failure o change his sights sufficiently to put his next shot nto the bull, sliding off the paper again for another niss the next shot. It was this sort of work that ounteracted the magnificent and consistent shooting f the rest of the team, shooting that caused aston-shed militia team members to gather round the alifornia score board.

The California civilians defeated the California ational Guard team about forty points. The guard oys shot their 1000 yard scores the day before the emainder of the teams fired theirs, and under prob-bly worse conditions, but the defeat by the Califor-ia civilians was at the 600 and 200 yard stages and ot at the 1000 range, which was the only difference n the conditions under which the two teams fired. The place won by the civilian team, ninth, is the ighest ever won by a team from the State of Cali-ornia, and was also made in competition with more eams than ever before attended a national match.

The 1916 matches opened a new chapter in the history of rifle-shooting America. For the first time—under an act of Congress—the government allowed teams of civilian riflemen affiliated with the National Rifle Association to compete in the national matches, and it paid the railroad fare and the Pullman transportation of these teams in the bargain. At the great shoot it furnished free rifles to all comers, free pistols, and unlimited ammunition for both arms, with ample opportunity for practice. All the great individual and team matches were opened to the civilians without a cent entry fee—and well did the civilians take advantage of the chance. Many such a shooter heaved a long sigh of satisfaction and declared that for the first time in his life he'd gotten all the shooting he wanted. Eight hundred thousand cartridges were furnished by the government and burned up by the riflemen.

The act of Congress, the first step toward a sane Swiss system of training civilians to be riflemen and potential soldiers, opens up the horizon to the humble civilian rifle shot. Heretofore confined to plodding along on his own range at his own expense, or little trips to other ranges at his own expense, he is now encouraged by the sight of the rainbow, at the other end of which lies a free trip to the greatest rifle matches in the world—and which he can attain by nothing more than becoming skillful with the rifle.

The California men, not only champions of the civilian teams of the United States, return with the satisfaction of knowing that eight of their number were in the first thirty-five men in the grand aggregate of all the individual matches fired at the big shoot, that one of their number, Thomson of Los Angeles, won fourth in the national individual out of 933 men firing, that some of them were in the first fifty men in each match, and that they landed the majority of the places and two out of the three officers of the picked United Service team. No previous California team, militia or otherwise, has ever won the high places taken by the California civilian rifle team, an aggregation hastily picked from the two strong California clubs, and most of the men without an hour's military experience.

Night Trap Shooting in Los Angeles.—The big event for the shooters at the Los Angeles Gun Club will take place on November 26, when the big turkey shoot will be held. This shoot promises to attract participants from all parts of the Southland.

On that day the shooters will be divided into four classes—class A shooters will be handicapped 20 yards; class B, 19 yards; class C, 18 yards, and class D, 16 yards. The program will consist of ten 15-bird events. Every time a shooter wins a turkey he will be handicapped one yard.

On the other hand, the participant who does not get a turkey after he has shot in four events will be given a yard. This plan will give every one a chance to capture one or more of the birds.

Work will start on the new night shooting plant at the L. A. Gun Club within the next few weeks and by the first of the year night shooting programs will be held. This will be the first night traps on the Pacific coast. In the east these after dark shoots have been tried out and have proved a big success.

Fred Teeples of the L. A. club is planning on staging a big program on the opening night of the traps and will invite shooters from all parts.

Green Lake Club.—The special practice shoot given by the Green Lake Gun Club on November 5th brought out a record crowd for this season of the year, thirty shooters taking part in the program at the north end grounds.

Dr. C. L. Templeton turned in the high score for the day with 47 out of 50, while L. S. Barnes, I. M. Fisher and W. C. Smith tied for second place with 45. Tom Wilkes, with 44, landed in third place. In the 100-target event, Tom Wilkes, with 91, marked up the high score, with Dr. Templeton, D. Rhodes and C. E. McKelvey landing in the order named.

Plans are well under way and practically all arrangements have been made for the big Thanksgiving turkey shoot, to be staged by the Green Lake Club Sunday, November 26th, and from present indications all records for attendance will be broken at this event.

The shoot marked the last appearance among the squads of Mr. Smith, secretary of the club, who left the following Wednesday for the south. Mr. L. S. Barnes and G. A. Conklin, who have been assisting Mr. Smith in his work, were chosen to continue the management of affairs at the north end club. The scores:—

At 50 Targets—Dr. C. L. Templeton 47, L. S. Barnes 45, *I. M. Fisher 45, W. C. Smith 45, Tom Wilkes 44, E. K. Van Vleck 43, *George Hambright 43, Dr. King 43, Hi Follerich 42, C. E. McKelvey 41, *D. Rhodes 41, Dr. A. B. Kidd 41, C. W. Bandy 40, J. H. Templeton 40, J. V. Hough 39, J. W. Geltz 39, M. A. Rosenfield 38, Dr. J. F. Hill 38, E. R. McConnell 37, Dr. S. W. Case 37, Howard Cosgrove 33, F. F. Gearhard 32, Dr. S. W. Giffin 30, H. E. Gleason 29, George D. Horst 24, C. A. Conklin 23, J. F. Rohowits 22, A. L. Hall 18, C. Bedhome 3.

At 100 Targets—Tom Wilkes 91, Dr. C. L. Templeton 88, *D. Rhodes 88, C. E. McKelvey 87, J. H. Templeton 78. (*Professional.)

The International Trapshooting tournament of the St. Thomas (Ont.) club will take place December 4th to 8th, inclusive.

THE PROPER WAY TO DRESS DECOYS.

Veteran Hunter Suggests Scheme to Make Artificial Ducks Real Enough to Deceive Live Ones.

"After wild ducks get to pitching into decoys, they soon find the difference between the live birds and the artificial birds," said a veteran duck shooter and pigeon shot.

"Don't you know, fellows," he went on to say, "this thought struck me one day last year as I sat in my duck boat waiting for a shot at a passing bird; why not make the artificial decoys look more like the real thing by attaching the wings of live birds to the backs of the decoys. As no one wants the wings, some good use should be made of them.

"Hunters the country over, will put out a setting of stools—differently from the next man. Most of them (the ones who know) get varying percentages in efficiency. It is a topic that requires a lot of study. Various schemes and contrivances have been tried and discarded.

"The one that made use of a pulley at the heavy duck anchor, with a line running through from the duck, through pulley to boat, enabling the gunner by short pulls to make the decoy dive and move about, did fairly well, but it had the drawback of unnaturalness.

"Again the judgment (invariably) of the man pulling the cord was bad. He would pull and agitate his decoy after he knew the wild birds had their attention on the decoys. That's the time to sit tight and quiet—stop calling. Everything you can do has been done and a call too many or a pull at the decoy may and has lots of times frightened away a flock that was surely coming in.

"Then the modulation in the call means a lot. Many men call too loud and many men will call just as loud to ducks 200 yards away as they would if they were a thousand. Also they take no notice whether the wind is none, medium, or heavy. The same call has to do. This certainly reduces the per cent of efficiency.

"Again your decoys may be set that ducks coming in will alight either outside of the decoys or away at and beyond the head stools. The good, safe rule is to get your decoys distinctly to leeward of you and place your head ones so they will face abreast of you on your right hand. Ducks coming in to decoys so set will come closer, and if they sweep through over the decoys will give you a much larger, free and natural swing of the gun. Again, if they desire to light, they will almost invariably do so in the clear water immediately at the head of your decoy flock. They will then be exactly in front of you, not off at an angle.

"The method and work of attaching wings to wood or cork decoys is very easy. Preparing the duck for table, you pick up to the first joint on the wing, being careful to leave all the long feathers on that you can—these snuggle and help to cover the back and fit together with the other wing. Join two of these wings together, one each side of your decoy, having extreme tips just meet at tail, and, take it from me, you have something that looks natural.

"Your wings have two joints, the tip and the second joint. Fasten to the decoy by small galvanized wire staples, which, driven in close, bury in the feathers and are invisible.

"Save your wings and fit out your decoys as you can—every one that you add to your flock will help, and you will be much pleased with your added efficiency. With care they will last a season, but new ones are always available by saving the wings from all birds shot."—Peter F. Carney.

Turkey Shoot at Seattle.—Plans made at the club house of the Seattle Trapshooters' Association on Harbor Island call for an elaborate program for the twenty-first annual Thanksgiving turkey shoot to be held by the club on its grounds Sunday, November 26th.

Prizes will be in the form of fresh killed, corn-fed Yakima turkeys and geese, and the shooter who does not leave the grounds with a bird will, indeed, be to blame, as there will be a sufficient number of prizes to go the rounds of all contestants.

The program is formed of ten events, of ten targets each, and the entry will be a nominal sum giving the shooter the greater odds in securing his Thanksgiving bird with little cost.

A feature that will meet with the approval of the "beginning shooters" and give them an even chance with the "seasoned" bugs is the handicapping of a shooter as soon as he has won a prize—he going back from the firing line a distance of two yards, repeating the distance each time he may win a bird.

The program on that day is attracting many of the old-time shooters who make the old Seattle club's "turkeyfest" an annual reunion and the visitors to the grounds will find many shooters whose names are synonyms of early trapshooting days in Seattle.

Among the shooters who turned out on Sunday was J. T. Robinson, this being the first time that he had appeared on the grounds and showed up well. J. B. Lewis came out for the second time this season and made a good score.

Trapshooting is growing with leaps and bounds. It will grow just as fast as baseball if given the same publicity. It is the cleanest of all pastimes—and truly American.

Sportsmen's Row

Bill Sharpe, Colonel Dorsey and Fred K. Burnham had fine sport with the ducks at Live Oaks.

• • •

Variable returns are being gotten from quail shooters. Some have good luck, others fail to connect with the birds. All are of one opinion, however, as regards the difficulty in reaching the toast tidbits. The birds are very wild and are clinging to the heaviest brush. Fred Willits got eleven of the little birds near Fresno.

• • •

Clarence Nauman and Newton Newstadter got a good quail shoot at Watsonville.

• • •

J. Ginocchio is sponsor for the statement that canvasbacks and bluebills are plentiful on the upper bay. He has been enjoying good sport with the northerners near Sobrante.

• • •

Chas. G. Werner has returned to the city from an extended outing through the Tahoe and El Dorado National Forest regions. He reports a splendid time —the real typical West life of today, including a variety of big game shooting and fishing. Amongst other things he succeeded in getting several nice bags of quail in Placer's favorite recreation grounds.

• • •

At the first general meeting of the Spokane (Wash.) Bait and Fly-Casting Club, G. B. Hunt was elected president; Dr. D. A. Akin, vice-president, and Robert Porter, secretary-treasurer. Dr. J. E. Drake was named captain. H. B. Barrier, A. I. Buchecker and C. L. withers were chosen to act with the club officers as a board of trustees. By-laws and constitution for the club were adopted and fifty charter members admitted.

• • •

So far as we can ascertain, says Sportsman's Review, Mrs. C. C. Crossman, of St. Louis, holds the championship of revolver shooting—that is, inside range shooting. Mrs. O. L. Garl has done some splendid work with revolver at targets. Mrs. Ada Schilling is among the noted revolver shots. Yet for genuine "crack" shooting on aerial targets, Mrs. Ad. Topperwein is quite unapproached.

• • •

After having been confined to his bed for the past three weeks with a bad case of blood poison, J. Howard Smith of the Southern California Rod and Reel Club is again able to get around with the aid of a cane.

• • •

There are quite a number of trapshooters who think that the Grand American Handicap would be an even bigger success than it is now if it were alternated between the East and the Middle West. Charley Newcomb, of Philadelphia, one of the students of the game, believes the tournament would be a great success in the East.

• • •

Lou Schroeder, Bob Valleau, H. P. Martine and J. Harvey Jones, members of the Mud Hen Club at Mount Eden, had excellent shooting last week. They saw plenty of bluebills but the birds were so shy that none were shot. Al Durney gathered the limit on Sunday.

• • •

Charles W. Neale of Belvedere and a party of friends had good sport in Chipman Slough. Fine weather handicapped the shooters, and they had to work hard for their good bags.

• • •

Frank Maskey and Captain du Bray enjoyed good sport on the Maskey ponds.

• • •

Bob Murdoch and Bill Murdoch, Jacksnipe Club members, enjoyed excellent sport.

• • •

Johnny Barr and Julian Esberg, with a friend, had good shooting at the Roos ponds. All got limits.

• • •

Dr. W. F. Sharpe and a friend had good shooting on Petaluma Creek Sunday.

• • •

Bill Arlett of Fresno reports the San Joaquin valley shooting good. He brought down a limit Sunday.

• • •

Frederick K. Burnham of Martinez has postponed his fishing expedition to Australia until after the first of the year.

• • •

M. J. Connell, fish and game commissioner of Southern California, was a visitor during the week. He was the guest of President F. M. Newbert at a shoot near Colusa and managed to get the limit and get an idea of the abundance of game up here in the north.

• • •

That was certainly some game hog they nabbed down at Redwood City with over 400 ducks in his possession. The game deputies have known for some time that the game has been shipped in in that manner. The violator was given a stiff jail sentence and fine and it is hoped that it will have the effect o fstamping out such a practice of exterminating the

Hunting Poor in South.—Hunters still continue to go out after game, but have very poor success. This is due t othe fact that the rains have failed to come during the past few weeks, and as a result no ducks are coming down from the north to freshen up the supply.

Of course there are some ducks in the Southland now, but they are so wild that it is almost impossible to shoot them. The ducks are feeding at night, and in the day time, when they fly, the birds go about as high as they possibly can and do not give the hunter a chance to bag many.

The local gun clubs have had very poor hunting during the past week—it has been the worst since the opening of the duck, quail and rabbit season. But the warm weather is expected to be followed with rains, and this will bring the ducks in from the north and again make the hunting excellent.

Many of the hunters are expecting better shooting and will go out this week. Owen Council and party of four will leave for a two-weeks trip through all the hunting haunts around the Southland—Bakersfield, Imperial, San Diego and many other places where hunting is expected to be good will be visited.

Portland Club.—Dr. M. M. Bull, of Richland, Ore., formerly of Eugene, who was a well-known figure in trapshooting circles throughout the Northwest for several years, went out to the Everding Park traps on November 5th for the first time in more than a year. He was high among the amateurs with 90 per cent, the same mark recorded by Peter J. Holohan, a Portland professional.

Miss Gladys Reid was second amateur, just two birds below Dr. Bull. C. C. Kelly finished with 86 per cent, while Henry R. Everding, ex-president of the Portland Gun Club, broke 84 out of 100. W. C. Bristol, with his trusty 20-gauge scatter gun, smashed 70 per cent, with E. L. Clark breaking 68. Manager H. A. Pollock tied C. N. Parker at 60 per cent.

Vernon Club.—Stanton Bruner was in rare form again Sunday and as a result captured the weekly shoot at the Vernon Gun Club with a score of 47x50 breaks. George Puckett and Meek were second with 46x50 smashes to their credit. C. W. Fish and Pew tied for third with 45x50 breaks.

George Puckett, who is manager of the Canadian Indians shooting team, visited the Vernon club and tied for second place with 46x50 breaks. Puckett was a visitor in Southern California last year and at that time he shot at the Vernon club. He probably will remain here until after the registered shoot.

It was announced that the registered shoot at the Vernon Gun Club would open next Sunday, continuing through Monday and Tuesday. Sunday morning will be practice, with five events of fifteen targets each. In the afternoon a prize event will take place, with 100 targets to be competed for.

A. W. Bruner and all the professionals who have been in Arizona competing in the shoots in that state will return in time to take part in the registered tourney at Vernon. Trapshooting has been rather dead for the past month, but the Vernon shoot is expected to arouse much enthusiasm.

The complete scores of Sunday's shoot are as follows:—

Name.	Hdcp.	Prize Event	Practice Event
George Puckett	15	46x50	66x75
S. A. Bruner	21	47x50	48x50
Meek	18	46x50	48x50
Pew	18	45x50	48x50
Greenbury	..	.....	31x50
Munzhuber	..	.....	22x25
Mrs. C. E. Groat	..	.....	45x50
Melford	..	.....	39x50
H. Groat	..	.....	45x50
McAndrews	..	.....	15x25
Bole	17	44x50	21x25
Fish	18	45x50	.....
Mohler	18	42x50	.....
Cornelius	18	44x50	.....

Los Angeles Club.—Shooters at the Los Angeles Gun Club competed for the home trophy for the first time, and a large crowd of participants turned out on Sunday. About twenty-five shooters took part in the event and some good scores resulted.

E. K. Mohler and C. W. Fish tied in the regular event with 46x50 smashes to their credit. However, in the shoot-off Mohler was the victor, with 23x25 breaks to Fish's 22x25. W. A. Hillis was third with 45x50.

C. Modina Wood created quite a sensation in the practice event when he broke 97x100. He also smashed 90x91 and followed this up with smashing 49x50. Previous to Sunday Wood's best score had been 96x100 and he felt greatly encouraged over his improvement. The scores:

"Take Home" Trophy Event, 50 targets—C. W. Fish 46, E. K. Mohler 46, W. A. Cornelius 43, H. E. Sargent 41, W. A. Hillis 45, P. O. Pool 43, Wm. Kennedy 34, B. H. Carnahan 38, Dr. W. L. Cooper 37, Geo. H. Melford 44, H. M. Gilliam 43, A. Pachmayr 42, A. Hartmann 34, F. Hartmann 32, R. C. Hartmann 41, M. D. Town 33, W. H. Brooks 33.

Practice Event—C. M. Wood 97x100, J. Matfield 71x75, R. C. Hartmann 64x75, B. H. Carnahan 64x75, W. A. Cornelius 42x50, C. M. Wood 49x50, H. E. Sargent 45x50, C. W. Fish 47x50, E. K. Mohler 47x50, R. O. Pool 44x50, Wm. Kennedy 37x50, F. H. Teeple 21x25, J. P. Hopkins 20x25, R. C. Sullivan 20x25, Dal Jeffries 10x25, C. A. Mace 19x25.

PEKIN HAS OLD CEMETERY FOR DOGS.

Elaborate Coffins and Marble Tombstones F Departed Pets; Other Kennel News.

Everyone who owns dogs feels more or less fi human sentiment which one feels on the loss of friend when death ends their careers. The streng of this feeling is shown in the "Dogs' Cemetery which at all old country houses is a spot surround by many tender memories of faithful companio who have departed for happy hunting-grounds. T largest and best appointed animal cemetery in t world is undoubtedly that which still remains attached to the ruined Summer Palace in Pekin. Her says "Pearson's Weekly," repose, in coffins of p ished orris-wood elaborately carved, more than thousand dogs, the defunct pets of former Empero of China.

The "tombstones" are of marble, but a certai number are of agate, lapsi-lazuli, and ebony inla with silver. At the sacking of the Palace by t allied European troops in 1900, considerable lo was obtained from this unique burial-place. Comi nearer home, everybody has heard of the "Dog Cemetery" situated behind the keeper's cottage Victoria Gate, Hyde Park. Here are interred so two hundred dogs and about a dozen cats. Eac grave is between two or three feet in depth, a some contain as many as three dogs, each in separate little coffin. The pets of all classes society are represented.

• • •

Jack Belnap of Oakland has a dog that can whi tle. The dog, its owner acknowledges, is of no pa ticular breed, but had the good fortune of being bo with a hair lip. When it gets winded and blow if its mouth be closed, the dog emits a very audibl whistle. Belknap is trying to teach the dog to whi tle tunes, and if he succeeds he plans to put it o the stage.

• • •

Mrs. Anita Baldwin is planning to send a string dogs to the Westminster show in New York ne February. Mrs. Baldwin has not as yet made sele tions of the dogs that will make the trip, the sho being too far off, but Failsworth White Knight, h great English bulldog, is certain to go, and this pro ably means that before returning to California th "Knight" will cross the Atlantic for a visit to his o home in England. Failsworth White Knight is no an American champion, having acquired his fin points at the Venice show, and he lacks one poi of being an international champion. This cam about by the fact that when Mrs. Baldwin purchase the dog he lacked one point of his English champio ship, and though Sam Crabtree, the original owne who bred the dog, tried to prevail upon Mrs. Baldwi to leave him in England until he acquired the on point, she was so enthusiastic over her purchas that she insisted on having the dog sent over a once. When the "Knight" acquires the one point i England he will be the only international champio bulldog living.

• • •

Dr. Pilkington, the only champion bloodhound o the Pacific Coast, owned by Harry F. Stuart, is goin east to try his hand in the big leagues. The "doctor will be shown at the big show in Chicago next mont and altogether will remain in the East five or si months. In anticipation of his leaving, Pilkingto was bred to San Francisco Lady. This will not b the "doctor's" first experience in the big league Before he came West he won as a puppy in one o the notable shows at Madison Square Garden.

Big Traffic in Dogs.—On the last trip of the Celti to New York there was a consignment of dogs fro the other side for fanciers in the United States. Yorkshire terrier, a Pekingese and a wire-haired fo terrier came to W. J. Taylor of New York, and tw English bulldogs came over for Mr. Stewart, of Ch cago, who owns Strathtay Prince Albert, who not s many years ago was given the prize for the best o all breeds at Westminster.

Officers of the White Star line say that there is big traffic in dogs to America, and one of the surpris ing features of it all is the number of Borzois tha are being shipped here. This is good news in a wa t othe fancy, as the Russian wolfhound needs a bit o new blood to keep the game going.

Skill in Trapshooting.—Obviously, the most impo tant part of a trapshooter's equipment is a shotgun and in this there is a wide range of choice, both a to the type of arm and the cost.

Shotguns are divided into three principal classes single-barrel, double-barrel, and the magazine pump gun. Prices range from $12 to $500. Howeve a thoroughly good gun can be had for from $25 t $50.

Various other articles are used by shooters as matter of necessity or vanity. Your fully accoutre shooter faces the traps with as elaborate an outfi as is worn by the star of the diamond or the knigh of the gridiron. He wears a shooting jacket an girdles himself with a belt and shell pouch; hi gun is fitted with a hand protector and a recoil pad special glasses of giant size protect his eyes fro the sun's glare and ear protectors dull the repor of the exploding shell.

Complete equipment is desirable, but after all, i is simple ability to get what is shot at that make the successful trapshooter.

OUR PRESIDENTS GREAT FISHERMEN.

Grover Cleveland Was Leading Enthusiast of Rod with Chester Alan Arthur Next.

Of the fourteen of the twenty-seven Presidents of the United States regarded as good fishermen, next to Grover Cleveland, probably the best-known angler was Chester Alan Arthur.

Beyond doubt of these fourteen fishing Presidents, which included George Washington, Martin Van Buren, John Tyler, Zachary Taylor, Millard Fillmore, Franklin Pierce, Abraham Lincoln, Andrew Johnson, Ulysses Simpson Grant, James Abram Garfield, Chester Alan Arthur, Grover Cleveland, Theodore Roosevelt and William Howard Taft, Mr. Cleveland would be regarded as holding first place, Arthur second place, and Washington third place.

When Arthur was President, the city editor of The Sun assigned Julian Ralph, a good reported and an observing correspondent, to go to the St. Lawrence and write the President's experience on his fishing trip.

In "The Making of a Journalist," Mr. Ralph tells of an experience with President Arthur as follows:

"We lived in the same hotel with him, and in the mornings he used to share with us the muskallonge or the bass he had caught on the previous day. And once it came about that he waited upon me as if he had been the humblest man in the land.

"With another correspondent I had been kept up late at night teiegraphing, and then had stayed up still later over a midnight supper. When we came to the hotel it was past midnight and the entire house—except the windows of the President's suite of seven rooms—was dark and lifeless. His windows were still brilliantly lighted, for it was his habit to work or read until very late at night.

"We tried all the doors, and when we came to the last one President Arthur opened it and let us in. We alopogized profusely, but he only smiled, and said that as his negro boy was very tired and had gone to sleep, he thought he would rather let us in himself than disturb the servant.

"'You have found very agreeable society here,' he said.

"'No,' we replied, 'we have been telegraphing.'

"'Don't tell me that,' he insisted, 'you telegraph only about me, and I have done nothing for twenty-four hours. I prefer to envy you and to believe you have found someone's society very charming.'"

President Arthur was devoted to angling, particularly for salmon. He was a member of the Restigouche Fishing Club in Canada. Doubtless many times he would have liked to go up there while he was President, but while occupying the chair of the Chief Executive he did not believe that the President ought to leave the borders of the United States.

The greatest pleasure that President Arthur could get ,giving him rest and recreation, was a day's fishing.

As a member of the Restigouche Fishing Club he killed a salmon weighing fifty pounds, which was later exhibited in the United States. Up to within three years of his death he held the record of having killed the largest salmon in the Restigouche.

Some years ago, when Mrs. Charles Pinkerton, daughter of the President, was in London, she picked up a beautiful card case of leather on which was painted President Arthur salmon-fishing. In the opinion of Mr. Pinkerton, his son-in-law, it "was a very fair likeness."

When Martin Van Buren left Washington he retired to Kinderhook, where he devoted himself to outdoor occupations, being particularly fond of riding and fishing.

As was the custom of all Virginia gentlemen living on their own plantations, John Tyler took delight in shooting, fishing and riding.

As a young man Zachary Taylor tilled the soil. He was an out-of-doors man, a good fisherman and a splendid horseman.

Calvin Dill Wilson, in an article printed in the Century Magazine some years ago, painted this picture of him:

"His boyhood was spent amid Indian adventures, and frequently the house was barricaded at nights. There was an alarm nearly every week, and on the way to and from school he was often in danger from Indians. On one occasion several of his companions were killed by Indians a few moments after parting from him.

"When he was seventeen years of age he swam across the Ohio river from the Kentucky to the Indiana shore in March, when the water was filled with floating ice. He took great delight in hunting and fishing, and was often absent roaming through forests and over prairies for days and nights together in pursuit of game. He took part in many bold and dangerous adventures."

Millard Fillmore was not much of a fisherman. In his boyhood, spent in East Aurora, he fished for brook trout, but after he began to study his profession he was never known to give any attention to the sport of Izaak Walton.

Franklin Pierce was another President who gave little time to only occasional fishing.

Little is told of Abraham Lincoln as a fisherman by his biographers because of the big events that happened in his life. But before Mr. Lincoln settled down to his profession at Springfield, particularly in his early life, like other backwoodsmen, he shot, fished, rode, drove and swam. He was really an all-round athlete. Incidentally, he was the tallest and strongest of all the presidents with the exception of Washington. Lincoln was really a physical giant.

Andrew Johnson was a man really fond of fishing, particularly in his early life, and was always eager to cast a line.

In his memoirs, Ulysses Simpson Grant, in telling of his boyhood days and the liberty allowed him by his parents, states:

"There was no objection to rational enjoyment, such as fishing, going to the creek a mile away to swim in summer, taking a horse and visiting my grandparents in the adjoining county, fifteen miles off; skating on the ice in winter, or taking a horse and sleigh when there was snow on the ground."

James Abram Garfield was only an occasional fisherman, fishing when opportunity offered in Lake Erie.

Theodore Roosevent one always associates with hunting as Cleveland is associated with fishing among the Presidents. Col. Roosevelt's interest in hunting is so great that it has obscured his fishing proclivities. But so great is Roosevelt's interest in angling that a trout has been named for the former Colonel of the Rough Riders. Several years ago the former President spent a week tarpon fishing off the Gulf of Mexico with John M. Parker.—[Alexander McD. Stoddart in N. Y. Sun.

New Coast Trap Records.—According to a letter received from O. N. Ford, two Coast trap shooting records were established in the registered tournament at Ray, Arizona, on November 9 and 10. California squad No. 1, which was made up of O. N. Ford and C. H. Nash of San Jose, Hugh Poston of San Francisco, L. S. Hawxhurst of Oakland and J. F. Dodds of San Diego, broke 1924 out of 2000 targets thrown. There was a straight run of 218 without a miss for the five men.

C. H. Nash was high man on the opening day, with 196 out of 200, and Ford got 195. Poston was high professional, with 197 out of 200. L. S. Hawxhurst and Guy Holohan, professionals, tied for the high honors of the shoot with 389 out of 400.

Trade Items.—By a margin of thirty-five targets the Camden (N. J.) Elks shooting team recently won the first of a series of contests with the Wilmington (Del.) lodge over the traps of the Beideman Club. It was a 100-target five-man event with each man of the winning team shooting Remington UMC shells. Camden's Lodge team was made up of five of the best shots in New Jersey, and the quintet hung up a score of 472 to 437 for the visitors. For the Jerseymen A. C. King, Len Lawrence and Fred Slear each made 95, former Judge Voorhees 94 and Frank Hineline 93.

H. Hartley was high amateur at a recent shoot held by the Clinton County League, of Beckemeyer, Ill. Shooting the perfect combination of Remington pump gun and Nitro Clubs he scored 46x50.

Missing only three of his quota of 100 targets, and shooting Nitros, Wm. McGinnis was high amateur at a recent shoot of the Thanhauser Gun Club, of St. Louis, Mo.

Caught With 457 Ducks.—Night Watchman Michael Collins was asked to assist a belated motorist early one morning last week at Redwood City in repairing a punctured tire. Collins reached in the back of the car for an inner tube and his hands come into contact with feathers. An investigation showed 457 wild ducks and A. L. Mason, driver of the car, was arrested by Collins for having them in his possession. Mason entered a plea of guilty before Justice of the Peace George Seely later in the day and was sentenced to serve 150 days in the county jail and pay a fine of $500.

The capture of Mason, it is said, reveals the system used to supply the San Francisco market with forbidden quantities of wild fowl.

Trapshooting Is Democratic.—"Trapshooting," said a well known author, "knows no caste and refuses to recognize social distinction—it accepts a man as a man. His success or failure at the sport is entirely in his own hands.

"The game appeals to all ages and conditions of men, and is one of the few sports in which both sexes meet on equal terms.

"Look at a squad of shooters and you will perhaps recognize the most eminent member of the bar standing beside a clerk whose income precludes membership in a country club.

"His neighbor is a successful manufacturer, whose fondness for the gun has never waned, but who no longer can stand the exposure of days afield; the next man is a physician whose professional duties permit but a short period of relaxation, so he has driven his car to the club grounds for an hour or two at the traps; the fifth shooter is a woman who loves the great out-of-doors and its pastimes."

Gulls Destroy Mice.—Gulls, when visiting the rivers and marshes of the interior valleys of California, do not appear to be wholly scavengers or piscivorous. A California gull (Larus californicus) taken on March 12, 1912, along the San Joaquin river near Mendota, Fresno county, was presented to me. Upon dissection I was astonished to find its stomach filled with common black crickets and three whole field mice.—H. C. Ohl, Cal. Fish and Game.

NORTHERN BIRDS PUT IN APPEARANCE.

Hunters Land Limit Bags with High Wind and Cold Snap.—Sport Will Improve, Too.

Hunters in Northern California are jubilant over the improved conditions in hunting wild ducks. The cold snap with the high wind blowing during the early part of the week provided ideal weather to wing the waterfowl.

Reports from many sections are encouraging. This is especially true up in the rice field country around Colusa. A. G. and Mrs. A. G. Wilkes entertained a party at the Green Head Club on Sunday and eight limits were in order. Included in the party were Colonel Dorsey, W. J. Terry, S. Christenson,, J. S. French and Al Sharp.

"It was the best hunting I have ever experienced since I have been going up to Colusa," said Wilkes. "Ducks and geese were there by the thousands and I venture to say we could have killed 200 birds apiece. As it was we got the limit and had some fine sport.

"Northern birds are commencing to arrive in numbers. We could tell on Sunday by the new plumage and the fact that the birds were not as fat as the home-bred that the visitors are starting to put in an appearance."

From about the bay the club members were favored with some excellent shooting and the chances are that it will be even better for the boys that go out this week-end.

Bears Numerous; Hard Winter.—"It's going to be a hard winter," many of the old-time trappers through the Humboldt County mountains are saying.

A sudden invasion of black and brown bears, wearing fur of remarkable thickness and of fine, glossy texture, is the reason for this prediction.

Reports from throughout the mountain regions tell of this peculiar migration. At Blocksburg one man has killed six bears within the last few days, two in the outskirts of the town. Many others have killed one or more.

At Willow Creek, seventy miles north of Blocksburg, bears are invading the apple orchards and fattening themselves on the choicest fruit. From many other points come reports of hunters and ranchers slaughtering bear and invariably the statement is that the fur was found luxuriantly heavy.

Despite the inroads of the hunters there seem to be no diminution in the number of invaders and tracks are plentiful, the indications pointing to a continuous increase rather than a decrease.

Hunting Duty of Deputy.—Hunting is one of the duties of a game warden, according to a finding of the State Industrial Accident Commission in making an award of $1970 in the form of a death benefit to Mrs. Ruth Harrington of Sebastopol as compensation for the loss of her husband, Sidney M. Harrington. The Commission in making the award also held that a game warden is not a farmer, one of the excepted classes under the law.

Harrington was killed last August on the property of the O. L. Shafter Estate Company when he was mistaken for a deer by a fellow workman. According to the evidence, Harrington and his companion had been instructed to kill a deer for the superintendent, and it was in carrying out these instructions that the man met his death.

Game Protective Association.—At the convention of the California Fish, Game and Forest Protective League at Santa Rosa on November 13, J. B. Hauer of San Francisco was again chosen president of the league, H. A. Freen of Monterey, vice-president for the 15th successive year, C. R. Shaw secretary. The board of directors is Dr. I. W. Hays of Grass Valley, W. H. Nagle of Santa Rosa, Robert Laurin of San Francisco, Dr. A. M. Barker of San Jose, Henry W. Keller of Los Angeles. The auditing committee is E. R. Zion, F. L. Haupt and Dr. John M. Dunn of San Francisco.

A committee which will go to the next session of the legislature and endeavor to have measures passed for the conservation of wild life is composed of Ernest Schaeffle, Robert Laurin, H. A. Green, E. R. Zion and A. M. Barker.

Cold Snap in Bear Valley.—Bear Valley had a cold snap, and Deputy Malone reports more canvasbacks on Baldwin Lake than ever before. The lake is the largest it ever has been. The "cans" are coming in on the Antelope Valley lakes also, and some who have the good luck to hit Elizabeth Lake in the storm may get a few big birds. Redheads are reported in Bear Valley as quite plentiful. Those going there are urged to take no chances with frail boats, as squalls may come without warning and it is better to avoid any risk of being dumped out in the icy water, which benumbs at once. The best shooting has been around the edges and off the big lakes at a smaller bond hole where the birds are driven in.

Great sport is reported with ducks down Imperial way, and likewise from Owens Valley, those disappointed evidently going to the wrong places are taking along "crooked powder" which wouldn't hit them.

Hunters have returned from this section with wonderful tales of plenty of desert quail. "That is one place where any fellow can get the limit whether he can hit 'em or not," says one.

Stock Breeders' Page

HORSE BREEDERS ARE HOPEFUL.

[Chicago Breeders' Gazette, Nov. 9.]

Confidence in the future of the horse business is sensed everywhere. Practically every man who is established in the raising or handling of horses is elated over present prospects. Extensive breeders, small breeders, mare-owners and stallion-owners are equally hopeful. I have visited practically all sections of Indiana, and consulted with all classes. It is more than a pleasure this year to meet farmer-horsemen. Everyone has the bearing and the smile that are found only when business is good.

The brood mare and her colts form the chief topic of interest among horsemen this year. "This is the mare that has produced 8 colts that I have sold for an average of $400," said one. Another confided, "My colts this year are the best I have ever had. I am feeding them extras and hope to grow them out into a top lot of horses." Many breeders are saying, "I have opportunities of selling my young mares at very good prices, but I refuse to sell because I think that I can make just as much out of them as anyone." A dealer who has been an extensive importer remarked, "I have bought some purebred colts for $400 each. It is a big price, considering the risk, the insurance, the feed and labor. Yet I am sure that I shall win out on them because there is going to be a demand for such stock that cannot be supplied." His remarks are certainly to be taken as encouraging to breeders.

Possibly the only man who is depressed over the horse business is a former importer who desired to fill his big barn with homebred animals. He relieved himself by saying, "I cannot find the kind that I want. I can find colts that are bred right. I am willing to pay any price. The colts have been poorly fed and are undersized and have not been properly developed. There will be a big demand next year but I can not get the horses to supply it."

Hundreds of stallion owners have expressed satisfaction with the results of the past season. Almost without exception men who have had high-class horses on the stand say that patronage has been good and in many instances better than ever before. Stallion-owners seem to be well pleased with their enrollment law. Scarcely is there one but speaks favorably of it. One man who has had occasion to work with stallion-owners in more than 25 counties in the state during the season this year gives it as his experience that he encountered only two men who were opposed to the law and its workings.

Horse breeders' clubs are progressing, and plans are being made for activities this fall and winter. A remarkable instance of success and growth of a local club is at Huntertown, Ind. A horse show was held there in October, 1915. It was successful from every standpoint. Following the show an organization was formed. It has been perceived that prospects for the future are bright. In order to take advantage of the future the Huntertown people are building a show and sale barn. This fall their show will be held under cover. One of the oldest horse breeders' clubs in the state seems to have been cherishing a desire to hold a club sale. Surplus stock has been sold so readily that there is no hope of the sale's being realized this year or in the near future. Horse shows are bringing out better stock this year and there is a noticeable improvement in the fitting and training of the entries. Our people are improving as horsemen. The renewed and increased interest in horses is well justified, and without doubt the future will reward horsemen generously.

H. E. McCARTNEY.

Draft Horse Situation.

A few individuals have dealt a severe blow to the horse producers in this country. The war contracts have been let to a very small number of men, which afforded the opportunity of dividing the country into buying districts so as to avoid competition. From all indications the leading markets of today are interested in war contracts. It seems that the buying of army horses is more profitable than to maintain open markets. The open market might be a disadvantage to the filling of orders for war contracts. New channels of draft horse business are now being developed to the extent that the purchasers in the large cities are buying them direct from the small dealers. Many of the rejected army horses are sold through the public auctions, which make a very poor showing in price quotations. This has a bad effect on the producers throughout the country and has even discouraged a great many farmers to the extent that their mares are not being bred. This will only add to the shortage in years to come.

All kinds of reports have been circulated concerning the number of horses and mules which have been purchased and sent out of this country for war purposes. The average breeder can do a little canvassing in his own district and see how nearly all of the sound horses have been sold—horses that would fill the army specifications. The buyers have been traveling continuously looking for horses. They are buying blemished horses and long ages, just so they are serviceably sound and are good for a short campaign. Another important thing that will increase the shortage of horses is the high-priced feed at this time. Practically every horse that the farmer can spare will be sold at some price. Before another year farmers will begin to realize that horses of all kinds are exceedingly scarce.

During the present war practically every factory that could possibly do so has turned its attention to the war market trade. These provisions have had a ready sale for export without much handling. During normal times the factories have found it necessary to use lots of horses in connection with the use of their product through the different channels of business, which required many more horses. At the first sign of peace the buyers will be searching this country from one end to the other for big, rugged, serviceable draft horses and big mules for their own use in this country. This will be only one part of the business, because much stock will be needed in Europe and purchased here if available. Men who have made a study of the draft horse business in this country state that in their opinion breeders of the good, big, strong, rugged horses and mules have a brighter future, covering a longer period of time, than ever before in the history of this country.—American Breeder.

The Ability to Come Back.

Many horses can be fitted to go into the show ring with credit for one or two years of their life, but it takes a horse with real stamina and merit to be able to leave the ring for years and then come back. Not only does it take a real horse, but it takes a real horseman in charge. How many horses we see that are kept in high flesh with show ring bloom for a few years and then are lost to view. When they are discovered their systems are sometimes found to have been ruined by the strain of high feeding and drugging.

Two horses this year have come back to remind us that a real horse with proper care will wear better than the finest machine. The first was a standard bred mare, Miss Densmore 2:07¼. When she was a two and three-year-old every man interested in speed horses knew of her because of her extreme colt speed. For five years racegoers lost her as completely as though she were dead. Her owner, Fred L. Wacholz, had retired her to the brood mare bunch. For those five years she was bred to great sires and produced colts that have been or will be heard from because of extreme speed. This year she reappeared with all of the old speed and stamina that had made her a marvel as a colt. At Peoria, on the Great Western Circuit, she finished second to Alice Arion in the first heat in 2:07¼. She took the next three heats, and first money, in 2:08¼, 2:07¼ and 2:09½. In this test she showed that she had the real horse quality and was able to come back.

The other horse in mind is the Clydesdale stallion Samuda. As a two and three-year-old, draft horse lovers saw him in the show ring and were proud of him. He won when shown and exemplified the best type of Clydesdale conformation, action and stamina. Then he, too, was retired to the stud. At the head of a small band of pure bred mares and doing public service on grade mares he was little heard of and his fame was soon forgotten. A colt here and there with the name of Samuda in its pedigree brought back to mind the horse's show ring record. But it remained for Charlie Ireland, in charge of G. W. Merna's horses, to show the public that the old horse had the ability to come back strong, sound and full of life and nerve. At the Iowa State Fair this year he left the ring as first prize aged Clydesdale stallion. He repeated the trick at the Illinois State Fair and was made grand champion Clydesdale stallion of the show. Again a horse that has the real quality (after six years lost to view, doing the most wearing work that a horse can be called upon to do) has shown, in the hands of a good feeder and caretaker, the stuff real horses are made of.—[American Breeder.

Grazing Fees to be Increased.

As a result of two years' careful consideration given to the question of increasing the rates charged for grazing livestock on National Forest ranges in California, the Forest Service has decided to increase the present rates during the next three years to a point equal to about sixty-six per cent of the average charge made for similar range on privately owned lands in this State, according to District Forester DuBois. This increase will be made gradually, in order that stockmen now running stock on the National Forests may adjust their business accordingly. In conformity with the established policy of the Department in giving stockmen an opportunity to be heard on matters affecting their interests, all the stockmen's associations, as well as the individual stockmen affected, are being advised of this proposed increase and requested to submit any statements which they might desire to make before February 1, 1917.

The increase was decided upon after the Government's charges were compared with those made by owners of private lands for grazing privileges of equal value. A study was made of some nine hundred cases involving private and State lands, reclamation withdrawals, Indian reservations, and railroad lands in the vicinity of the National Forests. It was found by the investigators that the average charges made for grazing stock on these private lands was 3.6c a head for sheep per month and11.7c a head for cattle per month; while, on the other hand, the average charge made by the Forest Service for grazing privileges on the National Forests was 1.4c per head for sheep and 3.9c per head for cattle. This indicates that the Forest Service charges at the present time do not exceed thirty-five per cent of the prices paid by stockmen for grazing on private lands. Furthermore, it is often asserted that while timber and other resources of the Forests are being disposed of at market prices under commercial methods and at competitive prices, the grazing is being sold to the stockmen at extremely low rates.

It is said that since the grazing capacity of the Forests is limited and far less than the demand, that stockmen holding permits are considered by their less fortunate neighbors to be highly favored individuals, who are receiving substantial benefits from their occupancy of lands belonging to the whole people, although it is admitted that these lands cannot be so divided in their use as to permit every stockman to share them. It is said, also, that stockmen using National Forest range have a financial advantage over those who must either lease or buy lands upon which to graze stock.

The argument is advanced by municipal organizations interested in National Forest receipts, twenty-five per cent of which are returned to the counties containing National Forests, that if the stockmen paid market prices for their grazing privileges, the State's share of the receipts would be larger and that by not so doing the stockmen are favored to the disadvantage of the State as a whole. As an illustration, in the year 1915 the sum turned over to the State of California as its share of the grazing receipts from National Forests was $27,900. On the basis of the proposed increase in rates, this sum would have been $55,000.

The increase of rates will not affect the established principle of the Forest Service of varying its charges in accordance with the value of the grazing privileges on the different Forests. Certain Forests or groups of Forests produce forage of superior value to other Forests, and some grazing areas are worth more than others, due to advantages of location near shipping facilities or farming areas where winter feed may be obtained or open grazing lands in the public domain.—[From Forest Service, U. S. Dept. of Ag.

Ohio Sale of Belgians and Percherons.

That the demand for more and better draft stocks continues in Ohio and surrounding states was demonstrated on Nov. 1st, when 150 breeders and those interested in community improvement assembled at the Ideal Stock Farm of H. S. Preston to attend the practical dispersion of his stud. While many of the animals could have realized higher prices, the general result was satisfactory, and the event will go on record as one of the cleanest of its kind. The 41 head, among which were many spring colts and several yearlings, made approximately $300 per head. The 17 mares of breeding age averaged slightly in excess of $400. The imported roan mare Caline topped the Belgian offering at $800, which figure was also registered on the imported black Percheron mare Laconie, a five-year-old. C. Morley, Peoria, Ill., Ray Bros., Trafalgar, Ind., and A. O. Tracy, Marietta, Ohio, were the most extensive purchasers of the best young fillies and stallion colts, a majority of the brood mares staying in Ohio.

Chicago Horse Market.

The Breeders' Gazette says: "Eastern horse dealers seeking to evade European army competition at western primary markets have gone to the interior to supply their needs, materially curtailing demand. The market has been unusually dull this week owing to the election which kept eastern operators at home. Big horses of all kinds have never been so scarce. Chunks and expressers are selling at a range of $190@240. Most of the drafters available have been appraised at $240@275. Southern buyers are picking up reject stock from the army inspections and a class of light farm mares at a range of $55@125."

Cattlemen's Protective Association.

The 1916 Annual Convention of the California Cattlemen's Protective Association will be held at the Palace Hotel, San Francisco, November 25th.

A most interesting program is being prepared for the afternoon and evening sessions, which will be addressed by many able and expert livestock men—H. A. Jastro; Dean Hunt of the Agricultural College, U. C.; Dean Van Norman of the University Farm, Davis; Judge Peter J. Shields of Sacramento; A. W. Foster of this city, and others. Mr. Foster is chairman of the committee appointed by the Chamber of Commerce to make the necessary arrangements to hold a livestock show and attendant auction sales in San Francisco next year, and is slated to address the meeting on this subject. A banquet will follow at 6:30 p. m.

$5000 For a Bull Calf.

One of the important transactions consummated at the national Dairy Show was the sale by Hood Farm, Lowell, Mass., to F. W. Ayer, president of the Ayredale Stock Farm, Bangor, Me., of a bull calf sired by Sophie 19th's Tormentor, youngest son of the world's champion Jersey cow Sophie 19th of Hood Farm, and out of Lass 64th of Hood Farm. The price of this calf was $5,000. Along with him Mr. Ayer took three daughters of Hood Farm Torono, including Lass 64th of Hood Farm, at $2,000 each, and one other young cow at $1,000, making a total of $12,000 for four cows and a bull calf.

THE FARM

Pure Seed Law.—The seed importation act of August 24, 1912, prohibits the importation into the United States of those seeds subject to the act when they are adulterated or contain 3 per cent or more of weed seeds, or when clover and alfalfa seed contains more than approximately ninety seeds of dodder per pound.

This act was amended on August 11, 1916, by including the seed of ryegrass and vetch in addition to those seeds enumerated in the original act and by prohibiting the importation of seeds which contain less than 65 per cent of pure live seeds, except that the seed of Canada bluegrass may be imported when it contains 50 per cent or more of live pure seed. The amendment fixing a minimum quality for imported seed is intended to keep out of the United States seed of low germination as well as seed containing large proportions of chaff, both of which have been imported in large quantities in recent years.

Use of Lime—The chief use of lime is to improve the texture of a clay soil. Lime helps to liberate plant food and occasionally acts as a direct plant food. It neutralizes harmful acids. It hastens the decay of organic matter and increases the work of nitrogen-gathering bacteria. As a rule, the best form of lime to use is finely ground limestone. This can be applied at any time at the rate of two tons to the acre. It should be applied after plowing or spading, rather than before, so that it will not be buried too deeply.

Plants vary in their need of lime. The yield of lettuce, beets, canteloupes, onions and clovers is increased by the use of lime, while watermelons seem to be somewhat acid-loving in their habits and therefore lime retards their growth. Irish potatoes do better in a soil that is slightly acid, since the fungus that causes scabby potatoes cannot thrive in an acid soil. Lime should, therefore, not be applied to the section of the garden where Irish potatoes are to be planted.

Experiments have shown that, to get the best results, most garden soils need a liberal dressing of finely ground limestone.

About Red Pepper.—The European war has cut off the supply of red pepper to a considerable extent. Red pepper, which is used both as a drug and as a condiment, is grown in South Carolina, that state last year supplying 152,000 pounds from 118 acres. This year it is estimated that 500 acres are devoted to red pepper. One acre produces nearly 1300 pounds. In 1914 the imports were 8,829,,487 pounds.

FARMS FOR SALE

Choice Land In Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Islands, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Turn Your Hand Trap Stunts Into Dollars

TELL us your "stunts" with the Hand Trap at camp, picnic parties, aboard motor craft, in the woods and fields, at the shooting club's joker trap, or any place where the Hand Trap has given amusement, instruction and experience to yourself and friends.

We Will Pay Cash for Illustrated Stories

For the best descriptive story of the most novel and practical Hand Trap experience accompanied by at least three group photographs of actions described, (containing more than one person) we will pay a first prize of $15.00; a second prize of $10.00; two prizes of $7.50; five prizes of $5.00 each; FIFTEEN PRIZES of $2.50 in CASH.

ALL STORIES AND PICTURES MUST BE SENT BEFORE DECEMBER 1, 1916

For desirable pictures, (publication rights released to us) accompanying stories not accepted, we will pay ONE DOLLAR on receipt of film.

IF YOU HAVEN'T A HAND TRAP RENT ONE OF YOUR DEALER when you buy your shells and targets.

Get your ideas "rounded-up,"—plan your exposures and let your camera earn a few dollars.

No restrictions as to age or sex of contestants or number of stories and photographic groups submitted, but prefer stories not over 600 words.

Get a copy of DU PONT HAND TRAP BOOKLET,—reading what has been done may give you the "hunch" that gets the bunch of money we're going to pay. Write for your copy today.

(U. S. Professional Champion.)

The (P) Brand Quality is always "on the job." Only one standard is used in the Peters factory, and that is the very highest. You cannot go wrong if you buy shells or cartridges with the familiar red (P) on the labels.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . 585-587 Howard Street, SAN FRANCISCO, CAL.

WINCHESTER

"LEADER" AND "REPEATER" SHELLS

For the high flyers and the low flyers Winchester "Leader" and "Repeater" shells have the reach, pattern and penetration. Their patented construction and uniform loading make them by far the best shells on the market. In proof of this we point to their unequalled winnings at the traps this year, including the Grand American Handicap. Such shells insure a good bag in the field. Get a box or two for your next day a-hunting and try them out for yourself.

THE W BRAND WILL IMPROVE YOUR SHOOTING.

REMINGTON UMC

Remington UMC

REMINGTON UMC

EVERYWHERE in these prosperous times, men are treating themselves to new guns—for thousands of old models and compromise makes are being discarded for Remington UMC.

Every new stride a man takes forward in his shooting—every demand he makes for better results from his gun and his ammunition—is a step toward Remington UMC.

Here are the two Remington UMC Shotguns—celebrated all over the world—used everywhere—sold wherever there is a dealer alive to the progressive spirit of the times.

Remington UMC Pump Gun—The first hammerless repeating shotgun. Six shots. Positive Slide Action. Easily and quickly loaded. Smooth working. Rapid in fire. Solid breech, closed top and sides. Loading and ejection at bottom—shells, smoke and gases go down.

Remington Autoloading Shotgun—Five Shots, each fired, loaded and ejected by pressing the trigger. Solid breech, closed top, ejection at the side. Giving great penetration and high velocity.

The point is that Remington UMC is the livest issue of the day in arms and ammunition. No one knows this better than the alert dealer—the man who features the Red Ball Mark of Remington UMC, and finds his store becoming Sportsmen's Headquarters in every town.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

$2,500 GUARANTEED — ONLY $2 TO NOMINATE MARE — GUARANTEED $2,500

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

MONDAY, DECEMBER 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. — $1,000 FOR THREE-YEAR-OLD PACERS

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

PROSPECTS ARE EXCELLENT for a California rcuit in 1917. Secretary F. W. Kelley of the Pacific ast Trotting Horse Breeders' Association last week dressed a letter to the secretary of every associan in California that gave a meeting this year, and several that did not, asking if the association dressed would send a representative to a meeting be held in San Francisco during December for the rpose of arranging a circuit for 1917 and announcg dates therefor. Every reply that has been reived up to this writing is favorable, and as soon all are heard from a date for this meeting will be reed upon and the meeting called. Owners of otters and pacers can rest assured that before the st of January a California Circuit will be arranged d the dates published. From present appearances ere will be not less than twelve and probably as any as fifteen meetings. It is proposed that this rcuit be established on a basis that will guarantee success, and no association need hesitate to come a member because it is located in a small wn where large purses are impossible to give. In her words, no place will be barred because it can't give as large purses as some of the others. This ar the little town of Dixon took a date between e Breeders' meeting at Santa Rosa where $900 rses were given, and the State Fair at Sacramento hich gave purses of $1000 each. The Dixon assocition concluded that its small town and half mile ack could not guarantee purses larger than $300, nsequently purses of that size were offered. Nearly l the horses racing at Santa Rosa were shipped om there to Dixon, four days of excellent racing ere given and the Solano County Fair and race eeting was a complete success. There will be no ttempt made by those who are trying to organize circuit for 1917 to induce any association to give ny larger purses than it can afford to. The main ing is for each association to give a meeting of me kind, and to be as generous as possible in the mounts hung up for the horses to race for, but to ve no more than each association can afford. By ving twelve or fifteen weeks of racing, thus making e average shipment as short as possible, with no le weeks between meetings, associations will find hat horse owners will be willing to race for smaller rses than they will if there are only a few meetngs and those far apart. There has not been a time years when the prospects for a good circuit in alifornia were so good as they now are for a season f twelve to fifteen weeks in 1917.

ONCE AGAIN we desire to call the attention of he owners of mares that were bred last year to rotting or pacing stallions that on Monday, Decemer 4th, nomination will close for that $2500 stake or three-year-olds, the Pacific Breeders' Futurity. t will cost you but $2 to nominate a mare in this take, and there is probably not a buyer in the United States who might be induced to buy the mare, or her colt when it is foaled, but will be perfectly willing to pay several times that amount over and above the actual price you ask for the mare, if he is told that she or the colt is entered and paid up in this futurity. When 1920 rolls around and the foals of 1917 are three years old, how many of them will be eligible to start in this stake? Enough to make a good race, no doubt, but there will be several others whose owners will be kicking themselves because the colts are not eligible to start either in the pace for $1000 or the trot for $1500, as they will then know they are fast enough to get some of the money if they were only eligible to start. Better be safe than sorry, and by nominating your mare on or before December 4th you will be safe until the next payment is due, and by keeping paid up your colt will have a chance to earn you some of that good money. Stake colts will be worth a lot more money in 1920 than they were in 1916 and we know of several that were sold this year at a good figure because they were eligible to the stakes. We are going to start a circuit in 1917 that will grow each year thereafter and as the population of California increases the size of the purses to race for will also increase. But nominate your mare in this stake so that her produce can take part in the big racing revival that is sure to come.

A BIG CONSIGNMENT of horses will be shipped from this coast to the Chicago Sale that is to open at the Union Stock Yards on Monday, December 18th, which has been designated as California Day. W. G. Durfee has consigned The Lark 2:08¼, the three-year-old stake winner Hermes 2:13¼, the good winner Rags (4) 2:09¼, the coast's fastest pacing mare Clara Mac 2:04½, that wonderful little two-year-old Oro Fino that "Pop" Durfee says is the greatest two-year-old he ever drew a line over, and enough more to make up a couple of carloads. Hemet Stock Farm will also send a number of highly bred ones from the farm that holds a number of world's records. Mr. R. W. Scott, of Bishop, Inyo county, is sending twenty head of mountain bred horses whose bloodlines are of the best, and whose individuality will attract attention in America's greatest horse market. Chas. W. Winter of Alhambra is sending Alhambra Prince 2:10¾ and his son Alhambra Duke (3) 2:17½, both high class horses, and C. A. Harrison of Seattle, who always is ready to buy or sell, will send a few head. Now Chicago is the best horse market in the United States because that is the point where the buyers congregate, and if the breeding and speed of a horse do not appeal to the buyer who is looking for race prospects or horses for the breeding farm, there are a large number of buyers who are ready to give the top of the market for horses that are fitted for the army, or delivery work, or for use on the farms. The competition is keen among these buyers and the ordinary horse that is sound and all right will bring more at auction in Chicago than any other city in the United States. There are hundreds of horses in California that need selling and this Chicago sale offers a good opportunity for owners to get rid of them. If you have some that you are willing to take the Chicago value for, write to one of the five owners above named who is nearest you, and get information as to when the horses will be shipped and what the conditions are. This will be the last chance for a big auction this year. Geo. A. Bain will be the auctioneer and no man in America can get any higher bids than he can.

A STALLION SOLD FOR $20,000 at auction in New York this week. True, he was the sire of the world's champion trotter, but as he is fourteen years old the only money that can be made with him is from breeding. He was purchased by the managers of one of the big Kentucky breeding farms that does not race horses, but sells all the products of the farm as yearlings or two-year-olds. This farm has found the breeding business very profitable and the fact that it has three of the highest class trotting bred stallions already and yet is willing to invest $20,000 in another, is pretty good proof that the management has implicit faith in the future of the breeding and selling of trotting bred colts. And when anyone tells you that the breeding of trotters has gone to the "demnition bow-wows," just refer him to the fact that on Wednesday last the best posted people in the business were gathered at Madison Square Garden, New York, and that they competed with one another for a fourteen-year-old stallion until one of them finally bid the sum of $20,000 in order to own him.

THE DEATH OF JACK LONDON, the noted California author, which occurred Nov. 22d, will probably mean the dispersal of the stud of Shires that he had established at his beautiful farm at Glen Ellen, Sonoma county. The champion prize winning stallion Neuadd Hillside, owned by him, died but a few weeks ago, but there are several magnificent young stallions and imported mares on the farm.

FOR A UNIFORM CODE OF RULES.

The following notices which have been sent to every association in membership with the National Trotting Association are self-explanatory:

Hartford, Conn., Nov. 14, 1916.

There will be a Special Meeting or Congress of the members of The National Trotting Association at the Murray Hill Hotel, New York, N. Y., on Tuesday, December 5th, 1916, at 8 p. m. in accordance with Article VIII, Section 1, of the By-Laws, for the purpose of appointing a rule committee of six members, which committee together with a like committee from The American Trotting Association, shall have power and authority to codify and adopt uniform rules for both Associations for the racing of 1917.

By order of
JOHN C. WELTY, President.

Attest: W. H. GOCHER, Secretary.

N. B.—The Committee on Credentials will meet at the Murray Hill Hotel, New York, N. Y., at 5 p. m. Tuesday, December 5, 1916, to receive credentials from delegates to the Twenty-ninth Congress of members of The National Trotting Association.

Canton, Ohio, Oct. 27, 1916.

To the Members of the National Trotting Association:

It has been apparent to every one for several years past that because of the frequent changes and alterations made in the rules of the two Associations that, in the interests of the turf generally the rules of both Associations should be similar, and to that end your Board of Review at its meeting in May last, unanimously adopted a resolution favoring a uniform code of rules and further providing that inasmuch as the biennial congress of each of the Associations would not have their regular meeting until the year 1918, it was provided by said resolution that the President be given the power to call a special congress to meet in December, 1916, to appoint a rule committee of six members, which committee, with a like one from the American Trotting Association, were to re-write the rules of both Associations for the year 1917, and which were to be in force until the congresses of 1918 were held, thus insuring for the year 1917 a uniform set of rules for both Associations. Subsequent to the adoption of the resolution above referred to, the matter was presented to the American Trotting Association and a like action was taken by it, thereby making certain a uniform code of regulations and rules, subject to the action of the special congress this day called.

Believing that I voice the sentiments of a great majority, if not all, of the members of both Associations when I say that the uniformity of rules is necessary and that no one act can accomplish more good than its adoption and enforcement.

The special congress is called simply for the one purpose, that of appointing the committee, and if you cannot attend please forward to the Association your proxy, together with a letter giving your views as to how your Association desires to vote upon the question, and I can assure you that the vote will be cast as you indicate, and it is my desire that each and every member record its vote upon this most important proposition, either by being present or by proxy.

Yours truly,
JOHN C. WELTY, President.

Correct Riding Habits for Horse Shows.

As the National Horse Show was drawing crowds to Madison Square Garden, New York, last week, for the benefit of our lady readers who ride we give here the correct styles of ladies' riding habits as set forth by the "authorities" on those matters.

For the side saddle suit:

"Coat—Black or gray melton or whipcord. Single breasted, rather fitted, with flaring skirts and close-fitting collar and revers. Narrow shoulders and rather tight sleeve, well curved at the elbow to give plenty of room when holding the reins.

"Skirt—Regular hunting skirt, cut very short to show foot and stirrup when riding.

"Breeches—Must fit well without a wrinkle.

"Hat—Medium high topper, belled at the top; medium brim.

"Gloves—White buckskin.

"Collar—Standing man's linen collar; black tie wound twice about and bow knot in front. (White linen pique or silk stocks; cravats also are worn, the cravat fastened with a sporty pin—horse, fox head, etc.).

"Riding Crop—A regular crop stick, dark in color, or a swagger stick of nilgiri wood."

For the cross saddle suit:

"Coat—Single breasted, fitting closely at the waist, long enough to stop two or three inches above the riding boots.

"Breeches—Must fit closely at the knee so they do not wrinkle when seated on the horse; loose above.

"Boots—Same shape as those worn by side saddle riders, but much higher, showing only three buttons of the breeches.

"Hat—Bowler of good shape.

"Collar—Standing turned over man's linen collar, with black tie (or stock collar and cravat).

The racing season of 1916 is ended.

It was highly successful but the season of 1917 will be better.

GUY WILKES 2:15¼.

Due Credit Should be Given This Good Son of George Wilkes 2:22.

[The American Sportsman.]

In a recent issue of the American Horse Breeder Mr. Henry Ten Eyck White devotes space to a comparison of the relative merits of Guy Wilkes 2:15¼ and William L., two sons of George Wilkes 2:22 and Lady Bunker. In his article Mr. White claims that William L. completely overshadows his full brother and, during the course of his article in speaking of Guy Wilkes, says:

"Guy Wilkes has not bred on in the male line, although this is not for lack of sons that are 'represented' stallions, since to the close of 1915 no less than fifty-two of his sons are recorded in the Year Book, but there is not one outstanding sire in the lot, their average of standard speed (counting both the trot and the pace) being 6.44 per sire. Sixty-five daughters of Guy Wilkes are the dams of seventy-eight trotters and thirty-five pacers, making the average per mare 1.78. That is a very bad showing, especially in the male line, as out of more than half a hundred sons there would, in the case of a progenitor of even the moderate sort, be at least one stallion that would stand out from the balance of his half brothers and at the same time take decent rank among his kind as a whole. But the sons of Guy Wilkes have done nothing of the sort, and the time for them to accomplish anything noteworthy in that line has passed.

"Now consider William L., the brother of Guy Wilkes, as a progenitor. In quantity he does not compare with the other horse, having but eighteen speed siring sons. Yet they have begotten 179 trotters and sixty-four pacers with standard speed, an average of 13.50 to the sire, or more than twice the average of the represented sons of Guy Wilkes. The daughters of William L. likewise excel those of Guy Wilkes. There are but twenty-four of them that have produced standard speed, but their crop is twenty-nine trotters and twenty pacers, or an average of a shade over two per mare. It is true that Axtell is the only son of William L. to become eminent, but even so, he is a real star, while the Guy Wilkes tribe produced not one sire worth talking about."

Now before making any remarks, we wish to say that we have no criticisms to make relative to William L.'s great son Axtell and the latter's son Axworthy. Both were noted horses and wonderful sires and their blood has been, is, and will continue very prominent in the great futurity and aged class events, but we cannot agree with Mr. White's estimation of the family founded by Guy Wilkes and, by setting forth a few facts, we are confident that each and every unprejudiced person must necessarily appreciate the latter's worth.

As a performer, and as an individual, Guy Wilkes completely overshadowed William L. The former was one of the fastest sons of George Wilkes, and the latter totally minus any mark to denote he possessed speed of even ordinary merit. As a sire Guy Wilkes stands credited with ninety-one in the list, including such fast ones as Fred Kohl 2:07¾, Hulda 2:08½, Seymour Wilkes 2:08½, Lesa Wilkes 2:09, Dollade Wilkes 2:10¼, Reuben S. 2:10¼, Muta Wilkes 2:11, Hazel Wilkes 2:12¼, etc. On the contrary, William L. sired but fourteen in all, not one of which entered the 2:10 list and but two of which secured records better than 2:20. Mr. White says, "that Guy Wilkes did not get one son worth talking about." I contend that he is greatly in error on this point. For instance, Nutwood Wilkes 2:16½, though limited in point of number of mares, is represented with seventy-five in the list, nine in 2:10, six of which secured faster records than the get of the outstanding son of William L. He likewise was represented by some very notable performers, among them being Copa de Oro 2:01, a good race horse and which publicly paced the Phoenix, Ariz., track in 1:59 but through a technicality was not given credit with it; John A. McKerron 2:04½ was several times a champion and unquestionably had as much if not more real extreme speed at the trot than any stallion of his day; Del Rey 2:03¾ was a stake winner, paced in 2:01, and but for an injury would have been the star of his year; Nutmoor 2:05¼ secured his record in a winning race on a half mile track and continually proved his gameness; Wilkes Brewer 2:08¼ was undefeated in eleven consecutive races this season and at Lima, Ohio, established several world's records when she won her third heat in 2:08¼ and the fifth in 2:08¾, and in addition trotted more small ovals in better than 2:10 than any other trotter which the industry boasts of. We believe that it hardly seems necessary to say more to convince most any fair minded man that Nutwood Wilkes is "one sire worth talking about." However we will continue a little farther and show that Nutwood Wilkes has bred on through both sons and daughters. John A. McKerron 2:04½ has nine in the 2:10 list and has speed siring sons; Copa de Oro 2:01 has several in the 2:10 list; The Tidal Wave 2:06¾ has two with records faster than 2:08; Stanton Wilkes 2:10½ has three in 2:10; Nearest 2:22½ has two in 2:10 and one in 2:05, etc. Having said enough about the sons of Nutwood Wilkes 2:16½, we will now say a little about his daughters, and they alone have been productive of enough to gain for their sire a high rank in turf history. From Nutwood Wilkes mares have come San Francisco 2:07¾, one of the very greatest sires of the day, as the performances of St. Frisco 2:03¼, Mary Putney (4) 2:04¾, and others will attest; Mona Wilkes 2:03¼, Aerolite (4) 2:06¾, sire of two in 2:10; Moortrix 2:07½, Miss Georgia 2:08½, Lady Mowrey 2:09¼, Redeem 2:09¼, Demonio Wilkes 2:09¾, Dan McKinney 2:10 and others out of his daughters, also should be considered. Almost enough, we believe, to cause one to consider him worth talking about. That the writer is not the only one who contends that Nutwood Wilkes was a sire of unusual merit and that his blood has proven valuable, we will repeat from last week's issue of The Horse Review: "The blood of Nutwood Wilkes is breeding on in a manner to demonstrate its rare value. Everything considered, he (Nutwood Wilkes) deserves to rank as a truly great progenitor of extreme speed at both harness gaits."

Here is just one son of Guy Wilkes which is worth talking about and he likewise had others which were instrumental in giving the industry notable performers. Sable Wilkes (3) 2:18, former world's champion three-year-old, sired fifty-two, his son, Nushagak, sired in Aristo 2:08¼ and Nada 2:09¼ a couple of fast trotters; another son of Sable Wilkes sired Bayswater Wilkes, a 2:10 sire and whose daughters produced 2:10 speed; Sonoma Girl 2:04¼, one of our greatest racing trotting mares and Charley Belden 2:08½, a stake winner, were by a son of Guy Wilkes; Maymack 2:04½, another wonderful trotting mare and joint holder of the world's record for a fifth heat, was by Arthur Wilkes 2:28½ (a son of Guy Wilkes) and he also sired Welcome 2:10½, which is credited with a couple in 2:10; Robert Milroi 2:06¾, which was a corking good trotter, was by Milroi, sire also of the dam of the little gelding Gamar 2:07¼, which was exceptionally successful on the small tracks; The King Maker 2:24 stands credited with three in 2:10, including R. F. D. 2:05, a notable winner in the middle west some years ago. Other sons of Guy Wilkes could be mentioned, but we deem it unnecessary as, while but one son of William L. sired any performers of real ability, the above shows that Guy Wilkes begot quite a few and in turn their get sired race horses which met the best of their respective years at the most important meetings and "got the money."

Mr. White says, "The daughters of William L. likewise excel those of Guy Wilkes." The daughters of William L. stand credited with but one 2:10 performer, this being the pacing mare Miss Willamont 2:07½. Now from the daughters of Guy Wilkes the industry boasts of Guy Axworthy (4) 2:08¾, the sire of the world's champion trotting stallion, Lee Axworthy 1:58¼, and five more in 2:10; Esther W. 2:06¼, a great stake winner; Peter Thompson (3) 2:07½, a noted futurity winner and champion three-year-old trotting gelding; Miss Stokes (3) 2:08¾, a champion as a yearling and a noted futurity winner; F. S. Whitney 2:09¼, Bon Guy 2:09¼, Eva Tanguay (4) 2:09¾, Miss Pierette (3) 2:09¾, Harry Dillon 2:10, a 2:10 sire; Adioo Guy 2:05¼, record made on a half mile track this season and a most consistent winner; Denervo 2:06½, Solano Boy 2:07, Guy the Great 2:08¾, etc. His daughters also produced Guy McKinney, sire of Vernon McKinney 2:01½, a 2:10 sire and a notable Grand Circuit performer; Millerton, the sire of Joe Boy 2:06½, winner of more races than any horse now campaigning; Guy Dillon, the sire of Emeline Dillon 2:07¼ and Guy Borden 2:07¼, the latter winner of his every start, ten in all, and considered as one of the fastest horses bred in California; Guy Thistle, sire of Lotta 2:08¼, a noted race mare of a few years back; Recreation, sire of Charley Rex 2:08¾, winner of nine races in 1916 and which recently trotted the Cranwood half mile track in 2:10¼ in a race; Typical Direct, the sire of Peck Direct 2:09¼, a good winner on the twice-arounds this season, etc. It is unnecessary to call further attention to the success achieved by the daughters of Guy Wilkes, and, when it comes to the point of making a comparison, they stand out so much superior to those of William L. as to leave absolutely no grounds whatever to even mention them in the same breath, much less say that "The daughters of William L. excel."

In our defense of the family established by Guy Wilkes 2:15¼, we have endeavored to be as brief as possible and unquestionably failed to bring out many achievements credited to the tribe, but before closing we wish to add that, while Mr. White lays particular stress upon the fact that the sons of Guy Wilkes average 6.44 per sire while those of William L. average 13.50 per sire, a different condition can be made to appear. Granting that William L. has but one son of consequence, we will deduct this son's get from the total credited to William L., and we find that the balance of the sons of William L. average less than 5½ per sire. Now we will take from the total credited to the sons of Guy Wilkes the number posted to his leading son and we find that the balance of the sons of Guy Wilkes have an average of more than 6½ to their credit.

As we stated earlier, we do not wish to take a thing away from Axtell or the balance of the family of William L., nor do we contend that the family of Guy Wilkes is greater, but we thoroughly believe, and likewise are confident, that every unprejudiced person must agree that Guy Wilkes was individually a greater sire, his sons were vastly more uniform sires of extreme speed, and his daughters have bred on greatly superior to those of William L.

This is the time of the year when your stallions should be advertised. Write to the Breeder and Sportsman for rates.

THE LIST OF 2:05 TROTTERS.

Twenty years ago there were but 51 trotters the 2:10 list, while the list of 2:05 trotters numbe just three—Alix 2:03¾, Nancy Hanks 2:04 and Az 2:04¾. Up to the end of this year there were trotters in the 2:05 list, nearly as many as made the 2:10 list of 1896. "Raymond" in the Horse Wo has recently made up a list of the 2:05 trotters families, as follows:

Wilkes Family.

Lee Axworthy, by Guy Axworthy 2:08¾.....1:58
Hamburg Belle, by Axworthy 2:15½.....2:01
Sweet Marie, by McKinney 2:11¼.....2:02
Anvil, by St. Valiant Vincent 2:11¾.....2:02
Billy Burk, by Silent Brook 2:16½.....2:03
St. Frisco, by San Francisco 2:07¾.....2:03
Zomrect, by Zombro 2:11.....2:03
Jack Leyburn, by Alto Leyburn 2:24½.....2:04
Rythmell, by Rhythmic 2:06¾.....2:04
Ross B., by Petronius 34394.....2:04
Sonoma Girl, by Lynwood W. 2:20½.....2:04
Spanish Queen, by Onward Silver 2:05¼.....2:04
The Real Lady (2) by Moko 24457.....2:04
John A. McKerron, by Nutwood Wilkes 2:16½.....2:04
Maymack, by Arthur Wilkes 2:30.....2:04
Tiverton, by Galileo Rex p. 2:12¾.....2:04
Tommy Horn, by Otto Wilkes 2:24.....2:04
Brace Girdle, by Tregantle 2:09¼.....2:04
Colorado E. (3), by The Bondsman 37641.....2:04
Cheeny, by Medium Line 2:10.....2:04
Mary Putney, by San Francisco 2:07¾.....2:04
Star Winter, by Ed. Winter 2:12¾.....2:05
Willy, by Wilburn M. 2:27.....2:05

The Electioneer Family.

Uhlan, by Bingen 2:06¼.....1:58
Major Delmar, by Del Mar 2:16¾.....1:59
The Harvester, by Walnut Hall 2:08¼.....2:01
Etawah, by Al Stanley 2:08¼.....2:03
The Abbot, by Chimes 5348.....2:03
Dudie Archdale, by Archdale 37304.....2:03
Lord Dewey, by Admiral Dewey 2:04¾.....2:03
Bob Douglas, by Todd 2:14¾.....2:04
Admiral Dewey, by Bingen 2:06¼.....2:04
Azote, by Whips 2:27½.....2:04
General H., by Combineer 33859.....2:04

The Happy Medium Family.

Peter Volo, by Peter the Great 2:07¼.....2:02
Margaret Druien, by Peter the Great 2:07¼.....2:03
Mabel Trask, by Peter the Great 2:07¼.....2:03
Peter Mac, by Peter the Great 2:07¼.....2:03
Nancy Hanks, by Happy Medium 400.....2:04
Volga (3), by Peter the Great 2:07¼.....2:04
Peter Scott, by Peter the Great 2:07¼.....2:05

The Abdallah 15 Family.

Cresceus, by Robert McGregor 2:17½.....2:02
Highball, by Dr. Hooker 2:23¾.....2:03
Charley Mitchell, by Marvelous 2:23.....2:04
Wentworth, by Superior 3780.....2:04

The Dictator Family.

Lucile Spier, by Directum Spier 2:11¼.....2:03
Joan, by Directum Spier 2:11¼.....2:04
Lillian R., by J. T. 2:12¼.....2:04
Mainsheet, by The Director General 31738....2:05

The Artillery Family.

Soprano, by Bellini 2:13¼.....2:03
Bonington, by Bellini 2:13¼.....2:04

The Strathmore Family.

Lou Dillon, by Sidney Dillon 23157.....1:58½

The Woodford Mambrino Family.

Alix, by Patronage 4143.....2:03¾

The noted Canadian show horse Melrose, owned by Sir Adam Beck, London, Ont., is a strictly trotting bred horse. He was bred by Charles Luke, Bothwell, Ont., and is a son of Mr. Luke's good sire Ad Baron 40720 (by Adbell 2:23, dam Baroness Theodora by Baron Wilkes 2:18), his dam being by Grand Falconer (trotting bred), second dam by Almontonian 6783 (son of Almont 33), third dam by John Howard 9037 (son of John E. Rysdyk 5721).

◆ ◆ ◆

At the recent sale of A. W. Hicking's hackneys in England the bay yearling Adbolton Forest King, by Mathias—Towthorpe Iris, was sold for $2,850, which is a record price for a yearling hackney colt at auction. The dam of Adbolton Forest King, regarded by English authorities as the best breeding mare of modern times, fetched $2,700.

◆ ◆ ◆

That New York buyers are willing and eager to pay fancy prices for thoroughly seasoned horses was evidenced at the sale of Messrs. Indell & Conforti's work stock conducted by the Fiss, Doerr & Carroll Horse Company in their auction mart in East Twenty-fourth street last week. Teams fetched as high as $635, while $345 was paid for single horses.

◆ ◆ ◆

Sound a blast on an automobile horn in approaching a team and in nine cases out of ten the horses will turn out to the right before the driver touches the lines. Automobiles are so numerous that even horses know the rules of the road and such a thing as a horse frightening at an automobile is now almost unknown.

◆ ◆ ◆

J. Malcolm Forbes 2:08, by Bingen 2:07½ and out of the great dam Santos, holds the record as a sire of yearling standard performers. In 1912 five yearlings by him took records of 2:30 or better; in 1913 the number was three, in 1915 it was five and in 1916 seven.

Thoroughbred Matters

Ward B. Hall's thoroughbreds are at the Pleasanton track. His stallion Joe Carey will make the season there and should be well patronized.

◈ ◈ ◈

A. G. Dunlap is wintering his runners at Pleasanton. Among them is Stolen Ante, winner of many good races this year, Capitano and El Capitano, and several others.

◈ ◈ ◈

Louis Becker, the San Francisco merchant, has quite a string of runners at the Pleasanton track.

◈ ◈ ◈

The A. K. Macomber racing stable under the charge of Walter Jennings is now in winter quarters at Charlestown, South Carolina. There are fifty horses and nearly fifty men to care for them.

◈ ◈ ◈

John Sanford's yearlings, seven in number, sold at auction at Baltimore November 11th, brought from $225 to $950. The highest figure was paid for a colt by Trap Rock out of Consuelo II., the dam of Geo. Smith, Theresa Gill, etc.

◈ ◈ ◈

The Kentucky state racing commission has adopted a rule that no horse foaled in 1915 or thereafter shall run in any race before April 1st of his two-year-old year, and under penalty of thereby disqualifying himself for all races under these rules until December 1st of his two-year-old form.

◈ ◈ ◈

The executors of the J. B. Haggin estate are selling off much of the land of the famous Elmendorf Farm in Kentucky. Three large tracts have already been sold, the last sale being one of 400 acres to Mrs. A. J. Pettit, who has leased the same to C. H. Berryman to be used as a stock farm.

◈ ◈ ◈

Reports from Tijuana are that there are plenty of horses, but the gate receipts and the number of books are not quite large enough to make the meeting as profitable as was expected. A little later, when the tourist travel to Southern California is at its height, there will doubtless be a much larger daily attendance and consequently more money in the ring. The weather has been all that could be asked and the track is fast.

◈ ◈ ◈

The City of Covington, in the limits of which part of the Latonia race track is located, passed an ordinance assessing a license of $100 on each race against the Latonia association. Judge Edmunds of the Covington Police Court has decided that while Covington has a right to license racing, the license of $100 a race is unreasonable and excessive, and holds that the license is void.

◈ ◈ ◈

The steamer Manchuria arrived at New York last week with a large number of Thoroughbreds from England and France that had been purchased by Americans. There were thirteen head purchased by Mr. J. E. Widener from Edmond Blanc, and six more that Mr. Widener had either bred or purchased from other parties. Grant Hugh Brown had nineteen horses, including five brood mares, one five-year-old and eleven yearlings. R. L. Montgomery of Philadelphia had seven Irish hunters aboard, and the five-year-old stallion Mellifont by St. Brendan, out of a mare by Enthusiast. H. T. Oxnard and A. B. Hancock also had horses consigned to them.

◈ ◈ ◈

Although the English turf papers all speak of the great falling off in the prices at which Thoroughbreds are selling in the British Isles, reports from some of the sales would lead the average Californian to think that they were still pretty high. At the sale of Richard Croker's horses at Glencairn, Ireland, October 27th, forty-six horses brought a total of about $55,000. The highest price was realized for Eleanor M., a three-year-old filly by Orby—Vain Glory. She brought $10,140. Geraldine, a two-year-old filly by Dinneford, fetched $4,920, a two-year-old colt by Chas. O'Malley brought $2,125, and there were four yearlings that realized from $1,250 to $2,100 each. The lowest price received for any of the forty head was $125 for a small yearling.

◈ ◈ ◈

Another Canadian track will go over to the pari-mutuel system of wagering next season. Gad Bryan, who with James F. O'Hara, has taken over the management of the destinies of the Kempton Park track at La Prairie, near Montreal, is quoted as having laid his plans for this mode of speculation, and the same machines used at Bowie will be installed for the racing next year.

◈ ◈ ◈

C. W. Moore, Mere Hill Stud, sold recently to A. K. Macomber the weanling brown colt by Jim Gaffney (sire of Dodge) out of Maltha by Ogden for $2,000.

◈ ◈ ◈

J. W. Parrish, Midway, Ky., has purchased from Crosthwaite & Johnson for $1,600 the three-year-old chestnut mare, Triad, by Star Shoot, out of Thirty-third (dam of Buckhorn and his good Ballot two-year-old, Midway), by Sir Dixon.

TWENTY LEADING SIRES IN AMERICA IN 1916.

After being put under eclipse for three successive years in the sire list by Broomstick, John E. Madden's Star Shoot has reasserted himself with a vengeance this year. He is the assured premier of 1916 away off by himself. His progeny have already won a greater money total than has been credited to any leading sire since 1908. He has sent the record number of twenty-six winning two-year-olds to the races. He has had no winner of as much as $10,000 to his credit, but he has had the huge family of eighty-six sons and daughters industriously engaged in racing, every one of which won some amount of money to his credit. It is quite probable that this is itself a record. At any rate, one would have to delve deep in racing records to match it.

And since there is quite a bit of racing to be done before a new year is ushered in, it is quite sure that Star Shoot's various accounts will be further considerably expanded before the end of December. Of promise in a way is the fact that his four best winners are two-year-olds.

The dead sire, Peep O' Day, was well represented in the racing of this year and is a respectable second to Star Shoot, with Ogden a good third. After figuring as the premier for the last three years Broomstick dropped so far down that he is now in ninth place in the list of twenty leading stallions. The failure of Thunderer and Bromo to train on had much to do with his declension, as well as the turning over of many of the Brookdale Stud matrons to All Gold and Whisk Broom II.

The twenty leading sires up to the first of November and their largest money-earning representatives are:

Sire.	Performers.	Starts.	Races Won.	Amount.
Star Shoot	86	1,172	190	$124,432
Peep O'Day	64	959	146	90,732
Ogden	47	610	105	82,860
Dick Welles	49	844	139	72,096
Marta Santa	51	987	143	67,869
McGee	47	785	117	65,261
Hastings	40	786	87	62,367
Olambala	5	55	16	56,580
Broomstick	38	434	78	55,441
Hamburg	16	200	55	49,133
Rock Sand	21	222	41	47,974
Cunard	28	527	73	46,599
Fair Play	18	292	41	45,683
Waterboy	26	366	57	45,129
Stalwart	33	609	80	43,025
Yankee	25	458	20	42,197
Jim Gaffney	9	85	20	39,678
Transvaal	27	372	54	38,982
Ballot	24	236	45	35,780
Solitaire II	24	473	69	33,636
Totals (20)	678	10,472	1,636	$1,145,454

The breeding of the above stallions and their five largest winners follow:—

Star Shoot, ch h, 1898, by Isinglass, dam Astrology—Straight Forward, $6,040; Ivory Black, $5,670; Wistful, $5,005; Golden Bantam, $4,965, and Star of Love, $4,890.

Peep O'Day (dead), b h, 1893, by Ayrshire, dam Sundown—Ed Crump, $16,351; Top o' th' Morning, $7,360; Hank O'Day, $4,190; Vogue, $4,268, and Early Light, $3,830.

Ogden, br h, 1894, by Kilwarlin, dam Oriole—The Finn. $15,630; Bondage, $6,285; Yankee Witch, $6,130; Mars Cassidy, $5,993, and The Masquerader, $5,055.

Dick Welles, b h, 1900, by King Eric, dam Tea's Over—Langden, $5,253; Gipsey George, $3,995; Ratina, $3,288; Detour, $3,155, and Roscoe Goose, $3,149.

Marta Santa, b h, 1896, by Martley, dam Luxette—Skiles Knob, $5,282; Jessie Louise, $4,391; Doctor Larrick, $4,158; Bird Man, $3,115, and Elizabeth Lee, $3,040.

McGee, b h, 1900, by White Knight, dam Remorse—Kewessa, $5,400; Tragedy, $4,975; Irish Gentleman, $4,363; Little String, $3,565, and Sam McMeekin, $3,415.

Hastings, br h, 1893, by Spendthrift, dam Cinderella—Thornhill, $7,690; Achievement, $6,980; Hawthorn, $5,081; Blue Cap, $4,062, and Flittergold, $3,755.

Olambala, ch h, 1906, by Ormus, dam Blue and White—Campfire, $50,035; Killdee, $3,040; Hanobala, $1,985; Fantam Bala, $1,070, and Mannchen, $450.

Broomstick, b h, 1901, by Ben Brush, dam Elf—Rickety, $5,721; Broomsedge, $3,185; Fair Helen, $3,110; Vermont, $3,105, and Cudgel, $3,036.

Hamburg (dead), b h, 1895, by Hanover, dam Lady Reel—Borrow, $8,115; Hwfa, $7,350; Monocacy, $7,250; Port Light, $6,065, and Syosset II., $4,750.

Rock Sand (dead), br h, 1900, by Sainfoin, dam Roquebrune—Friar Rock, $15,275; Fenmouse, $5,885; Fernrock, $5,150; Damrosch, $5,050, and Malachite, $4,965.

Cunard, ch h, 1889, by Goldfinch, dam Lucania—Bayberry Candle, $7,653; Charles Francis, $3,336; Waterproof, $3,310; Sir Edgar, $3,245, and Bac, $2,950.

Fair Play, ch h, 1905, by Hastings, dam Fairy Gold—Stromboli, $9,875; All Smiles, $8,335; Sun King, $6,460; Sands of Pleasure, $5,980, and Hanovia, $3,244.

Waterboy (dead), br h, 1899, by Watercress, dam Zealandia—Pif Jr., $8,560; Water Lady, $5,635; Auriga, $5,400; Waterblossom, $4,159, and Blue Fox, $3,245.

Stalwart, ch h, 1901, by Meddler, dam Melba—Uncle Hart, $4,922; Republican, $3,640; Stout Heart, $3,377; Camellia, $3,076, and Father Riley, $2,975.

Yankee, b h, 1899, by Hanover, dam Correction—Yenghee, $5,146; Conning Tower, $4,300; Yankee Notions, $3,800; Eagle, $3,345, and Outlook, $2,945.

Jim Gaffney, b h, 1905, by Golden Garter, dam Miss Maxim—Dodge, $26,410; Franklin, $5,555; Berlin, $3,881; Sedan, $1,573, and Sir Wellons, $966.

Transvaal, b h, 1905, by Commando, dam Royal Rose—King Gorin, $5,579; Little Bigger, $4,802; Transit, $3,126; Mabel Dulweber, $2,748, and Guy Fortune, $2,505.

Ballot, ch h, 1904, by Voter, dam Cerito—Ticket, $7,230; Capra, $6,510; Kathryn Gray, $4,210; Midway, $3,277, and Bally, $2,065.

Solitaire II., b h, 1896, by Ayrshire, dam Solesky—Alfadir, $3,451; Sosius, $3,343; Savilla, $3,315; Sangallo, $3,087, and Birka, $2,625.—[Thoroughbred Record.

Breeding Depends on Racing.

Before the present European war racing of Thoroughbreds was by far the leading sport in England, and every horseman knows that the horse breeding farms of the British Isles were numerous and their operations extensive, and that many hundreds of thousands of dollars were paid for yearlings at the auction sales. Then came the war and racing was stopped, and now the following alarming report comes from the breeding farms of England:

London, September 8.

The Association of Racehorse Owners, Breeders, and Trainers reports that the recent canvass among owners, breeders, and trainers, instituted by the Association, in order to ascertain the effect of the veto upon racing, has revealed the fact that unless relief comes quickly in the form of more racing, the Thoroughbred breeding industry in this country is threatened with extinction. From the details received from sixty-nine trainers now located at Newmarket, it appears that they had charge between them before the war of some 1382 horses. They now have 354, and, if racing is not very soon resumed in other parts than Newmarket, this number, it is stated, will be reduced to 54.

Heaviest Weight Ever Carried in a Race.

I notice that my friend "Gareth," of the Referee, is uncertain about the heaviest weight ever carried in a race by a race horse. He instances Sir John Astley's match in 1879, when Sir John rode his horse, Drumhead, to victory at Newmarket, at 16 st. 6 lbs., against Mr. Caledon Alexander's Briglia, whose owner went to scale at six pounds less. "Gareth" is wrong in attributing Drumhead's breakdown to that match, for the horse subsequently ran a good third to Isonomy and Paul's Cray for the Brighton Cup, and then ran second to Rylstone for the Lewes Handicap. It was during a later match, over two miles, with Solomon (Mr. W. Bevill) up, each carrying 16 st. 10 lb., that Drumhead broke down. As far as I know the heaviest weights carried were some time in the late fifties or early sixties, when Captain Machell and Captain McCraith (who together scaled 22 st. 5 lb.) jointly rode the latter's horse Clown in a match over two miles at Tramore for a substantial sum against Mr. Malcolmson's Bacon (owner up). Mr. Malcolmson weighed 18 st., but although the two captains were giving a lot of weight to their opponent, Clown easily carried his double burden to victory.—[Vigilant in London Sportsman.

Son of Yellow Tail Wins at Horse Show.

"Thoroughbred Day" at the National Horse Show at New York last week opened, appropriately enough, with the class in which thoroughbred stallions were to be judged on their suitability for improving the common horse stock of the country. John E. Madden, who has acted as sole judge of race horses for five years, walked into the ring with the five horses entered in the class, placed them, and then walked out again, taking just four and one-half minutes for the task he had traveled 1,000 miles to perform. This is said to be the "fastest time on record," to borrow an expression from the turf. Mr. Madden knew all the horses and their performances, had known their sires and dams before them, and probably might have made his decision without coming on from Kentucky.

The blue ribbon was taken for the second year in succession by Yellow Crest, the gigantic chestnut stallion formerly raced as Captain John and got by Yellow Tail. He is 17 hands high. Miss Constance Vauclain bought him for $2,000 at auction in Durland's Riding Academy last week, but he was shown in the name of his erstwhile owner, Willis Sharpe Kilmer, of Binghamton, N. Y. Uncas Chief, 16.2 hands high, was second; Highland Chief, 15.2 hands, was third, and Glorio, 16 hands, was fourth.

The six-year-old horse Shepherd King, carrying 105 pounds, won the Caulfield Cup at Melbourne, October 21st. The distance was one mile and a half and there were eight starters, and Shepherd King won by a length and three-quarters from Amata, who was a length in front of Sasanof. The time was 2:33¼ and the winner was imported from England and owned by J. Widdis and J. Mills. Shepherd King is by Martagon, dam St. Windeline.

RECORD BREAKERS OF HEMET STOCK FARM.

Interesting Facts About Them and the Only Mare to Produce Two Yearlings with Records Below 2:20.

[By C. C. Crippen.]

Reading of the brilliant performances of the Hemet Stock Farm youngsters at Phoenix last week recalls to my mind conversations I had with the late Frank Holloway in the early summer of 1911, when he had Wilbur Lou and other Hemet colts at the San Jose track giving them their final preparations for their engagements of that season. The now successful sire of early speed was then a two-year-old and holder of the world's yearling record for trotting colts, made at Phoenix the previous November, where six years later his yearling daughter Hemet Queen won the world's championship for pacing fillies of her age, and another daughter, Zeta Lucille, won what I believe is the Pacific Coast record for trotting fillies of her age by taking a record of 2:12½.

During the winter of 1910-1911 Mr. Holloway, who was at that time trainer and manager of the Hemet Stock Farm, suffered a very severe spell of sickness from which he never fully recovered, and when he came to San Jose with the Hemet colts in June of 1911 was but a shadow of the stout and robust Frank Holloway I had formerly known. In talking with him I asked if they had mated Wilbur Lou with any mares that year and he replied that they had not, and added, that he would liked to have done so but that Mr. Whittier did not care to take the risk, that his whole desire was to give the colt every possible advantage that he might maintain the prestige he had gained as a yearling during his two and three-year-old form, and stated that Mr. Whittier did not figure that he would live to develop Wilbur Lou colts. "But," said Frank with a smile, "Mr. Whittier is only eighty-three years old and he will live longer than I will." And I knew then that Frank Holloway spoke what he believed to be the truth. A month or so later the Hemet horses were shipped to Salinas where the Breeders' Association was to give the first meeting of the California circuit. I believe the horses arrived at Salinas on Saturday. On Sunday Mr. Holloway drove out to the track to see the colts, and returning to his hotel that afternoon was taken with a sudden illness that proved fatal in a few hours, and the next day the Hemet Stock Farm had lost its trainer and Mr. Whittier his capable manager and valued friend. Poor Frank Holloway's words had come true.

But the Hemet Stock Farm that Mr. Holloway helped to establish is still maintaining the reputation that he was so largely instrumental in its obtaining in almost the very beginning of its existence, as it has each year turned out stake winners, sensational youngsters, world's champions and near champions, and Mr. Whittier, in spite of his advanced years is still proprietor of the only first class stock farm that breeds and trains trotters and pacers in this whole country, and each year has the pleasure of watching the development and creditable performances of the get of Wilbur Lou, the champion trotter and champion sire of his sunset years.

But it is not alone the get of Wilbur Lou that is adding fame to the Hemet Farm, for colts by Kinney de Lopez, that other magnificent son of Kinney Lou, are vieing with the get of Wilbur Lou for the highest place upon Hemet Stock Farm's roll of honor, and in Edith Carter, Louise de Lopez and Don de Lopez he has proven himself a worthy companion to the farm's premier sire and demonstrated his ability to transmit his own great speed and inheritance. In the one or two public appearances that Kinney de Lopez has made he was unfortunately suffering from lameness and in no condition to make a favorable showing, but take it from me, that there have been few trotters that possessed more speed than Kinney de Lopez and none better gaited. I have expected a great deal of this son of Kinney Lou. I gave him the first track work he ever had, when a two-year-old, and he then showed great promise of developing into a very fast trotter, but he has been a very unfortunate one. I gave him his name, too, and perhaps that has been a hoodoo to him, but as it combines the names of his sire and his breeder I thought it very appropriate and it sounded good to me. It is the blood of Kinney Lou that has made Hemet Stock Farm famous, his daughter Allie Lou was the best three-year-old on the coast last year, winning the majority of the California stakes, and she was bred at Hemet. The filly Edith Carter, that came so near the championship mark when she trotted to a yearling record of 2:18¼ last week, is the second yearling out of her dam Louise Carter (3) 2:24 to beat 2:20, thereby giving Louise Carter the distinction of being the only mare to produce two yearlings to beat 2:20. The other is Wilbur Lou (1) 2:19½. Louise Carter is also the dam of Louise Lucille that trotted in 2:14¼ at Phoenix last week as a two-year-old. She also produced the good trotter Mamie Alwin 2:12 that, had she not been butchered as a three-year-old, would have beaten 2:10 to a certainty. How many greater broodmares are there than Louise Carter? By a son of Nutwood Wilkes whose dam was by Director and out of the dam of John A. McKerron 2:04½, that was also by Director—such is her title to quality.

Before Louise Carter produced Wilbur Lou and Mamie Alwin, two fast and good clean-gaited trotters, I would not have selected her for a broodmare. Her fame is now too well established for me to be considered a "knocker" if I gave my reasons. She was a very fast colt trotter herself, although her record is only 2:24. Fred Chadbourne drove her quarters repeatedly in 31 and 30½ seconds, but she would hit her knees so hard that she could not maintain the clip; but for a short distance she could fairly fly. Her conformation was faulty in front and nothing could be done to correct her faulty action, and yet she has produced a family of trotters, none of whom have inherited her one fault and all have inherited her speed.

In regard to the development of Hemet's sensational yearlings, the results prove that Frank Rees, who broke them to harness, trained and gave them half mile track records that were not only the fastest of the year but in the case of Hemet Queen, the fastest of all time for pacers of her age, sex and gait, has ability as a colt trainer second to none other. To his credit also is given the development of the fast two-year-old trotter Zeta Lucille 2:12½. Fred Ward gave them their records at Phoenix and has doubtless given them some if not all of their work since his return from his successful eastern campaign, but to Frank Rees' careful and intelligent handling and training from their first lesson is due the credit of their development, otherwise Fred Ward would have had no sensational or champion youngsters to mark at Phoenix.

And I am not seeking to detract anything from any credit due to Fred Ward, for he surely has it coming to him, but Frank Rees was the man behind the gun; he made them. The public and I have seen Fred Ward driving races successfully for twenty years and we all know that he is a trainer of ability, as he has made all the horses he has raced, and as a race driver I would put him in the same class with Tommy Murphy, "Longshot" Cox, "Pop" Geers, Lon McDonald, or any of the rest of the noted eastern teamsters. All Fred needs to be just as widely advertised and "famous" as they is a few millionaires to buy him horses. But Frank Rees has stayed at home and worked with the colts. He started Wilbur Lou, Hemet Stock Farm's first champion, on the road to fame, and he has started in the right and proper way all the others that have followed since Kinney Lou's champion son put the little town of Hemet in Southern California on the map and introduced to the trotting horse world the now noted and far-famed Hemet Stock Farm, the most beautiful and best equipped place of its kind in this whole big country, in class and quality a Palo Alto in miniature. And may Mr. Whittier, its genial and worthy proprietor, witness many more records shattered by the get of Wilbur Lou!

Bingara $5200, Guy Axworthy $20,000.

The only report that has come from the Old Glory Sale, which has been held at Madison Square Garden, New York, during the present week, is in regard to the prices paid for the two noted stallions, Bingara and Guy Axworthy. Bingara, sold on account of the death of his owner the late William Russell Allen, was foaled in 1901 and was bred by J. Malcolm Forbes of Massachusetts. He was bought by Mr. Allen when a yearling and at that age trotted an eighth in 19 seconds. As a two-year-old he showed an eighth in 17 seconds and a quarter in 37 seconds, but was never trained, never raced and never worked a full mile at speed, yet at 15 years of age he is the sire of 119 trotters and pacers in the list, has 9 trotters with records below 2:10 and 26 below 2:15. He also has seven producing sons and ten producing daughters. He is the youngest horse to become a century sire, which he did at 14 years of age. With the exception of the dead Todd (also a son of Bingen from an Arion dam) Bingara at the same age outranks all sires, living or dead, as a sire of 2:10 trotters. He is the greatest representative of the tribe of Bingen 2:06¼, the greatest of modern family founders, and that he is a sire of race horses is attested by the fact that from 1911 to and including 1915, his get won a total of $158,858 at the races, and during 1916, as far as could be checked up to October 10th, his get won 42 races, 43 second moneys, 34 thirds and 20 fourths. He was knocked down for $5200 to the bid of Mr. E. J. Tranter, who was probably acting for some one else.

Guy Axworthy 2:15¼ sold for $20,000 on Wednesday. He is a year younger than Bingara, having been foaled in 1902. He was bred by John H. Shults, but was consigned to the sale by the Estate of Jacob Ruppert and Leo Ottinger of New York. Guy Axworthy is by the great Axworthy and his dam the California bred and raised mare Lillian Wilkes by Guy Wilkes. As a two-year-old Guy Axworthy took a trotting record of 2:23¾, and as a four-year-old he reduced this mark to 2:08¾. Now at the age of 14 he has 51 in the 2:30 list and nearly all are two and three-year-olds. Heading the list is the world's champion trotting stallion Lee Axworthy 1:58¼, and next come Guy Nella 2:06¾, Muda Guy 2:09, John Garder (3) 2:09¾, Peter Worthy (3) 2:09¾, and Axworth (3) 2:10. His sons have sired four and his daughters have produced four in the list. The estate of the late L. V. Harkness bid $20,000 for Guy Axworthy at the sale Wednesday and he was knocked down for that figure. There is little question but he will go to Walnut Hall Farm, Kentucky, where he will join that great trio of stallions, Walnut Hall, Moko and San Francisco, and when mated with the daughters of these horses should produce many more champion trotters.

Death of William McDonald of Livermore.

After an illness of several months William M Donald, Deputy Public Administrator and memb of the Board of Education of Alameda county, di at his home in Livermore November 19th, at the a of fifty-six. William McDonald was born in t county in which he died and resided for the grea part of his life at or near Livermore. He had fill many public offices and some years ago represent Alameda county in the California Legislature. Th though not a horse breeder he was a student horse breeding, especially of the trotting and dr stock of the Livermore valley, and there were fe horses owned in that locality with whose breedi he was not familiar. At the horse shows which h years have been a feature of the early spring late fall at the town of Livermore, Mr. McDonald w always the Marshal of the parade and then from rostrum in the public square gave the name, h ownership and the breeding of every stallion, ma and colt as they were led by. Without notes h would correctly give the breeding of from fifty one hundred horses, and he not only knew the a mals, but knew every man and boy that led on When a young man he taught school near Livermo and was held in high esteem by all the residents that valley. His death is a loss to the community.

The Proof 2:09¾ is Back at Santa Rosa.

C. A. Spencer, of Santa Rosa, was in San Francisc for a few hours Tuesday on his way home from h summer campaign with The Proof through the Gre Western and Grand Circuits, winding up the racin season at Phoenix, Arizona, last week. He starte The Proof fourteen times during the season and wa outside the money but once. The son of The Exp nent improved greatly at Phoenix and on the la day of the meeting was only beaten a head b Esperanza in 2:07¼ and was himself timed fast than that. In this mile he threw a shoe at the ha mile pole, but he never quit trying. Spencer think The Proof will be able to lower his record to 2:0 next season, barring accidents. The Proof close the season with a winrace record of 2:09¾. Th horsemen of Darlington, Wisconsin, tried to induc Spencer to bring The Proof there for the season o 1917, offering to get him 50 mares, but he does no want to leave California and will remain at Sant Rosa. While he had a fairly successful racing sea son, the long shipments and entrance fees took th most of the profits from the amounts won by Th Proof and Spencer would rather race in California i there were classes for the horse.

Famous Auction Place to be Sold.

Madison Square Garden, where so many horse have gone under the hammer during the past twenty five years, will itself be sold by auction very shortly The owners of the property have filed an involuntar petition in bankruptcy, placing their liabilities a $3,058,879, while the assets are set forth as $2,763,141 The F. & D. Company, which owns the property, paid $3,500,000 for it, paying $1,200,000 in cash and giving a mortgage for $2,300,000. Several weeks ago th Court appointed a referee to compute the amount due on this mortgage, which was held by the New York Life. The insurance company had brought foreclos ure proceedings against the F. & D. Company and their action will result in an early sale of the famous property at auction.

The F. & D. Company is composed of G. Louis Boissevain, president; Edwin L. Boissevain, secretary; George C. Comstock, J. M. Ellsworth and Alyn Ball, Jr., directors.

At the time of the purchase it was planned to demolish the big plant and build a series of thirty-story loft buildings on the site. This project was subsequently abandoned.

English Hackneys Arrive For the National.

In spite of war and shipping perils, apparently foreign interest in the New York National Horse Show is not lacking. Two champion hackney stallions, Bingley Toreander and Admiral Cliquot, recently arrived on the steamer Mongolia as exhibits for the Garden show, which opened on Saturday, Nov. 11th.

The horses were insured for $10,000 and sent over the 3,000 miles to be shown only in one class and compete with seven home-bred opponents, the event being for a special silver trophy donated by the National Horse Show Association for the best hackney stallion.

The pair was brought across the Atlantic by Walter W. Rycroft of Bingley, England, a wealthy amateur horse fancier, who last year was president of the English Hackney Horse Society, succeeding to the first office held by the late King Edward.

The sole purpose of shipping these valuable stallions over the long voyage and through the dangers of ocean travel at present is to show American hackney breeders the sort of stock their owner is breeding and what the choicest type of the breed is. The value of the cup for which the pair will compete is given in the prize list as worth only $100. The event, however, will be the most interesting to the breeders and fanciers of hackneys in the entire show.

The stallions will be shipped back to England immediately after they have gone through the competition.

This is the time to announce where and on what terms your stallion will stand in 1917.

Notes and News

Guy Axworthy 2:15¼

◈ ◈ ◈

Sire of the champion Lee Axworthy 1:58¼

◈ ◈ ◈

Brought $20,000 at the Old Glory Sale last Wednesday in New York.

◈ ◈ ◈

He was purchased by the estate of the late L. V. Harkness of Kentucky.

◈ ◈ ◈

And will doubtless be placed in the stud at Walnut Hall Farm at Lexington.

◈ ◈ ◈

Nearly every owner of a trotting or pacing bred horse that one meets these days says: "If there is a California circuit in 1917, count on me to have something to start."

◈ ◈ ◈

VernonMcKinney 2:01½ pacing, and The Anvil 2:02¾ trotting, will again make a season at Pleasanton. Both horses should do well. They are the fastest stallions at their respective gaits on this coast.

◈ ◈ ◈

Charley Thompson, a veteran trainer of trotting horses, who bought and developed Tiverton 2:04¼ for William H. Clark, builder of the Empire track, New York, died on November 5th at Roulean, Saskatchewan, from the effects of a stroke of paralysis.

◈ ◈ ◈

Hal Dillard 2:04¾, a noted pacer and sire of pacers, died recently at the farm of his owner, Franklyn Sanford, near Cincinnati, Ohio. The horse was twenty-nine years old and was a son of Brown Hal 2:12½, sire of Star Pointer 1:59¼

◈ ◈ ◈

The largest indoor speedway in the world is at the Union Stock Yards, Chicago, where the big Chicago sale of trotters and pacers will be held during the week beginning December 18th. That's the place to sell a fast one that can show.

◈ ◈ ◈

"Hawley," writing to the American Horse Breeder, states that the four-year-old Peter Chenault (3) 2:17¼, has worked three miles better than 2:06 at Lexington within the last thirty days. The horse is by Peter the Great and his dam is by Baron Wilkes.

◈ ◈ ◈

Closely following the death of Dr. Harry A. Tuttle comes the news of the passing of his brother, Dr. William U. Tuttle, of Boston, secretary of the Tuttle Elixir Company, after a brief illness from pneumonia. Dr. Tuttle was thirty-eight years old and unmarried.

◈ ◈ ◈

Billy M. 2:03¾, the fast pacer for which Mr. W. B. Eckert, of Reading, Pa., paid $2500 a few weeks ago, died of pneumonia November 9th. It is such incidents in the horse business that make one think of horse insurance and wonder if the owner had a policy on Billy M.

◈ ◈ ◈

There are about 125 horses at the Pleasanton track at the present time, the majority of which are in training or will be put in training soon. Many are young colts getting their first lessons in harness. There are a number of thoroughbreds wintering there.

◈ ◈ ◈

J. Frank has a string of horses in training at Pleasanton, one of which is a three-year-old stallion by Best Policy out of a mare by Zombro that is taking his work nicely and showing a lot of speed. Frank drove him a quarter in 32 seconds on the trot. The colt is considered a fine prospect.

◈ ◈ ◈

The twelve-year-old California bred trotting gelding Prince Lot 2:07¾ by Prince Ansel that has been used as a matinee horse in Boston for the past few years, was consigned to an auction sale held at Medford, Mass., November 2d, and brought $275. Not so bad for an old outclassed trotter.

◈ ◈ ◈

Vallejo King 2:10½, the trotter owned by Thos. Smith of Vallejo, that Charley Spencer raced in the east this year, is back from the campaign. He started a couple of times at Phoenix, but met hot company and though he trotted in two different heats in better than 2:10, was beaten by faster horses in 2:07¼ and 2:08.

◈ ◈ ◈

No news of the Old Glory Sale, except the telegraphed report of the amounts received for the two stallions, Bingara and Guy Axworthy, has had time to reach us from New York up to the hour of the Breeder and Sportsman going to press, but an extended report of the sale will be published in our next issue.

◈ ◈ ◈

Clarence Berry drove White Sox in the free-for-all pace on Friday, the last day of the Phoenix races. He thought the mare would have too much of a cinch with Will Durfee driving, so to even things up concluded to handle the ribbons over the daughter of Del Coronado himself. "And," said he afterwards, "I had a hard time beating that Jim Logan horse."

The chestnut trotter owned by Henry Scott, of San Jose, that is in the Longley string of horses at Pleasanton, is showing a lot of speed for Schuyler Walton. A mile in 2:24 was easy for him last week and he looks as if he would go fast by early spring. He is by Bon McKinney (that is by Bon Voyage out of the good brood mare Daphne McKinney by McKinney) and his dam is by Scott McKinney.

◈ ◈ ◈

Mr. and Mrs. A. W. Longley, of Oakland, have gone to their old home in Chicago for the holidays and will not return until after New Year's day. Mr. Longley's string of horses at Pleasanton are all doing nicely under Schuyler Walton's training. Schuyler worked the pacer Star Dillon by Star Pointer a mile in 2:10 last week. The three-year-old trotter by True Kinney has been a mile in 2:24 and the filly by Demonio paced a half in 1:08.

◈ ◈ ◈

Messrs. Estabrook and Young of Cleveland, Ohio, were joint owners of the pacing mare Kate McKinney 2:04½ by Wallace McKinney, and campaigned her successfully this season. They differed in politics, however, and after some argument over the merits of their favorite candidates for President, each partner wagered his interest in the mare, her bike, harness, and entire racing outfit on the result of the election. Mr. Young now is sole owner.

◈ ◈ ◈

There are a couple of General Watts 2:06¾ yearlings at Pleasanton in the string of horses owned by Dunne & Lowery that Will DeRyder is training that are showing signs of that early speed that the produce of General Watts are becoming so famous for. Both are bay fillies, one out of Miss Douglas by Cochato, the other out of Native Bidwell by The Native. They are both natural trotters and the filly out of Native Bidwell has trotted a quarter in 38 seconds already. Both these fillies are well staked.

◈ ◈ ◈

A. J. Metson, an authority on color and the laws of heredity relating to color in horses, protests that the famous trotting sire Bingara is not "a beautiful seal brown," as described in the sale catalogue, but a perfect specimen of the dark magonany bay. He asserts that no horse is a seal brown unless he has tan muzzle and flanks, and Bingara has neither. "He is not only a pure bay," Mr. Metson says, "but a pure dominant in color transmission—a very rare and valuable quality in a stallion."

◈ ◈ ◈

The well bred stallion Dan Derby will make the season of 1917 at 114 Humboldt street, Bakersfield, in care of J. E. Mosher. This is a well bred horse although he is not registered as standard. His sire is Lou Derby 2:17¼, son of Chas. Derby and Ludenia by McKinney. The dam of Dan Derby is Daisy D. by Zombro, second dam Queen Woolsey by Woolsey, third dam by Will Crocker and fourth dam Alete by Billy Norfolk, son of the three-mile champion Thoroughbred Norfolk, son of the great Lexington.

◈ ◈ ◈

The war is not affecting racing in South Africa. At the Durban winter meeting in August, the totalisator turnover for the three days was £67,270—a record. Durban backers have the choice of machine or bookmakers for their investments, and though on the concluding day totalisator odds badly beat the bookmakers' closing prices in most cases, there was one marked exception, that of Alluvial in the Merchants' Handicap. At Durban the place as well as the straight-out machine was in use, and of course the former received most patronage.

◈ ◈ ◈

Will DeRyder is settled for the winter at Pleasanton with the Dunne & Lowery string of horses. He has El Volante S. 57089 and this horse looks like a real trotter. He worked a mile in 2:20 and a half in 1:08 the other day, and has had no training to speak of although he has been used as a jog-to-town-for-the-mail horse on the Dunne & Lowery ranch this summer. He is a well bred fellow, his sire being El Volante 52355, a royally bred son of Zombro, while his dam is Seville S. by Strathway, second dam that handsome mare Simmone by Simmons that Mr. S. Christenson of this city matineed in 2:10 some years ago. The dam of Simmone was by Baron Wilkes, next dam by Mambrino Patchen. The picture of El Volante S. on the title page of the Breeder and Sportsman this week is from a photograph taken this summer.

◈ ◈ ◈

In theorizing as to the reasons why Bertha by Alcantara is one of the greatest of brood mares it is interesting to know that Bertha herself was never trained, or even driven in harness, so far as anybody knows. The late Sam Gamble stated that she was unbroken when he bought her for the Cook Farm and no attempt was ever made to harness her thereafter. She produced twelve standard performers, of which eleven were pacers and two of these pacers—C. The Limit 2:03¼ and Elf 2:12½—also have records at the trot, which according to the way some of the statisticians figure, gives Bertha 14 in the standard list. Five of Bertha's produce have records below 2:10. The only daughter of Bertha that has achieved a reputation as a producer of speed is Bertha Derby, that up to the close of 1915 had produced eight with standard records, five of which were trotters and three pacers, and we understand that Bertha Derby, like her mother, was never trained, at least she has no standard record.

Last Day at Phoenix.

The racing program of the Arizona State Fair at Phoenix ended on Friday of last week, auto racing filling the card on Saturday. Four races were trotted and paced on Friday, W. G. Durfee winning two and getting second and third money in the other two.

In the free-for-all pace White Sox, Jim Logan and Teddy Bear were the only starters and White Sox won all three heats, Jim Logan being second and Teddy Bear third each time. Esperanza trotted a good race in the free-for-all trot. Ben Walker won the first race, the 2:20 trot, by winning one heat and being second in the other two. Lillian Van took one heat and The Lark another.

The 2:12 trot was won by William Best with the mare Mabel Van 2:11¼, daughter of On Stanley. She took the first and second heats, but Durfee got Virginia Barnette to the wire first in the third heat. Charles DeRyder was second each heat in this race with Sadie View, a daughter of Direct View.

The attendance during the fair was large, there being as many as 15,000 people on the track on Friday. The summaries:

First race—2:20 trot, purse $1000:

Zolock Zar, by Zolock.....(Walker)	2	1	2
Lillian Van, by On Stanley.....(Best)	1	2	3
The Lark, by Carlokin.....(W. G. Durfee)	3	3	1

Time—2:12½, 2:12½, 2:13½.

Second race—2:12 trot, purse $1000:

Mabel Van, by On Stanley.....(Best)	1	1	3
Virginia Barnette .....(Durfee)	3	3	1
Sadie View, by Direct View.....(DeRyder)	2	2	2
George R. Patterson.....(Rutherford)	4	4	4

Time—2:15¼, 2:10¾, 2:15.

Third race—Free-for-all pace, purse $1000:

White Sox, by Del Coronado.....(Durfee)	1	1	1
Jim Logan, by Chas. Derby..(Montgomery)	2	2	2
Teddy Bear, by Del Coronado.....(Smith)	3	3	3

Time—2:06¼, 2:05½, 2:06.

Fourth race—Free-for-all trot, purse $1000:

Esperanza, by Carlokin.....(Durfee)	1	1	1
Allie Lou, by Kinney Lou.....(Ward)	2	2	3
The Proof, by The Exponent.....(Spencer)	3	3	2
Vallejo King, by Gen. J. B. Frisbie..... .....(Montgomery)	4	4	4

Time—2:07¼, 2:08½, 2:07.

The Hay Market.

The following is a circular letter from Scott, Magner and Miller, San Francisco hay merchants:

Receipts of hay for the past week were 1048 tons; the previous week, 1380 tons and the week prior 1821 tons. From the decrease of these receipts one can readily see that cars are becoming scarcer rather than more plentiful, as has been promised for some time past. When it is considered that most of these small receipts arrived by water, it is easily determined how few cars have been furnished by any of the railroad companies for the moving of hay.

The trade is simply demoralized, as there are so few cars of hay arriving that one concern could handle the entire receipts and still not be extremely busy. Those dealers fortunate enough to receive a carload of hay now and then naturally ask their own prices for the same; consumers rebel at paying these prices and will not buy anything while their stocks last, and when compelled from sheer necessity, only buy what is required from week to week.

This makes the demand extremely light and helps to offset the light receipts, but is demoralizing to dealers who maintain large plants for the transaction of normal business.

An exceptional car of fancy hay is sold now and then as high as $20 per ton; with arrivals of a few cars of this quality our quotations would cover, as demand is so light.

A good demand from country points is still noted, but it is almost impossible to obtain cars to fill any but a small percentage of these orders.

Alfalfa arrivals are heavier in proportion than grain hay and arrivals are equal to demand.

Straw is scarce with light arrivals and sells at top quotations for first quality.

We quote today wholesale prices in carload lots as appear from dealers' transfers upon the hay market. For prices to consumers charges of cartage, commission and handling expenses must be added according to conditions:

Fancy wheat hay, light five-wire bales, $18 to $19; No. 1 wheat or wheat and oat, $14.50 to $16.50; No. 2 wheat or wheat and oat, $12 to $14; choice tame oat, $15.50 to $17; other tame oat, $12.50 to $15; barley, $12 to $14.50; wild oat, $12 to $14; alfalfa, $10 to $14.50; stock hay, $10 to $12; No. 1 barley straw, 50c to 75c.

Turns Loose Horses in Yuba County.

Marysville (Yuba Co.), Nov. 22.—Sheriff C. J. McCoy is making a search of the county today for a crank who operated at the race track and in District 10 last night.

He first went to the race track, released several horses from their stalls, and took Sir John S. 2:04¼, the famous pacer. The horse was found this morning on the George Buchholz ranch in District Ten.

Buchholz's horses were turned loose in a field but none of the horses were missing. The fellow then took two horses from the Denicke ranch. One of the horses returned home this morning, but the other, a valuable riding horse, is missing.

Under Sheriff Sayles said today the horses at the race track were turned out of the stalls in the same manner a year ago. It is his belief the thief is a demented person.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Oregon Sportsmen to Meet.—Arrangements have been made at an executive meeting of the Multnomah Anglers' Club for the annual meeting of the Oregon Sportsmen's League, a statewide organization, which will be held in Portland on Monday, December 4th.

It has already been decided to hold a joint fly casting and trapshooting contest on Sunday, December 3, for the entertainment of the out-of-town visitors, who will be in Portland from all parts of the state.

These contests will be held at the Everding Park range of the Portland Gun Club. Although the fly-casters have been using the float at Laurelhurst Park, there is a temporary affair at Everding Park which will answer their purposes.

The executive meeting will be held Monday, and the annual sportsmen's dinner will take place that evening, at a place yet to be decided on. Wes Matlock at the last annual dinner agreed to furnish enough geese for the 1916 event, and the committee in charge is going to remind him of his promise.

Last year the piece de resistance was genuine reindeer, shipped from Alaska, and the year before that there were duck and steelhead in abundance.

A meeting of the Multnomah Anglers' Club committee and officials of the Portland Gun Club will be held to plan for the meeting, as these clubs will provide the entertainment for the visitors.

The Oregon Sportsmen's League, which comprises all of the gun, rod and reel clubs of the State, has some important business to come before it, such as the hunting and fishing measures which it will endeavor to have put through the legislature, which meets next January. H. B. Van Duzer, of Portland, is president of the organization.

Hunting License Fees.—There is only one State in the Union that does not now require a non-resident to have a license. That State is Arkansas.

There are only four States in the Union now that do not require a resident to purchase a hunter's license. Those States are Maine, Virginia, North Carolina and Mississippi.

Every province in Canada requires both the resident and the non-resident to have a hunter's license.

For a record for you to keep we publish the non-resident fee in every State in the Union and every province in Canada:

Maine, $5-$15; New Hampshire, $15; Massachusetts, $10; Connecticut, $10; Rhode Island, $10; Vermont, $10; New York, $20; New Jersey, $10; Delaware, $10.50; Pennsylvania, $10; Maryland, $2.75-$25; Virginia, $10; North Carolina, $10; West Virginia, $16; Tennessee, $10; Kentucky, $15; So. Carolina, $15; Georgia, $15; Florida, $15; Alabama, $15; Mississippi, $20; Louisiana, $15; Arkansas, none; Missouri, $25; Illinois, $10; Indiana, $15; Ohio, $15; Michigan, $10-$25; Wisconsin, $10-$25; Minnesota, $10-$25; Iowa, $10; North Dakota, $25; South Dakota, $15-$25; Nebraska, $10; Kausas, $15; Oklahoma, $15; Texas, $15; Montana, $10-$25; Wyoming, $5-$25; Colorado, $1-$10; New Mexico, $10-$25; Idaho, $5-$25; Utah, $5; Arizona, $10-$25; Washington, $5-$10; Oregon, $10; Nevada, $10; California, $10.

New Brunswick, $10-$50; Quebec, $10-$25; Ontario, $25-$50; Manitoba, $15-$50; Saskatchewan, $10-$50; Alberta, $5-$25; British Columbia, $5-100.

Where there is more than one amount stated above it shows the scale from small game to the largest game, the maximum amount including all game that is in season at the time the license is issued.

If you contemplate taking a big game trip it will be well to hang on to this table. It is authentic, and will materially aid you in figuring out the cost of the trip.

Organize Rifle Leagues.—The number of rifle clubs affiliated with the National Rifle Association has grown to astonishing proportions. At the present writing, there about seventeen hundred regularly organized rifle clubs in the United States.

The N. R. A. will, as usual, run an indoor league this winter and I don't see how it can help being a success, considering the large number of entries which are sure to materialize.

In the very nature of things, there is one element lacking in these big indoor leagues. The spirited competition with your rivals shooting right at your elbow is quite lost in matches in which your opponents are, perhaps, a thousand miles away.

If there aren't enough N. R. A. rifle clubs in your vicinity to form a league—three or four clubs are plenty—it's up to you to help other clubs to get started.

Just suppose, for instance, that your club is made up of men connected with the So-and-So Manufacturing Company. In summer you have a baseball team which regularly takes the measure of other local teams. You will find in those other companies there are men who pride themselves on their rifle shooting ability. Let them know that you have a rifle team and if you can, without bragging, convey the information to them that you think your rifle team is just about It when it comes to making bull's-eyes. I am sure that it won't be long before you will receive a challenge!

As true sportsmen, you should help your rivals to get started and even lend them the use of your range, if necessary.

You'll get a lot of pleasure out of such competition and I'm sure you will find the results well worth the effort.—Alfred P. Lane.

DEER KILL CLOSE TO 9,000 THIS YEAR.

Hunters Had a Banner Season Despite the Hard Winter That Exterminated Much Game.

In spite of reports all through the summer months that deer hunting in both the coast range and the Sierra Nevada mountains, reports compiled by the State Fish and Game Commission indicate that fully as many deer and probably more were killed during the 1916 season as in the preceding years. In 1914, 8,699 weer were victims of hunters, and in 1915, 8,343 were killed, according to the reports of the commission, which are not complete.

The "propagation and protection" policy of the Fish and Game Commission is almost entirely responsible for the plentiful number of deer. The commission has expended over $60,000 in bounties of $20 each on mountain lions. This money came direct from the funds of the commission (licenses, fines, etc.), and not by state appropriation. Experienced woodsmen and hunters estimate that a mountain lion will kill one deer a week—52 deer a year.

Several species of deer are to be found in the northern game district of California, ranging from the "mule" deer, possibly the largest true species of deer to be found in all America, to the small chaparral or brush deer.

The "mule" deer are to be found in generous numbers in the lava beds of Modoc, Lassen and a few other counties. Individuals of the "mule" species, weighing as much as 400 pounds dressed, are on record.

There is another species of deer which inhabits the lava bed and other sections of Northern California which is a cross between the mule and the black-tailed species. These deer are quite abundant. This cross-bred deer will average about 250 pounds dressed and are of excellent meat. The true black-tailed deer are to be found in all sections of Northern California. The chaparral or brush deer ranges with the black-tailed, possibly not to such a wide area. He is a small, wary little chap who seldom ever attains a weight of more than 100 pounds, and more often not over 60 pounds. He is quick of movement, fleet of limb, and it requires considerable skill and knowledge of woodsmanship to stalk him.

Wants to Train Deer.—The Fish and Game Commission is in receipt of a request from A. S. Condy of Stockton for permission to keep in captivity two does and one buck, otherwise three deer. In his request, Condy says that he intends to train the animals to do tricks.

"In your natural histories you will find the deer described as the gentlest and most timid of all the larger wild animals," says Deputy Commissioner George Neale, "and the wild cat and the lion as the most ferocious, but there are ample statistics to show many instances of the same in California, that once you tangle with a 'pet' buck, even though he has been in captivity since babyhood, that there are times when he can give a wild cat or a lion cards, spades and big casino for pure, unadulterated viciousness.

"At such times, and you can never be quite sure when they are to occur, your pet buck becomes a combination of wild bull in trying to gore you with his horns, butt you like a goat, kick you like an unbroke Missouri mule, and at the same time cut you to ribbons with his razor-sharp front hoofs."

When Do Ducks Mate?—An interesting question with reference to mating and migration among birds is, When does the mating take place—before, during, or when the birds arrive at their destination? We are inclined to think that mating, in the majority of instances, occurs during migration, and when the couples have come to an understanding, then they drop out of the stream and seek the first favorable spot for nesting. The early matings have the first choice of positions, and as the places get filled up farther and farther advances are made northward. Many birds that have been reared in certain choice localities will return to the same places as adults, but whether it is the cock or hen which makes the decision it is difficult to say. The system of ringing birds, now interrupted by the war, is unquestionably throwing increased light on the movements of birds, and in time may solve many problems which puzzle us at present.—British Sportsman.

NEW SYSTEM TO BETTER DOGS' CONDITION.

Health and Identification Certificate to be Issued to Owners of Pets.

There is one organization in the dog game which is not going around with a brass band and fanfare of trumpets at every corner to let the public know what it is doing in the way of making the dogs of this country and the conditions for them as nearly ideal as possible, says a writer in the N. Y. Herald. This is the Dog Lovers' Protective Association, of which James Gardner Rossman is the president and the moving spirit. Although Mr. Rossman is a very busy man in the activities which bring him his income, he can always find time enough to do something for the good of the dog, and he has spent many an hour in devising schemes whereby he can improve conditions for the dog in America. His troubles have been rewarded so far in the short existence of the association with a fine response from dog lovers all over the country, and at the present time it is doubtful if even the A. K. C. is better known in the far off sections of the United States than the Dog Lovers' Protective Association. The reason for this is that it is not a body which appeals to the blue ribbon winners alone, but one that the ordinary person who has a little "mutt" at home as a pet wants to foster.

Right along Mr. Rossman and his associates have been hustling through the country trying to get members of this association. It is not one of those projects where the promoters are trying to make some money out of the affair. It is purely an idyllic proposition. For a long time the association has been trying to perfect a health and identification certificate which will prove of value to dog owners and at last one has been hit upon which should prevent crooked dealings and help persons recover lost dogs with little trouble. The American Society for the Prevention of Cruelty to Animals had the blank submitted to it and has approved of it thoroughly. The general manager of the A. S. P. C. A. has written the following to Mr. Rossman:—

"The Health and Identification Certificate would no doubt prove of value and serve as a protection to dog owners. I trust you will do what you can to promote its use and let us know how we can assist."

The Department of Health of New York also has placed its stamp of approval on the efforts of the D. L. P. A., and in a letter to Mr. Rossman has the following to say:—

"The bill of sale and identifying card is a splendid idea and one that will go far toward removing many very embarrassing and annoying conditions relating to the sale of dogs, especially puppies. Time and again complaints are made to the department regarding persons feeling that they have been duped into buying an animal either sick at the time or recently exposed, to succumb to infection at the earliest opportunity—as is occasioned by a change of home or diet.

"In the prevention of rabies we are very much encouraged by our results, tabulating the figures for the five months of this year and comparing them with the same period of the previous year, and it is highly satisfactory. There were 67 cases of rabies in dogs in 1915—first five months—against only 11 so far this year in the five boroughs of New York City. Dog bites, on the other hand, in spite of muzzling, still hold their own, being a little more frequent in 1916 than in 1915, for this five month period. In 1916 1,287 bites were reported, against 1,269 for 1915. The marked reduction in rabies is highly encouraging. There was only one death in human beings in 1915 and none so far this year, as against 8 in 1914, which was the time when the muzzling order went into effect.

"A peculiar feature of the dog bite investigation has furnished the interesting information that about sixty per cent of the bites occur within owners' premises.

"For the first quarter of 1916 the offal contractor collected 4,654 carcasses of dogs from the streets of New York, while the S. P. C. A. during the same period collected and destroyed 9,702 dogs, making a total of 13,366. This may be accepted as including a very large proportion of the outcast variety of dog, which by so many is considered so frequent and grave a menace."

This health and identification card should be something that every buyer should insist on. Every characteristic of the dog is detailed in it, and it would be hard to practice any deception. Mr. Rossman told of an incident recently where the time of a court over in Brooklyn was taken up for a whole day in a lawsuit over a dog. With one of these cards it would have been the easiest thing in the world to identify the dog with the testimony of a veterinarian. The D. L. P. A. is enthusiastic enough to furnish blanks for all those who want them.

In the raising of puppies one cannot be too careful when the spring housecleaning season comes along. One woman told the writer that she knew of at least a dozen cases where puppies had been lost through licking up insect powder which had been placed on the floors to get rid of roaches.

• • •

For his bravery in rescuing a dog which had fallen over a cliff, a police sergeant in Bridlington, England, was awarded a silver medal by the Canine Defence League. The policeman was lowered down the side of the cliff forty feet before he recovered the dog.

INDIAN IS ARIZONA STATE CHAMP.

P. Cooley Wins Honor at Phoenix Shoot; O. N. Ford is High Gun For the Tournament.

. N. Ford writes that the Arizona State Shoot at enix on November 13, 14 and 15 was a success in ry way. Quite a pleasant surprise was furnished trap shooting enthusiasts when C. P. Cooley, an ian, achieved the honor of winning the Arizona e title with a score of 87 out of 100. Others in competition beat his score but he was high among Arizona contestants. Ford was high gun with out of 160, the low mark being due to adverse ther conditions. Reports of the shoot sent the eder and Sportsman follow:—

hoenix (Ariz.), Nov. 15.—The greatest gun club ot Arizona has ever witnessed came to a close ay at noon, when hundreds of enthusiastic specta- s left the grounds with good old memories of sy shooting that had taken place during the three days of this great tournament. The third and day brought an exhibition of some wonderful oting and in spite of the bad windy weather the rtsmen were able to hang up the best of records. he highest score made during the day was made an amateur shooter, O. N. Ford of San Jose, Cal. record was 141 birds out of a possible 160. H. P. Mund was second high amaeur with a score of out of 160.

. W. King, last year's winner, came back strong en he broke 140 birds out of 160, thus making him h professional shooter of the day. Guy Holohan in repeated his good work of the first day's shoot proving himself a two time winner for second ce. He broke 138 out of a possible 160.

n the jackrabbit shoot that was held at the very t of the program W. B. Twitchell won first. W. S. flin won second. Cary Smith was third, and Fin elan won fourth. Four beautiful loving cups were ered for this event and the winners will get the k of them according to turn, Twitchell getting st pick.

One thing that will be remembered for some time come after this big fair and that is the wonderful ccess of the Arizona Gun Club shoot, held at the ate fair grounds on November 13, 14 and 15.

It is hoped by the Arizona Sportsmen's Association give an even greater gun club shoot next year an was held this year. And owing to the fact that apshooting has held its own among the greatest of nerican sports, every effort will be devoted by the embers of the gun club to pull some more big oots during the winter. The following scores of ov. 15 indicate the character of the shoot:—

O. N. Ford, 141x160, C. H. Nash 126x160, *H. Pos- n 132x160, J. F. Dodds 18x20, *Len Hawxhurst 45x . Tom EEdens 135x160, H. P. DeMund 137x160, Ray eMund 125x160, W. S. Heflin 130x160, Dell Morrell 9x160, W. E. Mullen 117x160, Carl Smith 119x160, Staiger 107x160, V. A. Rossbach 131x160, W. P. arham 109x160, *Ed. Mitchell 36x40, *D. W. King 0x160, W. B. Twitchell 123x160, *C. A. Haight 107x 0, *Guy Holohan 138x160, *A. W. Bruner 103x160, I. A. Hoyt 131x160, W. H. Heileman 121x160, Char- DeMund 73x100, C. P. Cooley 123x160, C. P. Mullen x160, John Mullen 43x100, B. E. Prince 50x100, . B. Bertram 36x100, Geo. Miller 56x100, Fin Phelan x20. Official scorer: Joe Rice. (*Professional.)

The second big day, November 14, resulted in me wonderful records. When the first squad was lled to the post at nine o'clock it started the sec- d big day of the tournament. It was cool and clear d the birds were thrown from the traps in a way at made all the sportsmen "shoot to kill."

Again hundreds of enthusiastic spectators gathered ound the field range to see what kind of sharp- ooters the munition factories and local gun clubs d sent out on the firing line. It was not long fore the ground was covered with the black chips the dead "birds."

The highest score was hung up by Guy Holohan of e DuPont Powder Company, who broke 203 birds t of a possible 210. This is a wonderful record he only missed seven birds. Ed Mitchell was cond high professional with a score of 200 out of possible 210.

Ray DeMund of Phoenix was high amateur shooter the day with a score of 202 birds out of 210. De und only missed eight birds and only lacked one of ing Guy Holohan, who was high professional. Old ommy Edens came back again with his good shoot- g of the day before by making a score of 191 out of 0, making him second high amateur.

The scores on Monday, Nov. 14th:—

O. N. Ford, 129x160, C. H. Nash 138x160, W. H. eileman 139x160, C. P. Mullen 117x160. W. E. Mul- n, 52x120. At 210 targets—*H. Poston 196, J. F. odds 184, *Len Hawshurst 184, Tom Edens 191, P. DeMund 188, Ray DeMund 202, W. S. Heflin 8, Dell Morrell 179, W. B. Barham 188, G. Staiger 1, V. A. Rossbach 168, Carl Smith 164, *Ed Mitchell 0, *D. W. King 199, W. B. Twitchell 171, *C. A. aight 173, *Guy Holohan 203, *A. W. Bruner 142, H. A. Hoyt 185, C. P. Cooley 177.

Superintendent J. M. Peters, of the Klatskanie atchery, announces the arrival of another shipment salmon eggs from the Willamette river. This me the consignment numbers 455,000, making a to- l of 4,109,720 eggs received at the hatchery this eason. Two million and a half of the eggs already the hatchery have been hatched and the little mily of fishes is doing nicely.—O. A. T., Astoria, Or.

Seattle Association.—The shooting conditions were ideal and the targets flew just right for the bunch of shooters who took their sport out on Harbor Island November 12, in place of working the "flats" for ducks.

C. E. McKelvey shot the high position in both the fifty and one hundred target races, he finishing with forty-nine and ninety-seven in the two programs.

The second position in the fifty-target program was tied between two shooters, Hi Follerich and George Scripture, they both totaling forty-seven out of the lot. Tom Wilkes "shot up" into second place in the 100-bird event by shooting a 94 score.

George Russell appeared on the grounds for the first time in several months, and with a borrowed gun showed some of his old form at the traps.

To break the election day tension a bunch of shooters hiked out to the grounds that day and incidentally hung up some very good scores. L. H. Heid, professional, lost only two birds out of the 100 and furnished the high score with his 98. Tom Wilkes and C. E. McKelvey shot the second place scores with 95 each.

Bert Railson, of the Washington Hotel, appeared at the traps for the first time and did some remarkable shooting for the inexperienced. Jack Lewis, another shooter with a great many possibilities in the "sport alluring," showed improvement since last shooting. The scores:—

At 50 targets—C. E. McKelvey 49, Hi Follerich 47, George Scripture 47, Tom Wilkes 45, C. W. Bandy 43, John Considine 42, J. V. Hough 41, George Russell 38.

At 100 targets—C. E. McKelvey 97, Tom Wilkes 94, George Scripture 91, John Considine 89, Hi Follerich 87, J. V. Hough 84, C. W. Bandy 83.

Nov. 7th, at 100 targets—Tom Wilkes 95, C. E. McKelvey 95, G. Scripture 84, Mr. Gibson 75, Jack Lewis 69, Bert Railson 53.

Los Angeles Club.—Fred Teeples was the host to a large crowd of shooters at the Los Angeles Gun Club, and some very good scores resulted. E. K. Mohler was high man, having a score of 144x150. Hugh Poston had 97x100 smashes to his credit, while Charles Vories had 139x150 smashes. The complete results on Sunday follow:—

E. K. Mohler 144x150, Chas. Vories 139x150, H. Poston 97x100, H. Pfirrmann 96x100, Mrs. Pfirrmann 87x100, Wm. Kennedy 77x100, L. L. Sheldon 64x100, C. M. Wood 73x75, R. C. Hartmann 65x75, T. B. Sloan 65x75, F. Hartmann 57x75, O. Evans 45x50, M. D. Towne 40x50, F. T. Teeple 43x50, F. H. Teeple Jr. 41x50, B. H. Carnahan 45x50, J. A. Fraters 35x50, H. M. Gilliam 36x50, A. R. Townsend 29x50, A. Hartmann 30x50, S. B. Friend 18x25.

Woman Breaks Trap Record.—Mrs. Ad Topperwein, the great trap and fancy shooter, who has appeared on the Coast several times, broke all previous trapshooting records for continuous shooting at Montgomery, Ala., a week ago last Sunday.

She made this record possible by scoring 1952 out of a possible 2000 targets, shooting the entire score in five hours and 20 minutes. This establishes a new world's record for endurance and number of shots fired over the trap in one day and in targets scored.

The best previous day's record was made by John W. Garrett, of Colorado Springs, when he scored 967 out of 1000 several years ago.

Mrs. Topperwein used but one gun. She broke 975 out of her first thousand and 977 out of her last. Her longest run was 280 without a miss.

Intercollegiate Shoot.—Teams representing Harvard, Yale, Princeton, Dartmouth and Cornell will exchange shots today (Nov. 25th), to determine the 1916 Intercollegiate Trapshooting Championship. The shoot, which is an annual event, will be held at New Haven, Connecticut, over the traps of the New Haven Gun Club. A five-man team from each college will shoot a 100-bird program. The first shot will be fired promptly at 8:30 a. m. The shoot will be held under the auspices of the Intercollegiate Trapshooting Association.

Intercollegiate shoots have been held intermittently since 1898 although not until last year, with the formation of the Intercollegiate Association, has the sport been put upon a firm basis.

There have been 25 Intercollegiate shoots; of those Yale has won 13 first places while Princeton and Harvard have each won the championship six times.

Yale is the present Intercollegiate champion, having won the Intercollegiate shoot held at Princeton, October 23, 1915, with the score of 366x500. Cornell was a close second with the score of 361x500.

Princeton holds the record for the Intercollegiate shoots with the high score of 451x500 made at New Haven on May 6th, 1916. The previous record of 442x500 was made by Yale in 1912.

Yale has been unusually successful in the Intercollegiate shoots and is looked to put up a strong fight for first honors this year.

In addition to the solid gold clay target watch fobs which are awarded to the winning team as emblematical of the championship, Stanley F. Withe, Secretary of the Intercollegiate Trapshooting Association, will present a sterling silver cup to the winner of the Individual Championship.

Authorized by

STANLEY F. WITHE,
Sec. Intercol. Trapshooting Ass5n.

SUPPORT FOR SUNDAY TRAP SHOOTS.

St. Louis Man Backs Up Fight of Coast Devotees to be Allowed Registered Tournaments.

The agitation started by Coast trapshooters to be allowed to have registered tournaments on Sundays has stirred up their brothers in all sections of the country. In the main it is conceded that the stand has been well taken and indications point to the Interstate Association letting down the bars, which will be the means of boosting the game along in the West.

The Interstate Association holds its annual meeting in Jersey City on December 6th and the matter will come up for discussion. No opposition has appeared at this date against the proposition. It would in no way interfere with the Eastern shooters from following their favorite pastime and it would provide so much more pleasure and recreation for the shooters out here.

That the suggestion of registered shoots on Sunday has made an impression with some shooters across the Rockies is indicated by the following letter from a St. Louis man:—

"I want to rise up in meeting and say that I think the suggestion recently made that the Interstate Association sanction the counting of scores of registered tournaments conducted on Sundays in the averages of the year is an excellent one.

"I can readily understand that in some sections of the country they do not permit any kind of sport on Sunday. But out here in the West, where Sunday is our big day for such recreations, it does not seem right that we should be deprived of the privilege of having our scores counted in the yearly records. There is just as much justice in saying that the games played on Sunday in the American and National Leagues should not count in the standing of the year because they play Sunday ball in the West while the law prevents it in the East.

"To refuse the West the right to count scores of events shot on Sunday, or to withhold such privilege from the Pacific Coast is tantamount to saying that it is wrong to shoot on Sunday, whereas that is merely a matter of legal right or religious scruples.

"To help trap shooting it would seem to me that we must make it as elastic as possible. Keep the main rules rigid and severe, but have enough leeway in matters of this sort to make it strongly appeal to those who love sport for sport's sake and do not care to be bound too tightly by conventions.

"Yours very truly, J. D. H."

Instructing the Novice.—Beginners are taking up the sport of trapshooting in such numbers all over the country that the army of target breakers is assuming proportions which places it in the front rank of popular pastimes.

Fortunately there is a bonhomie and fellowship about it all which prompts the shooter with instincts of true sportsmanship to instruct the newcomer along the lines of deportment and form, and the latter is doubly fortunate if he can have a trap to himself while absorbing his initial lessons.

A fast squad is quite apt to be disconcerting to a novice, in which case the advice of the instructor, who is standing at his back, goes for naught, and the pupil in his excitement will often do the very opposite of which he is advised.

After the tutor has assisted in placing the gun properly to the shoulder, so that the recoil will land where it should, has got his pupil's cheek to the comb correctly, so that the center of vision will align over the barrel, and has told him to look for that target with both eyes and to pull the trigger when he has found it, it is love's labor lost if instead a little temporary "stage fright" prompts him to close both eyes.

Above all, the beginner should not become discouraged when his initial efforts at trapshooting seem doomed to failure. He has stepped into the arena of the most fascinating of American sports. He has elected to learn the most difficult variety of "wing shooting."

No one can be 100 per cent perfect save on occasion. All have their slumps and the best have their "off days." Bear in mind that there is no such thing as a born target-breaker. All have to learn and some of the best were primarily the worst.—By "Trapshooter."

Boys, Some Fish Story.—Wichita, Kans.—C. A. Whitney of Route 9, on the west side, and his sixteen year old son rode around on the back of a forty-two-pound catfish for half an hour in the Chickaskia River near Drury the other day. They finally landed the fish and brought it to Wichita.

Mr. Whitney and his son have been camping for the last month. Neighbors told them of several times seeing a monster fish in the river. Mr. Whitney, wading into the river, felt around until he located the fish.

He got one hand in the catfish's gills and jumped on its back. The fish darted forward and whipped around in the water until it was about to throw its rider off. Mr. Whitney's son rushed to his father's aid and climbed on top of the latter's back to weigh down the catfish. For half an hour the two men rode the fish around, struggling to get it to the bank. They finally succeeded.

Sportsmen's Row

For a good goose shoot, the famous Church-Hanson goose preserve near Rio Vista is recommended. The best goose callers in the state and a number of live geese decoys are always on hand. Many hunters have tried the spot with pleasing results. For particulars, address W. Gordon Wagner, Hotel Rio Vista, Rio Vista, Cal.

• • •

Rice near Willows will be harvested in a few days, according to the weekly hunting report of the Southern Pacific, and hunters will then be allowed to run over the fields in quest of ducks. All kinds of geese are reported to be coming in, and it is predicted that hunting will be good. At Live Oak it is reported that shooting is only fair on account of the rice harvesting.

• • •

George Armstrong, indoor pistol champion of the world, made a score of 475 out of a possible 500 in fifty shots, fifty yards distance, standard American target, on the Shell Mound range on Sunday. This score was shot in competition with marksmen throughout the country for the championship of the United States. Judging from scores made in the past, it is beyond a doubt that the championship will come to California.

• • •

The more one sees of class competition, where the 60, 70, 80 as well as the 90 per center stands a chance of winning something, the more one likes it, and the more one thinks it would improve the fast growth of trapshooting if universally used.

• • •

Eleven hundred and 97 clubs have enrolled in the American Amateur Trapshooters' Association.

• • •

There are 1200 rifle clubs in the United States, Canal Zone, the Philippines, Cuba and Hawaii.

• • •

Fred Harlow, of Newark, Ohio, has an average of better than 97 per cent for his season's shooting at registered targets—the best ever compiled.

• • •

Governor Major of Missouri and president of the St. Louis Police Commissioners, W. D. Thompson, attended a recent tournament of the St. Louis Trapshooters' Association.

• • •

The curtain never rings up or down on trapshooting. It is always in season. It never has to be revived.

• • •

The sportsmen of Centralia, Wash., have organized a gun club and leased five hundred acres of duck marsh and water near Gate. The officers of the new club are as follows: President, Rev. F. E. Dorris; secretary-treasurer, J. H. Jahnke. A duck preserve covering 500 acres ought to furnish the members of the club about all the shooting they will care for.

• • •

The plentitude of ducks is attributed to the added protection given a couple of years ago, when the open season was curtailed by the closing of the season on February 1 instead of March 1. This, declare the experts, and the fact that more attention is being given to existing Federal laws in the Western States, has operated in favor of the ducks and their consequent increase in numbers is just beginning to be noticeable on the Pacific Coast.

• • •

Governor Hiram W. Johnson, U. S. senator-elect, occasionally goes duck hunting. During the week he was the guest of President Frank Newbert of the Fish and Game Commission at a shoot at the West Butte Club, just above Sacramento. The birds are said to be very numerous there and the Governor was promised the limit.

• • •

O. N. Jones, the trapshot professional, was up to the West Butte Club during the week and easily got the limit. He picked mallards, passing up many others. Must be pretty nice when the boys can pick their birds!

• • •

Turkey Shoot at Woodburn.—A large crowd, including many shooters from Portland, turned out for the turkey shoot under the auspices of the Woodburn Gun Club on November 18th. The weather was ideal, as there was no wind stirring, and the scores, as a rule, were high.

P. J. Holohan, Portland, professional, carried off high honors, with 90 per cent to his credit. He also won three turkeys. Charley Leith of Woodburn was high amateur, with 88 per cent, and he bagged five birds. E. H. Keller kas high amateur among the Portland shooters, with 86 per cent. The veteran Abner Blair of Portland also managed to secure a turkey. Scores of the shooters, with the number of turkeys won preceding the names, and the scores afterward, follow:—

3, *P. J. Holohan, 90; 1, H. R. Everding, 65; 2, E. H. Keller, 86; 1, C. B. Handy, 75; C. Pearson 66; 1, Abner Blair, 70; 5, Charles Leith, 88; 1, P. B. Dudley, 67; P. D. Settlemeier, 55; 1, P. Whitney, 68; 2, E. G. Hawman, 75; O. Donus, 45; 1, C. Clement, 70; E. C. Pearson 70, B. McCrow 40, R. West 60, B. Huddleson 30, B. Trout 50, H. Hoffman 52, J. Brown 75, C. Mulkey 45; 4, Charles Seller, 85; F. Brown 60; 1, J. Cammack, 80. (*Professional.)

Tie in Coursing Meet.—Los Molinos, a greyhound owned by James Duffee and John Maley of Sacramento, was the only local dog to remain in the running at the Capital City Club's first coursing meet at Franklin on Sunday. The meet was called on account of darkness with four dogs tied for first place and the money was divided equally among them.

This was the first local meet in which Los Molinos was entered. In spite of the north wind the crowd witnessed exciting sport as the hares were very fast and the hounds were forced to extend themselves.

Frank Troeh on Hunt.—Frank Troeh, the great Vancouver trapshot, has been heard from again. Frank took high honors among the amateurs at the Grand American handicap at St. Louis last summer, and has now turned the gun to more businesslike purpose in duck shooting. Troeh uses the same old standard make of gun for both branches of the sport, and seems to get equally good results.

Recently Frank and his brothers, J. A. Troeh and J. B. Troeh, took their machine and went down to their preserve below Vancouver. They had no trouble getting their limit, as all of the boys are crack shots.

These boys, with their brother, Edward, form a quartet of shots who have challenged any four brothers in the country, but have never had it accepted. They formerly lived in Dakota, and their father was also a great shot. Challenges for any family of five have also failed to bring any response.

Frank's 12-year-old son also seems likely to follow in the footsteps of his father. He also shouldered a shotgun last Sunday, hiked out to the wilderness and brought back 10 birds, all of which he brought down himself.

THREE BIG TRAP SHOOTS FOR N. W.

Intersectional Matches Between Portland, Seattle and Spokane Promised for Next Month.

The question of sectional superiority in trapshooting in the Northwest has become so fogged, as a result of the unusual development of the sport during the 1916 season, that a series of three big shoots, to be held in Spokane, Seattle and Portland, is being arranged to determine who's who with the scattergun. The idea is to let the gun clubs in each of the three cities draw representation from their surrounding territory, and have the ten high men from each section qualify as the team.

The winning team in each of the shoots will draw down a purse of $500, of which $300 is to be furnished by the club holding the shoot and $100 by each of the visiting clubs. It is proposed to hold the first of the three shoots at Everding Park, Portland, on December 3, one month to intervene between the second and third shoots. Each city will, by mutual agreement, be allotted the territory from which it can draw representation. This will probably give Seattle all of the Puget Sound district, British Columbia, and possibly Wenatchee and Yakima. Spokane will have the Inland Empire and Northern Idaho, while Portland will draw the towns along the Columbia and from the territory to the south.

So many new shooters have developed this year that it is difficult to predict who might constitute the teams. Seattle has a number of seasoned veterans from which it would be easy to select 10 able to hold their own anywhere. Seattle has Charley McKelvey, Tom Wilkes, Hugh Fleming, R. H. Miller, Matt Grossman, G. A. Conklin, Deskin Reid, Dr. Templeton and other reliables, while for a second line it can depend upon Jack Cooper, Al Riehl, J. A. Dague, Ed Young and C. J. Jensen, of Tacoma; Harry Quick of Chehalis; Charley Owens of Wenatchee; George Miller of Bellingham; J. Weatherwax of Aberdeen; W. K. France of Arlington, and other clever performers.

Spokane looks strong. Locally it has Hugh McElroy, C. A. O'Connor, Mrs. C. A. O'Connor, E. J. Chingren, Charley Fleming, George K. March, Jimmy Shriver, A. R. Gorkow and many others. To draw from it has G. B. Joslin and C. A. Couplin of Palouse, George H. Arland of Garfield, Jim Spence, Lee Matlock and H. F. Clodius of Pomeroy, Ed Beckman and C. E. Butler of Lewiston, Jeff Scott, Milt Flohr, Geo. Gilmore and F. R. Venable of Wallace, Fred Porter and R. E. Turner of Kellogg, and Earl Farmin of Sandpoint.

Portland will be weakened by the departure of Pete H. O'Brien, who is now a citizen of Montana. But it has another champion at its door in the person of Frank N. Troeh, of Vancouver, the National premier, also Frank VanAtta of the same town. These, with Charley Leith of Woodburn, Mark Siddall of Salem, Mark Rickard of Corvallis, and other Oregonians, would stand shoulder to shoulder with Frank M. Templeton, H. R. Everding, A. W. Strowger, Eddie Keller, Jim Seavey, Abner Blair, Al Seguin, Dick Carlon and other veterans, not overlooking Miss Gladys Reid and Mrs. Ada Schilling, either or both of whom may make the team.

Jewfish Weighs 304 Pounds.—Jewfish are not landed every day. But a recent day will go down in history for Redondo Beach—that is, Jekfish history. William Sartor, in whose heart flows the desire to fish and fish, managed to land one of the largest ever caught thereabouts. He fought for an hour and a half and used every ounce of energy that he had to make the landing. When the fish was flopping on wharf No. 3, where the event took place, it was placed on the scales and weighed 304 pounds.

1915 GOVERNMENT BIRD COUNT.

124 Pairs on Average Farm in Northeast—125 to 100 Acres in Plains Region.

Washington, D. C.—One hundred and twenty pairs of birds nest and raise their families on average farm of 108 acres in the Northeastern St according to estimates based upon the second an bird count conducted by the Biological Survey o U. S. Department of Agriculture. In that part o Plains region east of the 100th meridian the co would indicate almost exactly the same densit bird population, 125 pairs of nesting birds to 100 acres. In the Southern States, where the co were limited to the part of the farm surrounding home, which naturally supports more birds tilled areas, there seem to be on the farms w counts were taken 131 pairs of nesting birds to 100 acres. The counts so far received, how from those sections do not furnish a sufficient b for estimating the birds on the remainder of farm.

In the Northeastern States it was estimated the average bird population of each 100 acres of lated woodland under observation was 199 p while the average bird population for each 100 a of the area covered was 125 pairs. The reports f the Rocky Mountain States would indicate that bird population is smaller in this section.

Three 80-acre tracts in New Mexico indicated pairs to 80 acres, or 21 pairs to each 100 acres. farther west in the irrigated district of western C rado two reports indicated that irrigated land orchard and fields of grain and root crops suppo a bird population of 66 pairs per 100 acres, but contiguous non-irrigated land the bird life sharn 5 pairs for 100 acres. In Arizona a 40-acre tract taining only a few houses, and for the most part ered with desert shrubs, showed a bird populatio 50 pairs of 26 species, of which 22 were insectivor A semi-desert tract of the same size, covered w brush mostly less than 6 feet high, showed 31 p of 16 species. In the mountains of Arizona, n Flagstaff, a tract of 70 acres covered with yel pine and Gambel oak, supported a bird populatio 31 pairs of 18 species.

In California, 20 acres of the campus of the U versity of California showed 87 pairs of 23 spec A tract near Gilroy, Cal., containing 30 acres fruits and about 8 acres of pasture and creek bott gave the unusual figure of 176 pairs of 34 species 38 acres. A similarly dense, though less varied, b population was found in a 52-acre peach orchard n Port Clinton, Ohio. This showed 108 pairs of c mon farm birds, 36 pairs of purple martins, an pairs of English sparrows, a total of 150 pairs of species.

In the South the counts showed an average of pairs of 20 species and 5 pairs of English sparro on 83 acres in Florida; in Louisiana an average 95 pairs of 29 species on 53 acres; and the cou from Texas indicate an average of 91 pairs of bi of 21 species on 60 acres. The average of all cou received from the Southern States is 76 pairs birds of 23 species on a farm of 58 acres.

On the 256 acres on the Cornell University camp at Ithaca, N. Y., a very careful study indicated pairs of nesting birds, an average of 166 pairs native birds per 100 acres, and 56 nesting pairs English sparrows per 100 acres, or a total of nesting birds per 100 acres. A similar count ma near Rhinebeck, N. Y., in a 210-acre section in cated 54 different kinds represented by 366 pa nearly the same per acre as shown at Cornell U versity.

The results of the 1915 bird count just publish by the Biological Survey indicate an average of pairs of robins and 6 pairs of English sparrows each farm of 108 acres where the count was made the Northeastern States. The average of all repo for two years show 7 pairs of robins and 5½ pa of English sparrows for each farm covered in t section.

Freak Press Reports.—Williamsport (Pa.)—Erne Horton of Montrose was held a prisoner up a tree two bears in the woods near Leroy, Bradford coun for four hours until discovered by his hunting co panions.

Familiar with Bruin's liking for apples, Hort climbed into a wild apple tree to await a possit visit. In a short time a cub bear appeared. quickly shot it. That was his last shot, and as was climbing down from the tree to summon companions he sighted two other bears comi toward the tree. He returned to the limb on whi he was sitting.

The bears soon discovered the dead animal a then the man in the tree. They besieged him un other members of the hunter's party approached.

New York.—"If any one doubts this story abo a white sparrow living in Tompkinsville, S. I., th I am going to give you," said The World Staten land correspondent over the telephone, "let him gr a ferry and go to Griffin and Arietta streets, Tom kinsville, and see for himself. The white sparro hangs out on a little spot of ground there with son other sparrows.

"There's a lot of figuring on how the sparrow ha pened to be white. Some think he may have be caught in electric wires and have been turned whi by the shock. Others think it's possible old age responsible for his color."

WHAT THE SPORTSMEN ADVOCATE.

Resolutions Are Adopted at the Recent Meeting of National Societies at New Orleans.

That the cause of fish preservation is to receive quite as much attention and energetic development as the game preservation and propaganda has had in recent years is proved by the breadth of the work of the National Fish and Game Commissioners and the American Fisheries Society, both held in New Orleans recently. Among the resolutions adopted were several which have to do with these subjects, and those who know the calibre of the men engaged in this work realize that they will leave no stone unturned to successfully carry out the plans. Some of the resolutions follow:

"Resolved, That it is the opinion of this convention that a definite and comprehensive series of national bird reservations is necessary for proper maintenance of the wild bird life of the continent. That these reservations should be sufficient in size and number to furnish adequate resting, feeding and breeding places for the migratory birds. We urge odequate federal legislation and appropriations to make possible the development of such a system, to the end that the economic loss resulting from the unnecessary decrease in the food supply naturally derived from wild ducks, geese, plover, grouse and quail, and also the great loss to agriculture resulting from the depredations by insect pests may be lessened. We believe that this is a national problem, and should be met by federal appropriations supplemented wherever possible by local contributions, and we urge definite organized action for securing these results by Congressional action.

"Whereas, many States, realizing that our rapidly disappearing game birds cannot stand the enormous drain caused by the market hunter, having enacted laws prohibiting the sale of game, and prescribing bag limits, while other States have neglected to adopt such measures, so important to the conservation of our game birds; now, therefore, in order to equalize shooting privileges throughout the United States, it is resolved, that this Convention favors a Federal Law, prescribing a bog limit, and prohibiting the sale of migratory birds as defined in the treaty recently effected between the government of the United States and Great Britain.

"We strenuously urge the passage of State and federal legislation which may tend to check such existing abuses as the pacile pollution of public waters, the waste of valuable young fishes, the use of unnecessarily destructive methods of fishing and wasteful methods of marketing. In many instances laws already exist, but in the absence of enforcement, due to apathy, ignorance, political considerations, conflict or lack of authority, the enormous economic waste goes on.

"Whereas, several States of the Union appear to have no official departments of Fish and Game, and "Whereas, such a delinquency is distinctly a hardship and detrimental to the interests and welfare of the people of such commonwealth,

"Be it Resolved, That this National Association of Game and Fish Commissioners, present, through its Secretary, its compliments to such respective legislatures as may convene during the ensuing years, with an urgent request that enactments be passed creating such State organizations in order to properly assist in maintaining and protecting the wild life involved."

Vernon Club.—Los Angeles, Cal.—Trapshooters have been very calm during the past few months. So very calm that few have heard the reports of the shooters as they blasted away at the saucer-shaped targets. But on Sunday these trapshooters came to life and more than forty participants took part in the opening day program of the three-day registered shoot tourhament at the Vernon Gun Club.

The crowd was a surprise to every one. As the time for the shoot neared shooters started pouring in from every direction. There were men with reputations and men who were seeking note. Some of these who expected to receive the highly valued prominence did so. Those who have been famous in the past failed to repeat.

High honors of the day's program went to one William (Bill) Mullen, who resides in the wilds of Arizona.

Scores on November 19.

Optional sweepstake at 100 targets from sixteen yards:—

"Tiny" Tuckett 87, Frank Mellus 85, Sam Smith 90, Bob Bole 83, Walter Cornelius 89, O. N. Ford 97, Fred Bair 92, Hugh Poston* 93, J. F. Dodds 98, Lem Hawxhurst* 86, Ed Mitchell* 95, H. Pfirrmann Jr. 95, W. E. Mullen 94, E. K. Mohler 84, G. Lovelace 89, W. Slocum, 83, G. Adams 96, Stan Bruner 96, R. C. Reed* 95, Dr. J. L. Martin 83, Owen Evans 93, C. W. Fish 89, L. E. Sargent 89, W. A. Hillis 94, V. A. Rossbach 87, J. D. Dierdoff 84, Harry Hoyt* 84, Dr. L. M. Packard 88, C. E. Groat 81, George Melford 90, F. H. Nichols 81, C. F. Nichols 86, C. A. Haight* 89.

Summary—(*Professional shooters who shot for targets only.) J. F. Dodds, high amateur with 98x100. O. N. Ford second high with 97x100, and Adams and Bruner tied for third high with 96x100. Ed Mitchell and R. C. ("Dick") Reed (UMC Remington pro.), tied for high professional with 95x100, and C. A. Haight (Du Pont Co. representative), third with 89x100.

Vernon Gun Club trophy shoot, 100 birds from sixteen yards:—

"Tiny" Tuckett 92, Sam Smith 92, Bob Bole 92, W. A. Cornelius 85, O. N. Ford 98, Fred Bair 94, H. E. Poston* 96, J. F. Dodds 97, Lem Hawxhurst* 97, Ed Mitchell* 96, H. Pfirrmann Jr. 97, W. E. Mullen 90, E. K. Mohler 85, G. Lovelace 89, W. Slocum 92, G. Adams 97, Stan Bruner 91, R. C. Reed* 94, Dr. J. L. Martin 81, Owen Evans 95, C. W. Fish 96, L. E. Sargent 92, W. A. Hillis 95, V. A. Rosssbach 94, Harry Hoyt* 89, Dr. L. M. Packard 92, C. E. Groat 85, Geo. Melford 92, Guy Holohan* 94, C. A. Haight* 88, W. H. Wilshire 96, Mrs. Groat 88, Fred Grewell 93, L. R. Mellus 92.

Summary—W. E. Mullen, high amateur with 99x100; O. N. Ford, second high amateur with 98x100, and J. F. Dodds, Heinie Pfirrmann and G. Adams tied for third, each with 97x100. Lem Hawxhurst (Peters professional), high pro. with 97x100; Ed Mitchell and H. E. Poston tied for second high professional score, with 96x100 each. Dick Reed (UMC Remington professional), and "Du Pont" Guy Holohan, tied for third high with 94x100 each.

Heine Pfirrmann, who has captured so many shooting tournaments during the past few years that it is just like any ordinary happening for him, was high amateur for the shoot on Monday. Heine smashed 196 targets out of 200 possibilities.

Owen Evans surprised himself and all those present by capturing second high with 195x200 smashes. Evans was hard pressed by a certain Mr. O. N. Ford of San Jose. This gentleman is recognized as about the best little trapshooter on the coast.

Scores on November 20.

O. N. Ford 194, Fred Hair 189, Hugh Poston 192, J. F. Dodds 189, Lem Hawxhurst* 192, Ed Mitchell* 196, Heinie Pfirrmann 196, William Mullin 187, Harry Cline 180, G. Lovelace 176, W. Slocum 186, G. Adams 187, Stanton Bruner 188, Dick Reed* 192, Dr. Martin 185, Owen Evans 195, C. W. Fish 191, Dr. Packard 184, Fred Grewell 188, V. A. Rossbach 182, Harry Hoyt* 167, Guy Holohan* 192, C. A. Haight* 184, Frank Mellus 186, A. Knight* 186, Mrs. Pfirrmann 161, R. Bole 183, C. E. Groat 186, Mrs. C. E. Groat 67x30, Dr. Friend 114x140, H. E. Sargent 94x100, Van Brunt 36x40, Milligan 36x40.

Du Pont high runs—O. N. Ford 65, 58, 65; J. F. Dodds, 80; R. C. Reed* 54, 56; Heine Pfirrmann, 60; L. S. Hawxhurst* 58, 65, 76; W. H. Wilshire 50; O. N. Ford 92; Guy Holohan* 51, 57; L. W. Slocum 51; S. A. Bruner 50, 57; Dr. Martin 63; H. E. Sargent 55.

Hercules high runs—W. E. Mullin 69, 63, 52; H. C. Poston* 67, O. Evans 58, Ed Mitchell 71, 71 unfinished, H. Poston* 62, H. Pfirrmann 69, 59, Frank Mellus 58, C. W. Fish 63.

Heine Pfirrmann high amateur for day, 196x200; O. Evans second, 195x200; O. N. Ford third, 194x200.

It was a great day indeed—for close scores, high runs and for the Dutch—was the third and final day of the Vernon Gun Club's big registered shooting tournament on Tuesday. Heine Pfirrmann, the Dutch entrant, was victorious, although hard pressed by a number of other contestants.

Pfirrmann's score for the two days was 392x400. On both days of the tourney he smashed 186x200. In accomplishing this mark Pfirrmann had high runs of 60, 70 and 126.

O. N. Ford's score for the two days' shoot was 289 x400, which gained for him second place.

The third place was tied between Owen Evans and J. F. Dodds, with 285x400 breaks.

Ed Mitchell was high professional for the shoot. He had a mark of 391x400 and also had the highest run recorded during the shooting program. His run was 155 straight. Dick Reed (UMC) was second high for the two days with 391x400, while Guy Holohan (DuPont) was third with 385, and Hawxhurst (Peters) fourth with 382x400.

O. N. Ford set up a mark which he claims has never been equaled. It is of having six high runs in one tourney.

Taking the shoot as a whole, it was a grand success. The events were run off quickly and without any trouble or discussion and all were well satisfied with the way the prize money turned out in the events.

Scores on November 21.

O. N. Ford 195, Fred Ball 188, Hugh Poston* 187, J. F. Dodds 196, Ed Mitchell* 195, Heine Pfirrmann 196, William Mullin 189, Harry Cline 182, Frank Mellus 196, G. Adams 184, Stanton Bruner 191, R. C. Reed* 196, Dr. Martin 183, C. W. Fish 187, H. E. Sargent 187, Fred Grewell 180, V. A. Rossbach 181, Harry Hoyt* 166, Mrs. Pfirrmann 163, Guy Holohan* 193, "Dad" Haight* 178, W. A. Cornelius 186, Charles Knight* 180, Dr. Friend 183, C. B. Thorning 160, Jack Milligan 163, C. E. Groat 194, Bob Bole 183, R. Whitman 190, J. Arneill 189, P. Peterson 84100, Dr. Packard 109 120, Wilkes 53x60, Hartman 42x60.

Hercules high runs—J. Arneill 69, H. Pfirrmann 126-70, G. Adams 73, C. E. Groat 52, F. H. Mellus 128, W. E. Mullin 69-63-52, H. Poston* 62-67, Ed Mitchell* 155-71, O. Evans 58-56, F. Grewell 57, C. W. Fish 64.

DuPont high runs—O. N. Ford 75-67-65,92-58; H. Cline 60, H. E. Sargent 80, Dick Reed* 93-54-63, J. F. Dodds 115-80, W. A. Cornelius 51, Charles Knight* 82, Dick Reed* 53, Heine Pfirrmann 68, L. Hawxhurst 58, B. Wilshire 50, Guy Holohan* 51-119 unfinished; Slocum, 51.

Christy Mathewson, manager of the Cincinnati Reds, and gun bug, has joined the Cincinnati Gun Club.

GAME SEASON PROMISES BIG RESULTS.

Evidence at Hand, and Reports Coming In, Points to an Abundance of Good Shooting.

[By Peter P. Carney.]

Enter the shooting season!

Already the pilgrimage of Nimrod's hosts has begun. Time tables are in demand. Gun cases and hunters' kits are much in evidence in and about the railroad depots. Tales of the woods, the fields, and the meadows are percolating through the atmosphere.

The big game hunter has shouldered his trusty rifle, packed his kit and is on the trail of his quarry with visions of wondrous trophies flitting before his eyes. While near at home thousands of inveterate shooters are fondling their favored shotguns and eagerly waiting the test of their marksmanship on numbers of smaller game.

"Brer" Rabbit is frisking about in the meadows and scrubwood. The whir of quail sounds a welcome not in the brush. Thin lines of wild ducks wend their orderly flight toward the marshes and bays, and every sign points to a season worth while.

And there is every reason to believe that this will be the best season ever. Thanks to the efforts of the advocates of game conservation and propagation nature has been given a chance to partially replenish her reserve.

From some of the States where the deer season is open comes wonderful tales of shooting, and the few exhibits that have come under our notice have borne antlers well fit for the ornamentation of any den, to say nothing of the well-nourished, well-rounded carcasses that give promise of as tender and juicy a piece of venison as has ever tickled the palate of an epicure.

Truly, the next few weeks should prove a boon to the disciple of the Great Outdoors—the forests—the fields—the meadows and the marshes. In our roseate dreams of things-as-they-ought-to-be there's a vision of autumn leaves—the odor of fir and hemlock—a lake with the sunshine just breaking through the early morning mist—and the deep-voiced bay of the dogs on the distant ridge.

There's the shrill, wild call of the coon—the rustle of leaves and the thousand mysterious voices of the forests all blended into one sweet, soothing note of harmony. It's the life, my boy! And as you catch the sound of bacon a-sizzlin' in the pan and the odor of coffee touches your nostrils—then you're sure of your appetite, and doubly primed for the day of sport ahead.

Wind Helps Hunters.—Colusa (Colusa Co.).—The strong north wind now prevailing has made the vicinity of Colusa a hunter's paradise. The geese which are unusually few this year, are forced to fly low and many hundreds of these birds have been slaughtered in the last few days.

In the rice fields the widgeon seem to predominate, with the mallards and sprig a close second. Mallards are especially common in the tule country, and it is not unusual for the members of the Colusa Shooting Club, which has its preserve in this land, to return with the limit of green heads only.

Trade Notes.—The Springfield (Mo.) Gun Club held what will probably the last regular club shoot of the season, recently. A. Clas, D. M. Simmons and J. A. White were the three leaders among the amateurs. Mr. Clas shot Nitros while the two last named gentlemen used the perfect combination of Remington pump gun and the "Speed Shells." They made scores of 92x100, 90x100 and 89x100 respectively.

H. P. DeMund and T. Edens divided honors at a recent shoot of the Ray (Ariz.) Gun Club, both gentlemen shooting the perfect combination of Remington pump gun and Nitro Clubs. DeMund won high amateur average, defeating Edens by one target. In the 100 targets handicap event they tied for first place with 95x100, Edens winning the shoot-off with a score of 40x50.

Full Moon Slacks Sport.—Reports from Buena Vista Lake, one of the greatest duck and goose centers left in the world, tell the same story of slacking sport, as all the rest at times of full moon. Hunters with little time at their disposal will do wisely to leave the ducks and geese alone when the nights are light and deal rather with snipe and quail, or doves, which are affected favorably, snipe waxing fat with the moon, which favors nocturnal feeding. The ducks become satisfied over night and retire to the big waters, full-fed and lazy, so the hunter is merely taking his chances on drawing enough wind to make them fly. Quiet weather means little sport.

This rule holds true on duck clubs or entirely wild shooting, as members long since have learned, but in dry seasons the clubs so monopolize fresh water that good enough shooting is to be had any time.

Members of the Pasadena Gun Club near Bixby, one of the oldest in the South, have enjoyed excellent shooting this season, and the better shots have turned in a regular blue wing sequence of limits. Some of the members have been shooting together for many years, and the club seems as permanent as any, yet it operates under a lease.

Many new clubs were organized this season, several west of the sugar factory near Los Alamitos using the pulp water from that plant, the shooting being an incidental to reclamation from alkali conditions.

Stock Breeders' Page

Percherons at International Live Stock Show.

Wayne Dinsmore, secretary of the Percheron Society of America, has caused an analysis of the entries in the International Live Stock Show to be made, and finds that 430 separate Percherons have been entered, and virtually all of these will be shown. These 430 animals have been contributed by 54 separate exhibitors, who come from 15 different states. Illinois contributes the largest number, with 25 separate exhibitors in 205 entries; Indiana comes second, with 4 exhibitors, in 56 entries; Iowa comes third, with 6 exhibitors, in 54 entries; Ohio comes fourth, with 3 exhibitors, in 25 entries; and North Dakota, Virginia, and Nebraska come next in order. Six of the exhibitors, with 38 animals, come from east of Ohio, or eight per cent of the total number of entries. This is the largest number of entries from the East that the Percheron show at the International has ever had, and indicates the awakening interest which eastern farmers are manifesting in draft horse breeding.

By classes, it is interesting to note that in the stallions, 54 aged horses have been entered; 37 four-year-olds; 35 three-year-olds and 72 two-year-olds. Forty-eight yearling stallions have been entered, and 21 stallion foals, the largest entry in yearlings and foals that the International has ever seen.

In the mare classes 25 aged horses have been entered, 18 four-year-olds, 25 three-year-olds, 40 two-year-olds, 32 yearlings, and 13 foals; so that all classes are well filled and competition should be hot all along the line.

It is particularly interesting to note that the competition in the class for three animals, get of one sire, bred in the United States, will be stronger than in any previous show, as 38 separate groups have been entered in this one class. The honor of winning first in the class of get of sire is the most coveted honor in the entire show, and there is no question but that Percheron breeders will see a better show in this class than has ever been witnessed.

Cows That Are Little Gold Mines.

If any one doubts that dairying is a paying business where a good milking strain is handled, we would refer such a person to J. W. Benoit, a Modesto Holstein breeder and dairyman, who says his herd averages 70 pounds of milk daily and that at least one of his herd has just completed a record of 24.5 pounds of butter fat in seven days.

Estimating that the whole milk is sold at 16 cents per gallon, or two cents per pound, his 70-pound cows would average him $42 per month, or selling his butter fat from the one cow at 30 cents would yield him $105 in butter fat.

These figures look to be "dreams," but no doubt, with the strain of milkers Benoit owns it is possible. These milkers cannot be had for $100 per head, however, the price of an ordinary cow. If his estimates are correct, his cows are paying a good interest on $450 per head, after paying expenses of care and feed.

If all dairymen could milk cows producing such records as the ones owned by Mr. Benoit, some of our dairy stock owners would soon be keeping company with Charles Schwab and John D. Rockefeller.

Warning Given to California Dairymen.

"A good reputation creates a demand and a good demand creates prices," said E. H. Webster in an address given recently when he took for his subject "The Future of California Dairying."

"The dairying industry of California will not come into its own until the state establishes a reputation in outside markets," said Mr. Webster. "A good reputation creates a demand, and a good demand creates prices. The question is: What should the name 'California butter' mean in the outside markets? At present, whenever it is met with, which is seldom, it does not mean anything creditable to us, and sells as low-grade stuff.

"We had our chance two years ago when the Australian markets wanted our butter. We allowed unscrupulous men of the trade to take advantage of the opportunity to pawn off inferior products. Consequently, Australia is no longer open to our dairy products. Our ill reputation has spread to such an extent that at the present time, although England is on the market for all the dairy products she can get, California goods are not wanted. The markets want good goods, and until we give them what they want we shall never get their trade."

Stock Sheep at $10.50 per Head.

Jas. Gallagher Jr. sold 1500 head of stock sheep this week to L. G. Low of Berkeley. He received $10.50 per head, which is positively the highest price paid in this locality during the history of the sheep industry, although another local flock-owner had refused a similar price the previous week. The Gallagher sheep were a superior lot, being Merinos bred to Bishop Bros.' Shropshire bucks.—Livermore Herald, Nov. 18.

Fifteen animals from the University Farm at Davis have been shipped to Chicago to be shown in competition at the International Stock Show which opens December 5th.

How the Horse Sleeps.

Horses, when turned out to pasture, are more prone to take their rest lying down than when confined in stable stalls, but even when practically free from human restraint and observation, or any likelihood of danger, they seldom take more than an hour each night in the recumbent position, and that period is generally indulged in at about midnight.

A noted veterinarian says: "There are some curious facts regarding the disposition of horses in the matter of lying down. To a hard-working horse repose is almost as much of a necessity as food and water, but tired as he may be he is an animal very shy about lying down. I have known instances where stablemen declared that horses in their charge had never been known to take a rest in that manner, but always slept standing. In some of these instances the animals were constantly under human watchfulness night and day, and in other cases the conclusions were arrived at because no marks of the bedding were ever found upon their coats. I now recall an instance of a horse that stood in a stall near the entrance of a livery stable. No one ever saw that animal lying down within a period of 15 years, and he finally died standing."

Profits From Percheron Mares.

Mr. R. P. Waith, a Percheron breeder of Rock Island county, Illinois, writes as follows in the Breeder's Gazette of Nov. 16th:

"Since the importation of Percherons from France has been cut off by the war the trade in this country has developed even beyond the expectations of the most optimistic horsemen. This home demand has forced our dealers to comb the country for colts to supply the trade. These buyers have done much to arouse our small breeders to the fact that they must have well-developed colts if they are to sell at satisfactory prices. Many, seeing that they can sell their weanlings and yearlings at good figures, are making a mistake by feeding heavily without sufficient exercise. At the colt shows this fall one could see plenty of well-grown colts but altogether too many cocked ankles. Such colts have been kept standing too long in stalls. Plenty of feed is essential in making a good colt, but it will ruin the legs unless the animal is given enough exercise. We find that we can raise our colts much more satisfactorily by running them out of doors most of the time, except in very hot weather when the flies are troublesome.

Farmers who are reasonably good horsemen could double their incomes by using a pair or two of draft mares. Of course purebred mares cost more to begin with than grades, but the purebred colts sell so much more readily and at so much higher prices that the original cost of the purebred mare is soon met. We can sell weanlings out of our purebred mares that work every day for $300 and $400 and good yearlings for $500 and $600. I know of several farmers who own only a pair or two of purebred Percheron mares worth around $500 or $600 each, who are raising colts selling at weaning time for $200 and $300 a head. When colts can be raised and sold at such prices as that before they have eaten much grain, I can not understand why farmers continue to raise plug horses that will not bring more than $150 at maturity. Even if farmers would raise good grade draft colts bringing from $75 to $125 at weaning time, it would be a good deal more profitable than to raise the nondescript kind that many do. The raising of good draft horses is a profitable business.

Feeding Beet Pulp and Alfalfa on a Big Scale.

Visalia, Nov. 20.—Twelve thousand head of sheep, the first of 36,000 to be brought in from the ranges, have arrived in Visalia and will be quartered in the new feed sheds, holding 5,000 at a time, at the Visalia sugar factory, where the Western Meat Company of San Francisco is to undertake the biggest feeding experiment ever attempted in California, this fall. The sheep are from the Keck ranch north of town and have been gathered there from the west side ranges. A total of 36,000 sheep and many thousand cattle are to be fed at this factory this fall by the company, which is fattening them for the markets of San Francisco and Los Angeles.

The Western Meat Company has gathered at the factory already 3,000 tons of alfalfa hay, the largest stack of hay ever seen in Tulare county, all of which is being baled. The total output of beet pulp from the factory this year, about 12,000 tons, is to be fed with the hay to the stock, as well as other feed.

The meat company is at an enormous preliminary expense already. The hay is costing close to $8 per ton ,or about $24,000 alone; the beet pulp ran to $11,000 and over, and there are over 600,000 feet of lumber in the feed sheds, which, with the erection cost, complete an expenditure already of over $50,000. Hay is still being hauled in and more sheds are being built.

The company claims beet pulp has been proven successful as a fattener, as well as an economical one, but the Visalia experiment is the greatest recorded in the state, and upon it will depend the extension of the plan elsewhere in future years.

John C. Simpson, who as manager made such a success of the Iowa State Fair that he was given a similar position at a larger salary by the Minnesota State Fair Association, has been called to manage the Eastern State Fair and Exposition at Springfield, Massachusetts. He will take up his new duties January 1st.

Russian Army Horses.

Since Frank Caton, the American trainer, returned from Russia, where he spent more than twenty years and became that country's greatest trainer of trotters, he has been frequently interviewed. In one of his recent talks with a newspaper man at Lexington, Ky., he said:

"They use all types of native horses in the army, from the stoutly built Cossack, which stands about 15.2 hands and is a marvel of his kind, up to the horse of pure blood. The Cossack is bred in the mountains and is inured to hardship. They are fitting companions for the men who ride them. They can stop twice in their own length and drop at the word of command. No wonder they are making history in the present war.

"Two kinds of Orloffs are bred, the old-fashioned and the modern, which is a blending of our American and the Orloff types. Army remounts as a rule come from a union of the males of this family with mares which possess a lot of thoroughbred blood, but some experts are crossing English thoroughbreds on the native mares ,and they are getting animals of great power, endurance and courage. Each family, of course, has its own following, and the Imperial Government in order to determine which of the types would stand up best under a test had planned a race from Moscow to Petrograd. The distance is 406 miles and the road is hard macadam. Each team of six horses was to pull a gun carriage with full equipment, which included riders for the wheel team. They were to race all the way and it was to have been my privilege to have charge of the Metise or American-Orloff team. The other teams—the purebred Orloff and the thoroughbreds—were in competent hands, and we were in hard training when the war broke out. We had one test, however, which was conclusive and gave the thoroughbred family great prestige. A horse of that type weighing about 1300 pounds beat Percheron, Orloff and everything else in a drawing competition. Two ordinary horses could not start his load. After the war no doubt the road test will be undertaken, as the Russians are very thorough in what they undertake in the way of experiments."

How to Drag a Dirt Road.

Dirt roads that have never been graveled, or those that have been graveled in the past but neglected since, can be kept in pretty fair condition if dragged at the proper time. In California where rain is almost unknown during the summer months, dragging does no good when the roads are bone dry, but can accomplish much before and after sprinkling. In the fall roads that are so rounded up that the rain will drain from them into the gutters at the side, and that are not cut into deep ruts by heavily laden wagons, are in shape to remain in fair condition all winter, if a drag is run over them at the proper intervals. The rules for dragging dirt roads are as follows:

Use a light drag.

Haul it over the road at an angle so that a small amount of earth is pushed to the center of the road.

Drive the team at a walk.

Ride on the drag; do not walk.

Begin at one side of the road, returning up the opposite side.

Drag the road as soon after every rain as possible, but not when the mud is in such a condition as to stick to the drag.

Do not drag a dry road.

Drag whenever possible at all seasons of the year.

The width of traveled way to be maintained by the drag should be from 18 to 20 feet; first drag a little more than the width of a single wheel track, then gradually increase until desired width is obtained.

Always drag a little earth towards the center of the road until it is raised from 10 to 12 inches above the edges of the traveled way.

If the drag cuts too much, shorten the hitch.

The amount of earth that the drag will carry along can be very considerably controlled by the driver, according as he stands near the cutting end or away from it.

When the roads are first dragged after a very muddy spell the wagons should drive, if possible, to one side until the roadway has a chance to partially dry out.

The best results from dragging are obtained only by repeated application.

Remember that constant attention is necessary to maintain an earth road in its best condition.

The foremost Scotch breeder of Shorthorns, William Duthie, disposes of his calf crop at public vendue. At his recent sale this year's crop brought the comfortable sum of $81,847. For twenty-three bull calves the average price was almost $3000, one selling for about $11,000, which is a record for a bull under six months of age. Fifteen heifer calves averaged $875. There is only one Shorthorn breeder in all the world who is able to obtain such prices for a calf crop. How much is it worth then to have a good reputation? ◈ ◈ ◈

The Thoroughbred Sheep Company of Vernal, Utah, has disposed of its entire band of 2,300 registered sheep to Snell Johnson and Joseph A. McKee at $12.50 the head. These sheep cost over twenty dollars a head when the company was organized and high priced herd rams have been added regularly, so it seems that the sale has been a sacrifice sale on the part of the company. Included in the bunch were 125 head of yearling rams, that have been sold for $25 a head since closing the deal.

THE FARM

Organic matter is decaying vegetable or animal matter. It may be added to the soil in the form of barnyard manure, in compost made of autumn leaves, plants and garden refuse, or in turning under crops, like rye or crimson clover, that have been grown for this purpose. If the barnyard manure is well rotted, it may be harrowed in after the soil is plowed. If it is fresh and coarse, it is better to plow or spade it under. Fresh manure introduces weed seeds into the soil; for this reason it is not the most desirable form to use. To prevent crops of rye or crimson clover consuming moisture needed by the vegetables, they should be plowed under and harrowed in before they mature. If plowed under while green, they will not be retarded, since organic matter decays rapidly, and additional quantities should be supplied each year.

Treat Horse Right.—You can force a horse to pull against a raw shoulder, but he won't pull so hard, and you will work pretty hard to keep him pulling. Then that night he will feel mean and break another horse by kicking. Anyway you look at it you lose when you don't treat your work stock right.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Turn Your Hand Trap Stunts Into Dollars

TELL us your "stunts" with the Hand Trap at camp, picnic parties, aboard motor craft, in the woods and fields, at the shooting club's joker trap, or any place where the Hand Trap has given amusement, instruction and experience to yourself and friends.

We Will Pay Cash for Illustrated Stories

For the best descriptive story of the most novel and practical Hand Trap experience accompanied by at least three group photographs of actions described, (containing more than one person) we will pay a first prize of $15.00; a second prize of $10.00; two prizes of $7.50; five prizes of $5.00 each; FIFTEEN PRIZES of $2.50 in CASH.

ALL STORIES AND PICTURES MUST BE SENT BEFORE DECEMBER 1, 1916

For desirable pictures, (publication rights released to us) accompanying stories not accepted, we will pay ONE DOLLAR on receipt of film.

IF YOU HAVEN'T A HAND TRAP RENT ONE OF YOUR DEALER when you buy your shells and targets.

Get your ideas "rounded-up,"—plan your exposures and let your camera earn a few dollars.

No restrictions as to age or sex of contestants or number of stories and photographic groups submitted, but prefer stories not over 600 words.

Get a copy of DU PONT HAND TRAP BOOKLET,—reading what has been done may give you the "hunch" that gets the bunch of money we're going to pay. Write for your copy today.

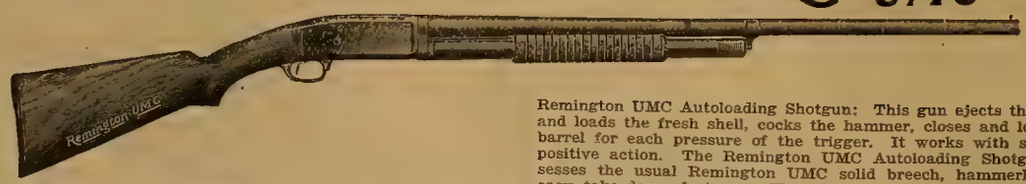
WINCHESTER

"LEADER" AND "REPEATER" SHELLS



For the high flyers and the low flyers Winchester "Leader" and "Repeater" shells have the reach, pattern and penetration. Their patented construction and uniform loading make them by far the best shells on the market. In proof of this we point to their unequalled winnings at the traps this year, including the Grand American Handicap. Such shells insure a good bag in the field. Get a box or two for your next day a-hunting and try them out for yourself.

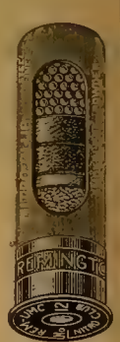
THE W BRAND WILL IMPROVE YOUR SHOOTING.

REMINGTON UMC

Critical Sportsmen Choose Remington UMC

REMINGTON UMC

Every day thousands of sportsmen, critical in their selection of firearms, are proving the superiority of Remington UMC Pump and Autoloading Shotguns at the traps and in the field. The perfect balance, easy operation and positive action of these famous guns have popularized them among the men who are in a position to speak from long and varied experience.



Remington UMC Pump Gun: The bottom ejection principle—an exclusive Remington UMC feature—contributes to safety, accuracy and convenience. Ejected shells are kept away from the face of the shooter and from interfering with his aim. The solid breech, hammerless and easy take-down features combine to make the Remington UMC Pump Gun a favorite sporting arm. The magazine holds six shells.

Remington UMC Autoloading Shotgun: This gun ejects the empty and loads the fresh shell, cocks the hammer, closes and locks the barrel for each pressure of the trigger. It works with sure and positive action. The Remington UMC Autoloading Shotgun possesses the usual Remington UMC solid breech, hammerless and easy take-down features. The magazine holds five shells. You press the trigger once for each shot.

A great majority of the champion shots of the country shoot either a Remington UMC shotgun or Remington UMC "Speed Shells" or both. The men who are jealous of their shooting records — many of them among the crack shots of the sporting world—rely upon Remington UMC to do full justice to their shooting skill. The dependability of Remington UMC shotguns and "Speed Shells" — Arrow and Nitro Club — makes Remington UMC a by-word among the sportsmen who **know.**

Look for the Sportsmen's Headquarters Sign of Remington UMC on your dealer's store.

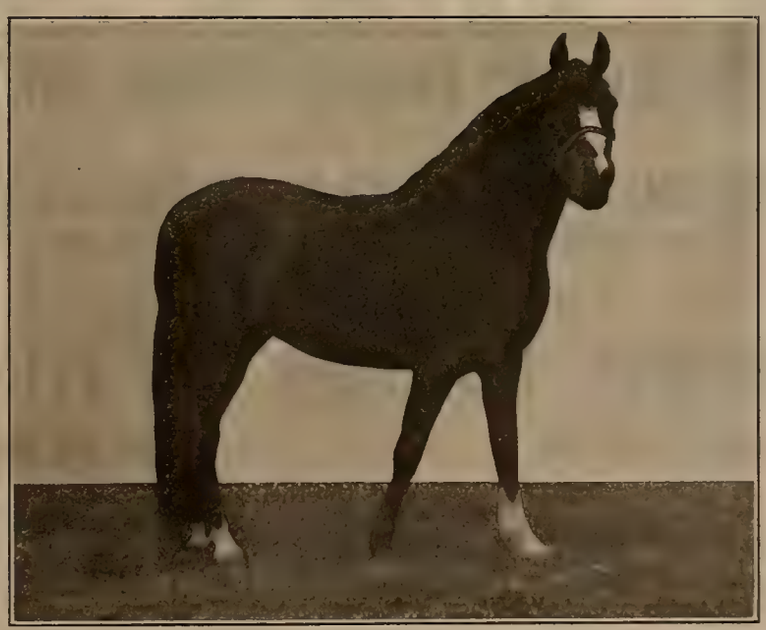
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

ANNOUNCEMENT

TO

OWNERS AND BREEDERS OF LIVE STOCK

THE HARTFORD LIVE STOCK INSURANCE

The Hartford Fire Insurance Company and the Hartford Accident and Indemnity Company of Hartford, Conn., the "Two Hartfords," have established a Pacific Department with offices at 438 California St., San Francisco, California; thereby being in a position to write insurance covering owners and breeders in the event of loss arising from the

Death of Live Stock FROM ANY CAUSE

The "TWO HARTFORDS" Have
RESOURCES EXCEEDING $30,000,000

and are prepared to offer to owners and breeders of live stock facilities which have never been hitherto approached in the business of live stock insurance.

The "TWO HARTFORDS" will be able to issue policies for amounts adequate to protect the interests of the owners of valuable stock.

Your patronage is solicited and communications bearing upon any phase of live stock business will have prompt attention.

The "TWO HARTFORDS"

offer the LARGEST ASSETS, UNSURPASSED SERVICE and UNEQUALED REPUTATION.

Address all inquiries to

ROLAND C. DRAKE, Asst. Gen. Agent,
PACIFIC LIVESTOCK DEPARTMENT, HARTFORD FIRE INSURANCE COMPANY,
438 California Street, San Francisco, Cal.

$2,500 GUARANTEED ONLY $2 TO NOMINATE MARE GUARANTEED $2,500

Pacific Breeders Futurity Stakes No. 17

TO BE GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

For Foals of Mares Covered in 1916 to Trot and Pace at Three Years Old

ENTRIES CLOSE:

MONDAY, DECEMBER 4th, 1916

$1,500 FOR THREE-YEAR-OLD TROTTERS. $1,000 FOR THREE-YEAR-OLD PACERS

CONDITIONS:

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 4, 1916; when name, color, description of mare and stallion bred to must be given; $5 April 1, 1917; $10 on Yearlings April 1, 1918; $10 on Two-Year-Olds April 1, 1919; $10 on Three-Year-Olds April 1, 1920.

STARTING PAYMENTS—$35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before April 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1916.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payments forfeits all previous payments. This Association is liable for $2500, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horse, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THIS IS THE LAST CALL for nominations to Stake No. 17, Pacific Breeders' Futurity, the value of which is guaranteed by the Pacific Coast Trotting Horse Breeders' Association to be worth $2500, and if more money is paid into the stake than that amount all will go to the different money winners. The recent eastern sales have given proof positive that the horses that bring the most money and attract the liveliest bidding are colts and fillies that are staked. Harness racing is increasing in popularity from one end of the country to the other, and the same is true in Australasia and war stricken Europe. It is the well engaged youngsters that the public wants. This being the case every owner of a mare that was mated with a trotting bred stallion this year, should see that the expectant colt will have an opportunity to start in some of the stake races. The small sum of $2 will nominate your mare in this stake and the owner who fails to make one or more nominations will not be acting for his own best interests. Every mail that comes from across the mountains brings news of an increased interest in harness horse breeding and racing. The Old Glory Sale shows that horse values are rising and there is no question but California is on the eve of a similar increase in interest. Within the next two years a California Circuit will be permanently organized and the colts that are eligible to start in the stake races of 1918 and succeeding years will be sought after by many buyers. They are not going to be very numerous, as the number of nominations have fallen off greatly in the last year or two, but they will increase from now on. When Stake No. 16, which closed with but 71 nominations, is raced in 1918 and 1919, there will be very many breeders regretting their failure to nominate in it, and while Stake No. 17, which closes for nominations on Monday next, is raced in 1920, a like chorus of regrets will be heard unless the breeders and owners rise to the occasion next Monday and send in a much larger list than they did last year. You fellows who went to Sunday School when you were kids, may remember the story of those foolish girlies who could not light their lamps when the bridegroom came. They had forgotten the first lesson in preparedness and all who own mares bred in 1916 who do not nominate them in Stake No. 17 next Monday will be in the same state of unpreparedness when their colts and fillies foaled in 1917 begin to show miles in 1920 that are fast enough to win money in the stakes in which they will not be eligible to start.

THE DEMAND FOR COLTS at the recent Old Glory Sale has caused expressions of surprise from those who have not kept themselves informed as to the trend of harness horse matters, but to those who have noted the increase in interest in harness racing the demand for youngsters is only what they have been predicting. The Herald, which keeps a closer tab on horse matters than any other of the New York dailies, has the following to say in this regard: "Signs of the times were unmistakable in the Garden sale last week that harness racing is fast coming to about the same basis as running racing. Nearly all the high prices were paid for undeveloped young trotters, as distinguished from "made" campaigners and mature racing prospects, such as brought the top prices only a few years ago. Colt races are now the thing, and unbroken weanlings and yearlings command better prices than older horses. The average of $716 for twenty-nine weanlings by The Harvester 2:01 is the market record, and so is the top price of $3,025 for the weanling colt by Peter Volo 2:02, showing that the youngsters are in great demand. Training stables in the vicinity of New York will be full of two-year-olds and three-year-olds next season, according to all indications, and it is rather surprising that the four associations which recently announced their programs for the summer meetings in Orange county put on only one race for two-year-olds and one for three-year-olds. The colt races were the feature of these meetings in 1915, and the flood of entries indicated that two classes instead of one could be filled at each track in the circuit. Plenty of horsemen expect to see such races dominate the harness racing programs a few years hence, as they do now on the running tracks. It is a matter of economics, they say. Now that the trotting horse has been driven off the roads and is fast becoming a racing machine, pure and simple, it behooves the breeder and the owner to make use of his racing qualities as early as possible, and to save the heavy expense of keeping him until mature."

THE OLD GLORY SALE has long been known as the barometer of the trotting horse industry, and it will cheer the breeders and owners of trotting stock in California to read the account of this sale in the Breeder and Sportsman this week. It is by far the best sale held in the Garden in ten years and there were not enough youngsters offered to supply the demand. The lesson of the sale is, give the colts and fillies plenty of stake engagements and offer them for sale before money has been spent on their development. This advice applies to those breeders who do not care to train and race their colts. There are hundreds of men who enjoy owning and racing a trotter who do not own farms and who therefore do not desire to be bothered with pasture bills, stallion fees, etc. They are willing to pay a fair price for a colt that has engagements and is ready to be trained for them. When the colt is sold before money has been expended for training expenses he is very liable to bring a higher profit to his breeder than he ever will again unless he turns out to be a champion or near champion, which of course is the exception.

THE NORTH PACIFIC IS AWAKE.

About $60,000 is to be Offered for Trotters and Pacers on That Circuit.

The 16th annual meeting of the North Pacific Fair Association has been called for Portland, December 6-7, at the Imperial Hotel.

The meeting usually held in February was set for the earlier date this year as an experiment, the claim being that an earlier announcement of the stakes and purses to be offered by the North Pacific tracks in 1917 will bring a larger number of entries.

There will be a two-day session and a busy one. "There are a number of important matters to be discussed this year," said Secretary John W. Pace.

"The North Pacific tracks offer about $60,000 this year for harness racing alone. There are a number of new tracks, and it is quite likely that two circuits will be announced for 1917.

"One will comprise the larger fairs, such as the State Fairs, Spokane, etc., which offer $1000 per day and over in harness events. A minor circuit will probably be arranged for the smaller fairs and tracks.

"There are now 30 fairs in the Pacific Northwest which have racing as an attraction, and about 20 exhibitions and livestock shows which come outside of the racing season. There will be eight weeks of autumn racing, and the spring or summer meets that may be arranged.

"In addition to the matter of racing, this association fixes dates, strives for uniformity in exhibit classifications, and helps the individual fair managers in the matter of amusements and attractions."

The membership of the North Pacific Fair Association covers Washington, Idaho, Montana and British Columbia. The coming meeting is on the occasion of the Pacific International Livestock Exposition, at which the exhibiting breeders of the Northwest will be present, and a joint conference between them and the fair managers regarding classes, shipping facilities, dates and classifications will be held.

The officers of the association are: Frank Meredith, Washington State Fair, president; Thomas S. Griffith, Spokane Interstate Fair, vice-president, and John W. Pace, Seattle, secretary-treasurer.

Lee Axworthy 1:58¼, champion stallion trotter, may be trained again and given a chance to make a further reduction in his record, and it is also reported in the Horse Review that $50,100 was recently refused for him.

The Review says: "The re-election of former Governor James Cox in Ohio was pleasing news to horsemen of that State, as he is supporter of harness horse interests.

PHOENIX OFFICIAL SUMMARIES.

The following are the complete and official summaries of the races held during the Arizona State Fair at Phoenix, November 14th to 17th inclusive. It will be noticed that there are a good many changes from the summaries as given out by the press reports heretofore published:

Phoenix, Ariz. (mile track; three-heat plan). November 14.—Three-year-old trot (two heats); purse $500:

SATISFIED USERS EVERYWHERE.

Winning drivers and trainers make capital use of Absorbine; they know its value in developing first class race horses and getting them to the races fit and ready, keeping them strong through the season. They use Absorbine because they require a good liniment that is effective and does its work in a mild, soothing manner without blistering or laying up the horse.

Mr. H. E. Valentine of North Haven, Conn., after using Absorbine on his horses writes: "I have used Absorbine several years with great success. I would not be without it. Three years ago I had charge of a large contractor's stable. One of the horses had a large swelling come just below the knee. The proprietor called the state veterinary and he said the animal had a spavin coming. I sent to our dealer for some Absorbine and had it applied freely and often. The result was that in three weeks the swelling had gone and did not appear again and the horse was as good as ever."

ABSORBINE, $2.00 a bottle at druggists or postpaid.
W. F. YOUNG, P.D.F., 54 Temple St., Springfield, Mass.

The many friends of D. F. Herspring, the well known horseman of Woodland, will sympathize with him in the death of his aged father which occurred in Oakland on Tuesday of this week. Mr. Herspring was 84 years of age and was a pioneer of this State.

FAMILY HONORS MAY PASS ON.

Peter the Great Tribe Due to Be Deposed by Moko's in 1917.

[By Henry Ten Eyck White.]

Right now it looks as though the scepter among the three-year-old trotters is certain, in 1917, to pass from the Peter the Great tribe, where it has been held with remarkable uniformity for the last six years. What strain will grasp the emblem of authority may not be accurately foretold, but present indications strongly favor the house of Moko.

It was in 1903 that the first of the get of Peter the Great won the three-year-old division of the Kentucky Futurity—the classic among colt stakes. The victor was Sadie Mac, unbeaten that season, and her best mile was 2:11¼. Since then four others of the "Peter" family have attained the honor, they being Grace 2:08 in 1910, Peter Thompson 2:07½ in 1911, Peter Volo 2:03½ in 1914 and Volga 2:04½ in 1916. But the outlook for a three-year-old champion from the Peter tribe next year is a bleak one, since among the six two-year-old trotters of the present season that took records of 2:10 or better not one is by Peter the Great.

Here is a list of the most phenomenal lot of two-year-olds ever out in one season, with their records and sires:

Name and Sire.	Record.
The Real Lady (Moko)	2:04¼
Emma Magowan (J. M. Forbes)	2:07½
Harvest Gale (The Harvester)	2:07¾
Tacita (Atlantic Express)	2:07¾
Buck Watts (Gen. Watts)	2:09½
Miss Bertha Dillon (Dillon Axworthy)	2:10

Strictly speaking, Mary Coburn, by Manrico, should be added to this list, as although her record is 2:10¼, it was made in a winning race, while those of Tacita, Buck Watts and Miss Bertha Dillon were obtained in trials against the watch—which means that a good day and track were selected for the effort, a flying start had, and the pole hugged all the way. On form The Real Lady looks to have as much of a mortgage on the three-year-old stakes as Peter Volo and Volga had in 1913 and 1915 after their two-year-old campaigns in which neither lost a race and each marked up a champion's record. The Real Lady has done the same thing—and more, since her two-year-old record is 2:04¼, as compared with 2:04½ by Peter Volo at that age and 2:07¾ by Volga.

The total score for the last fourteen years in the three-year-old Kentucky Futurity is: Peter the Great, five; Moko, two, and no other sire more than one. In the matter of male line descent these fourteen winners figure thus: George Wilkes, seven; Peter the Great, five, and Electioneer, two. The "Peters," technically considered, should be credited to the Happy Medium family, but that strain never compared in importance with that of Wilkes or Electioneer, although all three stallions were sons of Rysdyk's Hambletonian.

Of course, it is possible some now unknown two-year-old by Peter the Great may come out in 1917 and win the stakes for three-year-olds, just as Mary Putney, 2:24¼ at two, never lost a race at three and lowered the mark for fillies of that age to 2:05½, but any aspiring colt making a bid in the 1917 stakes for three-year-olds will have a much harder row to hoe than ever was assigned any other young trotter, as such a horse would have six opponents to overcome whose records at two ranged from 2:04¼ to 2:10, with Mary Coburn 2:10¼, a proven racehorse, added for good measure. And even if The Real Lady should by accident or otherwise be incapacitated from starting at three, another perfectly wonderful two-year-old would be encountered in Emma Magowan, which won a race in 2:07½, 2:07¾ with consummate ease, and on another occasion stepped half a mile in a minute.

Of the seven two-year-olds of supreme class noted in the foregoing four trace in the male line to George Wilkes, they being The Real Lady, Buck Watts, Miss Bertha Dillon and Mary Coburn, the last named by Manrico, himself a Kentucky futurity winner and a son of Moko, sire of The Real Lady. Of the "tin cuppers," all of whom I saw take their records, I rate Tacita much the best, as her mile was done in workmanlike fashion all the way, and at the finish she was putting every foot down in the right place. Buck Watts in his trial trotted the first half in 1:02¾ and then couldn't come home with much steam, the last half being 1:06¾. He is a very flashy going colt, but when I saw him pitted against other horses a few days after his time trial he was jumpy and easily beaten, despite his extreme speed. Miss Bertha Dillon broke just before her mile was ended and went under the wire on a run.

These three outsiders, so to speak, are however, superbly bred, the sire of each being a stake winner in colthood. Atlantic Express, sire of Tacita, was a consistent race horse at three and took a record of 2:07¾. General Watts, sire of Buck Watts, won the Kentucky futurity at three and set a new record, 2:09¾, for that age. Dillon Axworthy, sire of Miss Bertha Dillon, was the best two-year-old of his day, his mark being 2:11½. The dam of Miss Bertha Dillon is Bertha C., 2:10¼ at three, a heat winner in the Kentucky futurity that year. The dam of Buck Watts is not noted as a performer, but The Huntress, dam of Tacita, also is the dam of Margaret Druien 2:07, which gives her high standing, and as she is by Onward Silver 2:05¼ and out of a great producing mare, Tacita's credentials are extra good. The filly was sick and did not recover sufficiently to be started in the stakes, where two or three heats were sure to be asked of her, so merely was fitted for a time trial, where one heat would suffice, and there need be no scoring.

Barring sickness, The Real Lady should follow in the footsteps of Peter Volo, Volga and Sadie Mac by winning all her starts as a three-year-old. She "has everything," horsemen say, and in speed not even Emma Magowan with her half-mile in a minute is entitled to class with the Moko filly, whose mile in 2:04¼ stands for a lot more than a half-mile in a minute. Furthermore, The Real Lady has for trainer and driver Tom Murphy, who has five times driven two-year-olds to world's championship miles. Saying Murphy is a wizard with colts does not fully express the quality of his work. In the case of The Real Lady and Native Belle he selected those fillies before ever they had worn a harness, and their preparation and education, from "ground breaking" to miles much faster than any trotter of their age had shown, was his personal, daily work. Native Belle beat the best two-year-old record of her day three seconds, and The Real Lady overcame what was considered an unbeatable handicap when she displaced the 2:04½ of Peter Volo with a 2:04¼ mile, because Peter Volo, a giant in stature for his age, a Hercules in strength and courage, was universally considered by horsemen a freak of nature, and when his two-year-old mark of 2:04½ was put in the books nobody believed it ever would be beaten.

When it is considered that The Real Lady's two-year-old mark is only three-quarters of a second slower then the best for three-year-olds—2:03½—some idea of what, with natural improvement, she will be capable of as a three-year-old is had. Peter Volo, the only colt trotter with which she can be compared, improved one second from his two to his three-year-old form. If The Real Lady does only that well her mark a year from now will be 2:03¼. No other two-year-old of the present season, save Emma Magowan, is to be mentioned in the same breath with the Moko filly, and while Emma Magowan was comfortable at the end of a mile in 2:07½, and came back in 2:07¾, indicating she was, everything favorable, probably a 2:06 filly, those figures do not mean anything when stacked up against a second heat in a race in 2:04¼.—[Horse Journal.

Fair Board to Seek $920,000.

At a session of the directors of the State Agricultural Society last Saturday, tentative plans were submitted for examination by the state architect's office providing for the erection of substantial new buildings and improvements to cost in the aggregate well towards one million dollars. The plans were presented and explained in detail by State Architect George B. McDougall and A. R. Widdowson, and if given the final approval of the board at its next meeting in December the legislature will be asked to provide for the new structures which are deemed absolutely essential for the present needs and scope of the association.

A main agricultural pavilion, to take the place of the one recently destroyed by fire, will be the most important structure in the group of buildings contemplated. It was agreed that it should not be less than 150 by 500 feet and of the best fireproof construction throughout. The estimated cost, with galleries, will be approximately $350,000.

Other improvements under consideration are figured as follows. Educational pavilion to house university and school exhibits., $60,000; grandstand $185,000; extension to manufacturers' building, $40,000; extension to machinery hall, $40,000; coliseum, for night horse shows, lectures, etc., $100,000; stock barns, new roads, beautification of grounds, etc., $85,000; additional land, $60,000, making a grand total of $920,000. All buildings will be fireproof.

A small appropriation in addition is needed in order that the grounds may be kept open to eastern visitors throughout the year. If this is secured, exhibits would be maintained at all times by a number of counties.

Representatives of the citizens' state fair committee and the state fair legislature committee of the Sacramento Chamber of Commerce, appeared at the session with options taken on several tracts of land adjoining the fair grounds. They assured the board of their assistance and support in every possible way.

The proposition of cutting down the race track to one-half mile was discussed. If this plan is adopted much less additional land will be required. State Architect McDougall advocated this scheme and it was pointed out by some of the directors that other state fair grounds, notably Texas and New York, have adopted half mile tracks.

The members of the State Agricultural Board present were: John Perry, C. J. Chenu, F. H. Dudley, E. J. Delorey, E. Franklin, T. Geir, E. F. Mitchell and B. F. Rush. The committees of the Chamber of Commerce were represented by Fred Martin, R. M. Richardson, Ed Yardley, J. L. Tucker, S. W. Russell, Joe Huntoon, C. B. Bills, F. W. Breen, E. M. Sheehan, John T. Skelton and C. C. Hughes.

It is said that there were ninety-nine fairs held in Iowa this year that received State aid, a total of $56,000 being distributed among them, no association receiving more than $800.

Tommy Murphy is wintering close to 100 horses at his Poughkeepsie headquarters.

U. S. ARMY HORSES.

A pamphlet entitled "Specifications for Horses and Mules," issued by the office of the Quartermaster General of the United States Army, gives the following general description for horses:

"Head—Small and well set on neck; with ears small, thin, neat, and erect; forehead broad and full; eyes large, prominent and mild, with well-developed brow and fine eyelid; vision perfect in every respect; muzzle small and fine; mouth deep; lips thin and firmly compressed; nostrils large and fine; and branches of underjaw (adjoining neck) wide apart.

"Neck—Light, moderately long, and tapering toward the head, with crest firm and longer than under side; mane and forelock fine and intact.

"Withers—Elevated, not unduly fine, well developed and muscled.

"Shoulders—Long, oblique and well muscled.

"Chest—Full, very deep, moderately broad, and plump in front.

"Forelegs—Vertical as viewed from front and side and properly placed; with elbow large, long, prominent and clear of chest; forearm large at the elbow, long and heavily muscled.

"Knees—Neatly outlined, large, prominent, wide in front, well situated and well directed.

"Back—Short, straight, and well muscled.

"Loins—Broad, straight, very short, and muscular.

"Barrel—Large, increasing in size toward flanks, with ribs well arched and definitely separated.

"Hindquarters—Wide, thick, very long, full, heavily muscled, rounded externally and well directed.

"Stifle—Well defined, prominent and well supported by muscles of that region.

"Hocks—Neatly outlined, lean, large, wide from front to rear, well situated, and well directed.

"Limbs—From knees and hocks downward vertical, short, flat, wide laterally, with tendons and ligaments standing well out from bone and distinctly defined.

"Pastern—Strong, medium length, not too oblique and well directed.

"Feet—Medium in size, circular in shape, sound; with horn smooth and of fine texture; sole moderately concave, and frog well developed, sound, firm, large, elastic, and healthy.

"Each horse will be subjected to a rigid inspection and any animal that does not meet with the above requirements should be rejected. No white or gray horses will be accepted."

Merced May Have a Race Track.

There is some talk at Merced, where a successful fair was held this year, of building a track so that racing may be held in connection with a fair next year. Mr. R. P. Covert, the well known wood and coal merchant of that city, has offered to guarantee the building of a track, if the association will get a five-year lease on a piece of land on which to build it and agree to keep the track up during that time. Mr. Covert suggested a half mile track, but the association favors a mile track. The Breeder and Sportsman would suggest that a half mile track be built first, and if the fairs and race meetings continue to be so popular at the end of five years that a mile track will be demanded, it will not be difficult to secure additional land and construct the mile oval. A majority of the big fairs held in the eastern and middle western States have half mile tracks and there is no doubt but the public prefers them. Here in California, where the long dry summers make the watering and working of a track very expensive, a half mile track will be found much more economical than a mile oval. Regulation half mile tracks that are wide and have the turns well thrown up are popular with horsemen as well as the public.

Saddle Horses Bring Good Average.

S. T. Harbison & Co. of Lexington sold a carload of Kentucky saddle horses by auction at Durland's Riding Academy in New York Thursday evening of last week, in the presence of a large company of equestrians, horse show exhibitors and dealers.

The Picket, a fine looking, high styled, true going chestnut gelding, catalogued as "a prospective champion," topped the sale, J. E. Stevenson having paid $1,650 for him to show next season. John Hays Hammond was among the buyers. He paid $340 for Likely, a handsome bay mare 15.3 hands high.

Bingen Chief, a registered bay saddle bred gelding of attractive paces and peacock style, went for $725 to Martin J. Aylward. John Spratley bought No Mistake, a five gaited brown gelding 15.2 hands, for $380. Typesetter, a show prospect 15.1 hands, was struck off to Mr. Aylward for $650. Latonia, at $530, looked like a bargain in five gaited saddle horses for S. Rosenbaum, to whom he was sold. Range Finder, a three-quarter bred horse of the hunter type, was purchased by John C. Sparks for $700. The average for twenty head was about $425.

Gen. I. R. Sherwood, for a number of years owner and editor of The American Sportsman, was again chosen to represent his Ohio district in Congress at the last election. Though a Democrat and living in a locality strongly Republican, the General is honored regularly by the voters of his district.

◈ ◈ ◈

A $2,500 free-for-all pace will feature the program of the second meeting at Youngstown, Ohio, next summer.

BIG DEMAND AT OLD GLORY SALE.

Record Prices for Weanlings and Big Average for Entire Week.

Lively bidding, high average prices and brisk demand featured the opening day of the Old Glory sale at Madison Square Garden, while the attendance throughout the day and evening was a record for a first day. The morning and afternoon session was taken up by the consignment of Allen Farm horses, about 118 head being sold before the recess for dinner.

The top price for the consignment for the day was $5,200, at which the famous young trotting speed sire Bingara was sold, the final bid being made by E. J. Tranter of New York. The price caused some disappointment to horsemen present, some of whom had expected the price to go as high as $15,000, while many would have given odds that he would bring $8,000 or over.

Bertini and Todd Swift, the other stallions, were sold respectively at $1,000 and $375, which caused more disappointment than the price received for Bingara. The first horse to sell over $1,000 was Bertron, a three-year-old by Bertini, the successful bidder being Trainer Fred Jamison, who stated that the purchase was made for one of his patrons, Dr. W. H. Buechner of Youngstown, Ohio. The next highest price was $1,300, which H. G. Winnings of Indianapolis paid for the 11-year-old mare Ban, by Bingara ,the purchase being made for S. A. Fletcher of that city and owner of Peter the Great.

For a yearling bay filly by Bingara, "George Grant, New York," paid $1,050, and also bought several others at good prices, but his real identity is not known except that the purchases were made for a prominent horseman whose name was withheld from publication. For $865, "C. Coyne of Albany" bought the six-year-old mare Belzona 2:10½. This unidentified purchaser also bought several and, like Grant, paid some of the best prices received for the consignment.

Another unidentified that figured in the bidding and bought several was a John Smith, New York. Walter Cox bought two yearlings, both by Bingara, paying $625 and $300, while Frank Dohrman of Pittsburg secured two highly bred mares to add to the breeding stock of his Aarnold Farm. A total of 118 head were sold from the Allen Farm consignment for $35,365, or an average of a shade over $300 per head.

The first day's sale fully demonstrated that the demand is for properly bred and promising looking youngsters, while the general prices received for all kinds insured good prices for the entire consignments.

For a first day of any Old Glory Sale, the gathering of horsemen, breeders and especially trainers was unusually large and representative, many States being represented, and a great majority of them have planned to spend the whole week in New York, because of the special daily features for the entire sale.

Weanlings Average $716 on Tuesday.

Horsemen who thought it looked blue for breeders of trotters when the great sire Bingara was struck off for $5,200 at the opening of the Fasig-Tipton Company's "Old Glory" sale on Monday were all smiles Tuesday after the twenty-nine weanlings by The Harvester 2:01, from C. K. G. Billings' Virginia stud farm were disposed of. The colts and fillies, which were from six to eight months old, came into the ring scarcely halter broken. They were not led faster than a walk, but were sold on their appearance and their pedigrees without moving out of their tracks.

Prices ranged from $225 to $1,900, and the average for the lot was $716. This is more than twice as much as Mr. Billings received last year for foals from the same sire and dams and more than any other lot of trotting bred weanlings ever brought under the hammer. The average last year was about $333.

A. H. Cosden, owner of the champion two-year-old trotter The Real Lady 2:04¼, bought four of the fillies for Thomas W. Murphy to train next season. For the filly out of Bernice R. 2:06¼ he paid $1,500; for the one out of Zarrine 2:07¼, $1,000; for another out of the Kentucky Futurity winner, Baroness Virginia 2:08¼, $800, and for the one out of Kingston Belle 2:10¾, $650.

Frank Caton, who gave his address as Moscow, purchased four for export to Russia. Richard Delafield, of Brook Farm, with an eye on the races for two-year-olds in the Orange county circuit next season, selected two royally bred ones. Other buyers were William Crawford, of Glen Lea Farm; Andrew W. Smith, of New York, and David Tod, of Youngstown, Ohio. Harvest Dawn, the highest priced one, went to W. J. Thubron of Pittsburg, who bought her for Frank A. Dohrman. Besides the youngsters by The Harvester Mr. Billings sold four others, one of which, a five-year-old pacing gelding, called Ben Billings 2:07 by Bingen 2:06¼ out of Lou Dillon 1:58½, was purchased for $3,700 by Fred Jamison, of Arden, Pa., who trained Wilkes Brewer 2:08¼ last season.

Californians will be particularly interested in the prices received at the Old Glory Sale for the weanlings from Mr. Billings' Curles Neck Farm whose dams are of California breeding or trace to mares from this State.

The brown colt Harvest Lord, foaled April 16th, 1916, by The Harvester 2:01, dam Berta Mac 2:08 by McKinney, brought $600, and was bought by C. E. Dean, of Palatine, Ill.

The bay filly Harvest Pride brought $1500. She was foaled March 4th, 1916, and is by The Harvester out of Bernice R. 2:07¼ by Dexter Prince. A. H. Cosden was the buyer.

Harvest Gold was purchased by James Snell of Lexington, Kentucky. She is by The Harvester out of Adioo Dillon by Sidney Dillon, was foaled April 18th, 1916, and Mr. Snell paid $600 for her.

Harvest Sprite was a royally bred one, as she was by The Harvester out of a sister to Lou Billings 2:08¾ by John A. McKerron 2:04½, second dam Lou Dillon 1:58½. Mr. A. W. Smith bid $700 for her and became her owner.

$600 was the high bid made by Frank Caton for Harvest Lady, foaled April 6th, 1916, by The Harvester out of Ethel Toddington, the young mare that Dick Wilson had at Pleasanton five years ago when she was a yearling. Harvest Lady will go to Russia.

Liuba, a bay filly foaled May 21st, 1916, by the Russian Orloff stallion Bion, dam Lou Billings 2:08¾ by John A. McKerron, second dam Lou Dillon 1:58½, brought but $200, and she was bought by Frank Caton who will send her to Russia where her breeding will be more popular than it is here.

E. J. Tranter, who bought Bingara Monday, sold him to John Kleckner, of Philadelphia, for $6,000 on Tuesday.

Wednesday Sees Highest Average in Eleven Years.

In point of high price, total amount and general average for one day, the Old Glory auction of trotting horses on Wednesday made the best record for one day during the past eleven years.

Guy Axworthy, consigned by the Hudson River Stock Farm, Poughkeepsie, sold at $20,000, the highest price paid for a horse at auction since 1907, when Todd sold for $30,000, and in 1906, when Axworthy was bought by William Simpson for $21,000.

The consignment from Poughkeepsie contained sixty-two head of stallions, mares and youngsters, and sold for a total of $49,905, or an average of $805 per head. Whether this general total and average per head for a consignment of sixty-two horses has ever before been equaled in the history of the Old Glory, neither the sale management nor old-time horsemen could recollect.

The bidding on Guy Axworthy started at $5,000. Up to $13,000 the contenders were Walter Cox, acting for Walnut Hall Farm, and standing between Harry Harkness and Manager Burgone, William Hudson, acting for Louis Titus, owner of Stony Farm, and another Orange county horseman, W. K. Dickerson. A fourth bidder stepped in who proved to be Leo Ottinger, half owner of the stallion, and whose last bid was $17,000. At $500 bids up to $20,000, the bidders were Mr. Dickerson and Cox, the latter getting the horse.

Only two years ago Guy Axworthy was bought by the Lexington trainer, Hunter C. Moody, for $2,100 from the consignment of Senator Bailey at the Garden, and the next day he sold him to Jacob Ruppert at an advance sale of $400, the purchase being made in partnership with Oettinger Bros. His price Wednesday was due to the fame the horse has gained since, as the sire of the champion Lee Axworthy 1:58¼, and others.

$3,025 for a Seven-Months-Old.

Although high prices were paid for weanlings from Curls Neck Farm on Tuesday yet the figures went higher Wednesday, when Walter Cox paid the world's record sum of $3,025 for a seven-month old brown colt by Peter Volo, dam Sapphire Worthy by Axworthy, this being also the second highest price paid for the Hudson River Farm consignment.

Aside from the two mentioned, seven other horses from this consignment sold at $1,000, the highest price being paid by Leo Oettinger—$1,500 for the two-year-old filly Alcy Guy 2:18¾. Al Hughes, manager of Coldstream Farms, Lexington, Ky., and H. G. Winnings, acting for S. A. Fletcher of Indianapolis, were among the prominent buyers. The former bought Margaret Parish 2:08¾, once owned by J. E. Madden, for $1,350, and also two others, paying $1,075, while the latter bought among others Sapphire Worthy, the dam of the $3,025 weanling, for $1,200.

Two highly-bred mares joined the brood mare list at Curles Neck Farm at a cost of $1,525, while Mr. Oettinger also bought two others besides the one mentioned, paying $1,300. E. J. Tranter, H. Grunzfelder of New York, J. H. Kernochan of Newark, N. J., and Jacob Lang of Buffalo were payers of four-figure prices, while the same mysterious "George Grant, New York," again figured as buyer, getting among others the once famous race mare Lulu Arion, by Peter the Great.

The fact that outside of Guy Axworthy, the remaining sixty-one head averaged close to $500 per head, showed that the general prices offered were higher than the management and consignors expected, and although it was a complete dispersal sale from one of the oldest breeding farms, yet not one was sold for less than $100. The first highest priced horse sold Wednesday was the two-year-old colt Extend 2:19½, by J. Malcolm Forbes, the buyer being Fatherland Farm, Ipswich, Mass., for $2,800. A consignment which made a satisfactory average was that from C. W. Baker, Middletown, Md., who sold thirteen head for an average of $512.75.

The attendance Wednesday was the largest of the week. So far the number of individual buyers has been unusually large compared with former Old Glory sales, showing a brisk demand. Those present who were not much interested in the ring, talked, sold, bought and argued horse and breeding subjects, conversations being liveliest where John E. Madden happened to be sitting or standing. In a group including Tommy Murphy and Madden, of course a sale took place in no time, as before parting Madden had sold to the famous trainer a Peter the Great yearling out of Sarah W., dam of Joan, for a small matter of $4,000, next to Bingara and Guy Axworthy the highest priced horse sold at the Garden during the week.

Among the out-of-town visitors was G. W. Slaughter of Detroit, who made arrangements with Tommy Murphy to train and race next year the promising trotter Lucille Spier, record 2:03¾. Robert L. Nash, the well-known Lexington horseman, closed a deal with Dr. J. C. McCoy under which he takes the stallion Admiral Dewey to Lexington for a stud season next spring. Judged by his record as a racehorse and sire of speed, Admiral Dewey is expected to receive much patronage in Kentucky under the management of Mr. Nash.

The stallion Bingara passed to a third owner Wednesday when Joseph Kleckner of Philadelphia sold him to B. A. Bulkley of Silver Springs Stock Farm, Goshen, N. Y., where the son of Bingen will be in stud service.

High Prices on Thursday.

Lively bidding and general high prices during the fourth day of the trotting horse sale at Madison Square Garden again demonstrated a brisk demand for trotting-bred horses, more so than at any of the previous three days. Over a score of offerings brought $1,000 or more, ten sold at $1,500 or over, while horses selling over the $500 mark were as numerous as has been for many years past on one day.

The highest price for the day was $4,200, which the Brook Farm, Chester, N. Y., paid for the yearling colt Dr. Elmore 2:24½, by J. Malcolm Forbes, while the Philadelphia trainer, Nick Grady, paid the next best, $3,100, for the good pacing gelding Roan Hal 2:00¾, a member of Tommy Murphy's stable last season. H. G. Winnings, of Indianapolis, Ind., acting for S. A. Fletcher of the same city, bought another fast pacer, the Bardstown, N. J., mare Baby Bertha 2:04¼, for $2,300.

The same buyer paid $1,300 for the four-year-old mare Rose Watts 2:29½, by Gen. Watts, while J. D. Callery of Pittsburg paid $1,700 for a yearling filly by the same stallion. Among metropolitan buyers who paid fancy prices was Charles Weiland, a Speedway driver, paying $1,100 and $1,025 respectively for the gray gelding Gunfire 2:09½ and the two-year-old filly Grace Worthy 2:17½, by Morgan Axworthy, from the consignment of Castleton Farm.

Trainer Fred Jamison paid $1,600 for last season's good campaigning gelding, Tommy Todd 2:08¼, this purchase also being made for Dr. W. M. Buechner of Youngstown. Thos. G. Hinds, well known among local amateur drivers and who trains and races his own horses, added to his stable the yearling colt Forbes Robertson 2:26¼, at a cost of $1,700, while Al Pennock's sensational half mile track trotter Walnut Maid (3) 2:12¼ passed to a buyer named C. F. Schiffdocker for $1,500.

The best average for the day was received for the consignment from James Westwater of Columbus, who sold eight head for a total of $7,500, or an average of $935.50 per head, four of them selling from $1,000 to $1,600. The thirteen yearlings, some with records, consigned by J. R. Magowan of Mt. Sterling, Ky., and all by his famous young stallion J. Malcolm Forbes, brought a total of $11,250, or an average of $865.35 per head, the prices in this lot ranging from $105 to $4,200.

The eleven horses, mostly youngsters, from Castleton Farm, were sold for an average of nearly $340, and as prices ran from $130 to $1,025 and only two sold for $500, the general average was quite satisfactory. The eighty horses sold during the afternoon session brought a total of $47,789, or the most satisfactory average of close to $600 per head.

A private deal which attracted much attention was the purchase of last season's sensational three-year-old trotter Suldine 2:08¼, by Trainer J. S. Murray, acting for Brook Farm, Chester, N. Y. The seller was the Pittsburg trainer, Walter C. Traymore, who acted for the horse's owner, R. H. Boggs of Pittsburg.

The stallion Bingara, that was sold Monday at auction for $5,200 and then sold privately for a reported price of $6,000 to Joseph Kleckner, who in turn sold him to W. H. Bulkley of Goshen for $6,500, came near being sold again Thursday, had not his present owner refused an offer of $7,500.

Prices Drop on Friday.

While the high prices of the animals from the big stock farms were not expected to hold up through the entire week, there was a good demand on Friday and the bargain hunters were much in evidence and were bidding higher prices than they had expected to pay for the horses they wanted.

The trotters that sold for $500 or over were not so numerous as on the previous days, but the demand continued and bids were lively during the entire day. The Great Miss Fowler, a four-year-old chestnut mare by Peter the Great, dam Hattie Fowler by Robin 2:22¾, second dam Maud Fowler 2:21¾, dam of Sonoma Girl 2:04½, brought $900 and was purchased by F. H. Galloway of Taunton, Mass. This mare had shown 2:18 this year in a trial, but the money was paid on her looks and breeding.

Sister Scott 2:16¾, own sister to the great Peter Scott 2:05, a four-year-old mare that had started in

but one race, was knocked down to Walter Cox for $500.

Josie Review, a five-year-old mare by Baron Review, drew a bid of $585 from J. F. Kingsley of Medford, Mass., and he got her at that price.

Curles Neck Farm made the high bid of $800 for Ruth Todd 2:16¼, a five-year-old mare by Kentucky Todd out of a mare by Directum Boy and whose fourth dam is the famous Ethelwyn, dam of 10, by Harold, and she will go to the farm to be mated with The Harvester.

Setzer Girl, a three-year-old with a record of 2:27 by Henry Setzer, was also purchased by Curles Neck Farm for a broodmare. The bid was $700.

Many Cheap Horses Saturday.

It is too bad that the average of the 1916 Old Glory Sale was pulled down on Saturday by the offering of many scrub horses that had neither individuality nor breeding to commend them. A. G. Asdikian, the Daily Telegraph representative, wrote that from 10:30 in the morning until 4 in the afternoon the horses offered were the poorest ever seen at any Garden sale, either an Old Glory or a Midwinter. They were sold, however, the highest price of the day being $260 paid for a mare by Joe Patchen, many horses selling for less than $100 and some as low as $25. These horses brought the average for the entire sale down to $356.50 when otherwise it would have stood at about $450.

Even at the average for the entire number sold the sale was a big success, and showed not only high value for trotting bred horses, but also big demand for them during 1917. The fact that of the 722 horses sold no more than 118 passed to new owners at $500 and over, shows that the final average of $356.50 was remarkably high for the entire consignment.

Eight horses only sold over $2,000, headed by Guy Axworthy at $20,000 and others as follows: Bingara, $5,200; Dr. Elmore, a yearling, $4,200; Ben Billings, $3,700; Roan Hal 2:00¾, $3,100; Volo Worthy, a weanling, $3,025; Extend 2:19½, a two-year-old filly, $2,800, and Baby Bertha 2:04¼, pacing, $2,300. These eight brought a total of $44,325, or an average of $5,540 per head, and represented the choicest stallions, fast pacers and above all the most promising and highly bred futurity prospects.

Thirty-two horses sold from $1,000 up to $1,900, the latter being the price for a weanling, bringing a total of $40,274, or an average of $1,258.60, while seventy-eight sold from $500 up to $975 for a total of $50,105, or an average of a shade over $6,423, no less than twenty-three of them selling from $500 to $550, indicating good and uniform values. The 118 head of the highest priced horses, therefore, brought a total of $134,705, or an average of $1,141.60, and represented not only the stars of the sale, but the right kind of material now in demand for racing and breeding purposes.

Plenty of Racing in Spite of War.

The flat racing season in England, which ended with the first week of November, was accounted quite successful notwithstanding that it ran into the third year of the war. There were 23 meetings in England, eleven at Newmarket, four at Lingfield, three at Catwick, three at Newbury and two at Windsor. There will be jumping meets during the winter, but as special trains are not permitted and the supply of petrol for automobiles is limited, the crowds are not expected to be up to the usual standard.

The king continued to lend his patronage and appears in the final list of winners with purses aggregating $3865 to his credit. All the classic races of the English turf were maintained, although many of them did not come up to the value of the past years.

The leading winning owner was E. Hulton, a newspaper proprietor, with $86,820. The Earl of Derby, whose time is almost wholly taken up by his duties as under secretary of war, kept his racing establishment intact and was the second winner with $45,830. The Duke of Portland was third with $40,025, Lord Falmouth was fourth with $31,500, J. Buchanan fifth, with $25,425, and Lord D'Abernon, head of the liquor control board during war time, is sixth, with $23,260. The winning jockey was S. Donoghue, who had 43 mounts first past the wire.

$20 a Pound for a Pony.

Carll Tucker's reported offer of $10,000 for Mrs. C. W. Fletcher's hackney pony Mighty Mite at the recent National Horse Show in Madison Square Garden was at the rate of $20 a pound, the weight of the bantam high stepper being just 500 pounds, according to William Carr, manager of Mrs. Fletcher's Halcyon Farm. Competing against ponies up to 14.1½ hands high, Mighty Mite won the Canadian Hackney Horse Society's gold medal, and also won the open class for harness ponies not exceeding 13 hands. She is a chestnut mare, 12.1 hands high, by Nipper, Jr., a full brother to James Cox Brady's champion stallion Irvington Model, and a prize winner at the Garden this year. Irvington Bounce II., the dam of Mighty Mite, was also the dam of Irvington Bouncer, a well known winner in harness and in hand, and of Mr. Brady's Irvington Fashion, three-year-old reserve champion of the recent show. Enfield Nipper, the sire of Irvington Bounce II., was the sire of Irvington Model and Nipper Jr., so that Mrs. Fletcher's midget is closely inbred to that remarkable sire, now dead.

The dead sire Zombro 2:11 is tied with General Watts (3) 2:03¾ as the leading sire of new 2:10 trotters for 1916. Each has five new ones to his credit.

Notes and News

The Billings weanlings averaged $716.

◈ ◈ ◈

This is the highest average trotting bred weanlings ever brought.

◈ ◈ ◈

Harold Cohen has consigned that good mare Vera Hal 2:05 and his trotter Harold C. 2:11¾ to the Chicago sale.

◈ ◈ ◈

Mabel Van 2:10¾ by On Stanley will be bred to Wilbur Lou (3) 2:10¼ next spring.

◈ ◈ ◈

Walter Cox marked eight of the new 2:10 trotters this year and Tommy Murphy comes next with six to his credit.

◈ ◈ ◈

O. P. Updegraff, who did the starting at the P.-P. I. E. harness meetings, officiated at Phoenix week before last and gave general satisfaction.

◈ ◈ ◈

The Western Horseman has over 1200 nominations to its stake that closed in November. This is a big increase over the stake that closed a year ago.

◈ ◈ ◈

Few stock farms ever received a bigger average at a complete dispersal sale than was received by Hudson River Stock Farm at the Old Glory Sale last Wednesday. Sixty-two head sold for a total of $49,905, an average of $805 per head.

◈ ◈ ◈

$258,370 was paid for trotting bred horses at the Old Glory Sale in New York last week. The total amount and general average ($356.50 for 722 horses) are far ahead of any similar sale during the past six years.

◈ ◈ ◈

At the dispersal sale of the stock owned by the late H. A. Greenwell, Lakenan, Missouri, held November 22d, the saddle bred stallion Easter Cloud 4128 was knocked down for $4,000, the highest price ever paid for a saddle bred stallion at auction.

◈ ◈ ◈

Remember that the $2500 Pacific Breeders' Futurity No. 17 closes for the nomination of mares on Monday next. Send in the name and breeding of your mare and the name of the stallion she was bred to this year, with $2, and you will have made a start toward winning a part of that stake.

◈ ◈ ◈

Ted Bunch started Zombrino 2:06¼ in twenty-one races this season, won eighteen first moneys, was second twice, and unplaced once. Zombrino is owned by Dr. J. G. Belt of Arizona and is a high class race horse. Ted's many friends in California are much pleased to know of his success.

◈ ◈ ◈

W. F. Whittier, of San Francisco, proprietor of Hemet Stock Farm, was a visitor at Phoenix during fair week and saw Hemet Queen pace to the world's record for yearling fillies. It goes without saying that he was highly pleased with the performance of the little miss.

◈ ◈ ◈

Terry Patchen, the big yearling trotter by Joe Patchen II., has trotted a quarter in 37½ seconds for Geo. Ryan at Pleasanton. Everyone that sees this colt likes him. He is perfectly level-headed and has made but one break so far and that was not his fault.

◈ ◈ ◈

George Ryan has worked the McKenzie yearling Carl Vernon by Vernon McKinney, dam by Carlokin, a quarter in 35 seconds and an eighth in 16½ seconds at the Pleasanton track. This colt looks like the real thing for the two-year-old pacing stakes next year.

◈ ◈ ◈

Barney Simpson is back at Pleasanton after a sojourn of several months around the New York trotting tracks. Barney, who was with the Meek Farm at San Lorenzo for many years, and has started as many young trotters and pacers in the speed kindergarten as anyone, says that he enjoyed his eastern trip, made a little more than expenses and saw a lot of good racing on the half mile rings. When they began showing him how high the snow was banked around the barns in an ordinary winter he did not delay his visit any longer, but bade good-bye to relatives and friends and bought a ticket for Pleasanton.

◈ ◈ ◈

In connection with the purchase of Dodge by Mr. Macomber there is a story worth telling. The story is that the purchaser got the great three-year-old at a less price than he ever expected. There was a difference of opinion between the Messrs. Weber & Ward, who owned Dodge, Franklin and the others that were to be sold to disperse the stable, as to the relative values of Dodge and Franklin. Early on the morning of the sale they were offered $20,000 for Dodge by an agent from Mr. Macomber. One was willing, but the other said no. The result was that after Willis Sharpe Kilmer had stopped bidding at $17,000 for Dodge, Mr. Macomber got him for $17,500, or $2,500 less than he had offered for him at private sale but a few hours before.

There are 35,000 horses and mules now at Lathrop, Missouri, which have been gathered by buyers for the allies for shipment to Europe. It requires 140 carloads of feed each week to feed these animals.

◈ ◈ ◈

Roy D. Mayes, of Dixon, California, owner of the stake winners Verna McKinney (3) 2:09¼ and El Paso (2) 2:18¼, has been on a trip east accompanied by Fred Chadbourne, the successful trainer who trains Mr. Mayes' horses. They visited New York during the Old Glory Sale and saw Guy Axworthy sold for $20,000.

◈ ◈ ◈

The Royal Society for the Prevention of Cruelty to Animals, of Great Britain, which is the Red Cross for dumb animals in the European war, has established an American auxiliary in New York City and is shortly to begin a campaign to raise $500,000 in the United States with which to care for the thousands of army horses and mules whose suffering, it is stated, "is one of the conspicuously pitiful features of the war."

◈ ◈ ◈

The returns are about all in and there are 85 new trotters in the 2:10 list. It was August 1st, 1884, at Providence, Rhode Island, that Ed. Bither drove the black gelding Jay Eye See the first mile any horse ever trotted in 2:10, and the very next day at Cleveland, Ohio, W. W. Bair drove Maud S. a mile in 2:09¾, and the list of 2:10 trotters contained only the names of these two for the next seven years, when at Stockton, October 20th, 1891, Senator Stanford's mare Sunol trotted a mile in 2:08¼ and became the world's champion.

◈ ◈ ◈

Mr. T. L. Davidson, proprietor of Indian Hill Farm, Salem, Oregon, expects to train seven head of trotters and pacers next season, all of his own breeding. These are Di-Alta by Diablo, dam by Altamont, that will be trained for a record, and a four-year-old pacer by On Voyage, a three-year-old trotter by The Bondsman, and a two-year-old pacer by Hal B., all out of the Diablo mare. He also has a three-year-old trotter and five-year-old trotter by Bonaday, and a two-year-old pacer by Excellency (son of Expedition), all out of Addiola Mack by McKinney.

◈ ◈ ◈

C. A. Durfee is back from his trip to Phoenix, and says the Arizona State Fair was a great success. As many as 15,000 people were present on one day and the crowd never got below ten thousand. The weather was a trifle cool the opening day for racing, but on every succeeding day it was ideal. He says that Clarence Berry had two mounts during the week and when he won the free-for-all pace with White Sox drove as good a race as anybody. As this race was in 2:06¼, 2:05¾ and 2:06 it is needless to remark that a poor driver could never have won it with Elmo Montgomery fighting for the lead every inch of the way with Jim Logan 2:01¾.

◈ ◈ ◈

The Cuban American Jockey Club will open its meeting on Wednesday next, and in February there is to be a big horse show in Havana at which many horses from the United States will be exhibited. Horses are shipped by rail to Key West, then the cars are loaded on huge ferryboats which can take 26 cars at a single load, convey them in five or six hours into Havana harbor, where the cars are then run by rail to the very doors of the stables at the track. Oriental Park, where the races are run, is a show place and represents an outlay of nearly a million dollars.

◈ ◈ ◈

Mr. T. E. Pollock, of Flagstaff, Arizona, whose mare Miss Axworthy Dillon was raced in her California stake engagements this year by Charles DeRyder, had several entries in the Phoenix races. The Californians who were at Phoenix state that Mr. Pollock was as highly if not more highly pleased when his three-year-old filly Bellzebola was only beaten a head by Lillian Van in 2:11¼ as he was when the filly won the two previous heats. "Wasn't that a great heat?" he asked as the horses passed under the wire in this heat. Mr. Pollock is a true sportsman and with a good California circuit in 1917 we may expect to see him race a stable here.

◈ ◈ ◈

The two-year-old pacer Oro Fino by Copa de Oro 1:59 will not be sent to the Chicago sale as Mr. C. J. Berry has purchased him from W. G. Durfee and will have him trained for the racing season of 1917. Oro Fino was not paid up in the two-year-old stakes in which he was entered, consequently when he developed phenomenal speed in the hands of C. A. Durfee last summer, there were no races for him except a purse race for $500 at the California State Fair, which he won in straight heats in 2:17¾ and 2:17½. At the Alameda County Fair he was started in a race for aged horses just to make up a race. The pacer Villa won this race, but Oro Fino was only beaten a head in 2:15 and paced the last half of the first heat in 1:03½ with the last eighth in 14½ seconds. In the second heat Oro Fino was separately timed the last half in 1:02½ and paced the last quarter in 30 seconds. Mr. Durfee senior says he is the fastest two-year-old he ever sat behind or ever saw and is certain that Oro Fino could have paced a half in 1:00 flat if asked to do so. Oro Fino is a royally bred colt as his dam is Lady H., dam of Chango 2:13½, Santiago 2:24¼, etc., by Del Coronado 2:09¼, second dam Gossie by Gossiper.

PLEASANTON TRAINERS NOT IDLE.

California's Horse Centre Is Filling Up With Candidates for the 1917 Campaign.

A Breeder and Sportsman representative concluded last Saturday was a good day to visit the Pleasanton Driving Park and look over the many horses and colts that are wintering there and being put in condition for training in the spring. We found that the stalls are filling up with horses that have been raced and more that have yet to learn what a race is, while the number of youngsters getting their first lessons in reining and harness work was surprising. There is not a trainer there but has from one to a dozen weanlings and yearlings, and quite a number of green two-year-olds are also there to be sampled for speed as three-year-olds. Unfortunately rain began falling soon after noon, and we did not get through more than half our tour of inspection, so will have to defer mention of the missed ones until another time.

We saw Schuyler Walton driving the chestnut, silver maned trotter that Henry Scott of San Jose raised and sent to Pleasanton to be trained. Mr. Longley liked this fellow so well that he purchased him from Mr. Scott and the horse certainly moves like a real trotter. He is one of the one-two-three-four kind, puts his feet down right and improves every time he is worked. A mile in 2:20 was shown by him last week and he finished strong and with plenty of speed and power left. He looks good enough for the races in 1917. The Prince Ansel yearling stud colt is another that has a world of natural speed, but he is full of the devil and would rather play than work. The Demonio two-year-old has a place in Schuyler's heart that is very warm and he expects to see her pacing in fast time as a three-year-old. The two-year-old by True Kinney is also improving every day. The mile in 2:10 which Star Dillon paced week before last did not hurt him any as he paced a mile in 2:11 last Saturday without any trouble and came back the second heat within a fraction of the same time . All the Longley horses are in excellent condition.

George Ryan, superintendent of the Pleasanton Driving Park, is playing foster mother to a dozen or more little long-haired future trotters and pacers that he took away from their real mothers a few days ago and is trying to make them forget it. Each had a box stall to itself last Saturday and was learning to lead by halter and how to get along without milk as a partial diet. They are a well bred lot and not one was making any fuss about the sudden change in its way of living. They are by Vernon McKinney 2:01½, Mahomet Watts 2:08¼, Quintell, Joe Patchen II. and other sires, out of highly bred and record mares. As all these youngsters are in good condition with plenty of fat on their ribs, they will learn to get along on hay and grain without losing weight or fretting over the loss of their mothers. There is a bay colt by Mahomet Watts out of Zombro Belle by Zombro, a filly by Mahomet Watts out of the dam of Anvilite (2) 2:21¼, one by Mahomet Watts out of Mildred Togo 2:11¼, one by Quintell out of Baroness Psyche by Baron Review, a filly by Mahomet Watts out of Eva J. by Zombro, one by Rapallo out of a Washington McKinney mare owned by the Oakland attorney, Mr. Asa Mendenhall, and a number of others. A bay filly by Vernon McKinney 2:01½, dam by Guy Dillon, second dam Russie Russell, dam of Ruth Dillon 2:06¼, etc., is a particularly handsome miss. She is owned by Mr. L. S. Mills of Barberton, Ohio. Mr. Jas. Errington is the owner of a yearling filly that Ryan is teaching harness manners to, and although she can show a 2:40 gait she will not be trained in her two-year-old form as she has no stake engagements. She is by Vernon McKinney 2:01½, dam by Searchlight 2:03¼, grandam by Direct 2:05½. There is some speed inheritance there. Mr. Errington was looking her over Saturday and was highly pleased with her. He also owns a weanling bay colt, full brother to the filly, that is also a fine looker. Mr. Ryan has a filly of his own that he thinks a good deal of. She is by Vernon McKinney and her dam is the dam of Miss Bond (2) 2:17½, by Sidney Dillon, second dam by Athadon.

Will DeRyder was giving Dunne & Lowery's stallion El Volante S. a little work last Saturday and this fellow is a grand looking trotter. He is a stout built one and is up to a mile in 2:15 right now, but is not allowed to step that fast, and miles around 2:20 are easy for him. He has never been raced and has had but little training, but he has learned to step fast and is good gaited. He is a 2:10 trotter if no accident happens to him, and is just the conformation for a stock horse. On Saturday DeRyder was working him with a fellow trainer who desired to go a mile in 2:20, and while the other horse had a hard time getting to the wire in 2:22, DeRyder had to almost pull the head off El Volante S. from the head of the stretch to the wire in order to let his companion finish on even terms. There are two fillies in the Dunne & Lowery string at Pleasanton that have been receiving their very first lessons, as they are foals of 1915. Both are by General Watts and are as finely formed and well developed fillies as anyone has ever seen. The larger one that is out of a Cochato mare, is picked by many of the boys at the track as the more promising of the two, but DeRyder cocks his eye on the one out of Native Bidwell and says she is one he picks for the faster record and the better race winner. But either of them will do.

James Sutherland, the veteran of all the trainers at Pleasanton, is attending to a string of eight or nine horses during the time the junior member of the firm of Sutherland & Chadbourne is on his vacation in the east. "Dad" says he is not working any of the horses any harder than he is working himself but the writer did not get time to visit his stall during the short time he was in Pleasanton, thus failing to get a list of the members of his speed school. But we know Sutherland & Chadbourne will be at the races in 1917 as they have got into a habit of making a money winning campaign every year, and don't propose to break it. With Chadbourne to do the training and driving and Sutherland to manage the business end, this is a winning team on almost any circuit.

Al Schwartz, who will again train at Pleasanton, has increased his stable 100 per cent—he had but three horses last year and now he has six. His mare Miss San Francisco came through the season sound and all right every way and will be a good one in her class next year, which is the 2:16 class on mile tracks. Schwartz has recently added to his string a big five-year-old sorrel mare by Charley D. 2:06¼ that looks and acts as if she might develop into something pretty fast. She was bred by Mr. D. McNally of Livermore and is out of Ruth C., dam of Red Light 2:14¼, O'Kane's Pride 2:19¼, etc., by Guide, son of Director. She was recently purchased by Mr. J. J. Ryan of San Francisco, who has named her Lillie R. and turned her over to Schwartz to train. As a three-year-old this mare worked several miles around 2:19, and quarters in 31 seconds. She is a big mare, but clean limbed and all right every way and Al thinks well of her. Another new member of his string is the two-year-old pacing filly Vinnie Direct that is by Adver Direct 54048, dam by Iran Alto, second dam by Monterey. This is a classy little miss that paced an eighth in 21 seconds the third time she was hooked up and taken on the track. This is surely stepping some for a baby pacer in the kindergarten class. Miss Vincent S. is a bay pacing mare by Prince McKinney, dam by Sidney Dillon. She has shown a mile in 2:10 and will be seen on the California circuit in 1917. The others in the Schwartz string are the black mare Directess Mac by Nearest McKinney that raced well on the circuit this year, and the matinee favorite Rosie O.

Henry Smith has quite a big stable of horses to look after. He has Mr. S. S. Bailey's horses, among them O. U. C. 2:07¼ and Bertie Seattle, that were raced this year. There is a young pacer called Jim de Oro by Copa de Oro out of Easter D. that is a fine prospect, also the three-year-old Bonita Guy by Bon Guy 2:09¼ out of a mare by Tidal Wave 2:06¾, second dam by Zombro 2:11. Mr. Bailey is still at Portland but is expected at Pleasanton to tell the boys just how he managed to place his bets so as to win about $35,000 on the recent election. In addition to these horses Smith has charge of T. D. Sexton's Future Tramp 2:09¼ that is in fine shape now, looks and goes perfectly sound and should be as good a horse in 1917 as he was in 1915 when he took a record of 2:09¼ driven by his owner and worked a mile in 2:08. He was not raced this year. One of the sweetest little yearlings at Pleasanton is Mr. Sexton's filly by Vernon McKinney 2:01½ out of a mare by Oh So. She has worked a quarter in 35 seconds for Smith who is most enthusiastic about her. Smith is jogging his own mare Gertie D. by Charley D. 2:06¼ out of Gertie A. This mare is now five years old, has paced a mile in 2:16, a half in 1:05 and a quarter in 30 seconds. She will be ready for the 1917 races. Besides the above speed horses Mr. Smith is breaking three or four horses for outside parties, and all in all he is kept pretty busy.

Millard Sanders was giving Peter's Queen slow work and is getting her ready for the races of next year. This mare was recently purchased by Messrs. Dunne & Lowery from C. A. Harrison and Millard believes she is one of the best prospects he ever handled. A mile in 2:13¼ was rather easy for her last year, and she looks to be a very much better mare now than she was then. Sanders says he fully expects her to trot well below 2:10. The other horses in the Sanders string are the three mares belonging to Mr. Rudolph Spreckels, mention of which was made in these columns a few weeks ago. As these mares were only taken from a pasture a few weeks ago where they had been running for two years, they are only receiving jog work. Sanders says he will be ready to express an opinion about their speed prospects when he has had them three months, but that he can say now that he likes the trotting mare out of Hulda 2:08½ and the pacing mare out of Annie Rooney 2:17 mighty well and expects them to show well later on. Both are by Washington McKinney.

C. Berry, who is training Mr. I. L. Borden's horses, was jogging a very handsome little dark bay mare by Barney Barnato that while only a green three-year-old a few weeks out of pasture (that was extra good feeding, by her looks), shows a lost of natural speed. Mr. Berry drove her a quarter in 35 seconds handily and she is a square trotter. She is one of the good headed kind that does not worry or fret about anything and marches off at a good fast trot as if she liked it. She looks rugged and to the writer's opinion is one of the best prospects in the Borden stable. Mr. Berry states that had the two two-year-olds that he started in the stakes this year been in as good shape as they are now they could have secured a good share of the money. Skyrocket by Albaloma has recently worked a nice mile in 2:22 with the last quarter in 32 and the last eighth in 15 seconds. The pacer Tommy Atkins by Tom Smith did a mile in 2:20 right handily. They should show up well in the three-year-old stakes next year. Berry is greatly pleased with a couple of yearlings in his string, one a trotter by Ed McKinney out of a mare by Hambletonian Wilkes, the other a pacer by Barney Barnato.

There are a number of trainers at Pleasanton track that we did not have time to interview during our short visit between trains last Saturday. Harry Bell of Grattan Boy fame is there and is looking after several youngsters that are just being weaned, J. Frank has a few, Ed Jones is handling several for S. Christenson, among them a chestnut filly coming two years old by Peter the Great out of Carrietta, dam of five, by Directman, and a black gelding by Palite that is trotting around 2:20. Trainer Griffith has three or four and there are a number of others.

There are four or five stables of runners at Pleasanton track. George Strate has eight or nine head of imported thoroughbreds owned by Mr. J. Rossiter, A. G. Dunlap has a number, and the strings of Louis Becker, Ward E. Hall of Sacramento and others will receive attention at some future time. The half mile track has been specially prepared for the use of the thoroughbreds and is in fine shape for the training of these horses.

—o—

Will Durfee is sending some high class horses to the Chicago Sale. Besides The Lark 2:08¼, Rags 2:09¼, Clara Mac 2:04½ and a couple of carloads of mares and young horses, he has decided to send Hermes (3) 2:13¼, winner of the Occident Stake, the State Fair Futurity, the Pleasanton Futurity and second in the Stanford Stake, which were all the races this three-year-old son of Carlokin started in this year. As Hermes is out of Miss Quealy, a full sister to Manrico 2:07¼, the breeding of Hermes should appeal to buyers. But in addition to his royal breeding he is a real race horse and should trot below 2:10 in his four-year-old form.

◈ ◈ ◈

We learn that the popular and successful reinsman Fred Ward, who is the trainer of the Hemet Stock Farm's successful racing stable, was taken ill at Phoenix and immediately after his arrival at Los Angeles was taken to a hospital where he underwent an operation for appendicitis. At last reports he was doing well and every person that knows the genial horseman will hope that his recovery will be rapid and complete. Mr. Ward's campaign through the Middle West this season was a most successful one and besides giving a champion and near champion records to some of the Hemet Farm colts and fillies, he won a goodly sum in purses and stakes with the farm's horses and his own.

◈ ◈ ◈

The first of the get of Mahomet Watts 2:08¼ to appear in harness on the Pleasanton track is a brown or black filly out of Daphne McKinney, dam of Frank N. 2:07¼, Bon McKinney 2:24¼ and that good two-year-old of this year Elloretta D., winner of second money in the Pacific Breeders' Futurity, her only start. This Mahomet Watts filly is owned by W. E. Detels of Pleasanton, and when she was driven on the track at Pleasanton last Saturday it was said that she was the first of the get of Mahomet Watts to wear harness in California. She is a picture for looks, and steps out at the trot as if it were her only gait. That she will make speed and be a fast member of a fast family is a pretty safe prediction.

◈ ◈ ◈

Trainer Hildreth has adopted a new system of handling yearlings which are taking their first lessons. After being given exercise under saddle for a short time they are rubbed down lightly and then turned out for an hour's play or grazing in their paddocks, and following this comes another short lesson under saddle to be followed by another "recess," and so on until they shall have had enough work for the day. He also follows a similar plan with his horses which are out of training, giving them alternate hours in their boxes and out in their paddocks, from the time of day when the air and sunshine make it pleasant out of doors, until the chill of evening comes on.

◈ ◈ ◈

For some unaccountable reason the breeders and owners of trotting bred horses are poor patrons of horse shows. Says the New York World of Sunday last: "A single breeders' class for trotters, which brought out three still active roadsters in masquerade as 'stallions, kept for service,' does not speak for appreciation of the National Horse Show with the organizations and individuals devoted to the interests of the light harness horse. The usual classes for stallions, mares and fillies, with liberal money prizes, were announced, but they failed to fill. As the Horse Show is held in the greatest clearing house for trotters in the United States, and in the city where the owners of nearly all the greatest trotters and breeding farms have homes, the encouragement of the halter classes as the show should improve New York as a light harness horse mart."

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

This Is Hard to Believe.—Oakland, Cal.—Horatio is no more.

Some time one night last week Horatio died a most unusual death, a tragic climax to a remarkable life.

Horatio was a pet sucker which, by being able to live out of water, has baffled the world of science for six months.

S. H. Masters, manager of the Realty Syndicate, one day found the fish flopping in the mud in the Oakland estuary, put it in a can of water and brought it home. Masters performed one of the scientific wonders of the age by getting the fish to live out of water and he now bemoans the loss of his pet.

By keeping a constant temperature and removing a millimeter of water each day from Horatio's pool in the back yard of the Masters home at 396 Fairmont avenue, Masters eventually got the sucker to breathe the atmosphere.

The fish was kept in a cage in the back yard, but due to the cold last week, Masters brought Horatio into the kitchen. Near the kitchen sink was a bucket of salt water. While cavorting about the kitchen Horatio found the water. He heard the call of the wild and plunged into the bucket where he was found in the morning by Masters, drowned.

Coast Fly-Casting Plans.—A movement, it was announced, has been launched to give the fly and bait casting game on the Pacific Coast the most powerful boost in its history by an alliance of the casting clubs in Los Angeles, San Francisco, Portland, Seattle and Tacoma, for the purpose of holding each year in the cities named a casting tournament in which each club will enter a three-man team for the Coast championship, and as many other casters as desire may compete.

It is the purpose of the five clubs, all of which are affiliated with the National Association of Scientific Angling Clubs, and in which the San Francisco Fly Casting Club is taking the initiative, to have the particular club under whose auspices each annual tourney is held, finance that particular tourney, and the five clubs, on a pro rata basis, pay the traveling expense of all visiting teams.

The matter will be taken up at a special meeting of the Southern California Rod and Reel Club Casting Auxiliary, with a view to holding one of these tournaments in Los Angeles.

Whale Steak Is Latest.—Delivering a solar plexus blow to the high cost of living, Capt. John D. Loop, Long Beach's veteran whale hunter, flooded the meat and fish markets with choice cuts of tenderloin from a huge "marine buffalo" or finback whale, which is also sometimes called the "venison of the sea," because of its delicious flavor.

Capt. Loop killed the huge leviathan, which is one of only a few that have ever been captured on this Coast, sixteen miles off the western end of Catalina, after a thrilling running fight of three hours. The big finback, with two harpoons in its body and a terrific gap in its head from a bomb shot, gave the launches Camiguin and Fashion a five-mile chase and stubborn fight before it finally gave up with a second rifle shot in its side. The whale measured sixty feet in length and its weight was estimated at forty tons.

Fish and Game Exhibit.—With the object of teaching the people of Southern California the value of the fish and game of the state and the necessity of the conservation of these two great natural resources, the most effective fish and game exhibit ever arranged in Los Angeles was opened this week at the State Building at Exposition Park. The exhibit occupies the marine room of the building, which has a floor space of 100 square feet.

Scenes from the Greenhorn Mountains, Kern county, and other scenes from points on the coast line from San Francisco to San Diego, assist in making the exhibit attractive. Glimpses of Lake Tahoe, the San Joaquin Valley, Yosemite and Salinas Valley are presented by a large frieze upon the wall of the room. Many little grottoes, showing various scenes of wild life, small streams with brook trout lazily swimming in them, grottoes in which are mounted stuffed birds, deer and other animals, aid in adding to the attractiveness of the exhibit.

Here's a Trained Bass.—The Yellowstone National Park management has demonstrated that the confidence of wild animals can be won through kind treatment. This, coupled with a lack of effort to capture or injure them, imbues the animals with a trust in mankind so that they become chummy. In the park they are protected by man and law. While the wild animals have received the necessary protection, fish have received very little attention. It has remained for Ed. Bingham, of Koshkonong Lake, to educate a fish to the extent that he is not only a delight as a pet, but has become a necessity to Ed along the lines of successful fishing.

Ed Bingham is a character. Born and raised upon the banks of Lake Koshkonong, he is thoroughly conversant with every nook or likely fishing spot in the lake, which the old-time song as sung by Dr. Woodcock tells us is "four miles wide and nine miles long." Bingham has charted the bottom of the lake. It is interesting to sit upon the bank and have him point out the likely places. Off a certain point 200 feet "in a northeast direction" will be found the spawning beds of the blue gills. Off Duck Point 186 yards directly east the celery beds commence and extend within thirty-eight yards of an old duck blind, from which he has shot for years. At this point will follow a series of duck stories, about the wonderful bags made, the noted men who have shot from the point or the marvelous workings of his Airedale dog, the premier retriever of the world.

DIFFICULTIES IN HUNTING GAME.

Hard Work Is Required on Quail and Skill with Gun Is Needed.

There is a good stock of quail left in the country, but there are educated now and hard to do business with. The game is not to the inexperienced. In fact, the birds are about as hard to get on terms with this season as they ever have been when as plentiful relatively as this season. This has caused some of the hunters to think they were scarce. Good hard hunters who can shoot and do not shy at hills seem to be getting their limits right along, however. Some haven't missed it yet. Of course, the fellows who want to lie under a tree at midday and bowl over their fifteen birds are out of luck. But quail are well worth working for and to a dyed-in-the-wool enthusiast the work is worth while in itself.

Duck shooting was good in the middle of the week, and many limit bags made, but these fell mostly to the expert shots. Some people have an idea that shooting ducks on a club is an entirely different game from "wild" shooting. As a matter of fact, all the best clubs hope to do is to reproduce as faithfully as they can the natural conditions of a region favorable to ducks. While some do succeed in making it pretty easy, every veteran wild-fowler can recall days and places where in the wildest kind of shooting they came piling in to get out of the wind perhaps, and no club could make the shooting simpler.

The frequency with which limits are "limited" to the men whose skill with a shotgun is well known should prove that there is something to this game even for those who lack the experience of it and know.

Of all the diversions sportsmen follow it is doubtful if any equals in personal satisfaction the art of wing shooting, although that other allied art, fly casting, comes pretty near. Studiously as they seek to conceal it, all good shots are more than happy in their skill. And in wing shooting, the highest science is ducks—figuratively as well as literally. Ducks are wary, and no amount of attention can entirely educate it out of them, although it helps to reduce the number of long shots. It is in these that the difficulty comes. Ducks are big birds and seem nearer than they really are. When in good range they are not particularly hard to hit or to kill either. It is the long shots that test gun, ammunition and man as well. And they are forever offering long shots. That is why good shots will bag so many more than ordinary or mediocre shots. The star performers are dangerous throughout perhaps a 180-foot zone, covering twice the aerial area of the chap who can connect only a little beyond a hundred feet.

Some people think snipe are hard shooting, and to anyone who cannot handle a gun fast and accurately so they are, but they usually are in easy range and that helps a lot. The same is true of quail, also, but there another factor enters. They get up with such a fuss about it that some shooters cannot keep a tight hold on themselves and blaze away prematurely to an unduly large percentage of misses. The best quail shots do not seem to be in much of a hurry about it, yet they lost no time. The deliberate chaps who "ride 'em" and drop their birds in the best places available are usually those who take the most beating in the field.

Canvasbacks Easy to Hit—Canvasbacks are not a hard bird to hit for anyone who can hit speed; they fly very fast, but steadily, and once men get geared up to their gait with a gun it is all a matter of close shooting and hard hitting with No. 4's. A really good 16-gauge will make a massacre among them, properly loaded and skilfully administered; and they fall victims to 20's favorably placed. The lighter-bodied spoonbills, teal and sprigs are artful dodgers and can jump the gun in a way utterly beyond a heavier-built fowl, although they take less beating by far than these muscular, hard-boned, down-armored "bull necks" seem able to assimilate. A good rule is to shoot all single "cans" twice.

FAMOUS DOG HAS BIRTHDAY PARTY.

Royally-Bred Pekingese Is Now Fourteen Years Old. —Other Kennel News.

Down at the Peking Kennels, owned by Dr. Mary H. Cotton, at Mineola, champion Chaou Ching-Ur recently celebrated her fourteenth birthday with an informal reception when she received the congratulations of many of her old friends and admirers.

Her glossy black coat was set off by a bow of delicate pink, one of the newer shades, and every one said she never looked prettier, which is saying a good deal and is more than most will be able to do at a corresponding age.

Receiving with her were three of her admirers and comrades, Tim Ta-Jen, of Peking, a rich cream-colored dog with a big bow of dark red; Peking Wang-Fei, his sister, sun colored, decorated in delicate blue, and Chusan, a rich apricot in pale green.

Ch. Chaou Ching-Ur was the first champion female Pekingese, and is royally bred, having first seen the light of day in the royal kennels of the late Empress Dowager of China

At the early age of six weeks, she was presented by her royal highness to the daughter of an American army officer and brought by her to this country.

Several years later when Mrs. Nicholas Longworth, then Miss Alice Roosevelt, made her tour through the East, the Empress Dowager presented her with a black Pekingese much like Ching-Ur, except a male.

The blacks evidently were much esteemed by the late Empress, though her favorite was a white and tan, and she much admired the creams, apricots, ambers and fawns.

During the five years that the Spokane Humane Society has operated the city pound, according to the statement of Manager J. E. Rudersdorf, its officers have responded to 22,225 calls (both pound and cruelty cases), and have traveled 36,000 miles. Nine hundred thirteen head of stock were impounded, 6,836 dogs and 3,800 cats. In the animal protection department, 5,000 animals were involved and 3,000 communications answered.

• • •

Sam Crabtree has just suffered a severe loss in the rather sudden death of his well-known winning dog, Failsworth White Monarch. A son of Wroxham Viking, this all-white dog had made a big name for himself on the bench. He won a very large number of first prizes, and several times special for best in show. At Cruft's this year he topped the Open and Limit classes in what were considered two of the best under 45 pound classes seen for some time. His last outing was at Stockport, where he annexed the cup for the best in the show, winning the trophy outright. He was also a successful sire as well as a good pal, and his loss will be keenly felt at Highfield.

• • •

The many Airedale fanciers who saw the young dog Rosanoma Smoke at the recent San Jose show will regret to hear of the death of this promising youngster, who succumbed to an attack of pneumonia a few days after the show. This is a great loss to his owner, Mr. S. Boehm of Santa Rosa, Cal., who is a new fancier.

• • •

News reaches us of the death of Mr. G. F. Fawcett, which took place at Liverpool, England, Sunday, October 1st. The deceased gentleman was the last of the famous coursing firm of Messrs. Fawcett, who won the Waterloo Cup no fewer than five times. Fabulous Fortune in 1896 gave them their first victory, and in 1900 and 1901 Fearless Footsteps, the beautiful daughter of Fabulous Fortune, won the trophy both years; 1902 found the famous Saughall Kennel again winning the blue ribbon of the leash with Farndon Ferry; and in 1903 Farndon Ferry was defeated by a kennel mate in Father Flint. Thus ended the great Cup victories, though in 1912 Fly to the Front won the Waterloo Purse, and as late as 1915 False Forecast, a great favorite for the Cup, won premier place in the Plate. It will be recalled that Faster and Faster and Fitz Fife ran up to the mighty Fullerton in 1891 and 1892. The deceased gentleman, who was in his seventy-seventh year, was most highly esteemed by all who had the pleasure of knowing him—Kennel Advocate.

Care For Dog's Teeth.—The opening of a new establishment for the care and treatment of dogs, known as the Telephone Kennels, at 530 Fulton street, San Francisco, has been announced. The enterprise is under the management of Dr. Ira B. Dalziel, veterinary dentist, who has been prominent in San Francisco as a horseman for many years.

The kennels are equipped to give attention to every detail of dog culture. Special attention, however, is given to the conditioning and exhibition of dogs at shows, and the boarding of dogs under healthful and sanitary conditions. Electric dental machines have been provided for cleaning, polishing and treating dogs' teeth and electric machines for clipping. A specialty is made of washing dogs, hot-air drying machines being installed and heated rest chambers provided for small dogs after bathing. Dogs called for and delivered.

It is the intention to have constantly at the kennels for sale a variety of dogs of all breeds and execute commissions for the purchase or sale of dogs. Dr. J. B. Boomer, veterinarian, is in charge of the kennels and an invitation is extended the public to call and inspect the premises.

CHICAGO AFTER THE NEXT GRAND AMERICAN.

Trapshooting Organizations of the "Windy City" Have Agreed to Erect Ten Traps.

[By Peter P. Carney.]

The annual meeting of the Interstate Association for the Encouragement of Trapshooting will be held in Jersey City, N. J., the first Thursday in December. Because of the vast amount of business on hand it is more than possible that the meeting will last more than one day.

To a great many persons the annual meeting of the Interstate Association means nothing, but to the 600,000 trapshooters and their friends it means a great deal. It is at this meeting that announcement will be made where the next Grand American Handicap and tournament will take place, also the dates and the places where the Eastern, Southern, Western and Pacific Coast Handicaps and tournaments will take place. Everything the Interstate Association does is for the regulation and the improvement in the conduct of trapshooting tournaments—big and little.

From the time of the Grand American in August until the annual meeting is the season for suggestions on the improvement of trapshooting and the Interstate Association officers have received more than 2,000 suggestions. These will all be considered. Some of them are not worth the paper they are written on; others are very valuable. Trapshooting today is second only to baseball as an American sport and with its vast growth in the past five years there are many things still to be done to boost the pastime.

Five cities have applied for the Grand American Handicap and tournament—the blue ribbon event of the trapshooting season—the "world's series" of trapshooting. Only for this world's series no admission is charged. Strange to say, after all the agitation about having the tournament in the East, not an Eastern club has put in a bid for the tournament. Chicago, Indianapolis, Milwaukee, St. Joseph and Toledo are the cities that would like to stage the classic—and at this time it looks as if either Chicago or Indianapolis will get the tournament, with Chicago having the edge.

Chicago guarantees a place—in one of the parks—within 15 minutes from the heart of the city, where 10 traps can be erected—and that 10-trap idea makes a hit. Indianapolis can possibly do the same, but Chicago shooters are working harder for the tournament, and that means something. Then, too, trapshooting took a wonderful jump into popularity after the 1915 tournament in Chicago, and this all helps the Chicago cause. The Chicago Gun Club promises that if the event is given to the "Windy City" that it will excel anything ever attempted in a trapshooting way.

San Francisco and San Jose have applied for the Pacific Coast Handicap for 1917. This is in direct contrast to the 1916 event. There wasn't an application for it. San Francisco wants the tournament because they assert it has been staged in Portland and San Diego and should go to the central section next year. No matter which place the tournament goes to it will be held in May or June.

There hasn't been much noise made about the other handicaps. Omaha wants the Western just as long as the association will permit it to be held there, and Memphis will take the Southern every year without fighting for it. Wilmington, Del., wants the Eastern again. The biggest Eastern tournaments have been held in Wilmington. Trapshooters are as plentiful there as automobiles are in Iowa.

Many of the suggestions to the Interstate Association deal with the Grand American. Some say limit it to 90 per cent. shooters, others say increase the entrance fee and keep out the poor shooters, etc. It isn't the idea of the Interstate Association to eliminate anyone. The Grand American is for all shooters. All trapshooters are invited and are wanted, and some way will be devised in due course of time to make the majority satisfied. The Interstate Association has many plans for the improvement of the sport and many new schemes for its development will be incorporated in the report of President T. E. Doremus.

Los Angeles Club.—The shooters who attended the big turkey shoot at the Los Angeles Gun Club on Sunday came away more than satisfied. Most of those who took part captured birds and in doing so had excellent scores.

W. A. Hillis surprised all the old-timers by smashing tar hawks from every angle and as a result won three highly prized and hard contested for turkeys. Not to be outdone by Hillis, Dr. Packard, Owen Evans, Guy Holohan, Sam Smith and Heinie Pfirrmann did a little shooting and as a result each captured two Thanksgiving birds.

C. W. Fish, H. E. Sargent, W. A. Cornelius, B. H. Carnahan, C. T. Greenfield, William Kennedy, E. K. Mohler and George Persinger each captured one turkey and were well satisfied with their day's enjoyment.

Some very good scores resulted from the day's program. C. W. Fish was in rare form and smashed 142x150 targets for the day. Owen Evans was close behind with 141x150, while H. E. Sargent broke 140x150. E K. Mohler smashed 135x140 for the day.

The complete results of the day were as follows:

C. W. Fish 142x150, O. Evans 141x150, H. E. Sargent 140x150, E. K. Mohler 135x150, H. M. Gilliam 97x125, Charles Veries 114x120, H. D. Blanchard 110x120, H. Pfirrmann 106x120, B. H. Carnahan 105x120, W. A. Cornelius 105x120, Geo. Pershing 102x120, Wm. Kennedy 97x120, W. A. Hillis 93x105, Mrs. Pfirrmann 85x105, L. L. Sheldon 50x100, G. Holohan 76x90, T. B. Sloan 75x90, H. Hoyt 73x90, H. Cline 71x75, L. M. Packard 71x75, Seth Hart 66x75, S. R. Smith 65x75, E. B. Thorning 62x75, H. R. Hamlin 59x75, H. P. Martine 56x75, C. M. Wood 48x50, Guy Pulley 45x50, M. D. Towne 42x50, F. H. Teeple 42x50, C. F. Brown 37x50, H. J. Bauer 36x50, W. Hall 36x50, A. J. Petersen 22x50, Geo. Tuckett 43x45, C. T. Greenfield 39x45, C. F. Nichols 39x45, F. H. Nichols 37x45, H. W. Nelson 33x45, Dr. Cooper 25x30, L. E. McGinnis 24x30, H. T. Brown 22x30, H. D. Hays 22x25, C. W. Griffith 20x25, G. Steel 20x25, H. E. Huston 16x25.

Largest Trapshooting Clubs.—There were 3961 trapshooting clubs in the United States on the first day of January, 1916—there are more than 4500 now, and in that vast number there are some powerful organizations. Here are the 13 largest trapshooting clubs in the country:

New York Athletic Club, Travers Island, N. Y.
S. S. White Gun Club, Philadelphia, Pa.
Wilmington Trapshooting Association, Wilmington, Delaware.
Chicago Gun Club, Chicago, Illinois.
Cincinnati Gun Club, Cincinnati, Ohio.
Oriole Gun Club, Baltimore, Maryland.
Memphis Gun Club, Memphis, Tennessee.
Portland Gun Club, Portland, Oregon.
Indianapolis Gun Club, Indianapolis, Indiana.
Golden Gate Gun Club, Alameda, California.
Los Angeles Gun Club, los Angeles, California.
Pastime Gun Club, Detroit, Michigan.
St. Louis Trapshooters' Association, St. Louis, Mo.

There are many automobile and country clubs that have taken to trapshooting, and these organizations are much larger in numbers than some of the clubs listed above, but the classification was made on trapshooters alone. The New York Athletic Club has as many trapshooters connected with it as any organization in America, with possibly one exception.—[Peter P. Carney.

Amateurism in Trapshooting.—There was a time when the Interstate Association for the Encouragement of Trapshooting gave many thousands of dollars in cash to the trapshooters of the country to compete for. Last year the association decided to give clubs that worked with them the full value of the money awarded in trophies or half in trophies and half in cash—but not all in cash.

It is said they contemplate going even further in 1917—to give only trophies. The idea is to get away from the professional spirit entirely. There was a time when a great many clubs would only accept cash, but that day has gone by. This past year several hundred clubs asked only for trophies.

Gun clubs have learned that the fellow who always wants "sweeps" or wants to shoot for cash prizes isn't the fellow who is the backbone of the club. The men and women who are glad to shoot for trophies, and who cherish them when they win them, are the people that make trapshooting and all other sports. The day of the "pot hunter" in trapshooting is fast nearing an end.

A. A. T. A. Vice-Presidents.—The following have been elected Vice-Presidents of the American Amateur Trapshooters' Association for a term of one year. The new officers will head the organization of the A. A. T. A. in their respective states and will serve in an advisory capacity in the national council.

Arizona—W. E. Mullen of Ray, Arizona.
California—C. H. Anderson of San Jose, Cal., President California State Sportsmen's Association.
Connecticut—E. H. Morse of Hartford, Treasurer Hartford Gun Club.
Kentucky—T. H. Clay, Jr., of Austerlitz, Ky.
Nebraska—H. E. Palmer of Bradshaw, Nebraska.
South Carolina—A. F. McKissick of Greenwood, South Carolina.
Texas—Walter H. Bertrand of Dallas, Texas.
Wisconsin—Ed. F. Leidel of Milwaukee, Wis., President Wisconsin Sportsmen's Association.
Wyoming—C. F. Nelson of Rawlins, Wyoming, President Wyoming State Sportsmen's Association.

Yale Trap Shots Win.—Yale won the intercollegiate gun club shoot at the Yale traps on Saturday with a score of 429 out of a possible 500. Princeton was second with 413, Cornell third with 362, and Dartmouth last with 351.

Captain Caesar of Princeton won the silver cup for individual high score with ninety breaks out of a possible 100. Ryan of Cornell was second with 89.

The tea mscores were: Cornell 39, Yale 99, Syracuse 115, Harvard 120, Maine 123, Dartmouth 133, Pennsylvania 170, Princeton State, 310, and College of the City of New York, 328.

Fur-bearing animals are now protected by general laws fixing close seasons in 26 States and Alaska, and in all the Canadian provinces except Yukon. Thirteen additional States have close seasons for one or two species of fur animals. Federal laws prohibit the shipment in interstate commerce of wild animals killed in violation of State laws or the shipment of the skins of such animals.

SPOKANE HAS MUNICIPAL TRAPS.

Northwest City Takes Lead in Furnishing Accommodations for General Public.
